

LEGISLATIVE ASSEMBLY OF THE NORTHERN TERRITORY

WRITTEN QUESTION

Mr Giles to Minister for Health

**Aboriginal Health Centres/clinics**

- 1. How many Aboriginal Health Centres/Clinics are there in the Northern Territory and what are their locations.**

There are 84 remote health centres across the Northern Territory. A list of these health centres and their locations is at Attachment A.

- 2. Which of these are community controlled (ACCHSs) and which are controlled by the Department of Health. Please provide a breakdown of the type of services that are provided at each of these.**

There are 54 remote health centres managed by Department of Health (DoH) and 30 remote health centres managed by Aboriginal Community Controlled Health Organisations, as per Attachment A.

Remote Health Centres provide core primary health care services and 24 hour seven day a week on-call acute/emergency response.

Core primary health services include: antenatal care, Healthy Under 5 Kids Program for infants and children under five, childhood and adult immunisations, the Healthy School Aged Kids Program, the Preventable Chronic Disease Program, Well Women's and Well Men's Screening Program and infectious and communicable disease prevention and control.

Other visiting services are provided based on the community's needs, size of the community and its proximity to a major population centre.

- 3. Please provide an account of how much Territory Government funding is provided to each of these and federal funding if known.**

Northern Territory Government funding is allocated across Health Service Delivery Areas (HSDA) and therefore not available at the individual health centre level. This is consistent with the Commonwealth Government's funding methodology.
