### **QUESTION:**

How many parolees have breached their conditions while wearing a tracking device?

### **ANSWER:**

- In 2019-20 there were 91 parolees whose parole order included an electronic monitoring condition and who had a revocation report (breach) considered by the Parole Board.
- For thirty-nine of these parolees the breach was directly related to the electronic monitoring condition (e.g. a breach of curfew condition, absconding from residential rehabilitation or an electronic monitoring strap tamper).
