Portfolio: Education

Agency: Education

Subject: School principals from local community

QUESTION

Could you provide a comparison of how many principals in North East Arnhem Land remote schools are employed and come from the local community compared with those from outside the community?

ANSWER

The Member for Mulka asked about the comparison of principals in East Arnhem Land schools from the local community compared to outside the community. There are 13 government schools in East Arnhem Land. There is one co principal at one of the schools in East Arnhem Land from the local community. There is another principal in the region who is Aboriginal but not from the local community. Obviously, this speaks to the importance of RATE in building the pipeline of school leaders from communities.
