Subject: FW: Objections to Richardson Park Upgrade

To whom it may concern

Re: the expenditure of \$20 million on upgrade of Richardson Park.

I would like to express my concerns regarding the current governments lack of consultation with the local community and plans to go ahead with an upgrade to Richardson Park.

Richardson Park was deemed unsafe and unsuitable for games in 2012. The decision to relocate to Marrara is well documented and all parties involved were looking forward to all the advantages relocating to Marrara would bring them. (Also well documented). It is difficult to understand why anyone would take this backwards step when Marrara offers or potentially offers facilities which include parking as well as all the services.

Most of the population lives in the Northern suburbs.

MARRARA MAKES SENSE

The land at Ludmilla is unique, a parcel of land which could be used to enhance the Rainforest area, made into parkland to give the Highrise community the government is obsessed with a bit more open space.

I would again like to reiterate my objection to your arrogance in making decisions without community consultation and then making it a Major Project.

Yours sincerely
Alison McShanag
