(including Territory Wildlife Parks)

### 55. What provision has been made for disaster or major catastrophe insurance?

The Agency has not made any provision for disaster or major catastrophe insurance.

### Climate Change:

### 56. How many tonnes of CO<sub>2</sub> did the department emit in 2010?

The Agency has recorded building energy emissions for 2009-10 of 10 461 tonnes and motor vehicle energy emissions for 2010-11 (to 31 March) of 1157 tonnes

Building energy emissions for 2010-11 are not yet available.

### 57. What programs and strategies were introduced to reduce CO<sub>2</sub> emissions across the department in 2010?

Strategies over the 2010-11 financial year include:

#### Reducing building energy use by increasing the efficiency of infrastructure

- NRETAS submitted Government Energy Efficiency Program (GEEP) funding applications for energy efficiency projects valued at \$212 000:
  - \$47 000 to install energy efficient lighting to office areas of the Museum and Art Gallery of the Northern Territory (MAGNT).
  - \$33 000 to install controls and sensors for air-conditioner fresh-air management at the Marrara Indoor Stadium.
  - \$132 000 (provisionally approved) for the trial of power optimisation equipment at the Territory Wildlife Park to electricity supply scheduled for 2011-12 to provide energy savings and improve the life-cycle operating costs of existing mechanical infrastructure
- NTG Solar Cities funding of \$1.138 million for the installation of solar PV panels for the Araluen Arts Centre.
- 50% Australian Government funding through Alice Solar Cities for a 4kW Solar PV system valued at \$21,500 for the Red Hot Arts Building.

- The Agency has been actively engaged with the Department of Construction and Infrastructure to ensure energy efficiency options are being considered for Minor New Works and Capital Works projects including:
  - Review of air-conditioning replacement options for Browns Mart.
  - Design of Wangi Falls Visitor Centre, specifically alternative power supply systems.
  - Investigating air conditioning controls optimisation and reheat systems for the main building at the MAGNT and improving the efficiency of the air conditioning systems which service the other large buildings at the site.
  - Design of services within new Defence of Darwin Museum project for example lighting and air conditioning.
  - Installation of a new more efficient air conditioning system at a cost of \$95 000 at the Territory Wildlife Park.
  - Refurbishment of the TWP cafe to increase the functionality and efficiency of the service area including the removal of one hot bain-marie.
  - Installation of a new seawater chilling system at TWP to replace the existing unit. The new unit utilises heat exchange technology via titanium heat exchange plates. This increases the drawdown potential and decreases the running time of the chilling units.
  - Installation of push button light timers replacing switches at TWP public toilets to reduce energy consumption. Motion detector lights were installed in the administration office for security purposes. This has subsequently eliminated the need to leave office lights on continuously for security.
  - Alice Springs Desert Park successfully applied for 50% funding of a 12kW solar PV system through the Alice Springs Solar Cities Incentive Program. Installation start is scheduled in May 2011. This system will generate an estimated 3% of the parks energy requirements. The estimated CO<sub>2</sub>-e savings are 15 tonnes per year.
  - The Alice Springs Desert Park has set a target to grow and harvest 75% of native Central Australian food in order to feed the wildlife in the Park's

collection by the end of 2011(excluding grain). This will reduce the amount of energy and subsequent greenhouse gas emissions released when importing food to the site.

### Reducing energy use by vehicles

- Increased use of the online Vehicle Booking System to create pooling opportunities. During 2010-11 the online vehicle booking system developed by NT Fleet, has been implemented across the Agency leading to improved accessibility of vehicles. It is anticipated this will lead to a reduction in the total number of vehicles required by the Agency.
- Increased access to vehicles with higher green ratings allows staff to limit the use of 4WDs to those tasks that require a heavy duty vehicle.
- Continued promotion of cost neutral incentives for Executive Contractor Officers to select level appropriate vehicles which are more fuel efficient. An incentive is offered to Executive Contract Officers to encourage the selection of vehicles with a greenhouse rating of 7.5 or higher. The take up across the Agency is 19%. Of the 21 vehicles, 11 are due for replacement during 2011-12.
- NRETAS is trailing the use of hot desks to reduce staff travel between meetings in Darwin and Palmerston.
- The Agency has supported opportunities to assess the potential of alternative fleet vehicles by accepting the offer from NT Fleet to trial the new Mitsubishi electric vehicle. Staff members have been encouraged to utilise this vehicle for work purposes and provide feedback on its performance.
- The Agency booking system highlights vehicles with excessive or insufficient usage are highlighted allowing identification of pooling opportunities, vehicle surpluses and shortfalls. Applications to replace a vehicle when it has reached the end of its lease term include a requirement for the vehicle to be justified with reference to pooling opportunities. Replacement vehicles are approved only where needs cannot be met by pooling currently held vehicles

## 66 WRITTEN QUESTIONS

Department of Natural Resources, Environment, The Arts and Sport  
(including Territory Wildlife Parks)

### Building knowledge within the agency through training and staff awareness

- Training support has been provided to staff wishing to build their capacity to identify and implement energy efficiency measures within their facilities.
- In March 2011 NRETAS in partnership with DLP coordinated a professional development course on Energy Efficient Building Operations, presented in Darwin by the Australian Institute of Refrigeration Air-conditioning and Heating for all NTG staff.
- NRETAS has been working with the DLP to develop energy efficiency guidelines, factsheets and case studies to build the capacity of staff and contractors to identify cost effective energy efficiency measures within agency buildings.
- The Agency has been actively encouraging its staff to participate in community and office based sustainability events such as Ride2Work day and Earth Hour and has organised lunch time information sessions aimed at promoting a need for action.
- Territory Wildlife Parks staff members are actively encouraged to use push bikes to travel to work and for use within core operational areas.
- The Desert Park hosted an Astronomy Night on Saturday the 26th March to coincide with Earth Hour and celebrated the dark night sky.

### Developing energy management systems

In 2010 the agency recruited to a full time sustainability officer position. A key priority for this position is the development of an agency Strategic Energy Management Plan and governance systems. The Plan will assist NRETAS meet the targets set out under the NTG Climate Change Policy.

**58. Has a target for departmental CO<sub>2</sub> emissions been set for the coming financial year.**

## 66 WRITTEN QUESTIONS

Department of Natural Resources, Environment, The Arts and Sport  
(including Territory Wildlife Parks)

- If yes, what % reduction is that from 2010.
- If no, why has a target not been set.

Annual fleet greenhouse emission targets are set through the Greening the Fleet Strategy. The 2011-12 target is for a 2% reduction in standard CO<sub>2</sub>-e emissions per km. Interim annual building energy intensity targets for 2011-12 are currently being reviewed by Department of Lands and Planning who are responsible for the NTG Energy Smart Buildings Policy. The Agency is actively engaged with Department of Lands and Planning to ensure appropriate targets are identified.

### Utilities:

#### **59. What was the cost of power and water to the department in 2010?**

The Agency's Power and Water expenditure for 2009-10 (1 July 2009 to 31 March 2010) was \$3.5 million.

#### **60. What is the projected cost for power and water to the department in 2011?**

The projected cost for power and water for 2010-11 (1 July 2010 to 30 June 2011) is \$3.1 million

### Public Events:

#### **61. List the public events/conferences/forums that were sponsored by the department from 1 January 2010 to 1 April 2011 and what are projected for 2011/12?**

See Question 62

## 66 WRITTEN QUESTIONS

Department of Natural Resources, Environment, The Arts and Sport  
(including Territory Wildlife Parks)

### 62. What is the level of sponsorship provided in terms of financial support or in kind support?

Government sponsorship is defined as “the provision of funds or in-kind services in exchange for sponsorship rights to events, conferences forums”.

There was \$34,000 worth of financial sponsorships from 1 July 2010 to 31 March 2011.

In-kind and financial sponsorships are as follows:

#### EVENTS SPONSORED IN 2010-11

	Sponsorship Type	Sponsorship Value (\$)
<b>Arts and Museums</b>		
Australian International Documentary Conference (AIDC)	Financial	5,000
<b>Natural Resources, Environment and Heritage</b>
