Question on Notice No 1.2

Madam Speaker, could you give us details on how you have worked out that there would be a 5.6% reduction in CO2 emissions?

**Output Group: Parliamentary Services**  
**Output: Building Management Services**

I am advised the previous Director of Building Management received advice based upon the tonnes of CO2 emissions which would emanate from the amount of power used after further reductions were made.

Based on the ongoing energy reduction measures put in place, the Department has aimed for a 5.6% reduction because of the reduction in power used.
