

**LEGISLATIVE ASSEMBLY OF THE NORTHERN TERRITORY**

**WRITTEN QUESTION**

Mr Maley to the Minister for Infrastructure, Planning and Logistics:

**Black lines of Tiger Brennan Drive**

In recent times, motorists have noticed a continuous black line on Tiger Brennan Drive linking Darwin and Palmerston, with intermittent junction box connections.

1. Are the mysterious black lines and junction boxes on Tiger Brennan Drive an "Intelligent Transport System (ITS)"? If not, what are they for?
2. How many roads have ITS installed? List by region, town and also by road.
3. What is the cost of having ITS installed per kilometre?
4. What is the cost of having ITS maintained annually? List by road and by kilometre?
5. What is the primary purpose of having ITS installed on a road?
6. Is the data transmitted by ITS monitored 24/7?
7. Who is the data transmitted by ITS monitored by?
8. What is the cost of monitoring ITS data?
9. What is this data used for?
10. Is ITS connected to other technology such as traffic lights and/or variable message signs?
