

LEGISLATIVE ASSEMBLY OF THE NORTHERN TERRITORY

WRITTEN QUESTION

Ms Purick to the Minister for Infrastructure, Planning and Logistics:

Darwin city underground car park

1. In cubic metres, how much contaminated material and soil (asbestos specifically) was identified in the construction site of the underground car park?
2. Where was the contaminated material and soil relocated to and at what additional cost to the project?
3. At what depth was the contaminated material and soil found?
4. At what depth was rock found that required 'jack hammer' work to break through in order that the excavation could continue for the project?
