The Territory's Police numbers are trending to their lowest level in six years, is it any wonder our officers are worked to the bone

Based on direct feedback from our members, it is clear that overtime is through the roof, fatigue and burnout is heading skywards. Police stations are closed in some remote areas

In recent weeks alone, we have seen police officers stabbed in the stomach, kicked to the head, spat at, bashed over the head with glass bottles, and attempted to be run down by a vehicle. And this is just scratching the surface.

This job is no ordinary job, it is life changing, it is dangerous, it is deadly. Enough is enough
