Subject: Submisison on Amendments to Water Act
Date: Wednesday, 19 September 2018 9:03:52 PM

Dear Dr Buckley,

The opportunity to respond to amendments to the Water Act Bill is welcome. However I am concerned that this consultation was not well promoted, and inadequate time was allowed for community volunteers to understand and respond to the issues.

From my brief reading of the proposed amendments to the Water Act, I support the inclusion of mining and petroleum companies, and the significant increase in penalties necessary to ensure that the legislation is an effective deterrent to protect the NT's water.

Would it be possible for me, and others who were in receipt of updates from the Inquiry into Hydraulic fracturing to be notified of consultations around legislative amendments that are underway as a recommendation of the Inquiry into fracking?

I look forward to further contributions.

Yours sincerely

Dr Rosalie Schultz, FRACGP, FARGP, FAFPHM
