

LEGISLATIVE ASSEMBLY OF THE NORTHERN TERRITORY

No. 269

WRITTEN QUESTION

J Davis to the Minister for Children and Families, Hon Robyn Cahill OAM MLA:

Homelessness Services

1. How many people are currently homeless in the Northern Territory?

The Department of Children and Families (DCF) does not maintain a real-time count of people experiencing homelessness in the Northern Territory (NT).

The latest official estimate from the Australian Bureau of Statistics (ABS) 2021 Census was 13,104 people whose usual residence was in the NT were experiencing homelessness on Census night. This represented 564 people per 10,000 population (note: Census estimates are not a live count and may under-record people experiencing homelessness).

a. Please provide a breakdown by gender and age — under 18, then by decade.

2021 ABS Census data provides the following NT breakdown:

Age Group	Male	Female	Total
Under 12	1,416	1,336	2,748
12–18*	853	810	1,661
19–24	778	817	1,590
25–34	1,052	1,239	2,291
35–44	783	954	1,732
45–54	699	763	1,466
55–64	450	557	1,007
65–74	223	231	448
75 and over	70	79	147
Total	6,321	6,779	13,104

* ABS age categories do not allow an exact “under 18” figure as people aged 18 are included in the 12-18 category.

Note: ABS applies small random adjustments to cells to protect confidentiality. Consequently, individual cells may not sum precisely to published totals.

b. Is this more or fewer than last year, and what is contributing to the change?

Annual comparison data is not available as Census homelessness prevalence estimates are only produced every 5 years.

The NT estimate decreased from 13,717 people in 2016 to 13,104 in 2021 - a reduction of 613 people, or approximately 4.5%. The rate declined from 600 to 564 people per 10,000 population.

The ABS advises that 2021 results should be interpreted in the context of changed data sources and collection conditions, including increased use of administrative data and responses introduced during the COVID-19 pandemic. The available data does not support attributing the reduction to a single government program or policy.

c. If the Department does not maintain a count of people who are homeless, please provide the number of people who presented to Territory-funded specialist homelessness services in 2025–26, and the number recorded as turned away for want of a place.

In 2025–26, a total of 10,828 clients presented to NT Specialist Homelessness Services (SHS). Of these, 2,598 clients were homeless at the start of support, and 2,847 clients were at risk of homelessness. For the remaining clients, housing status was either not known at the start of support, at the end of support, or both.

‘Want of a place’ is not a measure collected by SHS. However, unmet need (also referred to as unassisted requests for service) is a required measure under the National Agreement on Social Housing and Homelessness (NASHH). Refer to Question 8(b).

2. Are people in overcrowded housing counted as homeless in the Territory, as they are in other jurisdictions and by homelessness organisations?

Yes. The NT uses the ABS statistical definition of homelessness for population-level reporting. People living in severely crowded dwellings (dwellings requiring 4 or more additional bedrooms under the Canadian National Occupancy Standard) are included in the ABS Census homelessness estimate.

a. If not, why not?

Not applicable.

b. If not, how many people would be counted as homeless if they were?

Not applicable.

3. What is the current wait time for people supported by homelessness services to enter public housing?

Please refer this question to the Department of Housing, Local Government and Community Development (DHLGCD), as public housing applications, allocations and waiting times are administered by DHLGCD.

4. How many people experiencing homelessness are currently waiting for public housing?

Please refer this question to DHLGCD, which owns and administers the public housing application and waiting list.

a. If homelessness status is not recorded against the public housing waiting list, please state which system holds each record, whether the two can be linked, and what would be required to link them.

Please refer this question to DHLGCD, who own and administer the public housing application and waiting list, including priority housing categories.

5. Budget Paper No. 3 for 2026–27 reports the measure “homelessness service presentations where clients were housed at the end of their support period” at 8 per cent for 2025–26 against a target of at least 10 per cent, attributing the variation to “external market factors and housing supply”, and retains a target of at least 10 per cent for 2026–27. It separately reports that at least 85 per cent of presentations where a client was at risk of homelessness received assistance and avoided homelessness, at 90 per cent.

a. How many presentations did the 8 per cent represent, and how many people were not housed at the end of their support period?

The 8% is a proportion of relevant homelessness service presentations or support periods, rather than a proportion of the total NT homeless population.

As of 31 December 2025, total homeless presentations to NT SHS were 1,101 clients, of which 87 were housed at the end of their support period.

b. On what basis is a target of 10 per cent set — that is, on what basis is it accepted that nine in ten people supported will not be housed at the end of that support?

This measure should not be interpreted as an acceptance that 9 in 10 clients will remain homeless. “Housed at the end of the support period” is a narrowly defined outcome measure, and clients may:

- already be housed and receive assistance to prevent homelessness

- receive short-term support without seeking long-term housing
- remain engaged with a service when the reporting period ends
- leave a service before an outcome is recorded
- enter temporary or supported accommodation not captured as long-term housing
- be referred to another service.

The 10% target reflects historical performance between 2023-24 and 2024-25, which ranged from 5.1% to 9.4%. The target represents an improvement on past performance while recognising that external market conditions and housing supply constraints may affect overall results.

Financial year	Quarter	Homeless Clients Housed Rate (%)	Target (%)
2022/23	Q1	19.1	N/A ¹
	Q2	19	
	Q3	15.7	
	Q4	15.7	
2023/24	Q1	9.4	19
	Q2	7.8	
	Q3	7.6	
	Q4	7.5	
2024/25	Q1	6.1	19
	Q2	5.1	
	Q3	5.9	
	Q4	7.1	
2025/26	Q1	8.1	10 ²
	Q2	7.9	

¹ This KPI was introduced in 1/07/2023. The initial target of 19% was derived from 2022-23 data and later revised for 2025-26.

² The variation in 2024-25 relates to a change in reporting process by service providers. The decrease in the 2025-26 target reflects new contract arrangements with service providers commencing 1 July 2025. Performance of this target is subject to external market factors and housing supply.

c. When was that target last reviewed, and by whom?

The measure is reviewed by DCF annually in March.

The measure was also reviewed through implementation of the NT Homelessness Strategy 2025–2030's outcomes framework to ensure it measures both housing outcomes and homelessness prevention.

d. What is recorded as the destination of clients not housed at the end of their support period, and in which system?

Client housing circumstances at the end of a support period are recorded by funded SHS providers in their client-management systems, and reported through the SHS Collection. Categories may include:

- rough sleeping or an improvised dwelling
- short-term or emergency accommodation
- temporary residence with family or friends
- boarding or rooming accommodation
- transitional or supported housing
- public or community housing;
- private rental
- institutional settings
- other housing
- not stated/unknown.

e. How do the two measures relate — is a client counted in both, and can a presentation be recorded as having avoided homelessness while the client is not housed at the end of the support period?

The 2 measures apply to different client cohorts and assess different outcomes, based on the client's housing status at the beginning of support.

The "housed at the end of support" measure applies only to support periods where the client was homeless at the beginning of support and records whether they were housed at the end of that support period.

The "avoided homelessness" measure applies only to support periods where the client was housed but at risk of homelessness at the beginning of support and records whether they remained housed at the end of the support period.

The measures address different cohorts and outcomes:

- a support period is not counted in both measures
- the same client may be counted under both measures during the year, but only through separate support periods - for example, if they were homeless during one support period and at risk of homelessness during another
- a support period is not recorded as having avoided homelessness if the client was not housed at the end of support.

6. **For 2026–27, please identify by name each service funded by the Northern Territory Government to deliver homelessness services, and for each: the amount appropriated, the term of the funding agreement, the location or locations served, and the output group or cost centre against which it is recorded.**

Refer to Attachment A – Homelessness Program Funding 2026-27.

- a. **How does the total compare with each of the two preceding years, in nominal terms?**

- 2026–27 Homelessness Services funding totals \$65.493 million (refer Attachment A for funding detail).
- 2025–26 Homelessness Services funding totalled \$70.072 million.
- 2024–25 Homelessness Services funding totalled \$67.542 million.

- b. **Which of those agreements expire before 30 June 2027, and what is the status of each?**

The majority of services will expire in line with the National Agreement on Social Housing and Homelessness (NASHH) on 30 June 2029.

The following services will expire earlier:

- Supported Play2Learn Program and Integrated Homelessness Supported Accommodation Program (Batten Road) expire on 31 October 2026.
- Tangentyere Council Aboriginal Corporation - Tenancy Sustainability Service expires on 31 October 2026.
- St Vincent de Paul Society (NT) Inc - Outreach Services Pilot Project expired on 11 September 2026.
- St Vincent de Paul Society (NT) Inc has several interrelated arrangements:
 - Ozanam House - Coconut Grove expires on 30 September 2027.
 - Ozanam House Interim Accommodation Facility expires on 31 December 2026.
 - Ozanam House Stuart Park Demolition project expires on 30 December 2027.

- c. **If homelessness services expenditure is not separately identified by service, at what level is it disaggregated, and under which output is it reported?**

Homelessness expenditure is reported and managed at the program and cost centre level, rather than as separate budget allocations for individual services.

Individual service funding allocations are maintained through DCF contract management records as detailed in Attachment A – Homelessness Program Funding 2026–27.

7. What advice has the Department received from funded homelessness service providers about the adequacy of funding to meet demand, and in what form was it received?

DCF receives feedback about funding and demand through:

- formal submissions and requests for additional funding
- contract-management meetings
- acquittals and performance reports
- sector and provider forums
- correspondence
- service data and reports of unmet demand
- operational escalation of capacity pressures.

Providers have consistently identified pressures associated with demand exceeding available accommodation, limited housing exit options, workforce and operating costs, increased complexity of client need, transport requirements and limited services outside major centres.

a. On what dates was that advice received, and from which providers?

A definitive response by provider and date is not available.

b. Do funding agreements require providers to report unmet demand or turn-aways? If so, what did providers report for 2025–26?

Yes, under the NASHH, 'Unmet Demand for homelessness services' is a key performance indicator. Specifically, this indicator includes the following compulsory measures:

- number of unassisted requests for services, split by accommodation and other services
- number and proportion of clients with an identified need for services who were not provided or referred to those services, split by accommodation and other services.

2025-26 Unassisted instances and services not provided or referred

SHS Type	Unassisted instances	Services not provided or referred
Assertive Outreach	496	626
Central Intake	-	1,345
Hub / Day Centre	349	12
Integrated Homelessness Supported Accommodation Service	-	155
Integrated Tenancy Sustainability	-	7
ST Accommodation	9,242	602
Support/outreach	2,331	375
Supported Crisis Accommodation	511	68
Supported Transitional Accommodation	1,451	896
Tenancy Sustainability	618	707
Visitor Accommodation	-	3
Total	14,998	4,796

c. Have any providers made a submission seeking additional funding since 1 July 2025? If so, how many, and what was the outcome of each?

Since commencement of new agreements resulting from the competitive commissioning process on 1 July 2025, 3 providers have made written submissions seeking additional funding.

A summary of outcomes is provided below.

Provider	Service Type	Project Title	Request	Outcome
Orange Sky	Assertive Outreach	Remote Laundry Services NT	\$500,000 to extend service delivery beyond 30 June 2026	Declined, previous funding provided was one-off. Did not apply through the competitive commissioning process
Save the Children Australia t/a 54 Reasons	Tenancy Sustainability	Supported Play to Learn – Batten Road	\$300,000 to extend service delivery to 30 June 2027	Partial funding extension of 110 days to align with closure of Batten Road
Tangentyere Council	Tenancy Sustainability	Tenancy Sustainability	\$805,000 to extend service	Partial funding extension of \$201,000 for a

Provider	Service Type	Project Title	Request	Outcome
Aboriginal Corporation		Services Alice Springs	delivery to 30 June 2027	3-month period to allow for transition of clients. Did not apply through the competitive commissioning process

d. Please provide that advice separately for Darwin and for the balance of the Territory, and state for each whether providers advised that funding was sufficient to meet demand.

Please refer to response above.

8. What referral options do homelessness services have for long-term housing other than public and community housing?

Referral options are dependent on the person's eligibility, needs and location. They may include:

- private rental, including brokerage and establishment assistance
- head leased or supported private rental
- transitional and supported accommodation
- youth housing
- domestic and family violence (DFV) accommodation
- disability-supported accommodation
- aged-care or supported-living pathways
- health, mental-health or alcohol and other Alcohol and Other Drugs (AOD) residential programs
- accommodation associated with employment, education or training
- Return to Country or supported family reunification, where voluntary and safe
- family or kinship accommodation supported through case management.

a. If none exist, what interim support is available to people experiencing homelessness while waiting for public housing?

While longer-term housing is being pursued, assistance may include:

- crisis and short-term accommodation
- transitional accommodation
- case management
- outreach
- tenancy sustainment
- brokerage and material assistance
- assistance with identification, income and housing applications
- transport and Return to Country assistance
- referrals to health, mental-health, disability, family support and AOD services
- safety planning and specialist DFV support.

Note that availability varies substantially by location and client cohort.

b. If none exist, what interim support is available to people experiencing homelessness while waiting for public housing?

Not applicable.

c. Where options exist, how does the Government support those services?

The NT Government supports these responses through grant funding, service commissioning, brokerage, referrals, cross-agency coordination and, in some cases, access to government-owned or leased properties.

9. How many families are being supported to remain housed through case management by the Department of Children and Families?

DCF Homelessness Programs primarily commissions non-government organisations (NGOs) to deliver case management and tenancy sustainment services; DCF does not generally provide homelessness case management directly to families.

For the 2025-26 reporting period there were 2,377 clients supported by Tenancy Sustainability Services across the NT.

10. The Northern Territory Homelessness Strategy 2025–2030 establishes a Strategic Advisory Group.

a. Has the membership of this group been finalised?

No. Consistent with implementation timeframes of the NT Homelessness Strategy 2025–2030, the Strategic Advisory Group (SAG) is currently being established.

b. What are the group's immediate priorities for this budget cycle?

Consistent with the NT Homelessness Strategy 2025–2030 and its action plan, the SAG's immediate priorities are expected to include:

- overseeing implementation of the NT Homelessness Strategy 2025–2030's 16 actions
- establishing an outcomes, performance and accountability framework
- strengthening central intake, assessment and referral arrangements
- improving homelessness data quality and system-level reporting
- progressing regional and place-based planning
- increasing Aboriginal-led and culturally safe responses
- strengthening prevention and tenancy sustainment
- improving responses for rough sleepers, young people and people escaping DFV
- strengthening service standards, accreditation and workforce capability
- identifying service-system, housing-supply and funding priorities for future budget processes.
