TO WHOM IT MAY CONCERN.

I am deeply concerned about the Territory Coordinator (TC) proposal. At the highest level, the proposal would give significant amounts of power to the Chief Minister and an unelected bureaucrat to exempt projects from existing laws and regulations in the Northern Territory, circumventing existing processes that are designed to regulate projects and reduce their risks and impacts to the Territory.

The effect of this could be far-reaching and significant, putting at risk the water, environment, air, of the Territory as well as the culture, health, and safety of Territorians.

Fracking projects, land clearing, water extraction licenses, gas pipelines, and new mines could be all be expedited through this office and exempt from the already inadequate environmental and social protections that exist in the NT.

Whilst it is important the NT develop, it CAN NOT be at the risk of this fragile environment.

Government has a duty to do the will of the people.

Sincerely

Ejulie Nowat
