Subject: Confirmation of the work on the easement next to Stella Maris was scoped out with the developer

From: Mr John Elferink to Power and Water Corporation
Power and Water Corporation

Question: **10-3**
Can Power and Water confirm that the work done on the easement next to the Stella Maris was fully scoped out with the developer prior to the works commencing, or was there some unintended and additional consequence flowing from the ongoing work that was being done?

Answer:
Answered On: 23/06/2011
Answer: In relation to the Stella Maris issue, water and sewerage works are under way in this area, as Mr Pudney indicated earlier on. These works were actually initiated as part of the original planning scope and are associated with increasing the capacity in that area, as Mr Pudney indicated. The contractor has some temporary work in place with exposed pipes, and these will be replaced and modified with permanent works in the near future. There are also exposed stormwater pipes in the area, which is obviously a matter for Darwin City Council, not for Power and Water.
