## **ESTIMATES COMMITTEE**Question Taken on Notice

Date: 12 June 2018

**Subject:** Revote Project List

From: Mr Gary Higgins, Leader of the Opposition

To: Hon. Nicole Manison, Minister for Infrastructure, Planning and

Logistics

Agency: Department of Infrastructure, Planning and Logistics

Number: 2.16

Question: How many projects on the overall revote list are older than one year old?

Can you list them? And how long have they been on the revote list?

**Answer:** There are 77 roads and infrastructure projects included in the Department

of Infrastructure, Planning and Logistics capital works program that have spanned more than one financial year. A number of these projects form

part of a rolling program of works that span several years.

Projects can revote due to a number of reasons including the size of the project and requiring works to span multiple financial years. Changes to scope and design; community consultation, land tenure or essential services issues; and the addition of projects to the program late in the financial year can also be factors that contribute to project revote.

Projects including Keep River Flood Plain, Barneson Boulevard and the Adelaide River Floodplain Upgrade require a significant amount of consultation, planning and approval prior to construction commencing.
