

LEGISLATIVE ASSEMBLY OF THE NORTHERN TERRITORY

WRITTEN QUESTION

Dr Lim

to Minister for Infrastructure and Transport

---

**\$30 Million Fix-Up for Alice Springs Hospital**

Please provide a list of the remediation works that have to be undertaken at the Alice Springs Hospital since the completion of its refurbishment in 2001 and further, provide an update on the remediation work that is being undertaken.

**ANSWER**

Rectification works relating to fire protection, electrical reticulation, hydraulic services, mechanical services and medical gases are required in many areas of the redevelopment works undertaken by John Holland.

Rectification works of this nature have been undertaken in the:

1. Clinical Management Ward; and
2. Day Procedure Unit.

Further, Ward 4 has been converted into a decanting ward to allow for the rectification of other areas of the hospital.

Minor works, such as sunshading and interim works on air-conditioning and water systems, were undertaken prior to rectifications works commencing.
