Subject: richardson park developemnt

Hi

I would like to add my voice to those who support the upgrading of mararra stadium rather than Richardson park for a rugby league facility

There are too many problems with the Richardson pan proposal In terms of noise, parking, and access- its in the middle of a suburban area and will be too invasive

mararra on the other hand makes a lot of sense in terms of centralised facilities and expertise, adequate area for expansion and development and importantly its accessible well known and not in a suburban area that will disturb and disturb residents especially if its used for concerts as well

Is really a no brainer and its unfortunate that the relevant ministers are unwilling again to listen to the public and sporting experts about the best option

AS a tax payer i want my money to be wisely invested for the future in a sustainable plan

Yours sincerely

margie
