

Aversion to the revised
Territory Coordinator Legislation.

Dear Sir I have lived in Alice Springs for the past 26 years and moved there from Melbourne because I fell in love with the country around Alice Springs.

I am extremely concerned about the continued spread of the invasive buffel grass and the subsequent hot destructive wild fires that are ruining the country around Alice. I also am very concerned about the Territory Government giving possible permission to companies for fracking and other companies for the unrestricted use of water.

I am strongly against the C L P's revised Territory Coordinators Legislation, as it will allow the Chief Minister and the Territory Coordinator to override many established procedures and democratic processes and laws, that effect our environment and its resources. It needs consideration and scrutiny before any decisions are made that affect the long -term health of our environment in the Territory.

Thankyou Henry Smith.
