\$30 Million Fix-Up for Alice Springs Hospital

List what costs have been incurred by the Northern Territory Government for remediation works at the Alice Springs Hospital to this stage.

What is the anticipated cost for the whole of the remediation works?

ANSWER

Expenditure to date on the project is in the order of \$4.5 million inclusive of the additional costs of creating the decant ward in the Clinical Management Ward, some early minor works such as sun shading the Paediatrics Department and the commencement of works in the Day Procedure Unit. There is currently a budget provision of \$9.5 million and this will not be increased until the progressive works confirm that it is necessary to do so.
