

LEGISLATIVE ASSEMBLY OF THE NORTHERN TERRITORY

WRITTEN QUESTION

Integrated Land Information System

Mr Elferink to Minister for Infrastructure and Planning

1. What will be the schedule of fees, especially for use of the Integrated Land Information System as a result of its commercialisation.
-

The commercialisation of the Integrated Land Information System (ILIS) involves the establishment of a comprehensive licence with a private sector partner to enable that partner to develop, enhance, customise and market services based on ILIS to third parties both within Australia and overseas.

The potential returns to the NT Government from this arrangement are defined in the commercial licence agreement, which is still being finalised, and must remain confidential.

Under this arrangement it is the ILIS software that is being commercialised. There will be no affect on existing ILIS services or on any fees that currently apply for the use of those services.
