PART II

THE QUESTION PAPER

An index to questions appears at the end of Part II.
Numerical references are to Question Paper page numbers.

Cancelled Visit to Berrimah Prison

Mrs LAWRIE to MINISTER for COMMUNITY DEVELOPMENT

Will he advise the House why, when a bus load of prisoners came from Gunn Point to Berrimah Prison for visits last Sunday, the bus turned around and returned to Gunn Point without any of the visits eventuating?

ANSWER

Mr Speaker, I am advised that, on 17 August, 22 prisoners were conveyed to Berrimah Prison from Gunn Point for the purpose of visits from family and friends. This is a routine exercise every Sunday, the average number of prisoners being 20. On 17 August, the Gunn Point bus arrived at Berrimah Prison at 1.45pm and, after entering the gaol, prisoners were instructed to leave the bus for a routine search prior to entering the main body of the gaol for contact visits. All prisoners refused to leave the bus and to submit to a search.

A further offer was made - and I think that was generous of our prison authorities - that, if any individual left the bus, he would be permitted to visit provided he was searched. Again, there was no response and the prisoners were returned to Gunn Point Prison Farm. No hostility was offered by the prisoners, the incident being more a passive refusal to obey a direction. All visitors were informed why the visit from Gunn Point Prison Farm was cancelled and all accepted the explanation in good humour. At this stage, it is assumed that the prisoners were concerned that, for the first time, electronic handheld searchers, called 'friskers', were in use at Darwin Prison.

Cafeteria in Chan Building

Mr HARRIS to CHIEF MINISTER

Has any decision been made as to the future use of the area previously used by the cafeteria known as 'Big Al's' in the Harry Chan building?

ANSWER

The area previously known as 'Big Al's', which was used as a cafereria after the cyclone, has been refurbished. It still retains all the equipment which would enable it to be used as a cafeteria, restaurant or reception centre. Indeed, the government holds receptions for visiting dignitaries and the like in part of the area formerly used as a cafeteria. Part of the area has also been turned over for use as a library.

An approach was made to me last year for the remaining area to be used as a display centre; for instance, for Aboriginal art. At least 2 art exhibitions have been held by the Arnhem Land Aboriginal Art Gallery in the area that could be used as a cafeteria. There is one talking place at present. Apparently, the art gallery is satisfied with the results of its displays because it keeps coming back. Presumably, quite a considerable degree of custom arises.

It has been impossible for the government to obtain a satisfactory tender for the reintroduction of the cafeteria services which were maintained for a short period after the cyclone. I could not say whether further tenders have been called since the original tenders. I

do not think they have. I think the matter would have been mentioned to me by my departmental head had further tenders been called. On the previous occasion, no actual tender was received, only some vague proposition which did not eventuate.

Purchase of 28 Tasman Circuit

Mrs O'NEIL to MINISTER for LANDS and HOUSING

Has the government arranged, through the Housing Commission, the purchase of the residence at 28 Tasman Circuit, Wagaman? If so, what price was paid for the property, who is occupying or who is intended to occupy the residence and what expenditure has been necessary to upgrade or improve the property since its purchase?

ANSWER

The question calls for quite a bit of detail, including the disclosure of names. I would ask that the question be placed on notice.

Fire Station at 19-Mile

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

When can we expect a definite date for the start of the building of the proposed fire station at the 19-mile?

ANSWER

The building is due for completion in May 1981.

Casuarina Hospital Casualty Clinic

Mrs D'ROZARIO to MINISTER for HEALTH

Is it the policy of the Department of Health to discourage attendance by the public at Casuarina Hospital's casuality clinic and, if not, upon whose authority are physicians who attend at that clinic informing patients that they should not attend that clinic but should seek the services of a private practitioner instead?

ANSWER

I have absolutely no knowledge of any practice by the department to discourage people from going to the outpatients or casuality clinic at Casuarina Hospital. As far as the rest of the question is concerned, I will take the matter up with the department and advise the honourable member in due course.

Dollar-for-Dollar Subsidies to NT Schools

Mr HARRIS to MINISTER for EDUCATION

When will the guidelines for the dollar-for-dollar subsidies to the Northern Territory schools be released?

ANSWER

The guidelines for the establishment of a dollar-for-dollar subsidy

scheme is one that I already have prepared. I would have had the system operating other than for a recent spate of publicity given to either the entire of the Council of Government Schools Organisations or merely one officer of that organisation. It seems as if the body which purports to represent parents does not want the money at all. I will now go back to the Northern Territory Council of Government Schools Organisations and talk to them about it. Certainly, it is not the intention of this government to provide substantial sums of the taxpayers' money in an area in which the parents' representatives believe it is not required. Therefore, I propose to discuss the matter generally with the Council of Government Schools Organisations at the earliest opportunity to see just what their objection to receiving money is.

Educational Services to Handicapped Children

Mr B. COLLINS to MINISTER for EDUCATION

Is it true, as allegedly stated recently by a departmental officer at a public meeting, that the Department of Education will no longer provide educational services for handicapped children who are below compulsory school age?

ANSWER

I am not fully aware of the source of the comment. The honourable member for Arnhem did give me the courtesy of warning me about this question this morning. It disturbs me quite a deal. The wording of the Education Act is specifically framed to allow the minister to make arrangements for the assistance of handicapped children below or above compulsory school age. It would be flying completely in the face of the intent of this legislature if that was changed by some administrative instruction. I have had the matter checked out and there is no truth in the story at all. The Department of Education will continue to assist such children at the request of parents and having regard to the resources available to the department to provide a satisfactory service to these children. I think the public has to bear in mind that not all pre-schools have the specialist facilities which are required to assist such children overcome their problems. Parents would be aware that there are special schools set up for the purpose both in Darwin and Alice Springs. I would hope to see such specialist facilities being made available in other centres. Quite clearly, there is a demand but it is a matter of finding the resources to meet that demand. Parents would also be aware that the Spastic Centre is a specialist facility for such activities. I know that many parents have a problem with the name 'Spastic Centre' and the unfortunate connotational label which they believe would detach from that establishment to their children. I understand that the local organisers of the Spastic Centre are talking with the national body with a view to trying to overcome this unfortunate labelling which detaches from the establishment to the children. Parents do have a range of options available to them in the education welfare of below compulsory school age children. Certainly, it is my intention and the intention of the senior officers of my department that, wherever possible, assistance will be made available to handicapped persons of any age who need educational help.

Elizabeth River Causeway

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

Can the minister assure me that the causeway and associated roadworks

at Elizabeth River will be completed before the next wet as the situation in this area is critical?

ANSWER

Mr Speaker, the design of the causeway and associated roadworks is apparently under way and the project will be completed before the end of this year.

Government Batteries at Tennant Creek and Mt Wells

Ms D'ROZARIO to MINISTER for MINES and ENERGY

Can he inform the House of the future of the government batteries at Tennant Creek and Mt Wells?

ANSWER

The Department of Mines and Energy is currently carrying out a detailed investigation into the batteries at Mt Wells and Tennant Creek. As honourable members would be aware, the battery in Tennant Creek was first commissioned in the late 1930s and, over the years, there has been a series of 5 of them. The present one, which was constructed in the late 1950s or early 1960s, has been operating as an incentive to gougers since that time. Under the careful direction of the former Director of Mines, Mr Adams, another battery was built in that same period at Mt Wells to assist in the gold mining and the tin mining operations in that area and to encourage gougers to get back into the field and perhaps discover a find of the significance of the Nobles Nob which was found by gougers and which has been producing for nearly 30 years at a very satisfactory rate and has given employment to at least 70 people each year.

The department is reviewing the position of the batteries in light of several things. The first one is the financial considerations that are attached to the batteries. I do not know whether honourable members are aware that we currently charge the princely sum of $2 for putting a ton of ore through the government batteries. This figure was derived in the 1930s. In those days, it was £1. I think it is relevant to point out that the price of gold in those days was £15 per ounce or $30 in today's money. The price of £1 for crushing a ton of ore that may have had gold in it worth £15 an ounce was probably fairly realistic. Looking at today's gold prices of $600-plus per ounce, the charge of $2 per ton for crushing in the batteries is not what one would call realistic, even as an encouragement for people to put through ore that had some gold in it at least. In both batteries, we are spending about $400,000 a year of government funds to produce minerals that have the princely value of $80,000. There must be a serious reconsideration of whether this should be our priority. If it is the priority of the government to continue with this particular facet of mineral encouragement and development, then I think it is also reasonable that the price structure and the crushing procedures in the batteries be reviewed.

One of the things that I am particularly conscious of is that the batteries we have today, which crush a tonne an hour at best, were designed to cater for the needs of gougers that went out to mine with a pick and shovel, shovelled the ore onto a truck, drove it to the battery and shovelled it off at the battery. Based on the economy of

the 1930s and 1940s, the batteries served a very useful purpose. I might add that they were first designed in the 1880s and the 1890s and the first one that was established in Queensland in 1890 is still standing there as a relic. The difference today is that our gougers are very mechanised with their pneumatic drills and their new techniques. They remove the ore with explosives. The concept of transporting ore with big front-end loaders and 40 and 50-yard tip-trucks has made the batteries virtually a bottleneck in the whole system. Again, the government is conscious of the fact that, if we are to serve the gougers in any useful way, it is important that we make the batteries viable to the extent that a gouger can have his ore crushed in a satisfactory period of time that will give him a cash flow that will enable him to go back and carry out more work on his prospect. I would put it to the honourable member that the answers are not simple and they are a long way from being conclusive. When the departmental report becomes available, I will advise the House what action the government will take in this area.

Processing of Home Loans in Alice Springs

Mr D.W. COLLINS to MINISTER for LANDS and HOUSING

Would he indicate what steps he has taken to ensure the time taken to process home loan applications in Alice Springs is reduced to at least the same time taken with Darwin applications?

ANSWER

The only way that problem can be solved is to arrange for regional autonomy, a matter which I have heard mentioned many times over the past couple of years. They will be working towards that in both the Housing Commission and the Department of Lands. My intention in respect to the Department of Lands is to establish, in the same manner as the government has successfully done with health and education, a regional directorate and my Cabinet colleagues have supported me in this. That will take place as soon as appropriate documentation can be implemented through the Executive Council and of course recruiting carried out. In respect of the Housing Commission, a proposal has gone through Cabinet anyway to rearrange the counter staff to a more senior level for Alice Springs. Hopefully, we will be able to work towards a position where virtually all documentation and decision-making takes place in that centre. Mr Speaker, the idea is not just to service Alice Springs with a regional office of that type but the entire region from Tennant Creek to the South Australian border.

Government Battery at Mt Wells

Mr ISAACS to MINISTER for MINES and ENERGY

Did he, during the recent Northern Territory Legislative Assembly election campaign, assure the people who use the Mt Wells Battery that it would be continued? Was this advice passed to those people by a departmental officer?

ANSWER

Mr Speaker, I have had several meetings with the gougers at Mt Wells over the past 12 months, particularly over the future of the battery and the

the unsatisfactory manner in which it is handling the volume of work that the gougers expect of it. I went to the area prior to the campaign and discussed the issue again. I will say it again today for the benefit of honourable members because I have said it twice to the gougers and I think it is important. For the government to be able to provide the service that the gougers need at Mt Wells, given the capacity of the battery and the technology that gougers are using today, it is important that the gougers as a group let the government know what they expect of the battery, what they feel is the minimum requirement that they can live with and what they are prepared to pay for the services that they expect to get.

Mr Speaker, I believe that the situation at Mt Wells is one where we have too many people producing too much ore to put through a battery that is not designed to take it.

Already, Mr Speaker, we are receiving requests for assistance from very large prospectors in the area to get their own battery and keep their own ore. I do not object to this at all because the role of the battery is to enable men to develop their prospects and move on to bigger and better things. At the same time, some of the gougers are a little reluctant to accept that they can live without the battery once their tonnage gets above a certain level. They still expect to be able to get the same volume of material through as they have in the past, although they may want to quadruple their production. They still expect to get a priority and they still expect to get it for a minimum fee. As I said earlier, I spoke to the gougers at Mt Wells twice. I still have not heard from them about what they feel is reasonable for their battery to be able to provide for their community. When they decide what is satisfactory, I will be happy to go back and discuss it with them. In the meantime, we will still continue with our departmental investigation of what is reasonable from the government's point of view.

Underpriced Eggs from Adelaide to Central Australia

Mr VALE to MINISTER for PRIMARY PRODUCTION

Can he advise if any action has been taken in recent days to stem the flow of underpriced eggs from Adelaide to the Central Australian market?

ANSWER

Mr Speaker, that is a fairly topical question from the honourable member because of his interest in poultry. Certainly, it has been a matter of great concern to the department that eggs from Red Comb in South Australia and Johnsons in Port Pirie were being dumped in Alice Springs at something like 40% below the Adelaide wholesale price and thus trying to drive the new operator in Alice Springs out of business. This is a matter that we were not prepared to accept. We have sent officials to South Australia to discuss the problem. The industry itself, in recent days, through legal people in this city, have obtained a restraining order under the Trade Practices Act, restraining the South Australian Egg Board from marketing any eggs in Alice Springs at less than a fair wholesale price. The Territory is hoping to resolve the matter by arranging a written agreement on pricing between the parties.

Dust Problem on Virginia Road

Mr DOOLAN to MINISTER for TRANSPORT and WORKS

What will be done by his department about the intolerable conditions presently being endured by residents of Virginia Road through the dust caused by articulated vehicles carrying soil along that road?

ANSWER

I have recently replied to some correspondence regarding the situation at Virginia Road. We are aware of the problem and the Police Department as well as the Mines Department and the Department of Transport and Works are overseeing the problem and will be monitoring it until such time as a decision can be made to seal that road.

McMinns Bore

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

Can the minister advise how many gallons per day will be taken from the McMinns bore field to add to the water supply for the people of Darwin and can he assure me unreservedly that this extraction will in no way affect the bores of the people in the McMinns area?

ANSWER

The amount of water which will be drawn from the McMinns bore field to supplement the Darwin water supply will not be known until exhaustive investigations are concluded. However, I can assure the honourable member that the department will only commission the McMinns bore field on the condition that there will be no adverse effects on residents of the McMinns area.

Education Advisory Council

Mr B. COLLINS to MINISTER for EDUCATION

I would like to preface my question by saying that it is not occasioned by a press release in the NT News last night but by a report by a member of the Education Advisory Council. Is he aware that members of his Education Advisory Council have publicly stated their doubts as to the worth of their continuing activities on that council? Why has the minister been unable to meet with that council at any of the meetings it has held since its inception last year?

ANSWER

Let me say firstly that it is only very recently that the Education Advisory Council has found itself of a mind that it needs some ministerial guidance. Its functions are very clear under the act. If people refer back to my second-reading speech, they will see that the act allows the Education Advisory Council to carry out its own investigations in such manner and into such matters as it sees fit. Recently, however, the Education Advisory Council has indicated that it wants a meeting with me for the purpose of establishing guidelines and to talk about various things that it feels it wants to explore or to seek a reaction from me on the things that I would like it to explore. I find it rather surprising having regard to the nature of the act and, if the honourable

member is correct, that they find they cannot continue without my guiding hand. I would have thought the act placed a certain responsibility upon the council. Nonetheless, it was only quite recently that the Education Advisory Council asked to meet with me. I think honourable members would be aware that I have quite a bit on my plate and that the Education Advisory Council itself is comprised of members from all over the Territory who are busy people too. The plain fact is that it is extremely difficult to get all those people together on a date that suits me. Because of Cabinet commitments or other commitments associated with my public office, it is very difficult for me to guarantee that, because they can meet, I can meet with them. In other words, it has not been a problem of ill will or reluctance but one of pure logistics. My schedule of work has been such that I have been unable to meet them at times when they have been meeting and, on the dates that I have selected, they have been unable to get a quorum together. It is one of those problems arising out of the penalty of the vastness of this Territory and the very extensive commitments of ministers.

Electricity Commission Materials at Salonika Railway Yards

Mr HARRIS to MINISTER for MINES and ENERGY

Does the Northern Territory Electricity Commission intend using the old Salonika Railway yards for permanent storage of power poles, cables and materials belonging to the commission?

ANSWER

The short answer is yes but, in so far as the permanent storage of power poles is concerned, I think that most of the poles that are being stored there at the moment are ones that have been reclaimed from the cyclone. In the course of time, they will be used throughout the Territory for reticulation and it is not likely that they would become an eyesore in the area.

Alice Springs Recreational Lake Site

Mr ISAACS to CHIEF MINISTER

Has the site for the Alice Springs recreational lake been chosen? If so, does it conflict with a registered Aboriginal sacred site?

ANSWER

I am not certain whether a site has been chosen. I can certainly find that out speedily for the honourable Opposition Leader. Certainly there is a prime site and a model displaying the dam and the lake on that site has been set up in Alice Springs. I believe it was displayed in the government centre down there for some months. Comment from the public was invited in respect to that site. At the present time, I am unaware whether a final decision has been taken to confirm that site. I do know that negotiations have also taken place with the Central Land Council on behalf of any Aboriginal persons who have an interest in the area. I might mention that I understand the area is within the town municipal boundary of Alice Springs. I believe that a written consent to the use of the particular area - regarded as a prime area north of the present Telegraph Station National Park - was obtained but this consent was subsequently withdrawn. I am not aware that it is a registered sacred site. Indeed, I am not certain whether any sacred sites have in fact yet been registered by the Sacred Sites Authority. Again, that is really a matter which the Opposition Leader could ascertain as easily for himself as I could. I can certainly find it out but I am unable to give any definitive answer on those 2 points.

Private Hospital on Old Darwin Hospital Grounds

Mr HARRIS to MINISTER for HEALTH

Has any interest been shown in the proposal to establish a private hospital incorporating sections of the old Darwin Hospital?

ANSWER

The government has set up a committee to dispose of all the property which is not required at the old Darwin Hospital for the purposes or use of a private hospital. No tender has actually been called to my knowledge although the tender documents are ready to go, that is, if they have not already gone. For the operation of parts of the old section of the hospital as a private hospital, I would expect that there would be interest. I have no knowledge of any proposals having been received at this stage by the department.

Free Travel for the Unemployed

Ms D'ROZARIO to MINISTER for COMMUNITY DEVELOPMENT

Is it still the intention of the government to allow free travel for the unemployed on public transport and, if so, when is this scheme to be introduced?

ANSWER

It is certainly the intention of government to provide concessions to the

unemployed for travel on buses in the Darwin area. If I recall rightly, the undertaking given prior to the recent election was that unemployed persons would have to pay 50% of the fare on public transport. The department has been investigating methods to administer such a scheme. It may be that such a scheme would be more workable if the travel was free. There has been a lot of work done on this and I have yet to approve of a system of operation of the scheme which is reasonable. We have looked at schemes which operate in some of the states. In some cases, it would appear more reasonable to make public bus services free to everyone rather than to administer a very complicated scheme which takes up considerable time by many people. This is the problem I have at the moment. On advice, I am establishing the best way to go about the administrative arrangements and I cannot at this stage give a time when such a scheme will be implemented.

Answer to Question

Alice Springs Recreational Lake Site

Mr EVERINGHAM (Chief Minister): Mr Speaker, I think I should bring to your attention some further information which has just been handed to me by the Minister for Transport and Works in relation to the answer that I just gave on the question of the recreation lake at Alice Springs. I should draw to your attention that Cabinet approved on 21 May the inclusion of the project on the design list. That certainly does not mean that it will ever be constructed on the particular site in question.

Gunn Point Prison Farm Bore

Mrs PADGHAM-PURICH to MINISTER for COMMUNITY DEVELOPMENT

Have the salinity problems of the bore at Gunn Point Prison Farm been overcome and, if not, what action is proposed?

ANSWER

The Department of Transport and Works compiled a preliminary report on Gunn Point water supply based on a ground water investigation which was conducted in 1973-74. That report indicated that salinity problems could be encountered at the Gunn Point Prison Farm if there was continued excessive use of water for agricultural purposes. For this reason, agricultural activities at Gunn Point have been restricted pending some further investigations. More recently, a quality reappraisal by the investigation branch of Water Resources has indicated that salinity has been reduced to acceptable levels as the result of this continuing restriction on the agricultural activities at the farm. The Water Resources Branch, in consultation with the Department of Transport and Works, are now working on proposals to drill deeper bores in the area with a view to overcoming the salinity problems without the need for continuing restrictions. It is a matter which bears on the future of the Gunn Point Prison Farm and the government is certainly anxious to ensure, if it is possible, the availability of better and less limited water supply on the present site so that the prison farm can stay there. The prisoners seem to have done a very good job with the limited amount of water that has been available to them in producing some very high quality crops. Perhaps we could all learn something from what they are doing there.

Antibiotics in Stockfeeds

Mrs LAWRIE to MINISTER for PRIMARY INDUSTRY

Has the Cabinet's submission on the control of use of antibiotics in stockfeeds been proceeded with and, if so, can he indicate when the legislation is likely to be introduced?

ANSWER

The Cabinet submission has been agreed to. The legislative drafting instructions are being analysed finally and should go back to the draftsman in due course. Any veterinary drugs used as an additive to stockfeeds will be controlled by this legislation. Use of other veterinary drugs is controlled by various acts administered by the Department of Health.

Special Purpose Blocks in Future Subdivisions

Mr D.W. COLLINS to MINISTER for LANDS and HOUSING

Would he please give me an assurance that, in future subdivisions, the location of special purpose blocks, shops, schools etc will be carefully chosen and then well advertised so that people buying house blocks are fully aware of the purposes of the neighbouring blocks?

ANSWER

I am in full sympathy with the honourable member's sentiments. One of the greatest causes of delays in town planning matters arises when, for one reason or another, parties want to alter the purpose for which land is currently zoned. Of course, in expectation of quiet living in a lower-density area, people are then faced with the prospect of the entire thing being changed after they have made the greatest investment they are likely to make in their lifetime. Most certainly, that is my policy and my department's policy and it would certainly be the intention of the planning authorities throughout the Northern Territory. In respect of the private subdivisions, all matters were taken into account prior to the arrangements to proceed with the private developers. Certainly, precisely the same thing will occur in Alice Springs and any other centre where new subdivisions are proposed.

Consultation with Community Organisations in Nhulunbuy

Mr LEO to MINISTER for EDUCATION

Was the decision to amalgamate the new high school and community library services in Nhulunbuy achieved after community consultation and, if so, with which community organisations?

ANSWER

Mr Speaker, it has been long a concern of this government, as a result of community pressure - including pressure from the place that the honourable gentleman represents - to maximise and make available in a central location those facilities which are generally regarded as being of service to the public. If one looks at the representations coming from Howard Springs or Berry Springs, precisely the same sort of representations

are being made. That is, where the government builds a school, it is asked to also build adjacent to it an oval to be made available to the general community and to also provide such things as library services. I personally have discussed this proposal with many people in Nhulunbuy on my not infrequent visits. I do recognise Nhulunbuy as a part of the Northern Territory even though the honourable gentleman has some doubt as indicated in his maiden speech yesterday. Certainly, this issue was raised with as many people as possible.

I understand now that there is some opposition against the proposal to provide a very sophisticated library service for the school at the same time as for the community. Indeed, the plans and specifications for the new high school in Nhulunbuy were altered in midstream, and probably at some expense as a result of a community request. Certainly, his predecessor indicated to this place on a number of occasions the desirability of maximising community facilities within the very expensive structures that the government erects.

I really cannot understand the concern. Perhaps it comes from a professional jealousy or it may be on the operational side. There may be difficulties and conflicts between the various parties. If there is conflict between government agencies, then I find it somewhat disturbing that they would resist a very desirable arrangement. In addition to the library being altered and extended at the request of the community, the design of the hall was altered and extended so that it was suitable for the general community.

In answer to the question, the move was entirely supported by the community, albeit some little inconvenience may exist in having people travel further than they do from the existing library. I recognise that but, on balance, I think it is a very good move.

Removal of Coffee Bush

Mr HARRIS to CHIEF MINISTER

Will the government be continuing the program to remove coffee bush from our foreshore areas?

ANSWER

The simple answer is yes.

Services to Blocks on Katherine River

Mr VALE to MINISTER for LANDS and HOUSING

I ask this on behalf of the honourable member for Elsey. Can the minister advise the reasons his government is refusing to provide power and water to the 53 five-acre blocks on the Katherine River's north bank?

ANSWER

The honourable member for Elsey always comes up with very difficult questions to answer. Mr Speaker, as you are probably aware, there is a little confrontation going on between myself and the Katherine Municipal Council at the moment over the particular proposed subdivision. The arrangement was originally to provide unserviced blocks. This was based

on our understanding of a desire for this type of land in the Katherine area. The arrangement, in the normal course of events, would be put to the Katherine town council. In letters going back to May of this year, the town council indicated its nervousness with this arrangement. Its exact words in a resolution were : 'For the benefit of potential purchasers, the council would like to see electricity and water supplied before blocks are sold'. Thus, we are faced with the position where the council of the town says it is not happy with the release on a basis of unserviced land. We must also bear in mind that very adequate bore water can be located there and there is the usual rural style of septic systems. We could also solve the electricity problem. What inevitably happens is that it does not matter how firmly you put in the agreement with people who purchase land that there is no undertaking by government to provide services, once they have settled there and put up with the inconvenience of unserviced land for a period of time, the pressure then starts to come.

Having regard to the fact that the council said it wanted the land serviced, we then do a very hasty exercise to see how much it will cost. Would you believe, Sir, that the provision of water alone to those blocks will cost $15,000 per block. Total service costs come to around about $37,000 to $38,000 a block. I cannot see the public of Katherine paying that sort of money for services. Thus, we have this conflict with the council: we want to release the land one way and the council is insisting on releasing it another way at a time when the government was naturally determining its budget for the coming financial year.

I understand, although I have not received a copy of it, that the council apparently wrote to me on 4 July, which was after the beginning of the financial year, indicating that most of the problems as it saw them had been overcome, with the exception of a thing called differential rating. By that stage, the budget was being firmed up and the sort of millions we are talking about to turn off 50-odd blocks is something that involves very significant financial planning indeed. As a result, I wrote back to the council and indicated that, in view of their reluctance to go on with the government's proposal, it was no longer profitable to provide funds within this financial year. Certainly, discussions will continue with the town council and, hopefully, the matter will be resolved. I understand the council held a special meeting last night following the receipt of my letter yesterday and officers of the department indicated to me this morning that there may be a different attitude in the council and perhaps by some method or other we may get people settled on that land in the near future.

The Single Officer's Housing Review

Mr PERKINS to MINISTER for EDUCATION

Does the Education Department have a document entitled 'The Single Officer's Housing Review' and, if so, will the minister table this document in this House?

ANSWER

I have no knowledge of such a document therefore I cannot give any such undertaking.

Warrego School

Mr B. COLLINS to MINISTER for EDUCATION

What is he doing to solve the gross overcrowding and lack of other facilities at the Warrego School near Tennant Creek?

ANSWER

I am surprised that I have not been battered around the ears by my colleague, the honourable Minister for Health, about this one. Certainly, during the course of a meeting I held with the newly-formed committee on the handicapped, the matter was raised by parents from that area. I have noted those concerns and, quite clearly, it does indicate a problem exists in Warrego. I want to get to Tennant Creek as soon as I can, perhaps in the company of my colleague who might conduct a personal investigation to see what action can be taken.

Sealing of Roads in Howard Springs

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

When will the actual sealing of Whitewood and Hillier Roads in Howard Springs start?

ANSWER

The contract to seal these roads is expected to be let this month and, hopefully, the job will be finished in early 1981.

Housing Commission Practice Regarding Single Parents

Mrs O'NEIL to MINISTER for LANDS and HOUSING

I preface my question by reminding the new minister that the Housing Commission had the practice of transferring single parents from flat complexes to town houses after they had served a period of approximately 12 months in those flat complexes. It then changed its policy and, in the process, broke a firm undertaking that had been given to a number of those parents. Will he direct the Housing Commission to keep its firm promises given to those parents to transfer them to town houses?

ANSWER

As a general rule, I would say that this government is very insistent that the undertakings of either its ministers or officers are carried out. Nonetheless, I have no personal knowledge of the matter raised by the honourable member for Fannie Bay. Again, as a result of that I cannot give any undertaking to give any instructions. I will certainly have the matter looked at and probably report to her by letter at a later time.

Rebates to Elderly People

Mr D.W. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

Would the minister please indicate who amongst elderly people are entitled to the 50% rebate on third-party motor vehicle insurance, water rates and electricity charges, with particular reference to those people receiving superannuation benefits?

ANSWER

The government has a widely-publicised policy of what is called pensioner concessions. Recent undertakings were given to upgrade those. The scheme was expanded under the former minister to include not only persons holding Commonwealth medical pensioner benefits cards but also those males in the Northern Territory over 65 and those females over 60. One area which is not completely clear at this stage - and the department is preparing some papers for me so that I can clear up the confusion in everyone's mind - is that of the superannuant who is either a male under 65 or a female under 60.

Superannuation is a fairly confusing area. It is not simply a matter of declaring that all retired superannuants are entitled to pensioner concessions because superannuants come from a whole range of areas. There are simply hundreds of different types of superannuation and there are various reasons why people have been superannuated out of their employment, voluntarily and non-voluntarily. Before the pensioner concession scheme can be simply blanket extended to this group of people, there needs to be some very clear guidelines to indicate who may go to the Department of Community Development and pick up a Northern Territory pensioner benefit card which will entitle him to a whole range of concessions. As soon as I have this matter clarified - and it is one I regard as a matter of priority - I will write to all members of the House and indeed make some press announcements on the subject.

Freight Component of Sales Tax

Mr ISAACS to TREASURER

When will the promised subsidy on the freight component of sales tax in the Northern Territory be introduced?

ANSWER

Announcements have been made in relation to the government's initiative of refunding to wholesalers the sales tax component on freight. The announcements indicated that the scheme would commence from 1 July. Whilst the scheme will take a little bit of time to bring into operation, the refunds to the various wholesalers will be backdated to 1 July this year. That has always been our undertaking. Indeed, if the honourable member can wait for a little while, there will be some reference to this matter in the budget.

Noxious Weeds on Commonwealth Land at Humpty Doo

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION

What power does the Department of Primary Production have over noxious weeds on Commonwealth land used by the Navy at Humpty Doo?

ANSWER

Even though it is a defence reserve, the land in question is still subject to the provisions contained in the Noxious Weeds Act and the Plant Diseases Act.

20727.819—10

Reconstruction of Nightcliff Primary School

Mrs LAWRIE to MINISTER for EDUCATION

He will probably be aware that stage 2 of the reconstruction of Nightcliff Primary School has presently ceased and services have been removed from areas which were being used for temporary facilities. Could he indicate why the work on the reconstruction stage 2 has ceased and when it will recommence?

ANSWER

I am aware of the problem raised by the honourable member because she approached me on this subject last night. The rest of what she has to say would pertain to a document which is to be tabled in this parliament later today. Therefore, I do not feel at liberty to canvass those issues now.

Heavitree Gap Causeway

Mr VALE to MINISTER for TRANSPORT and WORKS

Can he advise what work his department is presently undertaking in Central Australia to upgrade the Heavitree Gap causeway south of Alice Springs?

ANSWER

The government has decided to widen the existing crossing which is 2 lanes and, at the same time, we will widen the intersection of the crossing at the Stuart Highway to reduce existing traffic hazards.

Education Act Regulations

Mr B. COLLINS to MINISTER for EDUCATION

When will the regulations to the Education Act be available?

ANSWER

I cannot give a firm date to the honourable member. I appreciate his concern because I too have been quite concerned about this. Nonetheless, the Education Act was deliberately worded to allow it to stand free without the necessity for bringing in regulations at an early date. In other words, it worked without having the necessity for having our own regulations. This was deliberately done in light of the fact that we could simply save the regulations of the Commonwealth and continue them. I and my department have been most anxious to ensure that, when the regulations are brought in, they will not need change other than for a philosophical or policy change by a different government or different minister. I prefer to see the thing done correctly the first time round rather than hurry it through. Mr Speaker, I give an undertaking to the House that I will do everything I can to have these regulations promulgated as soon as possible so that via the Subordinate Legislation and Tabled Papers Committee this parliament may review them.

Roads on Bathurst Island

Mrs PADGHAM-PURICH to CHIEF MINISTER

Can he give me an assurance that the construction of roads discussed between forestry officers and leaders of the Tiwi people on Bathurst Island will be going ahead as planned this year?

ANSWER

I cannot give any assurance that construction of roads will go ahead this year. I should perhaps bring to the honourable members' attention that the roads the honourable member adverts to are private roads on private land. Certainly, the honourable member for Tiwi and myself have a continuing interest in upgrading the roads on Bathurst and Melville Islands. Within the priorities that the Forestry Branch of the Conservation Commission has, as much work as possible will be done to continue to improve the road system on Bathurst and Melville Islands. However, there are other priorities on those islands which have to be taken into account as well as roads. The possibility of further road construction on the islands will be kept in mind as the financial year progresses.

Aerial Medical Contract

Mrs O'NEIL to MINISTER for HEALTH

When will the long-delayed decision as to which airline will win the new aerial medical contract be announced?

ANSWER

I believe there was an announcement last night or this morning. I know that there has been a press release prepared to advise that Northern Airlines has won the tender for the operation of the Aerial Medical Division of the Department of Health.

Mindil Beach Casino

Mr HARRIS to TREASURER

Is he able to inform the House of the reasons for the delays in the construction of the Mindil Beach Casino? What does the minister intend doing to ensure that no further delays will be experienced?

ANSWER

This matter has been one of some concern to the government. I have recently had talks with the principals of Federal Hotels on the subject. We have never lost close contact with them at an officer level during the entire time since Federal Hotels entered into agreement to build casinos and hotel complexes in the Territory. The original proposal to build a casino at Mindil Beach was going to cost in the order of $10m. By December 1979, the estimate at that stage had risen to $12m for the building and about $15m for the total development at Mindil. The company went to tender in February 1980 and the lowest tenderer was $16.9m for the building alone and, with associated costs involved, the project would have been well over $20m. This caused the company some difficulties in its plans for the project and they held negotiations with the tenderers as to ways in which they might be able to lower the

the price to some degree. It also caused them some difficulties because they had to reorganise the lines of finance for such a very large project. They have been doing that at the same time as building their casino and hotel at Alice Springs which is pretty well along the way. The government, in continually applying pressure to the company to get on with the job, has arranged with them that, whilst they undertake that a final contract for the construction of the building will be entered into within 10 days, it is necessary for them to enter into an interim contract virtually forthwith - it was to be this week - for $1m to continue with work at Mindil Beach. I point out to honourable members that in excess of $2m has been spent already including the price of the land itself. Of course, no company likes to see sums of money of that size left outstanding without providing any possible return. Of course, no possible return for that money can be obtained by the company until the project is completed.

However, because the government is concerned with the continuing delays in the matter, I have advised verbally the principals of the company that, unless a firm contract is entered into for the construction of the main facility at Mindil Beach by the end of September, I am going to review the licence that they have to operate an interim casino at the Don Hotel. They assured me that they will certainly be well and truly into a contract for construction by that time and I am sure that bit of incentive will help them along the way.

Lighthouse Reserves at Cape Hotham and Cape Don

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

Has the federal Department of Administrative Services made any approach to his department for the takeover of any structures on lighthouse reserves at Cape Hotham and Cape Don?

ANSWER

I am unable to supply the member with the information. However, I will seek to provide it to her later in the sittings.

Baiting Dingoes with 1080

Mr VALE to CHIEF MINISTER

Can he advise whether a moratorium has been placed on the aerial baiting of dingoes with 1080 and, if so, have dingoes become a danger.

ANSWER

I understand an aerial baiting program with 1080 commenced on 23 July and, to date, the whole of the Barkly Tablelands and 5 properties in the Alice Springs region have been baited. From next Monday, I understand that the Conservation Commission will be doing the gulf country and the Robinson and McArthur Rivers area. It is intended that the program will conclude at about the end of September at which time the whole of the Territory will have been covered. The one exception is that the program people are going through the Territory, station by station, doing those stations which want baiting to be done and leaving those which do not want to participate in the program. I was informed by the Conservation Commission that, when the program is concluded at the end of September, an assessment can then be made as to its effectiveness.

Monitoring of Jenny Crabs

Mrs LAWRIE to MINISTER for PRIMARY INDUSTRY

He has assured the House on several times that the monitoring of jenny crabs was continually being carried out by officers of his Fisheries Department. Accordingly, I ask him if he can either table the report of their monitoring procedures or the conclusions that they have reached.

ANSWER

The last communication that I had with the honourable member for Nightcliff on that subject was by a letter dated 4 June. The letter quite clearly explains the government's position. I do not believe that the government will be doing very much more about jenny crabs, not in the immediate future anyway, because there are a lot of other priorities.

Blocks 4631 and 4632 in Eastside Subdivision

Mr D.W. COLLINS to MINISTER for LANDS and HOUSING

Would he please inform me if blocks 4631 and 4632 in the new eastside subdivision have been accepted for a small shopping centre and, if so, when will they come up for auction?

ANSWER

I would indicate to the honourable member that, if he asks a question like that again, I will ask him to put it on notice. However, in view of the fact that this is his third day here, I will obtain the information and write to him later.

Dumping Sulphur near Bees Creek

Mr B. COLLINS to MINISTER for MINES and ENERGY

Is it intended to establish a dump for sulphur at the 22-mile old iron ore loading facility adjacent to Bees Creek and, if so, will that dump be protected from erosion into Bees Creek and from wind erosion?

ANSWER

I cannot answer the first part of his question off the top of my head. I would think that it would be absolutely essential practice that, if such a dump were established anywhere, it would need to have satisfactory protection around it.

Noxious Weeds in Kakadu National Park

Mrs PADGHAM-PURICH to CHIEF MINISTER

Would he, in his capacity as minister having responsibility for the Conservation Commission, draw to Dr Ovington's attention the disgraceful condition of the Kakadu National Park in relation to the abundance of noxious weeds?

ANSWER

Mr Speaker, I think for once I have been able to pre-empt the suggestion

of the honourable member for Tiwi because I believe that the Director of Conservation has been in correspondence with the Director of the Australian National Parks and Wildlife Service regarding the matter of noxious weeds in the Kakadu National Park.

Decision on Rezoning of Land near Fannie Bay Hotel

Mrs O'NEIL to MINISTER for LANDS and HOUSING

When will his decision on the recommendation of the Planning Authority in relation to the proposal to rezone land near the old Fannie Bay Hotel from 01 to 02 be announced and will he explain the reasons for the delay because the matter was considered by the Planning Authority in early April?

ANSWER

With all the hundreds of planning matters that are going on contemporaneously around the Territory, I have no hope of retaining them all in my head. Naturally, this is one of greater notoriety than most. We have all heard of it in the press and so on before. I undertake to inform the honourable member of the exact position as soon as I possibly can.

Freight Subsidies for Perishables for Teachers in Isolated Schools

Mr B. COLLINS to MINSITER for EDUCATION

Will the government reintroduce, for the Northern Territory Teaching Service, the freight subsidies for perishables for teachers in isolated schools, which are currently being progessively removed by the CTS?

ANSWER

Before any examination by the government, the results of the applications before the Arbitration Commission should be awaited. I understand that this matter is still before that tribunal and, of course, it would be improper of me to say anything in this forum which would be seen to interfere with that organisation's proper functions under the Arbitration Act.

School Assessment Forum at Jingili School

Mrs O'NEIL to MINISTER for EDUCATION

Is he aware of the proposal for Jingili School to be closed for one school day in order that a school assessment forum may be carried out by staff? Why cannot such an assessment be carried out in the many weeks of fully paid stand-down time enjoyed by teachers rather than closing the school for one day?

ANSWER

I thank the honourable member for the question and the suggestion. I will follow it up.

New Northern Territory Government Directory

Mr HARRIS to CHIEF MINISTER

When will the new Northern Territory Government Directory be available to the public?

ANSWER

I understand that a new government directory will be prepared towards the end of the year and promulgated early in 1981. I am not certain of this but I do believe that it is a directory that is renewed annually.

INDEX TO QUESTIONS
20 - 21 August 1980

Aerial medical contract (O'Neil) 17
Alice Springs -
  home loan applications (Collins D.W.) 5
  recreational lake site (Isaacs) 9,10
Antibiotics in stockfeeds (Lawrie) 11
Bathurst Island, roads (Padgham-Purich) 17
Batteries, Mt Wells (D'Rozario) 4; (Isaacs) 5
Berrimah Prison, cancelled family visit (Lawrie) 1
Cafeteria, Chan Building (Harris) 1
Casuarina Hospital, casualty clinic (D'Rozario) 2
Coffee bush (Harris) 12
Dingo baiting with 1080 (Vale) 18
Dollar-for-dollar subsidies to NT schools (Harris) 2
Dust problem, Virginia Road (Doolan) 7
Eastside subdivision, blocks 4631 and 4632 (Collins D.W.) 19
Education Act, regulations (Collins B.) 16
Education Advisory Council (Collins B.) 7
Educational services for Handicapped children (Collins B.) 3
Egg dumping, Alice Springs (Vale) 6
Electricity Commission; Salonika materials storage (Harris) 8
Elizabeth River causeway (Padgam-Purich) 3
Fannie Bay Hotel site, rezoning (O'Neil) 20
Fire station at 19-mile (Padgham-Purich) 2
Free travel for unemployed (D'Rozario) 9
Freight component of sales tax (Isaacs) 15
Government directory (Harris) 21
Gunn Point Prison - bore (Padgham-Purich) 10
Heavitree Gap causeway (Vale) 16
Housing Commission - single parent policy (O'Neil) 14
Howard Springs, sealing of Whitewood Road (Padgham-Purich) 14
Jenny crabs, monitoring procedures (Lawrie) 19
Jingili School, school assessment forum (O'Neil) 20
Kakadu National Park, noxious weeds (Padgham-Purich) 19
Katherine River - services to blocks (Vale) 12
Lighthouse reserves -
  Cape Don (D'Rozario) 18
  Cape Hotham (D'Rozario) 18
McMinns Bore (Padgham-Purich) 7
Mindil Beach casino (Harris) 17
Nhulunbuy community organisations (Leo) 11
Nightcliff Primary School reconstruction (Lawrie) 16
Noxious weeds at Humpty Doo (Padgham-Purich) 15
Private hospital at old Darwin Hospital site (Harris) 9
Rebates for elderly people (Collins D.W.) 14
Single Officer's Housing Review (Perkins) 13
Special purpose blocks in subdivisions (Collins D.W.) 11
Sulphur dump, Bees Creek (Collins B.) 19
Tasman Circuit, residence purchase (O'Neil) 2
Teachers, freight subsidies in isolated schools (Collins B.) 20
Warrego School (Collins B.) 14

PART II

THE QUESTION PAPER

An index to questions appears at the end of Part II.

Numerical references are to Question Paper page numbers.

An asterisk preceding an entry in the index indicates that an answer has not yet been received.

Appointment of Administrator

Mr ISAACS to CHIEF MINISTER

Can he inform the Assembly who will be the next Administrator of the Northern Territory and, if not, when does he expect to be in a position to inform the House of that situation?

ANSWER

Mr Speaker, I am not yet in a position to inform the Assembly who will be the next Administrator. I can assure all honourable members that, if this House is sitting when the federal government reaches a decision on who will be the new Administrator, then honourable members will be first to hear of the decision. I might say that the Northern Territory government has sought at all times to be a participant in that decision which to the best of my knowledge has not yet been taken.

I have put plainly to the Prime Minister and to the Minister for Home Affairs that I would expect the views of the Northern Territory government to be taken very much into account in arriving at a decision.

Accommodation at Old Darwin Hospital

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

What is the current position concerning the future use of the old sisters' quarters and nurses' quarters and why has it taken so long to have these buildings occupied?

ANSWER

Mr Speaker, the government has been anxious to have the old accommodation quarters for nurses and sisters at the old Darwin Hospital used for accommodation for some time now. We have been working closely with a group which has been formed from the YWCA and YMCA in Darwin and we have been negotiating with that group to take over the facilities to provide relatively low rentals for people in Darwin and also to include an area for student accommodation and emergency accommodation.

The matter is fairly complex in that the buildings are part of a much larger complex and, therefore, some of the services that are provided to those buildings, such as steam and air-conditioning are part of a larger system. We have had some difficulty in establishing clearly the costs to apportion to these particular buildings. I have received word from the parties concerned that they would like to meet with me as early as possible to discuss the latest information that has been provided on the cost-apportioning question. I would hope that very shortly the buildings will be used for accommodation as indeed they should be.

Problems at Warrego School

Mr B. COLLINS to MINISTER for EDUCATION

Could he advise the Assembly as to what is being done to alleviate the problems being suffered by the Warrego School?

ANSWER

The honourable gentleman refers to problems being suffered by the Warrego School. In accordance with an undertaking I made in the last sittings, I visited Warrego in the company of the local member, the Minister for Health. While there are some accommodation problems there, I certainly would not describe the situation as anything like suffering. Certainly, the principal never indicated that to me. Nonetheless, there were additional facilities required at that location - additional facilities which the honourable member may not have been aware of - which in fact have been made available to that school.

I certainly will be keeping in contact with my colleague and I dare say the parent body of that school will be keeping in contact with me to see how things pan out. However, there is no grave problem associated with the Warrego School, Mr Speaker. As a matter of fact, it is probably one of the most harmonious and well-run small schools that I have visited. I understand it has a very strong parental influence. The pre-school is one of the finest I have seen operating in the Northern Territory, largely through parent co-operation.

The problems which were evident late last year and probably very early this year have largely been overcome, to my knowledge, as a result of a personal inspection of the place and I will continue to keep an eye on it.

Differential Rating System in Berrimah

Mrs PADGHAM-PURICH to MINISTER for COMMUNITY DEVELOPMENT

Does the government intend introducing a differential rating system in the rural area in Berrimah?

ANSWER

Mr Speaker, consideration is being given to the introduction into the Darwin Rates Act of a system of rating concessions for land which meets the criteria for urban farmland. The provision would be similar to that being proposed as an amendment to the Local Government Act in the bill which I foreshadow to be introduced in the House during this sittings. In short, the answer to the honourable member's question is yes.

Proposals for Darwin Power-Station

Mr ISAACS to MINISTER for MINES and ENERGY

In view of his recent statements regarding a nuclear power-station for Darwin, can he inform the Assembly what has happened to the proposal to build a coal-fired power-station in Darwin, with an option to convert to gas, as announced by this government earlier this year as a statement of principle?

ANSWER

Mr Speaker, for the honourable member's benefit I would just like to elaborate on the briefing that took place recently with the press relating to the possible utilisation of nuclear power generation in the Northern Territory. It comes about because of the consideration that has been given by the Department of Mines and Energy and by NTEC who are addressing themselves to the types of power generation schemes that we should be using. The facts of

the matter are that Stokes Hill Power-Station is subsidised to the tune of $45m this year. That is expected to blow out to $150m in 1985-86. Clearly, that situation cannot be allowed to continue and the federal government has made no bones about the fact that it would like to capitalise its subsidy and perhaps move to a more economic form of generation.

The first proposal put to us by the Commonwealth - it is a perfectly reasonable one given the technology in Australia today - is that we should move to coal. With coal-generating costs of $2m a megawatt, we should be able to provide Darwin with the extra capacity that it will need by the middle of the decade. We should be able to reduce considerably the present generating costs of 14 cents to 16 cents a kilowatt hour. We should be able to provide an energy source that would enable industry to come here and compete on favourable terms with any other area in the country. That is the philosophy that we are working towards: to provide the cheapest possible form of energy source for the people of the Northern Territory and for industry.

The Department of Mines and Energy and NTEC have been working very hard on these proposals since the Commonwealth instituted its first move in the matter. It is becoming pretty obvious, because of changing circumstances that are outside our control, that we will not be able to build a station for less than $300m or $400m and that the works required on the waterfront for handling 0.5 million tonnes of coal a year could be considerably more than was originally anticipated. Only detailed studies will give us an opportunity to address ourselves to that problem.

The rise in coal prices in the last 6 months has indicated quite clearly that it is impossible to build a coal-fired station and hope to arrest or reduce the price of electricity. We may be able to hold it at 14 or 16 cents a unit but there is no way that we will be able to reduce it. If we want to have an energy base here for which people can afford to pay and industry can afford to use, 16 cents is not acceptable. The department and NTEC have been examining other possible options in view of the government's determination to provide 2 primary things: power that people can afford and power that industry is prepared to use at a reasonable cost.

The department's investigations indicate that, on today's figures, nuclear power is an option. One of the most important factors in this consideration is that, with nuclear power, we would be able to enter into a feedstock contract over a 20 or 30-year period. With coal, we will be locked into the increasing price of coal besetting the world today. The price of coal will always be relevant to the price of petrol and oil which is soaring beyond anybody's expectations.

Mr Speaker, for the benefit of the honourable member, I would say that the situation is under constant review. The government is not obliged to take a final decision until late next year, although it would be preferable if we could take one in June next year. There are some serious processes of elimination that we have to go through and, as the situation develops, I will do my best to keep honourable members and the people of the Northern Territory informed.

Dollar-for-Dollar Subsidy to Schools

Mr HARRIS to MINISTER for EDUCATION

When will the guidelines for the dollar-for-dollar subsidy to Northern Territory schools be released?

ANSWER

The guidelines were released 20 minutes ago.

Nuclear Power-Station for Darwin

Ms D'ROZARIO to MINISTER for MINES and ENERGY

Has the minister had any discussions with the federal government concerning funding for a nuclear power-station for Darwin?

ANSWER

The short answer is no. Discussions on funding have so far been related to the concept of a coal-fired station. I would add that the Commonwealth has indicated quite clearly that it wishes to minimise the subsidy level and I can understand its position entirely.

Local Government Rates at Berrimah

Mrs PADGHAM-PURICH to MINISTER for COMMUNITY DEVELOPMENT

What does the Department of Community Development do with the rates extracted from the people in Berrimah as regards returning some services to the people?

ANSWER

The funds raised by rating in this particular area are paid to Consolidated Revenue. The rates collected in the outer Darwin area are related directly to the value of the land fixed by the Valuer-General under the Valuation of Land Act and are not intended to be related to the level of services provided to ratepayers in the area. Although the provision of services is not related to the payment of rates, the government is conscious of the need for various essential services in the area. It is currently providing such services as garbage collection and street lighting and is upgrading various streets in the area. Major capital works, valued in excess of $2m, have been carried out in the area over the past 3 years; for example, the reconstruction of the Stuart Highway, Berrimah Road, Hidden Valley Road, Strath Road and Makagon Road. If I recall correctly, there are further roads in this area that are on the existing program for upgrading.

Nuclear Power-Station for Darwin

Mr ISAACS to MINISTER for MINES and ENERGY

Can he inform the Assembly whether approval from the Commonwealth has been sought to establish a nuclear power plant in Darwin and, if so, what has been the response?

ANSWER

The answer is no.

Control of Antibiotics in Stockfeed

Mrs LAWRIE to MINISTER for PRIMARY PRODUCTION and TOURISM

Given his answer of Thursday 21 August, is he yet able to indicate when

legislation to control the use of antibiotics in stockfeed will be introduced in the Assembly?

ANSWER

My understanding is that the instructions have gone to the draftsman and we hope to introduce legislation early next year.

Ross Park Primary School

Mr D.W. COLLINS to MINISTER for EDUCATION

What action is intended to overcome the accommodation problem at the Ross Park Primary School for the 1981-82 period?

ANSWER

I understand that the difficulty will arise about mid-1981, certainly not before the end of the first term in 1981. As the honourable member would be aware - and I thank him for his attendance at the school council meeting conducted at Ross Park Primary School recently - a series of options were placed before parents ranging from transferring Year 7 at Ross Park Primary School to the Sadadeen High School to providing temporary demountables at various locations, including Ross Park itself, the high school site or at the Rona Glynn Pre-school or, alternatively, bussing the students temporarily to Traeger Park Primary School. All of this is brought about by the necessity for the government to have available to it a subdivision in which to place the new school for the Sadadeen area. That school will incorporate both a pre-school and a primary school. The problem will probably exist for about 18 months from about mid-1981.

I have examined all of these proposals in depth at the request of the parent body. The parents had been told that the departmental view - and this was a quite proper view in terms of economics and education - was to transfer the Year 7 children to the Sadadeen High School. The parents took the view - and I respect their view entirely - that children who progress through primary school would regard Year 7 as their opportunity to be the senior class in the school. If those children were denied the right to be top of the block for Year 7, then the opportunities to develop leadership and so on would be lost until such time as they reached Year 12. In the light of the expressions of concern by the parents, I have completely reviewed the options and will be taking them to Cabinet this Friday with a view to reaching the best possible decision in all of the circumstances.

Dhupuma College Staff

Mr LEO to MINISTER for EDUCATION

How many of the Aboriginal house parents and social advisers from Dhupuma College are still employed by the Education Department?

ANSWER

I ask that the question be placed on notice.

Block at Howard Springs

Mrs PADGHAM-PURICH to MINISTER for COMMUNITY DEVELOPMENT

Who owns the block of land next to the Howard Springs School and what is its future as a reserve? What plans are there to put a community hall on the block?

ANSWER

The land in question is Crown land at present. There has been an application for an oval next to the school to be vested in trustees. The government has considered this and is in the process of making a decision on the matter. There has also been an application for funding for a hall to be used by various groups. This would be associated with the oval itself. $35,000 has been set aside in the budget to meet the operational expenses and to allow the trustees to establish a hall which can be used by various community groups. This is part of a move in rural Darwin generally. The population is growing to such a degree that there is now pressure for independent community facilities at Berry Springs, Humpty Doo and Howard Springs in addition to the very excellent facility at Fred's Pass Reserve which is funded by the government and run by voluntary staff. As the population increases in the rural area, the government will be moving towards providing additional services as the demand requires.

Dollar-for-Dollar Subsidy to Schools

Mr B. COLLINS to MINISTER for EDUCATION

Can he indicate the guidelines for the dollar-for-dollar subsidy which he announced 20 minutes ago?

ANSWER

A circular will be sent to schools. I will indicate the major points. Subsidies will apply to fund-raising activities to fund educational projects. School fees will not be considered for the purpose of attracting a subsidy. Evidence must be produced to show that funds have been raised in the current financial year. Bodies which are eligible for subsidy are school councils, parent-teacher organisations and pre-school committees. The scheme is applicable to government and non-government pre-schools, primary schools and secondary schools. To allow immediate implementation of the scheme, each school will be eligible for a subsidy of up to $5,000 in 1980-81. Applications may be submitted to the maximum limit at any time during the financial year but it would be in the best interests of all concerned if applications were submitted before 30 March 1981. Applications for projects beyond $5,000 must be submitted by close of business on 20 February 1981. $5,000 is only a notional figure and any school council which feels it can raise a higher sum for a specific project will be welcome to apply for approval. All normal school fund-raising activities are acceptable with the specific exception of school fees and the annual departmental allocation of funds to schools. Applications and any further inquiries should be directed through the appropriate regional office.

Performing Arts Centre in Darwin

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

Is he able to inform me of the current status of the proposal to establish

a performing arts centre in Darwin?

ANSWER

The government is holding ongoing discussions with the Corporation of the City of Darwin on this very matter. We have received a report from consultants relating to the design of the centre. The corporation has land set aside on the Esplanade for the construction of the arts centre. We have been engaged in intensive discussions on how much should be spent on the construction of the building. We have received advice from the Department of Transport and Works on this matter. We are having further talks with the corporation, particularly on the subject of the corporation's contribution to the arts centre. I hope that this matter can be resolved within a reasonably short time. Honourable members will note that a figure of $100,000 was set aside in the budget this year to provide for ongoing design of the arts centre for Darwin.

'Territorians Are Worth Saving' Campaign

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

What is the cost of the current 'Territorians Are Worth Saving' road safety campaign and for what length of time will the campaign be run?

ANSWER

The total cost of the campaign is $112,000. I believe it will last for 1 year.

Ratification of UN Convention

Mr ISAACS to MINISTER for EDUCATION

I understand that there was a meeting of the Attorneys-General in Alice Springs on 6 November attended by the minister in his capacity as Acting Attorney-General. One of the topics for discussion was the UN Convention on the Elimination of Discrimination Against Women resulting from the Copenhagen conference. Can he inform the Assembly whether the states and the Territory have agreed to ratify the terms of the convention?

ANSWER

I do not really know for a start whether it is proper for me to answer the question since I am no longer acting in the capacity of Acting Attorney-General. Nonetheless, I think the Leader of the Opposition would be aware of the convention of the Standing Committee of Attorneys-General that matters discussed therein are not released to the public without the unanimous agreement of all attorneys. Through the Chief Minister as Attorney-General, I would suggest that be checked out with officers and other members of the standing committee and, if appropriate, the information could be made available.

Tiwi War Veterans

Mrs PADGHAM-PURICH to CHIEF MINISTER

Is he aware that there are some Tiwi people who have not yet received entitlements due to them for serving in the armed forces in World War II and there are even some who have not received their war medals?

ANSWER

I was aware that there were Tiwi war veterans who, until 12 to 18 months ago when I became aware of the matter, had not received veterans' pension entitlements and also decorations for war service. The matter is so old that I am a bit hazy in my recollection and I wish to make that clear. I think that I wrote to the Minister for Veterans Affairs on behalf of the Tiwi people and also that I referred the matter to Senator Kilgariff who happens to be sitting in the gallery today. I cannot give any further information but I will certainly follow the matter up.

Funding for NTCOSS

Mr PERKINS to TREASURER

I refer to the recent reports in the media in relation to the government's decision not to fund NTCOSS. Will he advise the Assembly the reasons why he has decided not to fund NTCOSS which is a worth-while organisation in this community?

ANSWER

There is nothing unusual about funds not being available to meet the needs of all applicants for government funding. Indeed, the government has a grants-in-aid program to organisations whom the government supports for their assistance in the welfare field. This has been very much expanded this year. However, the applications that were received total a much greater figure than funds available. That is not unusual. Decisions are made on the merits of each

application. The NTCOSS was one of those that missed out and it was not alone. NTCOSS has been particularly vocal of late and it appears that it requires some sort of a public statement of reasons in addition to the private letter that it received. In my statement of reasons, I touched on the fact that, apart from the availability of funds, my view was coloured by the fact that the organisation appeared to be using its extensive resources to counter government activities and to oppose the government at every move. If honourable members would like to refer to the types of things to which I allude, they should peruse the bimonthly publication that has been issued by NTCOSS over the last year. I think they will get some idea of what I call 'political bias'. That certainly affected my decision in this matter. However, I point out that there is nothing unusual about organisations - some of them quite worth while - not making the grade when one is allocating limited resources.

Private Hospital in Darwin

Mr HARRIS to MINISTER for HEALTH

Have any proposals been received for the establishment of a private hospital in Darwin?

ANSWER

Mr Speaker, I do not know but I am aware that tenders close on 2 December for people who are interested in establishing a private hospital in the Northern Territory.

Performing Arts Centre in Darwin

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

Has a decision been made to determine the design of the proposed Darwin centre for the performing arts by an architectural competition or a design competition?

ANSWER

The government favours a design and construct type of contract for this particular building. It has been the subject of some debate between ourselves and the city corporation. That is the decision the government has taken. As I pointed out to the Assembly yesterday, there are a number of matters still to be resolved before proceeding further.

Funding of After-School Activities at Darwin Primary School

Mr HARRIS to MINISTER for EDUCATION

Could he give me the reason for discontinuing the funding of after-school activities at the Darwin Primary School?

ANSWER

Mr Speaker, I suppose if one were to encapsulate that one would say that it was not the function of the Department of Education to run child-minding services. We are a department of education. The original after-school activities program at Darwin Primary School was introduced after the cyclone to solve the problems pertaining to the cyclone. I have often said that it is about time we started to get over the hangups of the cyclone period. That was what it was

designed to achieve and I think it achieved it. Nonetheless, we all recognise the tremendous value of that location for the purpose of minding children while parents are at work.

I think the parent body at Darwin Primary School accepts the view of the Department of Education that it is not its proper role to use taxpayers' money to involve itself in child-minding services. As a result, the parents have reached an agreement with the school council and, on my understanding, the school council will run the operation. It has the full blessing of the Department of Education and will use departmental facilities and resources. It will be funded as a normal community operation through the school council Certainly, the facility will be maintained but not under the direct auspices of the Department of Education.

Location of Concrete Batching Plant

Mr DOOLAN to MINISTER for LANDS and HOUSING

Is he aware that a concrete batching plant is being constructed on Irwin Road in the 17-mile area in the midst of what has become an established rural residential area? Why could not the plant have been constructed in the Coonawarra heavy industry area or at the 19-mile which already has heavy industry established there?

ANSWER

Mr Speaker, the truth of the matter is that there is no planning controls over the rural area. That is only one of many undesirable activities which have occurred there over the last couple of years - starting off with a sand-blasting plant which also caused grave concern in the rural area. The people who have moved to the rural area did so with a view to urban living and I completely sympathise with them when someone sets up a completely incompatible activity near to them. The people in the rural area know that the government, over a period in excess of 2 years, has tried to persuade the rural people that a town plan over the area to prevent this sort of activity is highly desirable. We were told to keep ourselves and our grubby bureaucratic hands off their area. They did not want to know about it because they considered it would be the thin end of the wedge for local government. The net result is that the whole program was put back by a number of years at the wish of rural people. Now they realise the logic in the government's argument for rural plans and that is proceeding. At the moment, I have the documentation on the rural plan in my office. The plan is markedly different, if not totally different, from that which was originally displayed. I would be quite happy to talk to the opposition spokesman on planning as to whether or not it should be redisplayed. I want honourable members to be fully conscious of what it will mean if we redisplay it. If we do, we are then locked into about another 12 months of objections, counter arguments and redrawing.

The plan is a very simple one, providing for 2 different systems of rural living. The idea that the authority has in mind, and I sympathise with its view, is to require all activities in the rural area to need specific approval. That probably is a very sensible way to go about it in all of the circumstances. However, can I both in conscience and indeed at law maintain that that plan is sufficiently similar to the one which was displayed to recommend its adoption to His Honour the Administrator? I am in quite a bind on the matter. I fully appreciate the wish of rural dwellers to maintain their lifestyles and not have these sorts of activities put next to them; for example, the Greek Tavern. No ethnic reflection is meant but, when someone wants to call the business

'The Greek Tavern', I suppose one is inclined to call it 'The Greek Tavern'. That is a matter for the Licensing Commission.

That is the present position. I intend discussing this whole matter with my Cabinet colleagues later this week and I would be quite happy to discuss the matter with the opposition spokesman on planning.

Alice Springs Recreational Lake

Mr D.W. COLLINS to MINISTER for TRANSPORT and WORKS

Is he in a position to report progress regarding the Alice Springs recreational lake?

ANSWER

Discussions are still continuing between the government and the Central Land Council. The environmental report has now been released for public scrutiny and comment and I believe the Snowy Mountains authority will be organising a model about the middle of next month.

Northumberland Insurance Company

Mrs LAWRIE to CHIEF MINISTER

My question relates to the Northumberland Insurance Company. I have noted the advertisements in the paper requesting those affected by the collapse of the company to approach the Territory Insurance Office. Could the Chief Minister give some indication as to the relief likely to be offered to those people?

ANSWER

I wonder if the honourable member for Nightcliff would mind redirecting the question to my colleague, the Treasurer. He may be able to answer it in some detail. I have a recollection that we did approve a scheme for relief of Northumberland victims to the extent of 50% of their loss. I am not certain of that. Perhaps the best solution would be for the honourable member to put the question on notice.

Bali Cattle Experiments

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION and TOURISM

Are the experiments with Bali cattle, which have involved an extensive cross-breeding program since 1962, to be discontinued and, if so, why?

ANSWER

The program will be terminated after some 17 years of research requiring considerable resources. The results achieved are inconclusive. The scientific opinion, both inside and outside the department, is quite diverse about the commercial use of this particular cross-bred animal. I am advised that, while the department was successful in breeding 2 fertile Brahman-Bali-cross bulls, at the most optimistic estimate, a further 10 or 15 years of breeding and selecting from a large population would be required to enable the department to assess their commercial value.

Alice Springs Recreational Lake

Mr ISAACS to MINISTER for TRANSPORT and WORKS

Has a site yet been chosen for the recreational lake in Alice Springs and, if so, where will it be located?

ANSWER

At the moment, no site has yet been chosen because discussions are taking place with the Central Land Council and government officials. The environmental report has just been made available for scrutiny. Once that particular information has been assessed, a decision will be made.

Heritage Program

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

Recent comments made by the Leader of the Opposition would have us believe that this government has nothing done towards retaining our heritage. Does the government have a program of preserving our heritage and does the government have a register of historic buildings?

ANSWER

The government does have a comprehensive program of preserving the Territory's heritage in a number of areas. The Heritage Committee, which the government established recently in conjunction with the National Trust, has prepared a comprehensive list of sites proposed as a register of historical sites of some significance in the Northern Territory. It is intended to circulate this to interested bodies and government departments for them to take note of in relation to any particular works. The list will be presented to Cabinet shortly for its approval and, once that is done, such a Northern Territory list will be distributed.

In the meantime, however, the Australian Heritage Commission does have a list called the National Estate Register which is an Australia-wide list of sites of historical significance and sites which perhaps should be either preserved or taken into consideration in any developmental proposals. Sites that are to go on the National Estate Register are gazetted and objections or comments invited before they are finally adopted by the Australian Heritage Commission. The latest of those lists affecting the Northern Territory was actually gazetted on 31 October. That is a list of additions. Indeed, there are some hundreds of sites already in the National Estate Register which affect the Northern Territory. Whilst the Northern Territory government has not necessarily endorsed those sites, the register obviously has some significance even if it is not binding in law in any way. In association with the Commonwealth government, the government funds the National Trust in the Northern Territory to undertake certain works in relation to preserving our history and historical sites. In addition, individual organisations are also funded by this government for the preservation or restoration or survey work on existing buildings that private organisations may happen to own. This is an ongoing program and we certainly take the subject very seriously. I was rather alarmed at comments by the Leader of the Opposition reported in the press recently. These were just so far off key that I am sure that he did not really believe them at all.

Cattle used in Bali Hybridisation Program

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION and TOURISM

What will happen to the cattle used in the Bali hybridisation program at the Coastal Plains Research Station if this program is stopped?

ANSWER

The government is approaching institutions like CSIRO, James Cook University and private landholders to see if they would care to take the project over. There are certainly no plans to slaughter animals or to put them on the open market. In fact, if the animals did go to a nature park or tourist institution of some sort, I would want to approve of the facilities personally.

Vanderlin Drive

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

When is it proposed that Vanderlin Drive east of Lee Point Road will be reconstructed?

ANSWER

I believe that the design stage will take place in the 1980-81 financial year.

Dhupuma College Staff

Mr LEO to MINISTER for EDUCATION

Did he guarantee to continue employment of Aboriginal house parents formerly employed at Dhupuma College?

ANSWER

The short answer is no.

Darwin Public Library

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

Is he able to inform me when the Darwin Public Library will be operating from its new position in Centrepoint?

ANSWER

Most of the Department of Community Development, including the library service, will be located in the new Centrepoint building. I understand that will be ready towards the end of December. At that time, the Darwin Public Library, which is operated at present from the old Esplanade site, will be moved to Centrepoint. We hope to have very fine facilities for the display of the extensive range of books that the library service has.

Fisheries' Vessels

Mrs LAWRIE to CHIEF MINISTER

Are the fisheries' vessels or police vessels Salloo and Pobassoo

presently being used for research and monitoring of fish species and numbers and, if so, could he indicate the level of expertise on board to perform this task?

ANSWER

The question calls for some detail. I am unable to provide the fine detail as requested by the honourable member for Nightcliff in relation to the numbers of persons on board each vessel at present but I can say that, at the time of transfer of the fisheries enforcement function to the Police Commissioner, a memorandum of understanding was signed between the Police Commissioner and the Department of Primary Production which allowed for the continued use of these vessels for research and monitoring of fish numbers, habits and so on. If the member for Nightcliff would like to place this question on notice, I will see that it is answered as promptly as possible.

Sand Mining at Flying Fox Creek

Mr B. COLLINS to MINISTER for MINES and ENERGY

What kind of authority was granted to the Ranger contractors who are currently extracting sand from the banks of the Flying Fox Creek immediately adjacent to the Arnhem Highway? How long is this work likely to continue and will any attempt be made to rehabilitate the area when it is finished?

ANSWER

The honourable member would know that most of these activities are carried out with an authority under the environmental act that we have controlling the uranium industry. The things that he has referred to would be documented. I will take the question on notice and get him the information in writing.

Northern Territory Division of the National Trust

Ms D'ROZARIO to MINISTER for COMMUNITY DEVELOPMENT

Has he yet seen audited statements for the Northern Territory Division of the National Trust and, if so, what is the position of future funding of this body?

ANSWER

I have not seen the final audited statements of the National Trust. I think that answers both parts of the question.

Berrimah Experimental Farm

Mr HARRIS to MINISTER for PRIMARY PRODUCTION and TOURISM

Has consideration been given to moving the Berrimah Experimental Farm to another area?

ANSWER

I am not aware of any proposals to shift the Berrimah Experimental Farm. It certainly would not be my decision alone; it would involve quite a few other Cabinet members.

Performing Arts Centre in Darwin

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

Has a decision been made about the management of the proposed Darwin cultural centre and will the government establish by legislation a trust in accordance with the precedent set by the establishment of the Araluen foundation?

ANSWER

To the best of my knowledge, the question of the organisation to administer the Darwin cultural centre when it is completed has not been addressed as yet. Obviously, the city council would play a very important role in the decision. Indeed, it will be funding portion of it and the government would as well. At this stage, I cannot answer the honourable member's question.

Water Reticulation Repair Service in Rural Area

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

When will a proper emergency water reticulation repair service for a full 24-hour period be extended to people in the rural area in the same way as applies to people in the Darwin area?

ANSWER

Emergency services as applying to the Darwin area already apply in the rural area. However, the after-hours-service contractor is Wormald. It takes phone calls from people who have complaints and passes them on to the department for immediate action. In the last 3 months up to October this year, there have only been 6 calls registered by Wormald to the department and I am only too willing to investigate any complaint that the honourable member might have in regard to service to people out in that area. As I understand it, people in the rural area are given the same service as people who are living in the Darwin area.

Recreational Lake for Alice Springs

Mr PERKINS to MINISTER for TRANSPORT and WORKS

I refer to the answer he gave to the honourable member for Alice Springs in respect to the recreational lake for Alice Springs. On what site in the Alice Springs area is the model going to be prepared for by the Snowy Mountains authority in respect to the recreational lake?

ANSWER

To clear up any misapprehension that the Assembly may have, I do have a briefing here and I will take the time of the Assembly to read it. Following investigations into several possible sites for the recreational lake in the Alice Springs area, a report was produced which favoured a site on the Todd River near the old telegraph station. A public meeting was held in the town in January 1980 and public comment was overwhelmingly in favour of the project. An independent environmental impact review carried out by consultants, Dames and Moore revealed 2 main reservations concerning the Todd River site. An Aboriginal sacred site would be inundated and the use of the lake would be restricted by the rate of siltation. Early favourable advice on the sacred site was contradicted by a later advice from the Central Land Council. The

Chief Minister and the Council have been corresponding but, as yet, there is no final agreement. It is estimated that attention to soil conservation and sediment control will allow a useful life of 120 years for the reservoir. Discussions have been taking place between officers of my department, the Conservation Commission and the Alice Springs corporation and the final Dames and Moore environmental review has been released for public scrutiny and comment. The Snowy Mountains Engineering Corporation model of a proposed dam site and its spillways is almost complete. The report and a film of the model in operation should be available in December. In answer to the honourable member's question, it looks like the site will be the Todd River site, near the old telegraph station.

Dhupuma College Facilities

Mr B. COLLINS to MINISTER for EDUCATION

Can he inform the Assembly as to what will be done with facilities at Dhupuma College?

ANSWER

Subject to the goodwill of the Trades and Labour Council, they will be used for purposes for which they were acquired by the Northern Territory government; that is, for education purposes. I find that, because of the Teachers Federation affiliation with the TLC, the TLC must find itself in a dilemma. There are 3 houses and 2 demountables that we negotiated with Nabalco for occupation by teachers at the beginning of the year. I am not certain whether the black ban has been lifted but, if it has not, the Trades and Labour Council will deprive its own members of accommodation.

MOTION

Mr ROBERTSON (Lands and Housing): I move that Business of the Day be called on.

Motion agreed to.

Mr COLLINS (Arnhem): Mr Speaker, I would like to debate the motion, Sir.

Mr SPEAKER: My adviser assures me, honourable member, that the motion has been put and passed.

Mr COLLINS (Arnhem): Mr Speaker, I was on my feet, Sir.

Mr SPEAKER: I did not stop the question being put. You will have the opportunity to speak tomorrow should you so desire.

Mr ISAACS (Opposition Leader): A point of order, Mr Speaker! My point of order is that I certainly saw the member for Arnhem on his feet when you asked, 'those in favour'. I certainly do not recall you asking for those against. I certainly do not recall you saying that the motion was therefore carried. I do not recall you saying 'the noes' ; you did not give an opportunity for a division. The member for Arnhem was on his feet. You did not see him. That is not your fault but, when he drew your attention to the fact that he was on his feet and wished to speak, I believe he ought to have been allowed to speak.

Mr SPEAKER: The Leader of the Opposition has a point. I will certainly allow the member for Arnhem to speak tomorrow. The question is that the

22201.811-29

motion be agreed to.

The Assembly divided:

Ayes 11	Noes 8
Mr D. Collins	Mr B. Collins
Mr Dondas	Mr Doolan
Mr Everingham	Ms D'Rozario
Mr Harris	Mr Isaacs
Mr MacFarlane	Mrs Lawrie
Mrs Padgham-Purich	Mr Leo
Mr Perron	Mrs O'Neil
Mr Robertson	Mr Perkins
Mr Steele	
Mr Tuxworth	
Mr Vale	

Sittings of the Assembly in 1981

Mr ISAACS to MINISTER for EDUCATION

Has a timetable for next year's parliamentary sittings been decided upon and, if so, is it true that the Legislative Assembly is scheduled to sit for 24 days in 1981?

ANSWER

As you would be aware, Sir, the arrangements for the sittings of the Assembly are normally arranged between the Chief Minister and yourself and notified through your office. I do not believe, Sir, that you have promulgated a proposed program for next year and therefore the question cannot be answered at this stage. Nonetheless, I dare say that you and the Chief Minister will arrive at a proposed program as soon as possible and every member will be informed.

Sittings of the Assembly in 1981

Mr ISAACS to MR SPEAKER

Mr Speaker, I redirect the question to you, Sir. Can you inform the Assembly whether a timetable for next year's parliamentary sittings has been decided upon and, if so, is it true that the Assembly is scheduled to sit for 24 days in 1981?

ANSWER

I will answer that question in due course.

Trachoma Program

Mr VALE to MINISTER for HEALTH

Can he advise in view of recent publicity whether or not the Northern Territory government proposes to continue with the national trachoma program?

ANSWER

I propose to table a statement next week for discussion relating to the noise that has been occurring about the Northern Territory's involvement in the trachoma program. I would prefer to leave my remarks until that time.

Agricultural Development and Marketing Authority

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

Can he advise the Assembly of the current staffing and activities of the Agricultural Development and Marketing Authority. Could he also advise the Assembly of the firm proposals for the activities of that organisation in 1981?

ANSWER

I thank the honourable member for his question. I do advise that recruiting is presently in progress as far as staffing the Agricultural Development and Marketing Authority is concerned. I understand that applications have been sought for key level positions and they are presently being examined.

In the Douglas-Daly land development area, at least 2 project farms will be established involving the acquisition of land, siting and construction of houses, provision of domestic water, electric generators, fencing and machinery sheds. In addition, in the order of 1,000 hectares of green timber will be cleared for each farm in accordance with existing soil surveys and incorporating appropriate soil conservation methods. Settlers for these farms will be selected and take up residence in 1981 in order to establish crops for the 1981-82 season. Planning for additional farms in the area will continue.

In the Adelaide River area, existing irrigation land is to be regraded with repairs being completed on drains and supply channels. The land in question is to be leased from present owners and a rice project farm established that will be fully operated by the authority. Soil surveys will continue to enable more of an accurate assessment to be made of factors that will determine the ultimate scale of rice growing in the region. This work will parallel Department of Primary Production projects aimed at increasing rice yield and aid in developing complementary enterprises for these farms.

The authority will be undertaking a number of market research projects to more accurately define the size and nature of the market for major commodities. This will include means of developing a greater level of demand for feed grains and export markets for formulated feeds. Feasibility studies relating to siting, capacity, managerial requirements of grain storage and processing facilities will be undertaken. Marketing services to horticultural growers will be developed in association with such producers.

The last point that I would like to raise this morning on this matter is the Commonwealth government relations with the Northern Territory. The Bureau of Agricultural Economics will submit to the Northern Territory government the outline of a cost-benefit study that will run over the stage 1 period of development. The study will incorporate input-output data, development costs and infrastructure costs obtained from the project farms. It will have a significant bearing on the Commonwealth's attitude towards financial assistance of agricultural development in the Territory.

Connector Road from Stott Terrace Bridge

Mr D.W. COLLINS to MINISTER for TRANSPORT and WORKS

Can he advise me of the likely commencement and completion dates of the connector road from the Stott Terrace Bridge to Undoolya Road?

ANSWER

Tenders will close in March of next year and the project should be completed by the end of 1981.

Saturday Afternoon Trading

Mrs O'NEIL to MINISTER for INDUSTRIAL DEVELOPMENT

Has the government given consideration to the possible harmful effects on small surburban supermarkets of Saturday afternoon trading by large interstate firms such as Coles? Will the government consider restricting trading hours of such large businesses in order to benefit the smaller local businesses?

ANSWER

The government has not considered the question raised by the honourable

member for Fannie Bay. I would indeed hope that this government does not get into the realm of controlling business hours. In states where they have legislation on how many hours a week certain businesses can remain open, they have an awful lot of industrial disputation in any situation where the status quo was required to be changed.

The only 2 areas of the Northern Territory where business hours are controlled are in the sale of liquor and the operation of the casino. I believe that it would be a disservice to the people of the Northern Territory if we ever get into the situation of deciding when people shall open their doors for business in any other kind of business at all.

Dhupuma College Equipment

Mr LEO to MINISTER for EDUCATION

Is it a fact that various school supplies and stock from Dhupuma College were burnt or otherwise destroyed without any attempt being made to establish whether schools or community groups in Nhulunbuy could have made use of them?

ANSWER

Mr Speaker, the rumour the honourable member refers to is one that came to my attention through your own good offices and, of course, it was nothing more than a rumour. A number of old mattresses and pillows and other such items that were unsuitable for further use were disposed of. Most certainly, no items of any value to any students were destroyed so far as I know. I dare say a number of items in the Dhupuma College complex would have deteriorated as a result of the department's unwillingness to break through picket lines and black bans. Certainly, no action taken by the Department of Education would have had a detrimental effect on any useful material whatsoever.

Coastal Plains Research Station

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION and TOURISM

Is the Department of Primary Production going to permanently close down the Coastal Plains Research Station and, if so, what will be done with the land and facilities? If it is to be offered to a private individual or company, what are the particulars of the proposal?

ANSWER

Mr Speaker, the government is not closing down the CPRS. Obviously, there has been some reorganisation and direction changes in the department. I am advised that there are certain individuals and companies interested in either leasing the land or doing something with it. I am not too sure what. This is being discussed with divisional officers at this time. The department would prefer to change the emphasis in the utilisation of the station from animal breeding and grazing comparison trials to pasture introduction and horticultural and buffalo research.

NT Ombudsman

Mr ISAACS to CHIEF MINISTER

Did the Northern Territory Ombudsman recently apply to the government to attend an international conference of ombudsmen in Israel? If so, was the

application granted and, if not, why not?

ANSWER

The Northern Territory Ombudsman recently applied to the Overseas Visits Committee to attend a conference of ombudsmen in Israel. In my absence, the application was turned down eventually by the Acting Chief Minister. The Ombudsman applied to me for a review of the decision and, for obvious reasons of principle, there was no possibility of any review. How can the Chief Minister review the act of the person who was acting as the Chief Minister at the time? Therefore, the Ombudsman was unable to attend the international conference of ombudsmen. Invitations were extended to ombudsmen of all the Australian states. I am not aware how many Australian ombudsmen did attend the conference but I could certainly find out if the Leader of the Opposition wishes to know.

Protection for Local Egg Producers

Mr VALE to MINISTER for PRIMARY PRODUCTION and TOURISM

Can he advise whether or not it is the government's intention to introduce in this session legislation to protect local egg producers against southern dumping?

ANSWER

This proposal has been the subject of much debate, particularly in the Central Australian area. It is my intention to get final approval from my party for the introduction of demand and supply of eggs legislation. The proposed legislation is regarded by the Council of Egg Marketing Authorities in Australia, which controls the hen levy, as fundamental to the avoidance of the hen levy in the Northern Territory. The government wishes to ensure that Territory producers do not exceed 90% of the Territory consumption. By remaining a net importer, Territory producers will be exempt from the Commonwealth hen levy which currently runs at $1.95 per bird per year.

Department of Primary Production Offices

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

When will the Darwin offices of the Department of Primary Production be housed together in satisfactory accommodation at the Berrimah Experimental Farm?

ANSWER

There are proposals to establish further facilities at Berrimah but, like all proposals, they are subject to pretty tight scrutiny as far as expenditure is concerned. It is a matter of the priorities of the government at the time. Obviously, there is no way in the world that I could commit the government in advance of next year's budget.

Cape Don Lighthouse Buildings

Mrs LAWRIE to CHIEF MINISTER

Following the Northern Territory Conservation Commission's approaches to the federal Department of Administrative Services regarding certain

buildings at Cape Don Lighthouse, can he indicate whether it has received any guarantees that their wishes will be considered by the federal department?

ANSWER

I cannot give any such indication to the honourable member because I am not au fait with this particular matter at present. If the honourable member would like to drop me a line, I will certainly obtain an answer for her pretty swiftly.

Dental Treatment of School Children

Mr HARRIS to MINISTER for HEALTH

Is legislation being considered which will enable dental therapists to recommend and carry out treatment on secondary schoolchildren's teeth?

ANSWER

There is a proposal in the pipeline at the moment for legislation to cover such activities. It has not been dealt with by the government formally and, when it is, there will be an appropriate announcement made.

Housing Commission Tenants in Nhulunbuy

Mr LEO to MINISTER for LANDS and HOUSING

Given the Housing Commission attitude on the sale of Housing Commission houses to tenants throughout the Territory, what steps are being taken to provide the same facilities to Housing Commission tenants in Nhulunbuy?

ANSWER

I thank the honourable member for the question. It certainly is something that his predecessor and he are very concerned about. It is certainly something that has occupied my attention for some time. The honourable member would be well aware that the government has long stated its wish to offer for sale Housing Commission houses in his home area and quite properly so. The difficulty is to come up with the land tenure system which would allow that to happen. I can assure the honourable member that, if it is humanly possible, a solution to this dilemma will be found. Land in all other centres of the Northern Territory is owned by the Crown and, as such, it can issue leases in perpetuity or in fee simple to citizens of the Northern Territory. The title of land in the Nhulunbuy area is quite different and the best that can be arranged, in conjunction with the Aboriginal people and the mining company that is concerned, is some form of period tender - 30 years, 50 years or whatever the case may be. Perhaps some form of roll-over could also be negotiated. It is an extremely complex matter which I honestly believe will take quite a bit of time to solve. I would like to discuss with the honourable member whether or not he has any solutions from discussions he may have had as a local member over there, particularly with the traditional owners of the area who pose grave difficulties in this matter.

Water Tank East of Sadadeen Subdivision

Mr D.W. COLLINS to MINISTER for TRANSPORT and WORKS

Can he advise what progress has been made in the construction of an

additional water tank east of the Sadadeen subdivision?

ANSWER

An item has been included in the 1980-81 program to construct the water storage tank at a cost of $1.2m. The tender target date has been scheduled for 1980-81 and the work should therefore commence early in the next financial year.

Old Fannie Bay Golf Course Area

Mrs O'NEIL to MINISTER for LANDS and HOUSING

Has the government yet made a decision about the future use of the old Fannie Bay golf course area? Will the government incorporate the land in the East Point Reserve?

ANSWER

To the best of my knowledge, the answer to the first question is no and, therefore, the second question cannot apply. I certainly undertake to write to the honourable member with whatever information I can find out as to the current state of planning. As she will be well aware, it is not solely a matter for the Northern Territory government. The wishes of the city corporation must also be borne in mind. I will write to her with an up-to-date report as soon as possible.

Aboriginal Employment in Upgrading of Airstrips

Mr ISAACS to CHIEF MINISTER

What steps have been taken to ensure that Aboriginal people have been employed in the upgrading of airstrips currently being undertaken as part of the works program for Aboriginal communities?

ANSWER

Perhaps this question could better have been directed to the Minister for Transport and Works since it apparently seeks specific details on these particular contracts. But I can outline again the policy of the government which is the same as the policy of the federal government and that is to seek the employment of Aboriginal people as much as possible in the carriage of works in Aboriginal areas. If any work can possibly be carried out by Aboriginal concerns, corporations, communities and so on, then at times attempts are made to give those bodies a preference when letting contracts. I am not aware of the exact monetary figure at the moment but I do recall reading a document some time before I went away that indicated that millions of dollars had gone to Aboriginal community organisations to carry out work for the Department of Transport and Works since self-government. I am sure that, within the limitations of airfield construction work which requires a fair degree of expertise and engineering supervision, as many Aboriginal people as possible will be employed.

Aboriginal Employment in Upgrading of Airstrips

Mr ISAACS to MINISTER for TRANSPORT and WORKS

With regard to the specific program of the upgrading of aistrips in

Aboriginal communities, what steps have been taken by his government and by the contractors to ensure that Aboriginal people have been employed in that program?

ANSWER

I am unable to provide the Leader of the Opposition with that information. However, I will provide it at a later hour in this sittings.

Mereenie Oil Field

Mr VALE to MINISTER for MINES and ENERGY

Can he advise the present status concerning the signing of the oil field lease between the Mereenie partners and the Northern Territory government? Can he further advise the present location of the rig purchased by the partners for that field and, if he knows where it is, can he tell us when drilling will start?

ANSWER

My understanding is that an offer of lease has been made to the partners. It is really a matter for them to take up the offer or come back to the government if they have problems with it. I would expect that matter to be finalised within weeks. The company advised me 2 or 3 weeks ago that it has purchased a rig in America to the tune of $4.5m. It was expected to be in Adelaide at the end of November and it was planned to commence a drilling program in the Amadeus Basin in January. I assume that the schedule of the company is proceeding as expected.

Northern Territory Port Authority

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

Is the Northern Territory Port Authority to continue in its present role or is it his intention that it will be expanded to cover the operation of other Territory ports or be absorbed into the Department of Transport and Works?

ANSWER

The information is subject to a Cabinet paper that is being prepared and I am unable to provide her with that information.

Green Paper on Education

Mr B.COLLINS to MINISTER for EDUCATION

Will a redrafted Green Paper on education be tabled at this sittings to be used as a basis for a White Paper perhaps in the sittings next year?

ANSWER

I think the honourable member would be perfectly correct in saying that it would be leading towards a White Paper next year. That gives me another 12 months. I have received a final draft of the proposed Green Paper and it was my full intention to have that tabled at this time. Nonetheless, it is a document of great importance and the greatest possible thought must be given to it before it is tabled so that it truly reflects the current thinking for

the purposes of discussion by Northern Territory parents, students and teachers alike. For that reason, I doubt that I will be in a position to table it at this present sittings. This means that the February-March sittings would be the appropriate time at which I would be tabling that document. If I find that I am in a position to table it this sittings, I will do so.

Imprisonment of a Youth in Alice Springs

Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

Is he aware that, in Alice Springs court on 28 May this year, a youth under the age of 14 was remanded to prison pending a second appearance before the court on 4 June? If this is the case, would he investigate why a youth under the age of 14 was placed in a prison?

ANSWER

I do not have specific details of this matter to hand at the moment but I will endeavour to obtain them. The normal procedure of the department is that I am advised forthwith every time a juvenile is taken into an institution in the Northern Territory under the control of my department. In all probability, I would have been advised but I do not remember the incident or the dates. I will clarify the matter and advise the Assembly.

Marina in Darwin

Mr HARRIS to MINISTER for TRANSPORT and WORKS

What stage has the proposal to establish a marina in the Darwin area reached?

ANSWER

This topic has certainly come to light in the last couple of weeks. I will be able to provide information to honourable members later. The government has been waiting for a separate report, which is due any moment, regarding the establishment of a marina in Dariwn.

Teaching Service Bill

Mr B. COLLINS to MINISTER for EDUCATION

Can he advise why the Teaching Service Bill will not be proceeded with at this sittings? When will it be proceeded with? Could he also advise the current progress with the appointment of a Teaching Service Commissioner?

ANSWER

The reasons the bill will not be proceeded with at this sittings are identical to the reasons it could not be proceeded with in the April sittings. I would simply refer the honourable member to that debate. Nothing has changed. The Commonwealth simply has not introduced complementary legislation and therefore we are not, in my view, in a position properly to proceed. The timing, I would assume, would depend upon the passage of the legislation by the Commonwealth in the autumn sittings. There will be a special sittings of the federal parliament at the end of November or early in December. Whether or not the legislation will be introduced at that time will depend of course upon the legislative load of the Commonwealth. Certainly, I would anticipate

that, even if it were introduced in that sittings, the federal parliament would not be in a position to pass the bill until the autumn sittings.

As for the second part of the question, it is the government's intention to appoint an interim commissioner. As has been announced by the Public Service Commissioner, his office has received some 22 applications for the position and I am pleased to say many are of a high calibre. The Public Service Commissioner, in conjunction with officers of the Department of Education, will be providing Cabinet with a short list for consideration in due course.

Professor Harry Messel

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION and TOURISM

When is Professor Harry Messel's occupation of the Coastal Plains Research Station to be terminated? Considering the time he has been there and the services offered him by the NT government, will any of his work in the NT be published?

ANSWER

I understand that discussions have taken place with Professor Messel regarding his tenancy at Beatrice Hill. I am advised that Professor Messel has indicated his desire to transfer his operations to Maningrida. Regarding the second part of the question, the decision to publish or not will be a matter for the professor.

Aerial Medical Aircraft

Mrs O'NEIL to MINISTER for HEALTH

Is he aware that Northern Airlines have insufficient licensed aircraft maintenance engineers to adequately service the aerial medical Nomads and, as a result, 3 out of 4 of the aerial medical aircraft based in Darwin have been out of action at one time?

ANSWER

I am not sure that the grounding of the Nomads is entirely due to the number of aircraft maintenance engineers employed by Northern Airlines. One of the unfortunate facts of life about the Nomads is that, for every 2 we have in the air, we have to have 2 on the ground in pieces. I would not be too quick to point the bone at anybody on this particular matter.

MOTION

Mr ROBERTSON (Education): I move that Business of the Day be called on.

Mr COLLINS (Arnhem): I wish to debate this motion. I made some comment earlier in the sittings that, when both the Chief Minister and myself seemed to be slightly confused by a procedural matter, it was hardly surprising because it had been such a long time since any of us had been in here. We are all a bit rusty.

This poses a particular problem with question time. There is no doubt

that question time is one of the most important aspects of the parliament's functions. It certainly excites the most public interest. I do not think there is any doubt about that. It would also have been obvious to the Minister for Education that the Assembly has been packed every question time. It is clear that there are members on both sides of this Assembly who will not have their questions answered if the time is restricted to half an hour.

There does seem to be some confusion over the matter of Standing Orders. To assist in the proceedings of the Assembly, I will discuss that briefly. Some mention was made yesterday of Standing Order 62. Mr Speaker, I would be seeking to have a direction on this from you, Sir, at a later time but it is my belief that Standing Order 62, which mentions those questions which are not open to debate, refers specifically to the manner in which the Leader of the House adjourns question time; that is, by moving that the business of the day be called on. Standing Order 62 says in parentheses that you then have to refer to Standing Order 81. It clearly means that that particular part of the Standing Orders has to be read in conjunction with Standing Order 81. When you then turn to Standing Order 81, you find that it refers specifically to Matters of Public Importance. It is clear from the reading of the Standing Orders that the conclusion of question time is not affected by Standing Order 62 but that it refers specifically to that motion being made during a Matter of Public Importance. That is very clear from the reading of the Standing Orders.

Should any confusion arise in the interpretation of Standing Orders, we have a catch-all Standing Order: Standing Order 1. It states: 'Any question relating to procedure or the conduct of business of the Assembly not provided for in those Standing Orders shall be decided according to the practice in the House of Representatives in the Parliament of the Commonwealth of Australia'. Could I draw the attention of the Assembly to the practice of the House of Representatives in regard to question time? Since 1972 question time has been 45 minutes. From the time that the Speaker asks if there are any questions without notice, 45 minutes then elapses until the conclusion of question time. That has been the practice of the House of Representatives for very good reasons since 1972. It was initiated by Prime Minister Whitlam and has been continued by Prime Minister Fraser since that time. At the conclusion of question time in the House of Representatives, it is then the practice of the Prime Minister to stand and to say that all further questions will be placed on notice. I would commend that procedure to the Legislative Assembly.

I do feel, Mr Speaker, that the restriction that the government has placed on question time is a great imposition both to the Assembly and to the people who are vitally interested in question time. As I said before, it is certainly an extremely important area of the parliament's responsibilities. It is an opportunity for both government members and certainly for opposition members to place the activities of the government under close scrutiny.

That brings me to a further problem. There are twice as many people on this side of the Chamber as there are on that side, if you exclude the people answering the questions, which makes it even more difficult for us on this side - and we ask fewer Dorothy Dixers than members on the other side - to place the government's activities under any kind of scrutiny. The problem is further compounded by the infrequency of the sittings which is obvious from the great gap between the last sittings and this sittings.

I have a few questions to ask next week that will be impossible to ask if question time is restricted to half an hour. In fact, question time has

been less than half an hour. Yesterday, because of notices given by members opposite, question time did not start until 10.07am and finished promptly at 10.30am. I interpreted the message from the Minister for Education the other day to mean that question time would be restricted to half an hour. Yesterday, we had less than 25 minutes for question time. Now, at no time this week has question time not been filled right up until the last minute and ended on each day with half a dozen members still on their feet.

For the benefit of the public interested in keeping the activities of government under review and for the benefit of the procedures of this Assembly, could I suggest respectfully to the Minister for Education that he brings the practice of this Assembly into line with the practice of the federal parliament as laid out in Northern Territory Legislative Assembly Standing Order 1 so that question time be extended to 45 minutes and be concluded by saying that all further questions be placed on notice.

Mr ROBERTSON (Education): Mr Speaker, I have listened with a great deal of sympathy to what the honourable member for Arnhem has said and I accept the sincerity with which he has said it. I nominated that time in light of the experiences of the Assembly during the course of this year where you, Sir, would be looking around in total confusion as to whether anyone would get up and as to whether or not you should take it upon yourself to bring on the next item by your own motion. I simply thought that an appropriate course of action would be to fix a time, not a period, for question time.

The honourable member has rather cleverly used the provisions of Standing Order 1 to enhance his argument. I put it to him that there is nothing in our Standing Orders which relates to acts such as guillotining, gagging and ramming legislation through in the same manner as was perfected by Mr Daly when he was Leader of the House in the Commonwealth. If the honourable gentleman wants to apply the practice adopted in respect of a time for question time, then he would be happy for the government to accept some other practices invented and indeed maintained in those areas in the Commonwealth parliament.

I have given the reason why I decided on 10.30am; it is because on repeated occasions this Assembly has run out of questions. Nonetheless, I have listened with interest to what the honourable member had to say. I will discuss the matter with my colleagues and with him and I will arrive at a conclusion and announce that later.

Motion agreed to.

Length of Question Time

Mr B. COLLINS to MINISTER for EDUCATION

Could he advise the Assembly as to how long question time will be this morning?

ANSWER

As I indicated on the last sitting day, I would give serious consideration to what the honourable member had to say about this matter. I do appreciate his concern. I indicated then that I rejected all his arguments for requesting a longer question time with the exception of course that the gallery is usually most occupied at question time by people interested in the proceedings of the parliament. It is quite an inaccurate analogy to draw a comparison between this Assembly's operations and that of the federal government. He has misinterpreted the intention of Standing Order 1 to imply the use of provisions of the Commonwealth parliament when our own Standing Orders do not provide those provisions. I do not think that that is the intention of Standing Order 1 at all. Every member has an opportunity at question time to ask multitudinous questions. I would anticipate that, in half an hour or thereabouts, everyone has an opportunity to ask 2 or 3 questions whereas, in the federal parliament members are lucky to get an opportunity to ask a question once a month. Nonetheless, I think that probably the best method that we can operate under is for myself, as Leader of the House, to have regard to the nature of questions being asked, the level of interest in them and the legislative program which the government wishes to get through. I propose to make a daily judgment on that matter. For instance, today we have a fairly extensive program before us. On Thursday we have to extend to His Honour the Administrator the courtesy of attending upon him for the presentation of the Address in Reply. The fact that we have, this morning, had sprung on us, even if it is under Standing Orders, a matter of public importance which will occupy the Assembly for some time, causes me to anticipate question time will terminate at 10.30am.

International Atomic Energy Agency in Vienna

Mr ISAACS to CHIEF MINISTER

Did he visit Vienna during his recent overseas trip? Did he meet there with representatives of the International Atomic Energy Agency whose headquarters is in Vienna? If so, can he inform the Assembly of the outcome of those discussions?

ANSWER

Unfortunately, although I did visit Vienna in the course of my recent overseas trip and attempts had been made to organise a program for us in Austria when we were in transit from France to Israel, it was impossible. Indeed, the Ambassador was absent from Vienna and the other officials of the embassy with whom we had contact indicated that they were unable to assist us in what I might term even the smallest degree at that time. The reason was that, unbeknownst to myself, All Saints Day and All Souls Day are holidays of considerable significance in Austria and it so happened that we were there at that time and the whole country had ground to a halt . I believe that was the reason for the absence from Vienna of the Ambassador. All government offices were closed and, indeed, even the museums were closed. The city was in effect dead.

Defence Establishment at Shoal Bay

Mrs PADGHAM-PURICH to MINISTER for LANDS and HOUSING

Why was it considered necessary, in the Commonwealth's occupation of section 407 at Shoal Bay as a defence establishment, that a further mile all round this section was necessary as a buffer zone?

ANSWER

Mr Speaker, I dare say the honourable member would have to write a letter seeking information from the Minister for Defence of the Commonwealth as to why it was needed. One would assume that that particular defence establishment, being of an electronic nature of radar and communications, would need a buffer to prevent interference to the electronic systems located on that site. Upon self-government, the Commonwealth reserved under the self-government act and acts consequent to it various areas of land in the Northern Territory for Commonwealth purposes. Of course, that area of land was so reserved at that time.

Withdrawal of Grumman Trackers

Mrs LAWRIE to CHIEF MINISTER

He probably knows from press reports that the Grumman Trackers are to be withdrawn from Darwin. Has he made any approach to the Minister for Defence with a view to keeping that establishment in Darwin rather than having them withdrawn to defend the southern capitals I guess against those New Zealanders?

ANSWER

I received a telex from the Prime Minister or the Minister for Defence late last week in relation to the withdrawal of the Grumman Trackers. It was pointed out in this telex that these planes would be replaced by the Nomad Searchmasters to be operated by Northern Airlines. On that basis, it seemed to me that it was difficult to oppose the removal of the Grumman Trackers as such from the surveillance operations in the Northern Territory especially when this government continuously maintains that we should be conserving energy. These aircraft consume a terrific amount of fuel and I do not believe that we should needlessly duplicate surveillance functions. However, I have taken the opportunity, without telling the Minister for Defence what his business is or where he should redeploy these Grumman Trackers - I have consigned them to history - to ask him and the Prime Minister to in fact beef up the defence capability of the Australian government in Northern Australia. I believe that the Nomad Searchmasters, if not perhaps the best for the task, at least will be adequate for the surveillance task. We certainly must give them a chance to see how they perform before we criticise them. We will certainly be keeping an eye on their performance, but I have taken the opportunity to request the Australian government, in general terms, to increase its defence capabilities in this area.

Alice Springs Bus Service

Mr D.W. COLLINS to MINISTER for TRANSPORT and WORKS

What progress has been made towards an Alice Springs bus service?

ANSWER

A survey questionnaire is with the Government Printing Office. It is hoped that the Commonwealth Bureau of Statistics will carry out a survey in the Alice Springs area on the public transport needs in that area.

Nuclear Power-Station in Darwin

Mr ISAACS to MINISTER for MINES and ENERGY

Can he inform the Assembly which location the government is looking at as a potential site for its nuclear power-station?

ANSWER

At this stage, the government is not looking at particular sites.

Defence Establishment at Shoal Bay

Mrs PADGHAM-PURICH to MINISTER for LANDS and HOUSING

Does the Northern Territory government have any use for the mile of land around section 407 at Shoal Bay used by the Commonwealth for agrarian purposes?

ANSWER

I know of no such plans. I am certainly aware of a proposed use for the area that is of interest to the honourable member for Tiwi. That relates to a dump which is hardly agrarian purposes. I understand that arrangements for that have been entered into between this government and the Darwin city council. As for any other uses, perhaps the honourable member might make some suggestions to us and we will take those into account.

Crops in Adelaide River Area

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

What crops other than rice will be grown on the Adelaide River? Is there a market for them and would they be an economic proposition? When has he publicly stated that crops other than rice will be grown?

ANSWER

I ask that the question be placed on notice.

Darwin Hospital

Mr HARRIS to MINISTER for HEALTH

There are still a number of people arriving at the old Darwin Hospital for treatment on weekends and public holidays. Is he aware of this fact? If so, what is being done about it? If not, will he please have his department investigate the matter?

ANSWER

Mr Speaker, I am aware of it because the honourable member for Port Darwin brought it to my notice earlier last week. I have taken the matter up with

the department. The department embarked on quite an extensive publicity campaign earlier this year, when the operations of the Darwin Hospital were transferred to Casuarina, to explain to people what services would be available at Casuarina and what services would be available at the Darwin Hospital. In view of the honourable member's representation - and I appreciate that it is a very worthy one - the department will have a look at another program to refresh people's memories about the services they will or will not receive at the Darwin Hospital.

Public Transport to Old Darwin Hospital

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

What is the reason for buses which previously services the old Darwin Hospital being rerouted to bypass the hospital?

ANSWER

I will provide the information to the honourable member at a later hour in this sittings.

Cemetery and Animal Pound

Mrs PADGHAM-PURICH to MINISTER for LANDS and HOUSING

Where will the proposed cemetery and a large-animal pound be situated in the Berrimah area?

ANSWER

My briefing notes on that particular matter are missing. I will have to provide the honourable member with the answer to her question later.

Photocopying Service for Community Groups

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

Since he has offered community groups in Alice Springs a free photocopying service if they provide their own paper, will he make the same offer to community groups in Darwin.

ANSWER

The answer is no. The operations of the access centre in Alice Springs and Darwin are quite different to each other. When I learned of the system that had prevailed in Alice Springs before the time I issued directives about changing the formula for costing for photocopying services through access centres, I agreed to allow the Alice Springs situation to remain as it is while talks proceed with the local government with a view to its taking over the operation from the Department of Community Development. The situation in Alice Springs was quite different to Darwin. The community-based groups themselves provided photocopying paper to the access centre and were charged a small fee for using the paper on the photocopying machine. As a result of this system, the access centre had considerable stocks of other people's photocopying paper on hand at the time of my direction and I therefore undertook to allow that situation to continue.

22201.811-30

Northumberland Insurance Company

Mrs LAWRIE to TREASURER

Can he now indicate the level of assistance to be given to people affected by the collapse of the Northumberland Insurance Company?

ANSWER

Mr Speaker, I do have information relating to the subject, but not an exact answer. However, I advise that approximately $250,000 in motor accident insurance claims was left unsatisfied by the defaulting Northumberland Insurance Company in 1974. Following reponse to an advertising campaign, the Northern Territory government is compiling a full register of those claims and the closing date for submission of details is 21 January 1981. Although it will not be possible to make a proper assessment until after that date, it is my belief that, between the Commonwealth and the Territory, at least the damage element of the claims will be substantially met for surviving victims. That is all the information I have at this stage.

Humpty Doo High School

Mr B. COLLINS to MINISTER for EDUCATION

When will construction commence on the Humpty Doo High School?

ANSWER

I am unable to answer the question because there are many things which may vary the actual commencement of construction. Nonetheless, as indicated prior to the elections, the government will be proceeding with a composite high school for Humpty Doo. It will range from year 8 to year 12. For the benefit of those who seem to be doubtful that this is the case, I reaffirm that commitment. There is absolutely no doubt years 11 and 12 will be taught there. What is necessary is to identify with the parents of the area exactly what type of years 11 and 12 they want. Any examination of the results around Australia in matriculation or in tertiary entrance examinations will indicate that a very substantial student body is necessary to run a composite high school from years 8 through to 12. I think the parents in the Humpty Doo area should bear very firmly in mind the consequences of them insisting upon a composite high school through to year 12.

It is my understanding, having spoken with the executive of the high school steering committee recently, that indeed they are fully aware of this and ongoing discussions will take place between those people and my department. It is hoped to have the first stage of the school committed and opened by the beginning of the 1983 school year. That is subject to tendering and all of the normal things which can have an influence upon the commencement date of building and thereby have a serious influence on the completion date. That is the intention of the government and we hope to be able to keep to that timetable.

Construction of New TIO Building

Mr HARRIS to TREASURER

When is work to commence on construction of the new TIO building which will house the Tourist Commission's office in the mall and when is this building due to be completed?

ANSWER

The tenders for the job the honourable member mentioned have closed and they are currently under consideration. I am advised that the construction period of the building will be about 35 weeks and it is hoped that it would be completed in August 1981.

Upgrading of Acohol Dependence Treatment Unit

Mr ISAACS to MINISTER for HEALTH

What steps are being taken to upgrade the number of personnel and facilities at the Alcohol Dependence Treatment Unit operating at the Darwin Hospital?

ANSWER

Honourable members would be aware that the government committed itself earlier this year to the establishment of a Drug and Alcohol Authority. One of the functions of this authority would be to take over the care of people who are severely affected by alcohol. At the moment I have before me a proposal by the department to beef up the operation of the rehabilitation unit that is currently being operated in a de facto way by the Health Department in the old Darwin Hospital. There is a Cabinet paper in the system now. Given that the matter is before Cabinet, I would prefer to advise the honourable member later in writing of the exact steps that the government will take.

Howard Springs Reserve

Mrs PADGHAM-PURICH to CHIEF MINISTER

Does the Northern Territory government or the Conservation Commission have any thoughts of increasing the area of the Howard Springs Reserve and, if so, when?

ANSWER

The honourable member for Tiwi very thoughtfully gave me some warning that she was intending to ask this question, so I have been able to get a response for her. The situation is that the owners of the land, some of which is required to enlarge the reserve which presently comprises an area of 2,000-odd hectares, have recently indicated that they are willing to consider a government proposal to acquire their land adjacent to the reserve. The additional area being sought is 611 hectares. The Department of Lands is now considering how to best implement the proposal to acquire the land.

Agricultural Development and Marketing Authority

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Have any farmers pulled out out of the ADMA scheme yet, and which farmers will be growing rice on the Adelaide River this year?

ANSWER

The answer is yes. One farmer who was intending to participate in rice growing over the wet season has decided to pull out. The ADMA will now proceed with share farmers or hired farmers and it will also utilise some of

the area on the upper Adelaide River Experimental Station.

Public Transport to Old Darwin Hospital

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

Will the minister take steps to ensure that persons who still have a requirement to visit the old Darwin Hospital can still get there by public transport?

ANSWER

There could be several reasons why the routing has been changed around the Darwin Hospital. First of all, there has been construction at Gilruth Avenue where most of the area has been closed to normal traffic flow. With the advent of the opening of the Casuarina Hospital, there may not be enough demand apart from the people living in that area. However, I will obtain information from the department and provide it to the honourable member. If it is possible to maintain some kind of bus service for those people going to the hospital, we will do so.

Northern Territory Government's Computer

Mr HARRIS to TREASURER

Is the Northern Territory government's computer being used to capacity?

ANSWER

The Northern Territory government's main computer is being used almost to full capacity at the present time. It is somewhat of a fluid situation. Very large computers these days are able to be built onto with various additions of equipment. This has been the case with the government's computer. It was inherited at self-government from the Commonwealth and since that time we have been adding sections to it to cope with needs as they emerged. The government is currently considering an application by the ADP centre to further enlarge the existing computer to meet with the requirements of various government departments and a decision will be made on that matter in due course. For the time being, the machine is being used to its maximum potential.

Unibeef Project at Mataranka

Mrs O'NEIL to CHIEF MINISTER

What environmental controls are being exercised over the Unibeef project to ensure that coffee bush will not spread uncontrolled from the project area at Mataranka?

ANSWER

I have been advised by my colleague, the Treasurer, that it is not coffee bush but leucaena of some type. I can assure honourable members that I have certainly seen coffee bush in many tropical areas of the world and, if it is a problem, then it is certainly not confined to Darwin. I can assure the honourable member for Fannie Bay that the Conservation Commission in the person of its Director and certainly the Environmental Unit is taking a keen interest in the proposals by the Israeli-American consortium for the establishment of ethanol production from this particular tree in the Mataranka area. The

project will be a huge one if it continues in its present form. Obviously, it will be a very good thing for the Northern Territory. Its employment potential is immense. As it is an agricultural project, lands that have never before been put to the plough will come under cultivation. Obviously, there is every incentive to the Northern Territory to support and further the project. I undertake, and I know that the Director of Conservation is behind me on this, to ensure that all conceivable environmental safeguards are maintained.

Uranium Discovery at Ewaninga

Mr PERKINS to MINISTER for MINES and ENERGY

Is it a fact that a German consortium has made a uranium discovery in the vicinity of the Ewaninga conservation reserve which is to the south of Alice Springs? If so, is he aware of any plan to mine or to process this uranium?

ANSWER

I can think of 3 groups which are exploring in the area south of Alice Springs. There are 3 different German companies which all have an interest with Australian partners in an exploration program. If the honourable member would like to put his question in writing, I will see that he receives a reply.

Gap Road Flats

Mr D.W. COLLINS to MINISTER for LANDS and HOUSING

What is the likely starting date for construction of the Housing Commission single-officer flats on Gap Road?

ANSWER

From memory, I understand that the Housing Commission's proposed flat development on Gap Road is subject to a hearing of the Town Planning Authority at this time. The commencement date would be contingent upon the success of that rezoning. I will seek further details on the matter and advise the honourable member later.

Upgrading of Roads in Nhulunbuy

Mr LEO to MINISTER for TRANSPORT and WORKS

Could he give a commencement date for the upgrading of the roads in the area known as contractors village at Nhulunbuy?

ANSWER

I am unable to give a precise date. However, the project is included in this year's capital works program.

Henbury Avenue Special School

Mr B. COLLINS to MINISTER for EDUCATION

Is it true that the opening of the Henbury Avenue Special School for handicapped children, which has already been delayed 12 months, will now not occur until 1982?

ANSWER

Again I will seek the information and provide it to the honourable member later. The honourable member would be aware that we have hundreds of schools in the Northern Territory of one kind or another and it is impossible to remember the status of all of them at any one time.

Bagot Road Lights

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

Why are the Bagot Road lights so out of synchronisation that the people travelling on Bagot Road get a longer go at the green light than the people travelling in from the rural area on the Stuart Highway?

ANSWER

The honourable member may have noticed some lack of synchronisation at that particular location. I believe that the construction of the overpass will cause some problems with traffic flow. I give the honourable member an undertaking to have the matter investigated and I will report to her at a later hour.

Fireworks

Mrs LAWRIE to MINISTER for MINES and ENERGY

Is it the intention in 1981 to have 2 fireworks days and allow fireworks to be sold to celebrate 1 July and 5 November?

ANSWER

I have not addressed myself to the matter. I will advise the honourable member later.

Off-Peak Power Supply

Ms D'ROZARIO to MINISTER for MINES and ENERGY

Have any investigations been undertaken within the Northern Territory Electricity Commission or the Department of Mines and Energy on the feasibility of providing cheap power to off-peak industrial users?

ANSWER

The honourable member raises the issue of cheap power to industrial users. I am at a loss to know what cheap power is and where it comes from. All the power we seem to deal with is pretty expensive. If the honourable member is referring to the principle of giving concessions to some people in industry or to householders for using power at certain times, we are not in a position to do that because we have an agreement with the Commonwealth, relating to the recovery of money, that is fixed to the electricity prices in north Queensland. If we wish to continue our relationship with the Commonwealth so far as our subsidy is concerned, it would be in our best interests to observe that part of the Memorandum of Understanding.

Ross Park Primary School

Mr D.W. COLLINS to MINISTER for EDUCATION

What proposal has been adopted to solve the Ross Park Primary School housing problem?

ANSWER

As I indicated last week, the government has been addressing itself to this very serious matter. I indicated that Cabinet would be considering the matter last Friday. Indeed, it resolved the matter finally yesterday. It will be necessary for the government to provide demountables at Ross Park in order to cater for the short-term difficulties of a very rapidly growing population in that area.

The government will be calling for expressions of interest from builders for a design-and-construct proposal for a completely new preschool, primary school and special school to be located in the new Sadadeen subdivision. The letting of tenders for that private subdivision were recently announced. It is anticipated that it will take about a month from now to draw up the design brief specifications, about 2 months to receive responses from builders for the project and about a further month for the tenders to go out. The tender documents will call for the establishment in the first instance of a core school to accommodate about 150 students, which should be ready by the commencement of the 1983 school year. The remainder of the school will follow very shortly thereafter.

I am afraid that the people at Ross Park will have the minor inconvenience of perhaps 3 demountables placed at Ross Park for the beginning of the second term of next year at which time the problem is due to arise. There will be no problem for approximately the first half of next year. That is the solution which the government has found: a short-term demountable program on the existing Ross Park School where all these children presently attend and the immediate commencement of a multi-purpose primary educational facility at Sadadeen.

Nhulunbuy Water Rates

Mr LEO to MINISTER for TRANSPORT and WORKS

How long will it be before Nhulunbuy residents will pay water rates on a par with the rest of the Northern Territory centres?

ANSWER

The subject of water at Nhulunbuy poses a very difficult question. It is a company town and I thought I alluded to that in the budget debate the other day. Whilst we introduced concessions for Darwin residents on 1 July this year,we are unable to do so in Nhulunbuy because Nhulunbuy is controlled by Nabalco which controls the water supply. However, in light of a press release from the honourable member, I have asked my department to make some inquiries and to report back to me.

Completion Date of Mindil Beach Casino

Mr HARRIS to TREASURER

Is he able to give the completion date of the Mindil Beach casino?

ANSWER

Mr Speaker, I thought that I could have. In the absence of specific information, I believe that the completion date of the casino, now that the contract has been let, will be December 1982. I will endeavour to confirm that for the honourable member.

Outpatients Clinic at Casuarina Hospital

Mr B. COLLINS to MINISTER for HEALTH

Is he aware that large numbers of people are travelling a considerable distance to Casuarina Hospital to find when they get there that they cannot get medical attention? Is it true that medical practitioners are not available at the outpatients clinic until 1pm on Mondays, Wednesdays and Fridays?

ANSWER

The honourable member made a statement at the beginning of his question which I am not sure is true and I will ask the department to investigate and report on it. So far as the matter of practitioners not being available in Outpatients until 1pm is concerned, I will also ask for a report on that and advise the honourable member.

Alcohol Dependence Treatment Unit

Mr ISAACS to MINISTER for HEALTH

Does he give a high priority to the rehabilitation of alcoholics in the Northern Territory? If he does, will he give an assurance that the Cabinet paper that he referred to yesterday on the Alcohol Dependence Treatment Unit will get a priority listing for a Cabinet decision to ensure an early upgrading of this important unit?

ANSWER

Mr Speaker, I certainly give a priority to the rehabilitation of alcoholics in the Northern Territory and the establishment of the unit. The rest of the question relates to matters of Cabinet consideration and I will leave it at that.

Consolidation of Legislation

Mr HARRIS to CHIEF MINISTER

Could he inform me how the legislative draftsmen are proceeding with consolidating Northern Territory legislation?

ANSWER

Mr Speaker, I am happy to be able to provide the answer to the honourable member for Port Darwin's question because a great deal of progress has been made in this area. The program for consolidation and revision of Northern Territory statutes is running well ahead of schedule and indeed below cost estimates - I am sure all honourable members will be pleased to hear - with the reprints. I believe that, at the present time, the Legislative Draftsman is within 20 acts of completing what had been planned for the reprint of the acts and that they will shortly be starting on the regulations. I am told that a fair estimate of when it will be all finished is within 12 months of starting and that is by about May 1981.

It was anticipated that this would be an enormous task and indeed it is a big task. But, using modern methods and with the assistance of the amending legislation which we passed last year to provide for changes in the procedures - for instance, with side notes - the task has been able to be accelerated. I would certainly like to take this opportunity to congratulate the Legislative Draftsman and his staff and the Government Printer. I am sure that all honourable members and indeed the community itself will be pleased to have these reprints.

Outpatients Clinic at Casuarina Hospital

Mr COLLINS to MINISTER for HEALTH

Does he have an answer for me this morning to the question I asked him yesterday about Outpatients services at Casuarina Hospital?

ANSWER

It is my intention to answer the honourable member for Arnhem and the points of the honourable member for Nightcliff tomorrow.

Italian Earthquake

Mr VALE to CHIEF MINISTER

Can he advise what action the Northern Territory government will take to assist victims of the recent Italian earthquake?

ANSWER

I am sure that all honourable members and everyone in the Northern Territory community has been shocked by the recent disaster in the south of Italy which has resulted in very grave loss of life. The timing of a disaster such as this could not have been worse with the onset of winter. I understand that an Australian appeal has been established by the leader of the Italian community here and the Prime Minister has agreed to be patron of the appeal. The Commonwealth government has also announced that it will make an immediate allocation of $500,000 to the appeal. In addition, it has agreed to match dollar-for-dollar funds contributed by the states and the Northern Territory. The Northern Territory government will subscribe $5,000 to assist the victims of the earthquake disaster. I would ask that all citizens of the Northern Territory support the government by adding their own contributions to the appeal.

When one goes around the Territory, the contributions that have been made to this place by the hard work of the many Italian citizens who come to Australia and become good Australian citizens is obvious. They have brought their culture to us and some of their way of life which I think has added very greatly to our way of life since immigration commenced in a serious way after the second world war. In order to make arrangements for the proper collection of contributions, I have contacted the Lord Mayor of Darwin and the Mayors of Katherine, Tennant Creek and Alice Springs and the Chairman of the Nhulunbuy Corporation. All have agreed to support the appeal and to act as collection centres for donations. They will also provide receipts for donations received and the Commonwealth government has agreed that donations to the appeal will be treated as deductible for taxation purposes. I urge all Territorians to give generously.

Supreme Court Building

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

Can he advise as to the status of the proposed extensions to the Supreme Court building in Darwin and at what stage is the design or construction at present?

ANSWER

I have asked my department to provide me with that information. When I receive it, I will provide it to the honourable member.

Sattler Airstrip

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

Why are the marshalling yards being established at the southern end of the Sattler airstrip at the 22-mile and will they be used for public or private purposes for industrial material transhipment or primary production transhipment?

ANSWER

Investigations are being made to provide some trucking and storage facilities south of Berrimah. At this stage, it is only an investigation. When I have more information, I will provide it to the honourable member.

NT Ombudsman

Mr ISAACS to TREASURER

Will the Treasurer advise why he refused permission, while he was Acting Chief Minister, to the Northern Territory Ombudsman to attend the International Conference of Ombudsmen in Israel earlier this year?

ANSWER

As Acting Chief Minister, I received recommendations on this question from the Overseas Visits Committee which recommended that the trip not be approved. I endorsed that recommendation.

Health Department Finance for Patients Transferred Interstate

Mr VALE to MINISTER for HEALTH

Does the Department of Health pick up the entire medical bill for Northern Territory patients transferred interstate on the recommendations of the Northern Territory health authorities and, if not, what figure is set as the upper limit of these costs?

ANSWER

I believe that the department does pay all the medical expenses. However, in relation to transport costs, there has been traditionally and there will continue to be a contribution of $40 from the patient flying interstate. In some circumstances, it is necessary for patients to have someone accompany them from the department and, in that event, there is a $40 contribution also. The practice was established back in the days when it was 20 pounds. I distinctly remember this from the time my family flew out of Tennant Creek. The $40 is a contribution towards offsetting the airfares which cost $300 or $400 for a return fare. I think that it is very reasonable.

Land-backed Wharf

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

Is it a fact that the design of the new land-backed wharf is being reviewed because the wharf has been found to be too small? If so, will the redesign delay the completion of the project and by how long?

ANSWER

To my knowledge, there are always reviews being carried out to upgrade facilities. However, I am unaware of any review being carried out regarding that particular construction.

Inquiry into Performing Arts

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

In October 1979 an inquiry was announced into the performing arts in the Northern Territory and appointments were subsequently made of members to that committee. Why have they never met?

ANSWER

I will have to seek information on this particular matter and provide it to the honourable member during the course of this sittings.

Upgrading of Housing Commission Houses

Mr HARRIS to MINISTER for LANDS and HOUSING

Has the program to upgrade Housing Commission houses to cyclone standard been completed?

ANSWER

The program to upgrade all Housing Commission rental and sale accommodation-houses and flats- up to cyclone standard has been concluded. Nonetheless, in light of new engineering information, certain weaknesses have been discovered. An engineering review is now taking place in respect of the pre-cyclone design of Housing Commission houses which are viewed to be satisfactory but, nonetheless, if a cyclone of the intensity of Tracy occurred again, there may be some risk in respect of some of the older Housing Commission houses. It is an on-going process. The commission is anxious to complete the upgrading of these houses to the highest affordable standards. It is one of those programs which one could say has no time limit.

Crocodile Attacks in Nhulunbuy

Mr LEO to CHIEF MINISTER

What is being done to protect Nhulunbuy residents from crocodile attacks beyond providing signs which are rapidly being souvenired?

ANSWER

It is a matter of regret to hear that these signs are being souvenired because any person who removes a sign of that type which gives warning to people who might be proposing to enter water which may be inhabitated by crocodiles is really doing a very grave disservice to his neighbours in what is a fairly small community. I am sorry to hear that. If the honourable member for Nhulunbuy can advise me urgently, I will see that the signs are replaced by the Conservation Commission without delay.

Aside from that, the honourable member for Nhulunbuy would be aware - I think I have written to him - that Australia is party to an international treaty in relation to the protection of certain endangered species. It was certainly argued correctly at the time when Australia adhered to this treaty that the salt water crocodile was an endangered species. It now appears that the salt water crocodile may have regenerated to a stage in the Northern Territory where the position should reconsidered. In any event, the Northern Territory has taken steps through the Council of Nature Conservation Ministers

to have the situation reconsidered in respect of the salt water crocodile in the Northern Territory. We certainly do not go so far as to have it declared open season on salt water crocodiles or even to get to the stage where they may be hunted. But we are endeavouring to get them from one schedule which prohibits any dealings with them at all onto another schedule which will enable us to trap them and keep them in captivity. In anticipation of our success in this area, which we must anticipate because it is becoming obvious that action must be taken in certain areas, we have authorised the trapping of crocodiles in the Nhulunbuy area where we receive reports that they could present a danger to human beings. If the member for Nhulunbuy receives reports that crocodiles are menacing popular bathing areas, the Director of Conservation would be happy to hear from him and attempts will be made to trap those crocodiles.

Department of Primary Production

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Is it a deliberate policy of the Northern Territory government to run down the activities of the Department of Primary Production especially in areas of research and experimentation in favour of pilot farms on private properties and, if so, will he explain the thinking behind this policy?

ANSWER

I thought the policy was quite clearly outlined last week. It is not the government's intention to run down the research stations in favour of establishing project farms on private land.

Width of Assembly Tables

Mr HARRIS to SPEAKER

I am continually buffeted from post to table during sittings by staff of the Assembly and also by members. Would you please examine the possibility of having the width of my table reduced?

ANSWER

I ask the honourable member to place the question on notice.

Architectural Consultants to Department of Transport and Works

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

What was the criterion for the selection of 2 private architects in Darwin to act as consultants to his department in preparing design work for the extension to the Supreme Court building? Is it a fact that one of those architects is not registered as an architect in the Northern Territory?

ANSWER

It is true that officers on contract to the department did travel to a number of Australian cities in 1979 in relation to the Supreme Court building project. However, these officers were not contracted as architects but as draftsmen. They visited Perth, Melbourne, Canberra, Sydney and Townsville. These cities were selected because court houses had either been recently constructed or were being constructed there. The purpose of the travel was to collate information on court houses to be used in developing the designing

brief. Such visits are very common in the design stage of major one-off buildings. Indeed, their travel was exactly the same as that undertaken by the local architects in conjunction with the design of the museum and art gallety. It is true that one of the officers at that stage was not registered as an architect in the Northern Territory for the simple reason he was engaged as a draftsman.

Guidelines for Subsidy to Youth Centres

Mr D.W. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

Are the guidelines for the 3-to-1 subsidy for youth centres available and, if so, what are they in outline?

ANSWER

Guidelines for the government's announced policy of providing 3-to-1 subsidies for youth centres in the Northern Territory have not yet reached me. I understand that I will receive them this week. We have not made any grants in this field to date. However, there are sums available under this scheme and they will be used this year. As soon as guidelines are approved, I will ensure that the honourable member for Alice Springs receives a copy.

Aboriginal Essential Services Program

Mr B. COLLINS to MINISTER for HEALTH

Does he agree with the Secretary of the Department of Health that the priority given to the upgrading of the airstrips to Metroliner standard has been detrimental to the main thrust of the Aboriginal essential services program?

ANSWER

I ask him to place the question on notice and I shall write to him about it.

Arts Advisory Council

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

Some time ago his predecessor announced the establishment of an arts advisory council in the Northern Territory and applications for membership were invited. When will he announce to the public the functions of that council and the persons who have been appointed to it?

ANSWER

This matter has now been with me for some time along with a raft of others which have yet to be considered in some detail. I will make announcements in due course.

TIO Building Alice Springs

Mr VALE to TREASURER

Can he advise the estimated completion date for the TIO building in Alice Springs? Can he also advise me whether the TIO proposes to sublet part of that building to other tenants?

ANSWER

The Territory Insurance Office is building an office block in Alice Springs as part of its investment of funds within the Territory. The Alice Springs building will be completed about March 1981. In line with TIO's investment policy, it will rent about 75% of that building to other parties in order to make the TIO more attractive and viable and build up the assets required for backing insurance policies in the Territory.

Architectural Consultants to Department of Transport and Works

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

What was the criterion upon which the 2 architects were appointed as consultants, albeit as draftsmen, to his department for design work on the Supreme Court building?

ANSWER

I ask the honourable member to place the question on notice.

Able Transport Pty Ltd

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

What is the relationship between a company called Able Transport Pty Ltd which operates in Alice Springs and the Department of Transport and Works in Alice Springs?

ANSWER

I ask the honourable member to place the question on notice.

Flagstaff House Site

Mr HARRIS to MINISTER for LANDS and HOUSING

Has a decision been made yet on the future use of the area of land previously occupied by Flagstaff House at the end of Myilly Terrace?

ANSWER

I understand the land is currently held by the Conservation Commission. I also believe that the Conservation Commission has approached the Darwin City Corporation which is interested in taking over maintenance of the land. I am not sure whether that has taken place yet but I can certainly find out.

Douglas-Daly Development Project

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION

In the case of the Douglas-Daly development project, who owns the land which will be acquired to start the project farms and for how much is the land being purchased? How will the Douglas-Daly farm project settlers be selected?

ANSWER

Some of the Douglas-Daly project land is on Douglas Station. Other parts

of the land that we are currently looking at are on Oolloo Station. I understand that the chairman of the authority has approached the owners of the land as to their requirements, the exact boundaries and the negotiable price. Valuations are being conducted on both sides - on the part of the private owners and on our part through the government valuers. Prices have not been established. I do not believe the specifications for settlers have finally been established. I do believe that very attractive specifications will have to be drawn to get the right sorts of farmers into the project farms. That will be distinct from stage 2 where different criteria will be used. But, in the first stage, if you are to attract people who are commercially successful in farming, the conditions would have to be very attractive indeed.

Site of the Old Hartley Street School

Mr D.W. COLLINS to MINISTER for LANDS and HOUSING

Have titles to the blocks in Alice Springs numbers 68 and 69 Hartley Street, which is the site of the old Hartley Street School, been vested in the Alice Springs town council?

ANSWER

The short answer to the question is not yet. The land in question has been applied for by the Alice Springs town council for the purpose of car parking and the National Trust has also applied for the old Hartley Street School which was the first school built in that region and is of quite significant historical value. The Alice Springs town council has been authorised by myself to proceed with the construction of the car-park in order to save time and money. The actual method of tenure in the land is being worked out between the National Trust, the Alice Springs town council and the Department of Community Development which has responsibilities in each of those matters. Immediately the best form of tenure is arrived at, I would anticipate issuing an appropriate lease.

Education Advisory Council

Mr B. COLLINS to MINISTER for EDUCATION

Has he met yet with his education advisory council? Could he advise the Assembly what matters are currently under consideration by the council?

ANSWER

I certainly would not be in a position to advise the honourable member of the details of agenda items which are before the council. The answer to the first part of the question is next week. I am quite happy to send a copy of the agenda to the honourable member so that he will be informed as to exactly what they are considering.

Location of Proposed Rice Farms

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Will the proposed rice farms be located solely on the Adelaide River or will they occupy the whole or part of the Marrakai Plains?

ANSWER

The rice farming part of the first stage is experimental. Initially, it

will be confined in the areas surrounding the upper Adelaide River. I do not know that it will ever get to the Marrakai Plains but it could at a later time.

Architectural Consultants to Department of Transport and Works

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

Regarding the design work produced by the 2 consultants in his department, is it a fact that all designs produced have been scrapped?

ANSWER

I would ask the honourable member to place the question on notice.

Policy on National Testing Program

Mr B. COLLINS to MINISTER for EDUCATION

In view of public statements and some recent controversy on the question of national testing for school children, could he advise the Assembly what his policy is on the national testing program?

ANSWER

I believe the program which was launched by the Australian Council of Research and Education and which is under the auspices of the Australian Education Council was a very worthwhile program. Quite frankly, I fully support it. I always have and I believe I always will. Further, I believe in a mix of external and internal testing of our students within our own school system. As the honourable member for Nightcliff has pointed out, we are all accountable to the consuming public for our educational services. Unless we monitor ourselves and unless we are willing to come clean with the public which pays the money to provide a very expensive educational system, then I think we are failing in our duty. To my mind, there are only 2 ways of doing it. Firstly, you let schools know exactly what is required of them within the core subject areas and then you vet the product. You examine what you have done and what you have achieved. I am a firm believer in testing as a vehicle of finding out how we are getting on, where we are failing and what socio-economic areas in relation to schools are having difficulties so that we can take corrective action on behalf of the taxpayer, the parents and the employers who are so vitally concerned that the delivery of education is of the highest possible standard. I would say that this information, nonetheless, must be very carefully used. It is very easy to draw the wrong comparisons between school and school and district and district. The information should be used for the guidance of the educational system to improve itself. Provided it does not discriminate between socio-economic areas and geographic areas such as to cast the wrong reflections upon individual schools, then this information in my view ought to be made available to the public with that very firm proviso. The other thing is that we simply must get ourselves out of this position where employers are themselves examining students when they are coming out of our schools. It is rampant. The fact of the matter is that employers do not trust us. It is about time we did something about regaining that trust.

Bilingual Education Program

Mr B. COLLINS to MINISTER for EDUCATION

Can he advise the Assembly of the current status of the department's

22201.811-31

investigation into the effectiveness of the bilingual education program?

ANSWER

I am not exactly certain when the report of the task force which is examining the success or otherwise of the bilingual program will be made available to me. At the risk of being proven wrong later, all the indications are that it is a highly worthwhile program.

Crops in Adelaide River Area

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

When has he publicly stated that crops other than rice will be grown on the upper Adelaide River?

ANSWER

I am not so sure that I as minister have publicly made that statement. I do believe that that statement was made on page 80 of the interim Lapidge Report.

Solar Units in Reserves

Mr HARRIS to CHIEF MINISTER

The Conservation Commission has set up solar power units in some southern parks and reserves in the Northern Territory. Will this program be extended to include parks and reserves in the northern parts of the Territory as well?

ANSWER

The policy of the Conservation Commission - and this policy is borne out in practice unlike that of some other instrumentalities - is to avail itself as far as possible of natural sources of energy and to use construction methods which avail themselves of the surrounding environment. The Conservation Commission has built a number of low-energy houses. I understand that the hot water systems at the Katherine Gorge National Park are solar systems. I cannot be sure of that. Certainly, it is the policy of the commission to conserve energy as much as possible. I am certain that I can give an undertaking that, when maintenance is undertaken and any systems are capable of being replaced by low-energy systems, that will be done.

Nhulunbuy Hospital

Mrs O'NEIL to MINISTER for HEALTH

Why was no allocation made in the budget to convert the accommodation blocks at Nhulunbuy Hospital to bedsitters and self-contained flats as has happened and is continuing to happen in other hospitals in the Northern Territory.

ANSWER

I believe there was an allocation of $500,000 to convert the old nurses quarters in Alice Springs to 2 and 3 bedroom units for the staff by knocking the walls out of the old nurses quarters and generally redesigning the building. This will be done because, in their present state, they are not acceptable quarters for nurses or anybody else. If the department presents such

conditions to people, they take the option of living off campus which is not always in the interest of the staff or the department.

So far as Nhulunbuy is concerned, a proposal has been considered to turn the accommodation into larger units by knocking out walls to make them 2 and 3 bedroom units. I understand that money is not the problem. The design of the building precludes simply knocking a wall out to make the building bigger because plumbing and electrical reticulation has to be considered. I will give a detailed paper to the honourable member on the reasons why this particular exercise was not continued at Gove Hospital.

ATEC Courses at Batchelor

Mr B. COLLINS to MINISTER for EDUCATION

Has a decision been taken by the minister as to the admission numbers at the ATEC courses in Batchelor for next year?

ANSWER

The number of students would be subject to budgetary considerations. As I said yesterday in the budget debate, the government is anxious to expand the activities of Aboriginal teacher education to the maximum extent possible given the resources available to it. There is also the limiting factor of space until such time as Batchelor stage 2 is completed. The honourable member is quite at liberty to phone the appropriate people in the Department of Education about a simple matter like this. I cannot give a definitive answer. If he wishes me to track down the information, I am more than happy to do so.

Energy and Industrial Crops

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Are any officers of the Department of Primary Production currently working on energy crops and other industrial crops in a research capacity and, if so, what crops are they?

ANSWER

The answer is no.

Animal Pound at Berrimah

Mrs LAWRIE to MINISTER for LANDS and HOUSING

Can he yet indicate the site of the animal pound which is to be situated in the Berrimah area?

ANSWER

As I indicated to the member for Tiwi yesterday, the location of the rubbish dump has been resolved. I am not certain about the exact location of any proposed pound. I will undertake to obtain the information and personally advise both honourable members during the course of the day.

Central Australian Community College Hospitality Course

Mr B. COLLINS to MINISTER for EDUCATION

Could he advise the Assembly of the current status of the hospitality courses in Alice Springs?

ANSWER

The Director of TAFE and my ministerial officer will be in Alice Springs talking to the people who are currently housed in Gillen House on Monday next. In conjunction with the Community College of Central Australia Council, they will make final decisions, hopefully, during the course of that day.

Stott Terrace Intersection

Mr VALE to MINISTER for TRANSPORT and WORKS

Can he advise whether or not the government will construct an underpass or an overpass either under or over the railway line at the Stott Terrace Railway Terrace intersection and, if so, when will construction commence?

ANSWER

I ask the member to put the question on notice.

Trachoma Program

Mr B. COLLINS to MINISTER for HEALTH

In view of his statement the other day about prophylactic measures that are being taken in regard to child trachoma sufferers, could he advise the Assembly what is being done for adult sufferers?

ANSWER

I shall take that as a question on notice and write to the honourable member about it because a fair amount of detail is involved.

Closed Season on Ducks and Geese

Mrs LAWRIE to MINISTER for PRIMARY PRODUCTION and TOURISM

Is he considering making any recommendations to Cabinet regarding the timing of the closed season on ducks and geese given the fact that the harvesting of the proposed rice crop will coincide with the closed season for magpie geese?

ANSWER

I was not proposing to make any such recommendation at this stage. Perhaps a working group consisting of the honourable members for Arnhem, Nightcliff and Victoria River could come up with a solution to this problem.

Air Services to Aboriginal Communities

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

Will he give a guarantee that Northern Airlines services to Snake Bay, Garden Point, Croker Island and Goulburn Island will be continued after March 1981?

ANSWER

I cannot give a firm guarantee. All I can do is to ensure that Northern Airlines will carry out the services provided that the routes are economical. I cannot give a guarantee to the honourable member if the routes are not economical.

Air Services to Aboriginal Communities

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

What arrangements will be made to ensure the maintenance of air services to Snake Bay, Croker Island, Garden Point and Goulburn Island?

ANSWER

I ask the honourable member to place the question on notice.

Criminal Code

Mrs PADGHAM-PURICH to CHIEF MINISTER

What is the present position of the criminal code?

ANSWER

I am pleased the the honourable member for Tiwi asked me this question because I did want to say something on this before the Assembly rose today. I have said in this Assembly previously that I had hoped that we would be in a position to table for discussion a criminal code during the course of these sittings. I think it has been made available at least to the Leader of the Opposition. A substantial portion of the code itself has been prepared but it is still a long way from being in a state of preparation to enable it to be tabled at this sittings. This has been caused unfortunately by a draftsman's illness and by draftsmen leaving the service. Additional draftsmen have to be recruited. Only last week the draftsman actually having charge of the preparation of the code unfortunately contracted a serious illness, meningitis. Therefore, I will not be in a position to table the criminal code at this sittings. I certainly hope to be able to table the code at the first sittings next year.

Government Hostels

Ms O'NEIL to MINISTER for LANDS and HOUSING

What arrangements have been made for the long-term management of the hostels now owned by the Northern Territory government, formerly the Commonwealth Hostels, and for which the interim 12-months management period by Commonwealth Accommodation and Catering Services will soon expire?

ANSWER

The existing contract has been extended for 12 months with only marginal variations. The exception to that will be the arrangements in relation to Gillen House in Alice Springs which will become a school of hospitality and catering. If this answer is not completely accurate, I will write to the honourable member.

Stuart Highway Reconstruction Alice Springs

Mr VALE to MINISTER for TRANSPORT and WORKS

Can he advise when this government proposes to start reconstruction of the Stuart Highway along the old Railway Terrace to the Smith Street intersection?

ANSWER

This project has no status. However it is included in Transport and Works 1981-82 draft works proposals. It is the present intention to call tenders towards the middle of 1982.

Tenders for New Primary Schools

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

How does he propose to call tenders for the construction of the 3 new primary schools, Karama, Leanyer and Humpty Doo? Will it be design and construct or the more normal method of tendering?

ANSWER

This is subject to discussions between the Chief Minister, myself and the permanent head of the Department of Transport and Works. When I am in a position to provide her with that information, I will do so.

Casuarina Hospital Opthalmologist

Mrs PADGHAM-PURICH to MINISTER for HEALTH

Why weren't all the applicants for the position of specialist opthalmologist at Casuarina Hospital interviewed after applications were called for last May? I understand a decision has been taken on this position.

ANSWER

I would have to take advice from the secretary of the department on that particular matter because the appointment of people to positions like that is his prerogative. I do not think that it is the rule that every applicant is interviewed. As a rule, the departments select a short list and interview from that. I will obtain the information and write to the honourable member.

Rapid Creek Pre-school

Mr ISAACS to MINISTER for EDUCATION

Is he aware that a drain connected to the sand pit at the Rapid Creek

Pre-school is unserviceable and is presenting a possible health hazard? Could he ask his officers to investigate the matter to ensure the speedy rectification of the blockage?

ANSWER

I am not aware of the matter raised by the Leader of the Opposition. If what he says is true, it shall be fixed forthwith.

Metroliners

Mr B. COLLINS to MINISTER for TRANSPORT and WORKS

My question relates to a statement made on 5 November by the General Manager of Northern Airlines referring to the withdrawal of Metroliners from gravel strips for safety reasons. Is it true that those aircraft are to be returned to the Top End to be re-operated on gravel strips?

ANSWER

I have not had an application from Northern Airlines regarding the re-introduction of the Metroliners in the Top End. It was indicated by the Northern Territory government in the budget debate that there would be major upgrading of remote area strips. However, because of the withdrawal of Northern Airlines Metroliners, the Treasury and my department are carrying out further investigations into which airstrips will be upgraded. Northern Airlines have brought back the Heron which is more suitable to the Top End operation than the Metroliner.

Means Test for Housing Commission Accommodation

Mr HARRIS to MINISTER for LANDS and HOUSING

The minister has indicated on previous occasions that no means test will be required to obtain Housing Commission accommodation for some time. Is he able to indicate a period of time before means testing for this purpose is likely to be introduced.

ANSWER

There are no plans whatsoever to introduce a means testing system for Housing Commission accommodation. I do not intend to address myself to that question at all. I must qualify that with a reminder to the honourable member that, in order to obtain the low-interest money from the Commonwealth, we are somewhat bound by the conditions of the Commonwealth-State Housing Agreement and the presence of the Northern Territory at the Conference of Housing Ministers is essential in order that we make sure that the Commonwealth and the states are fully aware of our view. I know of no move within the Commonwealth-State Housing Minister forum to introduce mandatory means testing nor do I know of any such initiative on behalf of the Commonwealth. It is not really a definitive answer to the question but certainly we are not contemplating it.

Qantas Flights from Darwin

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

In view of the announcement this morning by the honourable federal Minister for Transport that Qantas will be seeking to operate on long-haul

domestic routes, will the minister renew his representations to the federal minister that Northern Territory passengers ought to be carried on international flight segments between Darwin and Melbourne and Darwin and Sydney?

ANSWER

Yes.

Game Meat for Export

Mrs PADGHAM-PURICH to CHIEF MINISTER

Has the Conservation Commission any plans to cooperate with private operators in harvesting game meat for export to European countries?

ANSWER

I do not know of any plans in the abstract of the Conservation Commission for cooperation with private operators in the taking of game meat for export to European countries. It is my recollection that the Conservation Commission has done this in the past and I assume that it would, where necessary, do it in the future.

Freeze on Unalienated Crown Land

Mr ISAACS to CHIEF MINISTER

Did he write to the federal Minister for Aboriginal Affairs around November 1978 saying inter alia with regard to the development of unalienated Crown land: 'The continuation of the freeze on the development of unalienated Crown land for a period of 2 years from 29 August 1978 will apply only to traditional land claims when they have been lodged with and accepted by the Aboriginal Land Commissioner?' Is the freeze still applicable and, if so, how long is it intended to maintain the freeze?

ANSWER

I could not answer the first part of the honourable Leader of the Opposition's question. If I may say so, I think it is a little unfair to ask me without any notice whatsoever whether I did on such and such a day 2 years ago write such and such a letter in those precise terms. Therefore, if the honourable Leader of the Opposition wants an answer to that question I would ask that he place the question on notice. In answer to the second part of his question as to whether the land freeze is still in operation, it is not so far as I am aware because I think it expired some time in August.

Stott Terrace Intersection

Mr VALE to MINISTER for TRANSPORT and WORKS

Can he advise whether the government proposes to construct an overpass or an underpass at the Stott Terrace and Railway Terrace intersection.

ANSWER

The government intends to construct an AT grade signalised intersection at Stott Terrace and Railway Terrace intersection. An overpass is considered

to be a future possibility. An alternative case for significant change to the criteria for the government's decision to proceed with flat bed crossing includes current and proposed railway movements as indicated by the Australian National Railway and the results of traffic monitoring in the affected areas.

Dhupuma College Demountables

Mr LEO to MINISTER for EDUCATION

Will the Education Department make available to community groups and sporting organisations demountables left over at Dhupuma College in much the same way as the Health Department made available demountables at the Darwin Hospital?

ANSWER

The honourable member for Arnhem raised this matter with me very briefly last night and he pointed out the types of community groups, in his view, that could benefit from such an arrangement. I will have inquiries made as to the suitability of any existing buildings for community purposes on whatever arrangements can be entered into. I would point out that one is more likely to fall through the floor of most of the buildings over there rather than to get any use out of them.

Berrimah Experimental Farm

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Has the minister or the Northern Territory government called for or carried out any investigations into land at Berrimah Experimental Farm for other than its present use and, if so, what other possible uses for the land are envisaged?

ANSWER

I ask the gentleman to place the question on notice.

Subdivisions by Private Developers

Mr D.W. COLLINS to MINISTER for LANDS and HOUSING

What moneys are saved by the government in getting land subdivided by private developers?

ANSWER

In order to do justice to the question, one would have to have a complete set of figures. It runs into quite significant amounts of money. We are not only looking at savings to the government but we are also looking at a far more expeditious method of producing land. I think anyone who has seen what is happening out in the northern suburbs - and doubtless will see in Alice Springs - will realise that private enterprise, being of the nature it is, is able to perform clearly far better than governments can - and that is governments plural. It is not just a matter of saving money. I do not have the actual figures on me. As I say, you would have to take subdivisions one by one. Taking Sadadeen stage 1, for example, the saving from memory is around $2.4m. I think the honourable member could scale his thinking across similar subdivisions around the Territory and get a picture accordingly.

Sale of Fireworks

Mrs LAWRIE to MINISTER for MINES and ENERGY

Is he yet in a position to indicate whether fireworks will be sold on 1 July and 5 November next year? I indicate to the honourable gentleman that shopkeepers stocking these fireworks have to order them 6 months in advance?

ANSWER

I advised the Assembly the other day that I had not addressed myself to the question and I certainly will not be doing so for at least a couple more weeks. I advise the honourable member that we will take a decision before Christmas on the matter and that would be ample time for shopkeepers to be able to order their stocks. Since I have spent some time in business, I am aware that there is a lead time but I think the honourable member is going a bit far to say that there is a 6-month lead time involved in the purchase of this material.

Aerial Medical Services at Gove

Mr B. COLLINS to MINISTER for HEALTH

Has there been any downgrading of the Aerial Medical Services at Gove as a result of the transfer of the operations from TAA to Northern Airlines?

ANSWER

I do not accept that there has been any downgrading in the operation of Aerial Medical Services since the transfer from TAA to Northern Airlines. This is particularly so in Gove where we have been able to place a second Nomad on a full time basis for the region. The difficulties of keeping the Nomad in the air are immense and the capacity to have a second one on the ground as a back-up is most helpful to the people working in the field. I cannot accept the honourable member's proposition.

Sittings of the Assembly in 1981

Mr HARRIS to MINISTER for EDUCATION

Is the minister able to give the Assembly information on the sitting dates for next year?

ANSWER

The date for next year's sittings have been cleared by Mr Speaker in accordance with the usual arrangement. These dates, of course are subject to the usual sessional order which we have for variation and also to the exigencies of workload which may be presented to this place. The first sittings next year will be on 24,25 and 26 February and 3, 4 and 5 March; then 26, 27 and 28 May and 2, 3 and 4 June; 11, 12, 13, 18, 19 and 20 August; and then 10, 11, 12, 17, 18 and 19 November.

Crops in Adelaide River Area

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION

What staff is currently available for research and development of crops

which will be complementary to the rice production scheme on the Adelaide River?

ANSWER

I ask the honourable gentleman to place his question on notice.

Home Building Societies

Mrs O'NEIL to TREASURER

I understand that existing home building societies do not lend money for homes outside town boundaries in the Northern Territory. Perhaps they cannot. In negotiations with other organisations now seeking to be registered as building societies in the Northern Territory, will the government attempt to ensure that they can provide finance to Territorians for homes outside town boundaries?

ANSWER

Mr Speaker, the operations of the existing and any proposed new building societies in the Northern Territory are limited by legislation. Unfortunately, we are operating under an old South Australian act. It is a most unacceptable situation and the government has in the pipeline a new building societies act which will be prepared as soon as resources permit. In the meantime, the companies which may seek to register under the act can only be bound by those requirements. However, in any other areas of general influence that we may have on new building societies in the Northern Territory, we will certainly be putting the government's general views about the treatment of Territorians and the flow of funds.

Yulara Tourist Village

Mr VALE to CHIEF MINISTER

Can he advise what stage the development of the Yulara Village has reached?

ANSWER

Yulara Village is quite well advanced in terms of planning and there is indeed a considerable amount of work being done on the ground. Three and a half million dollars is allocated this year towards infrastructure at Yulara Tourist Village. I am aware that a contract has been let for the construction of a new airport terminal at the new airstrip which is already in service at Yulara and is capable of taking jet aircarft. Roads are being constructed and water supply is being arranged. I understand the provision of electricity for the village is in hand with the Northern Territory Electricity Commission. The planning of the village and the implementation of planning decisions is in the hands of an ad hoc committee, the Yulara Tourist Village Planning Committee. This is chaired by Mr Stolz and members of the committee are from interested departments such as Transport and Works, the Tourist Commission, NTEC and so on. The committee answers to the Director of Conservation. The Conservation Commission has the ultimate responsibility for the satisfactory construction of the village. At the same time, honourable members would be aware that advertisements were placed world wide for expressions of interest in erecting hotels and providing other amenities for visitors to the village. I understand that a considerable number of expressions of interest were received and these have been reviewed by the committee. No

recommendations have come to me at this stage from the Director of Conservation or the committee. I do believe, however, that some finality in that respect is expected at least within the next 4 to 6 weeks.

Casuarina Hospital

Mr B. COLLINS to MINISTER for HEALTH

Will he be making a statement to the Assembly today on the services available to the public at Casuarina Hospital and the other health centres in Darwin? If so, will he be ensuring that the detail of that statement is prominently published?

ANSWER

Mr Speaker, it is my intention to deal with this particular issue during the adjournment debate this afternoon. I will cover the aspects raised by several members in the Assembly the other day.

Campbell Committee of Inquiry into Finance

Ms D'ROZARIO to TREASURER

Did the Treasury make a submission to the Campbell Committee of Inquiry into the Banking and Finance Industry?

ANSWER

I did have some discussions with officers of the Treasury department on the very nature of the inquiry and what it sought to establish. I cannot advise the honourable member whether Treasury actually forwarded a written submission to the Campbell inquiry. We did not have people appear there. I am sure of that.

Water Pressure at Howard Springs

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

What is the reason for the extremely low water pressure out of the taps at Howard Springs which resulted in one case of very muddy water yesterday?

ANSWER

I do not know. However, I believe the reconstruction and the upgrading of the water mains between the 19-mile and the Darwin area could have some bearing on the problem. I will undertake to provide the honourable member with that information at a later hour.

Registration of Territory Seamen

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

Is it the government's intention to take over from the Commonwealth the examination and issue of tickets of competency for Territorial seamen engaged in the coastal trade?

ANSWER

At this stage of the development, no.

Complaint of Police Harassment

Mr LEO to CHIEF MINISTER

My question relates to a letter to the editor, the Star newspaper reported on 26 November on a complaint of complete police harassment of a lady who was being detained. Is he aware of this supposed incident and, if there is any substance to the allegations, will he instigate an investigation?

ANSWER

This is one of those situations one finds oneself in all too frequently. In answering this question, I will turn to a document I received in the mail not so long ago. I think it was called 'Wimmen Behind Bars' - 'women' spelt in a phonetic sort of way. In that document there were very grave allegations made against police officers and yet no complaint had been received by the police. To the best of my recollection, no complaint had been received by the Ombudsman. This is exactly similar to the case the honourable member for Nhulunbuy has raised. When I noticed this letter in the Star newspaper yesterday, I caused inquiries to be made. It transpires that neither the police nor the Ombudsman have any record of any complaint being received in respect of this matter. The first contact that I have had is a phone call this morning from a person purporting to represent the Australian Marijuana Party who wished to see me today. All I can say is that, were I to see this person, I would simply refer him to the Ombudsman. I would suggest that the complainant go to see the Ombudsman herself. Quite frankly, I think it is one of those sorts of harassments that our police force is having to put up with all the time. These people go to the press, they try to create a sensation and they have not even availed themselves of the avenues that are already open to provide for the investigation of such complaints.

Alice Springs Casino

Mr D.W. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

Could he please advise on the opening date of the Alice Springs casino?

ANSWER

The hotel-casino complex in Alice Springs which is being built by Federal Hotels is currently scheduled to be completed about July next year. I understand the company is making every endeavour to try to open in June if it possibly can.

Taxation of Subsidised Housing

Mr B. COLLINS to CHIEF MINISTER

Has the Chief Minister received any response from the federal government to his communications on the question of taxation of subsidised housing in the Northern Territory and, if so, what were the details?

ANSWER

I cannot provide any answer for the honourable member for Arnhem at the present time. You will appreciate that I am still becoming acquainted with up-to-date details of various problems that are on my desk. I will look into this matter and I will certainly provide the honourable member for Arnhem with details as soon as I possibly can.

Walker Report on NT University

Mr B. COLLINS to MINISTER for EDUCATION

Will he make available copies of the Walker report on the proposed Northern Territory university to the members of this Assembly?

ANSWER

Yes.

Council Bylaws on Litter Legislation

Mr VALE to MINISTER for COMMUNITY DEVELOPMENT

Do councils outside of Darwin which do not have bylaws need such laws to appoint officers or inspectors under the litter legislation passed by this Assembly?

ANSWER

Yes, councils do have to have bylaws before inspectors of those councils automatically become litter inspectors under the Litter Act. However, there are other ways that councils without bylaws can have their inspectors enforce the provisions of the Litter Act. One of them is to ask the minister responsible for the Litter Act to appoint persons to be inspectors under the Litter Act. Other than that, councils or council inspectors have a right under section 6 of the Litter Act to institute action under the Litter Act against an offender. Indeed, any citizen in the Northern Territory has the right to institute action under that section. Any corporation which professes that its hands are tied in implementing the Litter Act because it does not have bylaws has 2 options open to it: adopt some bylaws or take another course of action.

Child Welfare Bill

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

Will the new Child Welfare Bill be ready for introduction into the Assembly at its next sittings in February 1981?

ANSWER

I cannot guarantee that it will be introduced during the next sittings but it will certainly be introduced as soon as it can be prepared and approved.

Loveridge Report

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION

Has he yet received the final section of the Loveridge Report? If not, when does he expect to receive it?

ANSWER

I do not believe that the final section is with us just yet. I would have to ascertain progress. I understand that Des Loveridge has been ill for

some time and I will try and let the honourable member know later.

Furnace at Waste Water Treatment Plant

Mrs O'NEIL to MINISTER for TRANSPORT and WORKS

Can he explain to the Assembly why the furnace at the Darwin waste water treatment plant has operated for only 3,000 hours in the last 3 years?

ANSWER

Mr Speaker, I anticipated a question from the honourable member for Fannie Bay in light of a press release that she issued a couple of weeks ago. To allay any fears that the honourable member may have, I will give her information from a briefing note that I received regarding the problem. There was an overtime ban imposed a couple of weeks ago and that was withdrawn within a couple of days. The unions and the department are discussing that particular problem now. Overtime bans in themselves do not automatically lead to sewage bypassing the plants. This only occurs when a ban coincides with a heavy through-put. It is a fact of life that, during the wet season, an amount of sewage does bypass the plant as rainwater penetrates the sewerage system.

The honourable member had been reported as alleging that the furnace at the plant is not being used. This furnace was designed to decarbonise sludge which is treated sewage. Instead of burning sludge, the department has been experimenting in using it and effluent for other purposes in line with the recycling approach. For instance, the department is presently placing sludge near the treatment plant and using it as fill. In fact, we have had approaches from various sources who have indicated that they would like to use treated sludge and effluent as some form of fertiliser or conditioner. There is still work to be done in this area before the effluent can be readily used but I believe that search for these alternative uses iscommendable. There are no mechanical problems with the furnace. The critical point that I wish to make is that the effluent and sludge are already treated and are chemically safe. They are not harmful. The treatment plant was inherited from the Commonwealth. The concept is not a good one and definitely treatment plants are inferior to sewage ponds. One inherent problem is that the outlet pipe is exposed during low tide. While this is an undesirable feature, the effluent is chemically safe and the cost to extend the outlet would be quite significant.

Nhulunbuy Library

Mr B. COLLINS to MINISTER for EDUCATION

Could he advise the details of the proposed operation of the combined Nhulunbuy High School Community Library? I would like such details as whether it is intended to operate the library for the community during school hours.

ANSWER

Mr Speaker, it was intended to do so. It would seem to me to be a rather poor sort of public library function if it was only available to the public during other than school hours. I would have to check the information with the two departments responsible. Either my colleague or myself will write to the honourable member with details.

Darwin Speedway

Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

What discussions have been held between the government, the Corporation of the City of Darwin and NTRDA regarding the moving of the speedway as quickly as possible to its right and proper locality?

ANSWER

It is almost impossible to answer the question because the proposal to move the speedway from Bagot Park, where it has been causing some annoyance, has been on and off since cyclone Tracy. I was involved in those days when we attempted to get on committees of the Darwin Reconstruction Commission and have some involvement. I have discussed this matter with members of the city council and certainly members of the Motor Sports Council which has been formed to hold the head lease at Hidden Valley.

The actual question of the period of time that the speedway is allowed to operate at Bagot Park is entirely in the hands of local government. Recently, they met with members of the NTRDA and decided to extend the period for another year. I understand that those decisions were taken without any consultation with the Northern Territory government. Of course, they do not have any obligation to consult with us on that question.

Gove House

Mr LEO to MINISTER for LANDS and HOUSING

Is there any progress on the proposed upgrading of the Housing Commission single persons accommodation in Gove House?

ANSWER

Mr Speaker, I have received some advice quite recently setting out a number of options. Those options are currently under examination by the government and any decision will have to await that consideration.

Notice given on 18 November 1980

Collia Tin Mine

6 Mr ISAACS to MINISTER for MINES and ENERGY

As a number of people have lost their savings in the Collia tin mine affair,

(a) what detailed action has been taken by the Department of Mines to settle the matter;

(b) how much money has been lost by people involved;

(c) how much did Mr Ken Day receive for the tin he mined from Collia;

(d) why has he not explained in the Legislative Assembly what action the government has taken;

(e) did the Department of Law recommend that anybody be charged over the affair and, if so, why was not that recommended action proceeded with;

(f) was the government's lack of action coloured by the fact that Mr Day was once the head of the Progress Party, whose votes had helped the Country Liberal Party;

(g) what is now being done about the matter; and

(h) are police trying to contact the previous leaseholder who disappeared and, if so, do they know in which state he is residing?

Public Housing - Out-of-Turn Allocations

9 Mr ISAACS to MINISTER for LANDS and HOUSING

From August 1, 1979 to August 1980 -

1. How many applications for out-of-turn allocation of public housing have been (a) received, (b) accepted, and (c) rejected?

2. How many applicants whose applications were (a) accepted, or (b) rejected were in receipt of (i) supporting parent's benefit, (ii) unemployment benefit, (iii) other pensions, (iv) one-income families?

3. How many applicants for out-of-turn accommodation were living in (a) caravans, (b) tents, (c) share accommodation, (d) hostels, or were (e) homeless?

4. What steps have been taken by the Housing Commission to assist those in need of accommodation who were rejected for out-of-turn accommodation?

5. If applicants were referred to other community organizations, to whom were they referred?

6. How many applicants were found accommodation directly by efforts of the Housing Commission?

Dhupuma College - Government Expenditure

17 Mr LEO to MINISTER for EDUCATION

1. What was the total capital expenditure for Dhupuma College in the financial year 1979-80?

2. What (a) capital items, and (b) their individual costs were purchased for Dhupuma College in the financial year 1979-80?

Dhupuma College - Transfer of Staff

18 Mr LEO to MINISTER for EDUCATION

What costs were incurred in the transfer of (a) students, (b) staff from Dhupuma College to alternative institutions?

Loans to North Australian Baptist Homes Trust

19 Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

1. What were the amounts of the 3 loans made to the North Australian Baptist Homes Trust in relation to hostels in Darwin, Katherine and Alice Springs?
2. How much has been repaid?
3. Under what terms were these loans "extinguished"?

Loans to Church of England Carpentaria College Inc.

20 Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

1. What were the amounts of the 3 loans made to the Church of England, Carpentaria College Inc.?
2. How much was repaid?
3. Under what terms were these loans "extinguished"?

Grants-in-Aid 1980-81

21 Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

1. Which community organisations applied for grants-in-aid for 1980-81?
2. Which organisations will receive grants-in-aid in 1980-81?
3. How much will each organisation receive?

Register of Uranium Workers

24 Mr ISAACS to MINISTER for MINES and ENERGY

Is a register of uranium workers employed in the uranium province being retained by the Northern Territory government for the purpose of subsequent health checks?

Local Government Elections

25 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

Is it the intention of the Northern Territory government to require the local government elections during 1981 to be conducted by the Northern Territory Electoral Office?

Nurses Quarters at Darwin Hospital

26 Mr ISAACS to MINISTER for HEALTH

1. How many applications have been received for the utilisation of the vacant nurses quarters at the Darwin Hospital?
2. What use is being proposed for the accommodation units there?

Mandorah Road

27 Mr ISAACS to MINISTER for TRANSPORT and WORKS

1. Can he inform me what timetable is planned for the upgrading and or sealing of the Mandorah Road from Darwin River Dam?
2. What route is the upgraded road going to take?
3. What discussions have been held with traditional Aboriginal owners in the area regarding the siting of the road?

Alice Springs Recreation Lake Site

29 Mr ISAACS to CHIEF MINISTER

Further to question No. 23, does the location being considered for a recreation lake in Alice Springs, north of the town in the Todd River, conflict with an Aboriginal sacred site?

Katherine - Appointment of Resident Magistrate

30 Mr MacFARLANE to ATTORNEY-GENERAL

What steps are being taken to appoint a resident magistrate for Katherine?

Library Facilities in Nhulunbuy

31 Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

What is his present attitude to Nhulunbuy public library facilities, given recent representations to him by (a) a petition opposing library facility amalgamation signed by more than 600 residents, and (b) a public meeting attended by representatives from the Community Development and Education Departments?

Library Service - Purchase of Books

32 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

1. What is the total value of books purchased by the Northern Territory Library Service from 1 February to 20 October 1980?
2. Who were the library suppliers or booksellers who supplied the books?
3. Did the Northern Territory Library Service call for tenders for the supply of books?

Allocation of Vehicles to Schools

33 Mr ISAACS to MINISTER for EDUCATION

1. On what basis are vehicles allocated to remote schools?
2. Which schools in the Northern Territory have been allocated vehicles for the 1979-80 financial year?
3. Which schools have been allocated but not yet received vehicles?

Teachers in Remote Areas

34 Mr MacFARLANE to MINISTER for EDUCATION

Are teachers who have served long periods at remote centres such as

Bamyili and Groote Eylandt given any preference when they wish to return to more favoured centres, or are they simply treated as though they had had a vacation away from Darwin or Alice Springs?

Membership of Planning Authority and Planning Appeals Committee

35 Mr ISAACS to MINISTER for LANDS and HOUSING

1. Who are the members of the Northern Territory Planning Authority and on what dates were they appointed?
2. Who are the members of the Northern Territory Planning Appeals Committee and on what dates were they appointed?

Department of Transport and Works and Telecom Depots in Katherine

36 Mr MacFARLANE to MINISTER for LANDS and HOUSING

Does the government plan to convert to residential use land in Katherine presently used as Department of Transport and Works and Telecom depots?

Housing Commission - Unused Blocks in Katherine

37 Mr MacFARLANE to MINISTER for LANDS and HOUSING

How many unused blocks of residential land are held by the Northern Territory Housing Commission in Katherine?

ABC Repeater Station in Katherine

38 Mr MacFARLANE to MINISTER for LANDS and HOUSING

1. Is he aware that the Australian Broadcasting Commission repeater station 8KN occupies prime residential land in Katherine?
2. Has any proposal been put to the Commission to find a suitable alternative site on which to erect its 70 ft high transmission towers?
3. Will the government provide a suitable site away from residential land for the Commission's transmission towers?

Government Assistance to NT Cattlemen

39 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

1. Is it a fact that Top End cattlemen lose more cattle each year through seasonal and pastoral conditions inherent in the area than the Centralian cattlemen lose in droughts?
2. If so, what steps is the government taking to assist Top End cattlemen to overcome these losses?
3. Have Centralian cattlemen presented a case to the goverment for drought relief and, if so, with what result?
4. Is it a fact that Centralian cattlemen have had 10 good seasons and have received record prices for their cattle during the past 3 years?
5. What steps is the government taking to assist Top End cattlemen to overcome their regional problems caused by low cattle prices and annual nutrition failure?

Prosecutions under Bushfires Act

40 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

1. How many prosecutions have been instituted under the Bushfires Act during the past 5 years for lighting fires that got out of control and caused damage to pastoral leases or inconvenienced pastoral lessees?

2. In the same period, how many fires were (a) reported, (b) deliberately lit, (c) lit by careless people, and (e) lit by the pastoral lessee inconvenienced by the fire?

Katherine - Prosecutions for Littering

41 Mr MacFARLANE to MINISTER for COMMUNITY DEVELOPMENT

How many persons have been prosecuted for littering in Katherine during the year ended 31 October 1980?

Airconditioning in Schools

42 Mr MacFARLANE to MINISTER for EDUCATION

1. Does his department plan to modify school buildings to enable fans to be used and larger window areas to be opened when airconditioning is not warranted or when airconditioning plants are out of order?

2. Are airconditioners in schools turned off after school each day or over weekends to reduce electricity costs and conserve fuel?

Radio Telephone Communications

43 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

1. Has his attention been drawn to the communication difficulties experienced by the Numbulwar community of 600 Aboriginals, which has to share one radio telephone channel with 9 other subscribers?

2. If so, will he make representations to Telecom and the Federal Minister for Communications in an effort to upgrade radio telephone communications for these people and for the Groote Eylandt, Gove and Katherine people?

Government Assistance for Tradesmen to Visit Remote Areas

44 Mr MacFARLANE to MINISTER for LANDS and HOUSING

What assistance will the government provide to enable electrical, plumbing and building tradesmen and inspectors to visit remote centres such as Borroloola to assist home owners?

Flood Insurance Cover in Katherine

45 Mr MacFARLANE to CHIEF MINISTER

1. Is it a fact that neither the Territory Insurance Office nor other insurers operating in the Territory will provide cover against flood in Katherine?

2. If so, will the government ensure that the Territory Insurance Office provides flood cover at reasonable rates in Katherine until a dam is built above Katherine Gorge to reduce the danger of flooding?

Membership of NTEC

46 Mr ISAACS to MINISTER for MINES and ENERGY

1. Who are the members of the Northern Territory Electricity Commission and on what dates were they appointed?
2. If there are any vacancies on the Electricity Commission, when is it proposed that they be filled?

Expenditure by Ministers on Charter Aircraft

47 Mr ISAACS to CHIEF MINISTER

How much has been spent on behalf of each minister for air charter travel within the Northern Territory for the financial year 1979-80?

Public Buildings - Modifications for Handicapped Persons

48 Mr ISAACS to MINISTER for TRANSPORT and WORKS

Given that 1981 is to be the Year of the Disabled Person, what action is the government taking to ensure that all public buildings are modified to provide access for handicapped persons?

Roper Highway

49 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

What steps are being taken to upgrade the Roper Highway to the 4-mile landing to enable barges to use the Roper River for supply purposes?

Borroloola-Roper Bar Road

50 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

Does the government plan to upgrade the road between Roper Bar and Borroloola to cater for tourists and travellers?

Insurance Cover for Schoolchildren

51 Mr MacFARLANE to MINISTER for EDUCATION

1. Are pupils of Northern Territory schools covered by insurance when engaged in school activities, such as swimming lessons, excursions and sports, outside school grounds?
2. Are parents required to sign indemnity forms before their children engage in such school activities?

Loitering in Public Places

52 Mr MacFARLANE to CHIEF MINISTER

Do police officers in Katherine have power to deal with persons who loiter or sleep in and around public facilities?

Meteorological Bureau Services in Katherine

53 Mr MacFARLANE to CHIEF MINISTER

Is he aware of plans to establish a weather office at Katherine to provide local weather forecasts as an aid to bushfire control, crop planting and aircraft movements?

Meat Processing Companies

54 Mr MacFARLANE to MINISTER for INDUSTRIAL DEVELOPMENT

Are there any precautions which the government can take to ensure that companies engaging in meat processing in the Territory are financially stable?

Notice given on 25 November 1980

Aerial Spraying of Insecticides

55 Mrs O'NEIL to MINISTER for PRIMARY PRODUCTION and TOURISM

1. Has his attention been drawn to ultra low volume techniques for aerial spraying of insecticides?
2. Can he state whether the government has published advice that light breeze conditions may give better control of the spread of aerial sprays than the calm air conditions often applying about dawn, currently favoured by crop dusters and local authorities using herbicides?
3. What steps has his department taken to enforce the conditions for aerial spraying recommended by the National Health and Medical Research Council, which has advised that herbicides are harmless if used as recommended?

Blocks 534 and 536 Katherine

56 Mr MacFARLANE to MINISTER for LANDS and HOUSING

What is delaying the issuing of titles for blocks 534 and 536, Katherine?

Land Sales in Katherine

57 Mr MacFARLANE to MINISTER for LANDS and HOUSING

When will residential land be available for sale over the counter at a one-stop shop in Katherine?

Animal Nutrition Research

58 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

What research is the government undertaking on animal nutrition in the Top End of the Territory?

Offences Against Commonwealth Laws

59 Mr ISAACS to ATTORNEY-GENERAL

Is the Northern Territory to compile statistics concerning offenders and offences against Commonwealth laws in the Territory as recommended by the Law Reform Commission of Australia?

Utopia Land Claim

60 Mr PERKINS to CHIEF MINISTER

What was the cost to the Territory of proceedings commenced by the

Attorney-General by way of prerogative writ in the High Court of Australia to challenge the Aboriginal Land Commissioner's findings on jurisdiction in the Utopia Aboriginal land claim case?

Alice Springs - Alcohol-Related Offences

61 Mr PERKINS to CHIEF MINISTER

1. Is it a fact that in October 1979 some 227 people appeared on more than 600 charges in the Alice Springs Court?
2. Is it a fact that some 90-95% of these charges were alcohol-related?
3. If so, what action does he propose to take to reduce the high incidence of alcohol-related crimes in the Territory?
4. Will the government undertake an analysis of the residential status-background and the educational and cultural background of the majority of offenders before the courts in the Territory in order to construct a profile of the typical offender and to make available such data to interested community organisations and, if not, why not?

Alice Springs - TAFE Positions

62 Mr PERKINS to MINISTER for EDUCATION

1. How many TAFE positions exist in Alice Springs?
2. What are (a) the levels of these positions, and (b) who are the incumbents?
3. Are these positions sufficient for the government to implement the training component of the 'Five Year Plan' for the improvement of Aboriginal communities as outlined in the Legislative Assembly by the Chief Minister?
4. If not, how many new positions and at what levels will be created?
5. When will these positions be filled?
6. Will he supply details of his department's involvement in the 'Five Year Plan', including (a) the number of educators involved, (b) the support services to be provided, (c) the resources to be allocated, (d) the budgets, and (e) the goals?
7. If not, why not?

Education Department Document - 'Single Officers Housing Review'

63 Mr PERKINS to MINISTER for EDUCATION

1. Is there a Department of Education document entitled 'Single Officers Housing Review'?
2. If so, will he supply me with a copy of this document?
3. If not, why not?

Schools Commission Innovations Committee Grants

64 Mr PERKINS to MINISTER for EDUCATION

1. Is it a fact that an organisation or incorporated body must first obtain the approval of the Department of Education in order to be eligible for a grant from the Schools Commission Innovations Committee?
2. If so, why?

3. What criteria are used by his department in assessing an organisation's performance or goals in respect of approvals from the Schools Commission Innovations Committee?

4. Is it a fact that his department has refused to approve the activities of the Yipirinya School in Alice Springs in conjunction with 2 applications for a grant from the Schools Commission Innovations Committee made in 1978 and 1979 and, if so, why?

5. Does an 'independent school' within the terms of the Education Act require approval from the department in order to be eligible for a grant from the Schools Commission Innovations Committee?

6. What is the government's intention in regard to Aboriginal self-management in education?

7. Is it a fact that the Principal Education Adviser for the Alice Springs region recently informed the Yipirinya Council that the best solution for the Council is to become a part of the Department of Education and, if so, why?

8. Does he plan to support other education proposals similar to those of the Yipirinya School?

Alice Springs - Transport for Schoolchildren

65 Mr PERKINS to MINISTER for EDUCATION

1. Which company has the contract to transport schoolchildren in Alice Springs?

2. How many companies tendered for the job?

3. What were the tender prices submitted?

4. What is the cost per kilometre of transporting schoolchildren to school in (a) Alice Springs, and (b) Darwin?

Central Australian Community College Hospitality Course

66 Mr PERKINS to MINISTER for EDUCATION

1. Why did the person charged with setting up the hospitality course at the Central Australian Community College resign?

2. What steps are being taken to find a replacement?

3. When is it anticipated the hospitality course will start?

4. Does the government feel there is any urgency for such a course to be started in the centre?

Kormilda and Yirara Colleges - Graduates

67 Mr PERKINS to MINISTER for EDUCATION

1. How many students graduated from all courses last year at Kormilda College and Yirara College respectively?

2. What proportion of last year's graduates from Kormilda College and Yirara College respectively are now (a) employed, and (b) unemployed?

Conference of Council Presidents and Aboriginal Community Advisers

68 Mr PERKINS to MINISTER for EDUCATION

I refer to the Conference of Council Presidents and Aboriginal Community Advisers held at Kormilda College in January 1980, and ask-

1. Did the government agree at that conference that a minimum of 40 adult educators were required to properly staff all major centres in the Territory and, if so, what action has been taken to recruit staff for these positions?

2. Will he supply a list of (a) the names of adult educators employed, (b) the locations where they are employed, and (c) their major skills and qualifications?

Housing Commission - Questionnaire on Sale of Flats

69 Mr PERKINS to MINISTER for LANDS and HOUSING

I refer to a notice sent to some tenants of the Housing Commission in Alice Springs recently in which inquiries were made regarding interest in the possible purchase of flats and townhouses, and ask-

1. How many responses to the questionnaire have been received?

2. How many of the respondents showed strong, positive interest in purchasing flats or townhouses?

3. Will the Housing Commission proceed with any sales?

4. If so, when will the sales be completed?

5. In which particular block or blocks of flats and townhouses will sales be made?

6. How did the Commission arrive at the price of $42,000 to $43,000 per unit?

7. Has he received a letter dated 22 October from the South Court Residents' Association of Alice Springs which raises some concern about tenants' security and, if so, what reply has he made to the letter?

Housing Commission - Document on Aboriginal Housing

70 Mr PERKINS to MINISTER for LANDS and HOUSING

I refer to a document tabled in the Assembly by the Chief Minister and issued by the NT Housing Commission in March 1980. The document is titled 'Proposal for Achieving Improved Housing Conditions for Aboriginal Communities in the Northern Territory', and is part of what is commonly known as the 'Five Year Plan', and ask -

1. What is the status of the document?

2. Have the recommendations in the document been considered by Cabinet?

3. If so, have the recommendations been accepted?

4. Has the Territory government had discussions with the federal government regarding the proposal to disband 'the advisory teams of architects and other technical staff engaged on Aboriginal housing within the Department of Construction in the NT' and, if so, what has resulted from these discussions?

5. What discussions have been held between officers of the Housing Commission and the leaders of Aboriginal communities regarding the government's proposals as outlined in the 'Five Year Plan'?

6. What has been the result of these discussions?

7. Does the Housing Commission expect to employ more staff to explain the proposals to Aboriginal communities?

8. Did the former Chairman of the Housing Commission, Mr G. Stoltz,

and officers of the Commission visit a number of Aboriginal communities just before the last Legislative Assembly election with proposals for housing which had to be accepted or rejected before the end of June?

9. If so, when was it decided to make these visits, and what was the reason for the haste?

Housing Commission - Advertisement in Weekend Australian

71 Mr PERKINS to MINISTER for LANDS and HOUSING

I refer to an advertisement in the 'Weekend Australian' of 2-3 August 1980 by P.A. Consulting Services Pty Ltd of North Sydney for a Director of Finance and Loans in the NT Housing Commission, and ask -

1. Is it the policy of the Commission to use management consultants to select staff?
2. If so, does this indicate a lack of confidence by the government in the recruitment skills of senior Commission staff and personnel staff from other areas of government?
3. What were the total costs involved in hiring management consultants to select staff in this instance?
4. What does the term 'operate on a commercial basis' mean in the same advertisement?

Mereenie Aquifer

72 Mr PERKINS to MINISTER for MINES and ENERGY

1. How many oil wells have been drilled in the Amadeus Basin in Central Australia?
2. How many of these wells have (a) intersected the Mereenie sandstone aquifer, (b) been plugged, (c) been capped, and (d) what is the current status of these wells?
3. What precautions have been taken to ensure that the Mereenie aquifer has not been contaminated by hydrocarbons and salt water from the oil-bearing formation?
4. Is there any danger of the Mereenie aquifer being polluted as a result of past, present or future oil well drilling operations in Central Australia?

Services to Aboriginal Communities

73 Mr PERKINS to MINISTER for TRANSPORT and WORKS

1. Who is responsible for the maintenance of internal service roads in Aboriginal communities?
2. Who is responsible for the maintenance of main access roads to Aboriginal communities?
3. Is the planning of main roads to Aboriginal communities and internal service roads undertaken as a correlated construction exercise?
4. Who is responsible for the construction and maintenance of access roads to Aboriginal outstations?
5. Does the government offer on-site technical assistance to Aboriginal communities in respect of building?
6. Is there Aboriginal representation on the Rural Roads Board?

Emergency Accommodation

77 Mr PERKINS to MINISTER for LANDS and HOUSING

I refer to the announcement of the Treasurer in May this year of the government's commitment to providing emergency accommodation for people in certain hostels in need of housing, and ask -

1. When does he expect the scheme to begin?
2. How many people are at present on the waiting list for (a) public, and (b) private housing?
3. In the 3 months to 31 October 1980, how many people have (a) applied for out-of-turn housing allocations, (b) have been accepted?
4. What is the breakdown of the successful and unsuccessful applicants in terms of whether they are unemployed, single parent families and so on?

Social Security Payments and Funding to Organisations

78 Mr PERKINS to MINISTER for COMMUNITY DEVELOPMENT

1. How many people have (a) applied for hardship payments on referral from the Department of Social Security and (b) have received assistance in the 3 months to 31 October 1980?
2. How do these figures compare with the same period in 1979?
3. What steps is he taking to ensure that organisations in receipt of grants and subsidies know well in advance of the end of the financial year if their submissions have been successful and to what extent?

Operational Grant Subsidies Scheme

79 Mr PERKINS to MINISTER for COMMUNITY DEVELOPMENT

1. Which organisations are funded under the Operational Grant Subsidies Scheme?
2. Does he intend to increase the number of organisations able to receive funding on a 3 years basis, to allow more effective functioning?
3. How much has been allocated to the Government Concession Scheme for 1980-81, and in which financial allocation is it included?
4. Will he provide a complete itemisation of the financial allocation for 1980-81 of $1,071,558 in the grants and subsidies section?

Dhupuma College Staff

80 Mr LEO to MINISTER for EDUCATION

How many Aboriginal house parents and social advisers from Dhupuma College are still employed in the Department of Education?

Sadadeen Subdivision

81 Mr PERKINS to MINISTER for LANDS and HOUSING

1. To what extent has the government developed Sadadeen lots to the turn-off stage?
2. Since private developers were originally invited to register an interest in Sadadeen development only 3 months ago, and since the

7. What safeguards exist to ensure the preservation of Aboriginal sacred sites which may be affected by road construction?

Alice Springs - Traffic and Railway

74 Mr PERKINS to MINISTER for TRANSPORT and WORKS

1. How many vehicles use the level crossing daily at the Larapinta Drive-Telegraph Terrace intersection in Alice Springs?
2. Is it true that a set of traffic lights will be installed at the intersection and crossing?
3. In the matter of arrangements being made for the Alice Springs to Darwin standard gauge railway planning, what decision-making powers are held by (a) the NT government, (b) the Alice Springs municipality, and (c) the Australian National Railways Commission?
4. In the event of a dispute over the location of the railway line, is it true that the Alice Springs municipality can be overruled by the ANR?
5. Will he supply a list, including (a) dates, (b) names of participants, and (c) the agenda of meetings which have been held between the ANR and his department during the past 2 years and, if not, why not?

Alice Springs - Environmental Damage by Roadworks

75 Mr PERKINS to MINISTER for TRANSPORT and WORKS

I refer to the reply by the former Minister for Transport and Works to a question asked in February 1980 by the Member for Stuart concerning rehabilitation of the roadside and other areas through the hills north of Alice Springs, in which he said that his department had 'spent in excess of $100,000 on repairs to some of the areas that have been damaged', and ask -

1. Can he confirm the statement reported in the Centralian Advocate on 27 March 1980, that '$100,000 had been allocated to reclaim environmental degradation in the area'?
2. Has there been one or two allocations of $100,000 for this work?
3. Does his department regard the words 'reclaiming', 'repairing', 'regeneration' and 'rehabilitation' as synonymous with the term 'cleaning up after the contractor'?
4. Was the sum of $73,384 expended on the hire of a loader and dump truck for rehabilitation, reclamation, repair or regeneration?
5. Does his department normally allocate large sums of money to clean up after a contractor has completed a job, or is it normal practice for contractors to carry out such cleaning up work themselves and for the cost of this work to be taken into consideration when the tender is lodged?
6. Does further work need to be carried out to repair the damage caused and, if so, what is (a) the nature of the work, (b) how much will it cost, and (c) when will it be completed?

Women's Refuges

76 Mr ISAACS to MINISTER for HEALTH

How much was allocated to the Northern Territory by the Commonwealth government for women's refuges in (a) 1979-80, and (b) 1980-81?

successful tenderer was named only this month, when does the developer expect to have all lots to the turn-off stage?

3. At what price will the government buy the developed blocks?

4. Was an undertaking to use local labour and materials a factor in the successful tender by the company chosen by the government to develop Sadadeen?

5. Has the government studied the cost-effectiveness of maintaining the role of departments such as the Department of Transport and Works in developing residential subdivisions?

Department of Community Development - Advertisement in NT News

82 Mr PERKINS to MINISTER for COMMUNITY DEVELOPMENT

I refer to an advertisement in the 4 November edition of the NT News placed by the Department of Community Development calling for a person to carry out a program entitled 'Survey of Aboriginal Communal Camping and Residential Facilities in Urban Areas', and ask -

1. How many people applied for the position?

2. Has the position been filled and, if so, (a) who has filled the position, (b) has the successful applicant commenced work on the program, and (c) what is the nature of the work currently being undertaken?

Fisheries Vessels

83 Mrs LAWRIE to CHIEF MINISTER

1. Are the fisheries or police vessels 'Salloo' and 'Pobassoo' presently being used for research and monitoring of fish species, numbers and distribution?

2. If so, what is the level of expertise on board these vessels to conduct such research?

Permanent Part-Time Employment

1 Mr ISAACS to CHIEF MINISTER

1. What is the program of the Public Service Commissioner for investigating the possible introduction of permanent part-time employment?

2. Has a decision been made to introduce permanent part-time employment and, if so, when will it be introduced?

ANSWER

1. Permanent part-time employment has been the subject of NTPS Consultative Council consideration for some time. The Public Service Commissioner's program for investigation for the possible introduction is to have the full Consultative Council consider its subcommittee's final recommendation at its meeting in Alice Springs on 30 and 31 October 1980 with a view to recommending to the Commissioner an agreed package of terms and conditions for permanent part-time employment. The Commissioner expects to be able to make definitive decisions on the recommendations before the end of the year.

2. My government has made a commitment to introduce permanent part-time employment and our objective was to introduce a scheme on 1 January 1981, however, because one of the most important conditions applying to permanent part-time employment is the right to superannuation, difficulties could arise in having the Commonwealth authorities develop the necessary changes to the Commonwealth scheme by that date to enable NTPS employees to be covered for superannuation purposes.

   The government's Canberra representative has had detailed discussions with the Commonwealth Department of Finance and the Commonwealth Public Service Board, but the federal officials are not optimistic concerning an early resolution of the problems to enable the necessary changes to be effected to Commonwealth legislation.

   Permanent part-time employment without superannuation cover would not provide the flexibility necessary to enable full-time employees to take advantage of this progressive form of employment.

3. It appears that the government's program to introduce permanent part-time employment could lead to industrial problems as the Federated Miscellaneous Workers Union has advised the Public Service Commissioner's office that it is totally opposed to the introduction of permanent part-time employment. This will have to be borne in mind and efforts at consultation undertaken.

Criminal Code Proposals

2 Mr ISAACS to CHIEF MINISTER

Have the judges of the Supreme Court commented on the first draft of the proposed new criminal code prepared by Mr Connolly? If so, has the bill been circulated to legal practitioners, criminologists and the community?

ANSWER

The preliminary first draft prepared by Mr F.G. Connolly of Counsel is in substantially similar terms to the Queensland Criminal Code, although certain innovative provisions have been drawn from other jurisdictions (notably the theft provisions).

The preliminary first draft has been sent to the judges of the Supreme Court and one of the judges has met with an officer of the Department of Law to comment on the draft.

The Parliamentary Draftsman, together with another officer of the Department of Law, are now preparing a draft Criminal Code Act which has some changes from the preliminary first draft, and this draft act will be widely circulated once it has been tabled in Parliament.

The preliminary first draft (which was intended to be no more than a first step towards a criminal code and not a bill as such) has not been circulated to lawyers or the community although lengthy discussions were held by Mr Connolly with interested parties.

Alice Springs Recreational Lake Site

3 Mr ISAACS to CHIEF MINISTER

Has the site for a recreational lake in the Alice Springs area been chosen and, if so, does it coincide with any Aboriginal sacred sites registered with the Sacred Sites Authority?

ANSWER

No.

Mindil Beach Casino

4 Mr ISAACS to TREASURER

1. What is the anticipated date for the opening of the Mindil Beach casino?

2. Is the government concerned about the amount of work that has been done on the site?

3. Has Federal Hotels informed the government that it wants to reduce the size of the originally proposed project at Mindil Beach and, if so, what are the full details of any new proposal?

4. Is the government satisfied that Federal Hotels has put sufficient effort into promoting package tours to bring tourists to the casino?

5. Does the government agree that the bulk of the people using the present interim casino are local gamblers, and if so, does the government agree that this is contrary to the view that the casino would, in the main, cater for tourists?

6. What comment has the government to make about the casino's adverse economic impact on the central business area?

7. Does the government believe that the casino has had any adverse impact on the community generally?

ANSWER

1. The project is expected to be completed during December 1982.

2. The government has already expressed its concern in the House, about the delays with the development.

3. Under the agreement the minister may agree to modifications to the

approved plans.

When the lowest tender for the building construction was found to be $16.9m, some $5.0m over the early estimate, the minister agreed to a request from Federals, to deferments and modifications without detriment to the original plans, they being:

3.1 substitution of concrete framework for steel framework;

3.2 minor modifications to finishes; and

3.3 deferment of minor facilities such as:

3.3.1 a second small swimming pool;

3.3.2 a public change room and toilet annexe;

3.3.3 a small external bar;

3.3.4 a basement preparation kitchen;

3.3.5 a gym and sauna area; and

3.3.6 fitting out of level 4 of the main building complex which will eventually become the main function area of the complex.

4. Yes, considering that the main thrust of their packaging is being geared to the openings of Alice Springs and Mindil.

5. Patronage at the Don Hotel-Casino indicates that the Territory residents fully support the complex which has added a new dimension to Darwin's nightlife. Patrons are not requested to provide information on their residential status, however it is obvious that numerous tourists as well as residents visit the complex. The casino is an added attraction for tourists.

6. No evidence has been put forward to indicate adverse economic impact in the central business district. New restaurants, shops and office developments in the CBD indicate the reverse.

7. No evidence has been received which indicates that the casino has had an adverse effect generally.

Regional Committees for the Handicapped

5 Mr B. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

Prior to the 1980 election the former minister stated that 2 regional committees for the handicapped would be established, one for the north and one for the south. Have these committees been established and, if so, (a) whom do they comprise, and (b) which organisations do they represent?

ANSWER

The Chief Minister in his ministerial statement to the Legislative Assembly in May 1980, announced the government's intent to develop an optimum level of services which reflect the needs of Territorians who are handicapped. To accomplish this end, the Chief Minister asked that regional committees be established comprised of people with the requisite experience, expertise and interest to recommend the services required by disabled people.

In accordance with this, I have recently announced the membership of

these committees. In the north, the Regional Committee is comprised of:

Dr Alan Walker	-	Chairperson
Mr Ian Overell	-	NT Spastic Association
Mr James Berry	-	Handicapped Persons' Association
Mr Alasdair McGregor	-	Deaf Children's Association
Mr Keith Amos	-	Somerville Homes
Mrs Veronica Elsegood	-	Aboriginal Women's Resource Centre
Mrs Doreen Baker	-	Disabled person
Mrs Gina Zammitt	-	Parent of a handicapped child
Mrs Georgina Edwards	-	Disabled person

The southern Regional Committee membership includes:

Mrs Barbera Vaiana	-	Chairperson - and a disabled person
Mrs Jenny Carpenter	-	Alice Springs Spastic Council
Mrs Peggy Campbell	-	Central Australian Aboriginal Congress
Mr George Lamb	-	NT Council on the Ageing
Mr R. Gaff	-	St Mary's Children's Homes
Miss Miranda Parkes	-	Bindi Centre
Mr Chris Turner	-	Disabled person
Ms Michele Castagna	-	Disabled person
Mrs Carol Frost	-	Parent of a handicapped child

In addition, the Departments of Health, Education, Community Development and Social Security will be represented on each group bringing the total membership to 13 persons for each regional committee.

Ethnic Health Workers

7 Mr B. COLLINS to MINISTER for HEALTH

Are there any plans to increase the number of ethnic health workers to cover more ethnic communities in the Northern Territory?

ANSWER

There is no specific plan to increase the number of ethnic health workers at the present time, although the matter is currently under review.

Multi-Cultural Education Program

8 Mr B. COLLINS to MINISTER for EDUCATION

1. How many part-time instructors are employed by the Department of Education under the multi-cultural education program?
2. What (a) languages do they teach, and in (b) which schools, (c) for how many hours, and (d) at what levels?

ANSWER

1. Fourteen were employed up to the end of second term 1980.
2. (a) Greek, Mandarin, Vietnamese, Indonesian and Modern Greek.

   (b) St John's, Parap Primary, Secondary Intensive English Unit (Dripstone High), Jingili Primary, Nightcliff Primary, Stuart Park, Darwin Primary, Larrakeyah Primary, Ludmilla Primary, Wagaman Primary, Millner Primary and Casuarina High School.

   (c) Number of hours approved varies between 2 and 320.

(d) Levels range from year 3 to secondary.

MULTI-CULTURAL PROGRAMS

Language	Days	No. of Hours Approved	Period of Approval	Level	Schools
Greek	-	44	1. 7.80 - 30.12.80	Year 12	St John's
Mandarin	Mon-Wed	30	1. 7.80 - 30.11.80	Year 4-7	Parap Primary
Vietnamese	Mon-Fri	320	1. 7.80 - 30.11.80	Year 8-12	S.I.E.U. (Dripstone High)
Indonesian	Tue	63	1. 7.80 - 30.12.80	Year 3-4	Jingili Primary
Mandarin	Mon-Wed	7½	26. 5.80 - 30. 6.80	Year 4-7	Parap Primary
Modern Greek	-	75	3. 7.80 - 4.12.80	Year 8	St John's
Mandarin	Monday	2	23. 6.80 - 30. 6.80	Year 6-7	Nightcliff Primary
Mandarin	Mon-Wed	50	1. 7.80 - 30.11.80	Year 4-7	Stuart Park
Mandarin	Mon-Wed-Fri	40	1. 7.80 - 30.11.80	Year 4-7	Darwin Primary
Greek	Varying	120	31. 3.80 - 30. 6.80	Pre-school	Nightcliff Primary Larrakeyah Primary Ludmilla
Modern Greek	Mon-Wed	40	28. 7.80 - 5. 8.80	Year 4-7 Year 6-7	Wagaman Primary Nightcliff Primary

Special Aboriginal Housing Scheme

10 Mr PERKINS to MINISTER for LANDS and HOUSING

In regard to the 1978 agreement between the Commonwealth and the Territory for the provision of housing for Aboriginal people in the Territory, and which is commonly known as the Special Aboriginal Housing Scheme -

1. What amount has been (a) allocated by the Commonwealth to the Territory, and (b) expended on this scheme to 20 August 1980?
2. How many houses have been built and in which locations throughout the Territory?
3. How many houses and in which locations will be built (a) this financial year, and (b) next financial year?
4. Did the Territory government alter the agreement or its implementation to prevent homes being built under this scheme to be located adjacent to or opposite privately-owned homes?
5. If so, does such a restriction still apply?

ANSWER

1. (a) $809,000.

(b) $785,000 (Balance being held to pay for land when valuations are received).

2. Twenty-one - 10 in Alice Springs;
5 in Tennant Creek; and
6 in Katherine.

3. Five in Katherine subject to land availability.

4. No, the agreement does not make reference to the location of houses built under the agreement. A decision was taken by the former Minister for Lands and Housing that houses constructed under the scheme would not be built adjacent to or opposite privately owned homes.

5. The decision referred to above has never been rescinded.

Emergency Housing

11 Mr PERKINS to MINISTER for LANDS and HOUSING

1. Has his attention been drawn to the newsheet of July 1980 "NT ACTION", published by the NT Council of Social Service, which claimed that a register opened in the Darwin mall for 2 days had shown that 82 adults and 6 children were living on the beach or in cars, and that 177 adults and 101 children were living in unsatisfactory conditions?

2. If so, does he have evidence to show that these figures are accurate?

3. Has he or the NT Housing Commission received submissions from NTCOSS seeking support for the establishment of an emergency housing committee and, if so, what action has been taken by the government?

ANSWER

1. While I have seen the newsheet mentioned, I have also seen reports in the media referring generally to the claim made in the newsheet, which is published by the NT Council of Social Service.

2. I have no evidence whether the figures included in the newsheet are accurate or not.

3. I have received submissions from NTCOSS seeking support for the establishment of an emergency housing committee. I have already replied to the Council's submission of 2 July 1980 and the Council's further submission of 5 August 1980 is being examined. My earlier reply to NTCOSS indicated that I did not favour their suggestions.

Purchase of Residence at 28 Tasman Circuit Wagaman

12 Mrs O'NEIL to MINISTER for LANDS and HOUSING

1. Has the government arranged through the Housing Commission the purchase of the residence at 28 Tasman Circuit, Wagaman?

2. If so, what price was paid for the property, who is occupying or is intended to occupy this residence, and what expenditure has been necessary to (a) upgrade, or (b) improve the property since purchase?

ANSWER

The Public Service Commissioner on 17 July 1980 instructed the Northern Territory Housing Commission to purchase the above property for housing the new Solicitor-General.

The property has been purchased for $92,000. According to the Valuer-General, the market value of the property is $96,000.

The purchase is not yet finalised. No expenditure has been necessary to upgrade or improve the property. It is expected that an expenditure of $500 may be needed to replace the stove.

Driving Licence Examiners

13 Mr PERKINS to MINISTER for TRANSPORT and WORKS

1. How many (a) men, and (b) women are employed as examiners for driving licences?
2. Does the Department of Transport and Works have a policy regarding employment of women as driving licence examiners and, if so, what is the policy?

ANSWER

1. (a) Five men.

   (b) Four women.
2. The department does not have a policy for or against either male or female licence testers. We look for efficiency, pleasant personality and ability to deal with the general public in a friendly, but responsible manner. A proven knowledge of the Motor Vehicles Act and Traffic Act are required. Testers must hold "A", "C" and "E" class licences and preferably a driving instructors licence.

Motor Vehicle Registry in Alice Springs

14 Mr PERKINS to MINISTER for TRANSPORT and WORKS

In regard to the Alice Springs branch of the Motor Vehicle Registry -

1. How many employees are (a) currently employed, (b) have (i) transferred, or (ii) resigned, and (iii) at what levels since 1 July 1978?
2. Has his attention been drawn to complaints published in the Alice Springs press alleging that some employees of the branch may perform their duties with excessive zeal?
3. Has he or his department received complaints about the branch and, if so, (a) how many, (b) to what specific issues did they relate, (c) how many have been investigated, and (d) what has been the result of any such investigations?

ANSWER

1. (a) Eight employed.

   (b) (i) Four transferred - 3 x A1; 1 x A3.

   (ii) Twelve resignations - 11 x A1; 1 x A3.
2. Yes.
3. (a) Four.

   (b) (i) A refusal to register a damaged vehicle.

   (ii) Suspension of use of traders plates.

   (iii) Dissatisfaction with vehicle inspection procedures.

   (iv) Interim inspection of substandard private hire cars.

   (c) All have been investigated.

(d) The first 2 complaints listed were referred to the Ombudsman, who, after investigations, ruled in favour of the department's decision.

Investigation of the third complaint showed that action had been taken in accordance with the Motor Vehicles Act.

In the final complaint, the member of the public elected not to avail himself of options open to resolve the complaint.

Lots 4631 and 4632 East Side Subdivision Alice Springs

15 Mr ISAACS to MINISTER for LANDS and HOUSING

Is it proposed that lots 4631 and 4632, East Side Subdivision, Alice Springs, will be used for a small shopping area and, if so, will he inform me when he approves their use for such purpose and when the blocks will be offered for sale at auction?

ANSWER

The proposed zoning change to facilitate release of the lots has been on exhibition with no objections being received. The Planning Authority will consider the matter on 12 September and a report and recommendation will then be prepared for my consideration. Assuming my approval, Executive Council will then consider the matter.

A date for the next land auction in Alice Springs has not been fixed, but will probably be in late October or November.

It is expected that these blocks would be available for this auction.

Arnhem Highway

16 Mr ISAACS to MINISTER for TRANSPORT and WORKS

Is it planned to widen the Arnhem Highway and, if so, what is the program to be undertaken?

ANSWER

No. There are no proposals at this stage to widen the Arnhem Highway.

Aerial Spraying of Insecticides

22 Mrs O'NEIL to MINISTER for TRANSPORT and WORKS

1. Has his attention been drawn to ultra low volume techniques for aerial spraying of insecticides?
2. Can he state whether the government has published advice that light breeze conditions may give better control of the spread of aerial sprays than the calm air conditions often applying about dawn, currently favoured by crop dusters and local authorities using herbicides?
3. What steps has his department taken to enforce the conditions for aerial spraying recommended by the National Health and Medical Research Council, which has advised that herbicides are harmless if used as recommended?

ANSWER

The matters raised in these questions are more the preserve of the Minister for Primary Production. I suggest the honourable member

redirect her questions.

Alice Springs Recreation Lake - Environmental Impact Study

23 Mr ISAACS to CHIEF MINISTER

Has an environmental impact statement on the Alice Springs recreation lake been completed and, if so, will he make the document public?

ANSWER

There is an environmental report on one of the locations being considered for a recreation lake for Alice Springs. This is the location north of Alice Springs in the Todd River. There are a limited number of copies of the report, but it is available for perusal by the public at the office of the Department of Transport and Works, Alice Springs. A copy of the report is available in the Legislative Assembly library.

Delissaville Health Centre - Installation of Airconditioners

28 Mr ISAACS to MINISTER for TRANSPORT and WORKS

When will airconditioners be installed at the Delissaville Health Centre?

ANSWER

Work was carried out by Department of Transport and Works Essential Services Group. The airconditioners were installed on 9 October 1980 and are operative.

PART II

THE QUESTION PAPER

An index to questions appears at the end of Part II.

Numerical references are to Question Paper page numbers.

An asterisk preceding an entry in the index indicates that an answer has not yet been received.

Leave Legislation

Mr LEO to CHIEF MINISTER

When does the government intend to introduce legislation based on the recommendations of Mr Justice Taylor?

ANSWER

The honourable member for Nhulunbuy is referring to the report by former Commissioner Taylor in relation to the matter of long service leave and leave of absence. My recollection is that Cabinet approved the preparation of legislation either earlier this year or late last year. I would expect that the legislation would probably be ready by about mid-year. I would like to be able to give the honourable member an accurate statement of the position. Perhaps I can advise him later.

Plant Variety Rights Scheme

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION and TOURISM

In a press release dated 10 February 1981, the Minister for Primary Production and Tourism said that the Northern Territory has asked for special dispensation under federal government draft legislation on the Plant Variety Rights Scheme. I would like to know what he means by that.

ANSWER

The Northern Territory has maintained its attitude of accepting the concept of plant variety rights while withholding its final support until federal legislation is available for the Northern Territory public. The introduction of plant variety rights into Australia is unlikely to inhibit the development of agriculture in northern Australia. Most of the varieties currently used or likely to be developed in the near future are based on genetic material sources or countries without plant variety rights protection. If the inception of plant variety rights resulted in the development of new varieties specifically suited to Northern Territory conditions, the higher cost of seed would be outweighed by increased production efficiency. If new varieties were developed in the Northern Territory, the interests of local developers would be protected.

At the February 1981 Australian Agricultural Council meeting, it was agreed that plant variety rights be restricted to ornamental and horticultural plants and other selected pasture and fodder species. The Northern Territory requested that any legislation should not inhibit the importation of crop genetic material from overseas countries with a plant variety rights scheme where this would be desirable for northern Australian use.

Concessions for Interstate Pensioners

Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

Does the government intend to extend pensioner transport concessions to pensioners visiting from interstate and will he raise the matter of reciprocal rights for pensioners with other state minister?

ANSWER

At present, the government does not propose to extend pensioner concessions to interstate pensioners visiting the Northern Territory. There are quite a lot of problems inherent in this system which are somewhat detailed. I do not have the details before me at present. At a conference I will be attending shortly, I will raise the matter with other state ministers to ascertain the attitude of their respective states on the subject.

Alcohol Detoxification and Rehabilitation Unit

Mr HARRIS to MINISTER for HEALTH

Is the minister able to provide me with up-to-date information concerning the government's program to upgrade and strengthen the alcohol detoxification and rehabilitation unit at the old Darwin Hospital?

ANSWER

Most people are aware that, in August last year, the Department of Health set up in the old Darwin Hospital - I think it is in Ward 9 or 10 - a rehabilitation and detoxification unit that had been operated on a 40-hour-a-week basis The original move was made with the intention of reviewing its activities in the first 6 months to see how it would develop and what requirements would be needed in the ensuing period. I am happy to report that the department's review which took place earlier this month has indicated that there is a need for the detoxification and rehabilitation centre to be put onto a 7-day-a-week, 24-hour-a-day basis to cater for the people who have need of the service. I might add that this service will ultimately be an integral part of the drug and alcohol authority's activities. Although the decision as to where the 2 will lie administratively has not been determined, the 2 organisations must work very closely together. I hope that I will be able to present to the Assembly later next week or early in the next sittings, legislation that will enable the creation of a drug and alcohol authority.

Rezoning of Open Space in Malak

Ms D'ROZARIO to MINISTER for LANDS and HOUSING

Has he received representations from residents of Malak, a northern suburb of Darwin, protesting about the rezoning of open space to residential use and, if so, has he considered the representations and what action does he propose to take?

ANSWER

I have received such representations and I am studying the matter at the moment. The honourable member will be the first person to be advised as to any subsequent decision or options which may be available to me having regard to the act under which I too must work.

Camping Areas for Aborigines

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

What progress, if any, has been made for the establishment of adequate town camping areas for Aboriginals in Darwin?

ANSWER

The Department of Community Development, in consultation with a number of other departments involved, has currently under way an inquiry into the problems dealing with various sites that have been proposed for additional Aboriginal camping areas in Darwin. When this was first proposed late last year, the government was anxious that some decisions be taken on this matter as the situation that prevails in parks in various places around Darwin is quite unacceptable and we were anxious to have the matter resolved. However, a very good case was presented that we should not act prematurely in this matter and that careful selection of sites, having regard to all sorts of views, should be made. About 3 months was sought to do this exercise and, reluctantly, this was agreed to. The 3 months have grown to 4 months now. Hopefully, the government will soon have a report before it on the subject of additional Aboriginal camping

areas in Darwin. I am sure the government will be keen to act swiftly on that report.

Cattle Duffing

Mrs PADGHAM-PURICH to CHIEF MINISTER

In view of the increased cattle duffing and associated activities in the Top End, what success can the police claim in investigation and apprehension?

ANSWER

I am told by the Commissioner of Police that, over the last 12 months, there have been 20 separate offences of cattle duffing reported. These involved a total of 63 head of stock. Of the 20 offences reported, 9 have been cleared up resulting in 16 arrests and 2 people have been charged on summons. It would seem that resources are proving sufficient to handle the complaints.

Carpentaria College

Mrs LAWRIE to MINISTER for COMMUNITY DEVELOPMENT

Can he advise on the present state and future plans for Carpentaria College?

ANSWER

I cannot answer the honourable member's question. I was involved in the subject as Minister for Lands and Housing last year but, since that time, I do not recall having very much to do with the subject. However, I will undertake to get some information during these sittings and provide it to the honourable member.

Staffing of Schools

Mr B. COLLINS to MINISTER for EDUCATION

Are all schools in the Northern Territory properly staffed for the 1981 school year?

ANSWER

I would ask that the question be placed on notice. There are about 122 schools. I cannot keep them all in my head.

Mindil Beach Casino

Mr HARRIS to TREASURER

Is progress on the Mindil Beach Casino proceeding according to the revised time schedule?

ANSWER

With the exception of about 5 days - and under the terms of contract and the agreement with the casino, developers are allowed to have some building delays accrue as a result of weather and like circumstances - the construction of the hotel casino complex is on time. For some time, the company has been very anxious to have the building proceed to completion as soon as possible.

Aboriginal Land Rights (Northern Territory) Act

Mr ISAACS to CHIEF MINISTER

Will he inform the Assembly of the attitude adopted by himself and the

Deputy Chief Minister to the Australian government in relation to Aboriginal Land Rights (Northern Territory) Act?

ANSWER

I do not really know that I would be objective judge of my attitude to the Australian government and I am not sure that I could undertake to answer that question. If the Leader of the Opposition is asking what the nature of the proposal by the Northern Territory government to the federal government in relation to possible amendments to the land rights act is, then I can advise him that copies of the proposal have been circulated to the land councils and it has been agreed between the federal minister and the Territory government that, if the land councils are agreeable, a joint and several meeting will be held in Darwin as soon as may be conveniently possible. I understand that the federal minister will contact the land councils to arrange that meeting and to set out an agenda.

Foot and Mouth Disease Outbreak in NZ

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION and TOURISM

What help did the Northern Territory government recently extend to the New Zealand government on the recent occasion of a suspected outbreak of foot and mouth disease in pigs in New Zealand?

ANSWER

There was a scare at Timaru in the South Island of New Zealand. We certainly made offers immediately through the Commonwealth, which is our practice in regard to an outbreak of this nature. Fortunately, the tests made in England indicated a negative reading and there is no likelihood of any foot and mouth disease in New Zealand. This is standard practice as far as the offer is concerned. We have made offers on many occasions and sent people to Malaysia, Indonesia and England. If there are any other outbreaks that are of concern to the Northern Territory, and they would be of particular concern to the Northern Territory, we would offer the same sort of resources again.

Tropical Fruits, Nuts and Vegetables

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Could he inform the Assembly what research is being done with regard to the adaptability of tropical fruits, nuts and vegetables in the Northern Territory, and are there any plans to develop a plant nursery?

ANSWER

Mr Speaker, I will obtain the information the honourable member requires and let him know later this sittings.

Northumberland Insurance Company

Mrs LAWRIE to TREASURER

Following the closing date for submissions regarding Northumberland Insurance Company which he advised us was 21 January 1981, can he now indicate whether all claims for assistance as a result of the collapse of Northumberland Insurance Company can be met?

ANSWER

I cannot guarantee that all claims will be met. However, I have some information for the member. The claims received to date following advertisements total about $150,000 which is a bit less than had been anticipated. The estimate of how much was outstanding from Northumberland was a bit of a guess.

The assessment of claims is that there are court awards amounting to $50,000 and amounts claimed but subject to settlement of $100,000. The Commonwealth has agreed in principle to make ex gratia payments in relation to amounts that are the result of outstanding court awards and the Northern Territory government has undertaken that it will see paid at least 50% of claims that are subject to settlement. The Department of Treasury is currently continuing to work on this basis and is approaching the Commonwealth to see if it can get it to contribute towards the claims that are still the subject of settlement. We believe the Commonwealth has a continuing responsibility in this field and we will keep in touch with those people who have made applications for funds and process them as quickly as we possibly can with the emphasis on obtaining as much money as we can for them.

Performing Arts Centre

Mr HARRIS to TREASURER

Has agreement been reached between the Corporation of the City of Darwin and the Northern Territory government on the level of funding for the performing arts centre and, if so, is he able to indicate what that level will be?

ANSWER

Agreement on the respective governments' levels of funding has not been reached yet. An interesting development has occurred in regard to the development of a performing arts centre in Darwin. The government and the city council have been approached by a private developer who is proposing a business arrangement to assist the respective governments by building a performing arts centre in Darwin in association with another development. At this stage, we have sought further details from the prospective developer. Both levels of government expressed very keen interest in the proposal. I hope that announcements will be made as quickly as possible. This matter has gone on for some considerable time. However, we are talking about quite a substantial sum of money, particularly when one considers the size of Darwin and the population of the Northern Territory. Any contract must be entered into very carefully.

Rehabilitation of Rum Jungle

Mr B. COLLINS to MINISTER for MINES and ENERGY

Could he advise the Assembly of the progress of plans to carry out further rehabilitation of Rum Jungle? Could he also advise the Assembly of what plans there are to rehabilitate and make safe the tailings dumps at the other uranium mine sites in the Territory?

ANSWER

I am happy to inform the member for Arnhem of what is going on with the rehabilitation of Rum Jungle. I will have to obtain further information for him. To that end, I will ask that the question be placed on notice. The reason is that, only last week, officers of our government and from the Commonwealth, who are involved in negotiating the cost, have concluded an agreement at officer level and I have not had an opportunity to see it. As soon as I can, I will pass the information on to the member.

Motor Vehicle Licence Plates and Registration Stickers

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

Has the Motor Vehicle Registry taken any action upon the suggestion by the Auditor-General that control of the issue of motor vehicle licence plates and registration stickers be improved and, if so, what is that action?

ANSWER

A paper is being prepared for Cabinet consideration regarding those matters.

Old Timers Home in Rural Area

Mrs PADGHAM-PURICH to MINISTER for COMMUNITY DEVELOPMENT

Are there any current plans to establish an old timers home in the rural area outside Darwin?

ANSWER

Traditionally, the government has not in its own right established homes for old people. Those that do exist in the Northern Territory are run by other organisations, either church or private. In all circumstances, the government has either contributed to their capital cost or to their annual recurrent funding. At this stage, I know of no plans by any organisation to establish an old timers home in rural Darwin. However, the government would be receptive to such an application from a responsible body which could demonstrate that it has the capacity and interest to look after such a centre. I point out to the honourable member that there is quite a move these days to assist the aged to stay at home. It is felt that institutionalisation is not always the most ideal situation until such time as a person is beyond caring for himself. The honourable member might care to think about that if she has particular problems in her electorate.

Water Rates in Nhulunbuy

Mr LEO to MINISTER for TRANSPORT and WORKS

Has the Department of Transport and Works conducted in inquiry into water rates in Nhulunbuy and, if so, what are its recommendations?

ANSWER

I am unable to answer the honourable member at this moment. I will make some inquiries and let him know later in the sittings.

Residential Development of Arafura Hostel Land

Mrs O'NEIL to MINISTER for LANDS and HOUSING

When will residential development of the former Arafura Hostel land proceed? This has been vacant for 3 years and planning approval was received a year ago.

ANSWER

There were many places knocked down by the cyclone; I am unable to keep up with them. That is one which I should be familiar with, but I think it would probably be wise if I did up-to-date research on the matter and advise the honourable member later.

Failure of Emergency Power Supply at Casuarina Hospital

Mrs PADGHAM-PURICH to MINISTER for HEALTH

I believe there was a failure in the emergency power supply at Casuarina Hospital recently when the town supply was shut down because of damage to the Snell Street substation. Will he advise the Assembly what action has been taken to ensure that this potentially dangerous occurrence does not happen again?

ANSWER

The Casuarina Hospital has 2 emergency sources of power. One is a battery-operated system that normally supplies power as soon as the mains power drops off. The other one is a system that is activated to run the air-conditioning and the lifts etc throughout the hospital. The battery system was quite all right on this particular occasion but the fault that occurred with the generators in the basement was caused by a failure in the computer that switches on the diesoline for the generators. The department has consulted with the manufacturers to ensure that this problem is eliminated and does not cause such a failure again.

Failure of Emergency Power Supply at Casuarina Hospital

Mr B. COLLINS to MINISTER for MINES and ENERGY

Is it true that the power failed at Casuarina Hospital after the emergency generator was switched on because it ran out of fuel?

ANSWER

The honourable member is asking whether the power failed after the auxiliary engine was switched on. Perhaps I did not put it clearly or perhaps the member misunderstood me. I thought I said the failure was caused by a fault in the computer that started the pumps that provided the diesoline for the generator. The emergency generator cut in. There was a fault. The diesoline did not run to the generator and the emergency generator stopped.

Mr B. Collins: That's not true.

Mr TUXWORTH: The member has said: 'That's not true'. That is my understanding of the situation. If he wants to take it up further with me, I am more than happy to discuss it with him.

Palm Beetle Infestation

Mr HARRIS to MINISTER for PRIMARY PRODUCTION and TOURISM

As he would be aware, the palm bettle is on the rounds of Darwin once again. What is the government doing to make sure that this beetle is contained, and is he able to give any indication as to whether total eradication is possible?

ANSWER

It is a pretty sad story. After the fine efforts to eradicate the beetle by the officers concerned and the various agencies, the Conservation Commission, the city council and of course the people involved in quarantine through the department, it appears that the beetle was transported to the northern suburbs in a palm and the only avenue available to the department now is to control the spread of the insect rather than to eradicate it. Education programs will have to be undertaken, including the description of the various types of insecticides that might be used to control the beetle. Those plans are proceeding now. For the interest of members with palms in their gardens, 1.25 grams of carbaryl per litre of water is recommended for spray application right down into the palm sheath. The treatment has to be repeated on week later.

Local Farms at Douglas-Daly Project Farms

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

In the report of the Cropping Development Committee for 1978-79, it has been suggested that 'increasing the experience and expertise of local farms in the growing of grain crops is one way of encouraging agriculture in the Northern

Territory'. Considering this suggestion, will the 3 project farms on the Douglas-Daly be attended by local farmers to advise the new farmers who come in or can the local farmers attend to learn new techniques which may be introduced with the new farming project?

ANSWER

I do not think that question has been addressed at this stage but, certainly, we will have a look at the value of such a suggestion and see if it can be implemented.

Casuarina Hospital Computer

Mr B. COLLINS to MINISTER for HEALTH

Is it true that the computer at Casuarina Hospital, which controls all of the safety systems of the hospital, has never been fully operational since its installation because of problems of training staff to use it?

ANSWER

I ask that the question be placed on notice.

Purchase of Connair

Mr ISAACS to CHIEF MINISTER

Did the Northern Territory government intervene to prevent TAA proceeding with the purchase of Connair for $1.8m under an agreement between those 2 companies signed in September 1979 and, if so, why?

ANSWER

The honourable Leader of the Opposition will realise that this relates to a situation that occurred quite some time ago. In all fairness, he should place his question on notice, and I would ask him to do that. I have no recollection that the Northern Territory government intervened to preclude the sale of Connair to TAA. Indeed, I can remember one day receiving 3 separate telexes: one from the then Chairman of Connair saying that he had sold to TAA, one from TAA denying that it had bought Connair - apparently the press had got hold of the story - and a further communication which I cannot recall. All 3 of them related to the alleged sale of Connair to TAA. The fact is that, had TAA or Ansett or any company or any individual in Australia wished to purchase Connair, the sale could have occurred for whatever the then proprietors of Connair were prepared to sell it and the Northern Territory government could not have stopped it.

Douglas Station Selling Price

Mr HARRIS to MINISTER for PRIMARY PRODUCTION and TOURISM

Is it true that the partners who own Douglas Station are demanding $1m to release to the government land for agricultural development purposes?

ANSWER

Negotiations have taken place between the Douglas Station partnership and government officials, including the Agricultural Development and Marketing Authority. An unrealistic price is being demanded by the partnership and this is placing the 1981 agricultural development plans in jeopardy. If agreed to, that price would prevent agricultural development because the final cost of land after development would make farming uneconomical. The land in question is about 50,000 acres. It was selected because of its access to the Department of Primary Production's experiment farm, soil suitability and reasonable access, particularly in this early stage of government's plans. The Valuer-General's Department placed a value on the land in the order of $75,000. That was his bottom line. Even with the most generous of negotiations, the government would not have been able to go beyond $150,000 for the land when other extras are taken into account. Failure to acquire this area of land because of the unrealistic asking price will result in the authorities plans being set back for at least 1 year. Substantial soil survey and farm planning works have already been carried out. Farmer selection is proceeding together with advanced town planning and construction of homestead and machinery sheds. It is not possible to relocate the authority's project in an alternative area without losing the current year's program.

It may not now be possible to proceed without compulsory acquisition. The area in question represents around 10% of the pastoral property's holding. I understand that the pastoral property changed hands on 5 December 1979 for a price of $280,000 plus interest. It was obviously a bargain purchase at the time and no doubt the value would be in excess of that figure. I am advised that the partners have spent $0.5m on the property since that time, and that takes us to about $800,000. Ten per cent of $800,000 is $80,000. Thus, one would be looking at the Valuer-General's figure on that rough formula. The survey costs alone for the land that the government requires total around the $57,000 mark. It is believed that there is no other purchaser in the offing.

The government is the only purchaser around the corner for this particular area.

We have looked at these pastoral properties in the far north over the last 70 years. To my memory, Sir, there is only one place that has made money between Mataranka and Darwin. It made money out of cattle; it certainly did not make money out of agricultural development. That property was Tipperary when it was run by the Burns Brothers. I believe the Douglas partners' attitude is completely unrealistic. The government will now have to study very closely which direction it may choose to take.

Detoxification Unit

Mrs LAWRIE to MINISTER for HEALTH

Will he give an assurance that no community health workers will be compulsorily transferred to the detoxification unit? This issue is causing extreme concern in the Community Health Centres.

ANSWER

I indicated my concern yesterday over the matter the member for Tiwi raised concerning the possible press-ganging of community health workers into the detoxification unit. Probably, this is a matter for the secretary of the department. I have yet to have an opportunity to raise the matter with him. On those grounds, I would not be prepared to give an assurance but I am prepared to raise the matter and give the acting secretary my views on the principle of press-ganging these people from one place to another, particularly in such a sensitive area. I believe that people should be working because of a commitment and not because they are made to go there.

Prisoner Work Release Scheme

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

The Prisoner Work Release Scheme was suspended over the Christmas period. Is he able to inform me whether or not that scheme is now in operation?

ANSWER

The scheme is not in operation at present. When Berrimah Prison was constructed, a special facility was placed outside the front of the prison for the operation of the Prisoner Work Release Scheme. As a result of overcrowding in Northern Territory jails - I understand that every state in Australia has overcrowded jails - the government decided to use the facility outside the main jail at Berrimah for a female prison. At present, that facility is being used as a female prison. Therefore, the Prisoner Work Release Scheme cannot continue until alternative arrangements are made. We are considering the use of other premises for the scheme but no decision has been made on that as yet.

At the time of self-government, Berrimah Prison was already being constructed. Therefore, we inherited a situation of having a modern jail but one which would really only replace the Fannie Bay establishment. I think the Fannie Bay Gaol was capable of accommodating 100 prisoners and Berrimah Prison - which cost $6m - accommodates 110 prisoners. Really, we did not improve our capacity very much at all. As has been announced, additional accommodation is to be constructed at Berrimah Prison: two 20-man cells are due for completion in October this year. We do have a situation of overcrowding which is a cause for concern. We are addressing it as best we can and will start the Prisoner Work Release Program as soon as it is practical to do so.

Agreement Between NT Government and AFAP

Mr ISAACS to MINISTER for TRANSPORT and WORKS

What are the details of the agreement between the Northern Territory government and the Australian Federation of Air Pilots which enabled the bans on Northern Airlines by the AFAP to be lifted? What was the agreement signed on behalf of the Northern Territory government by the Acting Secretary of the Department of Transport and Works and will the minister table the document in the Assembly?

ANSWER

I ask the Leader of the Opposition to place the question on notice.

Agricultural Development and Marketing Authority Acquisition of Land

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

In view of the statement he made in the Assembly this morning, is Cabinet considering compulsory acquisition as a viable option in getting the Agricultural Development and Marketing Authority scheme off the ground?

ANSWER

The government will at least examine the appropriate laws if negotiations are not successful.

Police Station at 19-Mile

Mrs PADGHAM-PURICH to CHIEF MINISTER

Why has work ceased on the building of the 19-mile police station? I received a written assurance from the Commissioner of Police that work would be completed by the end of January 1981.

ANSWER

I understand that there is not much left to take in the rural area anymore because they have cleaned the residents right out. There have been problems with the contract and the contractor who is building this police station. The Department of Transport and Works may have to re-let the contract and that is the reason for the delay.

Coastal Surveillance and Aerial Medical Contract

Mrs O'NEIL to MINISTER for TRANSPORT and WORKS

How many Northern Airlines pilots will be employed on a temporary basis by Transecutive to carry out both the coastal surveillance contract and the aerial medical contract during the interim licence period?

ANSWER

I believe the figure is approximately between 47 and 51.

Amateur Fishing Licences

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION and TOURISM

Is it the intention of the Northern Territory government to introduce licensing procedures in season for amateur fishermen?

ANSWER

No.

Employment for Northern Airlines Pilots

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

What action has been taken to provide alternative employment for former Northern Airlines pilots who were offered only temporary employment with Transecutive?

ANSWER

It is very difficult to answer that question until we know what the propositions of Ansett and TAA will be. We will not know that until after 28 February. We hope that either of those airlines will take over some of the pilots who are now being retrained and have been trained for the aerial medical contract and also the surveillance contract. I would ask the member to place her question on notice.

Employment for Northern Airlines Pilots

Mr DOOLAN to MINISTER for TRANSPORT and WORKS

Which former Northern Airlines pilots will get permanent positions with Transecutive if that company is granted a long-term licence to operate both contracts? Is it a fact that former senior pilots with Northern Airlines are likely to get these posts, that they will require retraining to fly Nomads and that the government has agreed to meet the costs of this retraining?

ANSWER

It is very difficult to answer the honourable member's question. In negotiations with Transecutive, it has been indicated that the Northern Territory government hopes that anybody who takes over the aerial medical contract and the air surveillance contract will give Northern Airlines pilots the first opportunity for the job. Until such time as the 60-day limit is over - that is the period of the Transecutive contract - I am unable to answer the question.

Purchase of Connair

Mr LEO to MINISTER for TRANSPORT and WORKS

Did the 3-man committee established by the government to examine the Connair takeover offers first recommend acceptance of other offers before recommending East West Airlines?

ANSWER

I ask the honourable member to place that question on notice.

Centrepoint Library

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

When will the new public library situated on the first floor of Centrepoint be opened to the public?

ANSWER

I am advised that the new library in the central business district will open in Centrepoint within a week. The library will have about 25,000 books on its shelves when it opens. It will eventually have 35,000 books available to the people working in the central business district in Darwin.

Purchase of Connair

Mr B. COLLINS to MINISTER for TRANSPORT and WORKS

Who were the potential buyers put forward to the government by Connair for the airline and what were the reasons for the government rejecting those buyers?

ANSWER

I ask the member to place the question on notice.

Primary School for Fred's Pass Reserve Area

Mrs PADGHAM-PURICH to MINISTER for EDUCATION

What is the current thinking on the establishment of a primary school in the Fred's Pass Reserve area at the 19-mile? I would like to make the distinction between that area and the area where the Humpty Doo School is on Fred's Pass Road.

ANSWER

I thought I had the answer until it was confused by the clarification. I assume that the member means the Fred's Pass Reserve area itself rather than Fred's Pass Road. Of course, the area around Fred's Pass Reserve is one of the more rapidly growing Darwin rural areas. The thinking in relation to the provision of schools, particularly primary schools, in that area would be the same as that for any other growing area. The department is monitoring it in the normal planning sense. The current figures seem to indicate that we will probably need a pre-school and primary school by about 1986. Nonetheless, the trend in population growth in that area is being monitored and the government will respond accordingly.

Back-to-Back Guarantee to East West Airlines

Mr ISAACS to the CHIEF MINISTER

When did the Northern Territory government first raise with East West Airlines the back-to-back requirements of the guarantee arrangements? Was the advice in writing?

ANSWER

I am unable to answer that question with any certitude because it is one that obviously involves looking at files and extracting exact dates. I can answer it in a general sense. The back-to-back guarantee - as I was informed by the Department of Law - was requested of East West Airlines in the first instance when negotiations commenced. East West Airlines declined to consider such a proposal at that time. Yesterday, I quoted from a telex from Hill Samuel, our merchant bank advisers. They had asked East West Airlines for financial information regarding a back-to-back guarantee several months before the date of that telex, which was November last year. Obviously, the back-to-back guarantee was raised with East West Airlines well before I personally raised it with the chairman of East West when we met in November with directors of East West and of Northern Airlines to discuss the whole position of the government's guarantee for Northern Airlines' aircraft purchases.

Commonwealth Teaching Service

Mr D.W. COLLINS to MINISTER for EDUCATION

Is peer assessment a condition of service of the Commonwealth Teaching Service?

ANSWER

I would not consider that peer assessment is a condition of service. It may be a perceived condition of service by some teachers but I certainly would not describe it as being a condition of service in the normal context of that word as it relates to conditions of service carried over by members of the Australian Public Service to the Northern Territory Public Service any more than it would apply as a condition of service to teachers of the Commonwealth Teaching Service coming across to the Northern Territory Teaching Service. There are many teachers who have very little faith in peer assessment as it presently operates. The whole question of peer assessment will be one for the new commissioner upon his arrival in the Northern Territory. No doubt there will be discussions between him, the Department of Education, the federation and myself.

Model of Marina

Mr HARRIS to MINISTER for TRANSPORT and WORKS

Recently a model of a marina was delivered to the minister's office. Will that model be put on public display and, if so, is he able to indicate where?

ANSWER

The model is of the proposed marina at Vesteys Beach. I would like to indicate to members of the Assembly that it is only a proposal. The model has arisen from an engineering study that has just been completed. There were 2 which have been circulated to members of the corporation and other interested parties. We are trying to obtain some additional copies for members of the Assembly. However, I am sure that the honourable member for Fannie Bay already has a copy. To answer the member's question, the display will be presented to the public. Hopefully, it will be displayed at the Casuarina Shopping Centre, Centrepoint and other venues.

Transecutive Pilots

Mr DOOLAN to MINISTER for TRANSPORT and WORKS

Who will meet the wage costs of the pilots taken on by Transecutive who are surplus to the number of pilots actually required to operate the contracts during the interim period and, if it is the government, why?

ANSWER

Since that question relates to negotiations with Transecutive, I ask the honourable member to place the question on notice. However, whatever the cost might be - and I have been given an indication that it could vary between $50,000 and $150,000 - I believe that it will be cheap because part of the deal is to ensure that we have the interim service operating. As I said yesterday, not only was the tourist industry of the Northern Territory put on the map but also the tourist industry of Australia.

Transecutive Pilots

Mr ISAACS to MINISTER for TRANSPORT and WORKS

Will be now confirm that, whatever the amount - be it $50,000 or $150,000 - it is to be paid by the Northern Territory government?

ANSWER

No, I cannot confirm that.

Bagot Road Flyover

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

Is the construction of the Bagot Road flyover proceeding on time and, if not, what are the reasons for the delay?

ANSWER

To my knowledge, the construction of the Bagot Road flyover is going according to schedule.

NTEC After-Hours Service in Alice Springs

Mr VALE to MINISTER for MINES and ENERGY

Can he advise us if there is any truth in the public statements of recent days that the after-hours service provided by NTEC in Alice Springs is to be reduced?

ANSWER

The understanding that I have from NTEC is that a circular was put out yesterday or the day before suggesting that after-hours callouts would not be made in future. It seems to have had the spirit but not the specifications. The facts are that a request was made by the Electrical Trades Union that NTEC answer all callouts after 6 pm as a matter of course. NTEC has always taken the view that callouts that were necessary for people's safety or because property was in danger should be attended to immediately. That has been its practice and it will continue to be its practice. Callouts that are not urgent, such as a street light that has gone out, would be left until the next morning. The circular was attempting to spell out that there would be no attempt to provide after-hours services for frivolous callouts. However, it is still the intention of the commission that it will attend any callout where people's lives or property are under threat.

Legislation to Control Antibiotics in Stockfeed

Mrs LAWRIE to MINISTER for PRIMARY PRODUCTION and TOURISM

Can he indicate when he will be introducing legislation to control the use of antibiotics in stockfeed? This is the tenth time in as many years that I have asked this question.

ANSWER

I cannot be held responsible for all the answers the member has received. Certainly, the last answer I gave to the honourable member was that legislation would be introduced early this year. I have no updated brief from the department but I am hopeful that it will be early this year.

New Special School in Darwin

Mrs O'NEIL to MINISTER for EDUCATION

Will he confirm that the new special school in Darwin to replace the inadequate Coconut Grove facilities, which has been under construction for several years, will not be completed until the end of this year at least? Will he take all necessary steps to ensure that this project receives top priority in this International Year of the Disabled Person?

ANSWER

I thank the honourable member for the question. I will certainly look into

it and see what can be done, particularly having regard to this year being the International Year of the Disabled Person.

Toxic Shock Syndrome

Mrs PADGHAM-PURICH to MINISTER for HEALTH

As there has been considerable publicity recently about the subject of the toxic shock syndrome and its possible effect on women who use tampons, will the minister give his assurance that the matter will be investigated and that any necessary action will be taken to reduce the possibility of the syndrome being a danger to women in the Northern Territory?

ANSWER

I understand the issue of the toxic shock syndrome was raised formally with the state governments by the National Health and Medical Research Council as far back as November in a press release that accompanied correspondence. I have a copy of the press release for all members of the Assembly. I believe the issue is getting out of proportion and that there is a need for people to understand the issues. I must confess that I am not terribly well informed on the matter and I rely on organisations such as the National Health and Medical Research Council to give advice to me. This government will cooperate wherever possible with the council in its investigations. It is not our role to investigate it, but it is our role to provide information to the council to enable it to come to conclusions. I would ask that this particular press release be circulated to members of the Assembly. It will clarify in their minds any problems they may have.

East West Airlines

Mr LEO to CHIEF MINISTER

Did the government receive from East West Airlines in May 1980 details of that company's borrowing capacity, including current East West's borrowing capacity, borrowing requirements for operations outside the Territory, equity levels to support borrowing and capacity to support borrowing by the NT airlines? If so, why was this information not made available to the merchant banker, Hill Samuel?

ANSWER

I cannot recall having received any such communication from East West Airlines but that does not mean that the government did not receive it. It could have been sent to the Department of Transport and Works, the Department of Law or indeed to my own department. I can check that out. I think this is more properly a question that the honourable member should place on notice. Indeed, I look forward to hearing from the honourable member as to whether he wants the Ansett jets taken away from Nhulunbuy to be replaced by TAA Fokker Friendships as soon as he would like to tell me.

Leave of Absence Legislation

Mr HARRIS to CHIEF MINISTER

Yesterday, the Chief Minister indicated that legislation would be introduced on leave of absence. Is he able to indicate what form that legislation will take?

ANSWER

Mr Speaker, I have looked into this matter further. It was raised yesterday by the honourable member for Nhulunbuy who asked me whether the government

was proposing to introduce legislation. My answer then was somewhat conditional because I could not recall with any certainty whether Cabinet had approved legislation. I now understand that legislation should be introduced in the next sittings or the sittings after that. The legislation will take the form of 3 separate bills.

Child Welfare Bill

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

When will the Child Welfare Bill, which has been under preparation for some time, be introduced into the Assembly?

ANSWER

I cannot give the honourable member a specific date. The department is putting a great deal of effort into the Child Welfare Bill. The bill is complex and sensitive and is being discussed by various people within the government. I believe the department is also consulting with people outside government on the subject. I will be putting the matter before Cabinet as soon as practical. There is certainly no intention whatsoever of delay in this regard by the government.

NTEC Report on Power-station

Mr B. COLLINS to MINISTER for MINES and ENERGY

Is it true, as reported recently in the popular press, that a recent report received by the minister from NTEC recommending options for the Darwin power-station states that a nuclear power-station for Darwin is not a viable economic option at this time?

ANSWER

The matter that the honourable member raises is a part of a paper that is before Cabinet. I would not care to comment on it until after it has been disposed of by Cabinet.

Breathalyser Blood Alcohol Levels

Mrs PADGHAM-PURICH to CHIEF MINISTER

Is it the intention of the government to reduce the allowable level of alcohol in the blood of a driver of a motor vehicle from just under 0.08 to just under 0.05?

ANSWER

Mr Speaker, the government has not considered the matter of reducing the arbitrary level set in the traffic legislation relating to breathalysers. As far as I know, the police have not considered it. To the best of my knowledge, the Department of Law and the Department of Health have not looked at the matter either. No decision has been made. Certainly, at this stage, no initiative is in the mind of the government in relation to this matter. I would not like to give any final answer at this time which might preclude a decision later. I believe that steps have only been taken recently to reduce the level from 0.08 to 0.05 in other states. I think that we should watch the effects elsewhere before we make any moves here in the Territory if indeed we do make moves.

Draft Criminal Code

Mr ISAACS to CHIEF MINISTER

Is it still the government's intention to introduce the draft criminal code during these sittings?

ANSWER

I believe the Leader of the Opposition has misconstrued my earlier remarks. I am quite sure that I said last year that I proposed to table at this sittings for discussion a substantial portion of the draft criminal code and I propose to do that. I believe that there is need for considerable public discussion which will assist the government in putting together a bill for presentation to the Assembly in due course. Because of the importance of the legislation to everyone in the community, we should take this course rather than introduce a bill at the outset.

Back-to-Back Guarantee to East West Airlines

Mr ISAACS to MINISTER for TRANSPORT and WORKS

In view of the government's insistence that the guarantee to East West Airlines was always intended to be of a back-to-back nature, why was such provision not made clear in either the Memorandum of Understanding or the deed and what documented evidence can the government produce to support its claim that a guarantee must be back to back?

ANSWER

I ask the member to place the question on notice.

Shortwave Radio Service to the Outback

Mr VALE to CHIEF MINISTER

My question is asked on behalf of the honourable member for Elsey. Can he advise what action is being taken to provide outback Territorians with a shortwave radio service comprising national and local news, weather forecasts and general information?

ANSWER

Mr Speaker, I am sure you would rule that the purview of this question is beyond the competence of this Assembly and certainly it is well beyond my jurisdiction as Chief Minister. But to provide you with information that is well-known publicly, I think I should refer my questioner to the columns of the local press of the last few months from which I understand reconstruction of the shortwave transmitter at Cox Peninsula is well under way. I believe that that service is expected to be beamed to Territorians as well as to people overseas.

Allegations of Breaches by Charter Operators

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

Was he informed by the Deputy Secretary of his department of the receipt of letters from Northern Airlines alleging breaches of RPT routes by charter operators, letters dated 23 and 30 September, 8 and 27 October, 21 November and 3 December?

ANSWER

I ask the member to place the question on notice.

Horses as Travelling Stock on Roads

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION and TOURISM

If horses are considered as stock for the purposes of travelling stock on roads and if permits are necessary for travel of stock on the roads, can the minister assure me that these provisions are adequately policed by the inspectors under the act?

ANSWER

For the purpose of the act, horses are considered as stock. In general, vehicles are supposed to carry permits for the movement of horses. There is an exemption in the regulations that provides that horses may travel to local shows, race meetings and things of that nature without permits. The whole permit system needs to be reviewed. We have had many complaints about the permit system. Over the last couple of years, people have made allegations

that stock have been stolen etc. It is very difficult to police all the movements of stock but we are certainly looking at alternatives to the existing system.

Guarantees to East West Airlines

Mr ISAACS to MINISTER for TRANSPORT and WORKS

Did the government advise East West Airlines in September of last year that the company's request for guarantees on behalf of Northern Airlines had been approved in principle subject only to documentation?

ANSWER

I ask the member to place the question on notice.

Future Use of the Old Darwin Hospital

Mr HARRIS to MINISTER for HEALTH

A recent media report highlighted the apparent inability of the government to make a decision on the future use of the old Darwin Hospital as a private hospital. In view of this, could he advise the present situation concerning the proposal for a private hospital for Darwin and give some indication as to when a decision will be announced?

ANSWER

Members will recall that the government decided last year to call tenders for the use of Darwin Hospital as a private facility. It also arranged for some of the facilities at the old Darwin Hospital, such as the accommodation units, to be put to use for the general benefit of the community. Tender documents were drawn up and ultimately placed in the press. The tenders were received and the applicant who is currently applying for the use of the hospital will have his application considered in the next few weeks. Some interesting developments have occurred in the interim period. Firstly, members will be aware of the Jamison Report and the subsequent recommendations by Jamison concerning funding of hospitals and health services right throughout Australia. The recommendations, in some cases, are very broad and ambiguous. All governments are waiting to see what the Commonwealth will do in this regard. The Jamison Report has had the effect of discouraging people from putting in tenders for the old Darwin Hospital. There is uncertainty about how hospitals will be funded in the 1980s and whether there will be a continuation of the Commonwealth-state, cost-sharing arrangements that have existed for some 7 years. That point is important: we did not get a tremendous response.

Another point is that we are still not sure what the Commonwealth will do in relation to its funding of hospitals in the Northern Territory. Our government has taken a stance of advising the Commonwealth what it feels is reasonable. If the Commonwealth goes to a block-funding arrangement, there would be a very real need to open the old Darwin Hospital as a private hospital if that were possible. It would take the pressure off the exchequer for maintaining hospital beds, and every little helps.

The other thing that will come from the block funding is that there will also be a determination by the government to save as much money as it can in the block-funding vote if that is possible. Another consideration is that, if we maintain the cost-sharing arrangement that we have at the moment with the Commonwealth for hospital beds, it could well be that it would not be in the government's interests to have a private hospital. The Commonwealth could well say, 'If we are cost-sharing all your beds and you open another unit of hospital accommodation, you will affect the economics of the cost-sharing of the hospitals as they already exist and we will take account of that when we are making our cost-sharing arrangements'.

The issue of the private hospital for Darwin is not a dead one at all; it is very much alive and kicking and it will be very dependent upon the attitudes and the formulae that are developed in the next few months by the Commonwealth and the states for future hospital funding throughout Australia as a whole. In the second week of March, there will be a 3-day meeting in Perth of all state and federal ministers relating to cost-sharing and future funding of hospitals. Two days of this have been set aside purely for the bunfight of how it will happen. There is a great deal of disturbance among the states about the Commonwealth's approach and we feel that, whatever happens, there must be an equitable arrangement if there is to be a change. I can assure the honourable member that we will be looking for our share of the cake.

East West Airlines

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

Apart from the back-to-back feature of the Northern Territory government's offer, what other conditions of the guarantee offered by the government to East West Airlines did the company find unsatisfactory?

ANSWER

I ask the honourable member to place the question on notice.

Holcroft Report on Air Fares

Mr D.W. COLLINS to CHIEF MINISTER

The Holcroft Report on domestic air fares has now been released and has stirred up considerable comment. It apparently recommends a new fare setting arrangement which would mean lower air fares for travellers on the long distance routes in Australia. This sounds like good news for Territorians. Can the Chief Minister give any indication of what these recommendations would mean to the cost of air fares from the Territory to southern capital cities and will the Territory government be taking any action to press the federal government to accept the recommendations?

ANSWER

The honourable member for Alice Springs has asked a very interesting question. You will recall that the Northern Territory government put quite a substantial submission to the Holcraft committee of inquiry on the question of air fares and, in the submission, a copy of which I tabled only the other day with other documents, the Northern Territory government continued its attack on the 2-airline policy. From this side of the Assembly, Mr Speaker, the government has requested both CLP federal representatives to oppose in Canberra the prolongation of the 2-airline agreement. I think that I should pay tribute to the work of the officers who prepared the Northern Territory submission which I was complimented on by the committee of inquiry. I should place it on the public record that the officers of the Department of Transport and Works and of the Policy and Planning Unit of the Chief Minister's Department, who put together this submission, did a fine job. The committee regarded it as the best submission it received from any source.

The member's question raises some other interesting points. We have been telling the federal government for a very long time that Territorians were being ripped off by the air fare system. Our submission to the Holcroft inquiry went into the matter in great detail and we urged the inquiry to look closely at the fares charged on the long distance routes in Australia. We argued that the fares out of the Territory to southern capitals were far too high and that Territorians were subsidising travellers in the southern parts of this country.

The results of this inquiry have proved that we were right. I understand that the report indicates that, over the course of the year, Darwin-Sydney and Darwin-Melbourne passengers pay a total of $2.5m more than they should. Territory travellers are subsidising people on Sydney-Canberra and Sydney-Melbourne routes. Imagine that: we are subsidising the fat cats to fly in and out of Canberra. Sydney-Canberra passengers are receiving a subsidy of $8.8m a year under the present air fare system. Sydney-Melbourne passengers are receiving $11m. This is the proof of what we have been arguing for so long. I believe that it is monstrously unfair that the federal government allows this to continue and it must make drastic changes to the air fare system along the lines recommended by the Holcroft Report. On the figures provided in the report, travellers from Darwin to Sydney or Melbourne could expect a reduction in the economy fare of about $140 for the round trip. I would hope that we can look forward to seeing this reduction come through.

Submission from TAA

Mr LEO to MINISTER for TRANSPORT and WORKS

Did the government receive a submission from TAA outlining a possible operation to overcome the crisis facing the aviation industry? It so, on what date was that submission received and on what date did the government respond to TAA's proposal?

ANSWER

I ask the honourable member to place the question on notice.

ITC Responsibility for Apprentices' Accommodation in Brisbane

Mrs PADGHAM-PURICH to MINISTER for EDUCATION

Are officers of the Industries Training Commission responsible for obtaining suitable accommodation for Northern Territory apprentices in Brisbane when they study there in the course of their apprenticeship? If so, what checks are made on the standard of this accommodation?

ANSWER

The arrangement for apprentice accommodation across state borders is traditionally the responsibility of the governing or the regulating body in each state. In Queensland, the accommodation arrangements for apprentices within that state are set up by the Industries and Commerce Training Commission in conjunction, in this case, with ourselves. The accommodation used by Northern Territory apprentices who travel to Queensland for their training is regularly inspected by that commission. At the moment the apprentices from the Northern Territory are housed in Yungabba Hostel and a number of flats in the Kangaroo Point area. I am informed that they are well supervised and quite suitable.

Ansett Proposal for Interim Service

Mrs O'NEIL to MINISTER for TRANSPORT and WORKS

Did the government receive a written submission from Ansett Transport Industries outlining that company's proposals for an interim service and, if so, on what date was the submission received by the government?

ANSWER

I ask the honourable member to place her question on notice.

Water Pressure - Racecourse Area, Alice Springs

Mr VALE to MINISTER for TRANSPORT and WORKS

Can he advise the reason for the reduction of water pressure to residents of the old racecourse area of Alice Springs and whether any action will be taken to alleviate this problem?

ANSWER

I am not aware that there has been a drop in the water pressure in that area. However, I believe that there is a project to put another pipeline into the area and, until such time as that happens, I would ask the honourable member to advise his constituents to get in touch with the department in that area.

East West Airlines

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

When did the Northern Territory government inform East West Airlines that it would not guarantee loans required by that company and, further, which department forwarded that advice to the company?

ANSWER

I ask the honourable member to place the question on notice.

NTEC Services

Mr D.W. COLLINS to MINISTER for MINES and ENERGY

Are the NTEC services available to the people of Alice Springs any different to those provided in other Territory centres?

ANSWER

This matter was covered yesterday in an answer I gave to a question relating to a circular put out by NTEC in Alice Springs inferring that the standard of service in Alice Springs was less than elsewhere in the Territory. I would like to reiterate for the honourable member's benefit that the Alice Springs people will receive the same standard of callout services from NTEC that other centres do.

Report of Cropping Development Committee

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

When might we expect the 1979-80 report of the Cropping Development Committee, which has had nearly 8 months now, be produced?

ANSWER

I am not too sure about who 'we' are. I do not know that it is an obligation of mine to present that particular internal report to the Assembly. As a gracious gesture, being a fair-minded man, I would be quite happy to examine the report to see what implications there are in it for the government and forward a copy to the honourable member.

TV Reception in Outback

Mrs PADGHAM-PURICH to CHIEF MINISTER

What is the Chief Minister doing in his role as chief liaison minister with the federal government to ensure the people in outback areas have

adequate TV reception in view of the fact that TV is accepted as an ordinary amenity available to everyone in cities?

ANSWER

For my part, I would tip TV out of our house if I could, but I know that many people in the outback, who are not cursed with it, desire it. The government has been agitating for quite a long time and the honourable member for Tiwi is aware of many of the actions we have taken. For instance, a year or 2 ago, we brought Tony Staley, the then Minister for Post and Telecommunications, to the Territory and took him to the most God-forsaken places that we could find and turned him around blindfolded and brought him back. We did that with another minister and I suppose that we will now have to do it to Ian Sinclair as well. Probably it would be harder to convince Mr Sinclair that things are so bad out in the bush because he has been working for quite a long time to improve conditions for people who live in the bush. We know that the federal government has a program for upgrading TV in areas along the track. Recently, TV was put into Bathurst Island and it will be available in Pine Creek in August or November. The satellite in which the government is buying an interest will be providing a multi-channel TV service to remote areas by 1984.

Sale of Housing Commission Homes in Nhulunbuy

Mr LEO to MINISTER for LANDS and HOUSING

Can the minister yet say when commission housing in Nhulunbuy will be available for sale to interested tenants?

ANSWER

The answer is no. I very much regret having to give that answer. I have recently had discussions with members of Nalbalco as to how they see the problem. We all know what it is: land tenure. The problem at this stage is not insurmountable but very close to it. To try to come up with a system of mortgage over a house which no one has any guarantee of owning beyond the year 2014 is an extremely nebulous task to say the least. We really do not know how to cope with the problem at all. I am afraid that the people of Nhulunbuy are stuck with the nature of the arrangements that gave birth to that town and there is very little that this government can do about it. It is tied up with agreements between the Commonwealth and the company, and between the Commonwealth, the company and the Aboriginal traditional owners of the area. The Northern Territory per se does not own the dirt and, therefore, is in no position to provide security of tenure to people who make what is probably the biggest investment that any of us normally make: a home purchase. The government is still concerned to find a solution to this problem but I am afraid we are not really getting very close.

Lights in Bus Shelters

Mr HARRIS to MINISTER for TRANSPORT and WORKS

Are lights in bus shelters checked on a regular basis to see whether they are working or does the department wait for someone to report they are out of order before action is taken?

ANSWER

Inspectors regularly check the bus shelters and report any damage to the maintenance department for repair. We have a period contractor who keeps an eye on the traffic lights and he repairs those where needed.

Introduction of Bill Relating to Rape

Mr ISAACS to CHIEF MINISTER

Is it his intention to introduce a bill relating to the crime of rape during this sittings?

ANSWER

This question follows on from his question the other day regarding the criminal code. That is what it is: a code. We hope that it will embody as much of the criminal law as possible in one document. For simplicity, the bulk of it will be available in one place in this code and that includes the offence of rape which, in fact, is proposed to be abolished. The provisions of different degrees of assault will be introduced based on the Iowa or the Michigan Criminal Code of the United States. I would propose that this code be tabled as a draft for consideration at this stage because it is a very important matter; it is a very complex matter. I think that we should hasten a little bit slowly. We can debate it as a draft at the next sittings and then come back with the final bill later in the year.

Responsibility for Additional Street Lighting

Mr HARRIS to MINISTER for MINES and ENERGY

Is the installation of additional street lighting the responsibility of the Corporation of the City of Darwin or the Northern Territory government?

ANSWER

The responsibility for street lighting belongs to the corporation. The government has the responsibility for lighting on major highways and that work is carried out by NTEC. The corporation has a responsability for all the other street lighting in Darwin. It is its responsibility because it pays for it. As I understand the situation, NTEC does the design work, has it approved by the corporation and then carries out the work when the corporation provides the funding.

Fannie Bay Gaol

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

Will he advise on progress and development of the Fannie Bay Gaol as an historical tourist facility?

ANSWER

As a result of overcrowded jails, the government may even contemplate opening it again. I would hope that it does not come to that. The government commissioned, through the National Trust (Northern Territory Division), a report on the future of the Fannie Bay Gaol, on exactly what was there, its historical significance, a proposal for management in the future and by whom and for what purpose. I have not received the report as yet. I understand the National Trust has largely completed the report and exhibited some of the proposals in Lyons Cottage. However, the report has not been forwarded to me as yet. The government is anxious to resolve the future of the Fannie Bay Gaol because it is obviously not much good to anyone at the moment. It is in all our interests to decide its future.

One of the controversial decisions that will have to be made when the report is tabled is on the future of the fence around Fannie Bay Goal. Some experts claim that it should go so that people can see and have reasonable access to the buildings inside which are the areas of particular interest. Other people claim the fence should stay as a barrier, entry through which will be allowed on the

payment of a charge. This follows the assumption that the prison will have to return some money from tourists. One argument is that the fence is one of the ugliest sights in Darwin. The government will be faced with that decision shortly.

Government Approach to TAA

Mr DOOLAN to MINISTER for TRANSPORT and WORKS

When did the government first approach TAA regarding the possibility of that company providing an interim service following the closure of Northern Airlines?

ANSWER

I ask the member to place the question on notice.

Licences for Hunting Ducks and Geese

Mrs PADGHAM-PURICH to CHIEF MINISTER

Is it the intention of the Northern Territory government to introduce licensing procedures in season for duck and geese shooters?

ANSWER

No.

Detoxification Unit at Darwin Hospital

Mrs O'NEIL to MINISTER for HEALTH

Is it still intended to open the detoxification unit at Darwin Hospital for 24 hours a day from tomorrow and, if so, where will the 8 nursing staff required be drawn from?

ANSWER

I indicated yesterday that I will be taking this matter up with the department. I am having a meeting tomorrow morning. If it is planned to open it tomorrow, then I am sure that the department has catered for it. If there is any need for the department to vary its approach, I am sure it will be able to do that.

Report to Assembly on Overseas Trip

Ms D'ROZARIO to MINISTER for PRIMARY PRODUCTION and TOURISM

In view of his fair-mindedness, does he propose to report to this Assembly on his recent overseas trip for the purpose of garnering tourists for the Northern Territory?

ANSWER

I would probably make the distinction between being fair-minded and a little boastful. The answer is yes.

Lack of a Surgeon in Nhulunbuy

Mr LEO to MINISTER for HEALTH

Is he aware that there is no surgeon in the town of Nhulunbuy?

ANSWER

No.

Bituminising of Access Road at Berrimah

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

In view of the fact that the Minister for Lands and Housing told me that the eastern end of section 110 in Berrimah is planned for a cemetery and as it is the usual practice to bituminise access roads to these places, when is it planned to bituminise these roads in the Berrimah area?

ANSWER

Mr Speaker, I believe that the cemetery out in the Berrimah area is a part of a long-term plan. To my knowledge, there has been no design for roads in that area. However, I will endeavour to provide the information to the honourable member at a later date.

Issue of Pensioner Card by Minister

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

Will the minister confirm that he personally authorised the issue of an NT pensioner concession card to a person not eligible under that scheme approved by Cabinet?

ANSWER

There was an application to me from the department relating to a person in particular circumstances which did not fit quite within the guidelines of the government's pensioner concession scheme. If my recollection serves me correctly, I decided to admit that person and allow him to have a pensioner concession card. The situation has only happened once. Obviously, such applications should be able to be presented to me from time to time and be judged on their merits.

Sales Tax Component on Freight

Mr ISAACS to TREASURER

When does he expect to implement the scheme, announced during the last Territory election campaign, to provide a rebate on the sales tax component on freight?

ANSWER

The government's initiative in providing a rebate on the freight component of sales taxes levied by the federal government is already in operation. There have only been a few payments made to date. The scheme is in an evolutionary phase. There have been announcements in the press and advertisements calling for the registration of interests by persons in the Northern Territory who import goods and indeed pay sales tax on freight. The scheme is being administered by the Treasury and it is working fairly well. Payments have already been made under the scheme and, as small problems are ironed out, we expect that it will operate on a much faster and more efficient basis than at present.

Coastal Plains Research Station

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION

What are the current plans of the government for the Coastal Plains Research Station?

ANSWER

Because of the serious pasture degeneration on the station, a complete pasture re-establishment program will be undertaken over the next 5 years. Some private companies have shown interest in using some of the area in conjunction with the department. However, following inspection, these proposals were not followed up by the companies. The long-term future of the station still lies in pasture and buffalo research, horticultural experiments and, possibly, prospects for rice research.

Carpentaria College

Mrs LAWRIE to MINISTER for LANDS and HOUSING

Can he advise on the present status and future development of Carpentaria College?

ANSWER

I understand that the Greek Orthodox community, which has been made a conditional offer by the government, has put to the Darwin Planning Authority a development proposal. The future of the land is totally dependent upon the acceptance of the development proposal by the authority and whether that approval by the authority is acceptable to the government.

Jabiru Hospital

Mrs PADGHAM-PURICH to MINISTER for HEALTH

When the new Jabiru Hospital is opened later this year, how many beds will there be and what medical, nursing and administrative staff will be employed? Will new positions be created or will staff be redeployed from other sections within the Health Department?

ANSWER

Tenders for the construction of a hospital will be called in April. Initially, it will be an 8-bed hospital. It will have a health staff of some 41 personnel. There are currently 4 people at Jabiru providing services to the community and, when the hospital is built, this number will be expanded to accommodate the need. There is a planned figure of 41 and a final determination will be made closer to the opening date. So far as financing and the creation of the positions is concerned, I understand that we have an arrangement with the Commonwealth for the provision of services in this area and we have to negotiate with the Commonwealth in relation to staff and salary from existing personnel to man the project. These will be additional staff.

Sale of Housing Commission Homes in Nhulunbuy

Mr LEO to MINISTER for LANDS and HOUSING

After a weekend of consideration and deliberation, does he yet know when Housing Commission houses in Nhulunbuy will be available for sale to interested tenants?

ANSWER

Mr Speaker, it would seem that the honourable gentleman listens to the program After Eight. I recall that Mr Pretty, the correspondent from Nhulunbuy for that program, gave some gratuitous advice to the government this morning. If the gentleman reflects the view of Nhulunbuy people, we have no problem. He outlined quite well the difficulties as the government sees them. He made the same mistake as I in that the date on which the current agreement expires is 2011 not 2014.

Cabinet has addressed itself to this problem. I still believe there are difficulties with it. The best way to find out just how people feel is to give it a try. Cabinet has decided to approve the introduction of a Northern Territory Public Service Staff Homes Sales Scheme to Nhulunbuy with repayment of loans over a period less than the remaining time of the special purpose lease. We need somehow to arrive at a yardstick to determine the price of public sector homes in that community, having regard to the lack of security of tenure beyond the year 2011. I have indicated in this place that I believe those difficulties will be overcome and that long-term security of tenure will be achieved. I am quite sure that the Aboriginal traditional owners of that area will not insist on resuming ownership of the land and thereby the houses at the expiry of that agreement if there is another purpose of the town of Nhulunbuy to continue at that time and, please God, there will be. The government has approved the Housing Commission proceeding to offer at public auction, three 3-bedroom homes for general public housing, the resulting sale prices to form the basis of assessing future sale prices in the town. Once we offer those homes on auction, thereupon we will find out just how the people feel about buying homes, having regard to the rule quicquid plantatur solo, solo credit, what is attached to the land belongs to the land. We will continue negotiations with Nabalco for further releases of land for the purpose of public housing should the public indicate that that is what it wants.

Carpentaria College

Mrs LAWRIE to MINISTER for LANDS and HOUSING

Would he indicate during this sittings if and when the development plan for the Carpentaria College site will be put on public display for public comment? There is intense community concern and interest in this matter.

ANSWER

I will speak to the Chairman of the Planning Authority on that matter.

Electricity Reticulation to Donkey Camp

Mr D.W. COLLINS to MINISTER for MINES and ENERGY

This question is on behalf of the member for Elsey. Will electricity to be reticulated to the new water supply at Donkey Camp near Katherine be extended to cater for consumers in future subdivisions on the Gorge Road and to Katherine Gorge?

ANSWER

The short answer is yes. Members might be pleased to know that the provision of power to Donkey Camp for the reticulation of water for the town of Katherine is currently under way. NTEC is also negotiating with the Conservation Commission for the powerline to be extended to the gorge so that there is reticulated power to the gorge. I might add that, when this comes about, there will be a very large saving in oil costs to the government as the electricity at the gorge is currently generated by separate generators to the Katherine supply.

Dollar-for-Dollar Subsidy Scheme

Mrs O'NEIL to MINISTER for EDUCATION

Will he confirm that the dollar-for-dollar subsidy scheme for schools announced last year has in fact been changed to a 50¢ in the dollar scheme; that is, school councils will receive 50¢ for each dollar raised?

ANSWER

The member's assertion is absolutely untrue.

Damming of Katherine River

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

Has he received a consultant's report on the damming of Katherine River and, if so, will he submit that report to this Assembly?

ANSWER

To date, I have not received a consultant's report regarding the damming of the Katherine River. When I have, I will make a decision at that time on whether I will release it to the Assembly or not.

Reconstruction of Old Naval Headquarters on the Esplanade

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

The old naval headquarters situated on the Esplanade is still in a state of ruin. Can he inform me when work will begin on the reconstruction of this building?

ANSWER

The old naval headquarters is to be used as a reception area and office for the Administrator of the Northern Territory. Indeed, the new Administrator endorsed the proposal. The government has been unsuccessful with a couple of advertisements in trying to attract a suitable builder to undertake reconstruction of the old naval headquarters. Members will be aware that some expertise is required to reconstruct that building out of the remnants. As a result of

not being able to attract a suitable builder, the government has decided to proceed with the project on a project management basis. Hopefully, the building should be completed by December this year.

Rates in Berrimah Area

Mrs PADGHAM-PURICH to MINISTER for COMMUNITY DEVELOPMENT

Under what legislation are rates in the Berrimah rural area declared and levied and by whom, and what criteria are adopted to arrive at a figure for this rate?

ANSWER

The rates in the area just outside the municipal boundaries of Darwin are declared under the Darwin Rates Act. The act covers that area within the boundaries of the 1945 acquisition in Darwin, excluding the boundaries of the municipality of Darwin. The authority for declaring the rates is myself, as minister, and the basis for the rates, as has been determined to date, is to equate the rates with those charged by the municipality of Darwin. I think that answers the question. I do appreciate that there is concern for the level of services in the area, having regard to the level of rates that has been determined, and I have undertaken to have a look at the matter again and perhaps to review the decision.

Reference Library in Cavenagh Street

Mr B. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

Is it the intention of the government to continue to maintain the state reference library in Cavenagh Street and, if so, when will it be properly staffed so that its $0.5m worth of books can be properly utilised?

ANSWER

It is certainly the government's intention to continue to staff the embryo state reference library in Cavenagh Street. Normally one would not classify oneself as having a state reference library until one had something like 200,000 books on the shelves to make it a facility that could accommodate a broad spectrum of inquiry. However, in assembling 200,000 volumes over a period of some years and having regard to the library services in the Territory of which we have some very fine ones, it has been decided that we should open the facility even though it only has 25,000 volumes in it and allow at least some minimal activity and reference work to be undertaken. It would be foolish of us to openly promote it as a fully-fledged state reference library because it simply is not one. As a result, there are 2 staff at the present time who assist people who come to the embryo state reference library. A full library, when we have 200,000 volumes, will have a staff of at least 6 people. It will build up to that over a period of years. If anything, the government should be commended for opening such a facility at all rather than leaving it there until such time as we build up a sufficient stock. I think that criticism levelled at the government for having this facility hidden away from the public was quite unwarranted.

Arts Advisory Council

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

When will the minister announce the appointment of members to the Arts Advisory Council?

ANSWER

I propose to make an announcement in relation to the Arts Advisory Council during these sittings.

23100.814-25

Nhulunbuy Library

Mr LEO TO MINISTER for COMMUNITY DEVELOPMENT

Which department will have authority over Nhulunbuy's new community library?

ANSWER

The Northern Territory Library Service will have authority over the library at Nhulunbuy. The library is being included in the new Nhulunbuy High School as part of a new government concept to maintain maximum utilisation of public facilities. The library was certainly stocked by the Northern Territory Library Service. It is also possible that there may be an arrangement with the Department of Education for teachers to provide some of the library staff.

Dollar-for-Dollar Subsidy Scheme

Mr HARRIS to MINISTER for EDUCATION

Is the dollar-for-dollar subsidy scheme to schools operating successfully?

ANSWER

Mr Speaker, 13 schools in the northern directorate have successfully applied for assistance under the dollar-for-dollar subsidy scheme. I am not sure how many schools in the southern directorate have applied successfully. There are a number in the pipeline at the moment. I suppose 'successful' is the wrong word. If they raise the money legitimately, they are automatically entitled to the dollar-for-dollar subsidy scheme. It is not a matter of being successful or otherwise. Total grants to date are $45,897 which is comprised of $32,285 in the northern directorate and $13,612 in the southern directorate. To answer the question specifically, the scheme is working very well.

Marketing of Shark

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

What departmental infrastructure is being undertaken in readiness for potential interstate marketing of shark if, as is believed, shark fishing proves a viable fishing proposition for the Northern Territory?

ANSWER

The question of marketing shark interstate does not solely relate to infrastructure. It certainly relates to other technical processes. The program that was undertaken a bit earlier on will be fully analysed by the middle of the year to ascertain the mercury content to see whether we can market the product. At that time, I guess there will be suitable infrastructure for the marketing of shark.

Single-Officer Accommodation in Gap Road

Mr D.W. COLLINS to MINISTER for LANDS and HOUSING

When will construction of the proposed single-officer accommodation in Gap Road, Alice Springs, be started?

ANSWER

As soon as there is a successful tender.

Budget Cuts by Department of Education

Mr B. COLLINS to MINISTER for EDUCATION

Is it true that the Department of Education has instituted across-the-board budget cuts of $140,000 a month and, if so, why?

ANSWER

The answer to the first part of the question, to the best of my knowledge, is no and, therefore, the second part is not applicable.

Department of Transport and Works Contractors

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

What mechanisms have recently been devised within the Department of Transport and Works by which the management can be informed of the performance of contractors?

ANSWER

I am unable to provide the member with that information. However, I will give an undertaking to provide her with that information during these sittings.

Langton Road, Howard Springs

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

Is he aware that damage has recently occurred in Langton Road in the Howard Springs area which is preventing a local resident access to her driveway? Would he indicate whether his department is rectifying the situation?

ANSWER

I am aware that a large haulage truck was bogged in Langton Road a couple of weeks ago and a particular resident's driveway has been made inaccessible. The department has only just found out about it and will be making attempts to repair the road in that area. At the same time, if possible, it will repair the lady's driveway.

Ports in NT

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

Can he advise if a section of his department has been established to control and manage ports other than the Port of Darwin subsequent upon the passing of the bill before the Assembly and, if so, what level of expertise exists within that section?

ANSWER

The short answer is no.

Cryptostegia Grandiflora and Calitropis Procera

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

Could he provide the Assembly with details of the proposed plantations of cryptostegia grandiflora and calitropis procera that received some publicity recently?

ANSWER

I do not have the information in front of me at this stage. Certainly, we are very interested in this embryo suggestion by the company Bio-Energy. I will let him have the information during these sittings.

Fishing Incentives

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

What plans does he have to ensure that incentives for fishing in northern waters benefits Darwin and the Northern Territory rather than southern interests?

ANSWER

Every opportunity is being given to fishermen to diversify away from traditional fishing such as barramundi fishing. That is the reason for the projects that have been undertaken by the government in relation to mackerel fishing and shark fishing. I believe that it is a reasonable incentive in the short term to try to divert some of the fishing efforts in that direction.

Alice Springs Bus Service

Mr D.W. COLLINS to MINISTER for TRANSPORT and WORKS

Will he undertake to resurvey the people of Alice Springs on the need for a town bus service in the near future? If so, will he undertake to seek advice from interested local Assembly members on the methods of the survey?

ANSWER

The last survey on the need for a bus service in the Alice Springs area was carried out by the Australian Bureau of Statistics. Apparently, the timing of the survey was not a good one. I give the honourable member an undertaking that I will review the matter and, if another survey is to be carried out shortly, I will try to involve members of the Assembly as much as possible in that survey.

Vesteys Beach Marina

Mrs O'NEIL to MINISTER for TRANSPORT and WORKS

Will he give an undertaking that public comment will be obtained, particularly from nearby residents, before the proposals of the Vesteys Beach marina study are implemented?

ANSWER

I understand the model will be placed on display. After a couple of weeks, I intend to attempt to obtain Cabinet approval at least to put the application for a marina on display. I believe that members of the public will be invited to make comment on the proposal.

Appeals against Disciplinary Actions in CTS

Mr D.W. COLLINS to MINISTER for EDUCATION

How many disciplinary actions in the Commonwealth Teaching Service relating to Territory-based officers have been heard by Appeals Boards since the inception of the CTS in 1974?

ANSWER

Mr Speaker, 2.

Collia Tin Mine

Mr B. COLLINS to MINSTER for MINES and ENERGY

Could he advise the Assembly if there has been a satisfactory resolution of the dispute over the ownership and operation of the Collia Tin Mine and, if so, what was it?

ANSWER

I think it might be prudent if I take that question on notice and provide the member with an answer in writing. There have been some recent developments about which I wrote to the Leader of the Opposition in the last fortnight. I do not know if any further action has taken place that would enlighten the member but I will find out and let him know in a letter.

Telecom Services to Rural Area

Mrs PADGHAM-PURICH to CHIEF MINISTER

What is he doing in his role as chief liaison minister with the federal government to ensure that Telecom make available adequate services to private people and small businesses in the rural area as I understand that somebody put in an application to have a telephone installed in 1974 and he is still waiting?

ANSWER

The Northern Territory government maintains continual pressure on the federal government for the upgrading of communications, including telephone services in the Northern Territory. I am extremely disappointed to hear that someone in the rural area has been waiting since before the cyclone for the connection of a telephone service. If the member will let me have details of the matter in writing, I will certainly undertake to take the matter up with the federal Minister for Communications.

Attendance at Kormilda College by Former Dhupuma College Students

Mr LEO to MINISTER for EDUCATION

Does he have any idea of the number of children attending Kormila College who would have formerly attended Dhupuma College?

ANSWER

I could probably find the information. I will certainly be happy to provide it to him at a later date.

Scoliosis Problem with Schoolchildren

Mr B. COLLINS to MINISTER for EDUCATION

Is he aware of the recent publicity given to the problem of schoolchildren regularly carrying handheld school cases and suffering the spinal problem known as scoliosis? As the publicity is supported by the AMA could he investigate this and, if true, warn schools of the danger?

ANSWER

I thank the member for the question. I undertake to take this matter up with my colleague, the Minister for Health, and have the matter properly investigated.

Former Community Health Clinic in Peel Street

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

When will the decision as to the use of the former Community Health Clinic in Peel Street be announced?

ANSWER

I cannot answer the question and I am not sure that the allocation of such a building is within the realm of my responsibility. I think that most government assets that are vacated normally are the province of the Department of Transport and Works to reallocate.

Hybrid Solar-Generating Unit from WA

Mr B. COLLINS to MINISTER for MINES and ENERGY

Could he advise the Assembly where the hybrid solar-generating unit from Western Australia is at the moment and how it is being used? Could he also provide the Assembly with some details of the solar ponds project at Alice Springs which is being conducted by Australia Solar Ponds Pty Ltd?

ANSWER

In all fairness, these are questions that I think the member could either give me a little more notice of or perhaps ask me on notice. On this occasion, I would ask him to place it on notice.

Former Community Health Clinic in Peel Street

Mrs O'NEIL to MINISTER for TRANSPORT and WORKS

I redirect my question to the Minister for Transport and Works. When will the decision as to the future use of the former Community Health Clinic in Peel Street be announced?

ANSWER

I am unable to answer the question fully. At the moment, the Corporation of the City of Darwin has a proposal to erect a carpark and other accommodation on adjoining blocks and the application to the Department of Transport and Works includes the development of the Peel Street Clinic. The council has indicated that, if it was successful in obtaining that land, it would make sure that facilities were available for a creche or other particular amenities that the public might require. Its particular application is under consideration at the moment and, until such time as negotiations have been carried out, I am unable to provide the member with that answer.

Adoption of Children in NT

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

The Association of Adoptive Parents for the Territory has been active in lobbying members of this Assembly. Is he considering introducing amendments to the Adoption of Children Act to enable the establishment of private agencies which will be able to arrange and facilitate adoptions?

ANSWER

The question of inter-country adoption is quite topical at the present time - which is commendable - as a result of the activities of a number of people who formed an association and are pressing the point that governments all over Australia should be better equipped to handle applications for inter-country

adoptions. The Department of Community Development is looking into the question fairly closely. Next week, I will be discussing the subject with South Australian officials - and South Australia is regarded as the foremost state in Australia on the question of inter-country adoptions - to determine exactly the procedures and learn of the trials and tribulations and mistakes they may have made. At present, I cannot confirm that legislative changes are necessary to establish private adoption agencies in the Territory. However, if this is seen to be a course of action that is required, the government would certainly have no objection at all and would move to facilitate that situation. We have the matter under review at present and will take the action necessary to ensure that inter-country adoptions can be arranged by people within the Territory.

Demountables from Darwin Hospital

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

Following the allocation of demountables from the old Darwin Hospital site, can he indicate when it is likely that these demountables will be moved from the site?

ANSWER

The organisations that have been allocated these demountables have not moved them because of the heavy rains. The walkway has been given to the Handicapped Persons Association and, until this is removed, the other organisations cannot take the demountables away. However, I will follow this matter up. I know that they must be moved pretty soon.

Private Hospital for Darwin

Mr B. COLLINS to MINISTER for HEALTH

Is it true, as was claimed recently, that the minister failed to acknowledge Mr Pellerman's submission on the establishment of a private hospital in Darwin?

ANSWER

The submission by Mr Pellerman was lodged under another name with the department and subsequently placed before the Tender Board. I will have to investigate the sequence of correspondence relating to that particular lodgement and acknowledgement. Until the matter has been disposed of, there will be probably very little correspondence over the issue.

Demountables from Darwin Hospital

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

Is he aware that the demountables cannot be moved until the walkway is moved and the walkway cannot be moved because it is attached to the fire alarm system? Every time an attempt is made to move it, the alarms go off. Would he undertake to see that these small things are rectified so that the whole matter can be rationalised?

ANSWER

Mr Speaker, I will give the honourable member that undertaking. Next week, I will certainly be pushing to ensure that work is started on removing those demountables.

Taxis for Handicapped Children

Mr B. COLLINS to MINISTER for EDUCATION

What is the government's position on the use of taxis for transporting handicapped children?

ANSWER

Mr Speaker, I will seek the information for the honourable member.

Government Printing Office Assets Register

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

Has the compilation of a register of all the assets of the Government Printing Office been completed?

ANSWER

I ask the honourable member to place that question on notice.

BA Degree at Darwin Community College

Mr B. COLLINS to MINISTER for EDUCATION

Could the minister provide the Assembly with some authoritative details of the problems relating to the accreditation of the BA degree of the Darwin Community College? Is it true, as the students have claimed, that the accreditation was not granted to the college because of the impending Northern Territory university?

ANSWER

Mr Speaker, I certainly attach absolutely no credence whatsoever to the story that accreditation was denied because of the impending university. The panel set up by the Territory's accreditation committee is an independent body; it has its own mind and I certainly cannot speak for that. I would be extremely annoyed if such consideration ever entered into the thinking of an accreditation committee. Its task is to assess the ability of an institution other than the university to run degree level courses. I would have assumed, and I still assume, that that is the sole criterion upon which the judgment was made.

The contents of the report would be known to the member who asked the question. They were based principally upon the breadth and depth of the course. The committee indicated that it was not satisfied with the vocational strength of the course rather than any dissatisfaction with the academic strength of the course. I think that in the philosophy aspects of the BA course, there was considerable satisfaction. However, it occurred to the independent committee that I have just referred to that there ought to be a very strong vocational stream included. The other references were to the number of lecturers and the standard and experience of those lecturers. No disparaging comments were made in respect to the ability of the lecturers. I do not think it was being critical of the standard of lecturers in the advanced sector of the Darwin Community College, only the experience in conducting BA-type courses.

If the member wishes, I could make a statement on that matter, but that would probably muddy the water more than it would achieve anything. For my part, I am very anxious to see a Bachelor of Arts course commence at the Darwin Community College. That has nothing to do with the imminent university. The course can be transferred. I think it is very useful that colleges for advanced education are placed under this sort of scrutiny. I do not really know what else I can add to the matter. I am quite anxious to see the course commenced. I am aware, as the member for Arnhem is aware, that the Tertiary Education Commission had indicated that it would not make out-of-training funding available for a Bachelor of Education course at the Darwin Community College. It is possible that, too, was in the mind of the panel which made the assessment. I will certainly be seeking from the Tertiary Education Commission funding for the Bachelor of Arts course for the Darwin Community College in the next triennium.

Applications for Buildings at Dhupuma College

Mr LEO to MINISTER for EDUCATION

Has the Department of Education received any applications for buildings at Dhupuma College from community organisations and, if so, what has been its reaction?

ANSWER

The present position so far as facilities go is that 3 houses and 2 accommodation demountables are planned to be removed to Nhulunbuy and 4 classrooms to Yirrkala. The Department of Transport and Works has that matter in hand. I understand there are a number of applications for some remaining buildings. I am not sure as to what the status of those applications are. That would be a matter normally between the applicant and the department. Certainly, I can have the matter investigated and inform the member later.

Exploration Licences for Arnhem Land

Mr B. COLLINS to MINISTER for MINES and ENERGY

How many applications for exploration licences are there for the area normally known as Arnhem Land and how does the minister intend to have the applications processed?

ANSWER

There are 273 mining tenements, including exploration licences, involved in the area that covers Arnhem Land and some areas of the national park on this side of Arnhem Land. Some of these titles and their applications go back to 1969 and have not been processed for a variety of reasons. The department has set up a committee to reopen all of these files and I believe that it has approached all applicants and asked them whether they wish to continue with their application. The department, in consultation with the Northern Land Council, who we hope will consult with the traditional owners, will provide a mechanism for the applications to be processed in due course. I think it is fair to say that what we are trying to do is break new ground. The process will evolve rather than be devolved. As developments occur in this area, I will be pleased to advise the member who has an electoral interest in the progress that is made.

Housing Development Near Ludmilla Creek

Mrs O'NEIL to MINISTER for LANDS and HOUSING

Will he confirm that a proposal for canal housing development near Ludmilla Creek is being examined by his department?

ANSWER

I am unable to make any such confirmation. I know nothing of it. I will have the matter investigated.

Recreation Lake in Alice Springs

Mr D.W. COLLINS to CHIEF MINISTER

What is the current position regarding negotiations with the Central Land Council on the proposed recreation lake above the telegraph station in Alice Springs?

ANSWER

The state of the negotiations with the Central Land Council are, I understand, still as they were when this question was last asked of me at the last sittings last year. The Central Land Council is opposed to the construction of the lake at Alice Springs on the site above the telegraph station in the Todd River catchment area on the basis that there is a sacred site in the area. Negotiations are continuing.

Morgan Gallup Poll - Department of Mines and Energy

Mr LEO to MINISTER for MINES and ENERGY

Will he make available the results of those parts of the recent Morgan Gallup poll for which the people of the Northern Territory paid?

ANSWER

At this stage, the short answer is no.

Age of Consent

Mr D.W. COLLINS to CHIEF MINISTER

On Wednesday 25 February, the Australian had a report on its front page stating that the age of consent in the Northern Territory is 13 years. What is the age of consent?

ANSWER

The member for Alice Springs is quite right to draw attention to that article because, like many other things that appear in the media, it is inaccurate. Indeed, I can remember a headline only this week which said, 'Fresh doubt on rail link'. If that is not a misleading headline, I do not know what constitutes a misleading headline. A most unreasonable article sought to draw the federal Minister for Transport on what passenger services will be provided 8 years hence. This is incredible journalism. The age of consent in the Northern Territory is 17 and not 13 as reported. That is laid down by section 3 of the Children's Protection Act. The inaccurate reporting probably arose as a result of confusing the age of consent with the different penalties and offences prescribed for the offence of unlawful carnal knowledge depending on the age of the girl. Section 63 of the Criminal Law Consolidation Act creates an absolute offence of having carnal knowledge of a girl under 12 and imposes a penalty of life imprisonment. Section 65 creates a similar offence with respect to girls about 12 but under 13 and imposes a maximum penalty of 7 years. Section 4 of the Criminal Law Consolidation Amendment Act deals with cases where the girl is over 13 and under 17 for which the penalty is now 2 years. This subject will be dealt with at length in the draft Criminal Code which I hope to table later today.

Education Regulations

Mr B. COLLINS to MINISTER for EDUCATION

When will the regulations to the Education Act be promulgated?

ANSWER

The regulations will be promulgated immediately the incoming Commissioner of the Teaching Service has a chance to cast an eye over them. I realise that schools and the public generally should have been entitled to an earlier promulgation. Nonetheless, as I previously indicated, there will be no hiatus or disruptive effect by not promulgating regulations under the Northern Territory Education Act for the simple reason that savings clauses were inserted in that act to continue those of the Commonwealth Teaching Service. Of course, as we have had a Commonwealth Teaching Service, those regulations would be consistent with it.

Fire Station in Rural Area

Mrs PADGHAM-PURICH to MINISTER for LANDS and HOUSING

Has land at the 19-mile adjacent to the 19-mile pumping station, the police station block and Fred's Pass Reserve actually been set aside for the building of the fire station and, if not, why not, in view of the continued urgent need in the rural area for fire services actually stationed in the area?

ANSWER

There are 2 lots in that area set aside for public purposes. Block 1727 Hundred of Strangways has been set aside on the public plan as a police station and the lot adjoining, 19726, has been set aside for the purpose of a future fire station. I might point out that I would not want the member for Tiwi to assume automatically that that means that a fire station and police station will

be built on those locations. Nonetheless, for planning purposes, land has been set aside for that function. As members would be aware, the actual construction of the police station and fire station in those locations is subject to normal Cabinet consideration of capital works and to future studies as to the need for such facilities.

Land-brokers in NT

Mrs O'NEIL to CHIEF MINISTER

Has the government decided to introduce a system of land-broking in the Northern Territory similar to the one existing in South Australia?

ANSWER

The government has the transferring of interests in real property actively under review. As Attorney-General, I obviously have responsibility under the Real Property Act for any potential amendment which could permit land-brokers to carry on business in the Northern Territory. There are problems which at first may not occur to members. Could I indicate at the outset that, philosophically, I have no objection to land-brokers carrying on conveyancing work at all. In fact, in Queensland, until fairly recently, there was a professional designation, conveyancer, which approximates that of land-broker. Conveyancers did about half of the law course and practised simply as people who handled transfers of land, leases and or other commercial documents of that nature. I believe it is a very useful occupation. If benefits can be won for people in that way and by way of the reduction of costs of transfer of land, the government should do all it can to see that these benefits are received by people.

The problem is that, once we agree that land-brokers can commence to practise in the Northern Territory, there is an implied responsibility on the government to establish a course for land-brokers to be trained, and obviously set up the machinery to administer the system to see that the land-brokers who commence to carry on business in the Northern Territory are reputable, take out insurance and all the rest of it. At present, it appears to me that the costs of doing all that, which would approximate $0.25m per year to the taxpayer, would outweigh the advantages gained by those people saving costs in transferring land. You would have to do a lot of cheaper transfers to save $0.25m per year.

I have had a meeting with members of the Law Society and told it that I believe that it should especially look at its scale of fees in relation to transfers between people who are buying their first home and also generally at the domestic transaction market. I believe that the Law Society will look at the question seriously and I would hope that we can look to some announcements from the Law Society in the course of the next month or so. I might indicate, in all fairness to the Law Society, that it believes that its costs are justified. I referred the matter to a chartered accountant last year who went into the matter in great detail and gestated upon the problems for about 4 months and finally delivered a report which said that the level of costs are in fact justified due to the level of work and responsibility involved. Nevertheless, the fact is that the people believe that conveyancing costs are a rip-off. I believe that, because the Law Society has a monopoly on the area, the government must scrutinise the activities of the legal profession and must put to the lawyers what people believe whether it is right or wrong. If lawyers want to keep their monopoly of the area, they have to take into account what people believe.

Offensive Cooking Odours from Alice Springs Abattoir

Mr VALE to MINISTER for PRIMARY PRODUCTION and TOURISM

My question concerns the Alice Springs Abattoir and the offensive cooking odours arising from that operation. Can the minister advise what advice he has

received from his department concerning the problem and what action, if any, will be taken by the owners of the abattoir to alleviate the problem?

ANSWER

The Alice Springs abattoir is not solely a matter for the Department of Primary Production. My department is party to an inter-departmental working committee which met in November last year. I understand that it has made recommendations to my colleague, the Minister for Lands and Housing, that he endorse a policy of relocating the abattoir to a noxious industry area in the long term. In the short term, the abattoir should be offered short-term tenure over additional land for effluent, paunch and carcase disposal management provided that detailed stringent conditions for overcoming the problems were met.

It seems to me that we have sung this song before. I recall, when I first worked for the Animal Industry Branch in Alice Springs, that there was an abattoir down at the Gap. With succeeding town planners, the abattoir was then moved further out of town where it was supposed that the urban sprawl would never catch up. If we have another change of town planners over the next 5 years, the population will have overcrowded this abattoir and be half-way onto the next one. I think it is something that should be dealt with in another way. The cost of relocation of an abattoir would seem to be in the order of some $15m. I do not know whether this government will come to grips with that sort of a financial problem.

My department tells me that the problem of odour can be largely overcome by the installation of condensers and incinerators for non-condensable gases. We should note at this stage that there is no legislation to force the abattoir to carry out procedures to overcome the odours which both the Department of Health and my department have identified. It has been identified as cooking smells associated with the treatment of tallow and meat-meal which do not represent a health hazard.

Aboriginal Land Rights (Northern Territory) Act

Mr ISAACS to CHIEF MINISTER

Has the Northern Territory government recently asked the Australian government to amend the Aboriginal Land Rights (Northern Territory) Act to prevent any further applications for conversion of pastoral leases in the Northern Territory to Aboriginal land?

ANSWER

The statement by the Leader of the Opposition is absolutely correct. The Northern Territory government has recently, amongst other matters, raised with the federal government the possibility of an amendment to the Aboriginal Land Rights (Northern Territory) Act to preclude further conversion of pastoral tenure, or tenure of that nature - Crown leasehold tenure - to unalienable Aboriginal freehold. This application for amendment is entirely consistent with the policies that the government has maintained during the past 3 years; that is, of opposition to the conversion of leases to unalienable freehold. We believe the administration of the pastoral industry is dependent upon the land on which pastoralists operate continuing to remain Crown leasehold. I understand my colleague, the Minister for Lands and Housing, will be tabling today, with a few short remarks, the report of the Martin Committee of Inquiry on Pastoral Land Tenure. I do not think it is anticipating things very much to say that the Martin Committee recommends the continuance of Crown leasehold tenure.

Upgrading Schools in Port Darwin Electorate

Mr HARRIS to MINISTER for EDUCATION

Is his department considering any major additions or upgrading to the government schools which exist in my electorate? Those schools are Darwin Pre-school and Primary School and the Larrakeyah Pre-school and Primary School.

ANSWER

The best I can say in the present circumstances is that we are running a ruler over those schools as to their needs. The question has previously been raised by the member for Port Darwin, as is his right. The people of his electorate are well served by the pressure he brings to bear on the government to upgrade those schools. Nonetheless, we have to have cognizance of the population patterns in the Northern Territory and the necessity without any doubt to provide schools for children who have no schools at the moment. There is a limit to the amount of capital funds available to any government. Its primary responsibility is to provide places for children who have none and teachers for children who have no teachers. That is the fundamental responsibility. Certainly, we also have a secondary responsibility to maintain the standards of school buildings as capital funds allow.

Concession Scheme for Superannuants

Mrs LAWRIE to TREASURER

Can he indicate whether his government will be introducing a scheme, similar to the pensioner concession scheme, for superannuants?

ANSWER

It is still the government's intention to introduce such a scheme. I have mentioned before in this Assembly that the administration of such a scheme is proving very difficult because of the enormous variety and complexity of various superannuation schemes. It seems that we may have to withdraw to a system whereby an ad hoc approval of individual cases is applied on almost a means test basis because a number of superannuants are very well looked after by their superannuation schemes. There is a difficulty in assessing and checking the validity of some of the information that is provided by various applicants. The various superannuation schemes are structured in such a way that information concerning the payments and entitlements to members is quite confidential, and so it should be. In any area where the government is administering taxpayers' funds on a basis of subsidy or assistance, we must check carefully the validity of matters put before us. The scheme is still intended for implementation but it has not been implemented to date because of the difficultues in assessing the requirements for applicants.

Department of Mines and Energy - Officer's Overseas Visit

Ms D'ROZARIO to MINISTER for MINES and ENERGY

Can he confirm whether an officer of the Department of Mines and Energy recently visited South Africa on departmental business and, if so, what was the reason for his visit?

ANSWER

I cannot confirm what the member asks. I know of one man who went there over Christmas on holidays. I do not have any knowledge of that gentleman carrying out departmental business. I will inquire and advise the honourable member. It is quite possible that someone has visited South Africa. I would regard South Africa as probably the area in the world today that has the most

potential for the Northern Territory to recruit officers, particularly in the mining, engineering and geological fields. If someone from the department has gone, I will let the member know in the course of time.

Education Department Staffing

Mr D.W. COLLINS to MINISTER for EDUCATION

The statement that 1,800 persons occupy office positions in the Northern Territory Education Department has never been refuted in the press. Will he undertake to inform the public, through the press, of the structure of the Department of Education and the number of officers and employees in each division?

ANSWER

The statement that the honourable member has just referred to is so absolutely absurd and stupid that one wonders if it really deserves answering in any form. Nonetheless, it has been asked here in the Assembly so I will give the information. The member refers to a February article in the Northern Territory Teachers Federation Newsletter, again by a ex-Commonwealth Teaching Service person. It seems that when we flee we can invent. His article was a complete fabrication and invention. The fact is that there are in the whole of the delivery system of education in the Northern Territory, excluding the Darwin Community College, 3,021 personnel. Of those, 1,646 are CTS staff in schools, 910 are NTPS staff in schools and TAFE institutions, that is assistant teachers and ancillary staff, giving a total of 2,556. Head office staff comprises 465, which includes 149 CTS and 316 NTPS. Many of those 149 CTS personnel listed against head office staff are in professional services and curriculum development and therefore their primary responsibility is school-based in any event. Far from the figure given by the gentleman referred to and his percentages, the fact is that, of a total of 3,021 staff, 82% are school based.

Stuart Highway Alice Springs

Mr VALE to MINISTER for TRANSPORT and WORKS

Can he advise when the Stuart Highway between Heavitree Gap and Alice Springs will be upgraded and widened?

ANSWER

I am unable to provide the honourable member with that information. However, I will provide it to him at a later date.

Imported Fruit and Vegetables

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

I have been advised that each state and the Northern Territory has an arrangement with regard to export quality control. I know that the Northern Territory has quite a high standard in regard to health, packaging etc. Would the minister take some steps to ensure that a reciprocal courtesy is extended to the Northern Territory by other states, South Australia in particular, to ensure that residents of the Territory are not forced to buy fresh fruit and vegetables in varying stages of rot at times and virtually unfit for human consumption, as well as at exhorbitant prices, and could the minister institute an investigation into the possibility of having all fresh fruit and vegetables brought to central points for inspection before distribution to the public?

ANSWER

I think the honourable member raises a reasonable proposition. I do not

know what the cost would be. The government is keen to see proper export and import quality control. Indeed, you will find that in the legislation about to be introduced dealing with eggs. It is something that the government can examine and I will let the honourable member know later.

Housing Commission Accommodation for Industry

Mr LEO to MINISTER for LANDS and HOUSING

Is it consistent with Housing Commission policy that private business be allowed to rent much-needed accommodation for business purposes? This happens in Nhulunbuy.

ANSWER

People in private business have to live under a roof, the same as anyone else. There has been a long-standing policy of this government and the Commonwealth government of any persuasion when it has administered the Northern Territory Housing Commission to provide industrial housing. Industrial housing is carefully considered by a special panel of the Housing Commission which advises the minister as to the eligibility or desirability of any out-of-turn industrial housing assistance. The general philosophy is that it has to be housing for a unique or new industry of significant benefit to the Northern Territory, not simply because a firm wants a house for another manager. Because of the housing position, we would only approve about 1 in 10 applications but, occasionally, the government considers that it is essential for the development of the Northern Territory that a particular member of private industry be housed in a particular location.

Housing Commission Accommodation for Industry

Mr LEO to MINISTER for LANDS and HOUSING

I repeat my question for the benefit of the minister. Is it consistent with Housing Commission policy that private business be allowed to rent much-needed accommodation for business purposes, not accommodation purposes, as happens in Nhulunbuy?

ANSWER

The member has finally decided to speak up so that we can hear his question. He ought to try and sit over here. Mr Speaker, the answer is no.

Indo-Pacific Marine

Mrs O'NEIL to MINISTER for LANDS and HOUSING

Has a decision been reached on the allocation of land for the Indo-Pacific Marine aquarium?

ANSWER

I would think the answer to that question is yes. To follow that up, really there is very little we can do to assist Indo-Pacific Marine in a new location. The government has agonised over the fate of Indo-Pacific Marine for some time. It recognises the educational, cultural and interest aspects of Indo-Pacific Marine. If we could really come to grips with the problem, then there would be no desire greater in the mind of this government. A proposition has been put to Indo-Pacific Marine to liaise with the Museums and Art Galleries Board, having regard to its new premises, as to the possibility of a joint venture. We do not want to see the display and the work done by that organisation lost. Nonetheless, it is the type of business which has a very questionable viability. We have a responsibility, particularly in terms of Territory Development

Corporation loans - and I am getting into someone else's paddock now - to ensure that the taxpayers' money is wisely spent on a viable proposition. The position at the moment is that negotiations are going on between Indo-Pacific Marine and the Museums and Art Galleries Board. Hopefully, a successful conclusion can be reached. There may be other ministers who can provide more accurate information than that.

Railway Line Through Darwin

Mr HARRIS to CHIEF MINISTER

There have been reports that, when the railway line eventually reaches Darwin, the route into Darwin will vary considerably from the existing railway reserve. Is the Chief Minister able to inform me if these reports are correct?

ANSWER

I am unable to answer the question. I do not believe that any answer will be able to be given on this for some time yet. I understand the planning and survey is to commence fairly soon, if it has not already commenced, as to the route of the proposed railway line. I seem to recall that the survey will be completed by 1982 or 1983. I am sure that the Commonwealth government will display the proposed route of the railway line to the citizens of the various towns along the track as indeed they have recently set up quite a reasonable display of the proposed new Darwin Airport terminal.

Handbook on Education Act

Mr B. COLLINS to MINISTER for EDUCATION

When the regulations for the Education Act are promulgated, will he arrange for the publication of a handbook for parents on school councils detailing the relevant sections of the act and regulations and outlining their duties and responsibilities?

ANSWER

I thank the honourable member for the suggestion. The answer is yes.

Bylaws for Alice Springs Council

Mr VALE to MINISTER for COMMUNITY DEVELOPMENT

Can he advise what stage has been reached with the provision of bylaws for the Alice Springs council?

ANSWER

I have long advocated in this Assembly and outside that the Alice Springs council has the opportunity now, and has had since its inception, of adopting bylaws. However, it seems to persist with the view that it has not and the government some time ago agreed that, on behalf of all corporations in the Territory, it would produce a set of model bylaws which corporations could adopt by resolution if they so wished. It would assist them to the extent that they would not have to engage counsellors to draft bylaws for themselves. Hopefully, the bylaws drawn up by the government would be very thoroughly researched and certainly within power.

At present, 6 model bylaws have been submitted to councils for comment. I point out that, for a model bylaw to be established by the government for use of local government, it really has to be a model bylaw that is acceptable to all councils in the Territory. Those that have been submitted to date are on the subjects of inflammable grasses and weeds, verandahs and awnings, dangerous and dilapidated buildings, swimming pools, pounds and impounding, and dead and

diseased animals. Preliminary drafts have been prepared for 2 others: the use and maintenance of premises and conduct on roads and public places. Drafting instructions are now being prepared for traffic and parking, public reserves, advertising signs and hoardings, meeting procedures in administration, public convenience and the keeping of animals. Proposals to amend the Local Government Act to provide procedures for the adoption of model bylaws for councils are now being developed and, when such provision is made and the draft is finalised, model bylaws will be placed before the Assembly.

I repeat my earlier comment that, whilst we are working with available drafting resources to complete a total set of model bylaws for local government, the option is still available at any time, in my opinion, for the Alice Springs council to follow the steps of the Darwin city council and adopt bylaws under existing procedures if it so wishes.

Public Display of Proposed Development of Carpentaria College

Mrs LAWRIE to MINISTER for LANDS and HOUSING

Can he indicate whether the proposed development of Carpentaria College will be placed on public display for public comment and objections?

ANSWER

I indicated yesterday that I would check with the chairman of the authority. I did speak to the chairman of the authority yesterday but I completely forgot to raise this matter with him. I apologise to the honourable member. As I indicated yesterday, I personally have absolutely no objection to that whatsoever. It depends on what the judgment of the chairman of the authority might be having regard to the wording of the act. It is not a rezoning; it is merely a development proposal. Translating that to the proposal appropriately zoned for a multi-storey international hotel, one would think that the public has a right to see what that is all about. One would also think that it has that right in the case of the proposed Greek community development. I do apologise once again to the member. I will certainly try to get back this afternoon with an answer.

Katherine Planning Authority Membership

Mr VALE to MINISTER for LANDS and HOUSING

On behalf of the member for Elsey, can he advise when a replacement for Alderman D.A. Collins will be appointed to the Katherine Planning Authority?

ANSWER

The appointment of a replacement for Alderman Collins comes under that section of the Planning Act which requires the local council to submit a panel of names to the minister, out of which the minister shall select one. I understand that I have received 3 names from the Corporation of the Municipality of Katherine. I will be making an announcement, hopefully, tomorrow morning as to which of those persons will join the authority.

Mercury Testing on Sharks

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

With regard to the present research being carried out into fisheries in the Northern Territory, will he make public the results of mercury testing on sharks?

ANSWER

Yes.

Takeover of Mount Wells Battery

Ms D'ROZARIO to MINISTER for MINES and ENERGY

Have arrangements for the takeover of the Mount Wells Battery been finalised and, if so, what is the name of the successful firm?

ANSWER

I can advise the member that the Tender Board has considered the tender for the Mount Wells Battery and it has accepted the recommendation that the tender be proceeded with. In all honesty, I cannot tell you the name of the firm off the top of my head but I can advise members that the requirements that the government has that related to the tenderer have been met and that there are some fairly important negotiations to go on between the government and the company before the thing can be finalised. The government was asking for a security of some $200,000 to $300,000 that would be payable in advance before the company took over and, if that company defaulted or closed the battery within a period of 3 years, it would lose that deposit. The company has reasonably asked that consideration be given to a force majeure on that commitment. The government also requested that the company buy 1,250 tonnes per annum of ore from gougers in the area which is the current level of crushing in the battery. The company has agreed to do that.

There are some other matters to be finalised relating to the tender such as the security and the tenure over the land on which the Mount Wells Battery sits. I cannot advise the member of the details there but, when the announcement is made, those points will be covered.

Subsidy on Youth Centre Capital Works

Mr D.W. COLLINS to MINISTER for YOUTH, SPORT and RECREATION

Can he inform the Assembly of the current position of the proposed 3 to 1 subsidy on youth centre capital works?

ANSWER

Guidelines are currently being prepared by the Department of Community Development and, when those guidelines are forwarded to me, I will make an appraisal and refer them to Cabinet for consideration.

Hot Water Sources for Geothermal Power

Mrs O'NEIL to MINISTER for MINES and ENERGY

Has consideration been given to the possibility of using hot water sources in the NT to supply geothermal power?

ANSWER

The government has received a proposal from an Australian firm which is interested in investigating and identifying geothermal resources in Australia. It has asked the government for rights within the Northern Territory for geothermal exploration where the resource could possibly be harnessed to provide heating or power. I believe that, in places like California and New Zealand, geothermal energy is very much an accepted part of the life. It is a very economic way of providing energy and power.

The government is keen to see the development of any such resource. We do have to develop the framework where the explorer or the developer could proceed without prejudicing the rights, titles and exploration rights of other groups. It would seem pretty easy on the surface to give a person or a group a right to explore for geothermal resources but there are already large areas

in the Territory that are taken up with oil and mineral exploration rights. It is important that the holders of those rights are not prejudiced by any action of the new proponents. I would hope that, by June or July, we will have worked out a practical method of allowing the proponents to get on with their exploration in the Northern Territory if that is possible.

Translation Facilities at Casuarina Hospital

Mr B. COLLINS to MINISTER for HEALTH

Has there been any recent expansion of the Aboriginal liaison service provided at Casuarina Hospital and what translation facilities are generally available there for all patients?

ANSWER

I presume the honourable member is referring to a statement made by the federal Minister for Health, Mr MacKellar, who announced the program of providing funds on a dollar-for-dollar basis with the Northern Territory Department of Health for the provision of 2 translators in our hospitals in Alice Springs and Darwin. A case was put to me about 12 months ago by the boards of both hospitals that there was a very urgent need, particularly in the outpatients area, to provide a translation service, particularly for Aboriginals who come to Outpatients and are in hospital and have difficulty in communicating with the medical staff. The provision of this service from within our own resrouces was not possible. I put it to the federal minister that if he was prepared to fund the program, we be able to contribute something towards it. The honourable member has asked which languages are catered for. I cannot honestly answer that but I am prepared to obtain information for him.

I might also add that the department is about to circulate to all members of the Assembly pamphlets for many cultures concerning the services that are provided by the Department of Health throughout the Northern Territory. This results from a suggestion by a member on the other side of the Assembly. If honourable members can see a way of improving the department's efforts in this regard, I am sure it would be happy to follow it up and provide the best possible service to the public.

Crocodile Farm

Mr B. COLLINS to CHIEF MINISTER

Is it true that there are many more crocodiles at the Humpty Doo crocodile farm than are officially accounted for? What is the Northern Territory Conservation Commission doing to redress this situation?

ANSWER

I am indebted to the honourable member for Arnhem for this question. Regrettably, I do not want to say a great deal about the matter in the Assembly because I have instructed the Director of Conservation to refer the whole matter to the Crown Solicitor for a legal opinion as to whether prosecution action should be taken against the proprietors of the crocodile farm at Humpty Doo. On the information I have available, there are fewer crocodiles than there should be at the Humpty Doo crocodile farm. I do not want to say more about it although I will tell the member for Arnhem and anyone else who wants to listen, the whole story outside the Assembly where it will not get into the press and prejudice the case.

NOTICE GIVEN ON DATE SHOWN

From 18 November 1980

Collia Tin Mine

6 Mr ISAACS to MINISTER for MINES and ENERGY

As a number of people have lost their savings in the Collia tin mine affair,

(a) what detailed action has been taken by the Department of Mines to settle the matter;

(b) how much money has been lost by people involved;

(c) how much did Mr Ken Day receive for the tin he mined from Collia;

(d) why has he not explained in the Legislative Assembly what action the government has taken;

(e) did the Department of Law recommend that anybody be charged over the affair and, if so, why was not that recommended action proceeded with;

(f) was the government's lack of action coloured by the fact that Mr Day was once the head of the Progress Party, whose votes had helped the Country Liberal Party;

(g) what is now being done about the matter; and

(h) are police trying to contact the previous leaseholder who disappeared and, if so, do they know in which state he is residing?

Public Housing - Out-of-turn Allocations

9 Mr ISAACS to MINISTER for LANDS and HOUSING

From August 1, 1979 to August 1980,

1. How many applications for out-of-turn allocation of public housing have been (a) received, (b) accepted, and (c) rejected?

2. How many applicants whose applications were (a) accepted, or (b) rejected were in receipt of (i) supporting parent's benefit, (ii) unemployment benefit, (iii) other pensions, (iv) one-income families?

3. How many applicants for out-of-turn accommodation were living in (a) caravans, (b) tents, (c) share accommodation, (d) hostels, or were (e) homeless?

4. What steps have been taken by the Housing Commission to assist those in need of accommodation who were rejected for out-of-turn accommodation?

5. If applicants were referred to other community organisations, to whom were they referred?

6. How many applicants were found accommodation directly by efforts of the Housing Commission?

Government Assistance for Tradesmen to Visit Remote Areas

44 Mr MacFARLANE to MINISTER for LANDS and HOUSING

What assistance will the government provide to enable electricial, plumbing and building tradesmen and inspectors to visit remote centres such as Borroloola to assist home owners?

Alice Springs - Traffic and Railway

74 Mr PERKINS to MINISTER for TRANSPORT and WORKS

1. How many vehicles use the level crossing daily at the Larapinta Drive-Telegraph Terrace intersection in Alice Springs?
2. Is it true that a set of traffic lights will be installed at the intersection and crossing?
3. In the matter of arrangements being made for the Alice Springs to Darwin standard gauge railway planning, what decision-making powers are held by (a) the NT government, (b) the Alice Springs municipality, and (c) the Australian National Railways Commission?
4. In the event of a dispute over the location of the railway line, is it true that the Alice Springs municipality can be overruled by the ANR?
5. Will he supply a list, including (a) dates, (b) names of participants, and (c) the agenda of meetings which have been held between the ANR and his department during the past 2 years and, if not, why not?

Operational Grant Subsidies Scheme

79 Mr PERKINS to MINISTER for COMMUNITY DEVELOPMENT

1. Which organisations are funded under the Operational Grant Subsidies Scheme?
2. Does he intend to increase the number of organisations able to receive funding on a 3 years basis, to allow more effective functioning?
3. How much has been allocated to the Government Concession Scheme for 1980-81, and in which financial allocation is it included?
4. Will he provide a complete itemisation of the financial allocation for 1980-81 of $1,071,558 in the grants and subsidies section?

Sadadeen Subdivision

81 Mr PERKINS to MINISTER for LANDS and HOUSING

1. To what extent has the government developed Sadadeen lots to the turn-off stage?
2. Since private developers were originally invited to register an interest in Sadadeen development only 3 months ago, and since the successful tenderer was named only this month, when does the developer expect to have all lots to the turn-off stage?
3. At what price will the government buy the developed blocks?
4. Was an undertaking to use local labour and materials a factor in the successful tender by the company chosen by the government to develop Sadadeen?
5. Has the government studied the cost-effectiveness of maintaining the role of departments such as the Department of Transport and Works in developing residential subdivisions?

Department of Community Development - Advertisement in NT News

82 Mr PERKINS to MINISTER for COMMUNITY DEVELOPMENT

I refer to an advertisement in the November 4 edition of the NT News placed by the Department of Community Development calling for a person to carry

out a program entitled 'Survey of Aboriginal Communal Camping and Residential Facilities in Urban Areas', and ask -

1. How many people applied for the position?
2. Has the position been filled and, if so, (a) who has filled the position, (b) has the successful applicant commenced work on the program, and (c) what is the nature of the work currently being undertaken?

From 24 February 1981

NT Pensioners Concession Scheme

87 Mr PERKINS to MINISTER for COMMUNITY DEVELOPMENT

Under the NT Pensioners Concession Scheme, how many persons received assistance in the categories of council and land rates?

Alice Springs Golf Club

97 Mr PERKINS to MINISTER for LANDS and HOUSING

1. Is he aware that the Alice Springs Golf Club is planning to develop its leased land in Alice Springs as a luxury housing and sporting estate?
2. If so, has this proposal been brought to the notice of the minister and the NT Planning Authority?
3. Does the government intend to permit development of leased land by sporting bodies, such as the Alice Springs Golf Club, as luxury housing and sporting estates?

Department of Community Development Grants-in-Aid

104 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

1. Which community groups made application to the Department of Community Development for Grants-in-Aid for the year 1980-81?
2. How much did each group request?
3. How much was granted to each of the applicants?

Minister for Mines and Energy - Air Charter Travel 1979-80

111 Mr ISAACS to CHIEF MINISTER

1. How many trips were undertaken by Hon. I.L. Tuxworth within the Northern Territory by way of air charter travel at government expense for the financial year 1979-80?
2. For each individual trip undertaken, what was (a) the date, (b) the cost, (c) the purpose, and (d) the name of the charter company used?

Robinson River Station

114 Mr MacFARLANE to MINISTER for LANDS and HOUSING

1. Is he aware of the recent purchase of Robinson River Station by an Aboriginal organisation?
2. Is any statutory period set by either the Northern Territory or the Commonwealth government before a pastoral lease purchased by an

Aboriginal organisation may be classified as Aboriginal land?

3. Have any Aboriginal organisations applied to convert pastoral leases to Aboriginal land?

Schoolchildren - Indemnity Forms

124 Mr MacFARLANE to MINISTER for EDUCATION

Are pupils in NT schools required to obtain signed indemnity forms before engaging in school activities such as swimming lessons, excursions and sports outside school grounds?

Elsey and Hodgson Downs Pastoral Leases

126 Mr MacFARLANE to CHIEF MINISTER

1. What efforts are being made to have land excised from Elsey and Hodgson Downs pastoral leases for use as community areas for Aborigines?
2. Is the government's failure to obtain such excisions frustrating provision of essential services such as septic systems, power supplies, airstrips and housing?

Hermannsburg Mission

129 Mr MacFARLANE to CHIEF MINISTER

1. Has his attention been drawn to the allegation by Mr Charles Perkins that the Lutheran Church is exploiting Aborigines at Hermannsburg?
2. If so, does he know of any substance in the allegation?
3. If not, does he intend to allow such mischievous statements by a Commonwealth public servant to go uncorrected?

Katherine Water Supply

133 Mr MacFARLANE to MINISTER for MINES and ENERGY

Will electricity to be reticulated to the new water supply at Donkey Camp near Katherine be extended to cater for consumers and future subdivisions on the Gorge road, and to Katherine Gorge?

Katherine Community Welfare Office

134 Mr MacFARLANE to MINISTER for COMMUNITY DEVELOPMENT

1. Why did Mr Peter Ryan of his department post a notice on the door of the regional office in Katherine on 8 January 1981 advising people in need of assistance to contact Les MacFarlane?
2. Is this action likely to be repeated?

Katherine High School - Cleaning Tender

135 Mr MacFARLANE to MINISTER for EDUCATION

Is he aware that the successful tender for cleaning Katherine High School (Gazette No. G1, 9 January 1981, ETB 27/80) is in excess of $80,000, or almost $410 for each school day, for 1981 and, if so, will he investigate alternative means of cleaning to lighten this load on the taxpayer?

Hospitalisation of Injured Schoolchildren

136 Mr MacFARLANE to MINISTER for EDUCATION

When school authorities call an ambulance to hospitalise an injured pupil, are parents consulted or is it automatically taken that they concur with the principals' decisions and actions?

Northern Territory Public Service

139 Mr MacFARLANE to CHIEF MINISTER

What was the cost of (a) salaries and wages, and (b) recreation leave fares for NT public servants during 1979-80?

Hodgson Downs Station - Bores

142 Mr MacFARLANE to MINISTER for MINES and ENERGY

How many dud bores have been drilled, within 2 miles of the homestead, at Hodgson Downs Station since 1952?

Snell St Gas Turbine Station

143 Ms D'ROZARIO to MINISTER for MINES and ENERGY

1. What was the cost of repairing damage inflicted on the Snell Street gas turbine station on 5 January 1981?
2. Was the damage to the station the result of flying debris from the cement works next door?
3. Who will meet the cost of repairing the station?

Jabiru Water Supply Contamination

144 Ms D'ROZARIO to MINISTER for MINES and ENERGY

Is there any evidence of contamination of the water supply at Jabiru as a result of mining activity and, if so, is it anticipated that similar contamination may occur elsewhere as a result of mining activity?

Yuendumu Road

145 Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

1. Did the government make a commitment to the upgrading of the road between Alice Springs and Yuendumu in 3 stages of 90 kilometres in the financial year 1978-9 and, if so, what progress has been made to 3 February 1981 on upgrading the Alice Springs-Yuendumu road?
2. As part of the upgrading of this section of road, did the government advise the Yuendumu Mining Company that certain materials would be required?

Richard Koerner

147 Mr ISAACS to CHIEF MINISTER

1. In what capacity is Mr Richard Koerner employed by the Northern Territory government?
2. What salary, allowances and other entitlements is Mr Koerner receiving?

Sales Tax Rebate Scheme

148 Mr ISAACS to TREASURER

1. By what method will the percentage of sales tax attributable to freight be calculated?
2. At what point will the freight cost on goods coming to the Territory be deemed to have commenced?
3. Will the freight cost assessed for Territory wholesalers be discounted to allow for the freight cost faced by southern wholesalers to ensure equity in terms of the impact on the sales tax burden?
4. How many importers pay sales tax in the Northern Territory?
5. Do any of those importers compete directly with wholesalers selling domestically produced goods?
6. Has any assessment been made on the effect on importers of a government induced cost advantage to domestic wholesalers in direct competition?
7. If some importers are significantly disadvantaged by the introduction of the government's proposed sales tax rebate scheme will the government consider some compensation?
8. What measures will be applied to ensure that there will be no book entry inflation of freight costs?
9. Will a condition of payment under the sales tax rebate scheme be that inspectors from the NT government have access to the relevant records of claimants at any reasonable time?

From 3 March 1981

Numbulwar - Freight Costs

150 Mr MacFARLANE to CHIEF MINISTER

1. Has his attention been drawn to the strain placed on the Numbulwar community by the recent rise in barge freight from 35¢ per kilo to 60¢ per kilo?
2. Is he able to state why it is cheaper to freight goods from Cairns to Numbulwar than from Darwin?

NT Planning Authority - Katherine Representative

151 Mr MacFARLANE to MINISTER for LANDS and HOUSING

Who have been the Katherine representatives on the NT Planning Authority since Alderman D.A. Collins resigned?

Tenders for School Bus Runs

152 Mrs LAWRIE to TREASURER

Why was ETB 3/80 cancelled and recalled as ETB 14/80?

Tenders for School Bus Runs

153 Mrs LAWRIE to TREASURER

In regard to tenders TB 1026/79A and TB 1093/79, in what respect did the tenders received from O'Hara's Roadlines Pty Ltd not conform?

Tenders for School Bus Runs

154 Mrs LAWRIE to TREASURER

1. Is it a fact that the tenderer awarded TB 1026/79A and TB 1093/79 had 8 buses to service 7 runs?
2. If so, how was the tenderer awarded these runs being 2 buses short of the required 10 buses for 8 runs?

Tenders for School Bus Runs

155 Mrs LAWRIE to TREASURER

1. Does tender TB 1026/79 (school bus runs) state that all buses offered in the tender must be in Darwin 14 days prior to the commencement of the tender?
2. If so, why was the tender awarded to a tenderer who did not meet this specific requirement?

Essential Services for Aboriginal Communities

156 Mr ISAACS to TREASURER

1. What is being allocated in cash for essential services in 1980-81 and for which Aboriginal communities?
2. What are the proposed projects?
3. What projects have been completed?
4. How many Aborigines (a) have been, and (b) are employed with the essential services program?
5. What training are they receiving and from whom?
6. What essential services program has been decided upon for the Hodgson community?
7. What improvements are to be carried out in respect of (a) a water supply, (b) provision of toilets and showers, and (c) upgrading of and access to the airstrip?

Rehabilitation of Rum Jungle and Other Uranium Mine Sites

157 Mr B. COLLINS to MINISTER for MINES and ENERGY

1. Will he advise the Assembly on the progress of plans to rehabilitate Rum Jungle?
2. Will he also advise of any plans to rehabilitate and make safe the tailings dumps at other uranium mine sites in the NT?

TAA Bid for Connair

158 Mr ISAACS to CHIEF MINISTER

Did the NT government intervene to prevent TAA proceeding with the purchase of Connair for $1.6 million under an agreement signed in September 1979 and, if so, why?

TAA Bid for Connair

159 Mr ISAACS to CHIEF MINISTER

Did the NT government intervene late in 1979 to prevent TAA proceeding with

a second bid of $1.85 million for Connair and, if so, why?

East West Airlines

160 Mr ISAACS to CHIEF MINISTER

1. When did the NT government first raise with East West Airlines the back-to-back requirements of the guarantee arrangements?
2. Was the advice in writing?

Bans on Northern Airlines

161 Mr ISAACS to MINISTER for TRANSPORT and WORKS

1. What are the details of the agreement between the NT government and the Australian Federation of Air Pilots which enabled the bans on Northern Airlines by the federation to be lifted?
2. Was the agreement signed on behalf of the NT government by the Acting Secretary of the Department of Transport and Works?
3. Will he table the document in the Assembly?

East West Airlines

162 Mr LEO to MINISTER for TRANSPORT and WORKS

1. Did the government receive from East West around May 1980 details of that company's borrowing capacity, including (a) current East West borrowing capacity, (b) borrowing requirements for operations outside the Territory, (c) equity levels to support borrowing, and (d) capacity to support borrowing by the NT airline?
2. If so, why was this information not made available to the merchant banker, Hill Samuel?

East West Airlines

163 Mr LEO to MINISTER for TRANSPORT and WORKS

Did the 3-man committee established by the government to examine the Connair takeover offers first recommend acceptance of other offers before recommending East West?

East West Airlines

164 Mr ISAACS to MINISTER for TRANSPORT and WORKS

1. In view of the government's insistence that the guarantee to Northern Airlines of East West Airlines was always intended to be of a back-to-back nature, why was such a provision not made clear in either the memorandum of understanding or the deed?
2. What documented evidence can the government produce to support its claim that a guarantee must be back-to-back?

East West Airlines

165 Mr ISAACS to MINISTER for TRANSPORT and WORKS

Did the government advise East West in September 1980 that the company's request for guarantees on behalf of Northern Airlines had been approved in principle subject only to documentation?

From 4 March 1981

Transecutive Pilots

166 Mr DOOLAN to MINISTER for TRANSPORT and WORKS

1. Which former Northern Airline pilots will get permanent positions with Transecutive if that company is granted a long-term licence to operate both contracts?

2. Is it a fact that former senior pilots with Northern Airlines are likely to get these positions, that they will require re-training to fly Nomads, and that the government has agreed to meet the cost of this re-training?

Northern Airlines Replacement by TAA

167 Mr DOOLAN to MINISTER for TRANSPORT and WORKS

When did the government first approach TAA regarding the possibility of that company providing an interim service following the closure of Northern Airlines?

Transecutive Pilots

168 Mr DOOLAN to MINISTER for TRANSPORT and WORKS

1. Who will meet the wage costs of the pilots taken on by Transecutive who are surplus to the number actually required to operate the contracts during the interim period?

2. If it is the government, why?

Public Libraries in NT

169 Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

In regard to public libraries, (a) how many are funded by the Northern Territory government, (b) what are their names, (c) where are they located, (d) how many staff do they employ, (e) how many books does each library have, and (f) what is their usage in borrowing terms over the 12 month period ending 31 January 1981?

Department of Transport and Works Water Division Staff

170 Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

1. How many persons, both staff and industrial, are employed in the Water Division of the Department of Transport and Works?

2. What water supply schemes, both underground and surface water, are currently being investigated by the Water Division?

3. What technical and professional staff are employed on the investigation of these schemes?

4. How many vacant professional positions are there in the Water Division and what steps are being taken to fill them?

5. How many clerical and administrative positions are there in the Water Division of the Department of Transport and Works?

South Australian Symphony Orchestra Visit

171 Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

1. Has the NT government made, or will it be making, any contribution

towards the cost of the tour to the NT during 1980 by the SA Symphony Orchestra?

2. If so, what is the amount contributed, and from which budget allocation is it taken?

Funding for Alcohol Treatment Centre

172 Mr B. COLLINS to MINISTER for HEALTH

Has the government committed further funding for the Alcohol and Rehabilitation Centre at the Darwin Hospital so that staff numbers can be increased?

Industries Training Commission

173 Mr B. COLLINS to MINISTER for EDUCATION

1. How many apprentices are with the Industries Training Commission?
2. What is the number in each trade and the breakdown of males and females for each category?

Link Courses Between Sadadeen High School and Central Australia Community College

174 Mr B. COLLINS to MINISTER for EDUCATION

Will he advise on progress of the link courses between Sadadeen High School and Community College of Central Australia?

Female Field Worker with Aboriginal Sacred Sites Authority

175 Mr ISAACS to CHIEF MINISTER

Has the Aboriginal Sacred Sites Authority appointed a suitably qualified female field worker-anthropologist to work directly with Aboriginal women?

Teacher Shortages in Public Schools

176 Mr B. COLLINS to MINISTER for EDUCATION

1. Will he advise whether any shortages of teachers exist in specific subject areas or age/grade levels in public schools in the Territory and, if so, how many additional teachers would be required to fill the vacancies as at 28 February 1981?
2. If shortages exist in particular areas, will he indicate, (a) the areas affected, and (b) the extent of shortages in each of those areas?

Dhupuma College - Government Expenditure

17 Mr LEO to MINISTER for EDUCATION

1. What was the total capital expenditure for Dhupuma College in the financial year 1979-80?

2. What (a) capital items, and (b) their individual costs were purchased for Dhupuma College in the financial year 1979-80?

ANSWER

1. Total capital expenditure on buildings and associated equipment for 1979-80 was $36,607.

2.

Item	Cost
Electrical Upgrading and Fire Booster Pump	$ 5,768
Relocate 2 Demountable Residences from Darwin	$ 21,780
Relocate 1 Classroom from Yirrkala	$ 9,059

Dhupuma College - Transfer of Staff

18 Mr LEO to MINISTER for EDUCATION

What costs were incurred in the transfer of (a) students, (b) staff from Dhupuma College to alternative institutions?

ANSWER

(a) The cost in transporting students from their home communities to Kormilda, rather than to Dhupuma, increased by $370.

(b) $21,750.

Loans to North Australian Baptist Homes Trust

19 Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

1. What were the amounts of the 3 loans made to the North Australian Baptist Homes Trust in relation to hostels in Darwin, Katherine and Alice Springs?

2. How much has been repaid?

3. Under what terms were these loans 'extinguished'?

ANSWER

1. The loan amounts were:

Darwin Hostel	$323,621.58	(consolidated loan);
Katherine Hostel	$232,153.43	(advances only); and
Alice Springs Hostel	$985,397.55	(advances only).

2. Repayments have been made against the loan for the Darwin Hostel only ($44,443.24) as both the Katherine and Alice Springs Hostels ran into difficulty as soon as they became operational. The then Minister for the Northern Territory consequently approved moratoriums on repayments for both.

3. The contract provided that the Northern Territory government discharge the 3 mortgages in consideration of the trust surrendering Special Purposes Lease 361 (Katherine Hostel) and Special Purposes Lease 358 (Alice Springs Hostel). In addition, the Northern Territory government agreed to purchase the Darwin Hostel for an amount which would permit the trust to discharge outstanding debts.

Loans to Church of England Carpentaria College Inc.

20 Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

1. What were the amounts of the 3 loans made to the Church of England, Carpentaria College Inc.?
2. How much was repaid?
3. Under what terms were these loans 'extinguished'?

ANSWER

1. The consolidated loan amounts were:

Loan 1	$173,173.76
Loan 2	$ 35,753.16
Loan 3	$616,555.35
TOTAL	$825,482.27

2. The following total amounts were repaid:

Loan 1	$ 38,568.26
Loan 2	$ 3,181.24
Loan 3	NIL
	$ 41,749.50

3. The total amount outstanding under the mortgages at the time of discharge was $828,147.33. Carpentaria College Inc. agreed to surrender the property in consideration of the debt being extinguished and an amount of $50,000 paid to settle other debts. This sum was made available from insurance funds held as a result of cyclone damage.

Grants-in-Aid 1980-81

21 Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

1. Which community organizations applied for grants-in-aid for 1980-81?
2. Which organizations will receive grants-in-aid in 1980-81?
3. How much will each organization receive?

ANSWER

1. COMMUNITY SERVICES DIVISION

The Aboriginal Cultural Foundation
Alice Springs Amateur Cycling Club
Alice Springs Art Foundation
Alice Springs Golf Club
Alice Springs Pony Club
Alice Springs Skydivers
Alice Springs Youth Centre

Handicapped Persons Association of NT	10,000.00

Register of Uranium Workers

24 Mr ISAACS to MINISTER for MINES and ENERGY
Is a register of uranium workers employed in the uranium province being retained by the Northern Territory government for the purpose of subsequent health checks?

ANSWER

The revelant legislation relating to health checks on uranium workers is the Uranium Mining (Environmental Control) Act which requires adherence to a code of practice on Radiation Protection in the Mining and Milling of Uranium Ores. This code of practice does not require that a register be kept of all workers employed in the uranium industry. The system requires detailed monitoring of the work place and classification of employees based on their potential exposure to radiation. In addition, personal monitoring is applied to designated employees. The records of this monitoring are received and retained by the Departments of Health and Mines and Energy.

The responsibility for medical examinations and records is a matter for

the employer, while government departments provide a supervisory role. However, upon cessation of employment the medical records are required to be forwarded to the Department of Health where they are to be retained for 50 years.

Local Government Elections

25 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

Is it the intention of the Northern Territory government to require the local government elections during 1981 to be conducted by the Northern Territory Electoral Office?

ANSWER

The matter is currently under consideration.

Nurses Quarters at Darwin Hospital

26 Mr ISAACS to MINISTER for HEALTH

1. How many applications have been received for the utilisation of the vacant nurses quarters at the Darwin Hospital?
2. What use is being proposed for the accommodation units there?

ANSWER

1. The matter of the disposal of buildings at the Darwin Hospital is in the hands of the Minister for Community Development to whom this question should be addressed.

Mandorah Road

27 Mr ISAACS to MINISTER for TRANSPORT and WORKS

1. Can he inform me what timetable is planned for the upgrading and/or sealing of the Mandorah Road from Darwin River Dam?
2. What route is the upgraded road going to take?
3. What discussions have been held with traditional Aboriginal owners in the area regarding the siting of the road?

ANSWER

1. The present planning is to realign, upgrade drainage structures and seal the road.
   (a) Stage 1: Pioneer Creek stage - 3.18 km currently under construction and includes the bridging and approach roadworks with slight realignment of the existing road.
   (b) Stage 2: Blackmore River stage - this has a tender target date of December 1980 and includes a bridge over the Blackmore River with associated approach roadworks. There is some slight realignment of the road involved but, in the main, it follows the existing alignment.
   (c) A further stage is planned which will take in the Bulldog Pass. This will occur sometime during 1982-3 but as yet it has no program status. Considerable realignment of the existing road will be necessary.
2. By and large, the upgrade road to Mandorah will follow the existing alignment except, as for the Bulldog Pass, where the terrain dictates a more practical alignment.

3. In this specific case no discussions were held with any traditional Aboriginal owners as the area falls totally within the declared town planning area of Darwin and does not include Aboriginal land or land which can be subject to Aboriginal land claims.

   The project is included in our works proposals for 1980-81 which, on 10 March 1980 was referred to the Aboriginal Liaison Unit for comment. It was similarly referred to the various land councils on 23 May 1980. The covering letter requested identifications of any projects which may have significance as to Aboriginal land, pending land claims and/or sacred sites. The proposals were all cleared.

   It is normal procedure with any new road projects to invite comments from:

   (a) Conservation Commission;
   (b) Sacred Site Authority;
   (c) any landowners (including Aboriginal) affected by the projects;
   (d) the Aboriginal Liaison Unit in instances where there could be contention; and
   (e) Heritage Commission.

Alice Springs Recreation Lake Site

29 Mr ISAACS to CHIEF MINISTER

Further to question No. 23, does the location being considered for a recreation lake in Alice Springs, north of the town in the Todd River, conflict with an Aboriginal sacred site?

ANSWER

There is a sacred site recorded in the register set up under the Aboriginal Sacred Sites Act, which will be eventually submerged if the recreation lake on the site in question goes ahead in accordance with design proposals so far considered. The site itself would not be physically damaged, but it would be submerged.

Katherine - Appointment of Resident Magistrate

30 Mr MacFARLANE to ATTORNEY-GENERAL

What steps are being taken to appoint a resident magistrate for Katherine?

ANSWER

My government does not plan to appoint a resident magistrate for Katherine in the near future. There would be many problems involved in such a proposal.

Because of the insufficiency of work in Katherine a magistrate, whilst based in Katherine, would have to undertake duty at a circuit of several courts over a wide area. The magistrate would therefore not be full time in Katherine.

Because the scope of the work would be of a limited nature, any magistrate appointed solely to the Katherine area would not be in a position to fully exercise his jurisdiction to the same extent as magistrates in the larger centres, where there is some variation in work.

Because of the small community a magistrate based permanently within the community may become too closely involved in community affairs. Such a situation could lead to a conflict of interest in the exercise of judicial functions.

I note that the honourable member has not yet availed himself of the invitation to discuss the matter with the Chief Magistrate or the Deputy Secretary, Department of Law.

Library Facilities in Nhulunbuy

31 Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

What is his present attitude to Nhulunbuy public library facilities, given recent representations to him by (a) a petition opposing library facility amalgamation signed by more than 600 residents, and (b) a public meeting attended by representatives from the Community Development and Education Departments?

ANSWER

A Cabinet decision was made in October 1979 that the Nhulunbuy High School, then under construction, should be extended in order to provide a joint use library for both the high school and the residents of Nhulunbuy. This decision is in line with government policy for maximizing community use of educational facilities.

Two public meetings have been held in September and October of 1980. The total attendance was 38 with some people attending both meetings. This is 1% of the population. This very small minority of Nhulunbuy residents expressed conflicting views on the community library project.

Although a petition has been received it is my view that the interests of the Nhulunbuy community will be best served by access to greater resources for both high school students and the general community.

An agreement has been drawn up between the Department of Community Development and the Department of Education. The agreement allows for the community library service to be reviewed after 6 months and 12 months. It also allows for a Library Advisory Committee to be established in Nhulunbuy

Library Service - Purchase of Books

32 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

1. What is the total value of books purchased by the Northern Territory Library Service from 1 February to 20 October 1980?
2. Who were the library suppliers or booksellers who supplied the books?
3. Did the Northern Territory Library Service call for tenders for the supply of books?

ANSWER

1. $402,346.90.
2. List of 65 library suppliers and bookshops who supplied books:

   NT Firms: Connoisseur Bookshop, Marrons Newsagency, Arunta Art Gallery, Book Mark, Fisher Firearms, Bookworld, Territory Book Depot, Educational and Technical Books, Tivoli Books, Studio Arts, Singing Tree, Northbooks, Arnhemland Gallery, Corey Books, Information Centre.

   Interstate Firms: Serendipity, Burge Lopez, Berkelouw, Kay Craddock, W.R. Thompson, Conrad Bailey, E. Hearn, Barron Books, Gordon & Gotch, Axiom, S.A. Magazine & Book Co., Collins, Hodder & Stoughton, Grahames, Bennetts, Australian Government Publishing Service, Ayers & James, C.C.H. Australia, Library Association of Australia, Technical Book & Magazine Co., Australian National University, Book Wise, Central Book

Agency, ANZ Book Co., Mary Martins, Sydney Building & Information Centre, Paul Hamlyn, Australian Institute of Aboriginal Studies, University of Melbourne, IBBY Australia, Bureau of Mineral Resource, Burwood State College, Westbooks, Complete Travellers Bookshop, Viking, Review Publications, ANZAAS, Royal Melbourne Institute of Technology, James Cook University, Britannica, Pacific Linguists, Standards Association of Australia, University of Tasmania, Field Enterprise, Dunn & Mason, Summer Institute of Linguistics, Continental Bookshop, Books for Children.

Overseas Firms: Combridge Jackson, Bumpus Haldane & Maxwell.

3. No tenders were called. In 1973 the Northern Territory Library Service was exempted from the requirement that tenders or quotations be called for the supply of books. Exemption was granted on the grounds that in the case of library orders adherence to these requirements would be uneconomical, inexpedient and inefficient. This exemption conforms with the practice in the states of the Commonwealth.

Allocation of Vehicles to Schools

33 Mr ISAACS to MINISTER for EDUCATION

1. On what basis are vehicles allocated to remote schools?
2. Which schools in the Northern Territory have been allocated vehicles for the 1979-80 financial year?
3. Which schools have been allocated but not yet received vehicles?

ANSWER

1. Vehicles are allocated to remote schools on the basis of demonstrated needs.
2. Bulman, Elcho Island, Croker Island, Snake Bay, Bamyili.
3. In respect of the 1979-80 financial year: nil.

Teachers in Remote Areas

34 Mr MacFARLANE to MINISTER for EDUCATION

Are teachers who have served long periods at remote centres such as Bamyili and Groote Eylandt given any preference when they wish to return to more favoured centres, or are they simply treated as though they had had a vacation away from Darwin or Alice Springs?

ANSWER

Preferential consideration is given to teachers who have served for a lengthy period in remote centres throughout the Northern Territory and seek transfer to more favoured centres.

Priority is given to applications for transfer where a teacher has served at least 2 years in remote centres and these applications are actioned before consideration is given to any other requests for transfer.

Membership of Planning Authority and Planning Appeals Committee

35 Mr ISAACS to MINISTER for LANDS and HOUSING

1. Who are the members of the Northern Territory Planning Authority and on what dates were they appointed?
2. Who are the members of the Northern Territory Planning Appeals Committee and on what dates were they appointed?

ANSWER

1. Members of the Northern Territory Planning Authority:

(a) The Northern Territory Planning Authority consists of 3 Territory members and 4 local members in respect of each planning area.

(b) The Territory members are as follows:

Name	Date of Appointment
Ronald John Withnall (Chairman)	31 July 1979
John Stowell Kennon (Deputy Chairman)	31 July 1979
Barry John Willing (Member)	31 July 1979

(c) The local members for the Municipality of Darwin and Planning Area 1 (area covered by the Darwin Town Plan 1978) are as follows:

Name	Date of Appointment	Date of Resignation
Ella May Stack	31 July 1979	15 May 1980
Cecil Albert Black	31 July 1979	
Colin Charles Firmin	31 July 1979	
Ernie Sue Wah Chin	31 July 1979	
Peter Colin Carvosso	26 August 1980	

(d) The local members for the Municipality of Katherine and Planning Area 4 (area covered by Katherine Town Plan) are as follows:

Name	Date of Appointment
Patricia May Davies	7 August 1979
Patrick John Egerton Murphy	15 October 1979
Douglas Alfred Collins	7 August 1979
Derek John Sweetman	7 August 1979

(e) The local members for the Municipality of Tennant Creek and Planning Area 6 (area covered by the Tennant Creek Town Plan) are as follows:

Name	Date of Appointment	Date of Resignation
Alfred Ernest Chittock	7 August 1979	
Gavin Boyd Carpenter	7 August 1979	
Robert Joseph Burton	7 August 1979	
Graham George Sinclair	7 August 1979	1 September 1980

(f) The local members for the Municipality of Alice Springs and Planning Area 8 (area covered by Alice Springs Town Plan) are as follows:

Name	Date of Appointment
Werner Hermann Otto Oestrich	7 August 1979
Reginald George Smith	7 August 1979
George Brown	18 September 1979
Brian Vaughan	18 September 1979

(g) The local members for Planning Area 3 (Darwin Rural Area) are as follows:

Name	Date of Appointment	Date of Resignation
Burge Dawson Brown	1 October 1979	
Leo Vincent Coyne	1 October 1979	27 March 1980
Wallace John Tracey	1 October 1979	
Russell William Anderson	15 October 1979	
John Vincent Maley	30 June 1980	

(h) The local members for Planning Area 10 (Town of Batchelor) are as follows:

Name	Date of Appointment
Bruce Richard Jones	7 March 1980
Margaret Joan Keile	7 March 1980
Eric Neil Evans	7 March 1980
Margaretta von Einem	7 March 1980

2. Members of the Northern Territory Planning Appeals Committee

Name	Date of Appointment
Dean Mildren (Chairman)	22 February 1978
Gary Hunt (Deputy Chairman)	22 February 1978
Graham Maxwell Chrisp (Member)	22 February 1978
Robert McHardy Morrison (Deputy Member)	25 January 1979
Keith William Lange (Deputy Member)	30 May 1979

Department of Transport and Works and Telecom Depots in Katherine

36 Mr MacFARLANE to MINISTER for LANDS and HOUSING

Does the government plan to convert to residential use land in Katherine presently used as Department of Transport and Works and Telecom depots?

ANSWER

No. The government recently relocated the Works Depot and developed the site for residential purposes. This is the area between Giles Street and O'Shea Terrace.

There is no intention to relocate the Department of Transport and Works plant workshop area and stores, also in O'Shea Terrace, to allow for development for residential purposes.

Commonwealth authorities such as Telecom hold title in fee simple. There is no intention to acquire such sites for residential purposes.

Housing Commission - Unused Blocks in Katherine

37 Mr MacFARLANE to MINISTER for LANDS and HOUSING

How many unused blocks of residential land are held by the Northern Territory Housing Commission in Katherine?

ANSWER

Four residential blocks are held by the NT Housing Commission: Lots 249, 247, 220 and 218, Stutterd Street.

These are large blocks suitable for duplex residences.

Under the proposed new town plan the blocks have been rezoned R1.

The Commission has written to the Planning Authority opposing the rezoning and is waiting a decision.

ABC Repeater Station in Katherine

38 Mr MacFARLANE to MINISTER for LANDS and HOUSING

1. Is he aware that the Australian Broadcasting Commission repeater station 8KN occupies prime residential land in Katherine?

2. Has any proposal been put to the Commission to find a suitable

alternative site on which to erect its 70 foot high transmission towers?

3. Will the government provide a suitable site away from residential land for the Commission's transmission towers?

ANSWER

1. The short answer is yes. The Australian Broadcasting Commission repeater station 8KN occupies lot 171, Lucy Street, Katherine which has an area of approximately 7,234 m^2 and was acquired by the Commonwealth government on 19 December 1978. Although this lot is currently zoned residential 'A' (flats), it is situated in an area ideally suited for the purposes for which it is currently used.

2. Yes. The Secretary of the Department of Lands wrote to the Manager of the Australian Broadcasting Commission on 1 October 1979 pointing out the shortage of serviced land in Katherine and asking if he would consider entering into negotiations to relocate the transmitter presently occupying lot 171. No reply has been received to date.

3. The government would be prepared to allocate an alternative site but does not consider it necessary at this time because:

   (a) land for residential purposes can be turned off quicker and cheaper in other areas of Katherine; and

   (b) since writing to the ABC, the Department of Lands has developed the Transport and Works depot site in Giles Street, Katherine (and released lots to the public) and is planning to release lots in Katherine East in May 1981, which should satisfy the current demand for residential land in Katherine.

Government Assistance to NT Cattlemen

39 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

1. Is it a fact that Top End cattlemen lose more cattle each year through seasonal and pastoral conditions inherent in the area than the Centralian cattlemen lose in droughts?

2. If so, what steps is the government taking to assist Top End cattlemen to overcome these losses?

3. Have Centralian cattlemen presented a case to the government for drought relief and, if so, with what result?

4. Is it a fact that Centralian cattlemen have had 10 good seasons and have received record prices for their cattle during the past 3 years?

5. What steps is the government taking to assist Top End cattlemen to overcome their regional problems caused by low cattle prices and annual nutrition failure?

ANSWER

1. While it is true that Top End cattlemen lose cattle at the end of each dry season, the losses in the Alice Springs district in severe drought can be devastating and far greater than the annual seasonal losses in the Top End.

2. Encouragement for the introduction of hardier breeds of cattle, e.g. Brahman or Brahman cross cattle.

   - Advice on supplementary feeding in the dry season.
   - Investigation of improved management techniques including seasonal mating and weaning trials (Kidman Springs 1981).
   - Constant search for improved pasture species, e.g. buffel grass.

3. All cattlemen have had the opportunity to present a case to government on the drought relief policy. The Centralian cattlemen are not happy with 2 aspects of the scheme and are presently negotiating with the Department of Primary Production on these points.

4. Centralian cattlemen have had a series of good seasons over the last 10 years. In late 1977, cattle prices began to improve above the disastrously low prices of the slump. The prices over the last 3 years have been reasonable but are not records, taking into account inflation.

5. The government is actively seeking new and more lucrative markets for all Territory cattle, both internationally by way of trade missions and within the Territory by supporting the establishment of abattoirs such as the Tennant Creek abattoirs. The NT government actively promoted the construction of the north-south railway which will, among other things, provide more economical transportation for cattle marketing.

   The government is continuing to carry out research into economical pasture improvement and feed supplementation.

Prosecutions under Bushfires Act

40 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

1. How many prosecutions have been instituted under the Bushfires Act during the past 5 years for lighting fires that got out of control and caused damage to pastoral leases or inconvenienced pastoral lessees?

2. In the same period, how many fires were (a) reported, (b) deliberately lit, (c) lit by careless people, and (d) lit by the pastoral lessee inconvenienced by the fire?

ANSWER

1. Since 1975 the Bushfires Council has instigated 4 such prosecutions under the now repealed Bushfires Control Act. No prosecutions have yet been instigated under the Bushfires Act 1980 which came into effect on 13 June 1980.

2. (a) 787 fires reported.

   (b) & (c) This information is not available to us as it is not always possible to determine the cause of a bushfire.

   (d) Two proved cases.

Katherine - Prosecutions for Littering

41 Mr MacFARLANE to MINISTER for COMMUNITY DEVELOPMENT

How many persons have been prosecuted for littering in Katherine during the year ended 31 October 1980?

ANSWER

Six. All prosecutions have been initiated by the police.

Airconditioning in Schools

42 Mr MacFARLANE to MINISTER for EDUCATION

1. Does his department plan to modify school buildings to enable fans to be used and larger window areas to be opened when airconditioning is not warranted or when airconditioning plants are out of order?

2. Are airconditioners in schools turned off after school each day or over weekends to reduce electricity costs and conserve fuel?

ANSWER

1. My department has no plans to modify existing airconditioned schools to enable natural or fan ventilation to be used. In our more recent fully airconditioned schools all windows can be opened, however ceiling fans are not installed in these schools. In some of our later buildings where airconditioning has been installed after the completion of the building, ceiling fans do exist.

2. Yes, all school airconditioning systems have control switches and the airconditioning is switched off after school hours. The department has already taken steps to advise schools on methods of reducing energy consumption.

Radio Telephone Communications

43 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

1. Has his attention been drawn to the communication difficulties experienced by the Numbulwar community of 600 Aboriginals, which has to share one radio telephone channel with 9 other subscribers?

2. If so, will he make representations to Telecom and the Federal Minister for Communications in an effort to upgrade radio telephone communications for these people and for the Groote Eylandt, Gove and Katherine people?

ANSWER

Responsibility for telecommunications lies with the Chief Minister. I therefore suggest that the honourable member redirect his questions.

Flood Insurance Cover in Katherine

45 Mr MacFARLANE to CHIEF MINISTER

1. Is it a fact that neither the Territory Insurance Office nor other insurers operating in the Territory will provide cover against flood in Katherine?

2. If so, will the government ensure that the Territory Insurance Office provides flood cover at reasonable rates in Katherine until a dam is built above Katherine Gorge to reduce the danger of flooding?

ANSWER

1. I am informed that flood cover in the Katherine area is not generally available from private insurers, although no doubt the cover has been provided in rare instances to selected cases. TIO has not sought out flood insurance for the reasons outlined below, although to the best knowledge of the office, TIO has not received a direct approach for flood insurance from a Katherine resident.

2. Flood insurance is a type of insurance where the premium payable may be calculated very accurately dependant upon the location of the insured risk.

   One method followed is to calculate the premium by using -

   (a) Flood charts which give the incidence of floods in a particular area and the depth to which the particular property is likely to be covered, e.g., 10 year flooding cycle, 20 year flooding cycle, and 100 year flooding cycle;

   (b) the construction of the property is another factor, as is also the trade or occupation of the risk. This has a material bearing on

whether the contents can be removed when flood threatens, e.g., some or all valuable household contents can be removed prior to immersion, this is not so in the cases of an engineering works or abattoir.

As you can see, application of these factors produce a premium commensurate with the risk, but at a dollar value few people are prepared to pay.

TIO would, as a prudent insurer, wish to charge rates based on those principles should the office be approached for flood insurance cover.

Membership of NTEC

46 Mr ISAACS to MINISTER for MINES and ENERGY

1. Who are the members of the Northern Territory Electricity Commission and on what dates were they appointed?
2. If there are any vacancies on the Electricity Commission, when is it proposed that they be filled?

ANSWER

1. Mr J. Hair, Chairman - appointed 16 October 1980, Mr K.J. Davey - appointed June 1978, Mr M.S. Purcell - appointed 30 July 1980.
2. Appointments are in train and will be announced shortly.

Expenditure by Ministers on Charter Aircraft

47 Mr ISAACS to CHIEF MINISTER

How much has been spent on behalf of each minister for air charter travel within the Northern Territory for the financial year 1979-80?

ANSWER

Hon. Paul Everingham (including charters booked in his name when several ministers travelled together)	$	61,488
Hon. Marshall Perron	$	7,644
Hon. Ian Tuxworth	$	99,996
Hon. Roger Steele	$	30,016
Hon. Jim Robertson	$	13,219
Hon. Nick Dondas	$	6,271
TOTAL	$	218,634

Public Buildings - Modifications for Handicapped Persons

48 Mr ISAACS to MINISTER for TRANSPORT and WORKS

Given that 1981 is to be the Year of the Disabled Person, what action is the government taking to ensure that all public buildings are modified to provide access for handicapped persons?

ANSWER

A seminar on 'Designing for the Disabled' was recently held in Darwin and was attended by representatives of the Department of Transport and Works, interested members of the community and members of the Handicapped Persons Association.

As a result of that seminar the Handicapped Persons Association has undertaken to prepare a list of all access deficiencies in public buildings in Darwin and suggested solutions to the problems. Other centres will be

examined later.

The Departments of Health, Community Development and Transport and Works together with the Handicapped Persons Association will examine this list in detail, provide estimates of cost and place the modifications for each building in priority order. The proposals will then be considered by Cabinet for inclusion on the capital works program.

A ramp is presently under construction at the Darwin law courts.

Roper Highway

49 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

What steps are being taken to upgrade the Roper Highway to the 4-mile landing to enable barges to use the Roper River for supply purposes?

ANSWER

This project is currently under investigation. My department has received a request to upgrade this road to enable development of the area for industrial and tourist facilities. The area has been inspected by my Chief Planning Engineer and the proposals which were put forward by private entrepreneurs in the area are being considered.

This project currently has no program status. If detailed plans of the developments are considered feasible the project will be considered for inclusion in the works program.

Borroloola-Roper Bar Road

50 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

Does the government plan to upgrade the road between Roper Bar and Borroloola to cater for tourists and travellers?

ANSWER

No. However, during the next few years the whole region will be the subject of a study to determine road needs for the area. The need for a road between Roper Bar and Borroloola will be included in this study.

Insurance Cover for Schoolchildren

51 Mr MacFARLANE to MINISTER for EDUCATION

1. Are pupils of Northern Territory schools covered by insurance when engaged in school activities, such as swimming lessons, excursions and sports, outside school grounds?
2. Are parents required to sign indemnity forms before their children engage in such school activities?

ANSWER

1. No, insurance coverage is at the parents discretion. However, for students going on interstate trips or participating in sporting contests conducted under the auspices of the Australian Secondary School Sports Federation, parents are required to take out full insurance cover.
2. Parents are required to sign indemnity forms before children go on interstate excursions.

23100.814-28

Loitering, Katherine

52 Mr MacFARLANE to CHIEF MINISTER

Do police officers in Katherine have power to deal with persons who loiter or sleep in and around public facilities?

ANSWER

Police do not have power to deal with persons who loiter or sleep in and around public facilities unless the circumstances accord with the requirements of section 47A of the Summary Offences Act where a person -

(a) loitering in a public place does not give a satisfactory account of himself; or

(b) a member of the Police Force believes, on reasonable grounds, that an offence has been or is likely to be committed; or

(c) a member of the Police Force believes, on reasonable grounds, that movement of pedestrian or vehicular traffic is obstructed.

The relevant legislation is:

LOITERING

47A (1) A person loitering in any public place who does not give a satisfactory account of himself when requested so to do by a member of the Police Force shall, on request by a member of the Police Force to cease loitering, cease so to loiter.

PENALTY: 200 dollars.

(2) Where a person is loitering in a public place and a member of the Police Force believes, on reasonable grounds -

(a) that an offence has been or is likely to be committed; or

(b) that the movement of pedestrian or vehicular traffic is obstructed or is about to be obstructed,

by that person or by any other person loitering in the vicinity of that person, or

(c) that the safety of the person or any person in his vicinity is in danger,

the member of the Police Force may require any person so loitering to cease loitering and to remove from that public place any article under his control, and a person so required shall comply with and shall not contravene the requirement.

PENALTY: 200 dollars.

(3) In this section "loiter" means to idle or linger about.

Meteorological Bureau Services for Katherine

53 Mr MacFARLANE to CHIEF MINISTER

Is he aware of plans to establish a weather office at Katherine to provide local weather forecasts as an aid to bushfire control, crop planting and aircraft movements?

ANSWER

As the provision of meteorological services is a function of the Commonwealth government, the honourable member should seek the advice of the Bureau of Meteorology.

Meat Processing Companies

54 Mr MacFARLANE to MINISTER for INDUSTRIAL DEVELOPMENT

Are there any precautions which the government can take to ensure that companies engaging in meat processing in the Territory are financially stable?

ANSWER

Companies engaged in meat processing in the Northern Territory are subject to the provisions of the Companies Act in regard to their financial activities. However there are no means for government to ensure the financial stability of such companies, particularly in view of widely fluctuating market circumstances and seasonal factors in the meat industry.

In view of the recent failing of some meat processors in the Territory, it is important that producers exercise due commercial prudence in their dealings with cattle purchasers.

Aerial Spraying of Insecticides

55 Mrs O'NEIL to MINISTER for PRIMARY PRODUCTION and TOURISM

1. Has his attention been drawn to ultra low volume techniques for aerial spraying of insecticides?
2. Can he state whether the government has published advice that light breeze conditions may give better control of the spread of aerial sprays than the calm air conditions often applying about dawn, currently favoured by crop dusters and local authorities using herbicides?
3. What steps has his department taken to enforce the conditions for aerial spraying recommended by the National Health and Medical Research Council, which has advised that herbicides are harmless if used as recommended?

ANSWER

1. The ultra low volume technique for spraying of insecticides is a well-established method of pesticide application. It has not been used widely in the NT because there has been little or no call for aerial spraying generally. It may have been used with Malathion against sorghum milage in the Katherine area. It has been used in applying Malathion to the Darwin area for mosquito and fly control immediately after the cyclone in early 1975.
2. The government has not published advice that it is preferable to apply pesticides as a ULV spray in light breeze rather than in calm air. However, as the aerial operator used in the NT is registered in WA, he has to be aware of the requirements of various application techniques as part of the registration process. In the tropics there appears to be little or no air movement at or just after dawn, and so ULV techniques can be used efficiently and effectively.
3. None. The Department of Health has been preparing draft legislation to control the use of pesticides in the NT. Under the proposed Poisons and Dangerous Drugs Act, it should be possible to enforce rates of usage of pesticides.

Blocks 534 and 536 Katherine

56 Mr MacFARLANE to MINISTER for LANDS and HOUSING

What is delaying the issuing of titles for blocks 534 and 536, Katherine?

ANSWER

The Department of Lands is currently considering allocating equal portions of reserve R1613 (lot 535) to the owners of lots 534 and 536.

This allocation cannot proceed until the reserve is revoked.

The revocation is being prepared for the consideration of the Executive Council and subject to approval the revocation will be advertised in the Northern Territory Government Gazette.

When this has been completed, an offer of allocation can be made to the applicants and subject to their acceptance and payment of reserve price, titles can then be prepared for the consolidated lots.

Land Sales in Katherine

57 Mr MacFARLANE to MINISTER for LANDS and HOUSING

When will residential land be available for sale over the counter at a one-stop shop in Katherine?

ANSWER

Consideration will be given to introducing 'over-the counter' land sales in Katherine, when it is clear that an adequate supply of land is available.

Animal Nutrition Research

58 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

What research is the government undertaking on animal nutrition in the Top End of the Territory?

ANSWER

Evaluation of the role of salt and sulphur supplements for cattle grazing both native and improved pastures in the Upper Adelaide River and Douglas-Daly areas. Field work was completed in November 1980.

Determination of the energy and amino acid levels required in poultry layer feeds for the Top End environment. One trial was completed in May 1980 and a new trial is commencing now.

Evaluation of the suitability of maize stubble for cattle grazing and the role of protein supplements in aiding stubble utilisation. One trial was conducted at Douglas-Daly Experiment Station during 1980 with field work being completed in November 1980.

Evaluation of the nutritional quality of improved pasture species through measurement of cattle performance while grazing these species.

Current work includes regional pasture testing under grazing at the Douglas-Daly Experiment Station and grazing trial evaluating Buffel grass, Verano and Stylosanthes viscosa at the Victoria River Research Station.

Field work is now terminating on a pasture species and stocking rate trial at Coastal Plains Research Station. A grazing trial to evaluate pasture legumes at Upper Adelaide River Experiment Station has been established.

A pilot trial was carried out during 1980 at Victoria River Research Station to monitor sodium and potassium levels in cattle to check for possible sodium deficiencies.

Economic feed supplement formulas for dry season supplementation in the Top End. Work is continuing on analysis of various past grazing management trials.

Offences Against Commonwealth Laws

59 Mr ISAACS to ATTORNEY-GENERAL

Is the Northern Territory to compile statistics concerning offenders and offences against Commonwealth laws in the Territory as recommended by the Law Reform Commission of Australia?

ANSWER

My government appreciates the value in having national uniform statistics which permit the tracing of Federal, State and Territorial cases through the criminal justice system from the point of reporting to their ultimate disposition.

With respect to statistics concerning offenders and offences against Commonwealth laws, the Australian Law Reform Commission did not recommend that such statistics be compiled by the Northern Territory. The commission was of the view that the Australian Bureau of Statistics should take a far more assertive role in this area. My government would be prepared to co-operate fully in assisting the Commonwealth in this matter. The following is the Law Reform Commission's recommendations concerning this topic:

75. The Statistics Power. The overall constitutional responsibility for the making of laws for the production of national statistical data is vested in the Commonwealth Parliament. The power of the Commonwealth is ample. The Parliament may make laws with respect to 'census and statistics'. To fulfil this responsibility the Commonwealth established the A.B.S. The Bureau, through its various State offices, is involved in the collection, analysis and publication of criminal justice statistics. The Bureau has also been involved, over the years, in the discussions about the creation of uniform crime statistics in Australia. Very recently, it has added a special Justice Statistics sub-section to its Demography and Social Branch. This action suggests that the Bureau has begun to recognise the need to improve its efforts in this area.

76. Action by A.B.S. In the Commission's view, the Australian Bureau of Statistics should take a far more assertive role in the development of uniform crime statistics. Progress towards national crime statistics is far too slow and promises to continue at the pace of the most unwilling State unless bold action is taken at a Federal level. While there seems to have been some opposition by State authorities, including police forces, to Federal initiatives designed to secure uniformity in the recording and reporting of criminal justice statistics, there is clear Commonwealth power conferred by the Constitution to gather national data on this subject.

This power is supplemented by the incidental powers. The Bureau should, as a matter of priority, institute, collect and publish national and uniform statistics which permit the tracing of Federal, State and Territorial cases through the criminal justice system from the point of reporting to their ultimate disposition. Comprehensive Federal and Territorial statistics concerning offenders and offences against Commonwealth laws should be compiled as a matter of priority. Statistics are required not for academic curiosity but to meet a number of important practical and, at present, unfulfilled national needs, including:

Criminal Justice resource allocation and planning. Effective utilisation of existing resources, as well as planning for the future, depends upon the availability of accurate and reliable data about the state and direction of crime.

- Evaluation of crime control policies. Assessment of what works, and what does not, among an array of criminal justice crime control techniques, demands access to a range of current statistics generated by operating agencies.
- Providing Parliament, and the public, with information about crime and the measures taken to deal with criminals. The public as the main provider and consumer of criminal justice services has a right to know the extent to which these services are fulfilling their objectives.
- Research. The establishment of new approaches to the problems of crime in the community requires experimentation. Experimentation in turn requires researchers who must rely to a large extent upon statistics produced by official bodies, like the police, courts and corrections.

The provision of up-to-date, detailed and comprehensive criminal justice statistics is already becoming a commonplace in many North American jurisdictions with the advent of computer based information systems. The technology is available in this country. What is required is a concerted effort to apply this technology in an Australian setting to Australian criminal justice data. If necessary, the Bureau should seek specific legislative power to expedite the development of national crime statistics. The Bureau should lead this effort in close collaboration with the Australian Federal Police which already has an important responsibility to prepare national statistics on drug abuse. These statistics are the closest we come in Australia to a national computer based criminal justice information system, but they are confined to a single class of crime which is in many ways atypical and special.

Utopia Land Claim

60 Mr PERKINS to CHIEF MINISTER

What was the cost to the Territory of proceedings commenced by the Attorney-General by way of prerogative writ in the High Court of Australia to challenge the Aboriginal Land Commissioner's findings on jurisdiction in the Utopia Aboriginal land claim case?

ANSWER

Approximately $15,000.

Alice Springs - Alcohol-Related Offences

61 Mr PERKINS to CHIEF MINISTER

1. Is it a fact that in October 1979 some 227 people appeared on more than 600 charges in the Alice Springs Court?
2. Is it a fact that some 90-95% of these charges were alcohol-related?
3. If so, what action does he propose to take to reduce the high incidence of alcohol-related crimes in the Territory?
4. Will the government undertake an analysis of the residential status-background and the educational and cultural background of the majority of offenders before the courts in the Territory in order to construct a profile of the typical offender and to make available such data to interested community organisations and, if not, why not?

ANSWER

1. Records are not kept in such form as would disclose whether or not the

figures quoted are accurate.

Records, as kept, disclose that in October 1979, 364 appearances were made in relation to 953 charges.

2. The question gives no guidance as to what is meant by 'alcohol-related' charges.

136 of the 953 charges were directly related to alcohol, viz. 'Driving under the influence', 'Exceed .08%', &c.

Some of the charges, not on the face of them directly related to alcohol, would, no doubt, relate to offences committed while under the influence of alcohol or in the course of obtaining alcohol (e.g., stealing money to purchase the same).

No statistics are kept listing reasons given for committing or allegedly committing offences.

A significant number of the charges relate to minor traffic offences. The 90-95% figure mentioned in the question is almost certainly far too high.

Alice Springs - TAFE Positions

62 Mr PERKINS to MINISTER for EDUCATION

1. How many TAFE positions exist in Alice Springs?
2. What are (a) the levels of these positions, and (b) who are the incumbents?
3. Are these positions sufficient for the government to implement the training component of the 'Five Year Plan' for the improvement of Aboriginal communities as outlined in the Legislative Assembly by the Chief Minister?
4. If not, how many new positions and at what levels will be created?
5. When will these positions be filled?
6. Will he supply details of his department's involvement in the 'Five Year Plan', including (a) the number of educators involved; (b) the support services to be provided; (c) the resources to be allocated; (d) the budgets; and (e) the goals?
7. If not, why not?

ANSWER

1. Six.
2. CTS BAND 3 TAFE - Mr T. Marling
   CTS BAND 2 TAFE - Mr R. Davidson
   CTS BAND 1 TAFE - Mrs D. Shanahan
   CTS BAND 1 TAFE - Mr M. Brearly

   Aboriginal Adult Education Assistant (NTPS) - Mr R. Golder and Mr J. Macumba.

3. - 6. The matters contained in these questions are currently the subject of Cabinet consideration.

7. Not applicable.

Education Department Document - 'Single Officers Housing Review'

63 Mr PERKINS to MINISTER for EDUCATION

1. Is there a Department of Education document entitled 'Single Officers Housing Review'?

2. If so, will he supply me with a copy of this document?

3. If not, why not?

ANSWER

1. The document you refer to is possibly a minute to my Director of Educational Facilities, dealing with single officer housing in Katherine and Tennant Creek.

2. I do not propose to supply copies of this minute as it is an internal department paper.

3. If the member wishes to direct specific questions on issues of concern to him in this area, I will arrange for answers to be provided.

Schools Commission Innovations Committee Grants

64 Mr PERKINS to MINISTER for EDUCATION

1. Is it a fact that an organisation or incorporated body must first obtain the approval of the Department of Education in order to be eligible for a grant from the Schools Commission Innovation Committee?

2. If so, why?

3. What criteria are used by his department in assessing an organisation's performance or goals in respect of approvals from the Schools Commission Innovation Committee?

4. Is it a fact that his department has refused to approve the activities of the Yipirinya School in Alice Springs in conjunction with 2 applications for a grant from the Schools Commission Innovation Committee made in 1978 and 1979 and, if so, why?

5. Does an 'independent school' within the terms of the Education Act require approval from the department in order to be eligible for a grant from the Schools Commission Innovation Committee?

6. What is the government's intention in regard to Aboriginal self-management in education?

7. Is it a fact that the Principal Education Adviser for the Alice Springs region recently informed the Yipirinya Council that the best solution for the Council is to become a part of the Department of Education and, if so, why?

8. Does he plan to support other education proposals similar to those of the Yipirinya School?

ANSWER

1.(i) Innovations grants are made to individuals, and not to organisations or incorporated bodies.

(ii) The Schools Commission Innovation Committee in the NT is independent of the NT Department of Education. Normally one member of the committee represents the department, and he cannot, nor does he wish to, control the decisions of the group.

2. See answer to question 1.

3. The department has no formal role in the distribution or use of Schools Commission Innovation Grants, the department would consider:

(i) whether the program is likely to contribute to the educational development of those involved;

(ii) whether it has good support of parents and community;

(iii) whether the proposal is innovative;

(iv) whether it may duplicate aspects of existing programs;

(v) how it might relate to other educational services; and

(vii) its relationship to other programs being developed in the wider NT situation.

However, it should be reiterated that the department does not have authority to reject or approve applications for innovation grants.

4. The department has not refused to approve the activities of the Yipirinya School Council in conjunction with their applications for a grant from the Innovation Committee. The Yipirinya School Council's application was referred by the Schools Commission to the department for the following reasons:

(i) As the style of program likely to be established by the council was already in trial and operation in a number of locations throughout the NT it was felt that it could be better supported by the department if run in conjunction with those already resourced and run by its experienced officers;

(ii) the commission was keen to ensure that any program established would complement those of other primary education programs in the area; and

(iii) while proposing to run an 'independent' type school system, the council's proposals did not provide sufficient detailed information to demonstrate that the Yipirinya School Council could independently raise funds, draft and administer a program of planning, housing, staffing and operating an approved education program. Neither did it provide adequate information on the development and implementation of a curriculum for the school.

It is understood that recently the Education Centre in Alice Springs agreed to fund a Yipirinya training program designed to develop Aboriginal assistant teachers. (The Education Centre is 'semi-autonomous' and jointly funded by the Department of Education and the Schools Commission.)

5. See answer to question 2.

6. The government's policy on Aboriginal self-management is exactly the same as outlined by the Department of Aboriginal Affairs. The Department of Education recognises the role of the Commonwealth Department of Aboriginal Affairs in setting policy for Aboriginal education. That policy acknowledges self-management through the upgrading of qualified Aboriginal teachers, and the involvement of school councils in the development and contribution to school policies, programs and their operation. However, the department is obliged to carry out the requirements of the NT act. That act requires the department to be assured that the education offered to children and provided to children is of a satisfactory standard.

7. No, it was not the Principal Education Adviser who contacted the Yipirinya School Council, it was the Director, South. In full consultation with the Secretary and the Deputy Secretary (Programs) he made an offer to the Yipirinya School Council. It is true that the offer envisaged the school as a government school, but allowed for a most flexible and responsive range of provisions - the widest possible under the NT Education Act. The offer included:

(i) the provision of 3 teachers and 3 assistant teachers with normal government school funding to the Yipirinya School Council;

(ii) the Yipirinya School Council would operate as a normal school

council, and advise the teachers and regional office on the best way an education program could be offered; and

(iii) the community have full participation, while the program would have the back-up the of department's full range of resources.

8. While the Department of Education is willing to respond to specific and differing educational requirements which arise in the NT, I believe the department would be acting irresponsibly if it did so without first ensuring that:

(i) any new proposal genuinely reflected the desires and was likely to meet the needs of the particular community or group; and

(ii) the proposal did not duplicate an existing program.

The government is well aware of the difficulties faced by Aboriginal communities and groups, arising out of their search for self-management and its necessary skills.

I believe a program in the 'Fringe Camps Area' will only be viable if it is coordinated by the department, and has the full resources of its curriculum and advisory staff to assess and cater for:

- the very complex program they envisage;
- the upgrading of assistant teachers; and
- the proper and educationally sound introduction of bilingual programs;

as well as enabling the provision of the necessary highly skilled professional staff committed to consultation and involvement of the people in the professional and cultural validation of the program.

Alice Springs - Transport for Schoolchildren

65 Mr PERKINS to MINISTER for EDUCATION

1. Which company has the contract to transport schoolchildren in Alice Springs?
2. How many companies tendered for the job?
3. What were the tender prices submitted?
4. What is the cost per kilometre of transporting schoolchildren to school in (a) Alice Springs; and (b) Darwin?

ANSWER

Matilda Tours Pty Ltd won the contract to transport schoolchildren in Alice Springs for an estimated annual expenditure of $166,752.

As the balance of information sought deals with the confidential activities of the Northern Territory Tender Board, I suggest this question be redirected to the Treasurer.

Central Australian Community College Hospitality Course

66 Mr PERKINS to MINISTER for EDUCATION

1. Why did the person charged with setting up the hospitality course at the Central Australian Community College resign?
2. What steps are being taken to find a replacement?
3. When is it anticipated the hospitality course will start?
4. Does the government feel there is any urgency for such a course to be started in the Centre?

ANSWER

1. Mr Gould came to Alice Springs to prepare an advising to the Department of Education on the establishment of the course, not to set up the school. He was offered an extension to this contract, but for family reasons declined to accept.
2. As the task has been completed the question has no meaning.
3. The hospitality courses will commence in the first semester 1981.
4. The government fully supports the establishment of the Department of Hospitality and Catering. Gillen House will be modified and upgraded to serve as a venue, and the head of department is preparing courses for use early in 1981.

Kormilda and Yirara Colleges - Graduates

67 Mr PERKINS to MINISTER for EDUCATION

1. How many students graduated from all courses last year at Kormilda College and Yirara College respectively?
2. What proportion of last year's graduates from Kormilda College and Yirara College respectively are now (a) employed; and (b) unemployed?

ANSWER

1. The member for MacDonnell is, I am sure, quite familiar with the nature of the courses provided at Kormilda and Yirara Colleges, and as such must agree that the term 'graduated' is not really appropriate. In fact, it is somewhat difficult to ascertain precisely which statistics he is seeking.

   Both Kormilda and Yirara Colleges provide transitional courses for students intending to proceed to a high school. These courses may be of one or 2 years duration, leading to enrolment at either year 8 or year 9 in a high school, depending on the readiness of the individual.

   The colleges also conduct vocational programs, to cater particularly for students from communities where post-primary courses are not available at the local schools. These courses, of 2 to 4 years duration, are intended to lead to either the return of the student to his or her community for employment or, alternatively, an additional year of specialised training at the college.

   In addition to the courses outlined above, some short term special courses have been offered in student driver education and small power boat maintenance and safety.

   If by graduation, the member means completion of any of the above courses, the numbers of 'graduates' from the 2 colleges are:

   Kormilda - 85; and Yirara - 20.

2. Although neither college keeps accurate records of the post-school employment of their students, it is known that of the students which 'graduated' last year some found employment in the following fields:

   - apprenticeships with the Northern Territory Electricity Commission;
   - dental assistant;
   - stockman;
   - police cadetships;
   - various forms of work in their local communities (school, health clinic and store); and
   - enrolled in teacher training at Batchelor College.

   A large percentage of those that 'graduated' were girls, who by virtue

of their attendance at these residential colleges return to their communities better educated in mothercraft, nutrition and community health.

Conference of Council Presidents and Aboriginal Community Advisers

68 Mr PERKINS to MINISTER for EDUCATION

I refer to the Conference of Council Presidents and Aboriginal Community Advisers held at Kormilda College in January 1980, and ask -

1. Did the government agree at that conference that a minimum of 40 adult educators were required to properly staff all major centres in the Territory and, if so, what action has been taken to recruit staff for these positions?

2. Will he supply a list of (a) the names of adult educators presently employed, (b) the locations where they are employed, and (c) their major skills and qualifications?

ANSWER

1. Ideally, 40 adult educators are required to properly staff all major centres in the Territory, and the government has made a commitment towards this goal.

2. (a) and (b)

(a)	(b)
R. Lister	Snake Bay
A. Harrison	Oenpelli
J. Flattum	Yuendumu
G. Freeman	Warrabri
R. Earnshaw	Bagot
R. Davidson	Alice Springs
R. McRoberts	Garden Point
J. Prior	Yirrkala
L. Brooks	Milingimbi
D. Puffett	Darwin Rural
B. Haynes	Jabiru
A. Steele	Roper River
J. Irvine	Borroloola
T. Strike	Bamyili
S. Wenman	Maningrida
D. Shannon	Katherine
Temp. vacant	Papunya
I. Robert	Hooker Creek
P. McKinnon	Numbulwar
L. Fracek	Tennant Creek
D. Shanahan	Alice Springs
N. Quigley	Croker Island
A. Carter	Darwin
J. Dunstall	Angurugu

(c) All adult educators are qualified teachers.

Housing Commission - Questionnaire on Sale of Flats

69 Mr PERKINS to MINISTER for LANDS and HOUSING

I refer to a notice sent to some tenants of the Housing Commission in Alice Springs recently in which inquiries were made regarding interest in the possible purchase of flats and townhouses, and ask -

1. How many responses to the questionnaire have been received?

2. How many of the respondents showed strong, positive interest in purchasing flats or townhouses?

3. Will the Housing Commission proceed with any sales?
4. If so, when will the sales be completed?
5. In which particular block or blocks of flats and townhouses will sales be made?
6. How did the Commission arrive at the price of $42,000 to $43,000 per unit?
7. Has he received a letter dated 22 October from the South Court Residents' Association of Alice Springs which raises some concern about tenants' security; and, if so, what reply has he made to the letter?

ANSWER

1. Alice Springs - 75.
2. Alice Springs - 16.
3. That is the intention and will be determined when the survey has been analysed.
4. Applications to purchase flats and or townhouses will be processed in the same manner as applications to purchase houses and will be accepted as soon as a decision is made on the complexes to be offered for sale.
5. It has not yet been determined which block or blocks of flats and townhouses will be sold.
6. Valuations referred to Darwin units only. The Alice Springs units will be valued early December.
7. The letter from the South Court Residents Association dated 22 October 1980 has been received. The reply included:
   (a) Answer No. 6 above;
   (b) the present tenants who cannot afford to buy or who do not wish to purchase a flat or townhouse would be offered other suitable alternative accommodation at least equal to or if necessary higher than their present entitlement; and
   (c) that there is absolutely no truth in the rumour that if tenants do not wish to purchase, the entire block of flats will be sold to a developer.

Housing Commission - Document on Aboriginal Housing

70 Mr PERKINS to MINISTER for LANDS and HOUSING

I refer to a document tabled in the Assembly by the Chief Minister and issued by the NT Housing Commission in March 1980. The document is titled 'Proposal for Achieving Improved Housing Conditions for Aboriginal Communities in the Northern Territory', and is part of what is commonly known as the 'Five Year Plan', and ask -

1. What is the status of the document?
2. Have the recommendations in the document been considered by Cabinet?
3. If so, have the recommendations been accepted?
4. Has the Territory government had discussions with the federal government regarding the proposal to disband 'the advisory teams of architects and other technical staff engaged on Aboriginal housing within the Department of Construction in the NT'; and, if so, what has resulted from these discussions?
5. What discussions have been held between officers of the Housing Commis-

sion and the leaders of Aboriginal communities regarding the government's proposals as outlined in the 'Five Year Plan'?

6. What has been the result of these discussions?

7. Does the Housing Commission expect to employ more staff to explain the proposals to Aboriginal communities?

8. Did the former Chairman of the Housing Commission, Mr G. Stolz, and officers of the Commission visit a number of Aboriginal communities just before the last Legislative Assembly election with proposals for housing which had to be accepted or rejected before the end of June?

9. If so, when was it decided to make these visits, and what was the reason for the haste?

ANSWER

1. The document was an information paper prepared by NT government departments for the consideration of the NT government.

2. The recommendations of the document are being progressively refined and incorporated in submissions to Cabinet. Action cannot be implemented until such time as the difficulties outlined in 3 herein are overcome.

3. & 4. The NT government has had discussions on the matter with officers of the Department of Aboriginal Affairs in April 1980. The proposal to have the funding for general housing on Aboriginal communities transferred from the Commonwealth was rejected by the Commonwealth. Until such time as the function of housing on communities, along with the appropriate level of funding, is transferred to the NT government, the Commonwealth's officers from the Department of Construction will be involved with communities.

5. Discussions on staff housing on communities have been conducted between some communities and the NT Housing Commission. Discussions on general housing cannot be held until funding is provided by the Commonwealth.

6. A works program of 5 NTPS staff houses was undertaken on 4 communities.

7. Yes.

8. Yes.

9. It was proposed to make the visits as a result of a speech made on 14 February 1980 when the Treasurer announced that $300,000 had been earmarked specifically to provide staff housing on communities. As the moneys were to be expended during the 1979-80 financial year, a quick initiative had to be taken to ensure this.

Housing Commission - Advertisement in Weekend Australian

71 Mr PERKINS to MINISTER for LANDS and HOUSING

I refer to an advertisement in the 'Weekend Australian' of 2-3 August 1980 by P.A. Consulting Services Pty Ltd of North Sydney for a Director of Finance and Loans in the NT Housing Commission, and ask -

1. Is it the policy of the commission to use management consultants to select staff?

2. If so, does this indicate a lack of confidence by the government in the recruitment skills of senior commission staff and personnel staff from other areas of government?

3. What were the total costs involved in hiring management consultants to select staff in this instance?

4. What does the term 'operate on a commercial basis' mean in the same advertisement?

ANSWER

1. It is not usual policy of the commission to use management consultants for recruitment. In this case, however, it was considered that a consultant could assist in shortlisting candidates.
2. No.
3. Total costs were $4,916.20 comprising $1,800 fees, and $3,116.20 recruitment expenses.
4. The term 'operate on a commercial basis' refers to the requirement for the commission to use commercial accounting principles pursuant to section 66 of the Financial Administration and Audit Act.

Mereenie Aquifer

72 Mr PERKINS to MINISTER for MINES and ENERGY

1. How many oil wells have been drilled in the Amadeus Basin in Central Australia?
2. How many of these wells have (a) intersected the Mereenie sandstone aquifer, (b) been plugged, (c) been capped, and (d) what is the current status of these wells?
3. What precautions have been taken to ensure that the Mereenie aquifer has not been contaminated by hydrocarbons and salt water from the oil-bearing formation?
4. Is there any danger of the Mereenie aquifer being polluted as a result of past, present or future oil well drilling operations in Central Australia?

ANSWER

Twenty-six oil exploration or development wells have been drilled in the Amadeus Basin. Of these, 8 were at Mereenie and 3 were at Palm Valley. Hydrocarbon shows were found in 6 other wells.

All wells at Mereenie and Palm Valley were drilled through the Mereenie formation.

The 3 wells at Palm Valley were completed as suspended gas producers.

Of the wells at Mereeenie, one is completed as a suspended oil producer.

All wells in the Amadeus Basin have been completed in accordance with good oil field practice. This includes the setting of plugs and cement in the well such as to prevent cross contamination of aquifers or hydrocarbon-bearing zones.

There is no danger of the Mereenie aquifer being polluted as a result of past oil exploration activities. The government will ensure that safety standards are maintained.

Well completion reports are held by my department.

Services to Aboriginal Communities

73 Mr PERKINS to MINISTER for TRANSPORT and WORKS

1. Who is responsible for the maintenance of internal service roads in Aboriginal communities?

2. Who is responsible for the maintenance of main access roads to Aboriginal communities?

3. Is the planning of main roads to Aboriginal communities and internal service roads undertaken as a correlated construction exercise?

4. Who is responsible for the construction and maintenance of access roads to Aboriginal outstations?

5. Does the government offer on-site technical assistance to Aboriginal communities in respect of building?

6. Is there Aboriginal representation on the Rural Roads Board?

7. What safeguards exist to ensure the preservation of Aboriginal sacred sites which may be affected by road construction?

ANSWER

1. The internal roads within Aboriginal communities are maintained by the local council using funds allocated in the council's budget through Community Government Division of Community Development.

2. If the main access roads to the Aboriginal communities are public roads then the Department of Transport and Works, Roads Division, maintains the roads. Otherwise the responsibility lies with the Department of Community Development Aboriginal Essential Services to provide funds.

2. Main access roads and internal service roads are not undertaken as a construction exercise.

4. The Community Government Division of the Department of Community Development is responsible for the programming and provision of funds for the construction and maintenance of access roads to Aboriginal outstations, except insofar as those roads mentioned in 2 above provide all or part of the access to a community. The standard of road and method of construction should be decided upon only after full consultation with the community involved.

5. The Department of Transport and Works has in the past given assistance and supervision associated with the technical aspects of road building and the Darwin Community College does offer assistance with programs for operations of equipment on site.

6. The Rural Roads Conference holds annual conferences to which invitations are extended for representatives for the Land Councils to attend. However past conferences have shown that representatives very rarely attend.

7. After full consultation with local Aboriginal communities in the development of these projects, each road proposal is referred to the Land Councils and the Environmental Unit of the Territory Parks and Wildlife Commission to enable all environmental matters, including Aboriginal sacred sites, to be safeguarded and preserved.

Alice Springs - Environmental Damage by Roadworks

75 Mr PERKINS to MINISTER for TRANSPORT and WORKS

I refer to the reply by the former Minister for Transport and Works to a question asked in February 1980 by the Member for Stuart concerning rehabilitation of the roadside and other areas through the hills north of Alice Springs, in which he said that his department had 'spent in excess of $100,000 on repairs to some of the areas that have been damaged', and ask -

1. Can he confirm the statement reported in the Centralian Advocate on 27 March 1980, that '$100,000 had been allocated to reclaim environmental degradation in the area?'

2. Has there been one or two allocations of $100,000 for this work?

3. Does his department regard the words 'reclaiming', 'repairing', 'regeneration' and 'rehabilitation' as synonymous with the term 'cleaning up after the contractor?'

4. Was the sum of $73,384 expended on the hire of a loader and dump truck for rehabilitation, reclamation, repair or regeneration?

5. Does his department normally allocate large sums of money to clean up after a contractor has completed a job, or is it normal practice for contractors to carry out such cleaning up work themselves and for the cost of this work to be taken into consideration when the tender is lodged?

6. Does further work need to be carried out to repair the damage caused; and,if so,what is (a) the nature of the work, (b) how much will it cost, and (c) when will it be completed?

ANSWER

1. Yes. $103,405 was allocated for environmental rehabilitation which included cleaning up after the original contractors went into liquidation.

2. There has been only one allocation of $103,405 for this work.

3. My department regards the words 'reclaiming', 'repairing', 'regeneration' and 'rehabilitation' as being synonymous with the term 'performing works necessary for the good of the environment and benefit of the public' and,as such, is normally included in contract documents.

4. The sum of $73,384 was spent on hiring a dump truck and loader simply to clear the construction area left in a mess after the original contractors went into liquidation.

5. It is normal practice for contractors to pay for and carry out work themselves after completion of a contract, However, in this instance, the original contractors - I.G. Favaro & Sons - went into liquidation halfway through the contract and it was necessary for the Department of Transport and Works to take over the contract. In doing so, the department took over all responsibilities for the contract which included the cleaning up afterwards, and the environmental rehabilitation of the area affected by construction.

6. No further rehabilitation work requires to be carried out. Buffel grass was planted in the ripped areas and all that is now required is for natural regeneration of vegetation to take place. This is occurring satisfactorily.

7. Yes. As previously advised, the borrow pits, quarries and stockpile sites have all been ripped and buffel grass planted in the ripped areas. In addition, top soil was laid in the borrow pits. All work was carried out under expert supervision of the Conservation Commission (then the Territory Parks and Wildlife Commission).

Women's Refuges

76 Mr ISAACS to MINISTER for HEALTH

How much was allocated to the Northern Territory by the Commonwealth government for women's refuges in (a) 1979-80, and (b) 1980-81?

ANSWER

The Commonwealth government contributed $30,000 to the operating costs of

the Alice Springs Women's Centre in 1979-80. This was made available to the Northern Territory government under the Community Health Program grant scheme.

The Commonwealth did not contribute to the funding of other women's refuges in 1979-80 or to any refuges to date in 1980-81.

Emergency Accommodation

77 Mr PERKINS to MINISTER for LANDS and HOUSING

I refer to the announcement of the Treasurer in May this year of the government's commitment to providing emergency accommodation for people in certain hostels in need of housing, and ask -

1. When does he expect the scheme to begin?
2. How many people are at present on the waiting lists for (a) public, and (b) private housing?
3. In the 3 months to 31 October 1980, how many people have (a) applied for out-of-turn housing allocations, (b) have been accepted?
4. What is the breakdown of the successful and unsuccessful applicants in terms of whether they are unemployed, single parent families and so on?

ANSWER

1. Negotiations are taking place and accommodation should be available by early next year.

	Darwin	Alice Springs
2.	Public 1366 NTPS 721	Public 525 NTPS 102
3.	111 interviews 23 to committee (application accepted) 7 approved 16 rejected 78 not referred	29 interviews 14 to committee (application accepted) 3 approved 19 rejected 7 withdrawn by applicants
4.	Approved 3 employed 2 supporting parents 2 blind	Approved 1 eviction 1 supporting parent (mother and 1) 1 supporting parent benefit (mother and 1 - medical reasons)
5.	Not Approved 50 employed 10 invalid pensioners 28 supporting parent benefits 2 unemployed benefits 1 aged pensioner 3 part-time employed	Not Approved 1 pensioner Nil unemployed 5 supporting parent benefits 13 employed

Social Security Payments and Funding to Organisations

78 Mr PERKINS to MINISTER for COMMUNITY DEVELOPMENT

1. How many people have (a) applied for hardship payments on referral from the Department of Social Security, and (b) have received assistance in the 3 months to 31 October 1980?
2. How do these figures compare with the same period in 1979?

3. What steps is he taking to ensure that organisations in receipt of grants and subsidies know well in advance of the end of the financial year if their submissions have been successful and to what extent?

ANSWER

1.(a) The Department of Social Security has advised the Department of Community Development that it has made 287 referrals to the Community Welfare Division during the months of August, September and October 1980.

(b) The Community Welfare Division of the Department of Community Development provided financial assistance to a total of 1,775 individuals during the 3 months prior to 31 October 1980.

2.(a) The number of referrals from the Department of Social Security during the period of the 3 months to 31 October 1979 is unavailable. However, during December 1979, 60 referrals to the Community Welfare Division were made by the Department of Social Security.

(b) The Community Welfare Division of the Department of Community Development provided financial assistance to 580 individuals during the months of August, September and October 1979.

3. Applications for grants-in-aid administered by the Department of Community Development will be called for before the end of 1980.

Applications received will be assessed and decisions made on funding during the financial process leading up to the 1981 budget. It is unlikely decisions will be made until commencement of the 1981-2 financial year.

Organisations will be advised as early as practicable.

Dhupuma College Staff

80 Mr LEO to MINISTER for EDUCATION

How many Aboriginal house parents and social advisers from Dhupuma College are still employed in the Department of Education?

ANSWER

All ex-Dhupuma Aboriginal employees are still employed by the Education Department except J. Dhanadhana who accepted a position with the Elcho Island Council.

Fisheries Vessels

83 Mrs LAWRIE to CHIEF MINISTER

1. Are the fisheries or police vessels 'Salloo' and 'Pobassoo' presently being used for research and monitoring of fish species, numbers and distribution?

2. If so,what is the level of expertise on board these vessels to conduct such research?

ANSWER

The Police Fisheries Enforcement Unit Vessel 'Pobassoo' is doing work in the Daly River area with 2 fisheries division research personnel monitoring fish species and numbers. One of the Fisheries Officers is a qualified biologist and barramundi expert. He has a Fisheries Division Technical Officer Grade 2 as a research assistant.

The current research tour is the second since the Fisheries Enforcement

Unit Vessel 'Pobassoo' was transferred to Police Force control. The previous tour was to the Daly River area from 15 October to 22 October 1980. On this occasion the vessel was crewed as previously mentioned and research personnel consisted of the biologist and an acting technical assistant Grade 2 from the Fisheries Division.

The 'Salloo' is currently based at Gove Harbour. This vessel is being used to police the commercial fishing industry in the Gulf of Carpentaria and northern waters.

The vessel has a permanent crew of 3. The skipper is a Northern Territory policeman who has previous experience as a prawn trawler skipper in Queensland. The vessel engineer is a transferred Fisheries Enforcement Inspector. The deckhand is a policeman with numerous years of navy experience.

The 'Salloo' has an additional crew of 2 to be used as a boarding party. These persons alternate from an experienced fisheries enforcement inspector and a policeman to 2 experienced policemen, as manpower allows. The 'Salloo' will carry out regular patrols of the gulf and northern waters and as previously agreed will be available for research purposes and assistance with foreign fishing vessels.

The area of 'Fisheries Development and Research' was retained by the Fisheries Division, Department of Primary Production at the time of transfer.

The Police Force agreed to assist in research programs and to date has honoured this commitment. It is envisaged research programs will continue in the future on a joint operational basis.

Todd River Reserve

84 Mr PERKINS to CHIEF MINISTER

1. What action has the government taken to improve the condition of the Todd River Reserve in Alice Springs?
2. Is it true that mistletoe infestation is accelerating the death of the Todd River gums and that the growth of bamboo and bullrushes is choking new growth and creating a potential flood hazard?
3. If so, will the government provide assistance to preserve the Todd River gums and enable Alice Springs to retain its reputation as a town of scenic beauty?

ANSWER

1. The government has created a Todd River Reserve under the management of the Conservation Commission. Active rehabilitation measures have been undertaken to improve the reserve, including clean up, planting of trees, irrigation, development of lawns, low profile fencing to exclude vehicles, and other significant projects.
2. Mistletoe infestation on trees is a symptom of poor tree health and can accelerate the decline. Bullrushes and reed grass in the riverbed pose a flooding and a fire threat. These species will gradually be removed by normal means - a difficult task.
3. A proportion of the budget of the Conservation Commission is provided annually for the rehabilitation project and an extra $20,000 was provided this year to speed up the program.

Ti Tree - Coroner's Inquiry into Shooting

85 Mr PERKINS to CHIEF MINISTER

When will the coroner's inquiry be held into the fatal shooting of a man in the Ti Tree area in July 1980?

ANSWER

It is assumed that the coroner's inquiry into the Ti Tree shooting will be held after the charges arising out of the incident have been heard and determined by the appropriate court. No date has yet been set so far as I am aware.

Pensioners - Taxi Voucher Scheme

86 Mr PERKINS to MINISTER for COMMUNITY DEVELOPMENT

1. Is he aware that in May 1980, the former Minister for Community Development stated that $30,000 had been set aside to introduce a taxi voucher system for the aged, handicapped and ill as part of the government's contribution to the International Year of the Disabled Person?
2. If so,has $30,000 been set aside for this purpose?
3. At what stage of development is the taxi voucher scheme at present?

ANSWER

1. The former Minister for Community Development indicated that the transportation needs of disabled people would be reviewed as part of the Northern Territory government's participation in the International Year of the Disabled. He indicated that this matter would be referred to the various groups involved in providing transport for disabled people.
2. A total of $90,000 has now been set aside for IYDP projects including a Commonwealth grant of $50,000.
3. The matter of transportation and, in particular, the feasibility of introducing a taxi voucher system has been referred to the Regional Committees on the handicapped for their consideration and recommendation. As you are aware, these committees are to co-ordinate actions related to IYDP initiatives.

   I am now advised by the committees that the introduction of a voucher system would be premature as the number of transport disabled in the Northern Territory is unknown. Both the Department of Transport and Works and the Taxi Advisory Council have also considered this matter but have not made any firm proposals. Therefore, a taxi voucher system or an alternative scheme will not be implemented until the Regional Committees complete their review of the transport needs of disabled persons and make their recommendations to the government.

Berrimah Prison

88 Mr PERKINS to MINISTER for COMMUNITY DEVELOPMENT

1. Will he table any report compiled on the escape from the Berrimah prison of Frederick David Howard?
2. If not,what assurances can he give to the public that adequate precautions have been taken to ensure that prisoners cannot escape to cause consternation in the community and extra work for the already hard-pressed police force?

ANSWER

1. I will not be tabling any report compiled about the escape from Berrimah prison of Frederick David Howard.
2. Following the escape of prisoner Howard security procedures and facilities at Darwin Prison have been reviewed and upgraded. The public can take comfort from the fact that although the Northern Territory has the

highest imprisonment rate in Australia, its escape rate is the second lowest in the country. The lowest is Tasmania which has not had an escape over the past 12 months.

The Northern Territory has had 2 successfully recaptured escapees within the same period. This level of public protection compares more than favourably with the other Australian states, particularly New South Wales, where the most recent analysis indicates 1 prisoner escapes from custody every 2.2 days.

Alice Springs Prison

89 Mr PERKINS to MINISTER for COMMUNITY DEVELOPMENT

1. Have alterations been made to the Alice Springs prison which will in effect reduce the area available to female prisoners?
2. If so, what action will be taken to ensure that an adequate exercise area is available for female prisoners?
3. Does the government propose to build a prison farm in the Alice Springs area?
4. If so, (a) where will it be located, (b) what is the estimated cost of establishing it, and (c) what will be the accommodation capacity?

ANSWER

1. & 2. Building alterations are in progress at the gaol in Alice Springs to provide adequate toilet and shower facilities and an assembly area for the 50 male and female staff at the institution.

   Upgrading of these facilities was among the undertakings given by management following an industrial dispute 12 months ago. The new works also incorporate an office for the gatekeeper and chief prison officer, and take up about 55 square metres of the women's section of the prison.

   An area of more than 430 square metres remains for the outdoor recreational needs of women prisoners. Having regard for the limited numbers of female prisoners held at Alice Springs the area available for exercise is considered to be adequate.

3. & 4. There is a proposal that an institution be established in the Alice Springs region along the lines of a prison farm. At this stage investigation is in progress into the availability of a suitable site, the type of agricultural activity to be undertaken and other feasibility aspects of the proposal.

   Early thinking is that the institution would accommodate from 40 to 60 minimum security prisoners. Establishment costs have not yet been estimated with any accuracy since a number of variable factors in the proposal are still to be resolved.

Alice Springs - Pinball Parlours

90 Mr PERKINS to MINISTER for COMMUNITY DEVELOPMENT

1. Is he aware of recent Alice Springs media reports linking the advent of pinball parlours in the town with an increase in the local juvenile crime rate?
2. If so, what action does he propose to take to have this situation investigated and the problem overcome?

ANSWER

1. Yes.

2. The government is monitoring the operations of pinball parlours. Reports have been received on the subject from the Police, Department of Community Development and the Youth Forum. The Places of Public Entertainment Act is presently being studied for its effectiveness in controlling the operation of the parlours.

Ewaninga Reserve - Uranium Discovery

91 Mr PERKINS to MINISTER for MINES and ENERGY

1. Is it a fact that a German consortium has made an uranium discovery in the vicinity of the Ewaninga Conservation Reserve, south of Alice Springs?
2. If so, is he aware of any plans to mine and process this uranium?

ANSWER

Uranium mineralization has been known to exist in a wide area north-west of the Ewaninga Conservation Reserve for some years. The company involved, Uranerz Australia, reports that they have not, as yet, discovered sufficient mineralization of an economic grade to warrant them proceeding to mining and they are actively continuing their exploration.

Until sufficient reserves of material are found, which are economically viable to extract and process, no company can entertain definite plans of mining and processing. I have visited the area and noted that the exploration is conducted with the greatest care to avoid adding to the natural surface effects of the uranium mineralization. Uranerz is exploring within an exploration licence formerly numbered EL 845 and now numbered 2571. A mining lease is required before mining can proceed.

Yulara Tourist Village

92 Mr PERKINS to MINISTER for MINES and ENERGY

I refer to the government's proposal to provide solar power at the new Yulara Village, and ask -

1. Does the government intend to proceed with the proposal to supply solar power to Yulara Village?
2. If so, (a) when will solar power be supplied to Yulara Village, and (b) what will be the total cost?

ANSWER

The government is keen to promote the application of solar energy technology in the Northern Territory as much as possible, and therefore the proposal to install a solar power station at Yulara is of particular interest. However, the capital cost of approximately $16 million which the McDonnell Douglas Astronautics Company and the Sabemo Transfield Group quoted in the preliminary proposal for the plant is unacceptably high. Officers from the Department of Mines and Energy and the Northern Territory Electricity Commission are continuing with a full technical and economic appraisal of the proposed solar plant, and hopefully a much lower capital cost can be negotiated.

The assessment of the proposal and discussions with Sabemo and McDonnell Douglas are expected to continue for at least several months. Also, because of the power generation subsidy arrangements, Commonwealth government consultation is required.

In the meantime, planning is proceeding for the installation of diesel generation equipment in the initial stage. This capacity will be subse-

quently supplemented by either the solar system, or further diesel sets, depending on the outcome of the current negotiations.

Eye Health and Trachoma Program

93 Mr PERKINS to MINISTER for HEALTH

I refer to recent media reports regarding the National Eye Health and Trachoma Program and ask - when will the National Eye Health and Trachoma Program resume its unfinished work throughout Territory communities?

ANSWER

I would have thought the position with regard to the Trachoma Program had been made perfectly clear in recent weeks.

The facts are:

1. The Northern Territory Department of Health is running a Territory-wide trachoma program which has been continuously applied to school and pre-school children over the last 2 or more years.
2. This program is being independently monitored in the Wave Hill area by a team from Melbourne University.
3. The Department of Health and the Royal Australian College of Ophthalmologists have recently agreed to co-operate in trachoma control and the treatment of the sequelae of the disease.
4. The next step is for the Royal Australian College of Ophthalmologists to put up a proposal, through the Commonwealth, to the NT Government for consideration, and we are awaiting this response.

Alice Springs - Farm Produce

94 Mr PERKINS to MINISTER for LANDS and HOUSING

Bearing in mind that the price of vegetables in Alice Springs is sometimes double that in Adelaide, and that the so-called 'farm area' is plagued by salt problems, will he advise what steps will be taken to provide a more suitable alternative area for production of farm produce in the centre?

ANSWER

The government has been aware for some time of the need for alternative agricultural farms in the Alice Springs region due to the increasing salinity in the area known as the farms area.

Several investigations and reports have been written and consultants commissioned for the rehabilitation of the farms area.

In addition, water drilling programs have been carried out over a number of years to assess areas with agricultural potential. These areas include the Mereenie Basin, land between the Mereenie Basin and Alice Springs and the southern part of the Alice Springs region to James Range.

Suitable soils and adequate ground water are available near Ti Tree where Mr Ian Dahlenburg and his family have established a successful agricultural enterprise.

Unfortunately the government has no vacant Crown land available for release in this area as the land suitable for market gardening is held under pastoral lease tenure by the Aboriginal Land Fund Commission and is now subject to a traditional Aboriginal land claim.

The criteria for an agricultural area serving Alice Springs are a suffic-

iently large area of suitable soils, adequacy of water supply, close proximity to Alice Springs or location on a major transportation route. To date, efforts to locate areas with this combination of features have been unsuccessful.

Home Loans Scheme

95 Mr PERKINS to MINISTER for LANDS and HOUSING

How many people in receipt of (a) part, and (b) full social security and service pensions have been granted loans under the government Home Loans Scheme?

ANSWER

(a) Statistics are not available.

(b) Nil.

Araluen and Sadadeen Subdivisions

96 Mr PERKINS to MINISTER for LANDS and HOUSING

1. On what basis did the government select the companies to undertake development of the Araluen and Sadadeen subdivisions in Alice Springs?

2. In the case of Arian Investments Pty Ltd, does the government have evidence of the company's financial backing other than the fact that it has a paid up capital of some $2?

ANSWER

1. The government selected the companies to undertake the development of the Araluen and Sadadeen Subdivisions in Alice Springs on the basis of section 3.7 of the Information Document for the development of these areas.

   In accordance with the Crown Lands Act, the major assessment factor was 'that the recommended applicant was more likely than any other applicant to carry out satisfactorily the subdivisions of the subject land'.

   The critical factors considered when making this assessment were:

   (a) financial, physical and technical capacity of the applicant;

   (b) amount of premium offered, the 'up-front' cash outlay being regarded as an indication of commitment and determination;

   (c) the price at which buy-back allotments were offered;

   (d) commitment to an acceptable time-table of lot turn-off - considerable importance being placed on lot turn-off no later than May 1981;

   (e) apparent ability and capacity to perform quickly;

   (f) demonstrated intent to produce variety and innovate while containing costs.

   Because of the critical land supply and housing situation in Alice Springs, favourable consideration was also given to house-land package proposals.

2. Yes. I cannot quantify this information as it is confidential.

Residential Subdivisions

98 Mr PERKINS to MINISTER for LANDS and HOUSING

Will private developers be invited to register interest in the development of all future residential subdivisions in the Northern Territory?

ANSWER

No. However, wherever possible it is intended that future residential subdivisions will be undertaken by private developers, although the government will at all times reserve the right to exercise its option. Each project will be judged independently and will be based on such factors as the economic situation and government policy at the time of development.

Adelaide River Crops

99 Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

What staff is currently available for research on and development of the crops which will be complementary to the rice production scheme on the Adelaide River?

ANSWER

Two professional staff positions are available for research and development of rice and complementary crops in the Adelaide River area.

One person will be engaged full-time on rice research while the other will be part-time on rice and part-time on complementary crops.

In addition, it is planned to recruit a professional officer to work on the extension, monitoring and development aspects of crops and pastures on commercial properties in the Adelaide River area.

Staff of the Research Services Branch (entomology, plant pathology and chemistry) will also work on complementary crops as required.

Adelaide River Crops

100 Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

1. What crops other than rice will be grown on the Adelaide River?
2. Have markets been found for such crops which will ensure that they will be viable propositions?

ANSWER

1. It is anticipated that legume crops such as mung beans, soya beans or phasey beans will be grown in rotation with the rice areas.
2. Ready markets for mung beans and soya beans, however, further research on these crops will continue.

Berrimah Experiment Farm

101 Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

1. Has he or the government called for or carried out any investigation into land at Berrimah Experiment Farm for other than its present use?
2. If so, what other possible uses for the land are envisaged?

ANSWER

To my knowledge no specific inquiry has been ordered into alternative use of land at the Berrimah Experiment Farm.

However, that does not discount any general planning investigation into needs for transport corridors relevant to future development at East Arm Peninsula, Palmerston and the future railway line.

Radio Telephone Communications

102 Mr MacFARLANE to CHIEF MINISTER

1. Has his attention been drawn to the communication difficulties experienced by the Numbulwar community of 600 Aboriginals, which has to share one radio telephone channel with 9 other subscribers?

2. If so, will he made representations to Telecom and the Federal Minister for Communications in an effort to upgrade radio telephone communications for these people and for the Groote Eylandt, Gove and Katherine people?

ANSWER

1. The Numbulwar community is currently served by a base radio which belongs to CMS but is available for more general use. A radio-telephone has also been in operation since March 1979. In addition the school and hospital have their own base radios installed by the respective departments. Numbulwar Council has ordered its own radio to use along with the outstation sets when that system is established.

2. Telecom Australia has just completed a study of remote area telecommunications in Australia, with particular emphasis on Territory outback communities. The content of this study is currently under discussion with the relevant Northern Territory government departments. This should result in detailed consultations with all remote communities in the Northern Territory to establish precise requirements with action following to provide adequate services. This should result in a dramatic improvement to services at Numbulwar and other communities.

NT Development Corporation

103 Mr ISAACS to TREASURER

1. Which loans were taken over from the Commonwealth by the Northern Territory government at the time of self-government and which are now being handled by the Northern Territory Development Corporation?

2. What is the status of each outstanding loan?

ANSWER

1. The categories of loans taken over from the Commonwealth and the Department or Authority handling them are as follows:

Loan	Department-Authority
Water Supply Development Ordinance	Water and Sewerage Division, Department of Transport and Works
Long Term Low Interest Loans to Church Organisations	Department of Community Development
Sale of Bores (Drought Relief)	NT Development Corporation
Flood Relief Loans	NT Development Corporation
Special Assistance Loans:	
- Northern Meat Exporters Pty Ltd	NT Development Corporation
- Alice Springs Abattoirs Pty Ltd	NT Development Corporation
- Carba Australia Ltd	NT Development Corporation
Darwin Business Relief Loans	NT Development Corporation
Primary Producers Board Loans	NT Development Corporation
Sale of Government Homes	NT Housing Commission
6% Concessional Loan Scheme	NT Housing Commission
Home Finance Trustee Loans	NT Housing Commission

2. The status of each outstanding loan is as follows;

Water Supply Development Ordinance

Outstanding amounts are still being collected by the Water and Sewerage Division of the Department of Transport and Works.

Long Term Low Interest Loans to Church Organisations

The Northern Territory government has agreed to waive the balance of these loans if the organisations concerned pay, within 2 years, all the money owed to the NT government, under the scheme, for instalments due between 1 July 1978 and 30 June 1980.

Loans Administered by the NT Development Corporation

There are still amounts outstanding relating to the following loans. The collection of these outstanding amounts is being administered by the Development Corporation.

- Darwin Business Relief Loans
- Primary Producers Board Loans
- Sale of Bores (Drought Relief)
- Flood Relief Loans
- Special Assistance Loans;

(a) Northern Meat Exporters Pty Ltd
(b) Alice Springs Abattoirs Pty Ltd

Details of the amounts outstanding are considered confidential.

Home Finance Trustee Loans

The amount owing to the Commonwealth as at 30 June 1978 was consolidated into a loan repayable over 45 years. Annual instalments comprising interest and principal are paid to the Commonwealth.

6% Concessional Loans Scheme

The amount owing to the Commonwealth as at 30 June 1978 has been consolidated into a loan which the Housing Commission is repaying to the Northern Territory Treasury over 45 years.

This loan is not being repaid to the Commonwealth.

Sale of Government Housing Loans

The Commission is repaying the amount which was owing to the Commonwealth as at 30 June 1978 to the Northern Territory government over 45 years. This loan is not being repaid to the Commonwealth.

The last 2 loans are deemed to be repaid to the Commonwealth by the fact that the revenue they create for the Northern Territory government has been deducted from the total base of financial assistance which would otherwise be made available by the Commonwealth. In other words, revenue which would have normally flowed to the Commonwealth has been offset against the financial assistance the Commonwealth makes to the Northern Territory.

Darwin Airport Site

105 Mr ISAACS to MINISTER for TRANSPORT and WORKS

Has the siting of the new Darwin airport been agreed upon and, if so, where is the site to be?

ANSWER

The actual siting of the new Darwin airport terminal has not been agreed upon but it will be on the northern side of the main runway.

It is anticipated that a public display of the available alternative sites will take place in January-February 1981 and a final decision will be made after the public has had a chance to express views.

Nurses Quarters at Darwin Hospital

106 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

1. How many applications have been received for the utilisation of the vacant nurses quarters at the Darwin Hospital?
2. What use is being proposed for the accommodation units there?

ANSWER

1. Four groups have corresponded with the Northern Territory government showing interest in the nurses quarters, Temira House and Lambell House at the old Darwin Hospital site.

   One group has shown interest in Temira House separately.

   Three groups have shown interest in Lambell House separately.

   Three groups have expressed interest in the use of Lambell House annex separately.
2. Current negotiations are for the proposed use of Temira House and Lambell House as medium to low cost accommodation.

Able Freight Services Pty Ltd

107 Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

1. Has Able Transport been a contractor to the Department of Transport and Works in (a) 1978-9, (b) 1979-80, and (c) 1980-81?
2. Who are the principals of Able Transport?
3. Have any principals of Able Transport been employees of the Department of Transport and Works? If so, what positions did they hold?
4. Are any principals now employees of the Department of Transport and Works? If so, what positions do they hold?
5. Are any immediate relatives of the principals of Able Transport employees of the Department of Transport and Works? If so, what positions do they hold?
6. Has an investigation been carried out into the contracts awarded to Able Transport by the Department of Transport and Works in Alice Springs?
7. If so, (a) what recommendations were made as a result of the investigation, and (b) what action has been taken as a result of the recommendations?

ANSWER

1. I am informed that Able Freight Services Propriety Limited commenced operation on 7 April 1980. This company carried out 2 general freight services for the Department of Transport and Works on 21 April 1980 and 25 April 1980.
2. The principals of the company are B. & M. Carige.
3. & 4. One of the principals, Mr B. Carige, is currently employed by the department as the District Manager (Roads), Alice Springs (Senior Technical Officer, Grade 2). However, Mr Carige has tendered his resignation and will terminate his services at the close of business on 15 January 1981.

5. A daughter of Mr Carige, Miss Robyn Carige, is employed by the department in the Alice Springs Personnel Section as a Travel Clerk (Administrative Class A3).

6. As part of a wider investigation carried out in August-September 1980 a check was made on work carried out by this company for the department.

7. There were no recommendations made in respect of this company's work for the department.

Nuclear Power-station

108 Ms D'ROZARIO to MINISTER for MINES and ENERGY

1. When he speaks of a nuclear power plant for Darwin is he referring to a light water reactor, a high temperature gas reactor or a fast breeder reactor.
2. Is the NT government looking at the possibility of uranium enrichment in the Northern Territory? If so, what details can he give the Assembly?
3. When was the Northern Territory Energy Council first informed of the NT government's sudden enthusiasm for nuclear power?
4. Is it likely that the proposed nuclear power plant could be built in what is known as the Darwin rural area? If so, where?
5. Has the government had any talks at all with Nabalco about the possibility of processing alumina in Darwin, using nuclear power?
6. He has been quoting 'proponents of the nuclear power-station'. Who are these proponents? If they are outside government, will he name them?
7. What would be the estimated power requirement for a uranium enrichment plant in Darwin?
8. Have any representatives of nuclear power-station building companies been to the Territory for discussions with the NT government? If so, when and who were those companies?
9. Will he give full details of any plans to build a hexafluorine plant in the Northern Territory?
10. Is Gunn Point a possible location for a nuclear power-station?
11. How much would the nuclear power plant favoured by the government cost? What would be its output and how long would it take to construct?
12. What is the estimated cost of building a uranium enrichment plant in the Northern Territory?
13. Was he aware when he publicly stated that safety precautions had worked at Three Mile Island that the latest estimated cost of cleaning up that nuclear power plant is $750 million and that it could take 3 or more years to decontaminate the plant?
14. Is he aware that, according to one American advocate of nuclear power, Mr Pedr Beckmann, weather conditions such as heat inversion and strong winds which exist in Darwin at certain times of the year, could lead to a disaster and loss of life in the community, in the event of a release of radio-active material from a nuclear plant?

ANSWER

1. Nuclear energy is being considered as an option for Darwin's power requirements by the Department of Mines and Energy and Northern Territory Electricity Commission. Economic and technical assessment of the American light water reactors and the Canadian heavy water reactors is

being carried out by officers of my department. High temperature gas cooled reactors and fast breeders are not being considered.

2. The Uranium Enrichment Group of Australia, a consortium of BHP, CSR, WMC and Peko initiated by the Commonwealth government, is considering the feasibility of a uranium enrichment industry in Australia. The Northern Territory government would be interested in the establishment of such an industry in the Northern Territory if it could be shown to be technically and economically feasible.

3. The Northern Territory Energy Council is a purely advisory body and hence there is no requirement for government to inform the council of its policy decisions. However, as a matter of information, the council was informed in November 1980 that nuclear energy was an option being considered.

4. Since no firm decision to proceed with nuclear power has been taken at this stage, no site has been identified. However, it is envisaged that should such a station ever be constructed, it would be 50-80 km from Darwin, and part of a much larger grid system than that current.

5. The Northern Territory government has held talks with Nabalco about the possibility of processing alumina in the Northern Territory. No reference was made to the use of nuclear power for such a plant. Clearly, electricity at rates much cheaper than those current would have to be offered to attract such an enterprise.

6. I am not clear as to whom you mean as the 'proponents of nuclear power'. Could you please provide more detailed information on these quotes you refer to?

7. An enrichment plant which employs gaseous diffusion technology requires about 2500 MW of power. Centrifuge techniques require considerably less power.

8. No representative of any nuclear reactor company has been to the Territory to discuss nuclear energy with the government.

9. The Northern Territory government has approached the Commonwealth government regarding the establishment of a plant in the Territory to convert yellowcake into uranium hexafluoride. Also, the Uranium Enrichment Group of Australia study covers the establishment of a conversion plant. No firm plans have been formulated as yet.

10. No.

11. A 1000 MW electric light water reactor would generate about 6 billion kilowatt hours per year, costing about $A1,000 million. It is estimated that a nuclear power plant could be operational within 10 years of the date of any commitment to proceed.

12. A uranium enrichment plant of 10 million separative work units per year capacity would cost about $A3 billion and would provide employment for 3,000 personnel during construction and 1,000 personnel for operations.

13. It would be far too complex to describe the events which took place at Three Mile Island. However, melting of the core was prevented. The fact remains that no member of the public has ever been injured by a commercial reactor accident, including the one at Three mile Island. It has also been recognised that the errors at Three Mile Island were operator errors due to lack of training.

14. Risks for reactor accidents undoubtedly exist but there is substantial evidence to show that these risks are considerably less than from other activities which are accepted by society.

    Only a multiple and sequential failure of components would cause the worst reactor accident, namely, the melting of the reactor core. It has

been estimated that it would take 12-14 hours after the onset of meltdown, for the release of radioactivity to the atmosphere. The dispersal of radioactivity in the atmosphere would be governed by a complex variety of environmental, meteorological and other factors having various probabilities of occurrence.

Probabilities of progressively unfavourable conditions become increasingly lower, so the likelihood of highly unfavourable conditions is extremely low.

The worst conceivable and least probable consequence of a meltdown might require evacuation of the area within a 16 km radius from the reactor.

South Australian Symphony Orchestra Visit

109 Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

From what allocation in the 1979-80 budget was the $40,000 paid by the NT government towards the cost of the tour by the South Australian symphony orchestra drawn?

ANSWER

No payment was made in 1979-80 towards the cost of the tour of the Northern Territory by the Adelaide Symphony Orchestra.

Local Government Authorities - Grants

110 Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

I refer to item 02, sub-division 4, division 65 of the budget papers, and ask -

1. What is the amount paid to each of the local government authorities at Darwin, Alice Springs, Katherine and Tennant Creek by way of (a) disbursement of Commonwealth grants from personal income tax sharing, (b) operational subsidies, (c) establishment grants for major capital projects, and (d) dollar-for-dollar grants towards cost of capital works on roads, parking and recreational facilities?
2. What projects and works will receive grants under 1. (c) and (d)?

ANSWER

1.(a) DISBURSEMENT OF COMMONWEALTH GRANTS FROM PERSONAL INCOME TAX SHARING

Total amount provided			$ 1,440,000
Distributed as follows:			
(i) Darwin	$	685,440	
(ii) Alice Springs	$	269,280	
(iii) Katherine	$	97,920	
(iv) Tennant Creek	$	171,360	
(v) Amount retained for distribution by NT Grants Committee	$	216,000	(i.e., 15%)

(b) OPERATIONAL SUBSIDIES

Total amount provided	
PITS moneys	$ 1,440,000
NT government contribution	$ 1,250,000
Available for distribution	$ 2,690,000

Distributed as follows:

(i)	Darwin	$ 915,000	
(ii)	Alice Springs	$ 457,000	
(iii)	Katherine	$ 457,000	
(iv)	Tennant Creek	$ 457,000	
(v)	Amount retained for distribution by NT Grants Committee	$ 404,000	(i.e., 15%)

(c) ESTABLISHMENT GRANTS FOR MAJOR PROJECTS

(i)	Darwin	$ 1,167,000
(ii)	Alice Springs	$ 78,000
(iii)	Katherine	$ 1,211,000
(iv)	Tennant Creek	$ 185,000

(d) $ FOR $ GRANTS TOWARDS COST OF CAPITAL WORKS ON ROADS, PARKING AND RECREATIONAL FACILITIES

(i)	Darwin	$ 450,000
(ii)	Alice Springs	$ 90,000
(iii)	Katherine	Nil
(iv)	Tennant Creek	Nil

2.(a) PROJECTS - ESTABLISHMENT GRANTS

(i) Darwin

Casuarina Pool $2 : $1 subsidy		$ 107,000
Marrara Sporting Complex -		
water and sewerage services	$ 200,000	
cable relocation	$ 60,000	$ 260,000
Performing Arts Centre		$ 100,000
City Car Parking Facilities		$ 700,000
		$ 1,167,000

(ii) Alice Springs

Undoolya Road Connector	$ 78,000

(iii) Katherine

Roads	$ 30,000
Swimming Pool (balance)	$ 451,500
Civic Centre - Library	$ 700,000
New Garbage Dump	$ 30,000
	$ 1,211,500

(iv) Tennant Creek

Civic Centre - Library	$ 25,000
Construction Roadworks	$ 50,000
Municipal Depot	$ 110,000
	$ 185,000

2.(b) PROJECTS - $ FOR $

Attached are the programs submitted by the Darwin and Alice Springs Councils proposing projects for funding on a $ for $ basis.

The program for the CCD totals $1.97 million and will be prioritorised before submission to the Minister for signature.

Some items submitted by the Alice Springs Corporation are the subject of further investigation as to their eligibility for funding under $ for $ criteria.

ITEMS AS SUBMITTED BY COUNCILS FOR $ FOR $ FUNDING

The Corporation of the City of Darwin

1. ROADS

Progress Drive
West Lane
Austin Lane
East Point Road (resealing Ross Smith Avenue to Bayview Street)
Gardens Road/McMinn Street
Upgrading of footpaths
Austin Lane
Traffic lights Bennett and Knuckey Streets
Banksia Street (reconstruction)
Aralia Street construction
Hot mix overlay (city streets)

2. OTHER

Fence Oval No. 2
Automatic sprinklers Oval No. 2
Cavenagh Street Carpark (boom gates)
Northern suburbs (sub-depot shed)
Garden Oval (entrance gates ticket box)
Tiered portable seating
Playground equipment
Crisp Street Oval lighting
City and urban beautification
Holtze Cottage Botanical Gardens
Tourist caravan park and camping area

PROGRAM TOTAL $ 1,972,057

The Corporation of the Municipality of Alice Springs

1. ROADS

Construction service lane Gregory Terrace to Stott Terrace
Seal Arltunga Park access road
Construct Colocag Car Park
Extend Gillen School bus bay
Construct car park access Telegraph Terrace to Speed Street
Crisp Street turnaround

2. OTHER

Lecture training facility swimming centre
Extensions to Ross Park toilet block
Development of Garden Cemetery

PROGRAM TOTAL $ 90,000

Northern Territory Library Service

112 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

1. What is the total value of books purchased by the Northern Territory Library Service since 1 February 1980 from the following suppliers

or booksellers:

(a) NT Firms:
(i) Connoissuer Bookshop, (ii) Marrons Newsagency, (iii) Arunta Art Gallery, (iv) Book Mark, (v) Fisher Firearms, (vi) Bookworld, (vii) Territory Book Depot, (viii) Educational and Technical Books, (ix) Tivoli Books, (x) Studio Arts, (xi) Singing Tree, (xii) Northbooks, (xiii) Arnhemland Gallery, (xiv) Corey Books, and (xv) Information Centre; and

(b) Interstate Firm: Westbooks?

2. What is the value of purchase made from the following publishers since 1 February 1980: (a) Gordon and Gotch, (b) Axiom, (c) Collins, (d) Hodder and Stoughton, (e) Book Wise, (f) ANZ Book Co., (g) Paul Hamlyn, and (h) Australian Institute of Aboriginal Studies?

3. Was any attempt made to purchase books from Territory suppliers before direct purchases were made from the above-named publishers?

4. If no attempt was first made to purchase from local suppliers, why not?

5. If an attempt was made to purchase supplies from the above publishers through local suppliers, what disadvantages were there which prevented such transactions?

6. What is the anticipated level of expenditure to be made by the Northern Territory Library Service for purchasing books for the financial year 1980-81?

7. What is the total value of purchases made by the Northern Territory Library Service in the period 1 July to 15 December 1980?

ANSWER

1. (a) NT Firms:

(i)	Connoisseur Bookshop	$ 5,269
(ii)	Marrons Newsagency	$ 161
(iii)	Arunta Art Gallery	$ 5,406
(iv)	Book Mark	$ 125
(v)	Fisher Firearms	$ 91
(vi)	Bookworld	$ 19,950
(vii)	Territory Book Depot	$ 3,267
(viii)	Educational and Technical Books	$ 1,146
(ix)	Tivoli Books	$ 4,308
(x)	Studio Arts	$ 65
(xi)	Singing Tree	$ 56,264
(xii)	Northbooks	$ 67,459
(xiii)	Arnhemland Gallery	$ 193
(xiv)	Corey Books	$ 684
(xv)	Information Centre	$ 65
	TOTAL	$ 164,453

(b) Interstate Firm: Westbooks $ 51,292

2.

(a) Gordon and Gotch	$ 3,000
(b) Axiom	$ 2,984
(c) Collins	$ 7,194
(d) Hodder and Stoughton	$ 3,000
(e) Book Wise	$ 78
(f) ANZ Book Co.	$ 201

(g) Paul Hamlyn	$	1,135
(h) Australian Institute of Aboriginal Studies	$	50
TOTAL	$	17,642

3. No attempt was made to purchase the material obtained from the publishers/wholesalers listed in 2.(a)-2.(d). Attempts were made to purchase the material from publishers/wholesalers listed in 2.(e)-2.(h) from local suppliers.

4. The books purchased from Gordon and Gotch, Axiom, Collins, and Hodder and Stoughton were paperbacks which were supplied at wholesale prices to Northern Territory Library Service. Had these been purchased from local booksellers then these booksellers would have added their margin to the wholesale price. The paperbacks were purchased from the publishers/distributors direct in order to reduce the unit cost and thereby save public funds. Based on discounts then applying with local booksellers, this represented a saving of approximately $5,000.

5. The bulk of the books purchased from the publishers listed in 2.(e)-2.(h) were titles not readily available from local booksellers. When additional funding was made available to Northern Territory Library Service for the purchase of books towards the end of the last financial year, the service visited local booksellers seeking specific titles and categories of books. Those which were not immediately available from local booksellers were obtained as a matter of urgency from the publishers/distributors.

6. $356,000.

7. $152,446 to 30 November 1980.

Correspondence Students

113 Mr MacFARLANE to MINISTER for EDUCATION

Are Northern Territory correspondence students obliged to undertake their courses through the NT Department of Education and, if so, what regulations impose this obligation?

ANSWER

Northern Territory correspondence students are under no legal obligation to undertake their courses through the Northern Territory Department of Education. However, because of the cost factor involved the South Australian Correspondence School will no longer provide years 8, 9 and 10 courses for Northern Territory students, and as further years are introduced the corresponding years will cease to be open to students from the Northern Territory.

Katherine - Meteorological Bureau Services

115 Mr MacFARLANE to CHIEF MINISTER

Will the Chief Minister, as head of the NT government, act to establish a weather office at Katherine to aid bushfire control, which costs the taxpayer and pastoralists money and time, to enable crop planting to be done at times of optimum seasonal conditions, and to assist in control of aircraft movements?

ANSWER

The Bureau of Meteorology advises that it provides the following weather services for Katherine from its Regional Forecasting Centre in Darwin:

- public weather forecasts for Katherine (including maximum and minimum temperatures) with new issues at 5 a.m., 11 a.m. and 5 p.m. daily;
- fire weather warnings and warnings of other types of meteorological conditions likely to endanger life and property, issued when the need arises;
- forecasts and warnings for regular public transport and general aviation operating via Tindal Airport and in the Katherine area;
- information on weather records, climatological advice, and special meteorological consultative advice for the Katherine area.

Having regard to the present services provided by the bureau for the Katherine area, I do not consider it necessary to make representations to have the Bureau of Meteorology establish a separate weather office at Katherine.

Darwin Community College Handbook 1981

116 Mr VALE to MINISTER for EDUCATION

What was (a) the cost to prepare, publish and distribute the Darwin Community College's 1981 Handbook, (b) how many copies were printed, and (c) for what purpose is the handbook used?

ANSWER

(a) The net cost is estimated at $4,441 made up of:

- Cost to prepare and publish - materials	$ 3,804
- salaries	$ 3,037
	$ 6,841
- Cost of distribution	$ 600
	$ 7,441
- Less estimated sales (1,500 copies at $2 each)	$ 3,000
	$ 4,441

(b) 2,500 copies.

(c) To inform students and prospective students of the courses offered by the college, enrolment and academic progress procedures, and other services and facilities offered by the college in 1981.

Katherine - Pensioner Cottages

117 Mr MacFARLANE to MINISTER for LANDS and HOUSING

1. Is there any limit on the number of people who may reside at and use toilet and ablution facilities at houses in Katherine built specifically for Aboriginal pensioners and for Aboriginal families?
2. If so, (a) what facilities are provided and (b) how many persons reside at and use the facilities in the houses on Lot Nos 1305, 1304, 1303, 1302, 1301, 1300, 1299 and 1298 Prior Court Pensioners' cottage, 1242, 1241 and 1240 Lockheed Road and 1254, 1253 and 1252 Cox Crescent?

ANSWER

1. Normal family unit plus limited short term visitors.

2.(a) Toilet facilities provided are one internally and one externally.

(b) The dwellings located at Lots 1305, 1304, 1303, 1302, 1301, 1300, 1299 and 1298 are not owned or administered by the Housing

Commission. They are built on Crown land and belong to the Kalano Association.

The numbers of persons who normally reside at the remaining Lots is as follows: Lot 1242 - 8; Lot 1241 - 6; Lot 1240 - 6: Lot 1254 - 4; Lot 1253 - 3; Lot 1252 - 6.

Housing Commission

118 Mr MacFARLANE to MINISTER for LANDS and HOUSING

Is it a function of the Housing Commission to compete with Aboriginal hostels and private enterprise in Katherine by providing free accommodation for visiting Aborigines in houses under its control?

ANSWER

No.

NT Police Force

119 Mr MacFARLANE to CHIEF MINISTER

1. What is the estimated saving from the closure of (a) Daly Waters, and (b) Larrimah police stations?
2. What percentage of all the members of the police force are stationed in (a) Darwin (b) Alice Springs, and (c) the remainder of the Territory?
3. How may outback residents connected to radio telephones, contact sophisticated, modern police aircraft in cases of emergency?
4. Are NT Police aircraft suitable for use on bush airstrips at night?

ANSWER

1.(a) It is not intended to close Daly Waters Police Station.
(b) There will be a capital saving of approximately $80,000 in the closure of Larrimah Police Station through not having to upgrade the facility there which would have included the provision of a new residence; plus annual costs of $58,000 comprising salaries and allowances $39,000; vehicle capital costs $4,500; repairs and maintenance to fixed assets $6,000; and general administrative and running costs of $8,500.

2. It would be misleading to answer this question in too simple a form. It is necessary to recognise that the Northern Territory Police Force comprises three major groups:

1. Administrative (Including Training)
2. Operational Support (including, as examples, the Police Air Wing, Forensic Science Section, Radio Technicians, all of which provide direct support to operational police throughout the Territory notwithstanding the majority operate from Darwin).
3. Operational.

The following table shows the distribution of police at locations requested (as at February 1981) by number and as a percentage of the total.

Location	Administrative	Operational Support	Operational	Totals
Darwin	39 (7.5%)	88 (16.5%)	200 (37.5%)	327 (61.5%)
Alice Springs	1 (--)	4 (0.5%)	71 (13.5%)	76 (14 %)
Other	--	--	131 (24.5%)	131 (24.5%)
	40 (7.5%)	92 (17 %)	402 (75.5%)	534 (100 %)

It might also be beneficial to note the relative ratios of operational police per head of population in the 4 main centres which are shown in the following table using estimated populations as at February 1981:

- Darwin 1 : 275
- Katherine 1 : 113
- Tennant Creek 1 : 109
- Alice Springs 1 : 239

This shows that Katherine and Tennant Creek have approximately double the number of operational police per head of population than have Darwin and Alice Springs.

3. Outback residents connected to radio telephone cannot talk direct to police aircraft or any other aircraft by that medium, just as they cannot talk to their local police station by that medium if their station is not connected to the radio telephone.

   However, the police aircraft are in constant communication with all police stations by one or more of a variety of radio networks (HF, VHF and UHF) and outback residents can communicate messages by relay to and from police aircraft by telephoning a police station connected to telephone or radio telephone.

4. Police aircraft are suitable for routine use on bush strips at night where the strips are adequately lit and equipped to Department of Transport specifications for night take-offs and landings. In an emergency they are no more or less suitable to such a task than the general class of twin-engined aircraft in use in the Northern Territory.

Northern Airlines - Use of Heron Aircraft

120 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

Can he confirm that the use of Heron aircraft by Northern Airlines between Katherine, Tennant Creek and Alice Springs is a deliberate attempt to replace the Friendship aircraft used on the 'milk run'?

ANSWER

Since the announcement of the closure of Northern Airlines various options are being developed for the future conduct of the 'milk run'.

In this context, the government has announced its readiness to licence Ansett to provide F27 services through Katherine as an interim measure to fill the gap caused by Northern Airlines' withdrawal from the route.

In terms of the long term solution, it is the government's intention that RPT links through Katherine provide regular scheduled services appropriate to the demand. Whether this means F27 aircraft or not remains to be seen, since negotiations with interested parties are still proceeding.

Prison Farm

121 Mr MacFARLANE to MINISTER for COMMUNITY DEVELOPMENT

When will another prison farm be established in the Territory?

ANSWER

This government has been aware of the need to provide additional facilities for minimum security prisoners in the Northern Territory for some time. As early as 1979-80 financial year the government requested Correctional Services to examine the possibility of developing a prison farm type complex in the Alice Springs region. For some time difficulty was experienced in locating a suitable site, but this now appears resolved,

although negotiations have not yet been completely finalised.

The project which will, in its initial stages, provide accommodation for up to 40 prisoners with a possible later expansion to a maximum of 100, has now been admitted to the 1980-81 design list program. It is anticipated construction will commence during 1981-82 financial year subject to budgetary consideration.

Discount Air Fares for Public Service

122 Mr MacFARLANE to CHIEF MINISTER

Has the Northern Territory government explored the possibility of saving taxpayers' money by seeking discounts on the air fares which are part of the entitlements of NT public servants?

ANSWER

The government has been exploring the possibility of obtaining travel discounts for staff on duty and on leave entitlements. There are complex issues involved and the investigation may take some time to complete.

Katherine - Pensioner Cottages

123 Mr MacFARLANE to MINISTER for HEALTH

Is he aware of any health regulation limiting the number of occupants of pensioner cottages for Aborigines in Prior Court, Katherine and, if so, does he intend to have the regulation enforced?

ANSWER

Yes. The Public Health (Nuisance Prevention) Regulations 22(1) and (2) determine the minimum air space allowable for sleeping quarters.

The problem of overcrowding of the accommodation referred to has been recognised by the Department of Health for some time and has been the subject of considerable activity.

V.B. Perkins and Co. Pty Ltd

125 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

1. Is he able to state whether or not the Department of Aboriginal Affairs has become a shareholder in the barge company V.B. Perkins & Co. Pty Ltd and, if so, what benefits have resulted from the department's interest in the company?
2. Is it cheaper to ship goods to Numbulwar from Cairns than from Darwin and, if so, is this because of a Queensland government subsidy?

ANSWER

1. Department of Aboriginal Affairs is not a shareholder in the barge company V.B. Perkins and Co. Pty Ltd.
2. Mason Shipping Co. of Cairns charges $97.50 per tonne for general cargo shipped Cairns to Numbulwar.

   Barge Express Pty Ltd of Darwin charges $106.20 per tonne for general cargo shipped Darwin to Numbulwar.

   The Queensland government does not pay a freight subsidy to the Mason Shipping Co. on this service.

Yulngu Association

127 Mr MacFARLANE to CHIEF MINISTER

1. Is he aware that some years ago prima facie cases were established against certain employees of Yulngu Association in regard to financial matters and that these employees were subsequently found innocent?

2. If so, what efforts are being made to locate and charge the guilty persons?

ANSWER

The following is the present situation surrounding the Yulngu Association fraud matters:

Peter Richard Williams, who was the Executive Officer of the Yulngu Association between September 1978 and March 1979, and John Alan Hindley, a former motor mechanic with the Yulngu Association, appeared before the Supreme Court, June sittings 1980, jointly charged with the following offence:

'Between September 1978 and March 1979 at Katherine in the Northern Territory of Australia conspired together to cheat and defraud Blue Line Autos Pty Ltd of $160,000.00'.

Peter Richard Williams was at the same sittings independently charged with:

'On or about March 2nd, 1979 at Katherine in the Northern Territory of Australia, did falsely pretend to Reginald Alwyn Litchfield of Katherine that he had the authority of the Committee of the Yulngu Association, Katherine, to negotiate a loan from the ANZ Bank in Katherine for the sum of $115,000.00, and by means of that False Pretence did attempt to obtain from the said Reginald Alwyn Litchfield the sum of $115,000.00 in money with intent to defraud. Contrary to Section 214 of the Criminal Law Consolidation Act'.

and further:

'On the 19th day of March, 1979 at Katherine, in the Northern Territory of Australia, being entrusted with the property of Yulngu Association namely cheque number 001211 drawn on the Australian and New Zealand Banking Group Limited in order that he may apply it for travelling expenses, fraudulently converted to the use or benefit of John Alan Hindley and Gizel Molnar the proceeds thereof, namely $20,000.00. Contrary to Section 1(1)(a) of the Criminal Law Amendment Act 1902'.

and further:

'On the 20th day of March, 1979, being entrusted with the property of Yulngu Association namely cheque number 001340 drawn on the Australian and New Zealand Banking Group Limited in order that he may apply it for travelling expenses, fraudulently converted to the use or benefit of John Alan Hindley and Gizel Molnar the proceeds thereof, namely $25,000.00. Contrary to Section 1(1)(a) of the Criminal Law Amendment Act 1902'.

The offenders were found "not guilty" on all charges which were dismissed on 4 July 1980.

The person Peter Richard Williams may be proceeded against for an offence against Section 124(1) of the Companies Act. This aspect is being examined by the Department of Law at the present time.

No further efforts to locate and charge other persons is warranted. It is believed the only persons involved in the matter were Williams and Hindley and, although the Supreme Court did not find them guilty, it was considered at the time there was sufficient evidence to proceed with the charges as laid against Williams and Hindley.

Aborigines - Encouragement of Horticulture

128 Mr MacFARLANE to CHIEF MINISTER

What efforts will be made to encourage Aborigines at Beswick, Bamyili, Ngukurr and Numbulwar to develop vegetable gardens as they have done in past years?

ANSWER

1. No special efforts have been made to encourage Aborigines at Beswick, Bamyili, Ngukurr and Numbulwar to develop vegetable gardens in the past.
2. The department is however involved in a number of practical training courses for Aborigines and is considering such a course for food gardens on Aboriginal lands.
3. The department is increasing its field extension services and general horticultural advice is available to all communities and individuals on request.

Aboriginal Blindness - Statement on ABC

130 Mr MacFARLANE to CHIEF MINISTER

1. Has his attention been drawn to the statement on ABC television on 5 January 1981 by Mr Robert Nestdale that 20 per cent of Aborigines are blind?
2. If so, is Mr Nestdale's statement correct and, if so, will he congratulate Mr Nestdale on his accuracy?
3. If the figure is not correct, will he ask the Minister for Aboriginal Affairs to correct the inaccurate statement?

ANSWER

1. Although I understand that Mr Nestdale made the statement that '20 per cent of Aboriginals are blind' on ABC television on 5 January 1981, the text of his speech delivered to the 13th National Young Liberal Convention on that day read '... 20 per cent of elderly Aboriginals are blind'.
2. The latter statement is acceptably close to the findings reported by the Royal Australian College of Ophthalmologists following their work in association with the National Trachoma and Eye Health Program. This showed that 18.9 per cent of Aboriginals aged 60 and over were blind. The percentage of blindness in NT Aboriginals as a whole is 1.5.
3. I shall draw the inconsistencies between the television statement and the speech to the attention of the Minister for Aboriginal Affairs.

Northern Airlines - Katherine Service

131 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

What (a) passengers and (b) freight was carried (i) into and (ii) out of Katherine by Northern Airlines during its period of operation to 13 January 1981 and by Ansett and TAA during a comparable period of time before Northern Airlines took over the service?

ANSWER

This question is of a commercial nature and does not come within the mandate of the government's licensing responsibilities.

I suggest the Honourable Member contact the parties direct.

Katherine - Weed Control Program

132 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Has the weed control program which started in 1979 in the Katherine area been successful, or has the scheme lapsed?

ANSWER

The question does not specify what particular weed control program in the Katherine district is referred to, but I understand that it relates to Sida retusa (the only yellow-flowered weed currently being worked on at Mountain Valley).

The Sida program in the Katherine district consists of two parts:

1. Katherine Experiment Farm

   Following a survey of the Sida infestation, a re-survey of 24 paddocks at Katherine Experiment Farm was undertaken in 1979 to measure changes in the weed population, and to help define factors that may have been responsible for changes. This has been completed. Arising from the survey several trials to test control of Sida by chemicals and competitive pastures were initiated. Progress with these trials has been slow.

2. Mountain Valley Station

   At the request of the station, a survey of improved and unimproved pastures on Mountain Valley was undertaken in 1979 to assess the incidence of Sida and to help define factors responsible for its spread. The survey was completed and provided some clues as to reasons for its spread.

   Advice based on the results of the KEF and station surveys was provided to the station and, with its assistance, a demonstration of possible methods of controlling Sida by mechanical, chemical or competitive pasture species means was established. This control demonstration involved not only Sida but also control of Hyptis and sucker regrowth.

   The demonstration continues as the full effects of control measures will not be apparent for several seasons.

   In summary, the Sida program in the Katherine district continues, but progress to date has been slow.

Dress Standards for Hotels

137 Mr MacFARLANE to MINISTER for HEALTH

Is there a minimum standard of dress for women entering hotels as there is for men?

ANSWER

The Liquor Commission is not aware of any existing minimum dress standards for women entering hotels.

The Commission itself does not impose minimum dress standards for either men or women but does expect individual licensees to set and enforce such standards, consistent with the type of facilities premises provide.

Radio Reception in Outback

138 Mr MacFARLANE to CHIEF MINISTER

Has his attention been drawn to an article in the NT News of 12 January 1981 regarding special radio programs for Aborigines and to promote

Aboriginal culture?

If so, will he take steps to have a short wave radio station established to ensure that all Territorians in remote localities, irrespective of their ethnic origins, are able to receive local news, weather and other informative programs?

ANSWER

1. The government is aware of the proposals of the Australian Broadcasting Commission to introduce program segments specifically to serve Aboriginal interests. The initiatives have the full support of the government. The programs will be treated on a pilot project basis in Alice Springs for a one year trial. If they prove successful, consideration will be given by the Commission to extending the scheme to Darwin, Katherine and perhaps Gove.

2. The honourable member is aware of the numerous representations made by the Territory government, including an approach made to the Commonwealth Department of Communications urging that priority be given to providing a short wave radio station. At the same time, it was suggested that if there was to be further delay, consideration should be given to installing an alternate system similar to that operating in New Guinea which, it is understood, could be provided at reasonable cost and in a short time. A response is awaited from the department.

Yuendumu Airstrip

140 Mr ISAACS to MINISTER for TRANSPORT and WORKS

1. What was the cost of the upgrading of Yuendumu airstrip?

2. On how many occasions has the upgraded strip been forced to close due to rain?

3. What volume of rain was recorded on each occasion that the strip was forced to close?

ANSWER

1. The Yuendumu aerodrome pavement was reconstructed at a cost of $194,000.

2. The aerodrome has been closed on 7 occasions since the reconstruction was completed in May 1980.

3. Daily rainfall on those occasions varied from between 4 mm to 26 mm over periods of closure. (It should be noted that his 'wet' has been very severe, i.e., January 1981 rainfall of 175 mm compared to the January average of 60 mm).

Transport for Aborigines in Katherine

141 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

What free transport is provided for Aboriginal groups in Katherine that is not provided for other citizens of that centre?

ANSWER

My department does not provide a public transport service to Katherine residents. I suggest the honourable member re-direct his question to the Department of Community Development or the Commonwealth Department of Aboriginal Affairs for advice on assistance provided to Aboriginals.

Pine Tree Motel Katherine

146 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Will he ascertain whether Council for Aboriginal Development funds, or any other Federal source funds, have been used to purchase the Pine Tree Motel at Katherine for Aboriginal interests?

ANSWER

No.

PART II

THE QUESTION PAPER

An index to questions appears at the end of Part II.

Numerical references are to Question Paper page numbers.

An asterisk preceding an entry in the index indicates that an answer has not yet been received.

Audit for Northern Territory Government

Mr ISAACS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Did the Treasurer note that the Prime Minister, in his statement on the review of Commonwealth government functions, indicated that the Commonwealth Auditor-General will no longer carry out audits for the Northern Territory government? What steps are being taken to ensure that appropriate audit functions will continue to be maintained?

Question re-directed to CHIEF MINISTER

ANSWER

It was thought inappropriate that the function of Auditor-General should be the responsibility of the Treasurer and, for that reason, I hold administrative responsibility for the function of Auditor-General although, of course, that gentleman operates quite independently other than for administrative support. The remarks of the Prime Minister in his statement were noted. A paper has been prepared for the consideration of Cabinet by officers of my department relating to the total effect on the Territory - good, bad or indifferent - of the various facts germane to the Territory in the statement made by the Prime Minister in the federal parliament some weeks ago. Only last night, I was able to read that document and approved it for submission to Cabinet. Cabinet will consider what steps we should take in relation to either the establishment of an Auditor-General's unit in the Northern Territory or perhaps calling for tenders from firms of chartered accountants for the work of the Auditor-General to be carried out. These are matters which will no doubt be considered by Cabinet in terms of the options put forward to it, but it is too early at this stage to say what decision is likely to be made.

Bag Limit for Territory Fishermen

Mr HARRIS to MINISTER for PRIMARY PRODUCTION and TOURISM

I understand that a number of problems are being experienced with the bag limit that has been imposed on Territory fishermen. Are problems being experienced and, if so, is anything being done by the government to counter these problems?

ANSWER

I have had no reports about problems with the bag limit. Indeed, I have heard no fish stories recently at all. I believe that the present management regime is: no re-issue of surrendered or cancelled fishing licences, restriction on the transfer of commercial licences except for reasons of hardship, injury or ill-health, a 4-month closed season for commercial fishing extending from 1 October to 31 January, a restriction on the maximum net length to be used by commercial fishermen to 1,500 metres, the development of alternative fisheries to provide an outlet for excess fishing effort is being encouraged and, of course, there is the bag limit. I would say that there is some doubt in my mind as to the operation of all these measures in conserving this natural resource which is so important to Territorians. In due course, I believe that the government will take the step of initiating an inquiry into the barramundi fishery over and above the other work that is being carried out by the department. We will look at ways and means of further ensuring the conservation of this remarkable fishery.

Carpentaria College Site

Mrs LAWRIE to MINISTER for LANDS and HOUSING

At the last Assembly sittings, he indicated that a development plan would be prepared for Carpentaria College and placed on public display. Can he advise what stage this development plan has reached?

ANSWER

Yesterday morning, I saw for the first time the development plans in sketch form. I understand that they have now been lodged with the Planning Authority. I would imagine that, over the next week, they will become available for public scrutiny if the full plans are available. All I saw yesterday was a conceptual layout which looked very interesting and would probably result in a very useful facility for that area.

Instant Money Game

Mr D.W. COLLINS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Is the South Australian-based instant money game legal in the Territory and, if so, what revenue does the Territory gain from its operation?

ANSWER

Mr Speaker, the instant money game, which is available in Alice Springs and Darwin at least, is legal in the Territory. The game is subject to an agreement between the Northern Territory government and the South Australian government. Under this agreement, the Territory retains a portion of the South Australian government's commission on sales of the game. Revenue obtained from this source is expected to be about $50,000 by the end of the current financial year. It is interesting to place the instant money game into context with other games which attract increasing patronage from the public in the Territory and from which the Territory government derives revenue, even though we have not legislated for these financial arrangements with the states. Actual expenditure on interstate lotteries in 1979-80 totalled about $2.195m from which the Territory obtained $363,575 in commission. Projections on expenditure this financial year indicate a total expenditure of $2.8m on interstate lotteries such as Tattslotto, NSW lotto and instant money, bringing an estimated $450,000 to the Territory government. It is significant that the projected figures for this financial year represent a 27% increase in expenditure over the previous year. A further 46% increase in revenue is projected for 1981-82. The anticipated expenditure on interstate lotteries in 1981-82 is expected to be $4.1m, returning an estimated $840,000 to the Northern Territory in commissions. It would seem that at least some Territorians do have spare cash to have a flutter from time to time in gambling even outside of casinos.

Kakadu National Park

Mr ISAACS to CHIEF MINISTER

Can he advise to what extent the management, direction and control of Kakadu National Park have been transferred to the Northern Territory as a result of the federal government review of government functions?

ANSWER

No.

Cement Manufacture from Coral at Gunn Point

Mrs O'NEIL to CHIEF MINISTER

Are tests being carried out on coral reefs off Gunn Point to evaluate their possible use for cement manufacture? If so, by whom are the tests being carried out and what is the government's attitude to the possible destruction of this valuable biological resource?

ANSWER

I am not aware of any such tests. It may be helpful if the member for Fannie Bay refers the question to my colleague, the Minister for Mines and Energy, who may know something of this matter. It certainly has not come within

my purview although the Conservation Commission may be aware of it. I can seek information if my colleague knows nothing of it.

Staffing Dispute - 14-Mile Fire Station

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

Is he at liberty to tell me the results of the meeting between the Northern Territory Fire Brigade staff and Deputy Public Service Arbitrator Booth regarding arbitration in the staffing dispute relating to the 14-mile temporary fire station?

ANSWER

I have a summary of the outcome of those hearings which I am happy to make available to honourable members. Briefly, the major results of the hearing are that the 14-mile fire station be manned during the dry season and that previous working arrangements continue. This means that the minimum manning strength for low fire danger days will be 15 men and the minimum manning strength on very high to extreme fire danger days will be 17 men. Senior duty officers may call upon additional men should the situation so require in an emergency. These arrangements will be reviewed by the Director of Fire Services once he has had the opportunity to fully assess the brigade's operational requirements.

Cement Manufacture from Coral at Gunn Point

Mrs O'Neil to MINISTER for MINES and ENERGY

I would like to re-direct my earlier question to the Minister for Mines and Energy.

ANSWER

To advise the member, there have been applications made for at least 10 years for exploration licences for the area. Two of the parties involved in these licence applications are Adelaide Brighton Cement and Darwin Cement. I cannot tell the member of the business relationship between the 2 but I know that they have an interest. There are a couple of aspects that I would like to bring to the member's attention. Firstly, the land is under an Aboriginal land claim and, as such, the applications for exploration licences over the area would not be dealt with in the normal course of events. Secondly, the area of interest is outside the 3-mile limit and is therefore under Commonwealth jurisdiction. Therein lies a problem in itself because the Commonwealth, at this stage, does not have any legislation to enable us to handle offshore minerals although we can handle offshore gas and oil. As far as the taking of samples is concerned, I believe some sampling has been done in a minor way to test the chemical composition of the limestone reefs. I would not regard the actual sampling as anything extraordinary. It could be very helpful because it might determine at an early stage that there is nothing there worth pursuing and save private interests and government a lot of time in processing worthless applications. If the honourable member would like any additional information, I will get if for her but I leave it to her to advise me.

Demountables from Darwin Hospital

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

Have all the demountables from the old Darwin Hospital been allocated?

ANSWER

The demountables were certainly allocated, however not all parties to whom they have been allocated have removed them. Of late there have been at least 2, to my recollection, changes and withdrawals of offer as it were and demountables have been used for other purposes. The removal of all the buildings that are surplus at the Darwin Hospital certainly has been planned for.

University Planning Unit

Mr B. COLLINS to MINISTER for EDUCATION

In view of the announcement of the federal government that there will be no funding for the Territory university in the current triennium, could he advise what will happen to the University Planning Unit?

ANSWER

As the honourable member is well aware, the federal government took the decision that the Northern Territory does not, in its view, require a university at this time, completely in the absence of the advice of the very body it set up to so advise. I must say it is one of the most ridiculous turns of events that I have ever experienced. The Tertiary Education Commission, of course, has a charter to make that advice available to the federal government, notwithstanding the government's decision. I understand the TEC will do that quite soon. The future of the Commonwealth's funding could be somewhat coloured by the views of the Tertiary Education Commission. It is the intention of the government that there shall be a university for the Northern Territory, and it is therefore the intention of the government that the Interim Planning Act continue until such time as a university act is introduced into this Assembly. It is certainly the intention of the government to establish an interim senate. We intend that there shall be a university in the Northern Territory. It is a matter of convincing the Commonwealth that we are correct in that intention. There is no reason why we cannot pass in this Assembly - if the Assembly is so willing - an act to establish a university of the Northern Territory, with or without Commonwealth funding. What it does mean, of course, is that we may run into great difficulties as we get into the business of undergraduate teaching without Commonwealth money for the simple reason that the Commonwealth is the sole funding agent of undergraduate teaching throughout Australia and it would be seen by other universities as odd, to say the least, if the Northern Territory went alone into that type of funding. There are many things we can do in the area of establishing a university notwithstanding the present Commonwealth government decision. I would think that we could do virtually all of those things which a university does short of actual undergraduate lecturing. I hope that the Commonwealth will come to the view arrived at by the Northern Territory community: a university is needed in the Northern Territory. I do not know what the recommendations of the TEC will be but I hope they will be favourable to the establishing of a university in the Northern Territory and, if they are, I hope the Commonwealth will see the light.

Beatrice Hill Research Station

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION AND TOURISM

What are the government's intentions for the use of the complex at Beatrice Hill now that Professor Harry Messel has vacated the premises?

ANSWER

The proposal is that the Breatrice Hill Research Station be incorporated into the Coastal Plains Research Station for work on buffalo research and pasture improvement. There is also a possibility of carrying out some rice research.

Air Terminal for Darwin

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

In view of the federal government's decision to sell Australian air terminals to the private sector, can the minister confirm whether Darwin's new terminal will be constructed on schedule?

ANSWER

I am unable to provide the honourable member with that information. I will provide it to her later in these sittings.

Director of NT Fire Brigade

Mr LEO to MINISTER for TRANSPORT and WORKS

What experience in fire fighting and fire prevention does the new director of the NT fire service have and how much of that experience has been obtained in tropical conditions?

ANSWER

The experience that the new director has is quite extensive. I ask the member to place the question on notice.

Trotting in the Territory

Mr HARRIS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Rumour has it that trotting will be coming to Darwin in the not too distant future. Has the Racing and Gaming Commission been approached to support trotting in the Territory?

ANSWER

No application has been put to the Racing and Gaming Commission to establish a trotting industry in the Northern Territory although some interest has been expressed in the establishment of a trotting track in the Northern Territory. The Racing and Gaming Commission has quite an open mind on this matter. Indeed, the upgrading and future plans for the Winnellie Park Greyhound Track may include the possibility of a trotting track at the same venue in due course. However, at this time, it is only a broad idea in people's minds. There is no serious push in the community by persons interested in establishing trotting in the Territory.

Commonwealth Insurance Commissioner

Mr ISAACS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Has the Treasurer noted that the office of the Commonwealth Insurance Commissioner is to reduce its supervision of the insurance industry throughout Australia as a result of the recent federal government decision to review its functions? Is the Treasurer satisfied that the operations of the industry in the Northern Territory are being adequately scrutinised to ensure the security of policy holders?

ANSWER

I am certainly satisfied that the Northern Territory Insurance Commissioner is carrying out his functions as laid down for him under legislation passed by this Assembly. It is quite clear that the Northern Territory Commissioner does not have powers or indeed resources to keep an eye on the Australia-wide insurance companies offering certain forms of insurance in the Northern Territory. I am certainly satisfied that he is doing that.

Rehabilitation of Rum Jungle

Mr B. COLLINS to MINISTER for MINES and ENERGY

Could the minister advise on the progress of plans to carry out further rehabilitation on the Rum Jungle uranium mine?

ANSWER

I can advise the honourable member that certain negotiations between the

Commonwealth and ourselves have been concluded. I am not aware of the details, but I will write to him and put them on paper so that he is up to date. If he would like to ring my office every month and remind me, I will send him a written report so that he does not get too far behind.

60-Mile Farm

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Is it the intention of the government that the 60-mile farm be taken over by the Agricultural Development and Marketing Authority and, if so, what is the reason for this?

ANSWER

I understand that the Agricultural Development and Marketing Authority has an arrangement with the Department of Primary Production to position one of its operators at the 60-mile farm. It is establishing a house at UARES.

Bores in Humpty Doo Area

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

Is the Water Division putting down exploratory or production bores in the Humpty Doo area? If so, what is the reason?

ANSWER

I do not believe that the department is sinking bores in that area at the moment.

Funds for Hydro-electric Scheme

Ms D'ROZARIO to MINISTER for MINES and ENERGY

Is it the intention of the government to seek funds from the Loan Council later this month for a hydro-electricity scheme?

ANSWER

I will be making a statement later in the sittings on the total electricity strategy. The short answer to her question is no.

Hearing Damage in Pinball Parlours

Mr B. COLLINS to MINISTER for MINES and ENERGY

In view of the recent testing carried out by his department that indicates that both the users and employees of pinball parlours will suffer permanent hearing damage after a disturbingly short period of time, what is the minister going to do to redress the situation?

ANSWER

The honourable member raises an issue that is currently being examined by the department. I understand that an environmental health unit, which is comprised of officers of the Department of Health and the Department of Mines and Energy, has looked at several pinball parlours in the Darwin area and will examine others throughout the Northern Territory to establish whether the noise levels are injurious on a permanent basis to the people who use the pinball parlours and determine what should be done. I think the important factor is the amount of use given by any individual to a parlour at any one time. Certainly people employed in parlours must be at a disadvantage. However, they are there by their own choice and the degree of government control has to be examined. When the matter is finalised, I will be happy to advise the honourable member of the outcome.

Funding to Industry

Mr D.W. COLLINS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

What is the expected level of funding that the Northern Territory Development Commission will have made available to industry for the financial year 1980-81?

ANSWER

The Northern Territory Development Corporation is running at a very high level of activity and honourable members will be aware that, in previous budgets, the government has chosen to increase funding to the Territory Development Corporation. Until April this year, the Northern Territory Development Corporation had allocated or committed $5.2m in new loans to primary industry, secondary industry and tourism. It is estimated that, by the end of 1980-81, the total will be about $6.9m and, compared with $3.6m for the previous year, that is an increase of some 92%. The government is determined that in general it will assist as a lender of last resort. That is not so in the case of loans to primary industry etc but, as far as general industry in the Territory is concerned, the government is determined to assist people to establish the infrastracture that is required to keep Territory people employed as far as possible and to keep the Territory's population explanding as fast as we can.

Project Farms

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Why were the number of project farms proposed for the Douglas Daly region reduced from 4 to 2, given a short list of 8 eligible farmers for the project?

ANSWER

Mr Speaker, one of the constraints imposed on the operation of the authority was that of obtaining enough land to proceed with the original planning of the 4 project farms. The position is that 2 farms are presently being developed. We hope to secure a third and have it developed by the end of this year. I believe that the progress made by the chairman of the agricultural authority has been quite significant. The complete staffing of his Land Development Section has been completed. Land acquisition contracts should be signed this month. Of the 64 applicants, 8 farmers were interviewed and are on a short list. We shall be selecting those farmers in the weeks ahead. We hope that they will take up residence on the project farm in August or September. Some 600 hectares have been cleared with windrowing, bore development, water development and an airstrip alongside the Hot Springs road. Tenders have been let for 70 kilometres of fencing. There were 6 houses in the original order which are going up now: 1 at Upper Adelaide River, 3 at Douglas Daly and 2 on the 2 project farms that are almost ready. The other hopes and aspirations of the authority in the next year or so will be the establishment of a grain-receiving store in Katherine and, of course, a fertiliser seed store. I think the progress has been very good and tribute must be paid to the chairman of the agricultural authority.

Darwin Central Zone Sewerage System

Mrs O'NEIL to MINISTER for TRANSPORT and WORKS

What action is the government taking to overcome the increasingly serious problems of the Darwin central zone sewerage system?

ANSWER

I believe that the department is taking some steps to improve the facility out at Ludmilla swamp. I will try to obtain a brief for the honourable member.

Magistrates in Alice Springs

Mr ISAACS to ATTORNEY-GENERAL

Is it true that Alice Springs will shortly be served by only 1 resident magistrate? Is it intended to retain 2 resident magistrates in Alice Springs in future given the current workload of the magistrates there and population trends in the Centre?

ANSWER

Some time ago, the Chief Minister carried out a survey of the workloads of the various Territotry centres and the need for magistrates to undertake those workloads in the lower courts. As a result of carrying out that survey, it was decided that there was a greater workload in Darwin and that there was insufficient work in Alice Springs at present to justify 2 full-time magistrates. The Chief Magistrate's proposal is that, should there be an accumulation of work from time to time in Alice Springs because of the transfer of the second magistrate from there to Darwin, a magistrate will be sent to Alice Springs to catch up with the backlog.

Annual Reports of NTDC

Ms D'ROZARIO to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Is it his intention to table the 2 overdue annual reports of the Northern Territory Development Corporation during the current sittings of the Assembly and, if not, why not?

ANSWER

During the sittings, I will be tabling the annual report of the Northern Territory Development Corporation for 1978-79. This document has only recently been completed. We received the Auditor-General's report on it. As I say, it has been completed in the last few days and the final work on the 1979-80 report could not commence until it was completed. However, it is proceeding now and will be tabled in this Assembly as soon as possible.

Education of Handicapped Children

Mr HARRIS to MINISTER for EDUCATION

The Northern Territory teachers Federation has recently criticised the provision made by the Department of Education for the education of handicapped children in the Northern Territory. Can he give any assurance that adequate provision is being made for these children?

ANSWER

From memory, the comment that the member refers to is the only comment that the Northern Territory Teachers Federation has made on the Green Paper. I find it rather disappointing, to say the least, that their first and only comment on that document should not only be a negative one but a completely inaccurate one. The fact is that this government, since it assumed responsibility for what is called special education, has increased the number of teachers in that field by 100%. We have doubled the number in the short period that we have had responsibility. Indeed, approximately 14% of Northern Territory teachers are now involved in one way or another in the field of special education. We have a very sophisticated system. In that particular field, it is probably one of the best in the country. In fact, we have established a council under the Education Act to advise the minister and action is being taken on recommendations made by that body. While I appreciate that the comment made by the Teachers Federation was one of its rare ones that actually related to kids, it is most unfortunate that it was not true.

Northern Territory Teaching Service

Mr B. COLLINS to MINISTER for EDUCATION

Has the abolition of the Commonwealth Teaching Service and the former conditions of service enjoyed by Northern Territory teachers altered the Northern Territory government's decision to establish and maintain a teaching service for the Northern Territory?

ANSWER

I wonder if that question is prompted by my giving notice of an amendment to the Teaching Service Act. I hasten to point out to the honourable member that there is no relationship between the 2. Nonetheless, he does raise a very interesting point. The cornerstone of the arrangements between this government and officers in the public employ has been a government guarantee of conditions of service equal to or at least not worse than those as at the date of transfer. That is a very important phrase of course: 'as at the date of transfer'. This government accepted in part the proposition for the establishment of an independent teaching service with its own commissioner on the basis that all teachers to whom I spoke, not just the federation executive, perceived very strongly that an independent commissioner was a condition of service as at the date of transfer, I wonder what advice the Teachers Federation might offer me.

Local Products Promotion Campaign

Ms D'ROZARIO to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Which company prepared the local products promotion campaign for the Northern Territory Development Corporation?

ANSWER

The local products display, which I have not yet had the opportunity to view myself, has been established in the foyer of the building that the Territory Development Corporation now occupies. It was manufactured in Western Australia by an international firm of design consultants called Industrial and Architectural Model Makers of Fremantle. These people were commissioned by the board of the TDC to provide, design and construct the display case and panels which incorporate an aluminium frame on which the company holds the Australian patent. Whilst it is true that the individual components of the display could have been manufactured separately in the Territory, what could not be supplied was the industrial designer to take the project through from conception to construction incorporating modifications which were required from time to time as the project evolved. The display cases and panels are incidental to the items displayed which are obviously all local products. As a result of this exercise, the NTDC is now attempting to encourage a fully-qualified industrial display expert to establish in Darwin so that in the future local materials and local tradesmen can be fully utilised in this specialised area of trade promotion. Whilst it is a fairly competitive field interstate, it is new to the Territory. It was unfortunate that the NTDC found it necessary to have a first-class display presented to the public in showcases which were made interstate. We hope that it will be the last time that it has to happen.

Closure of Dump Road Crossing in Alice Springs

Mr D.W. COLLINS to MINISTER for TRANSPORT and WORKS

What action has he taken over the Australian National Railways' closure of the dump road crossing in Alice Springs?

ANSWER

My department has written to the Australian National Railways to have that particular section reopened.

Crocodile Sightings near Public Swimming Areas

Mr HARRIS to CHIEF MINISTER

What is being done about crocodile sightings near public swimming areas, particularly yesterday's sightings of a crocodile at Vesteys Beach?

ANSWER

In relation to crocodile sightings generally and in relation to crocodiles being sighted near areas frequented by the public, the Conservation Commission has undertaken for quite some time a program of trapping or netting crocodiles and then either removing them to an area of less danger to the public or giving them to the operator of the local crocodile farm. I understand that at present there is 1 team of 3 crocodile catchers operating and that a further team of 3 is under training. These 2 teams will operate mainly in the Darwin area but also from time to time at Nhuounbuy. The Conservation Commission has established a crocodile hotline. I think the press has given prominence to telephone numbers so that people can report sightings of crocodiles to the Conservation Commission and prompt action be taken to attempt to trap the crocodiles. The problem that arose yesterday at Vesteys Beach was that a 1.6 metre crocodile was sighted at about 10 am by a person from the Ski Club. The Conservation Commission sent a team to the area to attempt to capture it. Unfortunately, the crocodile had been frightened by sightseers and the team was unable to get close enough to it. They were there for about 2 hours but it finally disappeared. They went out again last night looking for the crocodile but after about 3 hours were again unsuccessful. They will probably have to wait on further sightings from the public to locate it. It appeared to be a young female and these apparently move about a fair bit. Another team went to Middle Arm last night to check for crocodiles. Other officers of the Conservation Commission are trapping crocodiles over a 12-mile stretch upstream and downstream from the Daly River reserve and the public picnic area. Another team of rangers left for Maningrida this morning after a reported sighting.

Special Purposes Leases Alice Springs

Mr BELL to TREASURER and MINISTER for COMMUNITY DEVELOPMENT

When will the application for special purposes leases for transient and permanent residents in Alice Springs lodged by the Tangentyere Council and other incorporated bodies before the minister's statement of 22 May be approved?

ANSWER

The question should be directed to the Minister for Lands and Housing who handles the processing of applications for land by any party in the Northern Territory. My statement was associated with a general policy laid down by Cabinet on the subject of camping areas in towns. That is why the statement emanated from my office. However, questions on the subject of individual applications, their processing and whether or not they fit into the policy of the government should be directed to the Minister for Lands and Housing.

Special Purposes Leases Alice Springs

Mr BELL to MINISTER for LANDS and HOUSING

I redirect the question to the Minister for Lands and Housing.

ANSWER

I do not have a clear picture of which lease applications the member refers to. If he wants a definitive answer to his question, it would be better for him to put it on notice because the Tangentyere Council and most of the councils down there seem to scatter applications around like confetti. There are 3 applications before me at the moment which are recognised by the government as being legitimate. There is one on South Terrace and it has been indicated to

the people in Alice Springs that that lease will be made available to them. There is also the Larapinta Valley application, which I understand is almost ready for handing over, and also the Old Timers needs claim. Those will be issued as soon as possible. I do not know which other claims the honourable member refers to.

Assistance to Rural Development

Mrs PADGHAM-PURICH to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Does the Territory Development Corporation provide assistance for rural development?

ANSWER

The Territory Development Corporation does provide a range of assistance to people for rural development. By the term 'rural development', I understand the honourable member for Tiwi to mean agricultural-type pursuits or pastoral-type pursuits. Under the provisions of Territory Development Corporation policy and procedures at the moment, assistance is provided by way of farm improvement under the rural adjustment scheme and under the provisions of a cropping development scheme. The government introduced this scheme 2 years ago and has continued with it. Aid is also provided under the Territory Development Corporation's general guidelines for assisting the development of industry without specifying particular industries. The farm improvement component of the rural adjustment scheme provides assistance to eligible applicants to develop their holdings into an economic unit by improving the effective use of a farm without adding to its area. Advances can be made for plant, livestock, carry-on expenses and further property development intended to restore the economic viability of the farm. That is the principal area where a person with an agricultural pursuit would make application to the Territory Development Corporation. The rural adjustment scheme applies to all agricultural, horticultural and pastoral industries and has a strict eligibility criterion which restricts assistance to existing farmers only and requires that an applicant must have good prospects of long-term viability. The Territory Development Corporation's general guidelines for assisting industry can apply to a range of areas for a range of purposes. Indeed, the Territory Development Corporation has been a very busy body for the last 3 years in the Territory providing assistance to industries to maintain the pace of economic growth.

Tertiary Education Assistance Scheme

Mr LEO to MINISTER for EDUCATION

How many students in the Northern Territory are in receipt of aid under the tertiary education assistance scheme and how many are on full allowance?

ANSWER

Mr Speaker, I ask that the question be placed on notice.

Papunya Health Service

Mr B. COLLINS to MINISTER for HEALTH

The minister made a statement that 'Papunya-type health services' are a failure and that the facts demonstrate this. Could he advise the Assembly what services he describes as 'Papunya-type health services' and what are the facts that demonstrate they are a failure?

ANSWER

Before self-government, the Papunya health service was run as a community health operation by the Department of Health. Before the transfer of that department to the Northern Territory, the Papunya operation was transferred within the Commonwealth to the Liappa Congress for administration by that congress.

Funds were to be provided to the Liappa Congress by the Department of Aboriginal Affairs for a community-based health system. The philosophy of this sort of thing sounds very nice, but it contains problems which are compounded throughout the community. It is not possible to have a community-based health system that is not related to the overall health system in the Northern Territory. As was proven in the Papunya incident, the first requirement of the Papunya health service was drugs, then the aerial medical service, then the normal backup services that every community health system in the Territory requires from its nearest major hospital. Therein lay one of the flaws: they could not be an independent medical service providing a full medical service to the Papunya people because they did not have the backup system. One of the difficulties was a problem of maintaining continuity of staff. This is not a new problem to the Northern Territory; we all have it in various fields. Again it is a problem that is compounded for the Papunya organisation or the Liappa Congress because it is so small; it has no greater resources to draw on in times of emergency to replace staff. One of the advantages of the present system is that, if staff are removed from or leave of their own choice a certain area in a remote place, there are several hundred other sisters in the system who can be called upon in an emergency to replace them. The same goes for doctors and other members of the medical fraternity.

I received a report from the Department of Health in November 1980 outlining what it believed was a deterioration in the operation of the Papunya Health Centre per se, the standards of health and hygiene and the overall health of the children in the community as measured by the admissions to the Alice Springs health system. I was so concerned with the content of the report that I took it to the federal Minister for Aboriginal Affairs and suggested to him that there needed to be a review of the Papunya situation in light of the report, if only to confirm or deny what was contained in it. The federal Minister for Aboriginal Affairs has had his people looking at it but I do not know that any action has been taken. I have also raised the matter with the federal Minister for Health because it is a matter of concern to me that this situation may continue and possibly deteriorate. I would be more than happy to let the honourable member see the report. I regard it as confidential at this stage but, if the honourable member would like to read it, I am more than happy for him to do so.

About 12 months ago, I had planned a trip to Papunya. Quite contrary to reports I read in the press that I have been invited a dozen times, I had to invite myself through the Director of Health, Dr Gurd, who made arrangements for us to travel. However, an election was pulled on and the visit was postponed. I have not had an opportunity to make the visit even though it is my intention to do so. The government's view on independent health services is that it is more than happy to see them working in tandem with the Northern Territory's medical service. It becomes extremely difficult when, for their own reasons, they decide to become independent and then call on the department for every other service that is required in the community. There is a certain amount of give and take required in both services if it is to work. I would hope that the new health funding arrangements will mean the entry of general practitioners into areas like Papunya, Yuendumu and any other communities that want to have them. I do not think that that is an unreasonable extension at all but it is a matter for the community. I realise that the principle might be anathema to some members but nevertheless some people are used to doing things in that way and that is their right. I will leave the invitation open to the member to peruse the report on Papunya. If he needs any further information on it, I will endeavour to provide it for him.

Financial Assistance to Primary Producers

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION and TOURISM

Can he give me an approximation of the extent of financial assistance to

primary producers this financial year?

ANSWER

By 30 June 1981, the Northern Territory government will have provided loans and assistance to the extent of about $585,000. This covers carry-on finance, fertiliser, freight subsidies, advances against crops by way of pre-payment and various other services such as marketing and harvesting assistance. The government has also provided assistance to other aspects of primary industry for drought relief, brucellosis and tuberculosis eradication programs and other extension research services. These services will total over $6.5m by the end of the financial year.

Control of Antibiotics in Stockfeeds

Mrs LAWRIE to MINISTER for PRIMARY PRODUCTION and TOURISM

When will he introduce legislation to control the quality of stockfeeds, particularly the use of antibiotics in same?

ANSWER

I expect to give notice of the legislation tomorrow.

Penalties for Non-attendance at Schools

Mr D.W. COLLINS to MINISTER for EDUCATION

What action, if any, is being taken to enforce penalties under the Education Act for the offence of non-attendance at schools?

ANSWER

The member's question raises one of the most difficult subjects that I am faced with at the moment. The answer in short is that no action is being taken. That does not mean to say that I am of the view that some action ought not be taken. There is quite clearly prima facie evidence that that provision in the Education Act is being quite consciously breached in a number of places. However, establishing that to the satisfaction of the court is quite another matter because it becomes a matter of parental judgment as opposed to the 'system's' judgment. I think a prosecution would be extremely difficult. Nonetheless, in a couple of instances, I am so concerned that I may be moved to discuss the matter with the Attorney-General once I have collected a little more information. I will perhaps seek his advice on the advisability of trying a couple of test cases. It is not an easy matter to define just what is an action by a parent which is deliberately against the interests of a child. The provision in the act was designed mainly to prevent exploitation. That is not the type of instance that I have before me. By exploitation, I mean such things as making the child work in a shop rather than sending him to school. Nonetheless, I have evidence of one instance of what could clearly be regarded as neglect. In the other instance, the problem arises because a parent does not happen to like the principal even though that principal is an excellent teacher and has excellent staff. It resulted from a job application. That is quite unacceptable as a reason for not sending a child to school. Perhaps I should not say any more because I may pre-empt what may become a matter before the courts.

Poker Machines in Alice Springs Casino

Mr BELL to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Will he reverse his decision to allow the installation of poker machines in the Alice Springs Casino as a result of the continuing expression of protest by the residents of central Australia?

ANSWER

I will not reverse the ministerial discretion allowed me under an act of

this Assembly to approve games of chance to be played in casinos in the Northern Territory. The expressions of protest that he refers to are genuine expressions of concern but I believe that they do not fairly take into consideration all the aspects of the matter and the nature of poker machines themselves. To date, I have certainly heard no good argument why I should reverse my decision.

Palm Leaf Beetle - Biological Control

Mr HARRIS to MINISTER for PRIMARY PRODUCTION

When is a decision likely to be made on whether or not to introduce a parasite to control the palm beetle?

ANSWER

The question of introducing a biological control to contain the spread of the palm leaf beetle is certainly one that the government is considering. A decision will not be taken lightly; many tests have to be undertaken. It would be senseless to introduce a predator to eat a predator and find that we have something beyond control. The question is being examined and I will have more information in due course.

Dick Ward Drive Intersection with Ross Smith Avenue

Mrs O'NEIL to MINISTER for TRANSPORT and WORKS

Has he received the traffic consultant's study on the Ross Smith Avenue Dick Ward Drive intersection which was commissioned by his department and, if so, what are its recommendations?

ANSWER

I have not received the study yet.

Outbreak of Strangles

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION

What program have the veterinary officers of the Department of Primary Production initiated to combat the recent outbreak of strangles in horses in the rural area?

ANSWER

Last night, there was a meeting between government and private veterinarians. Their concern has been to allow the continuation of horse events. They have agreed on control measures which I will read to the Assembly: 'All infected premises will remain in quarantine for at least 14 days after all obvious clinical signs of infection have abated. The only exceptions will be groups of horses on affected properties which are isolated from clinical cases for 14 days and show no signs of disease during this period. As a general recommendation, horse owners are advised not to move unvaccinated horses to any horse event or gathering of horses. All horse events should be adequately supervised and all animals examined for signs of infectious diseases prior to entry. These measures will also allow people to get their horses vaccinated. The outbreak has been contained and only 2 cases of strangles have been confirmed. There have been 100 cases of mild upper respiratory tract infection which is generally a mild disease'.

Auction of Houses in Nhulunbuy

Mr LEO to MINISTER for LANDS and HOUSING

During the last sittings, the minister indicated that the Housing Commission would auction 3 Housing Commission houses in Nhulunbuy. Could he say when and under what conditions these auctions will be held?

ANSWER

I do not have the information but I undertake to give it to the honourable member some time today.

Outpatients Fees

Mr D.W. COLLINS to MINISTER for HEALTH

Why does it cost $40 per consultation for Outpatients treatment when a private doctor costs about $10.50 and he makes a profit?

ANSWER

Our hospitals are not structured on the same lines as general practitioner operations. They are built as high cost areas of treatment for people who are very sick. We have casualty units and primary care units that could better be operated in another way but, for our own convenience, they are operated within the hospital. Consequently, all the overheads and costs of the hospital, particularly the buildings and infrastructure of the Outpatients areas, are much greater than you would find anywhere else in the community. Compared with what a private practitioner would use to do much the same job, they are quite out of this world. The $40 fee that we estimate it costs us to see a person in Outpatients in the Northern Territory is an average cost throughout the Territory. The cost varies from hospital to hospital as does the bed cost. It is a yardstick that we use to obtain a measure of efficiency. As some people have already said, there are cheaper ways of doing it. For instance, the congress in Alice Springs operates for about $12.50 and private people provide a service for about $10. That is just the nature of the beast. I cannot give an indication that that level of expenditure will be reduced; it is just a fact of life.

Northern Territory Trade Symbol

Ms D'ROZARIO to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Does the NTDC hold a copyright of the Northern Territory trade symbol and, if not, who holds the copyright?

ANSWER

I do not believe anyone holds the copyright. If I understand the situation correctly, the government does propose to introduce legislation on this subject to enable the Territory Development Corporation to hold copyright on the use of the Northern Territory trade symbol and to approve its use only for specific purposes. At present, I do not believe anyone does.

Crocodile Sightings near Public Swimming Areas

Mr EVERINGHAM (Chief Minister): In further elucidation of my earlier answer on crocodiles, I have a late extra bulletin that has just been brought to me. I have just been informed that one of the catching teams has returned to Berrimah with a crocodile captured in the vicinity of Vesteys Beach. I have no further particulars as to whether it is a young female crocodile or otherwise, but if it is a young female crocodile, no doubt it will soon be happily placed with a large team of other crocodiles of both sexes at the crocodile farm.

Crocodile Farm Problems

Mr B. COLLINS to CHIEF MINISTER

Could the Chief Minister advise the Assembly whether the problems that were being experienced at the crocodile farm have been resolved.

ANSWER

I understand that they have been resolved.

Funding of Women's Centres in NT

Mr ISAACS to MINISTER for HEALTH

Does the Commonwealth provide 75% of the running costs for women's refuges in the Territory with the Northern Territory making up the shortfall as occurs elsewhere? Can he inform the Assembly what funding allocations women's refuges will receive in 1981-82?

ANSWER

The Leader of the Opposition has asked me for details of an agreement that existed before self-government. I will need time to seek the details. I do not have in my head the specific figures he requires for current funding arrangements with women's centres in the Northern Territory. I would appreciate it if the member would put that question on notice.

Sale of Poisons

Mr B. COLLINS to MINISTER for HEALTH

Is the minister intending to proceed with the introduction of legislation during these sittings to improve the control of the regulations governing the possession and sale of poisons such as strychnine?

ANSWER

I am aware that the poisons legislation has been through Cabinet. I cannot say whether it will be introduced into this Assembly in this sittings but it is certainly ready.

Coastal Surveillance

Mrs PADGHAM-PURICH to CHIEF MINISTER

In the interests of coastal surveillance off the Northern Territory and having regard to the importance of the Northern Territory in the illegal importation of drugs into Australia and the number of disused airstrips in the Top End, is it a fact that radar surveillance is not continuous for 24 hours from the RAAF Base? If so, could the Chief Minister use his powers of liaison to discuss the situation with the Minister for Defence?

ANSWER

I am not quite sure what powers of liaison are but I will certainly attempt mentally to define them to myself. If I find that they are of any substance, I will attempt to use those powers. I guess what the member means is that I should take this subject up with the Minister for Defence whom I have found in the past to be often a hard-hearted man. On the question of surveillance generally, the Northern Territory considers that the present position is quite inadequate. Deficiencies of current provisions - in the view of the Northern Territory Police Commissioner especially - include the following: a reliance on civilian operations, lack of sufficient resources, inability to respond to intelligence and sighting information, absence of capacity for ad hoc patrols, fixed rates and insufficient localisation of activity. We believe that future arrangements which should apply for coastal surveillance should involve the establishment by the Commonwealth government of a coastguard authority. I have written to the Minister for Transport, Mr Hunt, who presently has responsibility for coastal surveillance, listing the deficiencies with a statement of the Territory's views and recommendations. Our view is that a well-trained and highly disciplined service is required. As I said before, this should be achieved by the establishment of a specialist coastguard authority. But it could be achieved by either of the following methods: an expansion of defence force capability or an expansion of police capability. We prefer the establishment of a specialist coastguard. There needs to be, however, close cooperation between defence forces, any coastguard authority that is formed and the police force. I do not know for certain

how long the radar facility at the Darwin Airport is manned. I believe that it is only manned for about 8 hours a day. I will obtain that information for the honourable member. She may rest assured that the Northern Territory is already pressing the Commonwealth government, not through the Minister for Defence but through the Minister for Transport, for a reassessment of the current position.

Public Drunkenness

Mr LEO to CHIEF MINISTER

When does the Chief Minister intend to make a statement in this Assembly concerning proposed legislation on public drunkenness?

ANSWER

I would have thought that if an honourable member wished to make any comment on the documents released by the government over the last couple of weeks, he could have done so in adjournment debates. In fact, a couple of the so-called matters of definite public importance that we have seen this week - health funding particularly - could have been equally well handled in an adjournment debate. The documents have been disseminated by the government for public comment and I circulated the documents to all honourable members. At present, it would be premature for the matter to be debated in a formal sense in this Assembly. Certainly, the government has not made up its mind. It is very difficult for us to express a firm attitude until we gauge public reaction and feedback. I believe that the appropriate time for debating the measure will be if they do indeed come to fruition and if there is legislation. I am open to persuasion on this matter but I believe that members can constructively criticise the documents in the course of the adjournment debates in these sittings.

Rice Production

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION and TOURISM

What action is to be taken to reintroduce commercial rice production in the Northern Territory?

ANSWER

Mr Speaker, I would like to be able to give that a very short answer and say that commercial rice production is a viable proposition. The position is not so simple. We made an announcement late in March which indicated that the government had deferred its plans to set up a project rice farm. This was most unfortunate but the establishment cost would have been in the order of some $800,000 over a 3-year period. There was the problem of water storage which was alluded to by the member for Victoria River and there were also problems of testing and further research in that particular area. Thus, the government will not be able to reintroduce the idea of establishing a project farm in the near future. However, a rice task force has been established by the department. We now have 3 rice agronomists on the staff. Future research is being undertaken by the Department of Primary Production in concert with CSIRO. It is hoped that firm steps will be taken towards the next commercial season.

Ministerial Decision on Crown Lease

Mr BELL to MINISTER for LANDS and HOUSING

Will he take steps to reverse the decision to offer a Crown lease on Northern Territory portion 1097 which has been demonstrated to be subject to a claim under the Aboriginal Land Rights (Northern Territory) Act?

ANSWER

I will be addressing myself to that question this afternoon but the short answer is no.

Differential Rating of Properties of City Area

Mr HARRIS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Is the government considering proposals to enable the city council to provide differential rates for properties in the city area?

ANSWER

The government, in consultation with the city council in Darwin, is considering a proposal to amend the Local Government Act to enable differential rating in the city area. The subject rose principally because of the advent of the high-rise car-park in the centre of Darwin and the examination of ways in which contributions may be put towards that car-park by properties which benefit from it. Much of the development in the central business district in Darwin has been done on the basis of waiving car parking requirements under the Planning Act. Those waivers have been in the interests of development. In some cases, they were not requested to put up car-parks to suit the size of the buildings that were built. These systems are not uncommon in other cities around Australia where there are high-rise car-parks. Contributions through rating or other formulae are paid towards the maintenance and cost of high-rise car-parks. Contributions are drawn from those businesses which are specifically benefiting from it. To answer the question, the government is studying this matter at present and I hope to be able to submit proposals to Cabinet in the near future.

Yulara Tourist Village

Ms D'ROZARIO to MINISTER for PRIMARY PRODUCTION and TOURISM

What is the approximate value of the government's investment to date in Yulara Village tourist development?

ANSWER

I am not qualified to give an answer on this particular matter. I suggest that the honourable member place the question on notice and direct it to the Chief Minister.

Electricity Connections in Rural Area

Mrs O'NEIL to MINISTER for MINES and ENERGY

In November 1978, the government introduced a scheme for power connections in rural areas which provided for NTEC to fund up to $2,000 of the cost of an extension for a consumer. In view of the considerable increase in the cost of electricity connections since that time is the government considering increasing the amount by which a consumer may be reimbursed?

ANSWER

There is no proposal before me at the moment to have the level of the subsidy increased. One thing that would affect the cost of connection or a subsidy increase would be the number of people taking advantage of the electricity supply.

Jury Trial Prosecutors

Mr D.W. COLLINS to ATTORNEY-GENERAL

I refer to page 12 of the Northern Territory Department of Law Second Annual Report. What success has been gained in recruiting and training of experienced jury trial prosecutors?

ANSWER

I thank the honourable member for his question which certainly indicates his dedication to the detail of departmental reports. I am informed by the Department of Law that it is extremely difficult to recruit experienced jury

trial prosecutors to work in the Northern Territory. According to my informants in the department, there seem to be 2 major reasons for this. Firstly, an experienced prosecutor in most other jurisdictions in Australia appears before a jury or an appellate court almost every working day whereas in the Northern Territory it is extremely rare for there to be more than 2 jury trials running simultaneously. In fact, this only occurs when the Supreme Court is sitting in Alice Springs as well as in Darwin. Perhaps it is not a scene which appeals to experienced jury trial prosecutors in that they may feel that they could not sufficiently keep their hand in. The Federal Court, which sits in Darwin twice a year, does not offer much experience or scope to an experienced performer from the south because in most southern cities there are more regular sittings of the Federal Court. Basically, the Department of Law believes that it is difficult to recruit experienced men because they feel perhaps there is limited opportunity for their professional development in the Northern Territory. I do not believe that is necessarily so, but it is often difficult to convey to people in the south through the medium of an advertisement that there are indeed greater opportunities. Another difficulty is that of the level of salaries. Salaries offered by the Department of Law are reasonable, but often it would be necessary to offer virtually double the going salary by way of loading to attract these people away from the southern cities because either they are happy in their work in the Crown Law Office in the particular state or they could go to the private bar in the same place and probably earn double or treble the money. It is a big problem. We do attempt to recruit good people who are trained in the course of their experience here. Often people leave the Territory after they have gained a measure of experience which then goes to benefit some Attorney-General's Department or Crown Law Office elsewhere in this country.

Accommodation for Outback Students

Mrs LAWRIE to MINISTER for EDUCATION

Is he considering establishing, or assisting some other group to establish, residential accommodation in Darwin for secondary school students and apprentices whose homes are outside Darwin?

ANSWER

I would very much like to be able to provide precisely what the honourable member for Nightcliff mentions. We are aware of this need which goes beyond school age children to students at the Darwin Community College and, hopefully, at a university. The honourable member would be well aware of the expense of doing this. At the moment, in conjunction with other agencies of government, the department is examining a number of options to provide such accommodation. I think we would be foolish if we did not examine such possibilities as private construction and lease-back arrangements with options to purchase. In fact, we should examine any option. I know that this need is not confined to Darwin and its environs. There is a great demand in your own area, Sir, and of course in Alice Springs and Tennant Creek. There is a limit to how much we can produce in a given time. I believe that the government must address itself to this problem and certainly we intend to do so.

Medibank Agency at TIO

Mr HARRIS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

I understand that Medibank is shortly to cease the agency arrangement it has had since the beginning of the Territory Insurance Office. Can he inform me of the latest position?

ANSWER

The Territory Insurance Office has operated an agency for Medibank. In recent times, it has become a lost operation as indeed has the whole operation of health functions. Discussions were commenced some months ago with Medibank

either to subsidise the Territory Insurance Office to continue to run the agency or to take it over itself. In view of the forthcoming changes to health arrangements, Medibank decided that it would prefer to run its own branch in the Northern Territory. Another factor influencing the Medibank decision was that it is about to go on line with an Australia-wide computer system. It felt that the difference between its own and the TIO computer equipment would present technical problems. There will be no reduction in the services provided in the Territory to Medibank clients following this cessation of the TIO's agency arrangement. The staff wishing to remain with the Territory Insurance Office will have the opportunity to do so while those wishing to work in the Medibank office will be able to do so without loss of benefits. It is understood that Medibank will open an office in the Centrepoint building by the end of June.

Health Funding

Mr B. COLLINS to MINISTER for HEALTH

The minister stated during the debate on health funding that Queensland was able to obtain its extra $16m as a result of a large body of statistical evidence which the Territory did not possess. Could be advise what he is doing to redress this situation?

ANSWER

I was referring to historical information that related to charges that were already being levied through medical benefit funds in Queensland for people who were in public hospitals. We have had a situation in the Northern Territory where it has been in the patients' interests not to belong to a medical benefits fund because there was a free hospital service; there was no point in paying a medical benefits levy. We do not have any base data which gives a true indication of the number of people in the community who have medical benefits cover or even the number of people who use medical benefits. In my own instance, one member of my family, who is covered by medical benefits, went to hospital and gave the wrong answer at the counter about whether he was in the fund. He was treated free of cost when in fact the fund should have been sent a bill. That is the sort of information that we do not have available to us in the Northern Territory to use to argue a point. Queensland, by virtue of its different system, was able to make evidence available to the Commonwealth.

Dam Site on Upper Adelaide River

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

If a dam site is chosen on the upper Adelaide River, will the water in this dam be reserved for agricultural development or is it planned to be used to augment Darwin water supplies?

ANSWER

If such a dam were constructed, I believe it would be for both agricultural and domestic purposes.

Yulara Tourist Village

Ms D'ROZARIO to MINISTER for PRIMARY PRODUCTION and TOURISM

What guidelines have been laid down regarding the height of buildings at Yulara Tourist Village?

ANSWER

The development of Yulara Tourist Village comes under the Conservation Commission. As such, it is under the purview of the Chief Minister. I refer the question to the Chief Minister.

Yulara Tourist Village

Ms D'ROZARIO to CHIEF MINISTER

What guindelines have been laid down regarding the height of buildings at Yulara Tourist Village?

ANSWER

I ask the member to place the question on notice.

Catering and Hospitality Courses

Mr D.W. COLLINS to MINISTER for EDUCATION

How successful are the food and drink waiting courses at Gillen House Alice Springs in regard to gaining employment for the students?

ANSWER

With the advent of the hotel-casino complex in Alice Springs, there will be considerable demand for staff in the catering industry. The record to date has been very encouraging. In fact, it is high time that we made known to the public throughout the Territory the services available and the benefits to be gained from a course at the school of hospitality and catering at Alice Springs. Six students recently completed an 11-week fulltime course in commercial cooking at the Gillen House and they have all entered employment or have been offered employment. Two students have already been employed by Federal Hotels and 1 by Yirara College. Two have received offers from 2 motels. Two food and drink courses have already been offered. Seven students took up the first course and all gained employment as a result. One student dropped out of the course prematurely to accept employment. This of course is a dilemma that students face: half way through the course they realise that they are able to get a job and as a result they do not complete the course. I find it regrettable that they do not complete the course prior to obtaining employment. In that industry, it is quite obvious that employment will be there at the end of the course, although I can understand the apprehension that young people may have. The second of these courses had 7 students and has only just been completed. One student has already been employed at the Oasis Motel while the remaining 6 are currently being interviewed by the new industry opening up down there.

Enrolment of Aborigines on Electoral Roll

Mr ISAACS to CHIEF MINISTER

What action is being taken by the government to ensure that Aborigines of 18 years of age and over who are currently not on the electoral roll are so enrolled to ensure compliance with the Northern Territory Electoral Act?

ANSWER

I do not have the details to hand. I suggest the Leader of the Opposition place the question on notice. I will ensure that he receives detailed reply.

Todd River Causeway

Mr BELL to MINISTER for TRANSPORT and WORKS

The cost of the causeway across the Todd River from the town of Alice Springs to the casino is being shared by his department and Federal Pacific Hotels Pty Ltd. What proportion of the bill for the causeway across the river is being paid by the Northern Territory government?

ANSWER

I am unable to answer the honourable member precisely. I will obtain information and provide it to him later during these sittings.

Shipment of Yellowcake from Nabarlek

Mrs PADGHAM-PURICH to MINISTER for MINES and ENERGY

What progress is being made on the shipment of yellowcake from the Nabarlek project?

ANSWER

Queensland Mines' Nabarlek operation continues to be the subject of industrial action by its employees. Production of yellowcake has been affected by members of the Seamens Union and the Waterside Workers Federation. This has also had an injurious effect on the shipment of yellowcake. The transport of yellowcake to Darwin ceased in April as storage at the Darwin warehouse reached capacity. All subsequent production has been retained at the mine site and production has now ceased. The treatment plant which has been operated by the staff since early this year has been placed in a holding situation. Queensland Mines has met its contract of sales for 1981 and proposes no further overseas deliveries for this year. Union bans on overseas shipments are still in effect and it is my hope that common sense will prevail between the parties to bring about a lifting of the bans before long. Negotiations are continuing on the mine site dispute. The Arbitration Commissioner's recommendation made on 27 May has not been accepted by the employees who have decided to remain out until the commissioner visits Darwin on the 9th of this month to give a determination on isolation allowances.

Dollar-for-Dollar Subsidy Scheme

Mr B. COLLINS to MINISTER for EDUCATION

As we are almost at the end of the financial year, what is the situation regarding the government's dollar-for-dollar subsidy scheme? Specifically, how much of the $500,000 has been committed? If there is a remainder, what will happen to it?

ANSWER

In the Northern Directorate of an amount of $375,000 which was set aside for that directorate for the purposes of the dollar-for-dollar subsidy scheme, the sum total of $358,516 has already been made available. In the Southern Directorate a sum of roughly $75,000 was set aside and $74,019 has been made available. The department informs me that it expects the full amount as appropriated by this Assembly to be used for the purpose. I understand also that, contrary to all the howls and wails that come from various sectors over the policy behind the proposal, it has been extremely popular with parents if not with detractors.

Railway Survey

Mr D.W. COLLINS to MINISTER for MINES and ENERGY

What contribution is the Department of Mines and Energy making towards the Alice Springs Railway survey?

ANSWER

The department will be contributing the services of the Northern Territory geological survey in 3 phases of the railway project. Its geologists will be working in conjunction with the Australian National Railways, the Surveyor-General's Department of the Commonwealth and our own Department of Transport and Works. Phase 1 will be the determination of the route. This work has begun and involves geologists in studies of published geological maps, ground location studies and airborne reconnaissance surveys. As the work becomes further defined, detailed geological mapping will be done of a corridor some 5 to 12 kilometres wide. This is a major and time-consuming exercise and has already been commenced between Alice Springs and Tennant Creek. The other 2 phases involving

the geological survey will follow. These are the search for railway building materials and the investigation of subsurface characteristics at bridge sites and cutting sites. This will involve engineering geologists in geophysical surveys of specific sites where they will use both seismic and electrical methods. It will also involve them in investigative drilling for the design of bridge foundations and an exploration for and testing of materials for building the railway. Quarry site investigations have already commenced. Apart from the railway work, the geological survey is presently engaged on a long-term program of airborne geophysical surveys. These are currently being done in the Alice Springs, Tennant Creek and Darwin regions and will provide a spin-off benefit to the railway exercise in that they will be particularly useful in the definition of rock types along the route. This will help in identifying useful materials and suitable foundation. In all, the geological survey will be involved to the degree of using 10% of its staff resources for a period of 2 years on the survey project.

Auction of Houses in Nhulunbuy

Mr LEO to MINISTER for EDUCATION

Can he say when and under what conditions auctions of Housing Commission houses will take place in Nhulunbuy?

ANSWER

I indicated to the honourable member that I would find out why the auction of the 3 houses had not taken place. The answer is that a legal difficulty, at least in the minds of Nabalco, has prevented it from transferring a sublease to the Housing Commission in order for the auction to go ahead. It would seem that that legal difficulty is involved with the Tenancy Act. The Tenancy Act provides that, if not in a written form then by implied covenant, certain things are and remain the responsibility of the lessor. That includes such things as maintenance, insurance and so on. If it was to be held that the Tenancy Act applies to land transferred by Nabalco to the Housing Commission and subsequently sold to a third party, then Nabalco as sublessor would logically remain responsible for certain things relating to a premises which had been sold to a third party. There is a meeting scheduled for Friday for the Attorney-General and myself to try to sort it out. It is very possible that we will have to come back to this place to solve the problem.

Darwin Trader

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

What arrangements have been made with the federal government for the continuation of the Darwin Trader service after September this year?

ANSWER

Negotiations are being carried out with the federal Department of Transport and also with the board and directors of ANL. At this moment, we are unable to determine whether the subsidy will be continued. However, I believe that the federal minister has given an indication that he will support the Northern Territory's bid for a further subsidy to the Darwin Trader to continue to September 1982. We will not know whether we will receive that subsidy until the federal budget is handed down. There are other options that are being looked at by the Northern Territory Department of Transport and Works. Other people have expressed an interest in providing a service on the eastern seaboard. Negotiations and discussions are taking place with these people in case the Darwin Trader is not subsidised by the federal government.

Ross Park Primary School

Mr D.W. COLLINS to MINISTER for EDUCATION

Is it true that a student of the Ross Park Primary School in Alice Springs on being sent by his teacher to the Assistant-Principal for disciplinary action threatened that Assistant-Principal with legal action if the Assistant-Principal caned him?

ANSWER

It is a pity a school has been named. I am not certain that it was that school anyway. It has been brought to my attention that this did indeed occur. While anyone is entitled to the protection of the law and legal representation, one normally assumes that happens after the event rather than before it. What this really raises is not so much an educational matter but the question of the type of use to which Aboriginal Legal Aid is being put in many cases. There is many a policeman who would probably feel the same way about the threat of this type of action. It is not that people really fear appearing before a court and being found to be guilty of civil liability for an action in tort. What they say to themselves is: 'This will cost me a fortune', and it would cost them nothing. Rightly or wrongly, it tends to prevent people taking the actions that they would normally take. I am not saying that this happened in this case. I am merely indicating what I think must be the basis of the question. I have had these expressions of concern put to me, some from within the Department of Education itself. I do not know that there is an easy solution to it. I have heard of the incident occurring in a school but I am not certain that it was the one named.

East Point Reserve

Mrs O'NEIL to MINISTER for LANDS and HOUSING

Does the government intend to incorporate the land adjacent to the reserve formerly occupied by the Fannie Bay golf course into the East Point Reserve?

ANSWER

I ask the member to place the question on notice.

Discipline on School Buses

Mrs PADGHAM-PURICH to MINISTER for EDUCATION

Is he aware of the discipline problem with some high schoolchildren on school buses? If so, would he consider some form of inspection or monitoring on school buses in the interests of social welfare and safety?

ANSWER

Again, it is one of those problems about which I have head stories but nothing specific. The complaints are not only about disciplinary problems but also about the school bus services themselves. It is very rare to be given a specific time and date of an incident which would allow me to follow the matter through. If the member could assist us by investigating, we might have some basis upon which to act. I point out that there is a limit to the resources of any government to constantly employ additional people and then deploy them in the field. The plain fact of the matter is that there are many buses carrying schoolchildren around the Northern Territory. If we were to provide a supervisor in every one of those, I would like the member to tell me from which classrooms we would extract the teachers. We clearly cannot afford it.

Internal Review of Community Health Service

Mr B. COLLINS to MINISTER for HEALTH

Has the internal review of the community health service been completed and,

if so, is he in a position to pass any of the details of that review to the Assembly?

ANSWER

As I indicated at the last sittings, a departmental review was being carried out of the staff levels within the community health service, particularly in the Darwin region. A great deal of concern was expressed at the time that there would be arbitrary reductions in this area. Well that has not proven to be the case. I can advise members that a committee - chaired by Dr Reid, the Acting-Secretary of the department, and comprising Dr Wilson, the Matron of the rural section and the sisters in charge of the respective Community Health Centres in Darwin - has met on several occasions to assess and review staff levels within the Darwin area. It was decided by that committee that the community nursing service could afford to give up 2 sisters. These were transferred to the de-toxification unit at the Darwin Hospital. We have departmental reviews taking place on all aspects of the medical services that we offer to the public. I believe that it is a continuing process. If members would like information on particular reviews, we are keen to provide that information. There is nothing to hide. We think it is prudent to review from time to time what we are doing. There is no doubt that if you lose interest in what the staff are doing, the staff will very quickly get into a very comfortable rut. It is human nature; we all do it.

Crocodile Tracks at Rapid Creek

Mr ISAACS to CHIEF MINISTER

Has the Chief Minister's attention been drawn to concern within the community regarding crocodile tracks near the public park off Rapid Creek Road near Solomon Street? Has the Chief Minister asked the Conservation Commission to investigate the matter and made appropriate recommendations?

ANSWER

My attention has not been drawn specifically to the presence of crocodile tracks in the public park opposite Solomon Street, Rapid Creek. I know the park fairly well because I once represented that area. I am aware of the reported presence from time to time of crocodiles in Rapid Creek because I have 2 sons aged 9 and 7 who seem to find that Rapid Creek has a magnetic influence which draws them each afternoon. When I was a youngster in north Queesland, Mr Speaker, I used to spend all my spare time on the river there. I can understand why my sons and many other kids in the neighbourhoud like to go down to play at Rapid Creek. I will certainly bring this reported sighting of tracks to the attention of the Conservation Commission if it is not already aware of it. I believe that it does pay attention to Rapid Creek from time to time. In fact,my wife keeps me fairly active in that regard.

Stott Terrace Alice Springs

Mr D.W. COLLINS to MINISTER for LANDS and HOUSING

When will the decision to resume or not to resume the land along Stott Terrace, Alice Springs, be made?

ANSWER

I doubt that I can give the honourable member a definitive answer. The Department of Transport and Works and the Department of Lands presented the Alice Springs town council with a proposal to provide a western access to the central business district of Alice Springs which, in our view, would have satisfactorily coped with known projections of traffic growth for quite a long time without the necessity for any acquisitions. At the moment, the town council disagrees with the best advice available to myself as Minister for Lands. I understand that the town council requires that the acquisition go ahead. It seems to be rather an odd thing to acquire business property at a cost of some $1½m simply because of a gut feeling of a now retired engineer and without any traffic studies or in-depth thought about traffic flow difficulties in that town. On the best advice available, the problem certainly could be solved without the necessity for very expensive and disruptive acquisitions. Nonetheless - and this is the reason I say it is difficult to arrive at a conclusion as to when the decision will be made - the situation is now somewhat complicated by the signficant problems posed by the Aboriginal people of the area through the Central Land Council and their other councils as to the existence or otherwise of sites of significance in the proposed Sadadeen industrial location.

If the claiming of sites of significance under the various pieces of legislation which govern them, particularly the federal act, is such as to prevent the establishment of an industrial subdivision in the east, then quite clearly the industrial subdivision will have to be in the west. Of course, we have no guarantee that sites of significance will not be found suddenly, or are not in existence, in the western alternative which is to the south-west of the existing abattoir site in Smith Street Alice Springs. As would be obvious to all members who have read the Alice Springs urban requirements study, that study holds the firm view that the new residential emphasis should be placed on the eastern sector of the town. If that is to happen and the industrial area is to be in the west, then there will be a cross-town traffic problem which does not currently exist. That would completely alter forward planning as to the requirements

of trunk routes which go through the central business district. The whole thing is somewhat up in the air at the moment. I am quite anxious that we overcome these difficulties as to the establishment of this very important industrial area in the east in consultation with the Aboriginal people.

The question of the continuation of Stott Terrace Road across the new bridge to the east is also on the mind of the member for Alice Springs. The point is that that road was to service the new east side, both the industrial and residential sectors. It is on the design list and we hope to have that road constructed through Stott Terrace in the 1981-82 financial year. Regrettably, that road also goes through the valley which is subject to claims of sites of significance by the Aboriginal people in that area. Thus, that whole trunk road is now in question in addition to the future siting of the industrial area. All of that has bearing on trunk road designs which go from east to west and right through the heart of the central business district. It is a real dilemma.

Tempe Downs Grazing Licence

Mr BELL to MINISTER for LANDS and HOUSING

Is he aware that on or about 20 May 1981 a letter was sent under the hand of the Acting Assistant Director Lands Allocation Branch to Messrs Duncan and Gillman of Tempe Downs Pty Ltd stating that the Tempe Downs grazing licence over Northern Territory portion 1097 - already the subject of debate in this Assembly - would not be extended beyond 30 June of this year because it was subject to claim under the land rights act?

ANSWER

No.

Airlines of Northern Australia

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

Is there a formal agreement between the Northern Territory government and Airlines of Northern Australia setting out the obligations of the airline in respect to the provision of services and, if so, will he table the agreement in the Assembly?

ANSWER

At the moment, we are functioning under a letter of agreement with Ansett Transport Industries for the operation of Airlines of Northern Australia. The agreement is with the solicitors of the department and those of ATI. Until such time as the document is presented to me, I am unable to proceed with it through Cabinet for its ratification, neither am I in a position to give that undertaking to the member.

Outpatients Consultations

Mrs PADGHAM-PURICH to MINISTER for HEALTH

If it costs $40 for an Outpatients consultation at Casuarina Hospital - something which a general practitioner could do for $15 or less - why doesn't the government put general practitioners on contract to do the same work?

ANSWER

The matter of the government contracting this sort of work out to the private sector has not been addressed. Certainly I have not considered it at this stage. I am aware that in some places, such as New Zealand, it is a very common practice. Perhaps it would be a suitable practice in some parts of the Northern Territory. It does raise the question, however, of the number of services the government should provide in terms of primary health care. There is a body of opinion that believes that the government should play an important

role in providing Outpatients services of what we regard as a GP nature to the public at large. If this attitude prevails, our hospitals will continue to provide the service even at the greater cost because there will be people who will prefer not to go to a GP but rather to their local public health system for treatment. While it is an obvious conclusion for some people to draw that we should push as many people as possible onto the private practitioner to save the government money, I think a great deal more thought needs to be given to the matter before we take such a decision.

Cropping Development Committee

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Is it the intention of the minister to ensure that an appropriate fee is paid to farmers who are members of the Cropping Development Committee given its increased status as an advisory body to the minister?

ANSWER

The committee is a fairly loose and floating one which does provide advice to me through the departmental head. The position is that members are reimbursed for costs of travel, meals and so forth. As far as its legal status is concerned, it has none, and we have always looked at it in that light. It has not been the practice to pay a statutory sitting fee as we would pay members of tribunals and boards. The matter is constantly under review but I do not see that any move needs to be made at present.

Aboriginal Sacred Sites Authority

Mrs O'NEIL to CHIEF MINISTER

The membership of the Aboriginal Sacred Sites Authority is all male even though female anthropologists are employed. What action is the government taking to ensure that Aboriginal women's sites, which should not be discussed by men, can receive appropriate consideration and protection?

ANSWER

I can only say that 7 members of the Aboriginal Sacred Sites Authority were nominated to the government by the relevant land councils. Therefore, I would suggest that the honourable member might correspond with the land councils rather than direct the question to me.

Overcrowding in NT Prisons

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

What steps are being taken by the government to overcome the continued overcrowding in Northern Territory prisons?

ANSWER

There are a number of irons in the fire in regard to the overcrowding of Northern Territory prisons. I point out also that overcrowding in prisons is certainly not unique to the Northern Territory. Almost every state in Australia has a similar problem. At present, the government has decided to install 2 additional 20-man cell blocks at Berrimah Prison. These are expected to be completed about October this year and action is in hand to seek approval to recruit additional prison officers to man those additional cells.

In addition, the government has deferred the operation of a work release centre that is attached to the Berrimah Prison and has converted the facility temporarily to a women's prison. This does not mean that the government has abandoned plans to implement work release programs in the Northern Territory from the Berrimah Prison. We are examining alternative proposals while this work release centre is being used as a women's prison. We are examining work release programs which may be more cost effective than the facility at Berrimah although

it was in fact designed for that purpose.

The effect of the 2 moves - the finding of an alternative for work release and the building of the 20-man cell blocks for Berrimah - will increase the capacity of Berrimah Prison by about 50%. In addition, special funds have recently been allocated: $90,000 to enable the relocation of ward 12 from the old Darwin Hospital to Gunn Point Prison Farm where it will be used to provide dormitory accommodation for between 40 and 50 additional minimum security prisoners. This step will alleviate some of the problems that we have at present and will assist us to use Gunn Point Prison Farm more effectively. It is a fairly substantial area which has been very successful in providing rehabilitative programs for low security prisoners in our system. The government believes that institutions like Gunn Point where prisoners themselves produce much of the food for prisons throughout the Northern Territory have been successful. It will continue to support expansion of the food production activities at Gunn Point. It is interesting to note that they are about to harvest or may have actually harvested a very fine crop of peanuts. It is hoped to realise some $150,000 from that crop. The work has been done in consultation with the Department of Primary Production so that it has been carefully monitored. This procedure has been adopted so that the Territory in general can benefit from the information gained about small-scale agriculture.

Airlines of Northern Australia

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

Is Airlines of Northern Australia within its rights in ceasing to operate 2 Fokker flights daily between Alice Springs and Ayers Rock?

ANSWER

The answer is no. Last week, there were problems relating to the Alice Springs-Ayers Rock run with Airlines of Northern Australia. The government has informed ATI, the parent company, that the Northern Territory government insists that the levels of service as originally designated to them be maintained.

The honourable member opposite is aware of the negotiations that were carried out earlier this year with ATI and the particular schedules of service that it intended to operate. This was 14 flights to Ayers Rock from Alice Springs a week, maintenance of a Centre run and runs from Darwin to Gove and Groote Eylandt. It was unfortunate that that particular aircraft had some maintenance problems and the service was downgraded. At the same time, I believe that the loadings on that sector have not been great in the last couple of weeks and ATI has asked us to look at the numbers of passengers that it would be able to carry in the F27. We said that we would review it in 6 months time. It was unfortunate that Airlines of Northern Australia had that problem last week but we believe Sir Peter Abeles' assurance will enforce the ATI operation in that area.

Malathion Spraying

Mr B. COLLINS to MINISTER for HEALTH

The minister will be aware of further public criticism of the use recently by Darwin city council of malathion against mosquitoes. Is the minister satisfied that no health hazard is posed by the use of malathion and will the practice continue?

ANSWER

The use of malathion is a matter of great debate not only in the Northern Territory but throughout Australia. The Department of Health takes its advice on the use of such chemicals from the National Health and Medical Advisory Council. This esteemed body of doctors and scientists gives advice on the suitability of using drugs and chemicals and a great many other matters. I am aware

that this matter is about to be discussed again at a national level but I cannot give the honourable member any information as to which way the discussion is likely to go. Until we receive some advice that the practices that we are currently involved in are not in the interests of public health, we will continue to implement them. If the honourable member has any information that would suggest that these practices are not particularly prudent and there is a better way of overcoming the problem, I would be pleased to hear from him.

Palm Leaf Beetle

Mr HARRIS to MINISTER for PRIMARY PRODUCTION and TOURISM

Until a decision has been made on whether or not to introduce a parasite to control the palm leaf bettle, will the government commit itself to continue a program to control this pest?

ANSWER

I think that commitment is fairly clear. We dropped the eradication program because the spread of the insect was too great for our resources. Action will still be taken to assist where possible.

Government Accounts in Alice Srpings

Mr D.W. COLLINS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

What is the government doing to provide a payment service in Alice Springs to process government accounts?

ANSWER

The question of a centre in Alice Springs to process government accounts rather than doing this through Darwin has been under consideration for some time. I expect the approval will be given in the forthcoming budget for such a centre to be operated as an arm of the Treasury in Darwin. Whilst I do not have specific details as to when such a centre may operate, it is recognised that the issue of cheques for government accounts in Alice Springs would be speeded up somewhat even though there is a fairly efficient system of communication and transportation of government accounts up and down the Territory. Obviously, this does not replace the need to have someone on the ground in Alice Springs to whom people can refer in relation to the very large volume of government accounts that are handled. I would hope that such a facility will be established well before Christmas and will be connected to Treasury in Darwin through various computer links so that information can be obtained down there instantly.

Education Funding for Migrant and Refugee Children

Mr B. COLLINS to MINISTER for EDUCATION

Has the government received the $115,000 in extra federal funding that the minister was seeking for the education of migrant and refugee children?

ANSWER

One would expect that I would not be so remiss as not to know the whereabouts of $115,000 but I do not. I do not know the answer to that question. The funds are paid on a quarterly basis and, as such, it really is not relevant whether it is paid at the beginning or the end as long as the quarterly payment is made.

Douglas Daly Agricultural Development Scheme

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

What is the purchase price for the area of land to be used for the Douglas Daly Agricultural development scheme?

ANSWER

The purchase price has not been finalised. We are still waiting for the valuers to come up with a price under the formula that was agreed upon. As soon as that price is available, we will certainly let it be known.

Douglas Daly Agricultural Development Scheme

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION and TOURISM

Has a final decision been made regarding the selection of the 2 farmers for the Douglas Daly area?

ANSWER

I understand that the final selections have been made. Those names have not been made available publicly because I believe that 1 of the farmers still has current commitments and he prefers that the matter be kept confidential for the time being. We will be able to make a statement in the very near future and give full details.

Poker Machines in Licensed Clubs

Mr BELL to CHIEF MINISTER

Does the government at any time in the future intend to allow the introduction of poker machines in licensed clubs in the Northern Territory?

ANSWER

It is impossible to give any definite commitment in this regard because one does not know what change in circumstances may occur. The government has never received any formal application for the installation of poker machines in licensed clubs in the Northern Territory. There have been 2 or 3 fairly vociferous club managers who see poker machines as some sort of solution to the financial problems of the licensed clubs. There is general agreement in the Territory community that there are rather too many clubs for the size of the population which they service. I strongly advocate some rationalisation of the licensed club situation. In Darwin there are a number of different categories of clubs that could probably very usefully amalgamate and provide much better services to their members with a much higher standard all round. Before any application from licensed clubs for poker machines could come forward, the clubs in question would need to canvass very carefully the views of their members. I do not believe it would be simply a decision that could be taken at the level of club manager or even a club committee. I know of several club managers who advocate the introduction of poker machines but I do not know of any particular club committee that does. I therefore have not really had to address myself to the problem at this time. I do not foresee any proliferation of poker machines in the Territory as advocated by the members for Fannie Bay and Nightcliff the other day. At present, it is certainly the government's intention to maintain the status quo.

Airlines of Northern Australia

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

Does the new 2 airline agreement give the Ansett subsidiary, Airlines of Northern Australia, the right to withdraw from those Territory services which it considers to be uneconomical?

ANSWER

The answer is no. I would hate to go back to the drawing board to try to find another airline to operate in our regional areas. It seems that Airlines of Northern Australia have performed quite well so far. I believe that the northern region is satisfied with the level of service that has been provided to it and that the people of Tennant Creek, Katherine and Alice Springs are happy

with the services of Airlines of Northern Australia. There is one blot on its copybook: the early stages of the Alice Springs-Ayers Rock run. I was assured by Sir Peter Abeles that it was not likely to happen again and I must believe him.

Four local charter operators have been given the work around the regional areas of Arnhem Land. The communities are satisfied with the arrangements that have been made. In fact, we have received letters of praise for the services now being provided. Up until about 6 months ago, there were complaints from Arnhem Land regarding the air services that were provided to those regions. I believe that, with the local charter operators and Airlines of Northern Australia, the airline needs of the Territory are being served.

Stock on Rural Roads

Mrs PADGHAM-PURICH to MINISTER for COMMUNITY DEVELOPMENT

In view of the increased sightings of stock on rural roads, about which I have written to him recently, has he initiated discussions with officers of the Department of Community Development regarding the establishment of a large animal pound, even if only on an ad hoc basis?

ANSWER

I am very aware of complaints about stock wandering onto rural roads on the outskirts of Darwin and of the recent tragic death of a motor-cyclist who collided with one such animal. I am aware also that at present there are no pens suitable for holding large animals in a formal sense in the rural area. I have asked the department to investigate the full extent of the problem in the rural area and to recommend possible solutions. If the problem is that widespread one solution could be the establishment of several pounds. As she has expressed a very genuine concern in this area, I shall undertake to keep the member informed of advice from the department. It is, however, a problem that needs to be examined carefully because it should be resolved on a long-term basis and not simply by an action designed to get the odd stray animal out of the way for the time being. The problem involves a number of areas aside from the collection of stray stock. I will keep the member informed on the matter.

Green Paper on Education

Mr B. COLLINS to MINISTER for EDUCATION

Would he advise the Assembly of the public response to the Green Paper on education?

ANSWER

The way that the question is worded, one would expect that I can answer in terms of the number of people who have responded. I certainly cannot. If the member refers to whether or not I found the response to be satisfactory, I dealt with that earlier in this sittings. The honourable member attended an education function where the Green Paper was discussed and he would be well aware of the success of that particular gathering. The public meeting held in Katherine to discuss the Green Paper on education was one of the best attended public meetings seen in Katherine apart from those on land rights. The public meeting which was held to discuss the education bill some years ago attracted only 2 members of the public. Both of those were CLP people who wanted to talk to me about a decision I had made relating to land. Some 40 people turned up in the area of Katherine to discuss the Green Paper. A committee of the representatives of the department, the Teachers Federation and parent bodies has been set up to examine written submissions on the Green Paper and report back to me in due course. The idea has been very successful; it certainly has people thinking about the issues of education in the Northern Territory, particularly the future of upper primary and secondary education.

Mining Display

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

Is the minister aware of correspondence between the Institute of Mining and Metallurgy and the Director of the Museums and Art Galleries Board with reference to an outdoor mining display adjacent to the Museums and Art Gallery complex? If he is, can he inform me why the proposal put forward by the institute is not being proceeded with?

ANSWER

I am aware of the correspondence and, at this stage, can say that I have to examine the matter further to decide on the reasonableness or otherwise of the decision taken by the Museums and Art Galleries Board not to establish this mining display. I believe the display involved pieces of equipment which would be established in such a way that it could be workable for demonstration purposes. The subject came to my attention only recently and I have not had time to look at it closely. I do not regard the matter as having been closed. However, when one talks about the style, shape and placement of heavy machinery as an external exhibit to the museum, quite clearly such a display would have to be done in a tasteful and acceptable manner. I would not like to pass judgment on the matter until I have undertaken further investigation.

Morgan Poll on Poker Machines

Mrs O'NEIL to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Did the Northern Territory government commission the Morgan poll on poker machines on which the government based its new poker machine policy and, if not, who did commission the survey?

ANSWER

The government commissioned a poll on matters relating to gambling and gaming in the Northern Territory through the Racing and Gaming Commission.

Bus Timetables

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

In the interest of the convenience of the travelling public in the rural area, why can't government bus drivers carry copies of bus timetables applying to the rural area to distribute on request?

ANSWER

As far as I am aware, bus drivers normally carry timetables for their particular route. Probably one of the reasons why they do not have a full stock of every timetable, not only for rural areas but for other areas, is the amount of paperwork that bus drivers are asked to do today. I believe that timetables are available at the bus terminal in the city area and they are also available at the Coolalinga and Humpty Doo stores.

Steps on Buses

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

Has the minister received complaints that the first step on the new buses is too high for elderly or infirm people to manage adequately? If he has received such complaints, is he endeavouring to see that a drop step will be provided so that they can mount the buses without difficulty?

ANSWER

I will have the matter investigated.

Child Care in Katherine

Mr D.W. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

I ask this question on behalf of the member for Elsey. Can the minister outline the steps taken by his department to meet the need for child care in Katherine?

ANSWER

Following the closure of an illegal child care centre in Katherine last year after an unfortunate accident, the Katherine corporation applied for funds from the Department of Social Security office of child care to employ a children's services research and development officer for a 6-month period to examine the question of child care needs in Katherine. A grant of $10,000 has been approved and the research is now being undertaken. The immediate needs for the children of meatworkers in Katherine have been temporarily met by the shared use of O'Keefe House, a departmental family home, by the Homemakers Service and the Northmeat Child Care Cooperative. The establishment of permanent facilities in Katherine is under consideration by these groups and no doubt a report by the person undertaking the study of child care needs in Katherine will make recommendations on solutions to the problem in the future.

Horticulture in the Northern Territory

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Given the importance of the horticultural industry to the Northern Territory and the high possibility of the commercial success of such an industry, can the minister inform the Assembly when the Agricultural Development and Marketing Authority will commence work on the required infrastructure for this industry in the Territory?

ANSWER

The honourable member will be aware that at this stage the ADMA is basically looking at cropping as a priority. Some work is being undertaken with horticultural projects but, in the main, the department will be the sponsor for horticultural development in the Northern Territory. In that regard, it has boosted its staff to 8 and has recruited rather successfully interstate. I believe that there is much potential for horticultural development here. In recent times, we have had Mr Vennard, a very successful mango grower from Bowen, over here. I understand that he is looking to take up permanent residence in the Northern Territory if he can obtain a suitable block of land for his purposes.

Funding for Agricultural Development and Marketing Authority

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

What indication has the government received as to the extent of future financial support from the federal government for the ADMA scheme?

ANSWER

The question has not been considered recently. I cannot remember the last answer we gave the member on long-term finance. Obviously, the long-term financing of the ADMA scheme will come under scrutiny in terms of the development of the project farms. It is in this context that the Commonwealth is assessing the program to date.

Cultural Centre in Alice Springs

Mr D.W. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

What steps have been taken to implement the proposal for the establishment of a cultural centre in Alice Springs?

ANSWER

The Araluen Arts and Cultural Trust established by the government under an act of this Assembly is constituted to construct a proposed multi-purpose art centre in Alice Springs. With funds provided by this government over the past 2 years, it has engaged a consultant to conduct a feasibility study and prepare a complete design brief for an Araluen cultural facility. The report that has been received recommends the construction of a theatre, art and craft studios and galleries. The government has recently allocated a further $70,000 to the Araluen Trust which is preparing detailed planning and cost estimates for the entire project in association with the Department of Transport and Works. I hope that when those are available, they will include plans and a model of the proposed facility for display in Alice Springs so that public comment can be considered.

Racing and Gaming Commission Poll

Mr BELL to TREASUER and MINISTER for INDUSTRIAL DEVELOPMENT

I preface my question by drawing the attention of honourable members to the questions in the poll instituted by the Racing and Gaming Commission on whether poker machines in casinos should be legal or illegal? Will the Treasurer make public the other questions in this poll?

ANSWER

No.

Education for Refugee Children

Mr HARRIS to MINISTER for EDUCATION

Recently there has been an influx of refugee children into the Northern Territory. Is the minister able to inform me if adequate educational provision is being made for these children and, if so, is this placing other programs in jeopardy?

ANSWER

The answer is yes and no in that order. The member may not be aware that early last week I issued a detailed press statement on this matter. I also dealt with it at some length at question time last week. I refer my colleague to those sources rather than waste the time of the Assembly.

Financial Assistance to the Farming Community

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

When will the government announce revised plans for financial assistance to the farming community and does it intend to have discussions with all interested parties before a final decision on the most appropriate means of financial assistance is made?

ANSWER

Rural financing is a very serious matter. The Agricutural Development and Marketing Authority has prepared a report on rural finance in the Northern Territory. We see this as one of the most important areas of crop and agricultural development in the Territory. We will obtain views from all and sundry. The Territory Development Corporation, the Agricultural Development and Marketing Authority and the Cropping Development Committee have complementary roles in this area.

Toilets at Civic Centre Bus Terminal

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

Who has responsibility for the maintenance and cleaning of toilets at Darwin's main bus stop at the Civic Centre?

ANSWER

I presume the honourable member has asked me this question because one of our local identities was locked up in this particular toilet for a few hours recently and no one knew she was there. She was asleep presumably. In answer to the honourable member's question, the Department of Transport and Works has responsibility for cleaning the toilets and if the honourable member has any problems or knows of any happenings occurring there that should not be occurring, I will have them investigated.

Recreation Lake in Alice Springs

Mr ISAACS to CHIEF MINISTER

I refer to a statement in the Northern Territory News that the Chief Minister is to reopen negotiations with the Central Land Council on the siting of the recreation lake in Alice Springs. Can he tell the Assembly whether the Northern Territory government still wishes to site the lake north of the town in the position that was unaceptable to the Central Land Council or are other sites to be investigated as suggested by the land council?

ANSWER

The government still wishes to site the lake to the north of the town. Originally, the government had the consent of the Central Land Council for the siting of the recreation lake in that area and, subsequently, that consent was withdrawn before other sites were investigated. I believe that there is only one other feasible site which is some 80 miles from Alice Springs. In my opinion, it is too far from the town to represent a facility of which the townspeople could avail themselves readily. I have instructed officers of my department in the Aboriginal Liaison Unit and officers in the Department of Lands to reopen negotiations with the Central Land Council to see if there is any way around the impasse. Yes, it is certainly the government's wish, if at all possible, to proceed with the construction of the dam which will create the lake to the north of Alice Springs.

Needs of Aged Persons

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

The issue of the needs of aged persons and the co-ordination of services to aged persons was raised in a report from the Board of Inquiry into Welfare in the Northern Territory. What action has been taken or is likely to be taken by the government in regard to aged persons as a result of that inquiry?

ANSWER

The needs of aged persons is a matter in which the Northern Territory government has a strong commitment. The Pensioner Concession Scheme, although providing services to a wider group than just aged pensioners, provides important concession and rebates to the elderly of the Northern Territory. However, the government recognises that an extensive examination needs to be made of the requirements of aged persons in the Territory and, just as importantly, a congruent examination of the most effective and efficient delivery of services and resources to the aged. Therefore, the government commissioned a survey of aged persons' needs and services which began in April 1980. An officer, Ms Ann Brennan, who is renowned as a key Australian expert in relation to aged persons, was seconded from the Department of Social Security to conduct the survey and prepare the report.

Extensive discussions and consultation have been held with all related Northern Territory and Commonwealth departments and interested individuals and organisations throughout the Northern Territory. The first draft of the report has been completed and is being examined by Northern Territory government departments. It will be similar in format to the review of handicap services in the Northern Territory and the process of consideration of the report will also be similar to that utilised in relation to that review. Therefore, consideration of the report and action emanating from it will be subject to widespread departmental and community input before the report is considered by the government as to its implementation or otherwise.

Lease of Carpentaria College

Mrs LAWRIE to MINISTER for LANDS and HOUSING

The legal tenants of Carpentaria College have been issued with notices by

the Lands Branch determining their lease. As there are no immediate plans for either demolition or occupancy of the building by any other group, could the honourable minister explain why these notices have been issued and undertake to review them?

ANSWER

It is one of those questions that are the most difficult to address one's mind to, particularly at a time when we all recognise there is not exactly an abundance of premises available in Darwin for the type of people who occupy that sort of accommodation. The member says that the tenants are legal tenants and that is quite correct. The termination of the lease is equally legal. I do not think anyone is disputing that. The whole purpose of the exercise is to make the building safe. On the best advice available to me, the people who are living there do so at some peril. It is for that reason principally that the decision was taken.

The people have been represented by legal counsel through the Australian Legal Aid Service and I understand that, for some reason or other, there has been a breakdown in communication through that service to them. When the extension was granted, I was under the impression that that was with the concurrence of the people presently occupying the premises. It was an agreement entered into between my office and their legal representatives. I have had no contact that I am aware of from any of the occupants of those buildings, either via their solicitors or personally through them, requesting a change. It seems that the honourable member for Nightcliff is now a substitute for the legal representative of the occupants. In accordance with normal practice, any representation made by the people, either directly or through their solicitors, naturally would be looked at in the same manner as would an application by anyone else for accommodation. I cannot add to that until such time as I receive an application or a submission.

Queensland Coal for Power-station

Ms D'ROZARIO to MINISTER for MINES and ENERGY

Has the government negotiated coal contracts with Queensland coal suppliers to meet the demands of Darwin's new power-station?

ANSWER

I think it would be fair to say that negotiations and discussions with quite a few parties in Queensland have been under way for some time. For the information of honourable members, about 12 months ago, I had the opportunity to discuss with the former Queensland Minister for Mines and Energy, Mr Camm, and his electricity trust head, the possibility of the Queensland government supplying, through its electricity commission, coal for use in the Northern Territory. I am also aware that NTEC and officers of the Energy Division have been holding talks with various suppliers of coal in Queensland to ascertain what tonnages could be supplied, when they would be available and what price we would be looking at in the future for the supply of coal for our new power-station.

I would make the point that the most important factor for us to consider in the purchase of coal is not necessarily the price but the quality of the coal. We are looking for the best grade of coal that we can get to use in a power-station that we hope will be one of the most efficient coal burners yet produced in the world. I think members will appreciate that coal technology is changing drastically and will continue to change as prices fo oil and coal soar. People who are using a product such as coal are now looking for the best burning and heat qualities that they can get from that product. We will be doing the same thing. While we may have several people to talk to about the supply of coal, an important criterion that we have to consider is the quality of coal that is available to us and the capacity of a particular supplier to provide it for the Northern Territory. I am not sure whether members appreciate that the greatest

problem which will confront the coal industry in the Northern Territory in the next 10 years will be providing the amount of coal that the world wishes to burn. We have coal in the ground. Our difficulty is the infrastructure of getting it to the seaboard and then into ships. Very clearly there is a great problem in this and other countries: to provide the infrastructure in the time available. The Northern Territory is no different. We will have to fit in with the coal-miners, railways and port facilities. That is another aspect that NTEC and the government will have to consier in the course of time. I shall be happy to brief the member from time to time on what is happening in this particular area.

Production Bore at Coastal Plains Research Station

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION and TOURISM

Why was the cost of a production bore at the Coastal Plains Research Station taken off the current estimates in view of the necessity of his independent water supply for the continued success of the experimental, commercial and horticultural program out there?

ANSWER

I am not aware that the item has been taken off the estimates. I understand that it is a very important item and it is hoped that the supply of water at this place can be funded in the forthcoming budget. Obviously, I would not wish to pre-empt what the Treasurer might say later.

Construction of Non-airconditioned Schools

Mr B. COLLINS to MINISTER for EDUCATION

There seems to be some confusion in the public mind as to the government's policy on constructing schools which will not be supplied with airconditioning. Could he advise the Assembly exactly what are the department's plans?

ANSWER

The question is almost impossible to answer in this format. I would be happy to supply the honourable member with a detailed written answer because there is quite a lot implied in it. Basically, it is a matter of funds available for education and the need to maximise the sensible use of those funds. We are all very much aware of the enormous cost of provision of electricity for air-conditioning. The aim is the best utilisation of the taxpayer's dollar to achieve the objective of educating children. Certainly the building should be designed in a manner that maximises the use of natural cooling to ensure adequate cross-ventilation so that the inside temperature of the classroom will be no hotter than the ambient temperature. By using ventilation techniques, a breeze can be created artificially by a venturi effect because warm air has the habit of floating upward. If these techniques are used in architectural design, the cooling effect of the moving air takes over. The best advice that we have from an architect is that this has been successfully achieved in the buildings proposed for Karama, Leanyer and Humpty Doo schools.

Geothermal Resources in NT

Mrs O'NEIL to MINISTER for MINES and ENERGY

Has a decision been reached on the arrangements by which exploration for geothermal resources in the Northern Territory might be undertaken?

ANSWER

The Department of Mines and Energy is still assessing the best way we might go about accommodating people involved in geothermal exploration. It is not simply a matter of geothermal exploration which is really regional geology using alternative techniques to those we are using now, such as satellite and infra-red detection. It raises the question of whether we should be encouraging our

mining companies also to move into regional exploration because these 2 things are quite similar in their principle and their aim. We are most interested and are trying to encourage the concept of geothermal energy detection in the Northern Territory because, though it has not been proved, it is something that could be of vital use in our particular environment. I would hope that, before the end of the year, I will have a proposal for the Assembly that will accommodate geothermal exploration and the possibility of regional exploration which will have a great deal of appeal to many companies.

Northumberland Insurance Company

Mrs LAWRIE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Regarding the Northumberland Insurance Company collapse, has he been able to get the Commonwealth to agree to contribute towards the claims that are still the subject of settlement? When I asked the question at the last sittings, he said he was negotiating with the Commonwealth to that effect.

ANSWER

I do not have information to hand, I will seek it and, if possible, provide an answer during the course of this day.

Youth Sport and Recreation Directory

Mr HARRIS to MINISTER for SPORT and RECREATION

I understand that there is a youth, sport and recreation directory being compiled. Can the minister advise what stage the preparation has reached?

ANSWER

I believe that the directory is almost compiled. It will include the names and addresses of the presidents of the various associations and their involvement in particular sport and community activities. It is ready to go to the printer. We will be circulating it to organisations without cost. The department hopes to upgrade that directory each year.

Tuberculosis and Brucellosis Eradication

Mr D.W. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

I ask the question on behalf of the honourable member for Elsey. Who will pay for the eradication of tuberculosis and brucellosis in feral animals on the 28% of Northern Territory land owned by Aborigines?

ANSWER

The government's attitude would be that there will be general funding through the budget to pursue the eradication of tuberculosis and brucellosis. There are encouragements being provided by the federal government, such as tax concessions, and anyone who is running stock should be able to avail himself of that. That program will be complementary to the central effort of the scheme being undertaken through my department.

Sydney Legal Firm and NT Government Work

Mr ISAACS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Is he aware that the Chairman of the Northern Territory Development Corporation has recently had discussions with principals of a major Sydney legal firm with a view to that firm establishing an office in Darwin and doing the more complex government legal work? If he is aware, can he explain why the Department of Law is not doing the work? If he is not aware, can he have the matter investigated and report later?

ANSWER

I ask that he place the question on notice. However, I will comment on his reference to the Department of Law not doing all the Territory Development Corporation's legal work. It has been arranged in some cases for a number of authorities of the government to have at least some of their legal work done by the private sector. There are some classes of work where it has been requested that they continue to use the Department of Law but, as far as commercial-type activities are concerned, the authorities are free to use the private sector.

Instruction to Authorities Concerning Solicitors

Mr ISAACS to MINISTER for INDUSTRIAL DEVELOPMENT

When granted access to the private sector for their legal work, are authorities instructed or advised to use local solicitors rather than interstate solicitors?

ANSWER

If the Leader of the Opposition wants to pursue the questioning of government policy in relation to the use of legal firms and the Department of Law, such questions should be addressed to the Attorney-General whose portfolio covers that area.

Capital Works Subsidy

Mr D.W. COLLINS to MINISTER for YOUTH SPORT and RECREATION

When will a 3-to-1 subsidy for use in capital works be implemented?

ANSWER

Unfortunately, I cannot provide him with a definite date when this particular scheme will be implemented. However, the information I can provide to him is that the Department of Youth, Sport and Recreation is providing additional information that I have requested. I was not happy with the first draft regarding the proposal because it was not explicit enough. When the department has provided me with information, I shall take it to Cabinet for its approval regarding implementation of the subsidy.

Instruction to Authorities Concerning Solicitors

Mr ISAACS to ATTORNEY-GENERAL

With regard to those statutory authorities who are given approval to use private firms for their legal work as opposed to the Department of Law, are those statutory authorities advised or recommended that they should use local legal firms rather than interstate legal firms?

ANSWER

Those authorities which have the approval of government to engage private practitioners generally speaking have clearance only to engage them in relation to work of a commercial nature. Any work of a policy nature is still referred to the Department of Law. These statutory authorities are encouraged in fact to use private firms of legal practitioners which are locally based. I believe that by and large they have always done so. In the law, as in every other profession and field of endeavour, there are areas of expertise where the local practitioners are not sufficiently forward in the field and advice is needed. In some of the transactions in which the government becomes involved from time to time, there are many complications and, obviously, it is necessary for the Department of Law itself to engage specialist legal advice from outside the Territory. For instance, the Department of Law engages a southern Queen's Counsel to represent the Northern Territory in national wage cases. We have engaged, through the Department of Law, a Sydney firm to represent us from time to time in things such as the conference convened by the Chairman of the Con-

ciliation and Arbitration Commission, Sir John Moore. In relation to the original agreement with Federal Hotels on casinos, the Department of Law employed its own resources through the Crown Solicitor and used a Sydney firm which, I think, was either Freehill Hollingdale and Page or a firm that is currently represented in Darwin by the former Crown Solicitor, Abbott Tout Creer and Wilkinson.

I happen to know something of the question that the honourable the Leader of the Opposition asked of my colleague the Treasurer earlier. I was informed in a circuitous fasion that another large national firm, Allen Allen and Hemsley, has thoughts of establishing an office in Darwin. I think it is Allen Allen and Hemsley; if it is not Allen Allen and Hemsley, it is Stephen Jacques and Stephen. I see the establishment of offices by these firms in the Territory as a sign of the growth and advancement of this Territory. Recently, we saw Perth and Sydney firms establishing in Singapore. I welcome the Sydney firms that want to establish in Darwin as I welcomed firms from Melbourne, Brisbane and Adelaide. It has never caused a ripple within the legal profession because I believe that these people do not establish here unless there is sufficient work to go around. They bring a certain expertise which improves the professional qualities of the local legal profession. In my experience, the legal profession in Darwin has never believed in a local parochial sense that it has a monopoly on wisdom. We have brought to the Territory on many occasions outstanding counsel to plead before the Territory bar when it has been necessary and other people with wisdom and expertise in commercial fields to assist clients where required.

One might ask what this is doing for the Department of Law. It has been the policy of this government - and I think it has been plainly displayed - that it wanted to bring the Department of Law to a high professional standard. The government has sought to engage people,from the Solicitor-General down, who are of high professional capacity. As I understand it, the Department of Law is expanding, not in a spectacular way perhaps, but certainly there is continuing growth within the professional side of the department. I do not see the influx of firms from other parts of Australia as being anything but beneficial to the legal profession, anything but beneficial to the government and lastly but most importantly, beneficial to the people of the Northern Territory. I can certainly say that to my knowledge no inducement to Allen Allen and Hemsley, or any other firm, has ever been extended to persuade them to establish in Darwin.

Aboriginal Teaching Assistants

Mr B. COLLINS to MINISTER for EDUCATION

Has the government given any further consideration to the problem of replacing Aboriginal teaching assistants who are going to Batchelor College?

ANSWER

Indeed we have. We are exploring every possible avenue to try and overcome the problem. It is a dilemma. We set up a program, which the member recognised as being a very good program, and a very extensive new facility at Batchelor. The moment we tried to implement the actual course work, we triggered off difficulties elsewhere. We recognise that. We do not believe that it is within the capacity of the Northern Territory government to go into massive training exercise of this sort without assistance from the Commonwealth. We are making approaches through the Department of Employment and Youth Affairs, through the Department of Aboriginal Affairs and through the various schemes which are available for adult training and adult improvement and looking at avenues available to us to overcome as far as possible any shortages which might exist as a result of the training program at Batchelor. I would say, in fairness, that all Aboriginal schools are staffed vastly better than any European school. Notwithstanding the absence of Aboriginal teaching assistants at Batchelor, those schools still remain better staffed than any other schools in the Northern Territory.

Government Statistician

Mrs PADGHAM-PURICH to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Does the Northern Territory government employ a statistician and, if not, why not?

ANSWER

I am used to 'if not, why not questions' coming from the other side of the Assembly, not my own. We do not have a statutory position of government statistician but we do have a nominal appointment in the Department of Treasury. By arrangement with the Commonwealth, we use its statistician to collect and collate data for the Northern Territory as is required by our government. To date,the system has worked quite well. The Commonwealth statistician has responded to the requirements of the Territory government and has a range of programs for collecting data which was not collected prior to self-government. This information is absolutely vital to government. To continue to operate, a very reliable and regular collection of statistics is needed. If the honourable member feels that useful information of a statistical nature from time to time is not available, I would be pleased to hear from her or any other member on this matter. We could then examine the question of whether additional statistics should be collected, or indeed collated from existing collections, for the use of members and the community generally.

Aboriginal Health Worker Training Programs

Mr BELL to MINISTER for HEALTH

In the light of the federal health cuts, will he guarantee that Aboriginal health worker training programs will be maintained at the current level of funding?

ANSWER

The member is asking for a commitment that needs to be considered as part of the full budget of the Northern Territory. I would make this point to the member. The Aboriginal health worker training program was established by the Commonwealth some 5 years ago by the now officers of the Northern Territory Department of Health. I believe the program is an excellent one. Since self-government, we have increased activity in this area, not just in terms of numbers and manpower by the introduction of initiatives such as the health worker training program for dental work. I cannot give the honourable member a promise that expansion will go on ad infinitum in this area, but he can rest assured that the government is sympathetic towards the program. We fund it out of our health resources, as has been done in the past, and will continue to do so at a level we believe we can afford. I think this is the responsible way to approach it.

I make the point that we do not receive a special consideration from the Commonwealth government in this particular regard. It is an initiative that we wish to continue. No state has a similar program and no other state receives any special consideration from the federal government for conducting such a program. I believe it is one of the great initiatives of the 1970s. I hope the honourable member will appreciate that the government has a very sympathetic attitude towards the program and will endeavour to see that it is always maintained at a maximum level.

Northern Territory Port Authority

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

Can he indicate when he will be making appointments to the present vacancies on the Northern Territory Port Authority?

ANSWER

In the near future.

Darwin Power-station

Ms D'ROZARIO to MINISTER for MINES and ENERGY

Has the site of Darwin's proposed coal-fired power-station yet been determined?

ANSWER

If the honourable member reads the paper I circulated the other day, she will find the answer there.

Water Reticulation in Rural Area

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

When will the Water Division have a rational plan of water development, including reticulation, for the rural area?

ANSWER

The department has already considered the matter. It does not intend formulating a water development plan for the entire Darwin rural area because of the widely dispersed population in the area. Nevertheless, it believes it is technically feasible to reticulate water throughout the rural area and a plan will be drawn up.

Emergency Accommodation

Mr BELL to MINISTER for LANDS and HOUSING

I preface my question to the Minister for Lands and Housing by drawing his attention to a report in the Centralian Advocate dated 29 May 1980 in which he announced government plans to make available emergency accommodation in 4 Territory hostels. What is the progress on the plans announced last year?

ANSWER

Negotiations are still proceeding with the people who have taken up contractual leases in respect of those properties. We have come unglued following the Lynch committee's activities which resulted in the virtual dissolution of the Commonwealth hospitality and accommodation service and put us pretty well back to square one.

Darwin Power-station

Ms D'ROZARIO to MINISTER for MINES and ENERGY

Will he inform the Assembly whether a site for the Darwin coal-fired power-station has yet been determined?

ANSWER

I would advise here that the Electricity Commission has commissioned Merz and McLellan to do final evaluations of 4 sites in the immediate Darwin area for the provision of the power-station. I do not have in my head the particular riding instructions given by NTEC to Merz and McLellan. I can say that 3 of the sites are Cox Peninsula, Quarantine Island and East Arm. I cannot recall the fourth one. There is a fair amount of work to be done by the consultants on these sites before a final proposal is made to Cabinet.

Unattended Children at Casuarina Shopping Centre

Mrs PADGHAM-PURICH to MINISTER for COMMUNITY DEVELOPMENT

Is the minister aware of the problem of young children wandering around the Casuarina Shopping Centre all day having been left there by their parents in the morning? If he is aware of the problem, what are the officers of the Department of Community Development doing about it.

ANSWER

An allegation has been brought to my attention recently that some irresponsible parents in Darwin have adopted a practice - and I repeat it is an allegation at this stage - of dropping their children at Casuarina Shopping Centre in the morning and using the place as an informal child-minding centre until late in the afternoon. I have reported this matter to the director of child care in my department and asked if he could investigate and make recommendations to the government on the seriousness of the alleged problem and possible measures that the government might consider taking. If such allegations are true and the children involved are young, it is a most serious situation and any parents who undertake this sort of activity can only be regarded as irresponsible.

Accreditation of BA Degree at Darwin Community College

Mr B. COLLINS to MINISTER for EDUCATION

Does the Darwin Community College intend to seek again accreditation for its degree of batchelor of arts and, if so, when?

ANSWER

I am not certain to what extent the Darwin Community College has revamped its proposals. I know that quite a lot of work has been done on the type of staff required, course materials required, library facilities and so on. I believe that there is some difficulty as a result of the federal government's current attitude to funding courses. There is a degree of difficulty in persuading the Tertiary Education Commission, given those guidelines, that this course, no matter how structured, will be a sufficiently vocationally-weighted BA to receive Commonwealth funding. We will have to have the course accredited first and address ourselves to the question of funding later. I am most anxious for the course to be accredited nationally and then we will address out ourselves energetically to providing the funds to conduct it.

Security of Patient's Belongings

Mrs O'NEIL to MINISTER for HEALTH

What arrangements are made to ensure the security of the belongings of hospital patients, for example psychiatric and geriatric patients, who are unable to care for themselves?

ANSWER

I ask the honourable member to place her question on notice.

NT Remuneration Tribunal

Mr ISAACS to CHIEF MINISTER

Given that Norm Campbell has recently been appointed to the Northern Territory's Remuneration Tribunal, can the Chief Minister inform the Assembly whether he has given Mr Campbell a reference of parliamentary salaries, allowances and conditions?

ANSWER

I have not at this stage given any reference to Mr Campbell or signed any document directing him to do anything. In fact, at this moment, I am uncertain of my powers under the Remuneration Tribunal Act. Certainly Mr Campbell's appointment has been made with a view to conducting a review of parliamentary salaries and the salaries of other office holders who come within the purview of the tribunal. I will take up with the Director-General of my department the administrative steps needed to enable the inquiry to commence in view of the fact that the Leader of the Opposition apparently attaches some urgency to it.

MacDonnell Ranges National Park

Mr BELL to CHIEF MINISTER

I preface my question by drawing his attention to an article in the Centralian Advocate of 5 June 1980 in which he announced the proposed MacDonnell Ranges National Park. When will the MacDonnell Ranges National Park, announced with much publicity a few day before the Northern Territory elections last year, be gazetted?

ANSWER

I cannot say when the park will be gazetted. I know that the Conservation Commission is investigating this matter. As the member has given no forewarning of this question, I ask him to place it on notice.

Negotiations for Local Government in Nhulunbuy

Mr LEO to CHIEF MINISTER

Is he aware of any negotiations between the federal government, Nabalco and the traditional owners of the Gove Peninsula for local government in Nhulunbuy and, if so, at what stage are the negotiations?

ANSWER

I am not aware of any negotiations between the federal government, Nabalco and the traditional owners in respect of local government in Nhulunbuy, but it would be misleading to sit down having said simply that. There have been negotiations between the Northern Territory government and Nabalco. I believe there have been negotiations between the Northern Territory government, Nabalco, the federal government and the traditional owners at some stage. Those are the 4 parties involved. I believe that local government has been the subject of discussion at certain stages but I do not think that the question of local government has been raised at all with the federal government, although that is my understanding only, not my absolute commitment.

Regulations under Education Act

Mr D.W. COLLINS to MINISTER for EDUCATION

When will regulations be introduced under the Education Act?

ANSWER

I speak from memory but I think the projected target date is about August.

Negotiations for Local Government in Nhulunbuy

Mr LEO to CHIEF MINISTER

At what stage are the negotiations between the Northern Territory government, Nabalco, the traditional owners and the federal government?

ANSWER

The negotiations are at a very early stage. They have not gone very far at all. The Northern Territory government could gear-up for the introduction of local government in Nhulunbuy within 6 months provided that the various preconditions were met. I do not think the status of the land on which Nhulunbuy is situated has any effect on the town gaining local government status. Obviously the negotiations have to proceed with Nabalco and,as a matter of courtesy, with the traditional owners or the Northern Land Council because I do not think local government impacts on the status of the land there. However, I believe that there is a certain caution on the part of the company about local government. For instance, there are negotiations over the question of whether the company would continue to subsidise the housing of the employees of Nabalco as it does at present. I understand they enjoy what amounts to free housing with no rates,

electricity or other taxes or charges. Whether Nabalco would make a lump sum payment in lieu of rates and other local government charges direct to the local government authority, were it to be established in Nhulunbuy, would be of primary consideration. Obviously, there would be the matter of transfer of assets from the company to the local government authority. Certainly, there is goodwill on the side of the Northern Territory government and a desire which has been expressed many times to bring local government to Nhulunbuy. I believe too that there is goodwill on the part of the company, but there is a natural caution about moving from a position that it is familiar with to one which holds, as it sees it, many uncertainties. I believe that the negotiations may well take some time but I believe that the Northern Territory government could probably introduce local government into Nhulunbuy within 6 months of the satisfactory conclusion of these negotiations.

Mr ROBERTSON (Education)(by leave): As members will be aware, the Treasurer and Minister for Industrial Development and Minister for Community Development is absent chairing the Conference of Local Government Ministers. Any questions which normally would be directed to him may be directed to the Chief Minister who will do this humble best.

Tax-sharing Arrangements

Mr ISAACS to CHIEF MINISTER

What effect, if any, will the Grants Commission recommendation released yesterday on tax-sharing arrangements between the states and the federal government have on federal government/Territory relationship?

ANSWER

I have not yet seen a copy of the relativities review report by the Grants Commission. I believe that a copy is on its way to the Northern Territory. Members will appreciate that it is a review of the relativities operating between the states. As such, I understand that it has no effect whatsoever on the Northern Territory's present position which is secured by the Memorandum of Understanding. Our base figure for general revenue funding will continue to be escalated in accordance with the formula provided in section 23 of that document. It could be that, in its applications to the Grants Commission, should they become necessary at any time, the relativities situation could impact on the Northern Territory, but my advice from the Treasury is that it foresees no impact on the Northern Territory as a result of this particular study. However, that statement is made without reading the document.

Housing Commission Blocks

Mr HARRIS to MINISTER for LANDS and HOUSING

What guidelines does the Housing Commission use when determining whether or not a block of land is suitable for medium-density housing? Is there a minimum size for blocks to be used for this purpose?

ANSWER

The Housing Commission does not determine which blocks are suitable for R2 multiple and medium-density development. That is a matter for the Planning Authority. There are set plot ratios which govern whether or not one can build medium density on any given block of land. Members will be aware that there is an idea floated at the moment through the Town Planning Authority of which, incidentally, I was unaware as the Planning Authority is completely independent of government. The number of units which can be built on a given area of land is determined under those guidelines and not by the Housing Commission.

Means Tests for Public Hospitals

Mr B. COLLINS to MINISTER for HEALTH

Is he in a position to advise the Assembly yet if the government intends to introduce a means test so far as public hospitals are concerned in the Northern Territory. If so, will it be based on the same levels as recommended by the federal government?

ANSWER

So far as the department and the government are involved, the criteria for establishing whether people are disadvantaged are those that have been set down by the Commonwealth. This is not terribly satisfactory as far as we are concerned. If the Northern Territory wishes to make a case for additional funds because of a weakness that we have perceived in the Commonwealth's attitude, it would not be in our interest to establish other guidelines and have other attitudes towards the criteria for working out who is disadvantaged and how they should be helped.

I am not saying that there should not be some degree of compassion in this matter but, if we wish to argue a case with the Commonwealth for additional funds, we have to do it on sound grounds. It has struck the ground rules; we will play the game by the ground rules and then demonstrate to it how very wrong it was.

Bagot Road Flyover

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

What is the current estimated cost of the construction of the Bagot Road flyover and what was the original estimate?

ANSWER

I am unable to provide that information to the honourable member. I will provide it later today.

Tennant Creek Police Station

Mr LEO to CHIEF MINISTER

Will the Chief Minister investigate the level of manning in the Tennant Creek Police Station in the light of some officers at the station recently being required to work 3 successive shifts?

ANSWER

Yes.

Northumberland Insurance Company

Mrs LAWRIE to CHIEF MINISTER

Can he advise yet whether the Commonwealth will contribute towards the claims which are still the subject of settlement regarding Northumberland Insurance Company. The honourable Treasurer undertook to provide a reply at this sittings.

ANSWER

I do not think so. However, I can find the answer without much delay and I will let the honourable member know today. I trust that she will excuse my colleague, the Treasurer. We sat until fairly late yesterday and he had to dash off immediately to a function which he was to host for the visiting Local Government Ministers from all around Australia and New Zealand. He is chairing that meeting at the Civic Centre today.

Alice Springs Industrial Area

Mr D.W. COLLINS to MINISTER for LANDS and HOUSING

The minister is well aware that there is a proposal for an industrial area to be set up in the east side of Alice Springs and that the prevailing winds in Alice Springs blow from the east. What action is being taken to prevent any industrial odours coming across the residential area?

ANSWER

The proposed industrial area for that location is not of a noxious nature. It is a service industry site. It is the same as other light industrial areas around Alice Springs, none of which have ever given rise to complaints of that nature.

Lock-ups at Katherine and Tennant Creek

Mr BELL to CHIEF MINISTER

Has the status of police lock-ups at Katherine and Tennant Creek been changed to allow for confinements for up to 28 days and, if so, why?

ANSWER

I am not aware of such a situation. I ask the honourable member to place his question on notice.

Abattoir at Katherine

Mr LEO to MINISTER for PRIMARY PRODUCTION and TOURISM

Is the minister aware of the possible closure of the abattoir in Katherine at the end of the current season? What action will be taken to prevent the possible closure of the abattoir, given the importance of the operation to the local economy?

ANSWER

It is my experience that the abattoir in Katherine closes every year. I would not find it at all unusual if the abattoir closed this year.

Rural Planning Authority and Palmerston Development Authority

Mrs PADGHAM-PURICH to MINISTER for LANDS and HOUSING

What input will the Rural Planning Authority have with the Palmerston Development Authority?

ANSWER

Formally none, but on the other hand, I made quite clear at the time of release of the Palmerston development proposal that any person who considers he has an interest in that area or that he will be in any way affected by what happens through the development of Palmerston is more than welcome to make any input.

Aboriginals and the Electoral Roll

Mr ISAACS to CHIEF MINISTER

Is he yet in a position to inform the Assembly what action the government proposes to take to ensure that all Aborigines of 18 years of age and over are placed on the electoral roll?

ANSWER

I believe that it is the intention of the Electoral Office, over the course of the next several years, to embark on enrolment campaigns and voter education campaigns, but I am not in a position to give precise details of those matters.

Length of School Terms in the Northern Territory

Mrs O'NEIL to MINISTER for EDUCATION

Why do children in the Northern Territory now attend school for up to 2½ weeks less than children in other states because of shorter term times and why is the situation being allowed to continue under the semester system to be introduced in 1982?

ANSWER

Certainly that is not my understanding of the number of school days put in by Northern Territory students. I will certainly check the honourable member's figures but I think she will find she is wrong.

Overseas Visit of Minister for Transport and Works

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

In respect to his forthcoming 1-month visit overseas, would he please inform the Assembly which countries he will be visiting and the purpose of his visit to each place?

ANSWER

I shall be going to the United Kingdom to attend a water industries conference in London and Brighton. From there, I shall proceed to European ports to inspect the railroad facilities. Whilst I am in London, I will be attending all sessions of that water conference. I will then be going to Germany for an international trade fair on waste disposal and a sewage and refuse symposium, which should make the member for Fannie Bay happy. Whilst I am in the United States, apart from various ports that I intend visiting, I shall be asked to officiate at a keel-laying ceremony for a warship which is to be named after the city of Darwin: HMAS Darwin. It is the first warship to be thus named and I deem that a great honour. Upon my return, I will provide the Assembly with a copy of the report of the trip.

Housing Commission Blocks

Mr HARRIS to MINISTER for LANDS and HOUSING

I would like to ask the same question that I asked before but I will preface my remarks by saying that I refer to Housing Commission blocks that can be purchased by public servants. What guidelines does the Housing Commission use when determining whether or not a block of land is suitable for medium-density housing and is there a minimum size for blocks that can be used for this purpose?

ANSWER

The rephrasing of the question has made it more confusing than it was in the first place. I really cannot follow what my colleague wants. If he would like to talk to me later, I will be able to get the information he obviously needs.

Ross River Fever

Mr B. COLLINS to MINISTER for HEALTH

Has he had any success with his attempts to have Ross River Fever renamed?

ANSWER

I can advise the member that our efforts have not fallen on deaf ears. In fact, it is quite a complex procedure to have viruses renamed because there are international connotations. We have spoken to Australian authorities responsible for such an activity. They have agreed to support our proposal. It now has to run the gamut of international considerations. I hope that it will be renamed within a year.

International-standard Indoor Stadium

Mr HARRIS to MINISTER for YOUTH SPORT and RECREATION

Is the government considering building an international-standard indoor stadium in Darwin?

ANSWER

A feasibility study is being carried out for such a proposal. I hope to be able to present to Cabinet a submission relating to that exercise. Most members would be aware that the Commonwealth government has made an announcement that it is prepared to provide $25m for sporting facilities throughout Australia on a dollar-for-dollar basis. I would be very interested to try to obtain some of those funds for such a facility in Darwin. Discussions have taken place with the various sporting organisations which could use such an indoor facility. The requirements that the federal government has put on the dollar-for-dollar grant relate to its being an international-standard facility. We do not have one in the Territory. I believe that we would have a very good chance of obtaining a dollar-for-dollar subsidy from the federal government providing that the Northern

Territory government was in a position to get these sporting organisations together. I refer to basketball and other indoor sports such as judo and gymnastics. The submission will be presented to Cabinet in the near future and we will be in a position to make an announcement regarding the proposal shortly.

Pathology Laboratory at Darwin Hospital

Mr B. COLLINS to MINISTER for HEALTH

What is the future of the pathology laboratory at Darwin Hospital? Has the minister considered the use that is made of that facility by other departments, such as the Department of Primary Production?

ANSWER

I ask the honourable member to put his question on notice.

Northern Territory Lottery

Mrs LAWRIE to CHIEF MINISTER

Has the Racing and Gaming Commission or any other government agency been asked to conduct a feasibility study into running a Territory lottery and, if so, what was the result?

ANSWER

The short answer is yes. I think the Treasury rather than the Racing and Gaming Commission - but I could be wrong - was asked to conduct a feasibility study. I think it has conducted more than one. One was conducted in 1978 and it was reviewed fairly recently. This matter bears upon a similar comment in an adjournment debate by the member for Tiwi that the Territory should have its own lottery. The government would be quite happy with the proposition. Governments run lotteries in Queensland and South Australia and other states. Due to the size of the Territory population and the flood of lotteries which are operated here, apparently the Treasury study indicates that a lottery in the Territory would not be feasible. It would have to be kept open for an unreasonable length of time - from memory, I think as long as 12 months - and the interest people would have in buying tickets that would not be drawn for 12 months would be negligible. One of the most popular games sweeping South Australia and the Northern Territory at present is the South Australian invention called Instant Money. I doubt that a 12-month lottery would be in the sweepstakes with that.

Venereal Disease

Mr D.W. COLLINS to MINISTER for HEALTH

What is the incidence of venereal disease in young people in the Territory?

ANSWER

The information which he is seeking should be found in the Health Department's annual report. I would summarise it by saying that, in 1980, in the 15 to 19 year age group, 81 persons had gonorrhea and 93 had syphilis; in the 20 to 24 age group, 216 had gonorrhea and 109 syphilis; in the 25 to 29 age group, 145 had gonorrhea and 100 with syphilis; and in the 30 to 34 age bracket, 117 gonorrhea and 44 syphilis. Additionally, during 1980, 8 cases of gonorrhea were notified in people of less than 15 years of age and 23 cases of syphilis for the same age group.

Katherine Rural Education College

Mr B. COLLINS to MINISTER for EDUCATION

Has the Katherine Rural Education College been transferred to 15-mile Katherine Experimental Farm?

ANSWER

There is a requirement for further demountables to complete the shift. I received a very clear message when I was in Katherine last weekend from parents who are interested in the Katherine Rural Education Centre that the entire operation ought to be based at the 15-mile farm and not split as it is at the moment. I accept what they say. Every effort must be made to make a success of the Katherine Rural Education Centre. It is quite clear that it needs a home of its own and steps will be taken to achieve that end.

Northern Territory Development Corporation Annual Report

Mr ISAACS to CHIEF MINISTER

Is it still the intention of the government to table at this sittings the Northern Territory Development Corporation Annual Report for 1978-79?

ANSWER

I cannot answer that question. I can make inquiries right away, of course, but I am not aware whether the 1978-79 report is ready or not. I will certainly find out.

Northumberland Insurance Company

Mr EVERINGHAM (Chief Minister)(by leave); While I am on my feet, Mr Speaker, I will reply to the honourable member for Nightcliff in respect to the Northumberland Insurance Company.

It appears that the Treasurer sought the information yesterday because this minute to him from the Treasury is dated 10 June. Apparently, we have had no response so far from the Commonwealth to representations to the Department of Home Affairs to have the Commonwealth accept responsibility for some proportion of the claims against Northumberland Insurance Company. I understand that the advertisements which were put in the paper some time ago asking people to indicate potential claims drew a likely quota of about $150,000. The Treasurer's minute states that the latest advice from the Department of Law is that further action should be delayed as there is a possibility that the Commonwealth will meet all outstanding claims whether or not there has been a court decision. All I can say is that, after this time, I think that whoever in the Department of Law gave that advice to the Department of Treasury must be a wishful thinker. We will do something about processing the claims that we have.

Lecturers for Students Seeking Seamanship Tickets

Mrs LAWRIE to MINISTER for EDUCATION

Following the introduction of the Maritime Bill, has he taken steps to recruit people for the Darwin Community College who are adquately equipped to lecture students seeking varying degrees of seamanship tickets?

ANSWER

I have no doubt that the question was well meant. However, every time something goes wrong with the community college, I am instructed or asked by this Assembly to order the college to do something or other. Each time it is inconvenient for honourable members or for some other reason they do not want me to do anything, they say that I am interfering politically in the affairs of an autonomous institution. The fact is that I cannot win. The answer is that it is entirely a matter for the Darwin Community College, unless members of this Assembly want me to change the act.

Sites of Significance in Proposed Alice Springs Industrial Area

Mr D.W. COLLINS to MINISTER for LANDS and HOUSING

Earlier this sittings, the minister outlined some difficulties in establishing the east-side industrial area in Alice Springs due to claims for sacred sites in the area. What efforts did the Department of Lands make to ensure that it was aware of any sites of significance in that area prior to drawing up the plans?

ANSWER

I thank the honourable member for the question; it is a good one. As is implicit in his question, great cost has been involved in getting to the stage we have with the planning of the east-side subdivisions, both industrial and residential. From memory, the first study in relation to that area was the Alice Springs Urban Development Study in 1975 which was commissioned by the Department of the Northern Territory as it then was. The areas where we are currently trying to establish both residential and industrial subdivisions on the eastern side of Alice Springs were identified in that plan. Nothing came up at that time in relation to sites of significance. In 1978, the Department of Lands specifically requested the Central Land Council and, I understand, our Central Australian Aboriginal Congress, to identify specifically any sites of significance in the eastern section of town. They were able to identify 2 which were widely known as sites of significance. My department was not satisfied that the information was necessarily all there was to the story and subsequently involved the Department of Aboriginal Affairs and the Sacred Sites Authority. Another 2 sites were then identified, and nothing further. Since work has started in the area, particularly in the industrial subdivision, the entire valley is claimed to be a site of significance.

In fairness to the Central Land Council, it said at the time that these were the only known sites and further research was needed. However, the problem is that the Central Land Council, and indeed Aboriginal people in the area, quite freely admit to the Department of Lands that sites will not be disclosed until such time as all the work is done and - to use the land council's terms - the sites are threatened. Of course this places the government in an absolutely impossible position. We cannot plan around the sites of significance because we do not know they are there and the land council will not tell us until we start with the bulldozers. This involves enormous delays and tremendous cost to the taxpayer. I do not know what the answer is. It certainly seems as if there is a great deal of reluctance on the part of the Central Land Council to cooperate with the Department of Lands in the interests of all.

Senior Secondary College

Mr B. COLLINS to MINISTER for EDUCATION

Has the Department of Education abandoned the proposal to use Casuarina High School as a senior secondary college as was stated at the seminar and is the proposal now to build a new facility?

ANSWER

I intended addressing myself to that subject last night in the adjournment. The contents of the Green Paper are for the purpose of public discussion. The policy which arises out of that is a matter for myself and Cabinet. I can assure this Assembly that no such decision has been taken by the government.

Education of Seamen

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

In introducing his Marine Bill the honourable member stated: 'Facilities are to be set up for the training, education and examination of seamen to ensure they have every opportunity to gain basic qualifications or to upgrade existing

qualifications'. Where are those facilities to be set up and by whom will they be staffed?

ANSWER

I ask the honourable member to place the question on notice.

Alice Springs Airport

Mr BELL to MINISTER for PRIMARY PRODUCTION and TOURISM

Has he an assurance from the federal government that the Alice Springs Airport will be upgraded to international standard within 10 years?

ANSWER

To get an assurance that anything will be upgraded to international standard within 10 years would be surely a meritorious feat. Should I achieve such greatness, I will no doubt make an announcement.

Government Criteria for Funding Cultural Activities

Mrs O'NEIL to CHIEF MINISTER

Does the Northern Territory government have a policy on the arts which guides it in the allocation of money for artistic and cultural activities and, if so, will he outline that policy in the Assembly or table a copy of it?

ANSWER

I ask the honourable member to place the question on notice for my colleague.

NOTICE GIVEN ON DATE SHOWN

From 18 November 1980

Collia Tin Mine

6 Mr ISAACS to MINISTER for MINES and ENERGY

As a number of people have lost their savings in the Collia tin mine affair,

(a) what detailed action has been taken by the Department of Mines to settle the matter;

(b) how much money has been lost by people involved;

(c) how much did Mr Ken Day receive for the tin he mined from Collia;

(d) why has he not explained in the Legislative Assembly what action the government has taken;

(e) did the Department of Law recommend that anybody be charged over the affair and, if so, why was not that recommended action proceeded with;

(f) was the government's lack of action coloured by the fact that Mr Day was once the head of the Progress Party, whose votes had helped the Country Liberal Party;

(g) what is now being done about the matter; and

(h) are police trying to contact the previous leaseholder who disappeared and, if so, do they know in which state he is residing?

Government Assistance for Tradesmen to Visit Remote Areas

44 Mr MacFARLANE to MINISTER for LANDS and HOUSING

What assistance will the government provide to enable electrical, plumbing and building tradesmen and inspectors to visit remote centres such as Borroloola to assist home owners?

From 25 November 1980

Operational Grant Subsidies Scheme

79 Mr PERKINS to MINISTER for COMMUNITY DEVELOPMENT

1. Which organisations are funded under the Operational Grant Subsidies Scheme?

2. Does he intend to increase the number of organisations able to receive funding on a 3 years basis, to allow more effective functioning?

3. How much has been allocated to the Government Concession Scheme for 1980-81, and in which financial allocation is it included?

4. Will he provide a complete itemisation of the financial allocation for 1980-81 of $1,071,588 in the grants and subsidies section?

Department of Community Development - Advertisement in NT News

82 Mr PERKINS to MINISTER for COMMUNITY DEVELOPMENT

I refer to an advertisement in the November 4 edition of the NT News placed by the Department of Community Development calling for a person to carry out a program entitled 'Survey of Aboriginal Communal Camping and Residential Facilities in Urban Areas', and ask -

1. How many people applied for the position?

2. Has the position been filled and, if so, (a) who has filled the position, (b) has the successful applicant commenced work on the program, and (c) what is the nature of the work currently being undertaken?

From 24 February 1981

NT Pensioners Concession Scheme

87 Mr PERKINS to MINISTER for COMMUNITY DEVELOPMENT

Under the NT Pensioners Concession Scheme, how many persons received assistance in the categories of council and land rates?

Department of Community Development Grants-in-Aid

104 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

1. Which community groups made application to the Department of Community Development for Grants-in-Aid for the year 1980-81?
2. How much did each group request?
3. How much was granted to each of the applicants?

Elsey and Hodgson Downs Pastoral Leases

126 Mr MacFARLANE to CHIEF MINISTER

1. What efforts are being made to have land excised from Elsey and Hodgson Downs pastoral leases for use as community areas for Aborigines?
2. Is the government's failure to obtain such excisions frustrating provision of essential services such as septic systems, power supplies, airstrips and housing?

Katherine Water Supply

133 Mr MacFARLANE to MINISTER for MINES and ENERGY

Will electricity to be reticulated to the new water supply at Donkey Camp near Katherine be extended to cater for consumers and future subdivisions on the Gorge road, and to Katherine Gorge?

Katherine Community Welfare Office

134 Mr MacFARLANE to MINISTER for COMMUNITY DEVELOPMENT

1. Why did Mr Peter Ryan of his department post a notice on the door of the regional office in Katherine on 8 January 1981 advising people in need of assistance to contact Les MacFarlane?
2. Is this action likely to be repeated?

Katherine High School - Cleaning Tender

135 Mr MacFARLANE to MINISTER for EDUCATION

Is he aware that the successful tender for cleaning Katherine High School (Gazette No. G1, 9 January 1981, ETB 27/80) is in excess of $80,000, or almost $410 for each school day, for 1981 and, if so, will he investigate alternative means of cleaning to lighten this load on the taxpayer?

Richard Koerner

147 Mr ISAACS to CHIEF MINISTER

1. In what capacity is Mr Richard Koerner employed by the Northern Territory government?

2. What salary, allowances and other entitlements is Mr Koerner receiving?

From 3 March 1981

Tenders for School Bus Runs

152 Mrs LAWRIE to TREASURER

Why was ETB 3/80 cancelled and recalled as ETB 14/80?

Tenders for School Bus Runs

153 Mrs LAWRIE to TREASURER

In regard to tenders TB 1026/79A and TB 1093/79, in what respect did the tenders received from O'Hara's Roadlines Pty Ltd not conform?

Tenders for School Bus Runs

154 Mrs LAWRIE to TREASURER

1. Is it a fact that the tenderer awarded TB 1026/79A and TB 1093/79 had 8 buses to service 7 runs?
2. If so, how was the tenderer awarded these runs being 2 buses short of the required 10 buses for 8 runs?

Tenders for School Bus Runs

155 Mrs LAWRIE to TREASURER

1. Does tender TB 1026/79 (school bus runs) state that all buses offered in the tender must be in Darwin 14 days prior to the commencement of the tender?
2. If so, why was the tender awarded to a tenderer who did not meet this specific requirement?

Essential Services for Aboriginal Communities

156 Mr ISAACS to TREASURER

1. What is being allocated in cash for essential services in 1980-81 and for which Aboriginal communities?
2. What are the proposed projects?
3. What projects have been completed?
4. How many Aborigines (a) have been, and (b) are employed with the essential services program?
5. What training are they receiving and from whom?
6. What essential services program has been decided upon for the Hodgson community?
7. What improvements are to be carried out in respect of (a) a water supply, (b) provision of toilets and showers, and (c) upgrading of and access to the airstrip?

Rehabilitation of Rum Jungle and Other Uranium Mine Sites

157 Mr B. COLLINS to MINISTER for MINES and ENERGY

1. Will he advise the Assembly on the progress of plans to rehabilitate Rum Jungle?

2. Will he also advise of any plans to rehabilitate and make safe the tailings dumps at other uranium mine sites in the NT?

TAA Bid for Connair

158 Mr ISAACS to CHIEF MINISTER

Did the NT government intervene to prevent TAA proceeding with the purchase of Connair for $1.6 million under an agreement signed in September 1979 and if so, why?

TAA Bid for Connair

159 Mr ISAACS to CHIEF MINISTER

Did the government intervene late in 1979 to prevent TAA proceeding with a second bid of $1.85 million for Connair and, if so, why?

East West Airlines

160 Mr ISAACS to CHIEF MINISTER

1. When did the NT government first raise with East West Airlines the back-to-back requirements of the guarantee arrangements?
2. Was the advice in writing?

Bans on Northern Airlines

161 Mr ISAACS to MINISTER for TRANSPORT and WORKS

1. What are the details of the agreement between the NT government and the Australian Federation of Air Pilots which enabled the bans on Northern Airlines by the federation to be lifted?
2. Was the agreement signed on behalf of the NT government by the Acting Secretary of the Department of Transport and Works?
3. Will he table the document in the Assembly?

East West Airlines

162 Mr LEO to MINISTER for TRANSPORT and WORKS

1. Did the government receive from East West around May 1980 details of that company's borrowing capacity, including (a) current East West borrowing capacity, (b) borrowing requirements for operations outside the Territory, (c) equity levels to support borrowing, and (d) capacity to support borrowing by the NT airline?
2. If so, why was this information not made available to the merchant banker, Hill Samuel?

East West Airlines

163 Mr LEO to MINISTER for TRANSPORT and WORKS

Did the 3-man committee established by the government to examine the Connair takeover offers first recommend acceptance of other offers before recommending East West?

East West Airlines

164 Mr ISAACS to MINISTER for TRANSPORT and WORKS

1. In view of the government's insistence that the guarantee to Northern Airlines of East West Airlines was always intended to be a back-to-back nature, why was such a provision not made clear in either the

memorandum of understanding or the deed?

2. What documented evidence can the government produce to support its claim that a guarantee must be back-to-back?

East West Airlines

165 Mr ISAACS to MINISTER for TRANSPORT and WORKS

Did the government advise East West in September 1980 that the company's request for guarantees on behalf of Northern Airlines had been approved in principle subject only to documentation?

Transecutive Pilots

166 Mr DOOLAN to MINISTER for TRANSPORT and WORKS

1. Which former Northern Airline pilots will get permanent positions with Transecutive if that company is granted a long-term licence to operate both contracts?

2. Is it a fact that former senior pilots with Northern Airlines are likely to get these positions, that they will require re-training to fly Nomads, and that the government has agreed to meet the cost of this re-training?

Northern Airlines Replacement by TAA

167 Mr DOOLAN to MINISTER for TRANSPORT and WORKS

When did the government first approach TAA regarding the possibility of that company providing an interim service following the closure of Northern Airlines?

Transecutive Pilots

168 Mr DOOLAN to MINISTER for TRANSPORT and WORKS

1. Who will meet the wage costs of the pilots taken on by Transecutive who are surplus to the number actually required to operate the contracts during the interim period?

2. If it is the government, why?

Industries Training Commission

173 Mr B. COLLINS to MINISTER for EDUCATION

1. How many apprentices are with the Industries Training Commission?

2. What is the number in each trade and the breakdown of males and females for each category?

Link Courses Between Sadadeen High School and Central Australia Community College

174 Mr B. COLLINS to MINISTER for EDUCATION

Will he advise on progress of the link courses between Sadadeen High School and Community College of Central Australia?

Female Field Worker with Aboriginal Sacred Sites Authority

175 Mr ISAACS to CHIEF MINISTER

Has the Aboriginal Sacred Sites Authority appointed a suitably qualified female field worker-anthropologist to work directly with Aboriginal women?

From 2 June 1981

Mining Royalties Paid to Aborigines

178 Mr MacFARLANE to CHIEF MINISTER

Will he advise -

1. The amount paid to Aborigines in the NT from mining royalties in (a) 1978, (b) 1979, and (c) 1980?
2. What level are these mining royalties expected to reach in 1981?
3. What funds the Aboriginal Development Commission has to invest in the NT in 1980-81?
4. Are mining Royalties paid to Aborigines considered as taxable income?

Special Assistance Loan to Northern Meat Exporters

179 Mr MacFARLANE to TREASURER

What are the terms and purpose of the Special Assistance Loan made to Northern Meat Exporters Pty Ltd by the Commonwealth and taken over by the NT Development Corporation? (See answer to Question 103).

Generators at Elliott and Newcastle Waters

188 Ms D'ROZARIO to MINISTER for MINES and ENERGY

1. What is the current rating of (a) the 3 generator sets at Elliott and (b) the generator at Newcastle Waters?
2. What is (a) the rating and (b) the cost of the proposed generator installation at Newcastle Waters?
3. Are any other projects to be deferred or abandoned to allow for the proposed generator installation at Newcastle Waters?
4. What was (a) the original design level of the generator set pad and, if the original design has been altered, (b) what is the new level?
5. What is the highest recorded flood level in the region in which the proposed generator is to be placed?

Demountable for Katherine Rural Education Centre

193 Mr MacFARLANE to MINISTER for EDUCATION

What are the reasons for the delay in providing demountable buildings for the Katherine Rural Education Centre at the 15-mile Experimental Farm, Katherine?

NTDC Loans

194 Mr ISAACS to TREASURER

1. When were the following outstanding loans taken up by the respective organisations -
   (a) a special assistance loan to Northern Meat Exporters Pty Ltd;
   (b) a special assistance loan to Alice Springs Abattoirs Pty Ltd; and
   (c) a special assistance loan to Carba Australia Ltd?
2. When will the above loans be fully paid out?
3. How many loans in the following categories remain outstanding -
   (a) sale of bores (drought relief);

(b) flood relief loans;

(c) Darwin business relief loans; and

(d) Primary Producers Board loans?

4. How many of the recipients of loans in the above-mentioned categories have defaulted?

5. What course of action is NTDC undertaking to recover such funds?

Interest Rate on Loan to Northern Meat Exporters Pty Ltd

195 Mr MacFARLANE to TREASURER

What rate of interest is being charged on the $1.4m special assistance loan granted to Northern Meat Exporters Pty Ltd?

Travelling Allowance for Ministers

196 Mr ISAACS to CHIEF MINISTER

For each minister, how many days travelling allowance has been paid from 1 January 1981 till 1 May 1981?

From 9 June 1981

Ministers' Travel

197 Mr ISAACS to CHIEF MINISTER

1. How many days travelling allowance have been paid to each minister from 1 January to 25 May 1981?

2. What was the cost of travel undertaken by aircraft charter by each minister from 1 January to 25 May 1981?

3. How many overseas trips have been undertaken by ministers on official business from 1 January to 25 May 1981?

4. What has been the total cost of these overseas trips?

Aboriginal and Islander Medical Service

198 Mr B. COLLINS to MINISTER for HEALTH

1. What is the present staffing of the Aboriginal and Islander Medical Centre? Are there plans to increase the staffing levels and, if so, what positions?

2. What are the functions and duties of the Aboriginal and Islander Medical Service?

3. During the 6 months to 31 May 1981, (a) how many Aboriginals have been treated per week by AIMS, (b) what are the major categories of illness, and (c) where do the Aboriginals, in the main, come from?

4. How many Aboriginal liaison officers are attached to Casuarina Hospital; what hours do they work; and are there plans to increase the numbers?

5. Are any Aboriginal liaison officers to be employed at Darwin Hospital?

Hospital Advisory Boards

199 Mr B. COLLINS to MINISTER for HEALTH

What is the composition of the various hospital advisory boards in the Northern Territory?

Refugees at Tamarind Centre

200 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

1. How many refugee families are now at Tamarind Centre?
2. How many have obtained employment?
3. How many have moved from the hostel into the community?
4. How many adults are undertaking English lessons?

Student Assistance in NT

201 Mr B. COLLINS to MINISTER for EDUCATION

How many students in the Northern Territory are, (a) receiving assistance under the Tertiary Education Assistance Scheme, and (b) how many are in receipt of the full allowance?

NTPS Disabled Employees

202 Mr ISAACS to CHIEF MINISTER

1. How many disabled are employed in the NTPS, what are their positions, and with which departments?
2. How many disabled have been employed in the NTPS in 1981?

Funding of Women's Centres in NT

203 Mr ISAACS to MINISTER for HEALTH

1. Does the Commonwealth provide 75% of the running costs for women's refuges in the Territory with the Northern Territory making up the shortfall as happens in the states?
2. Can he say what funding arrangements will apply to women's refuges in 1981-2?

Aborigines on Electoral Roll

204 Mr ISAACS to CHIEF MINISTER

What action is being taken by the government to ensure that Aborigines, 18 years of age and over, who are currently not on the electoral roll, are so enrolled to ensure compliance with the Electoral Act?

Medical Practitioners Servicing Community Health Centres

205 Mr B. COLLINS to MINISTER for HEALTH

How many doctors have been servicing community health centres, and how many of these are private practitioners?

Public Housing - Out-of-turn Allocations

9 Mr ISAACS to MINISTER for LANDS and HOUSING

1. How many applications for out-of-turn allocation of public housing have been (a) received, (b) accepted, and (c) rejected?

2. How many applicants whose applications were (a) accepted , or (b) rejected were in receipt of (i) supporting parent's benefit, (ii) unemployment benefit, (iii) other pensions, (iv) one-income families?

3. How many applicants for out-of-turn accommodation were living in (a) caravans, (b) tents, (c) share accommodation, (d) hostels, or were (e) homeless?

4. What steps have been taken by the Housing Commission to assist those in need of accommodation who were rejected for out-of-turn accommodation?

5. If applicants were referred to other community organisations, to whom were they referred?

6. How many applicants were found accommodation directly by efforts of the Housing Commission?

ANSWER

1.

Number of requests received	453
Number of requests rejected and not presented to committee	285
Number of cases presented to committee	168
Number of cases approved by committee	29
Number of cases rejected by committee	139

2.

Applicants approved	29
Supporting parents	6
Unemployment benefit	2
Other pensioners	5
Medical	9
Evictions	4
Welfare	3
Applications not approved	424

*January 1980-August 1980

Supporting parents	82 applied
Unemployment benefits	17 applied
Other pensioners	26 applied
Employed	171 (single and combined income)

* Source of income figures are not available prior to January 1980.

3. Statistics are not kept on the type of accommodation the applicant is currently occupying.

4. The non-approved applicant is advised in writing that a re-assessment can be requested if their circumstances change. The staff refer the unsuccessful applicant to specialised community organisations who will carry out follow-up assistance.

5. Applicants are referred to community organisations -

Salvation Army	Council on the Ageing
YWCA	Government Hostels
YMCA	CWA
Community Development for bond assistance	Silas Roberts Hostel.

6. Records have not been kept in relation to the location of accommodation in the private sector in many instances, however, they can only advise

of accommodation available, they cannot compel the applicant to pursue the assistance offered.

Alice Springs - Traffic and Railway

74 Mr PERKINS to MINISTER for TRANSPORT and WORKS

1. How many vehicles use the level crossing daily at the Larapinta Drive-Telegraph Terrace intersection in Alice Springs?
2. Is it true that a set of traffic lights will be installed at the intersection and crossing?
3. In the matter of arrangements being made for the Alice Springs to Darwin standard gauge railway planning what decision-making powers are held by (a) the NT government, (b) the Alice Springs municipality, and (c) the Australian National Railways Commission?
4. In the event of a dispute over the location of the railway line, is it true that the Alice Springs municipality can be overruled by the ANR?
5. Will he supply a list, including (a) dates, (b) names of participants, and (c) the agenda of meetings which have been held between the ANR and his department during the past 2 years and, if not, why not?

ANSWER

1. Current usage of the above level crossing is in the range of 12,000 to 14,000 vehicles per day dependent on the time of the year.
2. Yes, these lights will be installed at the new crossing location after construction of the standard gauge railway terminal and road is completed.
3. Decision-making powers relevant to the Alice Springs standard gauge railway planning are set out below. It is pointed out however that the decisions were made after consultation with the interested bodies.

   (a) The Northern Territory government has the powers to make laws for the peace, order and good government of the Territory as vested to it by Section 6 of the Northern Territory (Self-Government) Act including for land use, planning, development and acquisition, town planning and regulation of surface transport. Existing Northern Territory laws have not, however, provided the Northern Territory government with much power to directly influence arrangements for the railways.

   (b) The Alice Springs Corporation's powers are basically as provided under the Local Government Act which effectively give it very little decision-making power over future railway arrangements in Alice Springs. However, the corporation does derive some further powers through the Planning Act's provision for local representation on the Northern Territory Planning Authority.

   (c) The Australian National Railways Commission, through the Commonwealth Railways Act, has powers to acquire land necessary for a railway. These powers are subject to other provisions of that Act and to other Commonwealth legislation, including the Northern Territory (Self-Government) Act.

   The Australian National Railways has the powers to determine where the railways goes, to obtain the necessary land and to construct the railway and its ancillary requirements. This, however, has to be considered in the context that for the Alice Springs railhead there were only two minor acquisitions required by Australian National Railways. Both were to improve the road situation not

the rail. Other acquisitions associated with the railhead were to provide necessary improvements to major south-north and east-west road links and allow other necessary improvements to the central business district. These will be facilitated by release of railway land and modifications to its railhead design.

4. Yes, in a legal sense. However, in practice, consultation took place between the Australian National Railways, the Alice Springs Corporation, the Northern Territory and Commonwealth government before a final decision was made on the location of the railway. The corporation's views were given careful consideration in arriving at the location.

5. There is ongoing liaison between the Department of Transport and Works, Commonwealth Department of Transport and the Australian National Railways Commission on a range of matters. I presume the honourable member is interested in meetings in the past 2 years specifically relating to the location of and design parameters for the Alice Springs railhead.

Participants	Items Discussed
30 October - 1 November 1978	
Australian National Railways Department of Transport and Works Department of Lands and Housing Commonwealth Department of Transport Commonwealth Department of Finance	- Met oil company executives - Reviewed earlier evidence presented - Town Planning Report - Met Corporation representatives
13 - 14 December 1978	
Australian National Railways Department of Transport and Works Department of Lands and Housing Commonwealth Department of Finance Northern Territory Treasury	- Draft report to Commonwealth and Northern Territory governments
16 and 30 March 1979	
Australian National Railways Department of Transport and Works Department of Lands and Housing NT Electricity Commission	- Technical design problems and town planning needs
28 November 1979	
Australian National Railways Corporation of the Municipality of Alice Springs Department of Transport and Works Department of Lands and Housing (informal meeting)	- Town planning needs

Sadadeen Subdivision

81 Mr PERKINS to MINISTER for LANDS and HOUSING

1. To what extent has the government developed Sadadeen lots to the turn-off stage?

2. Since private developers were originally invited to register an interest in Sadadeen development only 3 months ago, and since the successful tenderer was named only this month, when does the developer expect to have all lots to the turn-off stage?

3. At what price will the government buy the developed blocks?

4. Was an undertaking to use local labour and materials a factor in the successful tender by the company chosen by the government to develop Sadadeen?

5. Has the government studied the cost-effectiveness of maintaining the role of departments such as the Department of Transport and Works in developing residential subdivisions?

ANSWER

1. Prior to inviting private developers, the government had completed engineering survey of the approved plan of subdivision. Engineering design had commenced but was not substantially advanced. All engineering survey plans were made available to developers. The present situation is that a Town Land Subdivision lease for Sadadeen Stage 1 (270 lots) was granted to a private developer, Arian Investments, in early October and detailed engineering design and documentation are now proceeding. The developer intends to call tenders for construction next month and commence site work in January.

2. The developer is committed under the Development Deed, to turnoff blocks for the government and for private sale in 3 stages commencing in April and finishing in September next year.

The 3 stages are:	April	69 government	9 private
	July	39 government	44 private
	September	balance	([109] nominal)

These block numbers (total 270) include 2 large blocks zoned for higher density development and the developer has expressed the intention of further developing these blocks concurrently with normal single residence allotments.

3. $12,500 per block.

4. The government encourages developers to make optimum use of local resources. The successful applicant indicated that he proposed maximum involvement by the local work force, local engineers, local builders and local agents. His actions to date in engaging a local engineering consultant and real estate agent have borne out this expressed intent.

5. The government has adopted the principle that government involvement in subdivisions tends to become increasingly bureaucratic and less cost effective in the process. We are committed to development in all areas by private enterprise wherever possible.

The Department of Transport and Works will necessarily continue to be involved to a significant degree in the provision of external headworks for subdivisions and in the construction of subdivisions in smaller centres.

Alice Springs Golf Club

97 Mr PERKINS to MINISTER for LANDS and HOUSING

1. Is he aware that the Alice Springs Golf Club is planning to develop its leased land in Alice Springs as a luxury housing and sporting estate?

2. If so, has this proposal been brought to the notice of the minister and the NT Planning Authority?

3. Does the government intend to permit development of leased land by sporting bodies, such as the Alice Springs Golf Club, as luxury housing and sporting estates?

ANSWER

1. Yes.

2. Not in the formal manner but the proposal has been seen by the Planning Authority.

3. No. In such cases sporting bodies will be required to surrender all or part of their leases in exchange for a new lease. Any development on surrendered land would be under short term Crown leases issued by the government approved developers.

Minister for Mines and Energy - Air Charter Travel 1979-80

111 Mr ISAACS to CHIEF MINISTER

1. How many trips were undertaken by the Honourable I.L. Tuxworth within the Northern Territory by way of air charter travel at government expense for the financial year 1979-80?

2. For each individual trip undertaken, what was (a) the date, (b) the cost, (c) the purpose, and (d) the names of the charter company used?

(a) Date	(b) Cost	(d) Charter Company	(a) Date	(b) Cost	(d) Charter Company
4. 7.79	1,600	Tennantair	11. 2.80	740	Tennantair
9. 7.79	748	Tennantair	21. 2.80	3.187	Tillair
3. 7.79	1,557	Airnorth	23. 2.80	716	Tennantair
6. 8.79	1,300	Tennantair	10. 3.80	1,440	Tennantair
15. 8.79	5,013	Tennantair	13. 3.80	2,820	Tennantair
24. 8.79	1,150	Tennantair	24. 3.80	2,566	Tennantair
27. 8.79	4,490	Tennantair	30. 3.80	1,380	Tennantair
30. 8.79	4,470	Tennantair	10. 4.80	1,064	Tillair
15. 9.79	2,091	Tennantair	18. 4.80	474	Tennantair
1.10.79	3,177	Tennantair	9. 5.80	3,840	Tennantair
5.10.79	386	Arnhem Air Charter	12. 5.80	400	Airnorth
24.10.79	3,760	Tennantair	16. 5.80	2,646	Airnorth
30.10.79	4,588	Tennantair	20. 5.80	1,114	Airnorth
6.11.79	1,748	Tennantair	24. 5.80	9,908	Tillair-Tennantair
12.11.79	2,380	Tennantair	14. 6.80	1,010	Tennantair
24. 1.80	1,242	Tillair	17. 6.80	538	Tennantair
26. 1.80	2,178	Tillair	25. 6.80	1,418	Tennantair
9. 2.80	432	Tennantair	27. 6.80	2,677	Airnorth

(c) All of the above travel was for official business.

Robinson River Station

114 Mr MacFARLANE to MINISTER for LANDS and HOUSING

1. Is he aware of the recent purchase of Robinson River Station by an Aboriginal organisation?

2. Is any statutory period set by either the Northern Territory or the Commonwealth government before a pastoral lease purchased by an Aboriginal organisation may be classified as Aboriginal land?

3. Have any Aboriginal organisations applied to convert pastoral leases to Aboriginal land?

ANSWER

1. Yes. I have recently given consent to transfer of the leasehold comprised in Robinson River Station.

2. No. The conversion of a pastoral lease held by an Aboriginal organisation to Aboriginal Freehold is processed under Commonwealth legislation

known as the Aboriginal Land Rights (NT) Act and applications may be lodged with the Aboriginal Land Commissioner as soon as the leasehold title is registered with the Northern Territory Registrar-General as owned by an Aboriginal organisation.

3. Yes. Land claims have been lodged in respect of 8 pastoral leases owned by Aboriginal interests and the Aboriginal Land Commissioner has made recommendations in respect of pastoral leases Utopia, Chilla Well, Willowra and Ti Tree.

Schoolchildren - Indemnity Forms

124 Mr MacFARLANE to MINISTER for EDUCATION

Are pupils in NT schools required to obtain signed indemnity forms before engaging in school activities such as swimming lessons, excursions and sports outside school grounds?

ANSWER

Parents are required to sign indemnity forms prior to their children participating in interstate or intrastate excursions. Written parental permission is also required for any school educational activity in which pupils participate away from the school grounds.

Hermannsburg Mission

129 Mr MacFARLANE to CHIEF MINISTER

1. Has his attention been drawn to the allegation by Mr Charles Perkins that the Lutheran Church is exploiting Aborigines at Hermannsburg?
2. If so, does he known of any substance in the allegation?
3. If not, does he intend to allow such mischievous statements by a Commonwealth public servant to go uncorrected?

ANSWER

1. Yes.
2. I am advised that there is no substance in the allegation.

   Some 3 years ago the Finke River Mission was concerned about the large cattle stocks in the area. At the same time there was an awareness of pending land claims thus creating concern regarding the capacity of people to cope with overstocked herds.

   Advice was sought from the then Animal Industry Branch who confirmed the overstocking and recommended reduction to a manageable level. Acting on this advice the mission trucked off some 6,000-6,500 head of cattle over 2½-3 year period resulting in gross sales of around $660,000.

   The proceeds from the sale of cattle have been utilised to reimburse the mission's costs, that is, reimburse restocking in the early 70's, payment of maintenance, fencing projects and aerial counts.

   In June-September 1980 the mission handed over all of the remaining cattle including assets at an estimated current value of $800,000 to the 5 main Aboriginal land owners in the area. Part of this arrangement is for the mission to fund fencing of these areas upon completion of a proper survey, and on request from the individual groups concerned.
3. I will advise the Minister for Aboriginal Affairs that my inquiries indicate there is no substance in the allegation.

Hospitalisation of Injured Schoolchildren

136 Mr MacFARLANE to MINISTER for EDUCATION

When school authorities call an ambulance to hospitalise an injured pupil, are parents consulted or is it automatically taken that they concur with the principals' decisions and actions?

ANSWER

School authorities are obliged under the policy outlined in the Northern Territory Department of Education Handbook to first contact the parents of an injured or sick child in order to ascertain the parents' wishes as regards the most appropriate course of action. If the parents cannot be contacted or if the school authorities (the head teacher or his delegates) are of the opinion that the child's condition requires immediate medical or hospital treatment, then the school authorities will be regarded as acting on behalf of the parent in obtaining that treatment. The parents are of course fully informed of the action taken as soon as practicable.

Northern Territory Public Service

139 Mr MacFARLANE to CHIEF MINISTER

What was the cost of (a) salaries and wages, and (b) recreation leave fares for NT public servants during 1979-80?

ANSWER

Cost of salaries, wages and recreation leave fares for NT public servants during 1979-80:

Salaries	$ 152,333,205
Wages	$ 15,502,930
Fares	$ 2,339,619
TOTAL	$ 170,175,754

Department/Authority	Salaries	Recreation Leave Fares	Wages
Chief Minister	$ 3,372,000	$ 39,490	--
Community Development	$ 8,329,841	$ 168,982	$ 29,800
Conservation Commissioner	$ 4,916,792	$ 146,063	--
Education (includes Industry Training Commission)	$ 43,517,799	$ 258,208	--
Port Authority	$ 1,169,242	$ 39,440	--
Health	$ 41,182,312	$ 756,067	--
Housing Commission	$ 3,390,000	$ 63,000	--
Lands	$ 4,939,005	$ 126,613	--
Law	$ 3,925,660	$ 69,666	--
Legislative Assembly	$ 260,442	$ 7,203	--
Mines and Energy	$ 2,506,761	$ 63,986	$ 483,503
Museums and Art Galleries	$ 272,740	$ 4,784	--
Development Corporation	$ 566,115	$ 18,327	--
Emergency Service	$ 278,375	$ 5,976	--
Liquor Commission	$ 169,735	$ 2,200	--
Ombudsman	$ 216,746	$ 2,380	--
Police (Admin. only)	$ 1,803,705	$ 23,446	--
Primary Production	$ 5,310,141	$ 124,027	--
Public Service Commissioner	$ 2,230,350	$ 50,181	--
Racing and Gaming Commission	$ 225,184	$ 10,467	--
Treasury	$ 2,195,064	$ 42,453	--
Tourist Commission	$ 568,626	$ 8,553	--

Department/Authority	Salaries	Recreation Leave Fares	Wages
Transport and Works	$ 20,986,570	$ 231,195 [(Industrial) [$ 76,822 [(Other Staff)	[$14,721,427 [(Including [Trust [Account)
TOTAL	$152,333,205	$2,339,619	$15,502,930

Hodgson Downs Station - Bores

142 Mr MacFARLANE to MINISTER for MINES and ENERGY

How many dud bores have been drilled, within 2 miles of the homestead, at Hodgson Downs Station since 1952?

ANSWER

This question has to do with drilling for water, rather than for geological appraisal, and I would ask that it be redirected to my colleague, the Minister for Transport and Works.

Snell Street Gas Turbine Station

143 Ms D'ROZARIO to MINISTER for MINES and ENERGY

1. What was the cost of repairing damage inflicted on the Snell Street gas turbine station on 5 January 1980?
2. Was the damage to the station the result of flying debris from the cement works next door?
3. Who will meet the cost of repairing the station?

ANSWER

1. The damage to the Northern Territory Electricity Commission's property on 5 January 1981 was to its switchyard at the corner of Stuart Highway and Snell Street. The gas turbine installation was not damaged. The full cost of repairs has not yet been calculated, since some work remains outstanding, but it is approximately $9,500.
2. The Commission believes that the damage was caused by flying roofing iron from the ABM Concrete Pty Ltd works on the adjoining block.
3. Initially the Commission will meet the cost of repairs but it is obtaining the advice of the Department of Law as to whether a recovery action might be successful.

Jabiru Water Supply Contamination

144 Ms D'ROZARIO to MINISTER for MINES and ENERGY

Is there any evidence of contamination of the water supply at Jabiru as a result of mining activity and, if so, is it anticipated that similar contamination may occur elsewhere as a result of mining activity?

ANSWER

Monitoring of the purity of the water supply at Jabiru is carried out by the Water Division of the Department of Transport and Works and I would ask, therefore, that this question be redirected to my colleague, the Minister for Transport and Works.

Yuendumu Road

145 Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

1. Did the government make a commitment to the upgrading of the road between Alice Springs and Yuendumu in 3 stages of 90 kilometres in the financial year 1978-9 and, if so, what progress has been made to 3 February 1981 on upgrading the Alice Springs-Yuendumu Road?

2. As part of the upgrading of this section of road, did the government advise the Yuendumu Mining Company that certain materials would be required?

ANSWER

1. The upgrading of the Tanami Road from the Stuart Highway to Yuendumu was originally planned in 3 stages, each of 90 kilometres. The first stage was committed for commencement of construction in 1979.

   Following more detailed planning, later stages were rescheduled in shorter sections. My department's present 5-year program recommends that construction continues in annual 30 kilometre stages commencing in 1983-4.

   The first stage of 90 kilometres was completed on schedule in November 1980.

2. With any construction project the local supply of suitable materials is of paramount importance. It is particularly so on this project where supply distances are so great.

   The Yuendumu Mining Company is one firm which may have the capacity to provide roadbuilding materials for the project. Preliminary discussions were held with the company representatives regarding their future involvement. When works are undertaken in their area, the company will be able to compete for materials supply through our normal tender procedures.

Sales Tax Rebate Scheme

148 Mr ISAACS to TREASURER

1. By what method will the percentage of sales tax attributable to freight be calculated?

2. At what point will the freight cost on goods coming to the Territory be deemed to have commenced?

3. Will the freight cost assessed for Territory wholesalers be discounted to allow for the freight cost faced by southern wholesalers to ensure equity in terms of the impact on the sales tax burden?

4. How many importers pay sales tax in the Northern Territory?

5. Do any of those importers compete directly with wholesalers selling domestically produced goods?

6. Has any assessment been made on the effect on importers of a government induced cost advantage to domestic wholesalers in direct competition?

7. If some importers are significantly disadvantaged by the introduction of the government's proposed sales tax rebate scheme will the government consider some compensation?

8. What measures will be applied to ensure that there will be no book entry inflation of freight costs?

9. Will a condition of payment under the sales tax rebate scheme be that inspectors from the NT government have access to the relevant records of claimants at any reasonable time?

ANSWER

1. The percentage of sales tax attributable to freight is calculated by expressing freight charges relating to taxable goods over total taxable sales for 1979-80. The percentage is then applied to the actual amount of sales tax paid from 1 July 1980.

2. For the purpose of this subsidy all freight and handling charges involved in getting goods into the wholesalers warehouse are used in the calculation.

3. No. It would be extremely difficult to make this differentiation.

4. Information on importers with respect to sales tax is held by the Commonwealth government and is not available to the Northern Territory government. The Territory telephone directory lists 15 importers.

5. There would be some importers who would compete with Northern Territory wholesalers. For example, in the wood furniture and car market.

6. No.

7. The Northern Territory government is not aware of any overseas importers who are disadvantaged by this scheme. The government would consider the situation if evidence could be produced demonstrating such disadvantage.

8. Treasury officers check and verify the relevant records of potential recipients before a subsidy payment is recommended.

9. Before the percentage of sales tax attributable to freight may be determined, all relevant records are verified by Treasury officers. All firms participating in this scheme have cooperated to the fullest extent in this process on a confidential basis.

   Whilst a percentage has been determined for 1980-81 for individual firms this will be subject to review as necessary.

Numbulwar - Housing

149 Mr MacFARLANE to CHIEF MINISTER

1. Has his attention been drawn to the need for houses for 72 families of Aborigines at Numbulwar?

2. If so, will he make representations to the Federal government to house these people or hand over the responsibility for housing them to the NT government?

ANSWER

1. My attention has been drawn to the need for houses for Aboriginal families at Numbulwar and at most other communities. There is a serious and longstanding backlog which the government has estimated to be in excess of 2,000 units. The Department of Aboriginal Affairs acknowledges that there is a severe housing shortage at Numbulwar and the fact that there are approximately 70 families without adequate housing is not disputed by that department which also affirms that the same situation applies in respect of many Aboriginal communities throughout the Northern Territory. The department adds that the operations of the Numbulwar Housing Association have recently improved and the department hopes to be able to make available some additional funds in the present financial year. An expanded program for the coming year will be a matter for the Aboriginal Development Commission.

2. The strongest representations have been made by the NT government with a view to gaining transfer of the responsibility for housing from the Commonwealth along with adequate funds to overcome the backlog.

Numbulwar - Freight Costs

150 Mr MacFARLANE to CHIEF MINISTER

1. Has his attention been drawn to the strain placed on the Numbulwar community by the recent rise in barge freight from 35¢ per kilo to 60¢ per kilo?

2. Is he able to state why it is cheaper to freight goods from Cairns to Numbulwar than from Darwin?

ANSWER

1. Freight rates place a strain on all communities in the Northern Territory. The more isolated the community, the greater the freight burden tends to be. The rate of 60¢ per kilo from Darwin to Numbulwar is not the general freight rate; it is the rate on freezer-chiller cargo. For some time this rate has been subsidised by the general freight rate. With the need to purchase new freezer-chiller units, it has become inappropriate to continue this cross-subsidy. The last increase in freight rate was in August 1978 and of course costs have increased substantially since then. Freight consignments to Numbulwar are very small and therefore providing the service is costly.

2. It is cheaper to freight goods to Numbulwar from Cairns than it is from Darwin. This is a commercial matter and it is not possible to state categorically what the reasons are. However, the Queensland company providing barge services is a much larger company than the Northern Territory operators and operates a transhipment service in the Gulf. It is likely that this is a far more cost-effective operation than long haul barge services which the Northern Territory companies provide.

NT Planning Authority - Katherine Representative

151 Mr MacFARLANE to MINISTER for LANDS and HOUSING

Who have been the Katherine representatives on the NT Planning Authority since Alderman D.A. Collins resigned?

ANSWER

Mrs P.M. Davies, Mr P.A.E. Murphy and Mr D.J. Sweetman.

I am currently considering a replacement for Mr Collins from 3 persons nominated by the Corporation of the Municipality of Katherine.

Public Libraries in NT

169 Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

In regard to public libraries, (a) how many are funded by the Northern Territory government, (b) what are their names, (c) where are they located, (d) how many staff do they employ, (e) how many books does each library have, and (f) what is their usage in borrowing terms over the 12 month period ending 31 January 1981?

ANSWER

(a) Funding: 7 public libraries are funded by the Northern Territory government.

(b) & (c) Names and Locations of Territory Public Libraries:

Darwin City Public Library
Gallery Level
Smith Street Mall
DARWIN NT

Nightcliff Public Library
Pavonia Place
NIGHTCLIFF

Casuarina Public Library
Bradshaw Terrace
CASUARINA NT

Nhulunbuy Community Library
Nhulunbuy High School
NHULUNBUY NT

Katherine Public Library
Katherine Terrace
KATHERINE NT

Tennant Creek Public Library
Regional Office, Windley Street
TENNANT CREEK NT

Alice Springs Public Library
Cnr Leichhardt & Gregory Terraces
ALICE SPRINGS NT

(d) Staff Employed by the Public Libraries:

Darwin City Public Library	9 full-time
Nightcliff Public Library	2 full-time
Casuarina Public Library	15 full-time
Nhulunbuy Community Library	2 full-time
Katherine Public Library	1 full-time
Tennant Creek Library	1 full-time, 1 part-time
Alice Springs Public Library	8 full-time

(e) Bookstock - as at 20 February 1981:

Darwin City Public Library	24,419
Nightcliff Public Library	10,192
Casuarina Public Library	48,903
Nhulunbuy Community Library	7,676
Katherine Public Library	6,050
Tennant Creek Public Library	8,342
Alice Springs Public Library	24,114

(f) Book Loans over the 12 Months Period Ending 31 January 1981:

Darwin City Public Library	52,208
Nightcliff Public Library	51,116
Casuarina Public Library	264,268
Nhulunbuy Community Library	36,697
Katherine Public Library	23,885
Tennant Creek Public Library	15,656
Alice Springs Public Library	88,370

Department of Transport and Works Water Division Staff

170 Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

1. How many persons, both staff and industrial, are employed in the Water Division of the Department of Transport and Works?
2. What water supply schemes, both underground and surface water, are currently being investigated by the Water Division?
3. What technical and professional staff are employed on the investigation of these schemes?
4. How many vacant professional positions are there in the Water Division and what steps are being taken to fill them?
5. How many clerical and administrative positions are there in the Water Division of the Department of Transport and Works?

ANSWER

1. As at 28 February, 404 permanent officers and 40 persons on limited tenure were employed in Water Division. In areas other than Darwin approximately 92 personnel are employed by Operations Division carrying out activities on behalf of Water Division.

2. There are 11 projects currently in progress throughout the Territory related to domestic or town water supply schemes with a further 4 of an agricultural or recreational nature. Numerous other projects related to potential future water supplies for domestic, agricultural or industrial use are current. Water supplies in the major centres are continually under investigation and review.

3. Normally each project is the direct responsibility of one professional engineer or hydrogeologist who will co-opt technical resources from the division as required. Virtually all professional and technical staff would at some time or other have input to water supply investigation work.

   Numbers of professional and technical staff in Investigation Branch are as follows:

	Professional	Technical
Ground water	5	9
Surface water	10	37
Laboratories	7	12
Environmental	9	24

   (This does not include industrial staff and the group responsible for operation and construction activities).

4. There are 6 vacant professional positions in Water Division. Four of these have been or are about to be advertised.

5. There are 90 clerical and administrative positions in the Water Division. These include staff in the business undertaking, the general administrative services group and the technical sections.

South Australian Symphony Orchestra Visit

171 Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

1. Has the government made, or will it be making, any contribution towards the cost of the tour to the NT during 1980 by the SA Symphony Orchestra?

2. If so, what is the amount contributed, and from which budget allocation is it taken?

ANSWER

The final cost of the 1980 tour of the Northern Territory made by the Adelaide Symphony Orchestra was $40,881.

The Northern Territory government guaranteed the shortfall and the amount was paid from the Grants-in-Aid (Arts and Cultural Affairs) allocation.

Funding for Alcohol Treatment Centre

172 Mr B. COLLINS to MINISTER for HEALTH

Has the government committed further funding for the Alcohol and Rehabilitation Centre at the Darwin Hospital so that staff members can be increased?

ANSWER

The provision of additional staff to the Alcohol Dependency and Treatment Unit at Darwin Hospital to enable them to operate on a 24 hour basis will be achieved by reallocation within the Department of Health.

Teacher Shortage in Public Schools

176 Mr B. COLLINS to MINISTER for EDUCATION

1. Will he advise whether any shortages of teachers exist in specific subject areas or age/grade levels in public schools in the Territory and,

if so, how many additional teachers would be required to fill the vacancies as at 28 February 1981?

2. If shortages exist in particular areas, will he indicate, (a) the areas affected, and (b) the extent of shortages in each of those areas?

ANSWER

1. Shortages of Teachers as at 28 February 1981, in:

   (a) Specific Subject Areas: Home Economics 3; Technical Studies 2; Teacher Librarians 3; Maths 2; Music 1.

   (b) Age/Grade Levels: Transition 2; 1 Teacher Schools General Primary Primary 6.

   Total (a) and (b) = 19.

2.(a) Areas Affected by Shortages as at 28 February 1981:

Pigeon Hole - Primary Teacher; Victoria River Downs - Primary Teacher; Papunya - Teacher/Librarian, Primary Teacher; Amanbidji - Primary Teacher; Haast Bluff - Primary Teacher; Braitling - Transition Teacher; Bradshaw - Transition Teacher; Yirrkala - Teacher/Librarian, Primary Teacher; Maningrida - Technical Studies, Home Economics Teacher; Tennant Creek Area School - Home Economics Teacher; Elcho Island - Home Economics Teacher; Milingimbi - Technical Studies Teacher; Alice Springs High - Teacher/Librarian; Casuarina High - Music Teacher; Nightcliff High - Maths Teacher; Darwin High - Maths Teacher.

(b) Positions not Filled as at 23 March 1981:

Pigeon Hole - school not yet opened, offer made; Victoria River Downs - offer made; Papunya - Teacher/Librarian not filled; Amanbidji - offer made but rejected, not filled; Haast Bluff - offer made; Yirrkala - offers made but rejected, not filled Teacher/Librarian, Primary Teacher; Maningrida - Technical Studies/Home Economics to be filled on 21 April 1981; Darwin High - offer made.

The main reasons for these teacher shortages are:

(i) a high rejection rate of offers to applicants to serve in isolated communities, particularly to one-teacher schools;

(ii) a national shortage of teachers trained in specialist secondary teaching areas (maths/science, home economics, technical studies, teacher/librarians and pre-school teachers); and

(iii) the total number of replacement teachers required is not known until the first week of the school year because some resignations are not lodged until the final day of school holidays.

Feral Animals Committee

177 Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

1. When was the Feral Animals Committee formed?
2. What is (a) its composition, (b) the names of members, and (c) their appointment dates?
3. What is its charter?
4. What is the length of term of membership?
5. How many meetings has it held since its appointment?
6. Can the minutes of these meeting be made available?

ANSWER

Responsibility for the Feral Animals Committee was transferred to the Conservation Commission on 18 August 1980.

Flood Insurance for Katherine Area

180 Mr MacFARLANE to TREASURER

Will he ask the Territory Insurance Office to make an immediate statement on flood insurance availability for the Katherine area?

ANSWER

TIO has for some time had under consideration the matter of providing flood insurance cover for residents of Katherine. It recently decided to provide this insurance as an extension to the fire and householders policies currently issued by the office.

The additional premium payable for this risk is $3 per $1,000 on building and contents.

Protection is available immediately through all branches of the Territory Insurance Office.

Resource Centre for Bamyili School

181 Mr MacFARLANE to MINISTER for EDUCATION

Has the resource centre proposed for Bamyili School received ministerial approval?

ANSWER

The government has approved the inclusion of a resource centre for Bamyili Primary School on the 1980-81 Design List.

The project will be recommended for inclusion on the 1981-2 Capital Works Program and will, of course, be subject to budget Cabinet deliberations.

Important Ceremonies in Schools

182 Mr MacFARLANE to MINISTER for EDUCATION

1. Will the flag day, arbor day, wattle day, Gould bird-lovers day and other formerly important ceremonies be instituted in NT schools?

2. Will school children be encouraged to attend civic ceremonies, such as the bombing of Darwin, Anzac day and Remembrance day, as an essential part of their education?

ANSWER

1. The list of possible days for 'commemoration' is quite large. Schools are constantly being asked to bring a multitude of 'occasions' to pupils' notice. It would be too disruptive of a school's normal learning program to feature them all. So principals generally choose those 'days' or 'events' which they consider most relevant to their students and concentrate on these.

   Where organisations connected with various 'days' request it, the department does provide schools with information on the 'day' and does distribute any materials that may be provided.

   The more significant dates in the Australian calendar such as the anniversary of the bombing of Darwin, Anzac and Remembrance days are brought to the schools' attention and suggestions made for their observance.

2. There is no instruction that school children should attend civic ceremonies associated with various commemorations. Once again this is left to the individual school to institute whatever program is considered best for its children.

Road to Edith River Farms

183 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

When will the road into the Edith River farms be upgraded to all-weather standard?

ANSWER

The Edith River farms road has a very low priority for upgrading and is not included in any current proposals.

Youth Sporting Activities in Katherine

184 Mr MacFARLANE to MINISTER for YOUTH, SPORT and RECREATION

1. Is he aware of the lack of interest in rugby league in Katherine this year?
2. Will he appoint a recreation officer in Katherine to encourage the youth of the town to engage in sporting activities rather than frequent pinball parlours?

ANSWER

1. Yes, I am aware that Katherine will not be participating in Darwin rugby league competition this season. I understand that Katherine entered the league on the proviso that they field an 'A' grade as well as a reserve team. Katherine has been unable to do this and thus were asked to withdraw from the league competition. Attempts have been made to generate interest but the community, whose responsibility it is, is unwilling to become involved.
2. The department is currently liaising with the Corporation of the Municipality of Katherine with regard to the appointment of a recreation officer. The task of this person will be to develop a comprehensive youth service for the young people of Katherine. This may involve some sporting activities but also the more recreational and social activities desired by young people. Negotiations with the corporation for financial assistance through the grants-in-aid scheme are continuing.

Oral History Program

185 Mrs O'NEIL to CHIEF MINISTER

I refer to the oral history program of the Chief Minister's Department and ask -

1. Is material now being stored in the Commonwealth Archives Building as foreshadowed in answer to Question 956 in November 1979?
2. If so, what controls are exercised over the removal of this material from the building?
3. What is the current membership of the Oral History Committee?
4. Is the Museums and Art Galleries Board represented on the committee and, if not, why not?

ANSWER

1. All necessary arrangements have been made for the material collected by the Oral History Committee to be stored in the Australian Archives

Building on behalf of the Northern Territory government and the basis for consultation between the archives and the Committee for access has been carefully established. The first completed oral history tapes and transcripts which have been indexed have been transferred to the archives together with a number of photographic and other documentary collections. Further material will be transferred as the necessary checking and indexing by the History Unit is completed.

2. The normal arrangements for access to archival collections will be applied by the Officer in Charge of the Australian Archives in Darwin.

3. The current membership of the Oral History Committee is: H.C. Giese (Chairman), Dr F.H. Bauer (representing NARU), Dr Alan Powell (Darwin Community College), Mr P. Spillett (Historical Society/Historian), Mr R. Davis (NT Library Service), Mr V. O'Brien (Historian), Dr I. Hunter (Oral History Association), and a representative of the National Trust.

4. Where, as a result of the oral history program, museum-type collections have been located the Board has been advised. The Museums and Art Galleries Board is not at present represented on the Oral History Committee.

Museums and Art Galleries Board Interest in Modern NT History

186 Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

1. Does the Museums and Art Galleries Board have a staff member responsible for the area of modern NT history (i.e., since European settlement) and, if not, why not?

2. If so, what are his or her qualifications?

3. Is it intended that the NT Museums and Art Galleries Board establish collections in this field?

4. What is the relationship between the NT Museums and Art Galleries Board and the NT oral History Committee?

ANSWER

1. Yes.

2. A Curator of Territory History having both practical experience and academic qualifications (Batchelor of Arts degree majoring in history) is employed by Northern Territory Museums and Art Galleries Board.

3. Yes.

4. The parties are presently discussing their respective roles and how they relate.

William Gove House in Nhulunbuy

187 Mr LEO to CHIEF MINISTER

Which department is responsible for the management and administration of single persons accommodation at William Gove House, Nhulunbuy, blocks 6 and 7?

ANSWER

Currently the Department of Community Development is responsible for the management and administration of blocks 6 and 7 at William Gove House.

A joint review team consisting of representatives from the Public Service Commissioner's Office and the Housing Commission is, however, investigating

the feasibility of establishing a permanent office of the Housing Commission at Nhulunbuy early in the 1981-2 financial year.

Establishment of the permanent office will provide for the transfer of the management and administration function to the Housing Commission.

NT Pastoral Leases

189 Mr ISAACS to MINISTER for LANDS and HOUSING

What is (a) the name and or number and, (b) the area of each pastoral lease in the NT not at present being worked?

ANSWER

To give a list of pastoral leases not at present being worked would require that all pastoral leases had been recently inspected (patently impossible) and would require also a definition of 'being worked'.

On the basis of reports resulting from the most recent inspections, and 'being worked' defined as having a resident manager and/or staff, the list is as follows:

No.	Name	Area km^2	Comment
588	Gurner	795	Owner recently deceased
640	Beetaloo	7,110	No recent turn-off, under Aboriginal land claim
665	Maryfield	4,105	Mortgagee sale
668	Gimbat	2,996	Problems with land status, although purchaser available
700	St Vidgeon	6,812	Under forfeiture
705	Eva Valley	2,927	Under forfeiture
760	Chilla Well	2,613	Abandoned by Aboriginal owners.

Tillage Technique for Top End Agricultural Conditions

190 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

What work is being done to develop a suitable minimum tillage technique for Top End agricultural conditions?

ANSWER

The Northern Territory government has recognised the importance of developing suitable minimum tillage techniques for Top End production.

Recently I approved the Department of Primary Production and the Agricultural Development and Marketing Authority entering into a joint project with the CSIRO Division of Tropical Crops and Pastures to research and develop minimum tillage techniques. Funds have been provided by our 2 organisations to CSIRO to build a test minimum tillage planter and an agricultural engineer is being recruited by the department for the project.

Initial research and development studies will be conducted at the CSIRO Katherine Research Station in the last dry season 1981, and the 1981-2 wet season, with follow-up studies on research stations throughout the Top End in subsequent years.

Some work has already taken place, notably by CSIRO at Katherine, but also by my department at Upper Adelaide River and Douglas Daly Experiment Stations. Although the project is only in its infancy, results to date are encouraging.

Minimum tillage techniques have the potential of reducing the costs of crop sowing, improving the reliability of crop establishment, increasing the time available for farmers to sow their crops, and reducing soil erosion risks.

Development of minimum tillage techniques not only involves testing and selection of suitable sowing machinery, but possibly also adjustments in fertiliser practices, weed control methods, seeding rates and timing of operations.

Electrical Stimulation Method of Tenderising Beef

191 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Has his attention been drawn to an inexpensive electrical stimulation method of tenderising beef and, if so, will he encourage use of this method particularly in the Top End?

ANSWER

I am aware of the electrical stimulation method of tenderising beef as well as the 'tender stretch' method and the 'cryovac' method of producing tender beef.

These are all worthwhile methods of producing more tender beef for the quality table beef trade but of no value for the third grade manufacturing US export trade which most Territory beef is consigned to.

Both the 'tender stretch' method of hanging carcases and the 'cryovac' method of packing whole cuts of meat have been, or are being, introduced into at least 5 major Territory abattoirs.

Effect of Low Price Paid to Cattlemen

192 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

What effect is the low price being paid to cattlemen by meatworks having on the live cattle trade?

ANSWER

Low prices being paid to cattlemen by meatworks appears to be having little effect on the live cattle trade.

PART II

THE QUESTION PAPER

An index to questions appears at the end of Part II.

Numerical references are to Question Paper page numbers.

An asterisk preceding an entry in the index indicates that an answer has not yet been received.

Palmerston Contracts

Mr ISAACS to MINISTER for LANDS and HOUSING

Have the firms of Kern Development Pty Ltd and Henry and Walker Pty Ltd been given the option to take on the first 2 subdivision contracts for Palmerston? If so, what has been the response of the companies and when does the government intend to officially announce the awarding of the contracts?

ANSWER

The honourable member's information is precisely correct. I would anticipate that the offers of lease will be signed today by a person holding my delegation as Secretary of the Department of Lands. The 2 offers put forward by those companies are brilliant in concept and in value for this region of the Northern Territory. I would be more than happy to make the details of the proposals available on a confidential basis to the Leader of the Opposition.

Allegation in Darwin Star

Mr B. COLLINS to CHIEF MINISTER

Has he seen a report in the Darwin Star of 12 August 1981 which said: 'Surely that wasn't a Cabinet Minister's wife telling all interested at a cocktail function about who will get the nod to develop Palmerston's first 2 subdivisions. Surely not'. If the Chief Minister has seen that report, has he sought from each of his ministers a denial of that allegation made in that press report and, if so, can he inform the Assembly of the outcome of those inquiries?

ANSWER

I have not seen the report. If I were to believe all the scurrilous things that are said about honourable members on both sides of the Assembly in the pages of our esteemed press, I would be conducting non-stop investigations into their background. I believe that ministers in this Assembly are responsible people who are undertaking their duties in accordance with the highest traditions of the Westminster system. I do not see any need to carry out investigations simply because of anonymous reports in the gossip columns of second-class rags in the Darwin area.

Health Insurance for Aboriginal Communities

Mr VALE to MINISTER for HEALTH

Has he taken any action to ensure that Aboriginal communities are aware of the need to take out health insurance to cover patients who are not classified as disadvantaged because charges will be raised for the provision of hospital and health services as from 1 September?

ANSWER

The answer to the honourable member's question is yes. Late in June, I wrote to 46 of the Aboriginal councils throughout the Northern Territory explaining to them the Commonwealth policy of 'user pays' and what impact it will have for people in the Northern Territory. I also asked the councils to address themselves to the matter of the people within their communities and to find out whether, as councillors, they would like to wash their hands of any responsibility in the matter of health payment for their members or whether they would like to use royalties, local government funds or perhaps consult with medical benefits funds to enable the communities concerned to take out a bulk policy with a fund that would cover the whole community. Strangely enough, I did not get much response but from those people who did respond, I found the results very encouraging. In fact, some councils wrote back and said they were about to receive their first royalty payment for one thing or another and were interested in taking out bulk cover for the community. They requested advice in this matter.

We have also started a program where regional medical officers visit all Aboriginal communities to explain the impact of the new policy on the communities and what they can do to help themselves. I believe that members have been offered a seat on the plane when medical officers are travelling to their electorate to meet with the councils to explain the ramifications of the new policy.

Mr Speaker, I have also sent a follow-up letter in the last week advising the communities that there is a great need to follow this matter up and do something positive. I have not had a response to that. I do see a need in the future for some councils, particularly those that are pretty flush with funds, to make a generous offer to Aboriginals in less fortunate circumstances throughout the Northern Territory. They could perhaps use royalty funds that are available from some projects to help offset medical costs for Aboriginals who have no source of income at all from that area. That is something for another day. I think that it is a suggestion that is well worth following up in the months to come.

Darwin-Ambon Yacht Race

Mrs LAWRIE to CHIEF MINISTER

Has he authorised any person to attend in Ambon to represent the Northern Territory government at the completion of the Darwin-Ambon Yacht Race in an official capacity? If the answer is yes, does he still intend that that person should go having regard to recent events in which a news team has been prevented from entering Indonesia because of its alleged bias against that country?

ANSWER

For the last 2 years and certainly again this year, I have requested the honourable member for Port Darwin to represent me in Ambon at the finish of the Darwin-Ambon Yacht Race. To the best of my knowledge, the member for Port Darwin is representing me again this year.

Mr Speaker, the honourable member tells me that he is not. I cannot therefore advise the Assembly at this stage whether anyone will be representing me on this occasion. I will make inquiries and advise the Assembly if anyone is representing me.

I would say in response to the balance of the honourable member's question that I believe that it would be shortsighted of the Northern Territory, and indeed shortsighted of Australia, if we were to adopt the attitude that, because of the viewpoint of a particular Indonesian government, the people of Australia and the people of the Northern Territory should cut off ties, contacts, cultural visits, exchange schemes, not necessarily with the government of Indonesia although certainly we work through the representatives of the government of Indonesia, but with the Indonesian people. It is the people of Australia and in particular the people of the Northern Territory who must strive to build up our contacts with the people of Indonesia so that there can be better understanding in Indonesia of Australia's point of view and in Australia perhaps of the Indonesian point of view or the point of view of the Indonesian people. I certainly would not propose to snub Indonesian invitations because of practices of a government of Indonesia that is transitory. I believe it is important that the Northern Territory continue to build up and maintain the good relations that have existed up to date with Australia's nearest neighbour, a country of over 100 million people. We cannot ignore them. If their methods of government are different from ours, we must put our point of view forward and I would certainly always put my point of view forward about things that I do not like the Indonesian government doing. However, I do not believe we should cut off all contact with them because that is simply throwing them in the way of people by whom we would not want them to become unduly influenced. I would certainly propose that we continue to maintain all reasonable contacts with Indonesia. Quite frankly, I had understood that someone was representing me at the conclusion of this race in Ambon this year but I will check that.

Ownership of Mudginberri and Munmarlary Stations

Mrs PADGHAM-PURICH to CHIEF MINISTER

What is the current position of the ownership of Mudginberri abattoir and station and Munmarlary station?

ANSWER

The question is rather like one that was put to Lord Palmerston last century when he was asked to explain to the House of Lords the Schleswig-Holstein question, and just as difficult. He said: 'I understand it but I have forgotten it and there is some European prince who did understand it and he is in a lunatic asylum now and there is someone else who understands it and he is in Berlin and he is not going to tell you'. Getting back to Mudginberri, I am not sure that I fully understand the position of ownership. We have sought advice in various quarters as to the correct position in relation to land tenure in that area of the Northern Territory. Although our advice some 12 months ago was that the land had not been acquired validly by the Commonwealth, it would appear now that the land has been validly acquired by the Commonwealth and therefore Mudginberri station is owned by the Commonwealth of Australia and all responsibilities in relation to the operation of any abattoirs on that land, unless there is some subsidiary agreement between the Commonwealth and another party, would rest with the Commonwealth of Australia. I have made approaches to the Northern Land Council and am continuing to do so. I had informal discussions with the land council on this subject last week. I understand that the Northern Land Council will be attempting to operate, either directly or through contractors, Mudginberri abattoir for the next season.

Henry and Walker Shares

Mr BELL to ATTORNEY-GENERAL

I preface my question by drawing his attention to previous questions in relation to land development at Palmerston. Did he see a report in southern and Territory papers of the questioning of Henry and Walker shares by the stock exchange and did he cause an inquiry to be made of the company's share listing and has he satisfied himself that the run on the shares of Henry and Walker was not caused by inside information?

ANSWER

I should first of all draw the honourable member's attention to the fact that the company to which he refers is in fact a public company listed on the stock exchange in South Australia and perhaps in other Australian states. It was certainly floated in South Australia and therefore it is beyond my jurisdiction to take any steps to investigate activities that may occur on the stock exchange in Adelaide. It is the prerogative of the Commissioner for Corporate Affairs and the Attorney-General of South Australia. I understand that the number of shares involved in any run was very small and I am certainly not aware of any insider trading in relation to the shares.

Car Parking Strategy for Darwin

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

Will he be introducing a bill during these sittings to enable the city council to carry out its parking strategy?

ANSWER

I believe not. I have been negotiating with the city council as to the policies to be incorporated in any amendment to the Local Government Act to enable it to charge some form of levy to recoup the costs of operating a multi-storey car park in Darwin and its entire car parking strategy in the city of Darwin. Unfortunately, the problem is somewhat complicated and I think the city

council has had a little difficulty in reaching a resolution on all the matters involved in establishing a formula for the contribution of business premises towards the car park. Since I have not received information back from the council, I have not been able to submit a final proposal to Cabinet to have legislation prepared. Unfortunately, this means that the introduction of any amendments has to wait until the next sittings. This places the corporation in a difficult position inasmuch as the car park is due for completion probably before Christmas. However I will be having talks with the corporation at the earliest possible date to see if we can resolve the problem.

Air Fares Increase

Mr ISAACS to MINISTER for TRANSPORT and WORKS

Given that in June of last year the government made the then Northern Airlines withdraw a 5% fare increase because it had failed to seek approval under regulations of the Northern Territory Aviation Act, why did he allow an 'automatic flow-on' - they were his words - of the 8% increase in domestic air fares announced on 12 August? How can he justify such an increase on economic grounds, given that he described the increased costs facing the domestic airlines as resulting from the airlines poor industrial relations record, simply being passed onto the travelling public?

ANSWER

The agreement signed with Ansett Transport Industries on behalf of Airlines of Northern Australia in part relates to there being an automatic flow-on of national fare increases. At the same time, we signed another document which set up the Northern Territory Review Board so that, in future, any applications made by Airlines of Northern Australia would be investigated by the Northern Territory government. In view of the fact that the Commonwealth had processed the applications by both TAA and Ansett and Northern Territory government officials had satisifed themselves that the flow-on was in order, I made a statement that the fares would increase on 12 August. It was more or less a catch-22 situation in that I still thought that, after the industrial disputes caused in the airline industry, the Australian travelling public was still forced to try and pick up some of that loss by an increased rate. Nevertheless, there was a catch-22 situation in that the federal government had already authorised the increase of the 8%. It naturally flowed on to the Northern Territory.

There was one particular point that I made that the Leader of the Opposition neglected to point out: the air fares between Alice Springs and Ayers Rock will remain as they were prior to 12 August.

Air Fares from Alice Springs to Ayers Rock

Mr ISAACS to MINISTER for TRANSPORT and WORKS

Is that an admission by him that the air fares from Alice Springs to Ayers Rock were artificially high?

ANSWER

It is common knowledge that the air fare from Alice Springs to Ayers Rock was higher than the national formula. This was because Northern Airlines were trying to subsidise some of their routes to try and get themselves out of trouble. It was inflated. At a meeting between tourist operators in Alice Springs on 17 July, it was decided to request the government that any future increases should not flow on to the Alice Springs-Ayers Rock run. I put that case to the ATI people at the time and said that under no circumstances would the government accede to an 8% flow-on on that route. There was an understanding that they would not submit an application for a fare increase for 6 months on that route.

Strike by NTEC Employees in Katherine

Mr VALE to MINISTER for MINES and ENERGY

Can he advise the reason for the current strike by NTEC employees in Katherine? This question is asked on behalf of the member for Elsey.

ANSWER

I have some information relating to the strike. The strike is related to the recent agreement between NTEC and the unions for a 9-day working fortnight. To a great degree, this has been a very successful arrangement that has been arrived at by the management and the employees. Ostensibly, the problem arose from the fact that what are now 3-day weekends are being converted into 4-day weekends by some employees who are taking the spirit of the new agreement a little too generously. The facts of the matter, as I understand it, are that 2 employees were absent from work without approval from 23 July to 4 August, which did extend the 4-day weekend a little. The employees were ultimately terminated on 30 July for unsatisfactory service with 1 week's pay in lieu of notice. The FMWU advised on 10 August that it had medical certificates for the gentlemen concerned although NTEC had never sighted these medical certificates. The FMWU produced the medical certificates for NTEC and, although these were produced on 10 August, they were backdated to 2 August. NTEC employees in the FMWU, the AMW and SU, and the ETU, are currently on strike and have been on strike since 12 August. NTEC has stated that it is happy to discuss the matter before the Arbitration Commission as soon as the employees go back to work because it thinks that the spirit of the previous agreement has been breached and it would not like to see that continue. Essentially those are the facts of the matter and I understand that the dispute has spread a little into the Darwin region in the last 24 hours. I do not have any more up-to-date information on that, Mr Speaker, but I do think that it is something that both unions and management have good reason to sort out because the concept of the 3-day weekend every second weekend is something that is very popular and is working well to a degree. If abuse of the system can be curtailed in the early stages, it will augur well for good relations in the future.

Price of Land in Douglas-Daly Area

Mrs O'NEIL to MINISTER for PRIMARY PRODUCTION and TOURISM

What is the final agreed purchase price for land in the Douglas-Daly area for the ADMA farming scheme?

ANSWER

Mr Speaker, I do not have the information the honourable member requires. It has been dragging on a little and we are seeking that information as quickly as we can.

Industrial Safety Staff in Department of Mines and Energy

Ms D'ROZARIO to MINISTER for MINES and ENERGY

Is it the intention to reduce the number of staff who work in the area of industrial safety in the Department of Mines and Energy?

ANSWER

Mr Speaker, the short answer is no. My colleagues say that that area is expanding.

Fees and Allowances for Aldermen

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

Is the government reviewing fees and allowances payable to aldermen of the city council and, if so, is he able to give any indication when it is likely

that an increase in the fees and allowances to aldermen is expected?

ANSWER

Mr Speaker, some time back the government received a request from the Darwin city council to have the fees and allowances payable to aldermen upgraded because they were set a considerable time ago. Much has changed with the evolution of the Darwin city council. It has grown to be quite a large business with a number of committees and subcommittees and so on. In considering the question of regional allowances for aldermen, the government decided it should look fairly closely at the relationship between the various municipal authorities throughout the Territory. Action has been taken recently to refer the matter to the Northern Territory Remuneration Tribunal. Following the receipt of the tribunal's report or even before, there may need to be some amendments to the Local Government Act which I will be proposing at a later sittings to alter the method of setting fees and allowances for aldermen in the city council because at present some of those figures are established in the act itself. It would probably be administratively more convenient to have the regulations deal with this matter.

Acquisitions in Stott Terrace Alice Springs

Mr D.W. COLLINS to MINISTER for LANDS and HOUSING

Will the minister undertake to write to the landowners on the north side of Stott Terrace Alice Springs stating the government's position on the proposed acquisition of those properties?

ANSWER

I can inform the honourable member that I have already done so and the contents of that letter indicates that the government does not intend acquiring any land on Stott Terrace other than the possible truncation of 2 properties. There is just no way the government can justify the expenditure of $1.5m for the acquisition of private business when, in its judgment, that is not necessary.

Northern Territory Air Charter

Mr B. COLLINS to MINISTER for TRANSPORT and WORKS

Is he aware that Northern Territory Air Charter has recently retrenched staff? Is he also aware that allegations have been made relating to indiscriminate poaching of passengers within the charter industry in contravention of licences? I am told about it constantly and each charter company blames the other. What action does the minister intend to take to prevent such poaching through the powers vested in him by the Aviation Act?

ANSWER

Mr Speaker, I am aware of the problems described by the member for Arnhem. At the moment, I have referred to the Law Department alleged infringements of the Aviation Act by a couple of the operators in the aviation industry. I am seeking legal advice on whether I have a prima facie case against them. I have also advised the operators who have continually infringed that 203 regulation route that I intend to prosecute if a case does exist and have instructed them to have discussions with me regarding their poaching of other routes some time next week.

Port Authority Tug

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

The Northern Territory Port Authority's new tug was brought up overland from Western Australia. Could he advise why the tug did not come up under its own steam at considerable savings and why no quote was sought from State Ships to bring the tug up?

ANSWER

I am aware that the tug has arrived but I am unaware of the circumstances of its transport. I will provide the honourable member with that information during these sittings.

Housing Needs in Nhulunbuy

Mr LEO to MINISTER for LANDS and HOUSING

Will the minister commission a report on Nhulunbuy's housing needs which he is prepared to make public?

ANSWER

I am amazed that the honourable gentleman who purports to represent that area requires a report from my department on the housing needs of his area. One would have thought that, if he made a casual observation of his own electorate, he could find out for himself.

Industrial Safety

Ms D'ROZARIO to MINISTER for MINES and ENERGY

Apart from the Safety Sam campaign and the activities of safety inspectors, what other involvement does the Department of Mines and Energy have in the area of industrial safety and accident prevention?

ANSWER

I think the most appropriate way to answer the member's question would be to have a paper prepared providing the information we have on the program.

Large-Animal Pound in Rural Area

Mrs PADGHAM-PURICH to MINISTER for COMMUNITY DEVELOPMENT

What is the current thinking regarding the establishment and running of a large-animal pound in the rural area?

ANSWER

Pounds have been giving me some difficulty lately. The department has conducted a review of the legislation for animal pounds. It seems to me that the legislation is outdated by 50 years and requires reviewing. To this end, I am having a submission prepared to seek approval for legislation changes which will in essence prevent the requirement of having a pound reserved as a specific area. The reservation procedures are tedious and do not provide much flexibility. I think that, in this day and age, we should be looking at declaring an area to be a pound without having many limitations. There would have to be approval for an area to be made a pound. The procedure should be simple and able to be changed from time to time. It is a matter that does concern the government because of the continuing complaints about stray animals which can cause danger to persons and property. I can only assure the member for Tiwi that I am aware of the problems in her electorate and I will attempt to deal with them as best as bureaucracy will allow.

Henbury Avenue Special School

Mrs O'NEIL to MINISTER for TRANSPORT and WORKS

What is the latest estimated opening date for the Henbury Avenue Special School?

ANSWER

The Henbury School has been the subject of debate in this Assembly. It is under the auspices of the Department of Transport and Works that the construction is being carried out. A contractor almost went into liquidation but, to avoid

calling for other tenders, the department took the view that it would be easier to leave the contractor there to continue the work providing that he maintained a work rate that would enable the school to open for the next school year. My understanding is that the department is satisfied with the work rate of the present contractor. There is reasonable progress and all indications are that it will be completed this year.

Housing Needs for Nhulunbuy

Mr BELL to MINISTER for LANDS and HOUSING

Apart from pouring my contempt on ...

Mr SPEAKER: Order! The honourable member will ask his question.

Mr BELL: Will the minister answer my colleague's question in relation to ...

Mr SPEAKER: The honourable member will ask the question. The minister may reply or he may not reply. That is his privilege.

Mr BELL: Is there a report on housing in Nhulunbuy and, if so, will the honourable minister make it public?

ANSWER

Dear me, Mr Speaker, the new boy comes down from the back bench and takes over the responsibilities of another member.

Mr SPEAKER: Will the honourable member answer the question or decline to answer it.

Mr ROBERTSON: I have already answered the question.

Shop Trading Hours

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

This question is asked as a result of the comments that have been made recently by the small traders about shop trading hours. Is the government inquiring into the issue of restricted trading hours and, if so, is he able to indicate what form the inquiries are taking?

ANSWER

The government is not specifically inquiring into the question of trading hours. Its policy has been expressed from time to time recently: it does not favour the regulation of shop trading hours in the Northern Territory. We do not believe that governments should be involved in telling people where and when they should be able to shop. There has been an organisation formed to press for legislative controls specifically aimed at preventing large retail operators in the Northern Territory from opening on Sundays. The organisation is called the Independent Small Business and Traders Association. It has had talks with the government and we continue to correspond on the matter without reaching a great deal of agreement. The government has also contacted the major retailers to ascertain their intentions about Sunday trading in Darwin. From the information we have, it appears that there are no plans in the immediate future for any of the major national retail chains to open on Sundays in Darwin. I think that the Independent Small Business and Traders Association is a little bit premature in some of its allegation about what would occur in Darwin if other businesses which currently do not trade on Sundays do trade in future.

Special Purposes Leases for Aboriginal Communities

Mr DOOLAN to MINISTER for LANDS and HOUSING

Has the Department of Lands or its officers advised pastoralists not to agree to special purposes leases for Aboriginal communities as I alleged in this Assembly on 2 June 1981?

ANSWER

No. It would certainly be contrary to the policy of this government if it were to do so.

Specialist Teachers in Primary Schools

Mr B. COLLINS to MINISTER for EDUCATION

What is the government's position on the provision of specialist teachers in primary schools?

ANSWER

The Northern Territory Teachers Federation has indeed got its act together to launch a campaign for specialist teachers in primary schools. It is generating through school councils an interest among parent bodies for just that. I have an advantage over those parents in that I have seen the Northern Territory Teachers Federation's justification for specialist teachers in primary schools as a result of the core curriculum. The entire submission moves me not one iota. It is not an argument for the benefit of schoolchildren and their better education but a very thinly disguised submission for more time off for teachers. It is nothing more than that. The core curriculum was brought in partly as a result of overtures by primary school teachers to this government for guidance in their work and to help with consistency in their work. Not one primary school teacher I spoke to implied that it would involve them in more work. Indeed, quite the contrary is the case. It is a simple step by step guide on how to go about teaching the very subjects that those teachers are trained to teach. I find it remarkable that the Northern Territory Teachers Federation can insult its own membership by saying that they are not capable of doing the very work they claim they are professionally trained to do. The whole thing smacks of inconsistency. When one thoroughly examines the document, one must come to the conclusion that it is solely another vehicle to obtain more time off.

Mr Speaker, our system of education cannot afford constant applications and demands, however disguised, for less work for the same pay. When the Teachers Federation and educationalists can convince me and my colleagues that there is a sound educational reason why primary school teachers cannot teach what they are trained to teach, then we will review the situation. We are told that we require additional specialists for musical and physical education. I am the first to support the provision of specialist advice to teachers in very special areas, particularly physical education where a false approach can have catastrophic effects for life. I would see specialists in feeder high schools being made available to primary school teachers if and when those professional people want that help. If we say that primary school teachers are not capable of teaching physical education and music for which they were trained in part of their course, it would equally follow that science and mathematics are specialist fields in education. They are in secondary schools so what are we really arguing for: the abolition of primary school teachers and the creation of a system of specialisation from infancy up? If we were to do this, the cost of education would treble without any advantage whatsoever to the students because there are far more primary school students in a place like the Northern Territory than high school students.

Mr Speaker, this is an attempt by the Teachers Federation to abrogate the very type of responsibility it claims as its own. The role of primary school teachers is to have a direct association with a child in a class so that child identifies with the teacher and works through the various years of primary school education to equip himself for secondary education. This government will have no part of this surreptitious backdoor method of less work for the same pay.

Katherine Meatworks

Mr LEO to MINISTER for PRIMARY PRODUCTION and TOURISM

Did the minister have any foreknowledge of the change in employment policy of the Katherine Meatworks?

ANSWER

Mr Speaker, over the years I have found when dealing with business people that they are fairly reluctant to offer much of the fine detail of their operation and management policies. I understand that the Katherine abattoir management has been concerned for some time about the cost of processing animals. The present position is a stalemate between the employees and the employers. What the final resolution of this particular problem will be, we have yet to find out but, the way prices are going in 1981, it would not surprise me if the abattoir remains closed until such a resolution is reached.

Department of Treasury Alice Springs

Mr D.W. COLLINS to TREASURER

When will the Department of Treasury accounting office in Alice Springs become operational?

ANSWER

Mr Speaker, the Treasury accounting office in Alice Springs is in fact manned in a small way at present although it will not be fully operational until 1 January 1982. From that time, accounts will be paid directly from the Alice Springs office as well as salaries for government employees in that region. Government departments with offices in Alice Springs will receive separate ledger reports and be in a position to manage their own finances virtually wholly within Alice Springs within overall Treasury regulations. We hope that this move by the government to establish a Treasury accounting centre in Alice Springs - which was made purely in the interest of decentralisation and to provide additional local services - will help the local people to feel that they are getting service that is closer to home. There will be no further need to send accounts to Darwin and for cheques to be processed here and sent down to Alice Springs. That system really runs fairly smoothly and quite quickly under normal circumstances but in the event of disruption of postal or transport services - which seems to be a bit of a thing these days - accounts and cheques can be delayed substantially. The advent of an accounting office in Alice Springs will largely overcome those problems. We are pleased that the government has been able to see its way clear to establish this small centre in Alice Springs to provide that additional element of service to the people there.

Chicken Feeding Trials

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

What has been the outcome of the recommendations of the chicken feeding trials conducted by the Department of Primary Production and what will be its implications for local suppliers considering local feeds were compared to feeds mixed interstate?

ANSWER

Mr Speaker, I do not have the information at my fingertips. I will seek it and provide it for the honourable member at a later time.

Rehabilitation of Rum Jungle

Mr B. COLLINS to MINISTER for MINES and ENERGY

Could the minister advise the Assembly what progress has been made with the program to carry out further rehabilitation of the Rum Jungle mine?

ANSWER

Mr Speaker, I would ask the honourable member to put that question on notice.

Sales Tax Rebate Scheme

Mr ISAACS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Given last night's budget which will increase the rate of sales tax levied and expand the commodities that attract sales tax, is it the intention of the Northern Territory government to retain its sales tax rebate scheme and, if so, how does it expect to cope with the additional outlets which will now attract the rebate?

ANSWER

The news of the federal government's moves in relation to sales tax has only been learned in the last 24 hours by the Northern Territory government. I am seeking a report on the implications of the budget upon the Northern Territory sales tax on freight scheme. I will be studying the report and, in the light of that, consider whether or not I should submit changes to the scheme to the Northern Territory Cabinet. At this stage, it is too early to accurately assess the effect because the federal government's budgetary moves in this area were fairly widespread. Until such time as we can collate all the figures, we will not really know how the Territory scheme will be affected. Therefore, it is premature to give any predictions on the scheme now.

Community Health Centre Charges

Mrs PADGHAM-PURICH to MINISTER for HEALTH

Can he advise if charges will be made for consultations at Community Health Centres after 1 September 1981?

ANSWER

It was mentioned in the debate and also in the statement yesterday that consultations with medical practitioners at Community Health Centres will be paid for at a rate of $15 per consultation. There is some classification that needs to be enlarged upon so far as the health centres are concerned. I am happy to advise the Assembly that the health centres where these charges could be made will be Alyangula, Berrimah, Connellan, Darwin Central, Howard Springs, Jabiru, Katherine, Parap, Sanderson, Tennant Creek, Nhulunbuy and Nightcliff. Obviously, most of those health centres are in suburbia rather than in remote areas. That is the criterion on which the health centre classification has been determined. If the honourable member or other members of the Assembly need further information, I would be happy to provide it.

Aboriginal Community Health Centres

Mr B. COLLINS to MINISTER for HEALTH

In view of the fact that the minister has already stated that Aboriginal communities will be invited to take out blanket health care, is it intended that Community Health Centres in Aboriginal communities will make the same charges or not?

ANSWER

Where a medical practitioner visits the Community Health Centre in a remote area and a person receives a GP-type consultation, there will be a fee of $15. In most of these centres that I have just mentioned, the presence of a GP is very regular and even full time in most cases. In remote areas, there is the occasional visit of a medical practitioner from one of the larger centres. Any service provided by nursing staff will not be charged for.

Donkey Camp Project in Katherine

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

My question concerns the proposed Donkey Camp project in Katherine to pump

water from the Katherine River. Will he explain why no environmental impact study has been carried out on this project?

ANSWER

I ask the honourable member to place the question on notice.

Lottery and Gaming Legislation

Mr HARRIS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Has any progress been made on the review of the Lottery and Gaming legislation?

ANSWER

A couple of months ago, it was announced that there would be a complete review by the Lottery and Gaming Commission of the Lottery and Gaming Act. At that time, it was announced that it was proposed to split the act - one piece of legislation for lottery and gaming and the other for racing and betting. The Racing and Gaming Commission sent out questionnaires to some 850 clubs and organisations throughout the Northern Territory seeking their views on the various forms of lotteries and raffles and limitations currently placed on them. Unfortunately, there have only been 169 replies to date. One would expect that all who intended to reply have replied. However, the time for replies has been extended in the attempt to obtain some more information from clubs and organisations on lotteries and gaming. The decision as to when to cut off the receipt of submissions is important in determining when legislation will be able to be introduced into the Assembly. We are hoping to have the matter considered and ready for introduction in the November sittings but there is a possibility that it may not be until the sittings after that.

Racing and betting is not in the same situation. We have now sent out 850 questionnaires to persons on that subject. We do in fact have a great deal of information. I do not see that there should be any delay in drafting legislation on that subject. Hopefully, complete reviews of the legislation on both lottery and gaming, and racing and betting will be introduced into the Assembly in November. However, there is a possibility that at least one bill will not be introduced until the following sittings.

Kakadu National Park

Mr ISAACS to CHIEF MINISTER

Is he yet in a position to explain to the Assembly the changed arrangements, if any, which will apply to the management of Kakadu National Park?

ANSWER

Mr Speaker, no.

Report on Mental Health Act

Mrs O'NEIL to MINISTER for HEALTH

Is it intended to table in the Assembly a separate annual report on the operations of the Mental Health Act in accordance with the requirements of section 41 of that act or is the inclusion of a short section in the NT Department of Health annual report considered to be sufficient?

ANSWER

I ask the member to place that question on notice.

Health Department Staff

Mr BELL to MINISTER for HEALTH

I preface my question by drawing the attention of the Assembly to the

minister's statement yesterday in which he referred to new procedures to be adopted as a consequence of the new health funding arrangements. Which categories of department's staff will receive training in these procedures and in which such procedures will the department's staff receive training?

ANSWER

I can only assume that the member is referring to the procedures that will be involved in processing patients admitted to hospital. There will need to be a fair amount of paperwork processed before they are admitted. If that is not what the member is referring to, perhaps he could let me know. In this particular instance, the staff of all the hospitals will need to go through a training period on the requirements of the government, the federal government and the Department of Social Security and, in fact, on what has to be done to enable payment to be made for services rendered. This concerns nursing and medical staff. That training period started some 6 to 8 weeks ago. It has been going on for some time and will probably continue through into the new year. We anticipate that the first 6 to 9 weeks after introduction of the new scheme could contain a few hiccups and a complete review of our operating procedures is planned to take place at the end of the ninth or tenth weeks of the new charge system so that any difficulties can be ironed out and staff can be advised how these difficulties can be overcome. If I have not answered the honourable member's question adequately, I would be happy to give him further information.

Repair Work on Arnhem Highway

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

What is the program for repair work on the Arnhem Highway?

ANSWER

Mr Speaker, in answer to the honourable member's question, approximately 12,000 metres of pavement on the Arnhem Highway require repair. The department intends to surface as much as it can before the wet. As we have been unable to attract a contractor to do the job, there will be about $250,000 worth of work done by direct management. We will be inviting tenders shortly for repairs valued at $1.2m for the Arnhem Highway pavement.

Medical Fees in Aboriginal Communities

Mr LEO to MINISTER for HEALTH

When there is a charge for services by a visiting medical practitioner to Aboriginal community, who will be expected to collect these fees?

ANSWER

Mr Speaker, it will be a circumstance by circumstance arrangement. In some cases, there will be clerical staff available to collect the fees and in other cases the department will be seeking the cooperation of nursing and medical staff to arrange for the collection of the fees.

Donkey Camp Project in Katherine

Mrs LAWRIE to MINISTER for PRIMARY PRODUCTION and TOURISM

My question refers to the projected pumping of 30 million gallons of water per month from the Donkey Camp area of the Katherine River. What steps have been taken to protect farmers who need that water to continue the farming projects they have started along the banks of the Katherine River?

ANSWER

Mr Speaker, when the decision was taken to exploit Donkey Camp to supplement the water supply to the township of Katherine, a committee was set up comprising farmers on the river and members of the department. It was hoped that this com-

mittee would establish the basis for pumping out of the river. I have not been associated with it since that time. I have been advised that people with new agricultural techniques in the region have elected to put bores alongside the river rather than pump out of the river. I understand there is a limit of what can be taken out of the river. I think that is an established fact.

Health Department Staff

Mr BELL to MINISTER for HEALTH

In view of the answer to my previous question, does he believe that it is an efficient use of resources to use highly-trained medical staff to do the work of clerical staff in health institutions in the Northern Territory?

Mr SPEAKER: The honourable member is asking for an opinion.

Marina Proposals

Mr HARRIS to MINISTER for TRANSPORT and WORKS

Is he able to inform me what stage the marina proposals have reached?

ANSWER

At the moment, a submission is being prepared by the Departments of Transport and Works and Lands to go forward to the Town Planning Authority for approval.

ADMA Scheme

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

Given the recent difficulties of ADMA in obtaining land for its agricultural scheme, could he now advise the Assembly of the short-term future position of land that will be utilised under the scheme?

ANSWER

The member asks a question which would really necessitate a statement in reply. However, I did outline in an earlier sittings what the program was for 1981. We are not prepared to say any more at this stage. We are certainly hoping that we can get more land for more farms at a later time.

Dollar-for-Dollar Subsidy Scheme

Ms D'ROZARIO to MINISTER for EDUCATION

Is it the government's intention to continue the dollar-for-dollar subsidy scheme for schools during this financial year?

ANSWER

It is the government's intention to continue with this most successful program.

Donkey Camp Project in Katherine

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

As farmers along the Katherine River bank have been advised that, if they want to sink a bore, it is their prerogative and they have to pay for it, could he advise at what level will pumping cease from the Katherine River to protect their water supply?

ANSWER

I ask the member to place the question on notice.

Palm Leaf Beetle

Mr HARRIS to MINISTER for PRIMARY PRODUCTION and TOURISM

Have any further reports been received by him as to whether or not the pro-

956.829—26

posal to introduce a parasite to control the palm leaf beetle in the Darwin area is able to be proceeded with?

ANSWER

The member for Port Darwin certainly exhibits a lot of interest in this particular problem. It is a very serious one in the urban area. He asked me 2 questions in the last Assembly about the palm leaf beetle. There has been very little improvement in the position. We are in a control phase. The eradication phase cost some $53,700. There are discussions about to take place with Queensland officers in respect of beetles that have been introduced to Samoa. We are awaiting with interest the result of these discussions and it may be that we can come to some arrangement with Queensland about the introduction of some predators. As I indicated in June, very strict controls would have to be mounted in respect of this particular aspect.

Casuarina Hospital Staffing

Mrs O'NEIL to MINISTER for HEALTH

Yesterday, in his statement on health charges and other health matters, he announced a planned reduction of 70 in the staffing of Casuarina Hospital. Can he advise which categories of staff will be included in this number?

ANSWER

I would need to seek information from the hospital administration. If the honourable members wishes me to do that, I would ask her to place the question on notice.

ADAMA Scheme

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

Can he advise the Assembly if there has been any progress at all in the development of a third farm in the ADMA scheme?

ANSWER

The development of the third farm in the current scheme depends on acquiring some further land from a pastoral leaseholder.

Warrego Mine Redundancies

Mr LEO to MINISTER for MINES and ENERGY

Did he have any prior knowledge of the redundancies at Warrego Mine?

ANSWER

I received advice on the day that the public statement was made by the company. I received that advice from the chairman of Peko Wallsend on that day. I had been aware for some 4 to 6 weeks, as I think the whole community had been aware, that the company was certainly in a very difficult position so far as the Warrego smelter operation was concerned. They were looking very closely at what remedial action they would have to take to save their operation from going down the drain entirely.

Retailing at Jabiru

Mrs PADGHAM-PURICH to CHIEF MINISTER

What procedures will be adopted in the establishment of shops at Jabiru to ensure that an undesirable monopoly situation does not arise with the prime consideration always being not only the shopkeeper's profit but the consumer's pocket?

ANSWER

I am not quite sure what procedures will be taken to ensure that a reasonable trading situation is arrived at in Jabiru. To some extent, it will be dependent on the actual size of the town and what sort of retailing operation it can support. I know that provision has been made in the construction phase to have a supermarket and 6 speciality shops and a bank. If the town becomes any larger than at present proposed as a result of other mines in the area gaining approval, I would imagine that an enlargement of the shopping facilities would be considered.

Horticultural Project for Alice Springs

Mr D.W. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

Is it intended that the Agricultural Development and Marketing Authority will eventually move to the Alice Springs area to help set up a horticultural project?

ANSWER

Mr Speaker, stage 1 of the program does not provide that the Agricultural Development and Marketing Authority will set up schemes anywhere else in the Territory. It is obvious that Alice Springs and Central Australia would be desirable places to further exploit horticultural development. To this end, we have strenghtened our horticultural section in the Department of Primary Production and that department will be responsible for any further developments in those areas.

Silting of Donkey Camp Area

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

As he will be aware, in the dry season, the Katherine River below the Donkey Camp area is quite shallow. What investigations have been undertaken by his department to mitigate the effects of the probable silting of that area which will result from the extraction of 30 million gallons of water per month in the dry season?

ANSWER

Mr Speaker, I am unable to provide the honourable member with that information. However, I will do so during the course of these sittings.

Brucellosis and Tuberculosis Eradication Scheme

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

In view of the importance of the beef industry to the Territory and the fact that we are lagging behind other states in the success of the brucellosis and tuberculosis eradication scheme, is it the intention of the government to seek a formal guarantee agreement from the Commonwealth government for future funding for that scheme in the Territory?

ANSWER

Mr Speaker, that intention has been forecast on a couple of occasions recently and certainly in the past. Recently, I pressured the Commonwealth for funds for the brucellosis and tuberculosis eradication scheme at the recent Agricultural Council meeting in Darwin and before that at the Rural Adjustment Scheme meeting held in Melbourne at which I represented the Minister for Industrial Development. I do not know that the Territory is lagging behind in the beef industry. I point out to the honourable member that, at 30 June 1981, 26 export abattoirs had closed down around Australia and they were not in the Northern Territory. Mudginberri has closed down since then. Prices have a bearing on the impact of the future of the brucellosis and tuberculosis eradication scheme, of course, and prices are fairly dpressed at this stage. No doubt growers will be watching this with great interest with regard to future operations.

Bus Service for Malak

Ms D'ROZARIO to MINISTER for TRANSPORT and WORKS

Can he inform me when a public bus service will be available in the northern section of Malak?

ANSWER

Mr Speaker, I understand that the bus administration is working out new routes for Leanyer, Karama and Malak at the moment. Until such time as the program is complete, I am unable to provide the member with the information she requires.

McMinns Lagoon

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

When is the flood mitigation work at McMinns Lagoon in the rural area expected to be completed?

ANSWER

Most of the work has already been completed. I believe that the Lands Branch is now trying to acquire some land in the area to finish the project. Once that land acquisition has been completed, the department will complete the job within 1 month.

Recreation Lake in Alice Springs

Mr BELL to CHIEF MINISTER

I refer to a letter from a Conservation Commissioner, Mr Harry Butler, to the Secretary of the Central Australian Conservation Council in which he suggested that alternative sites were under consideration for the proposed recreation lake in Alice Springs. Is it true that the government is considering alternative sites and, if so, which sites?

ANSWER

I am not aware of the terms of the letter from Mr Harry Butler to the Central Australian Conservation Council but I would like to hasten to assure the Assembly that Mr Harry Butler does not purport to speak on behalf of the Northern Territory government. At present, I understand the Aboriginal Liaison Unit of my department is attempting to re-establish contact with the Central Land Council with a view to further discussions regarding the site in the Todd River. At present, there are no alternative sites under consideration by the Northern Territory government.

Airport Facilities in Darwin and Alice Springs

Mr B. COLLINS to MINISTER for TRANSPORT and WORKS

In the light of the totally inadequate airport facilities at both Darwin and Alice Springs, did the government in the last financial year seek funds for the upgrading of both these facilities prior to the construction of new facilities?

ANSWER

The Northern Territory government is always pursuing the Commonwealth to upgrade the facilities at both the Darwin Airport and also the Alice Springs Airport. Both airports are controlled and owned by the federal government. We have made representations to the federal Minister for Transport to provide additional facilities at both these airports to no avail.

Teachers Accommodation at Jabiru

Mrs PADGHAM-PURICH to CHIEF MINISTER

What consultation was undertaken with the teachers at Jabiru by the Jabiru Town Development Authority with regard to the accommodation of these teachers?

ANSWER

As far as I know, there were no teachers at Jabiru to consult with at the time that plans were being prepared for housing government servants at Jabiru. Extensive consultations on the nature of government housing - and I do not think that any different housing is being provided for teachers than to other government employees in the area - were had by the authority with the Department of Transport and Works, the Public Service Commissioner's office and the Department of Education.

Water Hyacinth

Mrs O'NEIL to MINISTER for PRIMARY PRODUCTION and TOURISM

In how many sites in the Northern Territory has water hyacinth since been identified and what action is being taken to prevent it spreading?

ANSWER

I am not too sure about the number of sites at which water hyacinth has been identified. Certainly, there was a recent report that is currently under consideration by the department in relation to cost and forward planning.

Northern Territory Teaching Service

Mr B. COLLINS to MINISTER for EDUCATION

Has the Northern Territory Teaching Service established last month become fully operational?

ANSWER

As far as I know, there are teachers in classrooms in the Northern Territory carrying out their duties as normal. That is under the Northern Territory Teaching Service Act.

Anchorages off Cobourg Peninsula

Mrs LAWRIE to CHIEF MINISTER

My question relates to a debate which we had in the last Assembly sittings regarding safe anchorages off Cobourg Peninsula. As the Paspaley pearling lease area in Knocker Bay is no longer being used and is abandoned, has consideration been given to resuming that lease and making it accessible to the general public as suggested at the last sittings?

ANSWER

I cannot say that such consideration has been given. The Cobourg Peninsula National Park is under the control of a board of management which comprises a number of the Aboriginal traditional land owners and a number of representatives of the Conservation Commission. I am aware that they have had at least 2 and perhaps 3 meetings. As a result of these meetings, various decisions have been taken regarding management plans and recruitment and provision for additional rangers. I am not aware that any consideration has been given to acquiring the Paspaley lease at Knocker Bay and provision of an anchorage there. But I believe that those sorts of things will be considered in the formulation of a management plan. I know that a management plan will be formulated with a reasonable degree of celerity.

I do not believe that this anchorage at Knocker Bay should be considered in isolation from the management plan. There are places where people can anchor off

the Cobourg Peninsula at present and there are a number of watering points. I do believe that most yachtsmen who sail to the Cobourg Peninsula, whether it be from Darwin or whether it be from interstate or overseas, usually call in the vicinity of Smith Point and usually receive permits to go ashore.

Women's Centre in Alice Springs

Mr BELL to MINISTER for HEALTH

Why is there currently no women's centre operating in Alice Springs since the closure of the former establishment more than a year ago?

ANSWER

I gather from the tone of the member's question that he was inferring it might be because of this government's non-action that the women's centre is not operating. I would like to advise the Assembly that, after the closure of the former women's centre in Alice Springs and after that very well attended meeting where the women of Alice Springs decided they wished to have a women's centre, the government was happy to support the establishment of a new centre. In fact, the Department of Health made available 2 demountables which were surplus to its requirements on the hospital campus. They were transferred to a block of the local women's choosing for establishment. Unfortunately, the block that the local women chose did not have correct zoning for the proposed centre and, for some time now, they have been going through the trauma, as all of us do when we come in contact with the town planning authorities, of having the block suitably zoned for the establishment of their centre. I appreciate that there has been some upset amongst the local women that it is taking so long but really I feel it is a matter for the people of Alice Springs because they chose the site and they did it in the full knowledge of the zoning. It is not a matter for the government. I would go on to say that we have funds ready to be drawn by the Womens Centre as a contribution towards its operation as soon as the doors are open. We have made preliminary payments already to enable the women to connect water, power and telephones and buy a bit of furniture. As soon as the other matters relating to town planning are resolved, I guess they will be in business.

Education Act Regulations

Mr B. COLLINS to MINISTER for EDUCATION

In view of the fact that Northern Territory schoolteachers are carrying out their duties in classrooms across the Territory, could he advise the Assembly when they will have regulations to the Education Act to guide them in those duties?

ANSWER

Mr Speaker, that is an excellent question. I think the timetable which I originally announced to the Assembly at the last sittings - that is, the end of October - still stands.

Coffee Bush

Mr HARRIS to CHIEF MINISTER

The Chief Minister would be aware of the enormous amount of coffee bush or leucaena that grows in the electorate of Port Darwin. Has any consideration been given by the government to the method of controlling the spread of this bush? If so, is he able to inform me what methods have been considered?

ANSWER

If I may say so, the member for Port Darwin has, I will not call it an obsession, but perhaps a predilection for coffee bush. In other parts of the world, coffee bush is regarded rather more highly than it is regarded by the member for Port Darwin. Sometimes I think that coffee bush is all that is hold-

ing his electorate together. In Hawaii and in the Philippines coffee bush is used as an ornamental plant and it manages, on occasions, to look reasonably attractive. Some time ago, the Conservation Commission, and I cannot remember precise details, embarked on a program of attempting to eradicate portions of coffee bush from particular places. For instance, some members may have noticed that coffee bush on the slope below Government House leading down to the wharves has been, if not eradicated, at least tamed. I believe that some attempt was made to attack coffee bush on the cliffs over here. Coffee bush was eradicated to some extent around Myilly Point.

At present, the Conservation Commission is preparing a document which it hopes will be in the nature of a 3-year plan for the overall improvement of those areas of Darwin for which the government has particular responsibility. I think the foreshores are amongst them. I am not certain whether this plan will encompass the eradication of coffee bush. Perhaps I should inquire of this from the Conservation Commission. I do not know whether the eradication of coffee bush in certain circumstances might cause erosion. Perhaps the coffee bush would be best left in such places. When this proposal is prepared for the urban beautification of Darwin and other Territory centres such as Alice Springs, then it will be submitted to Cabinet for funding. I think some provision is being made for its funding in the next 12 months on a preliminary basis. I hope to be in a position to circulate it to members of the Assembly for their information. I hope that it contains good news for the member for Port Darwin. In some cases, I rather think the coffee bush is really a better sight than what lies behind it in parts of his electorate.

Katherine Rural Education Centre

Mr B. COLLINS to MINISTER for EDUCATION

Could he advise of the progress in the program to provide additional staff and accommodation facilities at the Katherine Rural Education Centre?

ANSWER

Cabinet has recently taken a decision in addition to the decision previously announced to provide $128,000 to the Katherine Rural Education Centre. I might say that this is largely thanks to the efforts, the persuasive powers and the resulting confidence from the new council of the Katherine Rural Education Centre. We will provide 4 residential demountables plus an ablution block. Hopefully, things will go from strength to strength.

Maintenance of Todd River

Mr BELL to CHIEF MINISTER

As minister responsible for the Conservation Commission, is he aware of representations from the Alice Springs Town Council on the maintenance of the Todd River through Alice Springs? If so, will the Conservation Commission take on extra responsibilities for the condition of the river following these representations?

ANSWER

I am not aware of specific recent representations from the Alice Springs Town Council in relation to the Todd River. I imagine that, because the Director of Conservation is based in Alice Springs, it would obviously be far more efficient for the council to refer directly to the Conservation Commission in that town rather than correspond through me. I know the Conservation Commission has plans for the regeneration of tree growth in the Todd River bed. I understand that, for some reason, the trees seem to die in cycles. Of course we learn these things in an ongoing way and the Conservation Commission is gaining experience in this area. As to ownership of the Todd River bed, I cannot speak with any certainty but I would imagine that it would be Crown land. As for

control of the Todd River bed, the council is as free as any other governmental agency to pass bylaws within its powers in relation to control of matters relating to the Todd River bed. The council has responsibility in Alice Springs for a degree of urban beautification as indeed have councils right throughout the Territory. The government's principal responsibility is to look after those main roads that do not belong to councils. I hope that the maintenance of the Todd River area is something that can be carried out jointly between the Conservation Commission and the council. I would hope that, in due course, the council would accept responsibility for the river that flows right through the town.

Nabarlek Mine Spillage

Mr B. COLLINS to MINISTER for MINES and ENERGY

Is it true that some time in the last 12 months a significant pollution problem occurred at the Nabarlek mine site where liquid waste from the mill was measured as containing in excess of 2,000 pico-curies per litre, that some of this liquid waste was released into the environment and that, further to this, the company failed to report this incident to the Supervising Scientist?

ANSWER

I am aware of a release that took place earlier this year - I believe in March - during which time the company denied that such an occurrence had taken place. Upon questioning by the department, it still maintained that no such action had occurred. The matter has since gained some momentum with the involvement of the Department of Mines and Energy, the Office of the Supervising Scientist, the NLC and a few other people and is currently under review. As to the comments of the honourable member about the level of radiation in the release, I do not have the facts in front of me. If he would care to put his question on notice, I would be happy to give him the details of the circumstances and the sequence of events as I understand them. There is certainly nothing to hide from my point of view.

Palm Valley Gas

Mr ISAACS to MINISTER for MINES and ENERGY

What price is to be paid by the Northern Territory government to the Palm Valley joint venturers for the supply of gas for the Alice Springs-power station?

ANSWER

I appreciate the Leader of the Opposition's question and interest in this matter. I have not been oblivious to the fact that the price agreed upon is also of interest to many people outside this Assembly. I did not disclose the price last week because the only document signed by myself and Magellan was a letter of intent. Formal documentation has yet to be drawn up and signed. I took the view that, since it was a commercial agreement with a customer, in this case NTEC, and the supplier, Magellan, the commercial nature of the agreement should remain confidential until such time as the formalities were executed. My office has been in touch with Magellan Petroleum and, as a result of the numerous inquiries received by both the company and myself, we have agreed that the price should be released today. The price agreed upon was in fact $1.12 a gigajoule at the well-head. It should be clearly understood that this is a well-head price and not a city gate price. It is not the final price that will be paid by the consumer, which in this case is NTEC, which will have to take into account a number of other factors including pipeline costs and operation. To give members some comparison of the prices paid in Australia today for gas: Surat is getting $2.04 a gigajoule, Dongara is getting $1.90 a gigajoule, Cooper Basin is getting 52¢ a gigajoule and Gippsland is getting 33¢ a gigajoule. I make the point that the prices for Cooper Basin and Gippsland are for old gas at old prices. The first 2 prices are for new gas at new prices. Our own gas is old gas at an intermediate price.

I must also emphasise that this gas is of pipeline quality. As I said in my statement last week, the price was agreed to bearing in mind that the industry needs to receive a fair and equitable price for its product if exploration is to be maintained at a satisfactory level. I would say that $1.12 a gigajoule, given the circumstances of supply and demand, is a very fair price for the citizens of the Northern Territory.

Humpty Doo Primary School

Mrs PADGHAM-PURICH to MINISTER for EDUCATION

What is the current situation regarding the building of the permanent Humpty Doo Primary School?

ANSWER

The contracts for the Humpty Doo Primary School were let at the same time as the contracts for 3 other primary schools; that is, 5 May 1981. One would hope to see the completion of those primary schools by about the end of January 1982.

Student-Staff Ratio in Primary Schools

Mr B. COLLINS to MINISTER for EDUCATION

My question refers indirectly to a previous answer he gave me on specialist teachers. Does he intend in future school years in the Northern Territory to work towards an overall reduction of the student-staff ratio in primary schools for the educational benefit of the children, I might add, and not for a decreased workload on the teachers?

ANSWER

This is one of the areas that is subject to as many opinions as there are so-called experts: the value of reducing class sizes in terms of educational delivery. There was a study in Saskatchewan in Canada where it was proven - if

you can prove this short of thing - that it would be necessary to reduce a class of 30 down to a class of about 15 before any appreciable improvement in the quality of the delivery of education would be obtained. Nonetheless, there is a fairly wide body of opinion which believes that a class size of 30 in a primary school is somewhat excessive. The Northern Territory Teachers Federation has proposed a figure of 25 in primary schools which is fairly widely accepted throughout Australia as being the ideal for which we should aim.

I previously raised this matter with Cabinet at Port Keats a couple of years ago. The government announced that it would like to be able to reach a pupil-teacher ratio of 25-1. Certainly, it is a target that we still would like to reach when we can. We must have regard to the resources available to schools throughout Australia, not just in the Northern Territory. They are not unlimited and, with the prevailing economic climate and the attitude of the Commonwealth to educational grants to the states and the Territory, that target may well be some time off. Certainly, it is an objective that, resources permitting, I would like to attain as soon as we can.

Alice Springs Child Health Unit

Mr BELL to MINISTER for HEALTH

When will renovations to the Alice Springs Child Health Unit be completed and can he describe how its facilities and services will be upgraded from their current derelict state as a result of the renovations?

ANSWER

I ask the member to place the question on notice.

Dam on Katherine Gorge

Mr VALE to MINISTER for MINES and ENERGY

Could he advise if a dam could be built on the Katherine Gorge and would it solve the problem of Katherine farmers outlined by the member for Nightcliff yesterday as well as supplying an alternative source of energy to a most important centre?

ANSWER

I gather from the tone and regularity of the questions that this matter of the Katherine Dam is very dear to the heart of the member for Elsey. I would like to assure the member for Elsey that I have his interests at heart also. The matter of whether the dam would provide sufficient water for the farmers in Katherine is one that has been under preliminary study by the Snowy Mountains Engineering Corporation which reported to the government in a preliminary study that there would be very distinct advantages for primary industry in the area if a dam was built. However, the amount of water used for primary industry will have an impact on the amount of water available for the generation of power. To strike that balance will be important in the years to come when we consider erecting a dam. The amount of water the farmers in Katherine at the moment use would not have any impact on the proposals or any storage that the dam would accumulate when it is built. The water usage that I am talking about relates to any future primary industry development or irrigation prospects that may come as a result of the dam being constructed in the years to come.

Music Course at Darwin Community College

Mrs O'NEIL to MINISTER for EDUCATION

Is he aware that an Associate Diploma of Music course planned at Darwin Community College for 1982 cannot proceed because funding is not available. What action, if any, is the minister able to take on this matter?

ANSWER

Mr Speaker, there are a wide range of advance level course which the college would like to run and this government would like to see the college run. There is a difficulty in funding. All honourable members would be aware that the provision of funds for advanced courses throughout Australia are a Commonwealth responsibility. I would have preferred to have seen the Commonwealth not becoming involved in this area back in 1972 in the way it has. It is not as if the Commonwealth has made more money available for tertiary education as a result of its assumption of full responsibility for advanced level courses. What it did was deduct the equivalent amounts that the states were already getting for purposes of advanced education and took it upon itself to dole that money out by way of tied grants as it saw fit. The responsibility rests squarely with the Commonwealth. Nonetheless, again within the resources available, I think that we can find some this financial year to go halfway towards some very important, advanced level courses which are not currently available in the Northern Territory. What I have to extract from the Commonwealth, before advancing this proposition with my colleagues with any strength, is that it will not be seen by the Commonwealth as a move by us to let them off the hook. In other words, I would not want to see limited Territory resources become the vehicle whereby the Commonwealth would abdicate its own responsibilities.

Joint Study for Supply of Power to Remote Communities

Ms D'ROZARIO to MINISTER for MINES and ENERGY

What is the progress of the study entered into jointly with the Western Australian government in relation to the supply of power to remote communities?

ANSWER

With regret, I do not have that information in my head. I ask the honourable member to place the question on notice.

Additional Accommodation at Berrimah Prison

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

What progress has been made with the provision of additional accommodation to alleviate the overcrowding at Berrimah Prison?

ANSWER

Mr Speaker, it was announced earlier that the government was moving to establish 2 new cell blocks at Berrimah Prison to alleviate some of the overcrowding there. I understand that prisons all over Australia are overcrowded to varying degrees. The Territory is in a relatively good position in this regard. However, the 2 new cell blocks at Berrimah are proceeding on time and it is anticipated they will be opened in November this year. Staffing arrangements for additional prison guards have been approved. I take this opportunity to supply to members of the Assembly brief information on the numbers of prisoners. On 31 July this year, there were 132 persons in the prison at Berrimah, 48 at Gunn Point Prison Farm and 83 in Alice Springs Gaol. This is a total of 263 prisoners which favourably compares with 322 prisoners in May of this year when overcrowding was fairly serious. The government decided a short while ago to relocate the old Ward 11 of the Darwin Hospital to Gunn Point. This has enabled us to double the capacity at Gunn Point to include an additional 50 minimum security prisoners. These are the only prisoners held at Gunn Point because of the low security arrangements. That arrangement has worked very satisfactorily to date.

Degree Course at Darwin Community College

Mr B. COLLINS to MINISTER for EDUCATION

I preface my question by drawing the minister's attention to the TEC's

report on the establishment of a university in the Northern Territory. Paragraphs 4.6 and 4.7 refer to the Bachelor of Arts degree at the Darwin Community College. Has the clear implication in the recommendations of this report that such a degree course would not be funded by the TEC altered the college's plans to seek accreditation for the degree?

ANSWER

I have quite recently discussed this most unsatisfactory matter with the Principal of the Darwin Community College and the chairman, and I am quite sure the college will proceed with all vigour towards the accreditation of that course. We shall try with equal vigour to get the money to run it.

Veterinarian Assistance to South-east Asia

Mr VALE to MINISTER for PRIMARY PRODUCTION and TOURISM

I understand that the Northern Territory government has previously sent veterinarians to South-east Asia to assist vaccination programs to combat exotic diseases which, if they were introduced, would cause extreme economic hardship. Is it the proposal of the Northern Territory government to offer further assistance?

ANSWER

It is past practice to send veterinarians to South-east Asia as we have done in the last couple of years. Approval is being sought for Dr Jack Haslam from the department to undertake overseas travel to Kumpuchea to assist an organisation in Kampuchea with an animal vaccination program. The program is under the auspices of For Those Who Have Less, a special non-government orgnisation which has concentrated on livestock development programs in overseas countries. In April 1981, the Chief Minister received a letter requesting details on the possibility of the Northern Territory supplying buffalo to help with the reconstruction of Kampuchea. The Chief Minister's reply of 20 May indicated the problem of breaking feral buffalo into the plough and suggested that the use of Northern Territory buffalo as breeding stock might be of more value to the aid program. Further interest in obtaining the services of a veterinarian was acknowledged and, subject to the receipt of further details, the Chief Minister thought that the Northern Territory government might be able to second a veterinarian to assist in the program. Apart from the humanitarian value of helping a ravaged country to rebuild itself, the Northern Territory would benefit from the officer's experience in South-east Asia. Foot and mouth disease and rinderpest are causing major stock losses in Kampuchea; anthrax and backleg are also troublesome. The first 2 diseases are exotic to Australia and their spread to this country could be catastrophic. The value of a Northern Territorian veterinarian obtaining firsthand experience in dealing with those diseases is obvious. The officer submitting this proposal is also responsible for the development of contingency plans to cope with exotic diseases should they be found in Northern Territory stock.

Mercury in Gold Refining Process at Tennant Creek

Mr ISAACS to MINISTER for MINES and ENERGY

Has his attention be drawn to the hearings of the House of Representatives Standing Committee on the Environment and Conservation of July this year in which a hazard to workers was alluded to in relation to the use of mercury in the gold refining process at Tennant Creek? Has the minister satisifed himself that the hazard referred to has been eliminated?

ANSWER

I think that the honourable member and I are on the same wavelength if he is referring to a series of incidents and an alleged danger to health that may have come about as a result of smelting gold at Nobles Nob in Tennant Creek. If

that is not what the member is referring to, then he might so indicate. My understanding is that there was an alleged case of improper working conditions in the smelting of gold in that the mercury and cyanide fumes were not able to get out of the building and that in itself may have caused a danger to people's health. I received representations from several people on the matter. There were at least 4 investigations carried out, particularly by the Department of Mines and Energy. On one occasion, I asked specifically that the Chief Inspector investigate and report to me his findings on the matter. The upshot of it all was that the working conditions were satisfactory from the point of view of safety. What was most important was that people working in the area must pay due regard to the way they conduct their own day's work. I guess that is the balance that we have spoken about often in this Assembly. We can make all the rules and regulations we like on safety and working conditions but, if the man on the job does not have a frame of mind that is safety-orientated, all is in vain. The Leader of the Opposition's concern is noted. I can assure him that every step has been taken to ensure that the working conditions in the gold room are safe.

Police Association Submission on Public Drunkenness

Mr LEO to CHIEF MINISTER

Has he received a submission from the Police Association of the Northern Territory on the public drunkenness proposals announced in May this year? If so, what was the nature of this submission?

ANSWER

To the best of my knowledge, I have not received a submission from the Police Association but I have received something in the order of 20 to 25 submissions from different organisations. Therefore, I would not like to say categorically that I have not received such a submission, but I do not recall receiving one. One could have gone to the Minister for Health or to someone other than myself. It is possible that the association has made one that I have not seen.

Todd River Crossing

Mr D.W. COLLINS to TREASURER

Has any decision been made on my request for funds to seal the Todd River crossing near the RSL, Schwartz Crescent, in Alice Springs?

ANSWER

It is a little inappropriate to ask questions on future funding of the Treasurer at this stage of a budget sittings. However, I can indicate to the member that the government has approved in principle the construction of an additional causeway in Alice Springs in the vicinity of Schwartz Crescent. However, there is a fair bit of work to be done to investigate the proposal and have it placed on the relevant departmental programs.

Katherine Meatworks

Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

What action is the government taking to ensure that normality returns to the Katherine Meatworks and union labour and conditions prevail? Given that the government has given a $12m loan to the meatworks, how does he justify the government's apparent inertia on the matter?

ANSWER

I do not recall that the government has ever really taken a direct role in the dispute that is occurring between the employees of the meatworks and the employers. In respect of the loan, I guess that the Northern Territory will have to consider its options if the meatworks remains closed for an indefinite period.

Training of NTEC Linesmen

Mr D.W. COLLINS to MINISTER for MINES and ENERGY

Mr Speaker, what plans have been or are being made to ensure that NTEC linesman and cable jointing apprentices receive training that will give them reciprocal rights with other states?

ANSWER

The honourable member raises a question that is very important and should be aired before members of the Assembly because it is important that people we train in the Northern Territory in any profession should have portability and recognition by all the states. This matter concerns me and I would like to read for honourable members' benefit a reply I received from the General Manager of NTEC on this particular issue because there was a weakness in the system.

> *Linesmen and cable joiners are trained as indentured apprentices under the auspices of the Northern Territory Industries Training Commission. The apprenticeship is for 3 years duration and the Darwin Community College provides academic training for two 4-week block release courses conducted each year. This commission has a total of 15 apprentices undertaking this course of whom 11 are in year 3. Of this number, 4 are being trained in Alice Springs. The syllabus provides for 200 hours of theoretical training in cable joining and specifically for much of this to take place in the third year blocks. Apprentices who recently undertook their first third year block course were examined in a preliminary test of 130 competencies of their apprenticeship. There was concern that these apprentices require supplementary training and this will be undertaken in Darwin from September until the completion of their indentures to ensure that they meet inter-state standards. This procedure for testing and additional training will apply to apprentices from all centres of the Territory in future.*

Because the Territory is growing and emerging, difficulties of this nature may surface from time to time and I think that it is incumbent upon us all that we try to correct them just as NTEC has done in this particular case. If honourable members know of any such other instances, I would be grateful to hear about them.

Jabiru Bylaws

Mr B. COLLINS to CHIEF MINISTER

I understand that a lease has now been formalised for the town of Jabiru. Could he advise what is happening with the bylaws for Jabiru?

ANSWER

I cannot advise the honourable members of the present state of the Jabiru town bylaws but I will certainly give him that information if he would be good enough to place his question on notice.

Sales Tax Concessions on Solar Appliances

Ms D'ROZARIO to MINISTER for MINES and ENERGY

Is it the government's intention to introduce a scheme whereby sales tax concessions or rebates will be available to the users of solar appliances and, if so, when might we expect this scheme to commence?

ANSWER

I recall that I announced the scheme during the last sittings or the sittings before. I believe it commenced on 1 July. I say that off the top of my head and I will confirm it for the member later. Briefly, the scheme is one that offers about $100 subsidy on an average home hot water system to encourage people to put them in. It will go some way towards alleviating the peak load problems

that we have in our powerhouse in all centres because hot water systems drain quite a lot of power, particularly between 7 am and 9 am, and 6 pm and 8 pm.

Meeting of Transport Ministers

Mr BELL to MINISTER for TRANSPORT and WORKS

I refer to an article in the Centralian Advocate which was published at the time that the member for Ludmilla was acting Minister for Transport and Works. I preface the question by saying that the report in the Centralian Advocate referred to a meeting that was to be held between the federal Minister for Transport, the South Australian Minister for Transport, the Mayor of Alice Springs and presumably the Northern Territory Minister for Transport and Works. Did the meeting take place and, if so, what was resolved in relation to the South Road?

ANSWER

The meeting has not taken place yet. It was set for 14 September but the other ministers cannot meet that 14 September target. We are trying to work out another date for the meeting at Coober Pedy.

Humpty Doo Primary School

Mrs PADGHAM-PURICH to MINISTER for EDUCATION

What plans are being considered to include safe picking up and letting off of children at the permanent Humpty Doo Primary School?

ANSWER

As much as is necessary to pick them up and let them off safely.

Carpentaria College

Mrs LAWRIE to MINISTER for LANDS and HOUSING

At the last sittings of this Assembly he undertook to display the development plans for Carpentaria College for public comment. Could he indicate when such a display will take place so that the public may comment on what is a continuing problem in my electorate?

ANSWER

I will determine the current position in relation to the presentation of the development plans, if any, and I will try to provide an answer on Tuesday morning.

Commonwealth Accommodation and Catering Service

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

What arrangements have been made for the future management of those Northern Territory hostels currently managed by the Commonwealth Accommodation and Catering Service, an organisation which the federal government has announced is to cease operation?

ANSWER

I am not quite clear on the implication of the member's question. If it is that the Commonwealth Accommodation and Catering Service is about to disappear, the matter is at present handled by my colleague, the Minister for Lands and Housing. If I recall correctly, the Housing Commission is administering the agreement with CACS which, in turn, administers the hostels which we inherited not very long after self-government. To my knowledge, those agreements have an expiry period within a matter of a year or so. I leave the balance of the question to my honourable colleague.

Management of Northern Territory Hostels

Mrs O'NEIL to MINISTER for LANDS and HOUSING

What arrangements have been made for the future management of those Northern Territory hostels currently managed by the Commonwealth Accommodation and Catering Service which the federal government has announced is to cease operation?

ANSWER

This is a fairly typical problem faced by administrations around this country as a result of Commonwealth activities; it has no simple solution. One assumes that the most sensible thing for the government to do at this time is to investigate the possibility of calling tenders.

Health Centre at Katherine

Mr VALE to MINISTER for HEALTH

Why is a health centre to be built at Katherine within 1 mile of the existing Community Health Centre?

ANSWER

Mr Speaker, I ask that the question be placed on notice because I believe the centre that is referred to is being funded by Commonwealth funds rather than by Northern Territory funds. If that is the case, I will have to seek an answer from the Commonwealth. There has been some comment to the effect that the centre will be staffed by Northern Territory health department staff. I have been advised by the department that that is not so. I will obtain a written answer for the honourable member for Elsey and clarify the matter.

ADMA Scheme

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

What research is being undertaken by the Department of Primary Production in relation to and in cooperation with the Agricultural Development and Marketing Authority scheme? Is it the intention of the department to expand the level of research for the agricultural program in future?

ANSWER

Most areas in the department have been strengthened over the last year or 2, in particular the research services section, in anticipation of the needs of the Agricultural Development and Marketing Authority. This will involve further housing and accommodation being located in the general area of the scheme. The pace of the scheme itself will dictate the expansion in the future.

Alice Springs Women's Centre

Mr D.W. COLLINS to MINISTER for HEALTH

Is he aware of the newspaper report that the Alice Springs Town Council intends to object to the rezoning of the proposed Women's Centre block on Telegraph Terrace, Alice Springs. If the objection is lodged and upheld, has the minister any contingency plan to get the Women's Centre operational?

ANSWER

I am aware that the Alice Springs Town Council is likely to object to the present zoning of the Women's Centre on its present site, not because of the activities of the Women's Centre but because the town council has its eye on the block of land involved and would like to see that adjoined to the swimming pool area for future recreation use on that particular reserve. I do not have any particular difficulty in understanding the town council's attitude. I have spoken to the Deputy Mayor and I am seeking to meet the Mayor of Alice Springs on Friday to discuss this matter because I do not believe that there is a great

deal of difference between the 2 positions that the parties want to take. The arrangement we have set up with the Women's Centre on that particular block is an intermediate one that will last between 3 and 5 years. The buildings were already secondhand when we gave them to the Women's Centre and they will not last forever. Other considerations have to be assessed in that period: whether the site is a good one for the Women's Centre - it may not wish to remain there - what sort of future development should the Women's Centre have and how permanent it should be. We must balance those considerations against the needs of the council which wants the block so that it can use it in 3 to 5 years time. I do not think we have a great deal of difference between the 2 parties' views. I was going to put it to the council that, if it wants the particular land, it should approach the matter on the basis that we could use it in the interim period until it is set aside for the council, if it is the Minister for Land's wish to let it have the block.

Mr Robertson: It has not applied for it yet.

Mr TUXWORTH: I guess that is something for the council to do. It has certainly indicated to me that it intends to make a bid for the land. When that matter has been dealt with, we will be able to consider the town planning aspects. In view of what the Minister for Lands has just said, it raises the question of whether a vested interest, in this case the council, should be objecting to the zoning of a block of land over which it hopes it may obtain title at some time in the future. I can assure members that, if it is possible to obtain an accommodation between the council and the Women's Centre, we will most certainly be trying to do that.

Douglas Daly Project Farms

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION

Could he advise the Assembly the current rate of progress with the 2 project farms in the Douglas Daly area?

ANSWER

I am fairly sure I gave a reply in June as to the extent of progress in the development of the 2 farms. At that stage, we had cleared 740 hectares of land and land preparation, stick raking and so forth was taking place. Since that time, the water bores have been drilled for the homesteads. The houses have been located on site and there are other general activities taking place in the area. A shed is being constructed at a local depot on the road to Hot Springs and an airstrip is under construction for servicing the area. The Department of Transport and Works has also undertaken some works on the main road leading into the farm area. If the members who are interested to look at progress would care to join me or the Chairman of the Agricultural Development and Marketing Authority, we would be happy to make an on-the-spot inspection of progress.

Definition of Sittings

Mrs PADGHAM-PURICH to SPEAKER

I would like to ask a question of your honourable self this morning in the interests of semantics and the improvement of my knowledge. Could you inform me if, when we sit, we take part in a sitting and, after having sat for a number of these sittings, we have taken part in a sittings or a longer sitting? How many separate sittings make a meeting or is a meeting a sittings?

Mr B. Collins: Bloody hell!

Mr SPEAKER: Order! The honourable member for Arnhem must restrain himself. That language is unparliamentary and I am almost sure the question is too!

956.829—27

ANSWER

I have had some prior knowledge of the question and I suspect there is more bark than bite in the member for Tiwi's question. Through her dangerous past-time as a kennel-keeper - and she has the marks to prove it - she will have noticed that dogs sit to howl while, when we are sitting here, we are required to stand to speak. Most of the answers to the member's question are in the Standing Orders with the exception of her reference to a 'meeting' which is un-defined. A sitting means a daily sitting which in itself may constitute a meeting but is, more often than not, one of a series of sittings, which together are referred to as 'the sittings' or 'a meeting'. I draw the honourable member's attention also to the term 'sit-in' or 'sit-ins' which, while undefined, was a practice indulged in at one stage of this legislature's history. It is not to be confused with a 'sitting' or 'sittings'. I hope that answers the honourable member's question and that there will not be much more levity today.

Distribution of Daily Hansard

Mrs LAWRIE to SPEAKER

I refer to the practice of distributing the unrevised restricted Hansard to large numbers of government departments prior to members having the opportunity to correct what can be quite dramatic errors. I would ask you, Sir, if you would consider discontinuing this practice, even for an hour or so, to allow members to indicate corrections because departments quite often get the wrong information from Hansard if it is uncorrected? I appreciate that the public and press copies must go out.

ANSWER

If the honourable member will place her objections in writing, I will certainly look into them.

School Crossings

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

Does the government, or the Road Safety Council specifically, have any plans - in the interests of safety of children crossing to and from school at cross-roads - to encourage school councils to form unpaid volunteer groups to monitor the situation every day?

ANSWER

Mr Speaker, the Road Safety Council is currently reviewing all school crossings throughout the Northern Territory. Alice Springs members will be aware that presently their schools are being monitored by volunteers from the school staff or parents. When this review has been completed, a recommendation will be made to me either to continue the practice throughout the Northern Territory or adopt some alternative. This question is under review and when the Road Safety Council has made a recommendation to me I will consider it.

Control of Feral Buffalo

Mr B. COLLINS to CHIEF MINISTER

What plans does the government have to implement the recommendations of the Feral Animal Inquiry in reference to controlling feral buffalo?

ANSWER

Mr Speaker, I can answer the question in a general sense only because I believe the details are being worked out and developed between the Department of Primary Production and the Conservation Commission. I understand a number of seminars have been held on the buffalo problem since the feral animal report was tabled in this Assembly. I understand that the government is working towards

eventual implementation of the recommendations of the report in relation to feral buffalo. If the honourable member would like to place the question on notice, I will undertake to give to him greater detail of the actual steps that the Conservation Commission, which is within my responsibility, is taking towards this end.

Arltunga Gold Field

Mr BELL to CHIEF MINISTER

What action is being taken to preserve the old Arltunga gold field as an historic settlement as was reported in the Centralian Advocate of 19 July?

ANSWER

From this question, I gather that the honourable member has not been to Arltunga. I understand work has been in progress for many years. The proposal of the Northern Territory government to which he refers was formulated by Cabinet at its last meeting in Alice Springs. It related to the preservation of the Victoria Settlement to which the honourable member for Nightcliff referred in the adjournment debate yesterday afternoon. The Northern Territory government has put forward a proposal to the Bicentenary Authority that the government should share costs with the Bicentenary Authority, which I understand has or will have funds allocated to it for this purpose, to expend funds through the authority on what it considers to be worthwhile projects to mark Australia's bicentenary. It was thought by the Northern Territory that the 2 most worthwhile sites to preserve and have work done on so that they would be in a good state of restoration by 1988 are Victoria Settlement and Arltunga. The detailed submission on this is going forward from the Conservation Commission to the Bicentenary Authority. I imagine that the proposal will be on the basis probably of a dollar-for-dollar arrangement. We hope that these 2 proposals will meet with the approval of the Bicentenary Authority and that the government can then formally adopt the proposals for the restoration of Victoria Settlement. When I say 'restoration', I obviously mean limited restoration. It is not proposed to do a colonial Williamsburg on either of them because we are not Rockefeller. We have only limited funds. I would imagine that, at Victoria Settlement, a cottage or 2 might be restored and also perhaps the store pits, barracks, bakery and kitchen. Maps and illustrations could be provided and paths through the ruins. The ruins themselves have recently been cleared of growth and debris. These old settlements would be preserved for posterity and I imagine also that the Conservation Commission would be able to use them as bases for the siting of ranger stations. In addition to their normal tasks, the rangers would have some responsibility for overseeing access to Arltunga and to Victoira Settlement by any visitors.

Oil Field Lease in Central Australia

Mr VALE to MINISTER for MINES and ENERGY

Is the minister yet in a position to advise on the current status of negotiations between the Magellan partners and the Northern Territory government in issuing an oil field lease which ultimately will result in the establishment of an oil refinery in Central Australia?

ANSWER

I am happy to advise the honourable member who has a great interest in this particular project because he has been involved with it himself over many years. I am pleased to say that the department and the principals and partners of the Mereenie project in Central Australia met on 2 occasions last week to discuss the details of the lease agreement that is required between the government and the company and to discuss other matters that are relevant in this particular exercise. I refer to the construction of the oil refinery which the government will be requiring the company to proceed with when it gets into the

development of oil in the Mereenie field. I might add that, before any production starts, there is a considerable drilling program to be completed by the company which will really ascertain the parameters of the field and give the developers a much greater knowledge of what is there and which is the best way to take the product out.

The government has asked that the company adopt a practice of enhanced oil recovery from the field by using injection methods of either gas or water to force out the extra bit of oil in the field. It is interesting to note that, in America, enhanced recovery has only come about in the last few years since the Arab OPEC cartel was formed. Companies and government are now deeply regretting that they did not enforce enhanced oil recovery methods in their oil production technique 40 years ago because it is estimated that, in the early fields that were developed in the 1920s and 1930s, 15% to 20% of the oil is still in the ground and will never be recovered because of the techniques that were used. We have a virgin field and we have said to the company that we want every jot of oil that we can get out of it. It is not simply the company's resource; it belongs also to the people and to the consumers of this country who will have to import oil if we do not use our own. We do not have any difficulty with the company in this matter. It is quite happy to oblige except that there is a very large commitment, possibly up to $100m, before it starts to withdraw any oil from the field. The lease that we are drawing up with the company is being done on the basis of consultation. I would advise the Assembly that the environmental conditions relating to the lease and the environmental impact statement are also being carried out and these will be agreed upon in an agreement separate from the lease. The government will also be requiring the company to put up a bond to maintain some integrity in the arrangements. I would like to advise the Assembly that the matter is very well advanced and I would hope that we can issue the lease in 2 or 3 weeks.

Pularumpi Council

Mr B. COLLINS to MINISTER for EDUCATION

Has the honourable member for Tiwi brought to the attention of the honourable minister the objection from the Pularumpi Council to the proposed reorganisation of the adult education section and, if so, what does the minister intend to do about it?

ANSWER

Mr Speaker, the matter of the internal reorganisation of the Department of Education's TAFE division seems to have caused concern in areas other than Pularumpi. Expressions of concern are fairly widespread. Principally, they are based upon the lack of knowledge of exactly what is proposed. Nonetheless, at this stage, they are only internal proposals of the Department of Education. As honourable members would be aware, the TAFE branch of the Department of Education is a ministerial creation - it was one of my own doings - and I would want to be involved in undoing it, notwithstanding it is a bad idea.

Health Clinic at Napperby Station

Mr BELL to MINISTER for HEALTH

I draw his attention to some information that was provided to me in relation to the provision of a health clinic at Napperby Station. My understanding is that a prefabricated health clinic was provided for Aboriginal people resident on Napperby Station and it has remained in a prefabricated state for some 12 months. Is he aware of this situation and what will he do to remedy the situation?

ANSWER

I am not aware of the situation. I thank the member for his advice. It will be remedied.

Water Supply in Berrimah

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

What are the current plans to connect water to blocks in Berrimah?

ANSWER

My understanding is that most blocks at Berrimah are connected to the water supply. If the member knows of any specific blocks that are not connected, she might inform me and I will investigate and advise.

Rice Production in NT

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

Due to the inadequate information in relation to commercial rice production in the Northern Territory, which led to the abandonment of the project farms in the Adelaide River region, what action has been initiated by the government to correct this deficiency and what are the plans of the department in relation to rice research?

ANSWER

We are trying to improve our knowledge of the technology required to introduce commercial rice farming. To that end, we now have 3 rice agronomists on the staff. Before we embarked on the rice project, we did not have a rice agronomist on our staff, although we were trying to get some at the time. We have been in touch with the International Rice Research Institute in the Philippines. We have had some of our scientists visit there. We have also set up a rice task force comprising most of the senior officials of the department who are involved. We are hoping that the rice production programs will commence next year.

Fault Lines at Palmerston

Mr ISAACS to MINISTER for LANDS and HOUSING

In view of a recent report in the Weekend Advertiser in Darwin, will the Northern Territory minister make a statement in this Assembly to allay fears that fault lines could cause a danger to residents in Palmerston? Can he assure the Assembly that a proper fault lines survey has been carried out in Palmerston?

ANSWER

I am unaware of the reported article in the Weekend Advertiser. I will certainly look it up. If there is any action deemed to be necessary, it most certainly will be taken. I am no geologist, as no doubt the Leader of the Opposition would not claim to be either, but one would have thought that there is no more stable land form in the world than in the Northern Territory. Certainly, I will have the matter investigated.

Alice Springs Hospital Security

Mr VALE to MINISTER for HEALTH

In view of the recent attack on nursing staff in Alice Springs Hospital, what steps is his department or the Alice Springs Hospital Management Board taking to increase security for staff and patients?

ANSWER

Honourable members would recall that earlier this year there was an incident at the Alice Springs Hospital that gave concern to the Alice Springs Hospital Management Board and to members of this Assembly about the security of the hospital and its patients and staff. Several investigations were undertaken by the department and the board and others as to how the security of the hospital and the people working within its confines could be maintained at the highest possible level. In the last day or 2, there has been another breach of security or intrusion on a person's safety by a member of the Alice Springs community. One of the staff was assaulted for not admitting a person to the hospital when the person thought that he or she should be admitted to hospital. Again, this has caused concern to all parties involved in the administration of the hospital.

As a result, I believe it is intended that all doors into the hospital will be closed at 8.30 pm with the exception of the Casualty door. In the case of Casualty, a security guard will be on duty at the entrance between 8.00 pm and midnight from whence the door shall be locked. It should be noted that all visitors attending the hospital after 8.30 pm will be required to have an identification issued by the hospital management. These would seem to be pretty tough remedial steps taken by the administrative authorities of the hospital but there seems to be little other recourse. I point out that some hospitals in the Territory for some years now have been closing their doors at night at 9 pm and opening by key from the inside only when the staff were satisifed there was a bona fide patient on the outside. In fact, security of the staff has been a matter of concern in some places. I am aware that there is a problem as far as the management and board of the hospital are concerned. Every step is being taken at this stage to try to maintain the highest level of security for both the staff and the patients.

Debt Collectors for Health Department

Mr BELL to MINISTER for HEALTH

I preface my question by drawing the attention of the Assembly to advertisements that have been placed in newspapers calling for debt collectors to apply to collect bad debts on the introduction of the new health charges after 1 September. How many firms have responded to these advertisements?

ANSWER

I cannot answer because I do not have the details available to me. I am not even sure that the reply period has closed. If the member places the question on notice, as soon as the information is available, I will see that he gets it.

Horsemeat Sold as Beef

Mr LEO to MINISTER for PRIMARY PRODUCTION and TOURISM

Given the recent disclosure that consumers in Victoria have been paying for beef and receiving horsemeat, can he guarantee that consumers in the Territory are getting what they pay for when they purchase meat?

ANSWER

Mr Speaker, I would like to give the honourable member that assurance, but there is no way to guarantee what he asks. It is, indeed, unfortunate that there has been publicity concerning this horsemeat. In particular, last night, I noticed on the news that it is suggested that perhaps Northern Territory horsemeat could be involved in the recent export of this type of meat to the United States under a different carton brand or a different carton description. We have no knowledge at all of any horsemeat that may have gone into cartons that would have become involved in this export shipment.

Fire Control Services in Aboriginal Communities

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

What plans are there for establishing and reviewing fire control services in Aboriginal communities?

ANSWER

Mr Speaker, the question of fire control services in Aboriginal communities is being investigated at the moment by the Director of Fire Services. Upon receipt of his report, I will provide that information to the honourable member for Tiwi.

Midwifery Course for Northern Territory Hospitals

Mrs O'NEIL to MINISTER for HEALTH

Has consideration been given to the introduction of a midwifery course for nurses in Northern Territory hospitals?

ANSWER

Mr Speaker, I am aware that, for some time, various sectional groups within the community have been pressing for the introduction of a midwifery course in the Northern Territory. In fact, I have received representations from the nurses in Alice Springs that such a course should be introduced there to try to create some decentralisation in the department's tutoring and learning systems. I do not have any particular feeling one way or another, whether the course is established in Alice Springs or Darwin, although I guess, in numerical terms and from the practical experience side, Darwin would be the obvious place to have the midwifery course established. It is not the government's aim to have everything in Darwin just because it suits some people. Every consideration will be given to the proposal to have such a course in Alice Springs. I would like to advise also that I have recently asked the department to make a total review of all the courses that we operate for nursing aides, nursing sisters, Aboriginal health workers, dental trainees and others. In view of the level of education that we now have in the department, I believe it is time to review what we are doing and where we are going. I have also asked the department to provide me with a report on what it sees as the manpower requirements for nursing and the administration of medicine during the 1980s so that we can proceed in the 1980s with a sound appreciation of where we are going.

I would like to point out to the honourable member some of the difficulties that I see in some of the courses which we have established. The Aboriginal health worker training program is an excellent concept and is working very well. It has been operating in some places in the Territory now for about 10 years. While our Aboriginal health worker training program is designed to enable us to hand over health centres in remote places to Aborigines in the future, we are reaching a stage where the Aboriginal health workers reach a level of training and perfection and then desire to be teachers.

Mrs Lawrie: Why don't you answer the question?

Mr TUXWORTH: The honourable member for Nightcliff has asked whether I would like to answer the question. I am trying to give a full answer relating to the whole aspect of training medical staff in the Northern Territory. If she is not interested, I understand that and I will not take any more of her time.

Old Naval Headquarters

Mr HARRIS to MINISTER for TRANSPORT and WORKS

Bearing in mind the approaching wet season, is he able to inform me if work on the old Naval Headquarters, the building which will house the Administrator's office, is proceeding according to schedule?

ANSWER

Mr Speaker, I drive past the old Naval Headquarters daily and I perceive that there are many workmen on site. I think the construction is proceeding as scheduled.

Sale of Housing Commission Homes in Nhulunbuy

Mr LEO to MINISTER for LANDS and HOUSING

Can the minister yet say when Housing Commission houses will be available for sale to interested tenants in Nhulunbuy?

ANSWER

The short answer to the question is no. The honourable member and I had a fairly lengthy discussion on the subject. At least, it was lengthy by the standards of the discussions between myself and the opposition. It would be very helpful if other members on that side of the Assembly would take the trouble he does to outline the difficulties as he sees them. I am fully aware of his concern to provide Housing Commission accommodation in that centre. He is no doubt by now fully aware of my equal concern and the fact that there has been no appreciable change in the position. The same difficulties with land tenure still apply. It will take a major effort on everyone's part to overcome them.

Commercial Production of Fruit and Vegetable Crops

Ms D'ROZARIO to MINISTER for PRIMARY PRODUCTION and TOURISM

What programs are proposed for large-scale commercial production of fruit and vegetable crops for export?

ANSWER

The export of fruit and vegetables is of great interest to all members. We realise our position in regard to the domestic market. Obviously, we would have to service both markets with plans that have to be tested. The main plan that the government is looking at is strengthening first the horticultural section of the department and then looking at the varieties that might be of commercial value to the Northern Territory. I evidence this in the recent purchase by a Queenslander of Manbulloo Station and his proposal to establish 25,000 mango trees here. Other people have come to see us about the establishment of various orchards and we look forward to these plans being consummated.

Women's Centre in Bath Street

Mr D.W. COLLINS to MINISTER for LANDS and HOUSING

Has a decision been made by him on what to do with the old Women's Centre block in Bath Street, Alice Springs? If so, what are the plans?

ANSWER

Mr Speaker, no.

Daly Street Basketball Court Site

Mr ISAACS to MINISTER for LANDS and HOUSING

Has any developer approached the Northern Territory government proposing to use Darwin's Daly Street basketball court site? If so, who is the developer and what is the proposal that has been put to the government?

ANSWER

It may well be a case of the Leader of the Opposition knowing something that I do not know. I certainly know of no such application but I will check it out and inform the honourable gentleman later.

Tennant Creek Town Plan

Mr BELL to MINISTER for LANDS and HOUSING

I preface my question by drawing the Assembly's attention to the fact that some business people in Tennant Creek claim that delays in producing a new town plan have lost them many thousands of dollars and the town the benefit of their proposed services. Why has there been a delay in the production of the town plan for Tennant Creek and what action will be taken to ensure that such delays do not hamper the proper development of the Territory and Tennant Creek in particular?

ANSWER

As usual, the honourable gentleman has it all wrong. The fact is that the Tennant Creek town plan - that is, the new town plan - is in operation. That is one error. The other is that the production of the new town plan had nothing to do with any delays involving the changing of zoning in the Tennant Creek area. What happened was that, under the old town plan, applications for rezoning were processed in the normal way in accordance with the Planning Act and those rezonings occurred as and when they came through the system in the manner determined by this Assembly when it passed the Planning Act. The new town plan is in operation.

Sand and Gravel Mining in Rural Area

Mrs PADGHAM-PURICH to MINISTER for MINES and ENERGY

What is being done to reduce the disturbance caused by the activities of sand and gravel miners in the Darwin rural area?

ANSWER

This matter has been before the Assembly many times. I would like to advise honourable members that the Department of Mines and Energy now has 3 inspectors on site in the rural area and they have now started using helicopter surveillance to drop in on people who are doing things that they should not be doing. This new method of surveillance seems to be having the desired effect. It would appear that the amount of illegal mining is decreasing rapidly.

Nabarlek Mine Spillage

Mr B. COLLINS to MINISTER for MINES and ENERGY

On Wednesday of last week the minister expressed his concern that the manager of Queensland Mines had denied that a run-off had taken place and described the action as 'crazy'. The following day, the minister told the Assembly that he understood the manager knew nothing of the incident. Could he advise the Assembly which is the correct story?

ANSWER

On the first day, I was referring to comments that the honourable member for Arnhem had made in his adjournment debate. I was making the point that I understood that the acting manager or the manager, whoever was on site at the time, had denied that certain actions had taken place or that certain events had occurred. I think I was alluding to the fact that I felt it was crazy to make a denial if things had happened. That is the perspective in which the remarks were made. If the honourable member has any difficulty with that, I would ask him to place the question on notice.

Darwin Trader

Mr HARRIS to MINISTER for TRANSPORT and WORKS

We have been given another reprieve with the Darwin Trader service. Has the government taken any steps to ensure that a regular shipping service to the eastern states is maintained in the future?

ANSWER

As I informed the Assembly last week, I understand that Department of Transport and Works officers had been having discussions with Australian National Line, TNT and other parties that might be interested in providing an east coast service in the Northern Territory. Now that we have the reprieve until September 1982, it is my intention to pursue those negotiations with such companies as are interested in providing a service without subsidy to the Northern Territory.

Chemical Control of Noxious Weeds

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Given that chemicals are widely used for noxious weed control, what is being done to ensure that the environment is not suffering from this treatment - for example, the fish in waterways?

ANSWER

The weed problem that the honourable member touches on is of vast proportions in the Northern Territory. In fact, I do not know of a waterway that does not have one or other of our noxious weeds. Of course, the spraying of some of the introduced weeds that we are trying to contain and eliminate would impact on some of the waterways to the extent of that particular chemical. I think that both sides of the Assembly are in agreement that some of those weeds must be sprayed and they must be kept out of the Northern Territory.

Treatment for NT Patients in Southern Hospitals

Ms D'ROZARIO to MINISTER for HEALTH

Under what conditions may Northern Territory patients be referred to southern hospitals for treatment and what financial assistance is available to such patients?

ANSWER

There are several schemes under which Northern Territory patients can be

referred interstate. One is an internal scheme where patients of the department who are believed to be in need of special hospital treatment in another state can be transferred at the department's expense to another state for that treatment. I might cite the instance where most of the patients in the Northern Territory who need intra-spinal treatment are sent by agreement between New South Wales and the Northern Territory to the spinal unit in the Royal North Shore Hospital. We send other patients to other states where those states have a speciality that we think we can use. That is an internal arrangement.

The other option is for any person who is referred by his doctor to a specialist in another state. Where that specialist is not available in the Northern Territory, that person can be compensated under the Commonwealth IPTAAS scheme. But that is often a matter between the patient and the 2 doctors. In the case of private doctors, where the department uses the IPTAAS scheme - for instance, sending somebody from Katherine to Adelaide - then the department takes care of the IPTAAS arrangements. I think the process is that we pay the fares and get the money back from IPTAAS in the course of time.

Nabarlek Mine Spillage

Mr B. COLLINS to MINISTER for MINES and ENERGY

The minister issued a press release yesterday in which he said: 'The ponds and water system at the Nabarlek mine have done exactly what they are designed to do'. He went on to say that this was done to the satisfaction of the Supervising Scientist. Does he mean by that statement that the ponds and the water system at Nabarlek operated within the parameters laid down by the design specifications?

ANSWER

I ask the member to place his question on notice.

Sadadeen Primary School

Mr D.W. COLLINS to MINISTER for EDUCATION

Is the construction of the Sadadeen Primary School stage 1 on schedule?

ANSWER

I indicated during the course of last week's sittings that the contracts for all of those primary schools were let at the same time. I understand, however, in respect of Sadadeen stage 1 project that it could be a month late on current predictions. In other words, the opening could occur in April instead of at the end of February.

Local Government Maintenance of Private Land

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

Is it proposed that local governments be given power to supervise standards of maintenance of private land following the passage of the freeholding legislation and the consequent removal of covenants?

ANSWER

Mr Speaker, the government supports very strongly the involvement of local government in the maintenance of private land. I am just trying to recall if I have already introduced a bill during these sittings amending the bylaw-making powers of local government and providing powers for local government to adopt model bylaws, which are being prepared by the government, if they so wish. The short answer is yes. We see much greater involvement of local government in keeping cities clean.

Donkey Camp Project at Katherine

Mrs LAWRIE to MINISTER for PRIMARY PRODUCTION and TOURISM

This is the same question I asked last week and I hope that I receive a different answer. It refers to the projected pumping of 30 million gallons of water per month from the Donkey Camp area of the Katherine River. I ask him again: what steps have been taken to protect farmers who need the water to continue the farming projects they have started along the banks of the Katherine River?

ANSWER

The answer I gave last week related to new farmers in new projects electing to sink bores. It had nothing to do with the existing farmers. I have since received a telegram from all those concerned farmers in Katherine pondering about my reply last week. Now they have that reply. The rest of the question involves the portfolio of my colleague, the Minister for Transport and Works.

Supervising Scientist's Report on Ponds at Nabarlek

Mr B. COLLINS to MINISTER for MINES and ENERGY

Is he aware that the office of the Supervising Scientist prepared a report on the run-off pond at Nabarlek which clearly stated that the company was operating that pond outside of the design limits?

ANSWER

I would ask the member to put the question on notice. Let me say that I was in contact this morning with the Supervising Scientist. Just by chance, I happened to raise with him the matter of Nabarlek spill. I would like to advise the honourable member that the general consensus, and I agree with it, is that the whole matter is a storm in a teacup. The Supervising Scientist has similar sentiments about the whole thing. I have taken a stance from day 1 of being completely frank and open about all the things that happened and were alleged to have happened at Nabarlek. In fact, I have organised a departmental briefing of the Sessional Committee on the Environment. We had an hour to bring them up to date on the sequence of events and all the allegations that have been made. Mr Speaker, I do not have a problem. If the member has a problem with it still, I would suggest that he place further questions on notice and we will deal with them on that basis.

Effect of Beef Export Rumours on Industry

Mr LEO to MINISTER for PRIMARY PRODUCTION and TOURISM

Has the scandal surrounding beef exports to the USA had any effect on the Territory's beef trade and, if there has been an effect, what does he intend to do about it?

ANSWER

Mr Speaker, there has been no effect on the beef trade in the Northern Territory to date.

Government Printing Office Apprenticeship Scheme

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

Can he tell me the progress made since the start of the apprenticeship scheme in bookbinding, printing, graphic reproduction and composition as part of the operation of the Government Printing Office?

ANSWER

At the moment, the printing office employs 9 apprentices and these apprentices attend a technical college course in Brisbane on a 7-week block release

period per year. To date, I believe the results have been exceptional. Out of a total of 16 examinations, the Government Printing Office apprentices have achieved 9 honours, 5 credits and 2 passes, with no failures. Each section of the Government Printing Office now has at least 2 apprentices. Due to the difficulty associated with recruiting technical staff, the Government Printer has indicated that he intends to place further emphasis on local training.

Housing Commission Rents

Mr ISAACS to MINISTER for LANDS and HOUSING

Is it the intention of the government to increase Housing Commission rents in the near future and, if so, to what extent? Is there a program of increases planned to achieve market rent?

ANSWER

Mr Speaker, I will be seeking leave to make a statement on this matter at the appropriate time this morning.

Batchelor Airstrip and Meneling Abattoir

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

Is he aware of the confrontation between certain interests which use the Batchelor airstrip and the Meneling Abattoir?

ANSWER

I am not aware of any confrontation between those 2 organisations. However, I will attempt to find out and provide the member with the information she seeks.

Donkey Camp Project at Katherine

Mrs LAWRIE to MINISTER for PRIMARY PRODUCTION and TOURISM

My question is asked on behalf of Katherine farmers Beech, Lindler, Lansdowne, Murphy, Radunz, Sweetman and Phillips. What action will his department take to ensure the continuance of their water supply - some of the farmers have riparian rights and others have a licence to irrigate by pumping from the river - once the 30m gallons pumping scheme from the Donkey Camp area commences and their water supply is put at risk?

ANSWER

Cabinet met in Katherine about 5 weeks ago. We discussed quite a few issues with the locals who made representations to us. The drawing of water from the Katherine River was not one of those representations at the time although we did have one of those names on that telegram. That person came to see us about rural education. The extent of the problem that the honourable member is talking about is unknown to myself and to my colleague, the Minister for Transport and Works. If there is a problem, and I accept what the honourable member has to say, it obviously must be looked at. I suggest that the minister and I should talk to the farmers to see how extensive the problem is.

Increase In Housing Commission Rents

Mr BELL to MINISTER for LANDS and HOUSING

Is it true that Housing Commission rents are to rise by 15%, as reported in the Star newspaper today?

No answer given.

Upgrading of Stuart Highway in Alice Springs

Mr VALE to MINISTER for TRANSPORT and WORKS

Could the minister advise what proposal the government has to upgrade the Stuart Highway through Heavitree Gap in Alice Springs and south of that area?

ANSWER

Mr Speaker, hopefully work will commence in that area in 1982-83, subject to budget considerations.

Environmental Impact Study on Child-Minding Centre

Mrs PADGHAM-PURICH to MINISTER for LANDS and HOUSING

I preface my question by saying that an environmental impact statement is being called for regarding the setting up of a small child-minding centre in Howard Springs. Is it the usual practice to ask for an environmental impact statement when setting up such an innocuous business as a child-minding centre?

ANSWER

Mr Speaker, I thank the honourable member for the question. Certainly, I cannot imagine under what circumstances one would want to call for an environmental impact study on a small child-minding centre. On the face of it, it seems to me that it might border on a degree of lunacy notwithstanding it is within my area of responsibility. Mr Speaker, I most certainly will investigate such a matter and, if the honourable member's allegation is correct, see that some sanity prevails.

Access Road to New Air Terminal in Darwin

Mr ISAACS to CHIEF MINISTER

Has Rothdale Road in Darwin been chosen as the main access to the new civil airport terminal and, if not, which road has been so chosen?

ANSWER

Mr Speaker, I am not aware that Rothdale Road has been chosen as the principal access to the new Darwin air terminal. I think that traffic proceeding to the new Darwin air terminal will have to use McMillans Road. I understand that access and egress from both directions along McMillans Road will be provided by roads that exist from RAAF land somewhere in the vicinity of the intersections of Rapid Creek Road and McMillans Road and Lee Point Road and McMillans Road. I am not totally conversant with the matter. It is the subject of a joint working party between Commonwealth officials, Territory officials and the Darwin city council but I do understand that that is the proposal that has been agreed on.

Sole Brothers Circus

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

Can he advise the Assembly of the amount and conditions of any assistance which the government has given to the Sole Brothers Circus which is in town at the moment?

ANSWER

After a lengthy period of negotiation the government agreed to pay a subsidy to bring the Sole Brothers Circus to the Northern Territory. One of the conditions that the Northern Territory government placed on such assistance was that the circus conduct performances in Alice Springs. It was originally intended that the circus could come through Mt Isa to Tennant Creek to Katherine and Darwin. The company sought some $10,000 for subsidy for transportation costs primarily on the basis that they would limit their entry charges to the rates that are applicable in western Queensland. In addition to agreeing to provide a performance in Alice Springs, the circus also agreed to provide a special family discount for 2 adults and 2 children, a free performance for all handicapped persons, a gala premiere for invited guests and community performances of individual acts for the Casuarina Hospital and the City Mall. It also agreed to provide a full circus parade on Saturday 29 August and to display the circus animals free, which is not always the case when the circus performs apparently. There are other sponsors of the circus as honourable members will note from newspaper advertisements. The government felt that, in providing taxpayers' funds to subsidise the bringing of the circus to the Territory at this particular time

- which is fairly convenient because it is the school holidays - we would rather spread it as much through the Territory as we can. Thus, we insisted that Alice Springs be included in the itinerary.

Fuel Tankers on City Roads

Mrs O'NEIL to MINISTER for TRANSPORT and WORKS

Has the movement of large fuel tankers on major city roads in peak hours been restricted in accordance with the recommendation of the Road Safety Council?

ANSWER

At the moment, the department is looking at some of the recommendations of the Naaska-Ervil Committee. I will be making recommendations to Cabinet in possibly October or November regarding the movement of semi-trailers and triple bogey trailers in the city area. There is a limited use of double bogey trailers in the city area during certain times during the week.

Railway Crossing in Alice Springs

Mr VALE to MINISTER for TRANSPORT and WORKS

Can he advise the government's proposal regarding the upgrading of Larapinta Railway Crossing in Alice Springs? Does the upgrading proposal include the installation of traffic lights?

ANSWER

Certainly, it is the government's intention to upgrade the crossing at Larapinta Drive. The subject of traffic lights is still under consideration. The upgrading will relate to future budget considerations of the 1982-83 financial year.

Palm Leaf Beetle

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

Do any quarantine measures exist in the Territory for controlling the movement both inter and intra Territory for palms in respect of the palm leaf bettle?

ANSWER

No.

Donkey Camp Project at Katherine

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

My question concerns the proposal to pump water from the Donkey Camp area in the Katherine River. Is the honourable minister aware that the earth works associated with this project may well cause silting downstream and, if so, what steps are being taken by his department to mitigate this silting?

ANSWER

I thought that I provided that information to the honourable member last week. However, the Katherine River Advisory Committee will be meeting with the department this Friday to discuss all the problems raised in questions that the honourable member for Nightcliff has put to both the Minister for Primary Industry and Tourism and myself during these sittings.

Interstate Treatment for NT Patients

Ms D'ROZARIO to MINISTER for HEALTH

Are the current arrangements for referring Northern Territory patients to interstate hospitals for treatment likely to change as a consequence of the introduction of new health charges on 1 September?

ANSWER

I have no knowledge of any change in the current arrangements at all.

Use of Modern Technology in Oil Fields

Mr D.W. COLLINS to MINISTER for MINES and ENERGY

Modern technology applied to oil fields can enhance recovery by a large amount. Through discussions with the energy adviser, I believe in some cases it can be up to 4 times as much. What does the minister intend to do to ensure that developers use the most modern technology to obtain the maximum quantity of oil from the ground for present and future Territorians?

ANSWER

I touched on this matter briefly the other day during question time. I think that it is suffice to say that the government will be requiring developers of any field in the Northern Territory to carry out in the first instance a comprehensive exploration program with seismic and drilling activities to delineate any resource to a degree that satisfies the technical people within the department. Having delineated a field, a developer must submit a proposal of how it would propose to get every last drop of oil from the field.

As I said the other day, there are practices that have only been developed since the oil price hike during the 1970s. We would be expecting any developer in the Northern Territory to use these enhanced oil recovery practices - such as pumping water and gas back into fields to drive out the reservoir oil - to whatever degree is necessary and is economically viable. It does not take a great deal of imagination to realise that, when oil is about $30 a barrel, one would not have to get many barrels back in extra recovery to pay for the cost of an enhanced recovery program.

Nhulunbuy Community Health Centre

Mr LEO to MINISTER for HEALTH

Can he give an assurance that services at the Community Health Centre in Nhulunbuy will not be downgraded?

ANSWER

Most certainly, Mr Speaker.

Dairy Cattle at Elizabeth River Dairy

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Could he advise the results of the records and milk samples of the dairy cattle belonging to the Department of Primary Production at the Fitzgerald's Elizabeth River Dairy?

ANSWER

I ask the member to place the question on notice.

Subsidy to Youth Organisations

Mrs O'NEIL to MINISTER for YOUTH, SPORT and RECREATION

Have guidelines for the 3 in 1 subsidy to youth organisations for capital works, which was announced by the minister last year, yet been determined?

ANSWER

Only this week, the department provided me with draft guidelines which I am examining now. When I am in a position to make an announcement regarding what the guidelines will be, I will do so.

956.829--28

Sealing of Roads from Winton

Mr VALE to MINISTER for TRANSPORT and WORKS

I ask this question on behalf of the member for Elsey. Can he advise whether his department will press for the completion of sealing of the Winton-Boulia Road and the sealing of the Winton-Cloncurry Road as further all-weather links to the east coast?

ANSWER

The roads mentioned by the member for Stuart are roads we are pressing the neighbouring states to complete. We are constantly pushing the federal government to provide financial assistance to the South Australian government to complete the South Road. Our main priority in funding will be the national highway, the Stuart Highway in the Northern Territory. However, I will take on board the comment made by the member for Stuart and relate it to the neighbouring states.

Alcohol Abuse in Northern Territory

Mr HARRIS to CHIEF MINISTER

At what stage are the government proposals to counter the very serious problem of alcohol abuse in the Northern Territory?

ANSWER

Mr Speaker, the government is still receiving submissions from various interested organisations. On Monday of this week, I received oral submissions from the Licensed Victuallers Association, I think it is called, and its solicitor. On the same day, I had a conference with members of the Darwin and District Alcohol and Drug Dependence Foundation. It appears that submissions will continue to come in for a further period. We received a preliminary submission from the Darwin and District Alcohol and Drug Dependence Foundation and, on the basis of that, I had this conference with members of that organisation. They propose to put in a further submission in another 3 or 4 weeks. I imagine that, by the end of September, the government will be able to look at the various submissions that have been received including, I should mention, one from the Leader of the Opposition. We should then be in a position to make further recommendations to Cabinet in the form of a submission which can precede the development of legislation which I hope can be introduced into this Assembly in the November sittings. In February, I should imagine, the legislation will be able to be debated.

Registration of Yipirinya School

Mr B. COLLINS to MINISTER for EDUCATION

Could he advise if there has been any progress with the application for registration of the Yipirinya School in Alice Springs?

ANSWER

Mr Speaker, I understand that a formal proposal has been put by the Yipirinya School Council to the Department of Education through the southern regional office and that a meeting has taken place between the people who are, shall we say, organisers of Yipirinya School and the department's senior officers. I also understand that quite a lot of interest was shown by the federal committee on Aboriginal education while it was in Alice Springs and that that particular committee had many critical questions to ask.

Conservation Commission Free Trees

Ms D'ROZARIO to CHIEF MINISTER

Is he aware that the Conservation Commission has discontinued the practice

of providing trees free of charge for public buildings and spaces and will he ensure that this practice is resumed as soon as possible?

ANSWER

I am not aware that the Conservation Commission has discontinued the practice of providing trees free of charge for public buildings and spaces. I will look into the matter. I certainly will not give any undertaking to the Assembly in relation to the matter until I have discussed it with the Conservation Commission which, after all, has a measure of autonomy in its decisions. Presumably, if this is the case, there must be some good reason for it. The commission has given away many thousands of trees in all Territory centres in the course of the past several years. It may be that it is finding that a drain on its resources. Often things that are given away are not appreciated quite as much as those things that one has to pay a little for. In any event, I will look into the matter. Perhaps the honourable member might like to put the question on notice and she will receive a detailed answer in due course. Alternatively, she could write me a letter.

Health Insurance for Chronically-ill Patients

Mr D.W. COLLINS to MINISTER for HEALTH

Is it true that health funds can refuse membership to the chronically-ill? If so, what options do chronically-ill patients have in regard to health insurance?

ANSWER

The honourable member raised this matter with me yesterday afternoon. I have asked him to bring it to the notice of the Assembly this morning during question time because it does have serious ramifications for some people in our community who have continuing disabilities. I would like to answer the question in this way by saying that it is essentially a federal Health Department matter as the health insurance funds operate under the provisions of the federal Health Insurance Act over which various states have no jurisdiction whatsoever. However, it is my understanding as a result of information received from the Commonwealth Department of Health that various health funds are obliged to accept patients with pre-existing conditions to their fund upon application. The patients are only eligible for basic level insurance. In view of this, it is also my understanding that funds set their own rules for acceptance to the higher tables of the chronically-ill.

The important point under the federal legislation is that funds must take on at basic level insurance chronically-ill patients as well as those with pre-existing conditions. I bring this to the attention of members in case any member comes across a constituent with a pre-existing illness who has been disadvantaged deliberately by a fund or its policy. If the member is not getting any satisfaction with a fund and could use the assistance of the department or myself in overcoming the problem, I would like him to take the opportunity to come to us in the first instance.

Debtors in NT Prisons

Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

I preface my question by drawing attention to remarks already made in this Assembly about the possibility of defaulters under the proposed change in health arrangements. How many debtors are currently in prison in the Northern Territory jails?

ANSWER

I do not think that I could reasonably be expected to have that information at hand without any forewarning whatsoever. I ask the honourable member to place the question on notice.

Nhulunbuy Community Library

Mr LEO to MINISTER for EDUCATION

Has the Department of Education received any report on the function of the community library in Nhulunbuy and, if so, how well does that library function as a school facility?

ANSWER

I am unaware of any particular report which the department may or may not have in respect of the operation of the community library. Nonetheless, when I was over there in company with the Chief Minister for the purpose of opening the Nhulunbuy High School, I had some discussion with the librarian on, shall we say, the civilian side and also the teacher librarian on the school side. I gained the impression from them that the community library side is very satisfactory indeed but there may be some problems so far as the school is concerned, particularly with space. This is something that we will be monitoring very closely and take whatever remedial action is necessary. Certainly, I think that the town is very happy with it. The teacher librarian can see small difficulties in terms of trying to run classes while the community is actually using the library. It requires close cooperation between the 2 people who operate the library. They are both librarians and I am quite sure that they are as anxious as we are to see the best possible use made of the facility.

Northern Territory Taxes

Mr HARRIS to TREASURER

The Treasurer will be aware of claims in this morning's news by the Leader of the Opposition that Territory taxes will be increased by some $32m. Can the Treasurer inform the Assembly whether this is correct?

ANSWER

I am aware of the report the honourable member refers to. The allegation has concerned me a little because it is a misrepresentation of the facts. Of the $32m which is expected as increased Northern Territory revenue this financial year, some $3.2m has been attributed to increases in taxes and proposed new taxes in the Territory. The other $27.7m will result from growth in existing taxes and charges through hospital fees which prudent Territorians will recover from health insurance. To claim that natural growth and things like payroll tax, income from land sales, income paid to the Territory by interstate governments for lottery sales in the Territory, mining royalties and even interest earned by government deposits are new imposts on Territorians is gross misrepresentation. Having regard to the fact that the proposed increases are the first in about 3 years and that average earnings in the Northern Territory have risen during that period by 37%, the $4.3m additional revenue which the Territory will be receiving amounts to about the cost of a steak sandwich per head of population per week. I do not think that the charges that the government is proposing are at all unreasonable. But I do take some exception to the way matters such as budget figures are misrepresented in the community in that they convey a quite false impression.

Department Officers at Horticultural Convention

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Following the government's public announcement of its encouragement for a Territory horticultural industry, were any Department of Primary Production officers present at the third national convention organised by the Australian United Fresh Fruit and Vegetable Association understanding that the 4-day discussions involved growers, wholesalers, retailers, transporters and those working in packaging?

ANSWER

I authorise a fair bit of travel for officers to go to interstate conferences. I certainly do not recall approving travel for that conference although I may have.

Tourist Commission Audio-visual Road Show

Mr VALE to MINISTER for PRIMARY PRODUCTION and TOURISM

Could he advise on the effectiveness of the Tourist Commission's audio-visual road show which is presently touring south-eastern Australia?

ANSWER

The audio-visual presentation forms one of the principal areas of the Tourist Commission's 1981 promotional campaign. The road show began the national tour at the Albury Trade Fair in July and was watched by an estimated 15,000 of the 28,000 people who attended the week-long affair. Since then, the audio-visual has been watched by 500 people at Southport, 600 people at Brisbane, 500 people at Toowoomba, 550 people at Newcastle, 800 people in Sydney where it was part of a Pacific area travel association conference and 400 people in Canberra. The presentation is now in Melbourne where it is preparing to move to Hobart, Launceston and then to Geelong, Bendigo, Ballarat and Mt Gambier. From there it will go to Perth for a special presentation at the end of September and for the Royal Show and the opening of a tourist bureau in that city before finishing in Adelaide in October. The Tourist Commission has formed the opinion that this audio-visual has been very useful to people requiring information about visiting the Northern Territory.

Magistrates in Alice Springs

Mr ISAACS to CHIEF MINISTER

Is it intended to have 2 magistrates based in Alice Springs in the New Year?

ANSWER

Mr Speaker, I am not in a position to answer that question at this time. I would suggest that the Leader of the Opposition place the question on notice. I can make inquiries of the Chief Magistrate and administrative people in the Department of Law to ascertain what the position will be in the New Year in Alice Springs.

Lot 282 Kemp Street Alice Springs

Mr D.W. COLLINS to MINISTER for LANDS and HOUSING

Has a decision been made on what to do with lot 282, 3 Kemp Street, Alice Springs?

ANSWER

Mr Speaker, I did not even bring my map with me. I will have to advise the honourable member later.

Nabarlek Mine Spillage

Mr B. COLLINS to MINISTER for TRANSPORT and WORKS

I preface the question by quoting from an ABC news report: 'The Acting Prime Minister, Mr Anthony, said today that he was concerned there might have been a breakdown of safety procedures at the Nabarlek Uranium Mine. He told Parliament that there had been a leak of waste material and a delay in reporting it to the Supervising Scientist and was concerned that there might have been a breakdown in the administration that the government has tried to put in place so thoroughly'. Is the minister completely satisfied that the monitoring and test-

ing that is carried out by officers of the Department of Transport and Works is as complete and thorough as is necessary?

ANSWER

Yes.

Humpty Doo Temporary and Permanent High School

Mrs PADGHAM-PURICH to MINISTER for EDUCATION

Has a final decision been made on the siting of the Humpty Doo temporary high school and the Humpty Doo permanent high school and what regard is being paid by officers of the Department of Education to the wishes of the parents' groups in the area concerning the siting of the 2 schools and the interim education of the children?

ANSWER

One almost needs an adjournment debate to cover this issue. Suffice to say that I cannot imagine any project of an educational and building nature conducted by any government anywhere that has taken more notice and spent more time and trouble to comply with the wishes of the community wherever possible. It has been one of the most incredible sagas that I have been associated with and, at times, a very pleasant one. It is good to note the tremendous level of interest of people in the rural area. However, I believe, at times, they have become quite unreasonable in their demands. Indeed, on occasions, they have appeared to me to be rather selfish. The negotiations, particularly those in respect to the high school, commenced in depth in February of this year with delegations to the Chief Minister and myself and continued as late as 12 August with further correspondence.

On my understanding, it has always been agreed that the proposed high school, including any temporary facilities, would be at the Humpty Doo village site. This is where roadworks are being put in at this moment and a water tank is being installed. It is the location decided on by the Rural Planning Authority for the community and village centre where government services will be provided. It was not until 15 June this year that the possibility of establishing the high school at Fred's Pass was first raised by the rural community. I realise and accept some of the advice of the rural people that the Humpty Doo site, in fact, will require fill whereas it is possible there is less of a problem at Fred's Pass. Nonetheless, on balance, it has been decided that the Humpty Doo site is far preferable for the reaons that I have already given. Work will be in progress there and it makes a lot of sense to locate the new high school where those capital works are to be committed in any event. In addition, that is the site of the primary school which is currently under construction. It makes sense to have the 2 in close proximity to each other.

As to the provision of a temporary facility, it is the firm opinion of the Department of Education, which I share, that it will be in the best interests of the students of the rural area to establish a unit in the Darwin High School for the period of construction of the new high school. This unit would have an identity of its own teachers and transfer to the new school upon its completion. Mr Speaker, it is all very easy to say: 'Give us $50,000 and we will put a few demountables at whatever site may be chosen and that will create a high school'. Of course it will not. The cost of locating absolutely minimal facilities, without any specialist facility whatsoever, would be more like $100,000. If we were to place it at Fred's Pass that would assume that the shed is satisfactory for the purpose and all the toilets are satisfactory for the number of students. It is highly unlikely that those facilities would be satisfactory for that purpose. In addition, we have the problem of removing the temporary facilities. What would we do about specialist facilities in the temporary high school? If we were to have a temporary high school, the best it could provide would be humanities subjects. The children would still have to be bussed somewhere else 3 or 4 times

a week to do the specialist subjects - those requiring laboratory facilities, science facilities - and all the other specialised areas of a secondary education.

The level of disruption to the students under such a proposition would be intolerable. In order to provide specialist facilities of a temporary nature on site, the bill to the taxpayer would be in the order of $300,000. Once again, when you no longer need it, you have to shift it. Shift it where? You have installed specialist facilities in a location and they have no use anywhere else because they are of a specialised secondary nature. I suppose one might say that we could shift them to Palmerston and have another temporary school. I think one ought to be a little cautious about providing temporary facilities. Communities ought to be suspicious of governments that do. They have a funny habit of becoming permanent. I do not think there would be anyone here who has not experienced the effects of government saying: 'We will put in temporary facilities'. It thereby overcomes its immediate problem and, with all of the budgetary constraints that face government, it is an awfully easy thing to delay the actual construction of the permanent facility.

The Northern Territory government has determined that there will be a full range of both primary and secondary education for the rural people. We are quite satisfied that the best method of achieving this is the method I have outlined. It is a method which will provide the best possible education to students and the least disruption to their program. I bet no one has thought about the teachers. Until such time as the housing is built for them in the area, we will also have to transport them backwards and forwards from Darwin. Of course, we all know the industrial implications of that - the justified claims for travel etc which would flow. On balance, the decision which the government has taken is the proper one. I thank the people of the rural community for their interest in this matter to date and certainly look forward to a continuing interest in the new education facilities which are being constructed in their area.

Nabarlek Mine Spillage

Mr B. COLLINS to MINISTER for MINES and ENERGY

This question is necessary because of the multiplicity of authorities involved in monitoring the uranium province. In reference to the Acting Prime Minister's statement in parliament yesterday, is he completely satisifed that the monitoring and regulatory procedures under the control of his department are as complete as is necessary for the protection of the Northern Territory's environment?

ANSWER

Mr Speaker, I heard a moment ago the member for Arnhem's interpretation of the Acting Prime Minister's statement in parliament yesterday. It seemed to be a variance with what the news reported this morning. Since I have not seen the Deputy Prime Minister's statement, I would say to the honourable member what I said to him yesterday. If he has any further questions in relation to this matter that he has so much trouble dealing with, I ask him to put them on notice and I will deal with them in writing.

Carpentaria College Site

Mrs LAWRIE to MINISTER for LANDS and HOUSING

I refer to an answer he gave me last week regarding the public exhibition for public comment of the development planned for the Carpentaria College site. Is he yet in a position to indicate whether that plan will be displayed for such comment?

ANSWER

It will be displayed for a 14-day period immediately it is received.

Fisheries Division Program

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

What results are forthcoming from the Fisheries Division program aimed at boosting the total Top End catch; that is, the program looking at Spanish makerel, shark and demersal fish?

ANSWER

I do not have the information to hand. I ask him to put his question on notice.

Tennant Creek Town Plan

Mr BELL to MINISTER for LANDS and HOUSING

I preface my question by mentioning the 18-month delay in gazetting the new town plan in Tennant Creek. Is he aware of the resulting increase in building costs as a result of this delay which, in one case, amounted to some $140,000?

ANSWER

Mr Speaker, I think the honourable member is distorting things somewhat. There was no delay in gazetting the Tennant Creek town plan for a period of 18 months or anything like it. There is no truth whatsoever in that statement. A town plan continually operated until the declaration of the new town plan of 1981. The period of 18 months the gentleman refers to is the period of discussion with the people of Tennant Creek as to what type of plan they wanted. After recommendations were made to me at the request of people in Tennant Creek, certain alterations were made to it before it went to Executive Council. This is the normal manner of dealing with a new town plan as provided for by the act. There was a town plan already in operation and a Town Planning Act available to the people of Tennant Creek to amend that town plan as they saw fit. It would be interesting to trot out the number of amendments to the Tennant Creek town plan put through the Executive Council during that same 18 month period. It is a normal process as I tried to explain to the honourable gentleman the other day. The actual period between the time of recommendation of the town plan to Cabinet and its passage through Executive Council would be more in the order of weeks and that period was used to finally renegotiate or reconsult with business people, in particular in Tennant Creek, as to their requirements. I know that the honourable gentleman has been talking to certain people in Tennant Creek and he may have obtained information from them which has given rise to his quite false impression. I am certainly not saying that he is inventing the matter, Mr Speaker. Nonetheless, the reality is that there has been a town plan in Tennant Creek since about 1972. Concurrently with that, a new town plan was produced and contemporaneously with that new town plan alterations are continually being made to the old one.

Katherine Rural Education Centre

Mr B. COLLINS to MINISTER FOR EDUCATION

Is he aware of quite serious criticisms by the Australian Insitute of Agricultural Science about the Katherine Rural Education Centre. To assist the minister, I must tell him that I understand that Territorian members of this institute had a great deal of imput into this criticism. Has the minister considered this criticism and, if so, will it result in any changes to the plans for the Katherine Rural Education Centre?

ANSWER

Mr Speaker, I thank the honourable member for the question. I am very much aware of the submission put forward by that organisation. Many of those sorts of organisations do target a little bit high and create among their members

expectations which are unreal when viewed in the light of what the Katherine Rural Education Centre seeks to achieve. The content of the suggestions and recommendations of the organisation have been referred to the Katherine Rural Education Centre Council in whom I have great faith from its chairman down. They are the people who want to establish the Katherine Rural Education Centre as quickly as possible. I look to their advice and, if they wish to advise along any of the lines suggested by that organisation - but I believe they will advise very little change from where they believe they are correctly heading - great weight will be taken of such advice.

Children's Week

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

In the past the federal Office of Child Care has made fund available through the Northern Territory government to assist in the celebration of Children's Week in the Northern Territory. This is normally celebrated in October as it is throughout the rest of Australia. Is he aware whether those funds will be available in 1981?

ANSWER

I believe that such funds will be made available again. If I recall correctly, the department recommended to me the organisations which should be put in charge of operating Children's Week in 1981.

Air Fares for NT Public Servants

Mr ISAACS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Can he advise the Assembly of any reviews by the government to withdraw air fare concessions for Territry public servants?

ANSWER

No, I am not aware of any reviews by the government to withdraw any conditions of the public service. Public service conditions are generally handled by the Public Service Commissioner and the consultative council set up with public service unions. I am certainly not aware of any moves by the government to review or withdraw any conditions of the public service.

Industrial Dispute in Katherine

Mr VALE to MINISTER for MINES and ENERGY

Is the minister aware of the suggestion that medical certificates tendered by 2 employees of NTEC in Katherine which were the cause of a recent industrial dispute in Katherine were fraudulent?

ANSWER

I am not aware of any such suggestion. The question would seem to me to raise by innuendo some other questions that might impugn on the character of the people involved. I would not care to make any comment upon it until it has been investigated.

Nabarlek Mine Spillage

Mr B. COLLINS to MINISTER for MINES and ENERGY

At a briefing held for the Darwin media, officers of the Department of Mines and Energy advised the media that it would have been politically desirable had Queensland Mines reported the incident but they had not contravened or breached any of the environmental protection regulations. Can he advise the Assembly if he is satisfied that Queensland Mines in the incident that occurred at Nabarlek had not breached any of the requirements of the environemtnal regulations as stated by his department?

ANSWER

Mr Speaker, the member will recall my request 2 days in a row to put his question on notice.

Mr B. Collins: I am ignoring it.

Mr TUXWORTH: If he is ignoring it, perhaps I can give him a little help again today and suggest to him that he place it on notice. I will deal with it in writing as soon as is practicable.

Child-minding Centre at Howard Springs

Mrs PADGHAM-PURICH to MINISTER for LANDS and HOUSING

Can he give me any further information regarding the environmental impact statement that was requested for the child-minding centre at Howard Springs?

ANSWER

As the member would be aware, the town plan which was drawn up after a lot of publicity and in very close consultation with the rural people provides for a very simple town plan with a range of both permitted and consent uses. As it turns out, I believe that the range of consent uses is somewhat narrow, certainly so narrow as to prevent the exact application of zoning for a child-minding centre. In light of that, I will be contacting the Rural Planning Authority and

directing them to display for public comment a new schedule to the town plan to overcome this sort of difficulty in the future. It would, of course, still require a development application to the Rural Planning Authority in order to maintain appropriate standards and safeguards in that rather sensitive area. However, by doing that, it would eliminate the need for an environmental impact statement for a thing like a child-minding centre.

The officers of my department had been in contact with the applicants for this particular zoning application some time ago and had offered full assistance. Indeed, my officers had arranged with a Catholic priest, who was a friend of the family, to assist them in preparing a 2-page statement on the nature of the roads, traffic densities etc. We would all be aware that there would be no problems envisaged in that type of operation in the rural centre. A child-minding centre would normally have increased traffic about twice a day - when the kids are deposited at the centre in the morning and picked up in the afternoon. The statement would be about the size of 2 A4 sheets of paper. Regrettably, the people did not attend at the office of the Department of Lands as arranged. I understand that they chose to go to the Chief Minister instead and I do not know what that achieved in respect of a statutory provision of the town plan. I do not wish to be critical unnecessarily but I am quite certain that had the good offices of the Department of Lands been availed of, this matter would have been resolved some time ago. Needless to say, there are delays inherent in the town plan.

I know that this matter has been raised by the honourable member for MacDonnell on a number of occasions. I find the delays which are built into the planning system regrettable. I would do anything I could to speed up that process. Indeed, within the existing act, every administrative action is being taken to speed up those applications. I would ask people like the honourable member for MacDonnell to bear in mind that the honourable member for Sanderson, who knows in her left foot more about town planning than he ever will, was in agreement with the type of planning which was finally passed through this place before he showed up here. If he wants to learn a little bit about the nature of town planning, I would suggest he consult with this colleague.

The Department of Lands is willing to assist these people with the most expeditious application to have the permitted use occur. In the meantime, we will be taking action to have a new draft planning instrument displayed in the rural area in an attempt to overcome this sort of unfortunate situation. I do not withdraw one iota from what I said yesterday. It is quite insane to require a person to present an environtmental impact statement for something as simple as a small child-minding centre which will involve something like 6 to 8 children. No wonder people think bureaucrats go mad at times.

Northumberland Insurance Company

Mrs LAWRIE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Can he yet advise what assistance will be given to people who are affected by the collapse of the Northumberland Insurance company?

ANSWER

I have a briefing note somewhere on this very matter in expectation of a further question from the honourable member for Nightcliff. Not wanting to take up the Assembly's time rummaging around for it, I will try to operate on my own. It is there with quite a number of others. I can provide the honourable member with specific information during the course of the day. However, if I recall correctly, the note says something to the effect that the situation is as reported to her last time. The Territory government has committed funds to compensate those persons who were adversely affected by the collapse of Northumberland Insurance Company. The Commonwealth has committed certain funds which it has not specified and we are pushing hard to get figures from the Commonwealth and it

is hesitant because it does not yet know what the liability is likely to be. Unfortunately, at this stage, there is no real progress in the matter but it is one of those matters currently before government on a day-to-day basis.

Employment of Chiropractors by Department of Health

Mrs O'NEIL to MINISTER for HEALTH

Has consideration been given to the employment of chiropractors by the Northern Territory Department of Health if and when legislation to register chiropractors is implemented?

ANSWER

Mr Speaker, I do not think that the honourable member is being facetious. I understand that, in some areas in Australia, it is a practice for hospitals to employ chiropractors. It has not been the case in the Territory because of a very old tradition built up amongst the medical fraternity to try to keep chiropractors on the outside. I see no difficulty with it, Mr Speaker. If it is possible and in the interests of patient health care, I do not have a problem with it occurring in Northern Territory hospitals. I think there would be a few barriers to jump before we get there, most of which would be in the minds of doctors.

Road from Stott Terrace to Undoolya Road

Mr D.W. COLLINS to MINISTER for LANDS and HOUSING

Would he please explain the cause of delays in getting the road from Stott Terrace bridge to Undoolya Road constructed?

ANSWER

Mr Speaker, I recall the honourable member asking this question during the course of the last sittings and I think I gave a fairly lengthy answer to it at that time. As the member would be aware, the planning of that road has been in train for quite some time. The difficulty has been to identify firstly, and then avoid secondly, sites of significance or sacred sites purported to be in the area. At this stage, the Department of Lands is completing a preliminary design in order to try to avoid those known sites of significance. I would imagine that, by the time that new preliminary design comes out, more sacred sites will be found where the new road is designed to go and we may well be back at the drawing board again. Nonetheless, the best endeavours are being made by the Department of Lands and the Aboriginal people, I suppose, to overcome the problem and find some method of providing the access.

Aboriginal Sacred Sites Authority

Mr ISAACS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

What does the Northern Territory government intend to do to ensure the Aboriginal Sacred Sites Authority is given enough funds to carry out its obligations properly, bearing in mind that the budget allocation this financial year is about half that necessary for it to maintain its current levels of operation?

ANSWER

Mr Speaker, I have not had time to look into this matter since there were certain allegations made publicly by the Chairman of the Aboriginal Sacred Sites Authority yesterday. We have allocated to the authority specific purpose funds which have been placed in the Territory government's general purpose fund. This is the first year that they have been placed there so there is a specific amount allocated by the Commonwealth to the authority and that is the amount that has been appropriated to it. The situation may be a bit like some other areas of Commonwealth funding where it has transferred a function to the Territory with a specific amount of funds allocated to it which the Territory government may

believe is insufficient to carry out the service. We will be going back to the Commonwealth on a range of these. As to specific questions relating to the Aboriginal Sacred Sites Authority, I have not had time to investigate the matter or look into the history of its funding to establish what the government's position will be.

Sunday Trading

Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

Given the growing public debate on Sunday trading for retail stores, will the government allow large chain stores to open on Sunday?

ANSWER

It is not a question of whether the government will allow large stores to trade on Sunday but whether the government will stop them. At present, there are no laws or regulations in the Territory which prevent them from opening on a Sunday.

Alice Springs Prison Farm

Mr VALE to MINISTER for COMMUNITY DEVELOPMENT

My question relates to the allegations made yesterday by the honourable member for MacDonnell that no funding is being provided for a prison farm in Alice Springs. Would the minister comment on the budget documents which seem to indicate that some funding has in fact been made available?

ANSWER

The question of a prison farm in Central Australia has created a bit of interest since the question was raised in the budget and in this Assembly yesterday. I can report to members that the government is investigating sites for a prison farm in Central Australia. A site near Alice Springs was considered but was found to have deficiencies and was abandoned. Investigations are taking place to find other suitable sites. Until such time as they are completed, no further announcements can be made. Members will appreciate that to establish a prison farm, which of necessity is somewhat remote from established settlements, factors such as water availability are of vital importance. There are other obvious constraints which would need to be taken into consideration. The Assembly will be informed when further decisions are made.

Darwin's Local Government Boundaries

Ms D'ROZARIO to MINISTER for COMMUNITY DEVELOPMENT

Is there a current proposal to alter Darwin's local government boundaries and, if so, when is it expected that the boundaries will be amended?

ANSWER

I am not sure whether there is a specific formal application form the Darwin city council to the government to alter its boundaries. There has certainly been reference to the subject in correspondence and publicly over a long period of time. The Darwin city council's view obviously is that it would like the boundary extended fairly substantially, especially to include Palmerston. The government has not determined a final position on this matter. At present, I am putting together some information for Cabinet on the subject of possible changes to the Darwin city council boundaries. Of course, even if changes are made, they need not necessarily be the final boundaries. Such matters can be determined from time to time. There is clearly an inequity at present inasmuch as the boundary on the eastern side of the Stuart Highway in my own electorate currently ends just this side of the Darwin Show Grounds. A fairly substantial developed area at Berrimah, including the Berrimah Hotel and various industrial complexes, is outside the boundary. It is somewhat inequitable to end the boundary just this side

of the show grounds when it could be extended a mile or 2 to take in the additional area and thereby allow the council to pick up rates and responsibilities for that area. At present, the government levies rates under the Darwin Rates Act on areas just outside the city council boundaries. It is not a function that we see government really being involved in for any length of time. In a nutshell, the matter is being examined. I do not believe that there is a formal submission from the council indicating where it believes the boundaries should go.

Casuarina Hospital - Treatment of Burns

Mr BELL to MINISTER for HEALTH

Is it a fact that special facilities for the treatment of burns cases at Casuarina Hospital have never been used and that burns cases are treated in ordinary wards where the risk of infection is very high?

ANSWER

I ask the member to put the question on notice. If he would like an answer to a question like that on the same day, he should ring me an hour or 2 before question time so that I can made an effort to find the answer.

Bagot Road Flyover

Mr HARRIS to MINISTER for TRANSPORT and WORKS

Is the construction on the Bagot Road flyover running to time and when are the many thousands of people who commute from the northern suburbs to the city every day likely to be using this flyover?

ANSWER

The Bagot Road flyover construction is proceeding according to schedule. The many thousands of people will be able to use it in early February next year. Whilst I am talking about the Bagot flyover, I would like to thank the motoring public in Darwin for the caution that they are exercising in moving around the works at the moment. Additional bridge work will be erected in the next 6 weeks and northbound traffic will have to take a little detour and then do a U turn and head back up Bagot Road. I believe that the motoring public have accepted the directions of the department in its advertising campaign. I thank them but would also like to ask them still to exercise a little caution whilst they are moving through that area.

NTEC Debtors

Mr D.W. COLLINS to MINISTER for MINES and ENERGY

How much money approximately does NTEC lose in a year through absconding debtors?

ANSWER

I cannot give the member an exact answer on the annual loss. Since its formation in 1978, it has lost in the order of $1.5m through people defaulting on paying their accounts. Often it is not possible to pursue the options open to the commission to recover this money because one cannot get blood out of a rock, particularly if one cannot find the rock. It is a matter of concern because $1.5m, even if it is in 1978 dollars instead of 1981 dollars, represents 60 or 70 houses or 80 or 90 kilometres of road. In that sense, it is extremely important that we recover every dollar we can and put it back into the development of the Territory.

Sunday Trading

Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

Given the growing public debate on Sunday trading for retail stores, will

the government stop large chain stores from opening on Sunday?

ANSWER

Mr Speaker, the government does not propose to legislate to control shop trading hours to any greater degree than they are controlled now. I believe the only controls that exist at present are on the sale of liquor and the opening times for casinos in the Northern Territory. I understand there are no other legislative restrictions on the subject and, at this stage, we do not propose to introduce any.

Training Courses for Seamen at Darwin Community College

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

This question relates to the answer he gave about the training facilities which are to be set up for seamen in the Darwin Community College. As the college is acting as an agent for the Director of Transport and Works, could he indicate in which year such courses will commence?

ANSWER

I understand that it will be next year.

Donkey Camp Project at Katherine

Mr VALE to MINISTER for TRANSPORT and WORKS

Will water be taken from the Donkey Camp pumping station in Katherine this year?

ANSWER

Mr Speaker, I doubt whether any water will be taken from Donkey Camp this year. However, I understand that some water may be drawn off to test the line later this year.

Status of Traffic Signs at Jabiru

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

Are all the traffic signs at the new township of Jabiru and at Jabiru East properly authorised and can laws regarding these signs be enforced?

ANSWER

Mr Speaker, the signs that have been put up in the town of Jabiru are enforceable. However, I believe on the Ranger site there are some signs that have been erected without consultation with the Department of Transport and Works. It is unclear whether or not those signs are enforceable.

Biological Control of Palm Leaf Beetle

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Mr Ted Fenner is the senior adviser with the Animal Quarantine Service. What were the results of his study trip to Queensland to examine possible biological controls of the palm leaf beetle?

ANSWER

Mr Speaker, I have no further information to add that that provided last week in response to a question from the member for Port Darwin.

Payment for Lease in Vicinity of Doctor's Gully

Mr BELL to MINISTER for LANDS and HOUSING

I draw his attention to the recent gazettal of a lease in the vicinity of Doctor's Gully to Mr and Mrs Perron. The figure mentioned in that gazettal notice

was $73,000. What were the terms and conditions of payment of this price?

ANSWER

As my colleague interjected, the handling of an application by Mr and Mrs Perron has at all times been in precisely the same manner as for any other citizen of the Northern Territory. I am more than happy to provide whatever details the gentleman requires, particularly if he puts the question on notice. In any event, I am quite happy to send him whatever information he wants. I certainly cannot give it here. It is 4 or 5 pages long.

Todd River Seepage into Alice Springs Hospital

Mr D.W. COLLINS to MINISTER for HEALTH

The high water table in the Todd River is causing seepage into the basin of the Alice Springs Hospital. The water at present is being pumped back into the Todd and is causing excessive weed growth in that area. What problems would there be with pumping the water from the basin into the sewerage drain instead of into the Todd River?

ANSWER

Mr Speaker, there would be no problems that I know of other than that the pumps would probably run 24 hours a day for years.

Proposed Marineland Development in Doctor's Gully

Mr BELL to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

My question refers to my previous one about the lease in the vicinity of Doctor's Gully and proposed marineland development in that area. As minister responsible for the Northern Territory Development Corporation, is there likely to be a loan for the development of that particular lease from the Northern Territory Development Corporation?

Mr SPEAKER: Ministers have the option of answering or declining to answer. The honourable the Treasurer.

Mr PERRON: Mr Speaker, I believe that the question is outside Standing Orders. We could perhaps seek your ruling on the matter, Mr Speaker.

Mr SPEAKER: If the honourable member for MacDonnell rephrases the question, he might receive the answer he requires. At present, it is not acceptable.

Mr BELL to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

My question refers to the previous one. Has there been an application to the Northern Territory Development Corporation for a loan to develop the lease in the vicinity of Doctor's Gully that was recently gazetted?

ANSWER

The answer is no, Mr Speaker.

Solar Pond Project in Alice Springs

Mr VALE to MINISTER for MINES and ENERGY

Can he advise the Assembly of the progress on the solar pond project in Alice Springs which the Northern Territory government is helping to finance?

ANSWER

I understand that the pond development is quite well advanced. Indeed, the installation of the turbine is ready to take place. The turbine was delivered recently from overseas and it was slightly damaged. There has been some work involved in rectifying the damage. I advise members that it is planned that this pond and the generating system will be installed and ready for installation during

the coming solar conference that the government is sponsoring in Alice Springs.

Fannie Bay Golf Course

Mrs O'NEIL to MINISTER for LANDS and HOUSING

Has a decision been made to incorporate the former Fannie Bay golf course into the East Point Reserve?

ANSWER

I am unaware of any such proposal. That would be a matter of significant interest to the Corporation of the City of Darwin. I would imagine that, if any approaches have been made to vary it as council land under council jurisdiction they would be made to my colleague the Minister for Community Development.

Mrs O'Neil: It is not under council jurisdiction.

Mr ROBERTSON: I am somewhat at a loss to answer the question. It is quite apparent that I do not know the answer. I will certainly take it up and reply to the member in due course.

Old Katherine Railway Station

Mr VALE to MINISTER for COMMUNITY DEVELOPMENT

My question is asked on behalf of the member for Elsey. Why has the old railway station at Katherine not been converted into an information centre with the funds allocated 2 years ago?

ANSWER

$12,000 was allocated in 1978-79 as you are aware, Sir. It was provided by the government to the National Trust for restoration work at the old Katherine railway station. The National Trust recently went through a period of some difficulty as members may note in its recently tabled annual report. However, a status report that was prepared in April this year by the National Trust on various programs stated that some repair work on this program had been undertaken at a cost of $1474. There has been no further action to effect restoration. The Department of Community Development has been requested to write off the balance of the funds provided to the National Trust for this project. Emergency funding has now been provided to the National Trust under some reorganisation of its financial affairs in order to get a number of projects which have been on the trust's book for some time under way and completed. Amongst those projects is the restoration of the old railway station at Katherine.

Energy Audits of Government Officers' Accommodation

Ms D'ROZARIO to MINISTER for MINES and ENERGY

Have energy audits been undertaken in respect of buildings occupied by government officers and, if so, what is the expected cost saving which will result from these audits?

ANSWER

Mr Speaker, there have been some total energy assessments done in 2 major hospitals in the Northern Territory, but I am not aware of any that have been done on government office blocks. Both at Casuarina and Alice Springs Hospitals, outlays of $150,000 to $200,000 will be involved in capital works to achieve energy savings of the same order of expenditure every year. I cannot advise the honourable member which other buildings have been assessed at this stage. It is our intention to look at every government building in the course of time to get the maximum savings we can in relation to energy.

956.820—29

Investigation of Under-age Employment and Low Wages

Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

Will he please undertake an investigation of the allegations of under-age employment and low wages on pastoral properties that I raised in the adjournment debate last week?

ANSWER

Mr Speaker, I will have the subject of the honourable member's debate looked into by government officers and ask them to put recommendations to me.

Current Status of Stuart Highway in Alice Springs

Mr VALE to MINISTER for TRANSPORT and WORKS

Can he advise the current status of the proposed realignment of the Stuart Highway through the railway area of Alice Springs to Smith Street intersection?

ANSWER

Mr Speaker, I understand that the realignment of that section will be subject to budgetary considerations for the 1982-83 financial year.

Leanyer Primary School

Ms D'ROZARIO to MINISTER for EDUCATION

Given that the contract for the construction of the Leanyer Primary School has already been let, when is it expected that the school will be ready for occupation?

ANSWER

From memory, I answered this question earlier in the sittings. I think the anticipated date of completion I gave then was the end of January 1983. It will be completed during the next school year which, of course, would mean the first semester of that year.

Aircraft Problems at Jindalee

Mr D.W. COLLINS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Would he please take up with the appropriate federal minister the problem of the aircraft decoy effect on the Jindalee over the horizon radar aerial display north of Alice Springs?

ANSWER

Mr Speaker, I heard of this matter this morning. It sounds like it could be quite serious. It could lead to a very serious incident if in fact an aircraft in trouble sought to land on the area concerned in an emergency. From the air, it appears as if it would be a useful landing field whereas in fact it is covered with aerials. I will certainly have the matter taken up with federal officials with a view to having it examined. If it is regarded by the relevant air transport people as a matter of concern, then identification marks will be necessary to ensure that no accident occurs.

Cape Don Lighthouse

Mrs LAWRIE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Could he indicate whether a decision has yet been made regarding the Cape Don Lighthouse, which is to be decommissioned, and whether that area is to be given to the National Trust or any other instrumentality for protection?

ANSWER

This is the first I have heard of this matter. I will have officers examine the question.

Responsibility for Todd River

Mr BELL to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Last week, I asked a question relating to responsibility for the Todd River in which the Chief Minister said that he hoped that in due course the Alice Springs Town Council would take over responsibility for the Todd River. In light of this week's decision to call on the Northern Territory government through the Conservation Commission to take responsibility for the Todd River, will the Department of the Chief Minister be accepting that responsibility?

ANSWER

Mr Speaker, I certainly could not answer for the Chief Minister at short notice in that regard. I suggest the honourable member place the question on notice.

From 18 November 1980

Collia Tin Mine

6 Mr ISAACS to MINISTER for MINES and ENERGY

As a number of people have lost their savings in the Collia tin mine affair,

(a) what detailed action has been taken by the Department of Mines to settle the matter;

(b) how much money has been lost by people involved;

(c) how much did Mr Ken Day receive for the tin he mined from Collia;

(d) why has he not explained in the Legislative Assembly what action the government has taken;

(e) did the Department of Law recommend that anybody be charged over the affair and, if so, why was not that recommended action proceeded with;

(f) was the government's lack of action coloured by the fact that Mr Day was once the head of the Progress Party, whose votes had helped the Country Liberal Party;

(g) what is now being done about the matter; and

(h) are police trying to contact the previous leaseholder who disappeared and, if so, do they know in which state he is residing?

Government Assistance for Tradesmen to Visit Remote Areas

44 Mr MacFARLANE to MINISTER for LANDS and HOUSING

What assistance will the government provide to enable electrical, plumbing and building tradesmen and inspectors to visit remote centres such as Borroloola to assist home owners?

Elsey and Hodgson Downs Pastoral Leases

126 Mr MacFARLANE to CHIEF MINISTER

1. What efforts are being made to have land excised from Elsey and Hodgson Downs pastoral leases for use as community areas for Aborigines?

2. Is the government's failure to obtain such excisions frustrating provision of essential services such as septic systems, power supplies, airstrips and housing?

Katherine Water Supply

133 Mr MacFARLANE to MINISTER for MINES and ENERGY

Will electricity to be reticulated to the new water supply at Donkey Camp near Katherine be extended to cater for consumers and future subdivisions on the Gorge road, and to Katherine Gorge?

Katherine Community Welfare Office

134 Mr MacFARLANE to MINISTER for COMMUNITY DEVELOPMENT

1. Why did Mr Peter Ryan of his department post a notice on the door of the regional office in Katherine on 8 January 1981 advising people in need of assistance to contact Les MacFarlane?

2. Is this action likely to be repeated?

Richard Koerner

147 Mr ISAACS to CHIEF MINISTER

1. In what capacity is Mr Richard Koerner employed by the Northern Territory government?

2. What salary, allowances and other entitlements is Mr Koerner receiving?

From 3 March 1981

Tenders for School Bus Runs

152 Mrs LAWRIE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Why was ETB 3/80 cancelled and recalled as ETB 14/80?

Tenders for School Bus Runs

153 Mrs LAWRIE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

In regard to tenders TB 1026/79A and TB 1093/79, in what respect did the tenders received from O'Hara's Roadlines Pty Ltd not conform?

Tenders for School Bus Runs

154 Mrs LAWRIE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

1. Is it a fact that the tenderer awarded tenders TB 1026/79A and TB 1093/79 had 8 buses to service 7 runs?

2. If so, how was the tenderer awarded these runs being 2 buses short of the required 10 buses for 8 runs?

Tenders for School Bus Runs

155 Mrs LAWRIE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

1. Does tender TB 1026/79 (school bus runs) state that all buses offered in the tender must be in Darwin 14 days prior to the commencement of the tender?

2. If so, why was the tender awarded to a tenderer who did not meet this specific requirement?

TAA Bid for Connair

158 Mr ISAACS to CHIEF MINISTER

Did the NT government intervene to prevent TAA proceeding with the purchase of Connair for $1.6 million under an agreement signed in September 1979 and, if so, why?

TAA Bid for Connair

159 Mr ISAACS to CHIEF MINISTER

Did the NT government intervene late in 1979 to prevent TAA proceeding with a second bid of $1.85 million for Connair and, if so, why?

East West Airlines

160 Mr ISAACS to CHIEF MINISTER

1. When did the NT government first raise with East West Airlines the back-to-back requirements of the guarantee arrangements?

2. Was the advice in writing?

Bans on Northern Airlines

161 Mr ISAACS to MINISTER for TRANSPORT and WORKS

1. What are the details of the agreement between the NT government and the Australian Federation of Air Pilots which enabled the bans on Northern Airlines by the federation to be lifted?
2. Was the agreement signed on behalf of the NT government by the Acting Secretary of the Department of Transport and Works?
3. Will he table the document in the Assembly?

East West Airlines

162 Mr LEO to MINISTER for TRANSPORT and WORKS

1. Did the government receive from East West around May 1980 details of that company's borrowing capacity, including (a) current East West borrowing capacity, (b) borrowing requirements for operations outside the Territory, (c) equity levels to support borrowing, and (d) capacity to support borrowing by the NT airline?
2. If so, why was this information not made available to the merchant banker, Hill Samuel?

East West Airlines

163 Mr LEO to MINISTER for TRANSPORT and WORKS

Did the 3-man committee established by the government to examine the Connair takeover offers first recommend acceptance of other offers before recommending East West?

East West Airlines

164 Mr ISAACS to MINISTER for TRANSPORT and WORKS

1. In view of the government's insistence that the guarantee to Northern Airlines or East West Airlines was always intended to be of a back-to-back nature, why was such a provision not made clear in either the memorandum of understanding or the deed?
2. What documented evidence can the government produce to support its claim that a guarantee must be back-to-back?

East West Airlines

165 Mr ISAACS to MINISTER for TRANSPORT and WORKS

Did the government advise East West in September 1980 that the company's request for guarantees on behalf of Northern Airlines had been approved in principle subject only to documentation?

Industries Training Commission

173 Mr B. COLLINS to MINISTER for EDUCATION

1. How many apprentices are with the Industries Training Commission?
2. What is the number in each trade and the breakdown of males and females for each category?

Female Field Worker with Aboriginal Sacred Sites Authority

175 Mr ISAACS to CHIEF MINISTER

Has the Aboriginal Sacred Sites Authority appointed a suitably qualified female field worker-anthropologist to work directly with Aboriginal women?

From 2 June 1981

Mining Royalties Paid to Aborigines

178 Mr MacFARLANE to CHIEF MINISTER

Will he ascertain and advise -

1. The amount paid to Aborigines in the NT from mining royalties in (a) 1978, (b) 1979, and (c) 1980?
2. What level are these mining royalties expected to reach in 1981?
3. What funds the Aboriginal Development Commission has to invest in the NT in 1980-81?
4. Are mining royalties paid to Aborigines considered as taxable income?

Interest Rate on Loan to Northern Meat Exporters Pty Ltd

195 Mr MacFARLANE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

What rate of interest is being charged on the $1.4m special assistance loan granted to Northern Meat Exporters Pty Ltd?

From 9 June 1981

Aboriginal and Islander Medical Service

198 Mr B. COLLINS to MINISTER for HEALTH

1. What is the present staffing of the Aboriginal and Islander Medical Centre? Are there plans to increase the staffing levels and, if so, what positions?
2. What are the functions and duties of the Aboriginal and Islander Medical Service?
3. During the 6 months to 31 May 1981, (a) how many Aboriginals have been treated per week by AIMS, (b) what are the major categories of illness, and (c) where do the Aboriginals, in the main, come from?
4. How many Aboriginal liaison officers are attached to Casuarina Hospital; what hours do they work; and are there plans to increase the numbers?
5. Are any Aboriginal liaison officers to be employed at Darwin Hospital?

Student Assistance in NT

201 Mr B. COLLINS to MINISTER for EDUCATION

How many students in the Northern Territory are, (a) receiving assistance under the Tertiary Education Assistance Scheme, and (b) how many are in receipt of the full allowance?

Medical Practitioners Servicing Community Health Centres

205 Mr B. COLLINS to MINISTER for HEALTH

How many doctors have been servicing community health centres, and how many of these are private practitioners?

From 18 August 1981

Alcohol Rehabilitation Unit

206 Mr ISAACS to MINISTER for HEALTH

1. Where have advertisements been placed for nurses to staff the Alcohol Rehabilitation Unit?

2. How many advertisements have there been?
3. How many positions for nurses are there?
4. What are the shift hours at the 24 hour unit?
5. How many counsellors does the Rehabilitation Unit have?
6. What qualifications have the counsellors?
7. What are the hours of duty?
8. How many doctors are attached to the Rehabilitation Unit and what hours do they work?

Mustering of Cattle in National Parks and Reserves

208 Mr BELL to CHIEF MINISTER

1. What is the current policy of the Conservation Commission regarding the mustering of cattle in national parks and reserves?
2. (a) Who pays the cost of the mustering, (b) how many musters have been conducted in Central Australia during the past 2 years, (c) how much did each muster cost, (d) what happened to the mustered cattle, and (e) what payments have been received by the Conservation Commission from pastoralists for mustering services?

Yulara Tourist Village

209 Mr BELL to CHIEF MINISTER

1. In terms of concept and structural characteristics, what is the nature of each Yulara Village development proposal received to 10 June 1981 by the NT Development Corporation?
2. Have development guidelines as set down in a document entitled 'Development Requirements and Information for Developers' prepared by Goodchild Research Studies for prospective Yulara developers been changed in any way since its release earlier this year?
3. If so, (a) in what regard, and (b) what has been the reaction to this revision or alteration of guidelines in terms of investor and development interest?
4. Will development of Yulara Village be restricted in terms of vertical height?
5. Will development proposals for structures of more than 3 storeys be considered as viable by the NT Development Corporation?

Rape in Southern Region of NT

210 Mr BELL to CHIEF MINISTER

1. (a) How many rapes have been reported in the Southern Command region since 1 July 1980 to 10 June 1981, (b) how many have resulted in charges being laid, (c) what is the state of these charges, and (d) have any reports of rape been false?
2. What facilities and resources are available for the psychological counselling of women raped in (a) the Alice Springs region, and (b) the Tennant Creek region?
3. Has he received any representations from women's organisations regarding the level of rape counselling services in the Territory?
4. If so, (a) what organisations have made representations, (b) what has been the basis of these representations, and (c) what has been his response?

Napperby Station Sublease

215 Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

1. What discussions have been held between officers of the Department of Community Development and the Department of Transport and Works regarding the piping of water to the proposed sub-lease on Napperby Station?
2. How much will it cost for the equipment and installation of an adequate water supply at the Napperby sub-lease and who will meet the cost?
3. Will the school and other government-supplied facilities presently being used by the Laramba Community at Napperby be moved to the new sub-lease if and when negotiations are completed for the sub-lease?
4. What will be the cost of moving and re-establishing the facilities on the new site?

Guidelines for Grants-in-Aid

222 Mr ISAACS to MINISTER for HEALTH

What action has been taken to correct the following unsatisfactory control relating to grants-in-aid commented upon by the Auditor-General in 1978-79 and found to be still unsatisfactory in 1980:

(a) inadequacies in the promulgated conditions for grants;

(b) the absence of reference to formal acceptance of the conditions and purpose of grants;

(c) the legal entity of grantees;

(d) the withholding of moneys for non-compliance with grant conditions;

(e) the lack of current formalized departmental procedures and guidelines covering functional responsibilities and criteria for the evaluation of grant applications and the monitoring of performance of grantees; and

(f) the apparent absence of follow-up action by his department in certain instances where it is not evident that grantees had complied with the conditions of grants?

Alice Springs Women's Community Centre

223 Mr BELL to MINISTER for HEALTH

1. When will the Women's Community Centre in Alice Springs commence operations?
2. If the centre has not been opened by the end of June 1981 will the Department of Health continue to fund St Vincent de Paul and the Salvation Army to enable these agencies to provide services to destitute and homeless people until the new centre is open?
3. If not, why not?
4. If so, have these agencies been informed that their funding will be maintained until the new centre commences operations?

Darwin Hospital Pathology Laboratory

224 Mr B. COLLINS to MINISTER for HEALTH

1. Can he inform me as to the fate of the pathology laboratory at the Darwin Hospital?
2. Has he considered the future of the laboratory in the light of a lack of such scientific facilities in the Department of Primary Production?

Security for Belongings of Hospital Patients

225 Mrs O'NEIL to MINISTER for HEALTH

What arrangements are made to ensure the security of the belongings of hospital patients, for example psychiatric and geriatric patients, who are unable to care for themselves?

Auditor-General's Report - Deficiencies in Department of Transport and Works

230 Mr ISAACS to MINISTER for TRANSPORT and WORKS

I refer to the deficiencies in his department noted by the Auditor- General following an audit undertaken in March 1980 and ask:

1. Have standardised procedures for management of repairs and maintenance works been established and are they now available?
2. Has the level of supervision by the department over period contracts been raised, and has the frequency of inspections by supervisors of period contracts been increased?
3. Is there now in existence a format for the reporting to management in respect of contractors' performances?
4. In relation to capital works programs, have procedures for the administration of consultants' commissions been revised and, if so, do these revised procedures include a check list for the preparation of payments to consultants?
5. In relation to the collection of both water and sewerage rates, what action was taken as a result of the query by the Auditor-General in 1979 and again in 1980 about defective procedures relating to the preparation and rendition of accounts for services provided?
6. What success has been achieved in improving procedures in relation to the collection of outstanding water and sewerage rates?
7. In regard to water and sewerage rates, have the following issues been resolved -
   (a) the liability or otherwise of the Department of Lands for vacant Crown land;
   (b) union concern regarding the payment of basic charges for members in Commonwealth housing; and
   (c) the incorrect billing of government departments?
8. In the Property Branch of the department have the following issues been resolved -
   (a) problems relating to the formalising and registering of leases by the department; and
   (b) the lack of a property management procedure manual which could be made available to departments and authorities?
9. In the branch of stores and stores accounting, (a) has the new stores computer system been implemented and, if so, (b) is he satisfied that there now exist adequate internal controls and procedural documentation within the stores branch?

Todd River Causeway

231 Mr BELL to MINISTER for TRANSPORT and WORKS

1. Has his attention been drawn to a recent press report regarding the construction of a causeway across the Todd River to service the new

casino, and which stated that the causeway would cost $846,000?

2. How much is Federal Pacific Hotels, which stands to gain the most benefit from the causeway, contributing to the cost of this new river crossing?

3. Did he, or his department, ask Federal Pacific Hotels to meet the total cost of the causeway and, if not, why not?

Health Clinic at Lake Nash

232 Mr BELL to MINISTER for TRANSPORT and WORKS

1. Has an application been made by the Department of Health in Alice Springs for the use of the old police station at Lake Nash as a health clinic?

2. If so, what is the result of the application?

3. If not, what plans have been made for the use or disposal of the police station complex?

Bridge over Georgina River

233 Mr BELL to MINISTER for TRANSPORT and WORKS

1. Does the government still intend to build a bridge in Queensland over the Georgina River at Camooweal and, if not, why not?

2. If so, (a) when will the bridge be built, (b) how much will it cost, (c) who will do the work, and (d) will the Queensland government be making any contribution?

Sealing of Tanami Desert Road

234 Mr BELL to MINISTER for TRANSPORT and WORKS

1. When will work re-commence on sealing the Tanami Desert Road?

2. What distance will be sealed in (a) 1981, (b) 1982, and (c) 1983 calendar years?

Beef Exports to South-east Asia

239 Mr MacFARLANE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Will the government commission a survey of markets for beef in South-east Asia and other areas?

Sales Tax Rebate Scheme

240 Mr ISAACS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

1. Will the government's sales tax rebate scheme result in cheaper consumer goods in the Territory?

2. Will Territory officers make regular assessments of the rebate scheme to assess the direct benefits to consumers and, if so, when will this information be made available to the public?

Incidence of Tuberculosis in 1979-80

241 Mr MacFARLANE to MINISTER for HEALTH

1. What was the incidence of tuberculosis in 1979-80 in (a) Australia and (b) the Northern Territory?

2. Is his department undertaking any program to eradicate tuberculosis in humans similar to the program being undertaken to eradicate tuberculosis and brucellosis in cattle?

Lease Applications

249 Mr ISAACS to MINISTER for LANDS and HOUSING

1. How many applications were received during (a) 1978-9, (b) 1979-80, and (c) 1 July 1980-17 June 1981 for (i) horticultural leases, (ii) lease allocation to sporting groups, (iii) lease allocation to cultural groups, and (iv) applications for Aboriginal needs purposes for (A) 'sit-down' areas, and (B) excisions for pastoral leases?
2. In what regions were the above applications made?
3. Which of the above applications were (a) approved, (b) refused, (c) lapsed or withdrawn, and (d) remain unresolved?

Leanyer and Karama Subdivisions

262 Mr ISAACS to MINISTER for LANDS and HOUSING

What was the median price of a single residential lot in (a) Leanyer, and (b) Karama in (i) June 1980, (ii) September 1980, (iii) December 1980, (iv) March 1981, and (v) May 1981?

Department of Transport and Works - Use of Private Organisation for Staff Recruitment

265 Mr BELL to MINISTER for TRANSPORT and WORKS

1. Why did his department recently use a private organisation, P.A. Australia, to advertise in the national press for various staff?
2. How much did this service cost?
3. Does the use of P.A. Australia to recruit staff indicate that advertisements inserted by the department are not attracting applicants of quality?
4. Will he recommend the services of P.A. Australia to his colleagues and other government departments and, if so, will this mean that departmental staff previously employed to write and place advertisements will be retrenched?

Yulara Tourist Village

266 Miss D'ROZARIO to CHIEF MINISTER

What guidelines have been laid down regarding the height of buildings at Yulara Tourist Village?

Chief Minister's Department - Renting of Office Space

268 Mr LEO to CHIEF MINISTER

In regard to office and warehouse space rented by your department from private enterprise developers as at 31 May 1981 -

(a) what is the weekly cost;

(b) what are (i) the names, and (ii) business addresses of the developers involved;

(c) where are the rented premises located; and

(d) how long do the leases run for?

Attorney-General's Department - Renting of Office Space

269 Mr LEO to ATTORNEY-GENERAL

In regard to office and warehouse space rented by your department from

private enterprise developers as at 31 May 1981 -

(a) what is the weekly cost;

(b) what are (i) the names, and (ii) business addresses of the developers involved;

(c) where are the rented premises located; and

(d) how long to the leases run for?

Treasury and Department of Industrial Development - Renting of Office Space

270 Mr LEO to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

In regard to office and warehouse space rented by your department from private enterprise developers as at 31 May 1981 -

(a) what is the weekly cost;

(b) what are (i) the names, and (ii) business addresses of the developers involved;

(c) where are the rented premises located; and

(d) how long do the leases run for?

Department of Community Development - Renting of Office Space

271 Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

In regard to office and warehouse space rented by your department from private enterprise developers as at 31 May 1981 -

(a) what is the weekly cost;

(b) what are (i) the names, and (ii) business addresses of the developers involved;

(c) where are the rented premises located; and

(d) how long do the leases run for?

Department of Mines and Energy - Renting of Office Space

272 Mr LEO to MINISTER for MINES and ENERGY

In regard to office and warehouse space rented by your department from private enterprise developers as at 31 May 1981 -

(a) what is the weekly cost;

(b) what are (i) the names, and (ii) business addresses of the developers involved;

(c) where are the rented premises located; and

(d) how long do the leases run for?

Department of Health - Renting of Office Space

273 Mr LEO to MINISTER for HEALTH

In regard to office and warehouse space rented by your department from private enterprise developers as at 31 May 1981 -

(a) what is the weekly cost;

(b) what are (i) the names, and (ii) business addresses of the developers involved;

(c) where are the rented premises located; and

(d) how long do the leases run for?

Department of Education - Renting of Office Space

274 Mr LEO to MINISTER for EDUCATION

In regard to office and warehouse space rented by your department from private enterprise developers as at 31 May 1981 -

(a) what is the weekly cost;

(b) what are (i) the names, and (ii) business addresses of the developers involved;

(c) where are the rented premises located; and

(d) how long do the leases run for?

Department of Transport and Works
Renting of Office Space

277 Mr LEO to MINISTER for TRANSPORT and WORKS

In regard to office and warehouse space rented by your department from private enterprise developers as at 31 May 1981 -

(a) what is the weekly cost;

(b) what are (i) the names, and (ii) business addresses of the developers involved;

(c) where are the rented premises located; and

(d) how long do the leases run for?

Youth, Sport and Recreation Branch
Renting of Office Space

278 Mr LEO to MINISTER for YOUTH, SPORT and RECREATION

In regard to office and warehouse space rented by your department from private enterprise developers as at 31 May 1981 -

(a) what is the weekly cost;

(b) what are (i) the names, and (ii) business addresses of the developers involved;

(c) where are the rented premises located; and

(d) how long do the leases run for?

Public Housing in NT - Waiting Time

284 Mr ISAACS to MINISTER for LANDS and HOUSING

1. What was the approximate waiting time, in months, for general public housing by centres in the financial years (a) 1979-80, and (b) 1980-81 in the dwelling categories of (i) 4-bedroom house, (ii) 3-bedroom house, (iii) 2-bedroom flat, and (iv) 1-bedroom flat?

2. What was the general public housing stock by centres at (a) 30 June 1980, and (b) 30 June 1981 for the dwelling categories of (i) 4-bedroom house, (ii) 3-bedroom house, (iii) 2-bedroom flat, and (iv) 1-bedroom flat?

Public Housing in NT - Applications

286 Mr ISAACS to MINISTER for LANDS and HOUSING

1. How many outstanding applications were there for general public housing

(a) at 1 July 1980, and (b) at 25 June 1981?

2. How many applications for general public housing were received in the financial years (a) 1979-80, and (b) 1980-81?

3. How many applications for general public housing were cancelled in the financial years (a) 1979-80, and (b) 1980-81?

4. How many tenants were accommodated in the financial years (a) 1979-80, and (b) 1980-81?

Public Housing in NT - Statistics

288 Mr ISAACS to MINISTER for LANDS and HOUSING

1. How many families were accommodated in general public housing in the financial years (a) 1979-80, and (b) 1980-81 in (i) Darwin, (ii) Alice Springs, (iii) Tennant Creek, (iv) Katherine, (v) Nhulunbuy, and (vi) Pine Creek?

2. How many applications for housing were cancelled in the financial years (a) 1979-80, and (b) 1980-81?

Public Housing in NT - Applications

289 Mr ISAACS to MINISTER for LANDS and HOUSING

How many applications for general public housing were received during (a) 1979-80, and (b) 1980-81; and how many applications were outstanding at (c) 1 July 1980, and (d) 1 July 1981 in (i) Darwin, (ii) Alice Springs, (iii) Tennant Creek, (iv) Katherine, (v) Nhulunbuy, and (vi) Pine Creek?

Housing Commission - Cost of Organisation Review

293 Mr ISAACS to MINISTER for LANDS and HOUSING

What was the cost of engaging management consultants, P.A. Consulting Services Pty Ltd, in February 1979 to review the organisation of the Housing Commission?

Mines Services Branch - Expenditure on Roads 1979-80

294 Mr ISAACS to MINISTER for MINES and ENERGY

1. What amount was expended on road construction and maintenance by the Mines Services Branch of his department during 1979-80?

2. Where were the roads located and what length of road construction was involved?

Plenty River Mine

295 Mr ISAACS to MINISTER for MINES and ENERGY

1. Has the production of concentrates commenced at the Plenty River Mine situated some 200 km north-east of Alice Springs?

2. If production has not commenced when is it likely to commence?

Harts Range Gem Survey

296 Mr ISAACS to MINISTER for MINES and ENERGY

1. What were the findings of the survey of gems and precious stones in the Harts Range area?

2. What other such surveys have been or are to be undertaken in the northern region of the Territory?

McArthur River Mining Development Feasibility Study

297 Mr ISAACS to MINISTER for MINES and ENERGY

1. What firm of consultants was employed to review the feasibility study submitted by Mimets Development Pty Ltd on the McArthur River mining development?

2. What was the cost of employing those consultants?

Metallurgical Research Centre Equipment

298 Mr ISAACS to MINISTER for MINES and ENERGY

1. What was the value of equipment installed at the Metallurgical Research Centre in the financial year 1979-80?

2. What was the total cost of equipping the centre to fully operational stage?

Department of Mines and Energy Construction Safety Branch

299 Mr ISAACS to MINISTER for MINES and ENERGY

What action is in hand to ensure that the construction safety branch of his department can perform its functions effectively, given that in the financial year 1979-80 inspections were carried out on 1,831 of the 3,059 applicable sites?

Department of Mines and Energy - Inspection of Machinery

300 Mr ISAACS to MINISTER for MINES and ENERGY

What provision has been made to ensure that his department is able to meet the increasing demand for inspections of machinery, given that the number of inspections carried out by the department in the financial year 1979-80 represented only two-thirds of the total number of machines registered?

Noble's Nob Mine

301 Mr ISAACS to MINISTER for MINES and ENERGY

What were the findings of investigations into the stability of the slopes of the Noble's Nob open cut mine at Tennant Creek?

Coal and Lignite Resources

302 Mr ISAACS to MINISTER for MINES and ENERGY

1. At what stage are the detailed studies into lignite and coal resources being undertaken by his department?

2. Are any preliminary results available from the above investigations?

Palm Leaf Beetle

307 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

(a) What progress has been made in the eradication of the coconut leaf beetle?.

(b) What cost has been incurred to date in the eradication program?

(c) What is the expected level of success and what is the anticipated total cost of the eradication program?

Ornamental Nursery Industry Consultant

309 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

(a) Who was the private consultant engaged by the government to report on

the potential of the ornamental nursery industry in the Northern Territory?

(b) Will this report be made available to the public and, if so, when?

(c) What was the cost of commissioning the study?

Seed Production in NT

310 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

What plans has the government implemented or does it intend to implement to assist Territory seed producers to overcome the financial, management and technical limitations they presently face?

Australian Fishing Zone Observer Program

313 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

1. How many people have been trained under the Australian Fishing Zone Observer program?

2. How many vessels were chartered under the Australian Fishing Zone program in 1979-80 and in 1980-81?

3. What contribution to the Australian Fishing Zone Observer program is made by the NT government?

Management Services Division - Staff Establishment

314 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

(a) What was the staff establishment in the Management Services Division of the Department of Primary Production as at 1 July 1981?

(b) What was the staff establishment as at 1 July 1981 in the (i) Finance Branch, (ii) Personnel Branch, (iii) outposted liaison units, (iv) Registry, and (v) Library?

Prawn Fishery

316 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

Has the government investigated the state of the Territory prawn fishing industry in respect of -

(a) the impact on the local industry of foreign fishing vessels operating in Territory waters;

(b) the returns to the Territory from licences purchased by foreign operators relative to returns to those operators; and

(c) the production costs of the local operators compared with the production costs of foreign vessels?

Funding of Roadworks Tennant Creek Area

318 Mr LEO to MINISTER for TRANSPORT and WORKS

How much money was provided by the NT government for roadworks in the Tennant Creek area during 1980-81?

Funding of Roadworks Katherine Area

319 Mr LEO to MINISTER for TRANSPORT and WORKS

How much money was provided for roadworks in the Katherine area during 1980-81?

Funding of Roadworks Alice Springs Area

320 Mr LEO to MINISTER for TRANSPORT and WORKS

How much money was provided by the NT government for roadworks in the Alice Springs area during 1980-81?

Funding of Roadworks Darwin Area

321 Mr LEO to MINISTER for TRANSPORT and WORKS

How much money was provided by the NT government for roadworks in the Darwin area during 1980-81?

Grants-in-Aid - Darwin Sporting Bodies

322 Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

How much money was provided through Grants-in-Aid to Darwin sporting bodies during 1980-81?

Grants-in-Aid - Alice Springs Sporting Bodies

323 Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

How much money was provided by the NT government through Grants-in-Aid to Alice Springs sporting bodies during 1980-81?

Grants-in-Aid - Tennant Creek Sporting Bodies

324 Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

How much money was provided through Grants-in-Aid to Tennant Creek sporting bodies during 1980-81?

Grants-in-Aid - Katherine Sporting Bodies

325 Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

How much money was provided through Grants-in-Aid to Katherine sporting bodies during 1980-81?

Beef Prices - Discrepancy between Top End and Central Australia

326 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Can he explain why fat steers and breeders bring up to $60 per head more in Central Australia than they do in the Top End despite the fact that the United States is the target destination of all Territory beef?

Beef Sales - Woolworths and Coles

327 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Will he bring to the attention of Woolworths and Coles managements in Darwin the fact that beef of comparable quality to that imported by their organisations is available in the Territory?

Worker's Compensation Case - Mr F. Fenson

328 Mr MacFARLANE to MINISTER for EDUCATION

I refer to the case of Mr F. Fenson, stores supervisor in the Katherine Regional Office of his department, who injured his knee while travelling on duty on 24 March 1981, and ask: was his department responsible for the delay in dealing with Mr Fenson's application for compensation, or does the fault lie with the Commissioner for Employees Compensation in Canberra?

Katherine Terrace - Maintenance of Pavements

329 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

Is the government responsible for maintenance of pavements in Katherine Terrace and, if so, when will they be upgraded?

Government Accounts - One-stop Payment Office

331 Mr MacFARLANE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Will the government establish a one-stop shop for payment of government accounts for water, sewerage and motor vehicle registration, electricity accounts and Housing Commission rents in a ground floor, central position in Katherine, bearing in mind that the town is 8 km long and has no public transport?

Northmeat Farm Sorghum Production Figures

332 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Has his attention been drawn to an advertisement in the Katherine Informer of 22 December 1980 for the sale of Katherine Downs station which stated that the "Adjoining 'Northmeat Farm' produced 7 consecutive crops of Sorghum averaging over 1 tonne/acre & carried 2000 cattle on 2800 h.a."?

If so, is he able to confirm the production figures and carrying capacity of the "Northmeat Farm"; and, if not, will he institute proceedings against the advertiser for misleading prospective buyers?

From 19 August 1981

Government-funded Workshop in Katherine

333 Mr MacFARLANE to CHIEF MINISTER

Has his attention been drawn to an advertisement in the Katherine Advertiser of 6 August 1981 calling tenders for the right to operate a government-funded mechanical repair workshop in Katherine and, if so, will he ensure that similar private enterprise facilities in the town are not unfairly affected by such a workshop?

Bushfires Regulations

334 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

1. Is he aware that bushfires damage native pastures in the Darwin and Gulf district every year?
2. If so, and on the assumption that some grass of whatever quality is better than no grass at all, will he ensure that Bushfires Regulations are strictly policed in the district to prevent stock and feed losses?

Cattle and Buffalo Nutrition Research

335 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

What research is being undertaken into nutrition for cattle and buffaloes in the higher rainfall areas of the Territory?

Beef Industry Consultative Committee

336 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION AND TOURISM

Does he intend to seek advice from the Beef Industry Consultative Committee on tuberculosis eradication and meat processing?

Beef Prices - Effect of Contract Shed

337 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Will Norwest Beef Industries' change to a 'contract shed' at Katherine result in producers receiving higher prices for their cattle?

Land Auctions in Katherine

338 Mr MacFARLANE to MINISTER for LANDS and HOUSING

When will auction sales be held in Katherine for industrial and residential land?

Racecourse Reserve Katherine

339 Mr MacFARLANE to MINISTER for LANDS and HOUSING

1. Is he aware that the Katherine Municipality requires the Racecourse Reserve to be re-dedicated?
2. If so, will he instruct his officers to act immediately to meet the municipality's requirements?

Agricultural Lease Valuations Katherine

340 Mr MacFARLANE to MINISTER for LANDS and HOUSING

1. Is he aware that agricultural leases in the Katherine municipality have been revalued to what lessees consider exhorbitant values?
2. As zoning and other regulations prevent subdivision of these leases, will differential rating be introduced for agricultural leases?

Failures of NT Stations

341 Mr MacFARLANE to MINISTER for LANDS and HOUSING

1. Is he aware that productive stations such as Cresswell Downs, Walhallow, Eva Downs, Anthony Lagoon and Beetaloo are practically deserted?
2. If so, (a) is he alarmed at this fact, and (b) can he say whether it is caused by CSR's and the other owners' inability to cope with local conditions or by other reasons?

Legislation on Rights of the Disabled

342 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

What action, if any, has been taken during the International Year of the Disabled Person regarding rights for the disabled in government legislation?

Grants to Ethnic Schools

343 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

Which part-time ethnic schools providing instruction on a part-time basis in community language and related cultural material in the Northern Territory are in receipt of the newly available grants from the Schools Commission of up to $30 per student per annum?

Aborigines - Imprisonment Rate

344 Mr ISAACS to CHIEF MINISTER

1. What is the Aboriginal male and female rate of imprisonment in the Northern Territory for the last 3 years?
2. How many of the offences were alcohol related?

Internal Reviews of Health Department

345 Mr ISAACS to MINISTER for HEALTH

1. He stated during June 1981 sittings that his department had reviews taking place on all aspects of medical services offered to the public, and referred to an internal review of community health services. What were the details and outcome of this review?

2. In regard to other internal reviews conducted during the past year, (a) in which areas were they conducted, (b) who have the committees comprised of, (c) how many times have they met, and (d) what has been the outcome of these reviews?

3. How many internal reviews are being conducted at the moment?

St Vidgeon Station and Eva Valley Station

346 Mr MacFARLANE to MINISTER for LANDS and HOUSING

1. What is the future of St Vidgeon Station where Aboriginals are building stock yards, etc?

2. What is the future of Eva Valley Station?

Rehabilitation of Rum Jungle

348 Mr B. COLLINS to MINISTER for MINES and ENERGY

Will he advise the present status of the program to carry out further rehabilitation of the Rum Jungle mine area?

From 25 August 1981

Nabarlek - Spillage of Contaminated Material

349 Mr B. COLLINS to MINISTER for MINES and ENERGY

1. Will he provide a detailed report of the release into the environment of contaminated material from the uranium mine at Nabarlek?

2. What action will be taken against the company for failing to report this incident and denying that it had occurred?

Jabiru By-laws

350 Mr B. COLLINS to CHIEF MINISTER

What is the status of the proposed by-laws for Jabiru?

Feral Animals Report

351 Mr B. COLLINS to CHIEF MINISTER

What plans has the Conservation Commission to implement the recommendations of the Feral Animals Report in respect of the control of feral buffalo?

Donkey Camp Project in Katherine

352 Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

1. Why has no environmental impact study been undertaken in regard to the proposal to pump water from the Katherine River in the Donkey Camp area?

2. At what level will pumping from the Katherine River cease so that the farmers' water supply for irrigation purposes is protected?

Health Centre at Katherine

353 Mr MacFARLANE to MINISTER for HEALTH

Why is a health centre to be built at Katherine within 1 mile of the existing community health centre?

Department of Community Development Grants-in-Aid

104 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

1. Which community groups made application to the Department of Community Development for Grants-in-Aid for the year 1980-81?
2. How much did each group request?
3. How much was granted to each of the applicants?

ANSWER

Some organisations submitted more than one project for funding in the 1980-81 financial year because of the variety of Grants-in-Aid which are administered by the department.

It is also pointed out that the Community Services Division was able to make certain approved grants to organisations prior to July 1980, for projects submitted for the year 1980-81, as additional funds were available at that time. These grants are marked with an asterisk on the attached list.

Due to the large number of applications received by the Department of Community Development for the Grants-in-Aid Scheme, assessment is necessarily carried out throughout the whole financial year. For this reason, preparation of these answers was delayed to enable to reply to be as complete as possible. Even so a short list of applications still pending is unavoidable although assessment of these will be completed, and where applicable, payments made before the end of the financial year.

1. The following divisions received applications for Grants-in-Aid in 1980-81:

COMMUNITY SERVICES DIVISION

Aboriginal Community College
Aboriginal Training and Cultural Institute
Aboriginal Womens Resource Centre
Aboriginal Cultural Foundation
Aikido NT
Alice Springs Amateur Cycling Club
Alice Springs Art Foundation
Alice Springs Film Society
Alice Springs Gliding Club

Katherine High School - Cleaning Tender

135 Mr MacFARLANE to MINISTER for EDUCATION

Is he aware that the successful tender for cleaning Katherine High School (Gazette No. G1, 9 January 1981, ETB 27/80) is in excess of $80,000, or almost $410 for each school day, for 1981 and, if so, will he investigate alternative means of cleaning to lighten this load on the taxpayer?

ANSWER

The contract in question was in fact for a 2-year period commencing 1.1.1981 to 30.12.1982.

The contract price of $80,217.56 when reduced to a daily rate is less than $200 per day which covers wages, materials and administration and is not considered unreasonable for a school of 3.542 m^2.

Only 2 tenders were received for the cleaning of Katherine High School and the cheapest of the 2 was accepted.

The 1981-82 contract rate is considerably less than the 1980 rate.

Essential Services for Aboriginal Communities

156 Mr ISAACS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

1. What is being allocated in cash for essential services in 1980-81 and for which Aboriginal communities?
2. What are the proposed projects?
3. What projects have been completed?
4. How many Aborigines (a) have been, and (b) are employed with the essential services program?
5. What training are they receiving and from whom?
6. What essential services program has been decided upon for the Hodgson community?
7. What improvements are to be carried out in respect of (a) water supply, (b) provision of toilets and showers, and (c) upgrading of and access to the airstrip?

ANSWER

1. Cash allocation

(a) Capital works program - Revote items from previous year program	$ 6,212,000
(b) Capital works program - 1980-81 items	$ 3,500,000
(c) Repairs and maintenance program - Revote items from previous years programs	$ 422,000
(d) Repairs and maintenance program - 1980-81 items	$ 4,929,000
TOTAL	$15,063,000

The Aboriginal communities concerned are:

Community	Amount $	Community	Amount $
Maningrida	635,600	Goulburn Island	167,800
Lake Evella	229,200	Ramangining	92,000
Port Keats	245,500	Galiwinku (Elcho Island)	163,800

Amoonguna
Upgrade internal roads and storm-water drainage, stage I

Galiwinku (Elcho Island)
Upgrade/seal airstrip to Metro standard

Murray Downs
Construct toilet/ablution block

Wattle Creek
Complete sewerage scheme, stage II

Minor New Works (Estimated to cost less than $25,000)
Continuous Items

All centres: equipping of production bores; engineering investigations; extensions to water reticulation; extensions to electrical reticulation; extensions to sewerage reticulation; services to camp areas; outstation roadworks and access; outstation power supplies; Alice Springs fringe camp services; provision of fibreglass lining to steel water tanks; upgrade bulk fuel storage facilities.

Repairs and Maintenance Program
Revote Items from Previous Years Programs

Elcho Island:
- Repairs to 525 KW generator set.

Delissaville:
- Overhaul generating set
- Overhaul transfer pump control and switches
- Replace SLCB, SLCC and faulty services
- Overhaul 4 bore diesel engines
- Overhaul chlorinator and booster pump
- Overhaul Volvo generator set and ancillaries
- Clean and descale power house tanks, paint power house floor, etc.

Angurugu:
- Repairs to transformer installation, fitting of pole fuses, rewiring of street lights and fitting of shackle insulators, earth bonding of poles

Various settlements:
- Overhaul fire pump motors

Various communities:
- Repairs and maintenance to DAA building

Lake Evella:
- Replace existing service to caravan area and make safe raise services and install property poles for

road safety clearance
- Overhaul bores and surface mounter pumps
- Clean and descale exterior bulk fuel tanks

Numbulwar:
- Repairs and maintenance
- Replace chlorinator equipment
- Overhaul sewerage pumps
- Overhaul sand spear pumps
- Replace rainwater and associated plumbing at power house
- Overhaul Volvo generator set and replace batteries
- Repairs and maintenance of 3 ablution blocks

Daly River:
- Overhaul 1 x 100 KW generator set
- Replace SLCB, SLCC faulty service power house maintenance
- Paint power house floor, replace batteries and charger circuits
- Overhaul 2 pump switchboards
- Replace bore pump and column
- Overhaul 12v71 generator set and replace Detroit specialised tools, replace radiator

Maningrida:
- Overhaul 4 bores and fit standard switchboard
- Overhaul circuit breaker, steam clean and generator control
- Overhaul 5 bores and 2 booster pumps
- Clean and descale barge and power house bulk fuel tanks
- Repair bore equipment

Port Keats:
- Overhaul 284 KW generator set
- Overhaul No. 6 garden bore
- Clean and descale exterior power house bulk fuel and barge landing tanks

Ramangining:
- Overhaul generator set
- Replace water tank and associated plumbing in power house yard
- Overhaul 6v71 generator set and associated equipment
- Overhaul creek pump and shed

Croker Island:
- Repair to stock bore
- Overhaul bore switchboard
- Replace SLCB, SLCC faulty services and battery charge
- Overhaul 3 bore pumps
- Clean and descale bulk fuel tanks, overhaul fuel transfer pump

Goulburn Island:
- Repairs to stock bores
- Overhaul 2 bore switchboards
- Overhaul 3 bores
- Clean and descale external power house fuel tank, overhaul mobile fuel tanks

Garden Point:
- Repairs to emergency booster pump
- Overhaul chlorinators and booster pump
- Overhaul primary water supply pumps
- Replace 1 sewerage mutator and overhaul mechanical equipment
- Overhaul 12 x 71 generator set and associated equipment

Peppimenarti:	- Overhaul Cat. generator set - Replace SLCB, SLCC and facility services
Snake Bay:	- Overhaul one switchboard on sand spears - Overhaul pumps on sand spears
Umbakumba:	- Overhaul 12v71 generator set and ancillaries - Overhaul gear drive on spear pumps - Overhaul diesel engine on fire booster pump - Overhaul switchboards on water supply - Clean and descale powerhouse fuel tanks - Repair fence around water storage area - Overhaul 1 x 71 KW generator set
Bathurst Island:	- Maintenance and aerial reticulation, replace SLCB and SLCC - Overhaul 3 bore pumps and diesel engines - Replace 2 sewerage pumps and overhaul mechanical equipment - Overhaul 12V71 generator set and associated equipment
Milingimbi:	- Repairs to chlorinator and shed - Overhaul sewerage pumps
Oenpelli:	- Overhaul 2 bores and transfer pumps - Overhaul switchboard on No. 1 bore - Overhaul 6V71 generator set and ancillaries
Nangalala:	- Overhaul 2 bores
Hooker Creek:	- Routine service pulling for 4 bores and overhaul draw plunger pump and discharge head - Overhaul 250KW generator set and associated equipment - Replace alternator - Replace batteries - Repair/replace DS Westinghouse circuit breaker and associated works - Overhaul V12 generator set and associated works - Replace activator
Ngukurr:	- Overhaul steam cleaner - Overhaul 212 KW generator set and associated equipment - Overhaul transfer pumps and motors - Overhaul river pumps and switchboard - Airstrip maintenance - Repair control circuits in power house and upgrade synchro panel
Beswick:	- Overhaul 2 bores, 2 diesel engines - Overhaul 8V71 generator set and associated equipment - Repair/replace fuel reticulation
Wave Hill:	- Overhaul fire booster pump and motor - Overhaul transfer pump and motors - Overhaul 212KW generator set and associated equipment - Replace batteries, overhaul generator set controls instruments - Paint power house floor, relabel control circuits, etc. - Overhaul activator

- Replace alternator
- Overhaul water supply diesels
- Overhaul 3 bores

Bamyili:
- Overhaul 2 bores and motors and river pumps, etc.
- Replace alternator and activator
- Repair control circuits in power house and upgrade synchro panel
- Overhaul 12V71 generator set and associated work

Wattie Creek:
- Overhaul bores and switchboard

Borroloola:
- Overhaul bores

Katherine Area:
- Replace specialised tools for Detroit engines

Papunya:
- Overhaul generator set bores and associated equipment

Warrabri:
- Overhaul generator set and associated equipment

Repairs and Maintenance Program - 1980-81 Items

Garden Point:
- Water/sewerage system, rehabilitate electrical system
- Overhaul 6.71 Detroit diesel
- Replace 2 chlorinators and 1 Matrator, overhaul 2 sewerage pumps, diesels, and water pumps
- Transformer maintenance, replace services, overhaul air breaker switch
- Major overhaul V12.71 Detroit and alternators
- Hydraulics, replace 150 m of sewerage rising main, replace gatic covers and 7 water services, renew manholes, recondition taps and valves in public toilets
- Top overhaul one V12.71 Detroit diesel

Port Keats:
- Water supply, rehabilitate electrical system
- Street light maintenance, transformer maintenance, replace services
- Overhaul 4 bores and replace equipment on Garden bores

Snake Bay:
- Water supply, replace electrical system
- Street light maintenance, overhaul substation and transformers, overhaul air breaker switch
- Overhaul spear pump system
- Major overhaul one V12.71 Detroit, top overhaul one V12.71 Detroit diesel
- Hydraulics, replace overflow from pump wet well
- Hydraulics, repair hydrants and valves

Maningrida:
- Major overhaul V16.71 and alternator
- Top overhaul V16.71 and overhaul activator
- Overhaul synchro electrical equipment and automatic switch gear
- Hydraulics, relay 200 m of sewer rising main, repair sewer outfall, repair 12 manholes
- Hydraulics, repair 1 million litre tank
- Overhaul 5 bore pumps and 2 transfer pumps
- Hydraulics, relay 550 m of water services, repair/replace valves
- Water supply, rehabilitate electrical system

Croker Island:
- Replace street poles/brackets, road clearance poles and substation; earthing, overhaul transformers

- Water supply, rehabilitate electrical system
- Top overhaul 2 6.71T Detroit diesels
- Major overhaul one 6.71T Detroit diesel and alternator
- Overhaul 3 bore pumps and replace diesel on No. 2 bore
- Overhaul breaker switch and replace HV wooden dropout cross arms

Angurugu:

- Water supply, rehabilitate electrical system
- Overhaul water pump system
- Hydraulics, repair efficient mains; crew house services
- Reticulation repairs

Daly River:

- Overhaul one V12.71 Detroit diesel
- Overhaul 3 bore pumps and floodlifter
- Water supply, rehabilitate electrical system
- Top overhaul 6.71 Detroit diesel
- Overhaul street light control boxes and brackets; replace road clearance poles

Elcho Island:

- Top overhaul 6QT Ruston diesel
- Overhaul 3 bore pumps and 2 transfer pumps, overhaul chlorinator and billabong pumps
- Water supply, rehabilitate electrical system
- Transformer maintenance, replace services, overhaul air breaker switch, service low voltage cable on substation
- Replace alternator

Goulburn Island:

- Top overhaul 6.71T Detroit diesel
- Major overhaul 6.71T Detroit diesel and alternator
- Overhaul 5 bores and transfer pumps
- Water supply, rehabilitate electrical system
- Transformer maintenance, replace services, overhaul air breaker switch

Lake Evella:

- Overhaul Bedford and top overhaul to 120A Volvo diesel
- Overhaul 2 bore pumps and windmill
- Water supply, rehabilitate electrical system

Oenpelli:

- Major overhaul one V12.71 Detroit diesel
- Top overhaul one V16.71 diesel and one V12.71 Detroit diesel
- Overhaul 3 alternators and replace activators
- Overhaul 5 bores and diesels
- Street light maintenance, replace services, overhaul air breaker switch
- Top overhaul V16.71 and V6.71 Detroit diesels
- Water supply, rehabilitate electrical system

Ramangining:

- Top overhaul 6.71 Detroit, major overhaul one 6.71 Detroit, overhaul alternators and activators
- Overhaul 3 bores and chlorinator
- Water supply, replace electrical system
- Street light maintenance, transformer maintenance, replace services

Umbakumba:

- Major overhaul one V12.71 Detroit and top overhaul one V12.71 Detroit diesel
- Overhaul activators and alternators
- Overhaul spear pump system

- Hydraulics, replace isolating valves, repair hydrants
- Water supply, replace electrical system
- Street light maintenance, replace services, overhaul air breaker switch
- Overhaul substation earthing and maintenance to transformer

Bathurst Island:
- Replace activators, overhaul alternators
- Major overhaul one V12.71 Detroit and top overhaul one V16.71 Detroit diesel
- Hydraulics, repair hydrants, gatic lids and manholes
- Overhaul 6 bore pumps and replace 1 bore diesel
- Replace road service poles, service arms, substation earthing, HV pole earthing
- Top overhaul 2 V16.71 Detroit diesels
- Overhaul air breaker switch, require low voltage cable or substation
- Water supply, rehabilitate electrical system
- Overhaul street light brackets and control boxes
- Transformer maintenance
- Replace lighting arrestors and building service

Delissaville:
- Overhaul TD120A Volvo and Detroit 6.71 diesel
- Overhaul 4 bores, booster pump and chlorinator and overhaul 4 diesel bore engines
- Water supply, rehabilitate electrical system

Various locations:
- Overhaul, replace street lighting
- Replace street lighting control boxes
- Overhaul air breaker switches
- Repair substation, earthing and earthing of HV poles
- Replace HV wooden dropout cross arms
- Replace street lights and street light brackets
- Replace switch building services
- Repair low voltage cable on substations

Milingimbi:
- Overhaul 3 bore pumps and replace chlorinator
- Overhaul sewerage pumps and mutrators; replace respirator mark
- Water supply, rehabilitate electrical system
- Hydraulics, replace gatic lids

Numbulwar:
- Overhaul 3 pumps chlorinator and replace mono log.
- Water supply, rehabilitate electrical system
- Overhaul Detroit V12.71 alternator and activator, replace W/House circuit breaker

Yirrkala:
- Street light maintenance and replace services overhaul air breaker switch

Peppimenarti:
- Water supply, rehabilitate electrical system
- Top overhaul Caterpillar and 2 Bedford diesels
- Replace one alternator
- Street light maintenance; transformer maintenance, repair services

Hooker Creek:
- Southern Cross EDE 24 HP diesel, overhaul fire booster
- Overhaul transfer pumps
- Bore 13, pull bore replace Pomona pump
- Bore 13, overhaul Southern Cross EDC

- Pull bores 13B, 14 and 15
- Overhaul chlorinator
- Pull and overhaul windmill bores at 7-mile, 14-mile, 19-mile, 28-mile and Tomahawk
- 7-mile bore, replace Southern Cross EDC diesel
- Repair to 4 x 150KL squatters tanks, 2 x 450KL water supply tanks, 1 x 227KL tank, 1 x 90KL electrical tank
- Overhaul and upgrade tank yard electrics control switchboard
- R & M to water stimulation
- Major overhaul Nos. 12V71
- Overhaul synchronizing equipment
- Replace batteries with mono type locomotive and charger
- Major overhaul 16V71
- Replace sewerage Flyght pump
- Replacement of pumps for bores 13A and 15, replace pressure switches, eliminate air from rising main
- Paint and repair plaster, R & M to cisterns to T/blk on hill, paint and repair cisterns, reposition showers in blocks near pensioners huts
- Replace damaged street light and upgrade others
- Replace damaged service poles and faulty MV retic. to dwellings
- Changeover faulty MV aerials and balance electric load on power house generators

Ngukurr:

- Pull bores Nos 1 and 2 and overhaul
- Top overhaul Lister ST2 and Ruston IYBA diesels
- Pull river pump and overhaul screens
- Replace Southern Cross 5 stage sumo pump
- Overhaul electric transfer pumps
- R & M to water reticulation
- Major overhaul 12V71 No. 1 unit
- Repair to synchro. board and associated equip.
- Replacement of damaged insulators, lighting arrestors, ground earths. Aerial cables and transformers on HV retic.
- Replacement of damaged service poles and MV cables
- Relocation of float switches in collection tank and upgrade elec. system on town water
- Overhaul 8V71T
- Upgrade electric wiring and service to ablution block and basketball court

Wave Hill:

- Repairs and replacement circuit breakers
- Replace batteries with mono type locomotive and charger
- Clear, descale and paint bulk fuel tanks
- Power house, repaint interior, exterior and floor
- Raise exhaust system to clear roof, descale and decarbonise transformer and pole
- Overhaul Southern Cross EDE fire booster pump
- Airstrip bores - overhaul Southern Cross EDC motor
- Pull and overhaul 2 airstrip bores, Wattie Creek Nos. 10 and 11 bores
- Replace Ruston YWA diesel
- Replace 1 Southern Cross 7 - stage turbine pump
- Replace one Hebco 15 HP 3-phase motor
- Overhaul chlorinator, clean and chlorinate water supply tank

- Replace 8 double air valves on Wattie Creek-Wave Hill rising area
- Overhaul transfer pump tank yard
- Wattie Creek bore yard, overhaul power supply control board

Wave Hill - Wattie Creek:
- Change over faulty MV aerials and balance elec. load on P/H gens
- Replace damaged insulators, light arrestors, aerials cables, etc.

Borroloola:
- Dulu bore RN9078 and RD79 pull and overhaul
- Dulu bore, overhaul Lister ST2
- Gorowa windmill bore, overhaul and repair
- Gorowa Lister standby, top overhaul
- Drain, service, clean and chlorinate town, Dulu and Gorowa tanks

Djimbre:
- Overhaul diesel river pumps
- Overhaul generator set

Kybrook:
- Overhaul generator set

Yarralin:
- Pull and overhaul bore
- Replace Lister with Lister ST1

Kildurk:
- Overhaul generator set
- Upgrade power house building
- Replace diesel on bore
- Upgrade retic. and overhaul bore pumps

Pigeon Hole:
- Overhaul bore

Hodgson Downs:
- Overhaul Southern Cross 3 HP diesel and piston pump

Bulman:
- Pull and overhaul No. 1 and 2 bores
- Replace Bedford 4 cylinder Dinlite gen. set
- Overhaul Lister 1+R3 diesel alternator
- Upgrade elect. retic. to bores and dwellings
- Overall diesel

Beswick:
- Pull and overhaul bores 1, 2 and 3
- Overhaul EDC Southern Cross and diesel
- Overhaul electric transfer pumps
- Major overhaul Cummins generator
- Clear, descale and repair radiators
- Replace batteries with Mono type locomotive and charger
- Clear, descale and paint bulk fuel tanks
- Toilet blocks, R & M and painting
- Replace damaged street lights and upgrade others
- Replace damaged insulators, surge directors, aerial cables, staywire, etc.
- Upgrade exist. retic. s/board and street light circuits
- Replacement of damaged MV aerial cables to dwellings

Bamyili:
- Replace batteries with Mono type locomotive and charger
- Pull and overhaul 2 bore
- Empty clean and chlorinate water supply tank
- Replace sewerage 2 Flyght pumps
- Toilet block, R & M to plumbing and paint masonry units, gal. iron blocks, remove and cap off sewerage
- Replacement of damaged street lights and upgrade others

- Straightening and restay of power reticulation poles
- Replace damaged insulators, lighting arrestors, aerial cables, etc.

Warrabri:
- Replace 2 x V12 engines with 2 x V16 engines
- Rebuild No. 3 V12 gen. set
- Re-equip diesel standby components of dual drive bore pumping equip.
- Upgrade elect. instrumentation on 2 x bore control cubicles

Haasts Bluff:
- Overhaul gen. set and associated plant
- Overhaul water supply bores

Willowra:
- Overhaul gen. set and assoc. plant
- Overhaul water supply bores

Yuendumu:
- Overhaul gen. set and assoc. plant
- Overhaul water supply bores

Papunya:
- Overhaul gen. set and assoc. plant
- Overhaul water supply bores
- Overhaul sewerage pumps

Areyonga:
- Overhaul gen. set and assoc. plant
- Overhaul water supply bores

Docker River:
- Overhaul gen. sets and assoc. plant
- Overhaul water supply bores

Santa Teresa:
- Overhaul gen. sets and assoc. plant
- Overhaul water supply bores

Hermannsburg:
- Overhaul gen. set and assoc. plant
- Overhaul water supply bores

3. Projects completed:

Capital Works Program Items from Previous Years Program

Maningrida
Erect security fence and clearing

Delissaville
Water storage tank and pump station

Tree Point
S & I gen. set and associated works

Bagot
Repair and replace street lights
Remove fire damaged demountables

Bathurst Island
Prov. fluoridation unit.

Darwin Area
Prov. of spare gen. set

Wooliana
Provision of services

Weemol
Prov. scales and chlorinator shed

Beswick
Prov. of loading ramp
Installation of oil dispersal system

Garden Point
Upgrade sewerage

Palumpa
Prov. of gen. set

Oenpelli
Install 2 bulk fuel tanks

Darwin
Fit radio in vehicle

Remote settlements
Install chart recorders

Railway Dam
Additional work on toilet block
Access roads

Various locations
Supply low loader

Yarralin
Equip bore

Binjara
Access road

Yuendumu
Provision of mortuary cabinet

Warrabri
Construct airstrip apron

Bamyili
Provision of all drainage

Bathurst Island
Upgrade water supply

Goulburn Island
Upgrade water supply

Oenpelli
Upgrade water supply, stage II

Bathurst Island
Equip bore 78/2

Daly River
Equip production bore

Milingimbi
Fence 1 bore

Kulaluk
Ext. of power

Maningrida
Power to fuel installations

Ramingining
Ext. of water reticulation

Garden Point-Woolawanga
Equip 2 bores

Hooker Creek
Materials investigation
Equip bore 13A

Beswick
Construct toilet block

Warrabri
Ext. elect. retic.

Canteen Creek
Dismantle bore 2/76

Yuendumu
Provision of additional generation

Docker River
Prov. toilet facilities

Njalka Ulpaya
Prov. pump station
prov. water main
water mains to Ross Davis area
Prov. of sewerage

Ilpea Ilpea
Water retic. to boundary

Knugatnarra
Prov. access road

Parentja
Prov. access road
Prov. pump station

Maningrida
Works depot

Ports Keats
Extension of water reticulation

Snake Bay
Extend sewer main to men's quarters

Bathurst Island
Pump station

Bagot
Upgrade water reticulation

Umbakumba
Upgrade power supply and reticulation

Lake Evella
Elect. reticulation

Daly River
Rehabilitation bore

Elcho Island
Upgrade substation

Garden Point
Drill bore

Ngukurr
Construct. of transportable works depot

Weemol
Ext. electrical reticulation

Parnta (Winnecke Creek)
Equip bore

Elliott
Prov. toilet blk. at Wilyugoo camp

Papunya
Construct. of transportable works depot

Yuendumu
V/A toilet/ablution facilities

Ililunga-Little Sisters
Elect. retic.
Internal access road

Sadadeen-Ilpea Ilpea
Elect. retic.

Yuendumu
Access road to outstations

Njalka Ulpaya
Access road to area B.

Parentja
Prov. water mains

Charles River
Prov. access road

Bathurst Island
Equip bore 78/1

Ililunga
Prov. stormwater drainage

Hooker Creek
Provision of skid mounted motor

Knuckeys Lagoon
Provision of power

Ntapa
Access roads

Capital Works Program 1980-81 Items

Garden Point
Replace water pipe

Docker River
Upgrade water reticulation

Bathurst Island
Provision of fence around water assets

Oenpelli
Upgrade access road to airstrip

Snake Bay
Install bulk water meter

Amoonguna
Construct additional sewerage scheme

Various communities
Upgrade radio communications on settlements

Darwin-Banjo Swamp
Prevent incursion of saltwater

Daly River
Upgrade airstrip

Elcho Island
Construct 2 toilets

Autilly Camp
Extend water reticulation

Jay Creek
Provision of water

Snake Bay
Upgrade barge landing
Security fence for power house

Kulaluk
Provision of culvert on access road

Bamyili
Provision of oil drainage in power house

Darwin
Upgrade demountable ex Fannie Bay

Dhupuma College
Transportation of gen. sets

Ngukurr
Upgrade access road from river to airstrip

Repairs and Maintenance Program Items from Previous Years Programs

Lake Evella:
- Replace existing service to caravan area and make safe
- Raise services and install property poles for road safety clearance
- Clean and descale exterior bulk fuel tanks
- Overhaul bores and surface mounter pumps

Numbulwar:
- R & M
- Replace chlorinator equipment
- R & M of 3 ablution blocks

Daly River:
- Overhaul 1 x 100KW gen. set

Elcho Island:
- Overhaul elect. control boards on water supply bores

Garden Point:
- Repairs to emergency booster pump
- Overhaul primary water supply pumps
- Replace 1 sewerage mutrator and overhaul mechanical equipment

Croker Island:
- Overhaul bore switchboard

Delissaville:
- Replace SLCB, SLCC and faulty services
- Overhaul chlorinator and booster pump

Ramangining:
- Overhaul 6V71 gen. set and associated equipment
- Overhaul creek pump and shed

Umbakumba:
- Overhaul switchboards on water supply
- Repair fence around water storage area

- Overhaul 1 x 71KW gen. set

Oenpelli:
- Overhaul 2 bores and transfer pumps
- Overhaul switchboard on No. 1 bore

Milingimbi:
- Overhaul sewerage pumps

Bathurst Island:
- Overhaul 3 bores pumps and diesel engines
- Overhaul 12V71 gen. set and associated equipment

Port Keats:
- Overhaul No. 6 garden bore

Goulburn Island:
- Overhaul 3 bores

Hooker Creek:
- Routine service pulling for 4 bores and overhaul draw plunger pump and discharge head
- Replace alternator
- Replace batteries
- Repair/replace DS Westinghouse circuit breaker and associated works
- Overhaul V12 gen. set, etc.
- Replace activator

Ngukurr:
- Overhaul steam cleaner
- Overhaul transfer pumps and motors

Beswick:
- Overhaul 2 bores, 2 diesel engines

Wave Hill:
- Overhaul fire booster pump and motor
- Overhaul transfer pump and motors
- Overhaul 212KW gen. set and associated works
- Replace batteries, overhaul gen. controls instruments

Wattie Creek:
- Overhaul bores and switchboard

Borroloola:
- Overhaul bores at Aboriginal communities

Warrabri:
- Overhaul generator set and associated equipment

Repairs and Maintenance Program 1980-81 Items

Hooker Creek:
- Southern Cross EDE 24HP diesel, overhaul fire booster
- Replacement of pumps for bores 13A and 15, replace pressure switches, eliminate air from rising main

Borroloola:
- Dulu bores, overhaul Lister ST2

Hodgson Downs:
- Overhaul Southern Cross 3HP diesel and piston pumps

Bamyili:
- Replacement of damaged street lights and upgrade others

Warrabri:
- Rebuild No. 3 V12 gen. set

Haasts Bluff:
- Overhaul generator sets and associated plant

Willowra:
- Overhaul generator sets and associated plant

Hermannsburg:
- Overhaul generator sets and associated plant

4. Precise statistics on numbers of Aboriginals who have been in the past and are currently employed in the construction of essential services projects are not available. However our records indicate that up to 400 are employed within their own communities on the construction of these facilities.

   There are also some 50 Aboriginals employed by major councils in the operation and maintenance of essential services within their communities. This figure has been constant for some years.

5. Department of Transport and Works in conjunction with Department of Education provide basic training in carpentry, welding, automotive maintenance, builders labourer and office assistants.

   Through the Department of Transport and Works, a course for the operation and maintenance of power houses and other essential services was initiated in February 1981 to enable Aboriginals to train to a standard for a restricted certificate. The trainees are brought to Darwin and are taught through 3 periods of 2 weeks over 18 months. There are currently 34 trainees on the course.

6. Two production bores for the Hodgson Downs Community were initiated within the 1979-80 Capital Works Program. One bore is yet to be completed after the current wet season has finished and a further 2 bores are scheduled within the 1980-81 Capital Works Program. Previous bores drilled in this area have proved unsuccessful and the installation of a chlorinator to disinfect the current water supply through the reticulation is under serious consideration.

7.(a) A continuing program of bore drilling for the Hodgson Downs Aboriginal community is currently scheduled. Drilling to resume after present wet season. Previous 19 bores drilled in this area have proved unsuccessful.

   (b) Two shower blocks are currently in use and are operating satisfactorily. Water source is local billabong. Three pit-type toilets are in use, 2 more are scheduled for construction by the Yulngu Association in the near future with a further 6 pit toilets under consideration.

   (c) The Hodgson Downs Community is a Gibb Community and is situated on pastoral property. No excision of land for the community exists and consideration to upgrade the airstrip and access roads are not strictly within our brief. Negotiations with the pastoral lessee would be necessary prior to upgrading airstrip or roads on pastoral property.

Rehabilitation of Rum Jungle and Other Uranium Mine Sites

157 Mr B. COLLINS to MINISTER for MINES and ENERGY

1. Will he advise the Assembly on the progress of plans to rehabilitate Rum Jungle?

2. Will he also advise of any plans to rehabilitate and make safe the tailings dumps at other uranium mine sites in the NT?

ANSWER

1. The Territory and the Commonwealth have reached agreement in princple that the Territory should have responsibility for and control of rehabilitation operations at Rum Jungle.

   The Prime Minister has authorised the transfer to the Territory of relevant technical information presently held by the Commonwealth to assist the Territory in determining the rehabilitation measures that will be needed. He has asked that Territory and Commonwealth officials meet for a full exchange of information as soon as possible.

   These discussions will be used to formulate a program of rehabilitation, including timing, costs and method of attack and will allow the Commonwealth to make the necessary decisions on level of funding.

   It is expected that work on Rum Jungle will commence during the 1981 dry.

2. Investigations by this department at Moline and South Alligator mill sites are continuing and should result in programs for the rehabilita-

tion of these sites being developed later this year. Rehabilitation itself will be dependent on the availability of Commonwealth funds.

(As the Commonwealth was in control at the time of the workings, it is felt the Commonwealth should be responsible for the cost of rehabilitation. Further, the Commonwealth has expressed interest in the past in performing the work itself.).

Transecutive Pilots

166 Mr DOOLAN to MINISTER for TRANSPORT and WORKS

1. Which former Northern Airlines pilots will get permanent positions with Transecutive if that company is granted a long-term licence to operate both contracts?
2. Is it a fact that former senior pilots with Northern Airlines are likely to get these positions, that they will require re-training to fly Nomads, and that the government has agreed to meet the cost of this re-training?

ANSWER

1. Not relevant. Transecutive was not granted the long term licence.
2. Some pilots were re-trained for Nomad operations and the government paid the costs.

Northern Airlines Replacement by TAA

167 Mr DOOLAN to MINISTER for TRANSPORT and WORKS

When did the government first approach TAA regarding the possibility of that company providing an interim service following the closure of Northern Airlines?

ANSWER

The government approached both Ansett and TAA at meetings held in Melbourne on 8 January regarding long term arrangements. There were no discussions with TAA regarding interim arrangements.

Transecutive Pilots

168 Mr DOOLAN to MINISTER for TRANSPORT and WORKS

1. Who will meet the wage costs of the pilots taken on by Transecutive who are surplus to the number actually required to operate the contracts during the interim period?
2. If it is the government, why?

ANSWER

1. Within the terms of understanding, reached between Transecutive and the Department of Transport and Works, dated 2 April 1981, the wage costs of pilots who were surplus to the requirements of Transecutive, were met by the NT government.
2. The agreement to meet these costs prevented long delays in re-establishing the services vacated by Northern. To fail to do so would have resulted in the isolation of the Northern Territory by air and turmoil in the tourist industry.

Link Courses Between Sadadeen High School and Central Australia Community College

174 Mr B. COLLINS to MINISTER for EDUCATION

Will he advise on progress of the link courses between Sadadeen High School and Community College of Central Australia?

ANSWER

Following meetings in Alice Springs and detailed discussions with SA Department of Further Education, a report has been prepared on the implementation of the courses. This report is to be discussed with the institutions concerned in Alice Springs in early June. Following that a formal agreement is expected to be reached with the Department of Further Education of South Australia in early July.

It is expected that officers of the SA Department of Further Education will visit Alice Springs in July to formally accredit the courses so that detailed preparation can occur in the latter 6 months of 1981 well in time for the SA Year 12 courses to commence in the 1982 school year. As you know, preparatory courses are in progress now in Year 11.

When the implementation report is completed and agreed to by the SA Department of Further Education, it can be made publicly available in July.

Special Assistance Loan to Northern Meat Exporters

179 Mr MacFARLANE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

What are the terms and purpose of the Special Assistance Loan made to Northern Meat Exporters Pty Ltd by the Commonwealth and taken over by the NT Development Corporation? (See answer to Question 103).

ANSWER

The purpose of the Special Assistance Loan made to Northern Meat Exporters Pty Ltd by the Commonwealth in 1974, was to avert the imminent closure of the meatworks.

The terms under which that assistance was provided are considered confidential.

Generators at Elliott and Newcasle Waters

188 Ms D'ROZARIO to MINISTER for MINES and ENERGY

1. What is the current rating of (a) the 3 generator sets at Elliott, and (b) the generator at Newcastle Waters?
2. What is (a) the rating, and (b) the cost of the proposed generator installation at Newcastle Waters?
3. Are any other projects to be deferred or abandoned to allow for the proposed generator installation at Newcastle Waters?
4. What was (a) the original design level of the generator set pad and, if the original design has been altered, (b) what is the new level?
5. What is the highest recorded flood level in the region in which the proposed generator is to be placed?

ANSWER

1. The ratings of generator sets at Elliott are 2 sets at 168kW and one set at 240kW. Ratings of the 2 sets at Newcastle Waters are 64kW each.
2. The cost of the installation at Newcastle Waters, including distribution work and generation facilities, was $100,000.
3. No other projects have been deferred or abandoned to allow for the installation at Newcastle Waters.
4. The generator pad has been constructed at its original design level of one metre above Lot No. 1 at Newcastle Waters.

5. Flood levels at Newcastle Waters are as follows -

Flood Level AHD (m)	Return Period (years)
209.08	1 in 20
209.68	1 in 50
209.98	1 in 100

Lot No. 1 is bisected by the 600 ft contour, i.e. 207.26 m AHD. The short period of record and changes in channel characteristics made firm levels difficult to predict and the station level was selected above the highest flood level remembered by local residents.

Demountables for Katherine Rural Education Centre

193 Mr MacFARLANE to MINISTER for EDUCATION

What are the reasons for the delay in providing demountable buildings for the Katherine Rural Education Centre at the 15-mile Experimental Farm, Katherine?

ANSWER

Early in February the Department of Transport and Works was requested to arrange for the removal of a demountable classroom from Nakara Primary School for transfer to the Katherine Rural Education Centre at the 15-mile Experimental Farm.

Of all the quotes received, the lowest did not comply with the specification and the others were not acceptable because of over pricing or quoting on the removal of the wrong building.

A contract has now been let and the demountable is expected to be on site and operational within the next 2 weeks.

NTDC Loans

194 Mr ISAACS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

1. When were the following outstanding loans taken up by the respective organisations -
   (a) a special assistance loan to Northern Meat Exporters Pty Ltd;
   (b) a special assistance loan to Alice Springs Abattoirs Pty Ltd; and
   (c) a special assistance loan to Carba Australia Ltd?
2. When will the above loans be fully paid out?
3. How many loans in the following categories remain outstanding -
   (a) sale of bores (drought relief);
   (b) flood relief loans;
   (c) Darwin business relief loans; and
   (d) Primary Producers Board loans?
4. How many of the recipients of loans in the above-mentioned categories have defaulted?
5. What course of action is NTDC undertaking to recover such funds?

ANSWER

1.(a) Northern Meat Exporters Pty Ltd loan assistance was taken up on 17 June 1975.

(b) Alice Springs Abattoirs Pty Ltd loan assistance was taken up on 12 March 1970.

(c) Carba Australia Ltd loan assistance was taken up on 2 August 1972.

2.(a) Northern Meat Exporters Pty Ltd loan is current to 31 December 1991.

(b) Alice Springs Abattoirs Pty Ltd loan is current to 12 March 2015.

(c) Carba Australia Ltd loan has been fully repaid.

3.(a) 13 loans remain outstanding for sale of bores (drought relief).

(b) 3 loans remain outstanding for flood relief loans.

(c) 63 loans remain outstanding for Darwin business loans.

(d) 123 loans remain outstanding for Primary Producers Board loans.

4.(a) The 13 loans remaining outstanding for sale of bores (drought relief) are in arrears.

(b) The 3 loans remaining for flood relief are in arrears.

(c) 49 of the remaining loans from the Darwin Business Relief Loan Fund are in arrears.

(d) 41 of the current Primary Producers Board loans are in arrears.

5. Follow up and review action is being taken by the NTDC on all loans under its control.

Travelling Allowance for Ministers

196 Mr ISAACS to CHIEF MINISTER

For each minister, how many days travelling allowance has been paid from 1 January 1981 till 1 May 1981?

ANSWER

The Remuneration Tribunal determined that with effect from 28 October 1980 ministers would not be paid travelling allowance when travelling outside the Northern Territory but would have reasonable costs of accommodation and meals paid for them. The answer given below relates to either travelling allowance or payment of costs whichever was the appropriate payment in each case, depending on whether or not the travel was inside or outside the Territory.

P. Everingham	74 days
M. Perron	19 days
I. Tuxworth	51 days
R. Steele	66 days
J. Robertson	44 days
N. Dondas	34 days

Ministers' Travel

197 Mr ISAACS to CHIEF MINISTER

1. How many days travelling allowance have been paid to each minister from 1 January to 25 May 1981?

2. What was the cost of travel undertaken by aircraft charter by each minister from 1 January to 25 May 1981?

3. How many overseas trips have been undertaken by ministers on official business from 1 January to 25 May 1981?

4. What has been the total cost of these overseas trips?

ANSWER

1. The Remuneration Tribunal determined that with effect from 28 October 1980 ministers would not be paid travelling allowance when travelling

outside the Northern Territory but would have reasonable costs of accommodation and meals paid for them. The answer given below relates to either travelling allowance or payment of costs whichever was the appropriate payment in each case, depending on whether or not the travel was inside or outside the Territory.

	P. Everingham	80 days
	M. Perron	22 days
	I. Tuxworth	61 days
	R. Steele	79 days
	J. Robertson	55 days
	N. Dondas	39 days
2.	P. Everingham	$ 29,046
	M. Perron	$ 6,609
	I. Tuxworth	$ 39,585
	R. Steele	$ 11,553
	J. Robertson	$ 6,677
	N. Dondas	$ 10,830

3. Three.

4. $ 40,682.

Hospital Advisory Boards

199 Mr B. COLLINS to MINISTER for HEALTH

What is the composition of the various hospital advisory boards in the Northern Territory?

ANSWER

Hospital Advisory Boards in the Northern Territory were abolished when the Hospital Management Boards Act commenced on 1 July 1980.

The composition of Hospital Management Boards is set out in the Act and is as follows -

the Chief Executive Officer of the hospital;

the Matron in charge of nursing services of the hospital;

an employee of the Department of Health who has general responsibility for the administration of the area in which the hospital is situated; and

5 other members appointed by the minister.

The appointment of the initial members was notified in Northern Territory Government Gazette No. G36 of 5 September 1980.

There have been several changes since that date all of which have been notified in the Gazette.

Refugees at Tamarind Centre

200 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

1. How many refugee families are now at Tamarind Centre?

2. How many have obtained employment?

3. How many have moved from the hostel into the community?

4. How many adults are undertaking English lessons?

ANSWER

1. Since is is difficult to group the residents into easily identifiable families, the answer to this first question will be given in number

of people in occupancy. This number as of 9 June was 77 persons.

2. To date, 20 people have obtained employment. Of these 12 are heads of households while 5 are single males and 3 single females.

3. 15 people have moved from the Tamarind Centre into the community.

4. 59 adults are undertaking or have undertaken full-time English classes with another 19 persons enrolled in part-time courses.

NTPS Disabled Employees

202 Mr ISAACS to CHIEF MINISTER

1. How many disabled are employed in the NTPS, what are their positions, and with which departments?

2. How many disabled have been employed in the NTPS in 1981?

ANSWER

The information requested is not available in statistical form. There is a problem in defining a 'disabled person'; not all disabled people are willing to disclose their disability and it would not be proper to invade privacy just to obtain statistics.

The office of the Public Service Commissioner is cooperating with the IYDP Secretariat to include public service employees in a community wide survey of disabled people and of their employment needs. The results of this survey are expected to be available in November 1981.

Following this survey, plans will be made to better meet the physical needs of disabled people in employment. This in itself should increase the number of disabled people who seek and obtain employment. Also the Public Service Commissioner is reviewing policies related to the employment of the disabled so that these people can be more readily employed in the Northern Territory Public Service.

Funding of Women's Centres in NT

203 Mr ISAACS to MINISTER for HEALTH

1. Does the Commonwealth provide 75% of the running costs for women's refuges in the Territory with the Northern Territory making up the shortfall as happens in the States?

2. Can he say what funding arrangements will apply to women's refuges in 1981-2?

ANSWER

1. No. The Commonwealth does not provide 75% of running costs for women's refuges in the Northern Territory.

   Until the last quarter of 1979-80, the Commonwealth provided 50% of running costs of NT approved centres under their Community Health Program. Since then the NT government has provided financial assistance to various centres under the Grant-in-Aid Program.

   The Commonwealth has now indicated that there will be no further specific allocations under the Community Health Program. Future Commonwealth funding will be in the form of general revenue grants for health services including the Grant-in-Aid Program.

2. 1981-2 funding for running expenses of NT women's refuges is being considered under the Grant-in-Aid Program subject to financial resources available in the 1981-2 financial year.

Aborigines on Electoral Roll

204 Mr ISAACS to CHIEF MINISTER

What action is being taken by the government to ensure that Aborigines, 18 years of age and over, who are currently not on the electoral roll, are so enrolled to ensure compliance with the Electoral Act?

ANSWER

In February 1980 the Australian Electoral Office in conjunction with the Department of the Chief Minister and the Northern Territory Department of Education conducted 2 seminars, for adult educators and their Aboriginal assistants, on the provisions of Commonwealth and the Northern Territory electoral law. The adult educators were to have the prime responsibility to carrying out electoral education activities in the lead up to the 1980 Legislative Assembly and Federal elections, and then continue with an ongoing program.

In addition the Australian Electoral Office in accordance with an arrangement between the Commonwealth and the Northern Territory government has a mobile electoral education team of 2 people working full-time in the northern part of the Northern Territory and a similar team working in South Australia and the southern part of the Territory. These teams seek to inform Aboriginal people about the Commonwealth and the Northern Territory parliamentary and electoral systems. Using a range of specially developed audio-visual teaching aids, the program covers the role of parliament, the qualifications for and process of enrolment and the procedures for casting a formal vote. Aboriginal people can obtain assistance from these teams in enrolling for Commonwealth or Territory electoral rolls.

The approach being taken is one of informing Aboriginals of the provisions and requirements of the Act and providing an enrolment service to encourage them to understand and exercise their electoral rights and responsibilities.

Effects of Gambling on Alice Springs Lifestyle

207 Mr BELL to CHIEF MINISTER

(a) Has his attention been drawn to a report in the Age newspaper of Saturday 17 April which quoted the new casino manager as having ambitions to turn Alice Springs into 'a swinging, gambling town'?

(b) If so, what measures does he intend to take to ensure the special characteristics of the Centre capital, which make the town so unusually attractive, are preserved in the face of attempts by outsiders to change the nature of Alice Springs?

(c) Is he concerned that the image of 'a swinging, gambling town' will not attract the type of resident who might wish to work and settle in Central Australia with his family and help contribute to the long term stability of the Territory?

ANSWER

(a) There was no Age newspaper of Saturday 17 April that date being a Friday.

On 18 April, which was a Saturday, the Age printed a 34 word pointer to a story which was to be carried in the next day's Sunday Press. The brief reference was this:

'The woman who is about to become Australia's first female casino manager talks to Derek Ballantine in tomorrow's Sunday Press. She tells of her plans to turn Alice Springs into a swinging gambling town'.

The Sunday Press article of Sunday 19 April was solely devoted to a report of an interview between Mrs Rosemary Nin, the then newly appointed general manager of the Alice Springs hotel-casino, and reporter Derek Ballantine in which Mrs Nin was quoted at length on the purchases necessary to establish a new hotel operation. Numbers of coffee pots, bed linen, silver, wineglasses and Mrs Nin's background as a hotelier were the subject matter of the article.

The single reference to gambling in this 24 paragraph article was in the last 2 paragraphs where it was stated:

'But while the visitors may gamble at Alice Springs from July, Rosemary will not. The gambling bug has never bitten her - anyway, staff are not permitted to play'.

(b) I am not aware of any attempts by outsiders to change the nature of Alice Springs but the town of Alice Springs, like all vibrant growing communities, has been subject to constant change since its inception. Early in its history growth was slow and the pre-war population was apparently below 1,000 people. Post-war dependency on the cattle industry, and on mining, continued into the 60's. By then the character of Alice Springs was changing rapidly due to the effects of a long drought which toppled cattle as the Alice's premier industry and the efforts of local business pioneers who were dedicated to the goal of developing the tourist industry.

The international image of Alice Springs as a tourist town started about then. The new emphasis brought in new investment on tourist plant thus creating additional employment opportunities and promoting social and communal development. By the late 60's promotional efforts were aimed at developing the off-season tourist months, from September to February-March, when the growing tourist industry would virtually go into recess.

True stability for those in the tourism workforce has probably only become a reality within the last 5 years as tourism moved to being a year round industry. It is this stability, this new character, which has been so important to the accelerated growth of Alice Springs. It has created opportunities for many of the town's younger people to remain in Alice Springs and not have to move out to seek employment. It has also attracted newcomers to the town. Additionally, as the tourist industry has grown, the stability based on a guaranteed year round tourist income has led to expansion of the commercial and service sectors providing consequential benefits to residents and improved supply and choice in consumer goods. The evolution of the local tourist industry continues with recent moves to add international standard accommodation to the tourist plant.

The underlying characteristic of the Alice is its ability to remain unique in its geographic location with an independent and free minded population determined to improve their life-style largely through the continued and growing commercial success of the tourism industry. The Northern Territory government shares this determination and has sought and secured private investment to complement public spending in an endeavour to ensure that the economic back-bone of Alice Springs does not remain static or decline.

So dynamic is the town that its population has grown from about 4,500 in 1966 to about 17,000 today.

In the event that tourism stagnated or regressed Alice Springs unemployment figures would soar, businesses would encounter financial difficulties and many residents would have to consider relocation. The cattle industry, while of utmost importance, could not cushion the economic disaster which would follow. This is not what the government

would wish for the people of Alice Springs. Government policies as they relate to the town seek to preserve it from economic decline and maintain prosperity.

(c) The suggestion that Alice Springs will earn or be given an image of 'a swinging gambling town' relates directly to false impressions about the operational style of regulated casinos. For example Darwin does not have such an image yet a casino has operated there since September 1979. Nor does Hobart where a casino has operated for many years successfully.

There is a vast difference between 2 licensed casinos in the Northern Territory which have limits imposed on their trading hours as well as enforced dress regulations and the situation in Nevada with 196 casinos able to operate 24 hours a day with no restriction on entry.

While Las Vegas is promoted as the gambling capital of the United States the Alice Springs Federal, and its sister in Darwin, are no more than additional options in which residents and tourists alike may spend their leisure hours. As an adjunct to the tourism industry, on which the prosperity of so many Territorians depends, they are a complement to the natural beauties and attractions, not a feature of dominance to replace them.

Employment of Aborigines as Rangers in National Parks

211 Mr BELL to CHIEF MINISTER

(a) How many Aborigines are currently receiving training as rangers by the NT Conservation Commission, (b) how many Aborigines are currently employed as rangers in (i) Uluru National Park, and (ii) Kakadu National Park, (c) how many Aborigines, if any, are currently receiving training for employment as rangers in the proposed MacDonnell Range National Park, and (d) to what extent has the Conservation Commission's ranger training and employment program been expanded in order to provide staff for the proposed MacDonnell Range National Park?

ANSWER

The Northern Territory Conservation Commission has 6 Aboriginals employed (Uluru 1, Cobourg Peninsula 1, Alice Springs 4) who receive as part of their duties on-the-job training from senior rangers at their parks. In addition, 3 Aboriginal trainee rangers are to be selected for specialised duties on Cobourg and the Commission has arranged for an Aboriginal ranger to attend a wildlife management enforcement training course from 6-10 July 1981.

A training officer has recently been appointed by the Commission and an important part of the duties of this position will be directed towards training additional Aboriginal people for ranger duties.

Five Aboriginal rangers and 2 cultural advisers are employed in Kakadu National Park, all of whom are Australian National Parks and Wildlife staff.

To this stage, the Commission has not appointed rangers to the proposed MacDonnell Range National Park as the park is only in the planning stage. The Commission is not in a position to appoint rangers until the status of this park is clarified. However, at the appropriate time, the Commission will consider appointment of Aborignals as rangers.

Security Firm Employees - Carrying of Firearms

212 Mr BELL to CHIEF MINISTER

1. Will he table the names and addresses of security firm employees who

are licensed to carry firearms and, if not, why not?

2. How many security firm employees were licensed to carry firearms in (a) 1978, (b) 1979, and (c) 1980?

3. What rules govern the carrying and use of firearms by security firm employees?

4. Is he concerned that the activities of security firms might cut across the work of the police?

ANSWER

1. A list of the names and addresses of security firm employees who are licensed to carry firearms will not be furnished at this would be inappropriate.

2. 1978 - Not available.
1979 - Not available.
1980 - 56 (Since commencement of new Firearms Act on 1.7.80 to 31.12.80).

Note: Prior to the commencement of the Firearms Act on 1 July 1980 no permanent specific records were kept of security firm employees permitted to carry firearms. Permits were issued to employees authorising them to carry firearms which were licensed to their employer. The employee permits were issued free of charge.

3. Security firm employees must hold a current licence or permit under the Firearms Act.

The permit is endorsed with the condition "Valid only when used or carried in the normal course of employment".

Security firm emplpoyees are given no special privileges to make them different from members of the community. They are required to comply with the provisions of the Firearms Act and laws in force.

4. No. In fact the work of security firms can complement the work of the police.

Auditor-General's Annual Report 1979-80

213 Mr ISAACS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

I refer to the Auditor-General's Annual Report for 1979-80, and ask -

1. Have interest rates on loans to corporations under section 63 of the Financial Administration and Audit Act been formally approved by the Treasurer?

2. At what level have the rates been set?

3. Have the terms of repayment of these loans been set and, if so, what are these terms?

ANSWER

1. Yes.

2. Each public loan has been at different rates of interest, in accordance with the rates approved by the Loan Council from time to time. The interest cost to corporations contains a margin over the coupon rate to recover the 'front-end' expenses of loan raisings such as underwriting commission, within limits also approved by Loan Council, and advertising.

3. The loans are not repaid on a credit foncier basis. Instead, under the Loans Redemption Fund Act, the Treasurer has determined rates of contribution by corporations to the Fund, calculated to retire the debt over periods consistent with the life of the assets acquired from loan funds.

NTDC - Motel Projects in Tennant Creek

214 Mr BELL to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Has the Northern Territory Development Corporation been involved in any way in the motel project or projects in Tennant Creek and, if so, what has been the extent of the involvement, and how has the investment been safeguarded?

ANSWER

The NTDC has provided funds into motel projects in Tennant Creek.

The details of such financial arrangements are confidential to the clients and the NTDC and cannot be divulged.

However, an assurance can be given that the corporation's interests are safeguarded by registered mortgages.

Remuneration for Mayor of Tennant Creek

216 Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

1. Has his attention been drawn to comments reported to have been made by the member for Barkly regarding the need for the position of Mayor of Tennant Creek to be a paid position?
2. If so, does he agree with the member for Barkly's proposal?
3. Has his attention been drawn to public reaction to the member for Barkly's proposal?

ANSWER

1. Comments reported to have been made by the Member for Barkly regarding the need for the position of Mayor of Tennant Creek to be a paid position have been drawn to my attention.
2. The present legislation provides for the payment of allowances to mayors by decision of the respective councils. No proposal that the mayor be paid a salary has been received from the Municipality of Tennant Creek nor from any other municipality of similar size or indeed from the Local Government Association. I support the present legislative arrangement for mayoral payments.
3. I am aware of some public reaction to the proposal by the Member for Barkly.

Berrimah Prison - Juvenile Offenders

217 Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

1. How many juveniles can the Berrimah gaol cater for?
2. How many juveniles are in Berrimah gaol at present, what were their offences, and what are their terms of imprisonment?
3. What treatment options does the government have for juveniles convicted of minor offences in the Northern region? Are any new initiatives to be implemented and, if so, what are they?
4. Is a change to the present use of Malak House being contemplated and, if so, what is it? How many juveniles has it accommodated, and for what periods since it opened?

ANSWER

1. There is no prescribed limit set on the number of juveniles that can be catered for at Darwin Prison, Berrimah. The institution accommodates those numbers assigned from the courts and provides an alternative daily routine to that of adult prisoners.

2. As of 7 July 1981, there were 5 juveniles at Darwin Prison, Berrimah. Their offences and charges were:

   (1) Robbery with violence
   (2) Possess canabis
   (3) Illegal use of motor vehicle
   (4) Break and enter with intent and indecent assault on female
   (5) Interfere with motor vehicle, illegal use of motor vehicle (4), larceny (2), break, enter and steal (3), unlawfully on premises (2), possess liquor in restricted area.

   Terms of imprisonment:

   Juveniles whose charges and offences are listed above as (1), (2) and (3) are currently on remand. One juvenile (4) is serving a 6 months sentence. One juvenile (5) is serving a sentence of 3 months plus 2 months cumulative, plus 2 months concurrent.

3. Juvenile offenders who may require specialised treatment are eligible for any of the services offered to individuals and families by the Health Department, Education Department and the Department of Community Development. Some of the treatment options which are available from these departments are: individual and family therapy, counselling, special education, group work, etc.

   New initiatives under consideration in the Northern Region include the establishment of a medium term residential program for teenagers, a fine repayment scheme, and a community service order scheme.

4. The present staffing of Malak is being increased to provide closer supervision 24 hours a day. No change is being contemplated which would significantly alter the purpose of programs originally designed for Malak House.

   Since August 1979 Malak House has accommodated 95 juveniles (71 males and 24 females) for periods ranging from overnight to 8 months.

Aboriginal Community Worker Training Unit

218 Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

1. (a) What types of training programs are currently being offered by the Aboriginal Community Worker Training Unit in (i) Darwin, (ii) Alice Springs, and (iii) any other regional centre, (b) how many people have completed training in each of the above programs?

2. Has he received any feedback from Aboriginal communities - through is department's officers - regarding the success or value of the community worker training program?

3. Will the minister table a report on the Aboriginal Community Worker Training Unit and, if not, why not?

ANSWER

1. Training programs are provided on an ongoing basis to all Aboriginal community workers involved in the Aboriginal Community Work Program throughout the NT. The training programs have been provided in Darwin and Alice Springs as the support services and resources centres for the programs are based in Darwin and Alice Springs. All community workers involved in the Aboriginal Work Program are involved in a training scheme which focuses on the activities of the Department of Community Development. In addition, some specialised training has been provided in regard to the activities of the Department of Social Security.

2. No feedback has been received from Aboriginal communities regarding

the success or value of the community workers training.

3. The NT government initiated the Aboriginal Community Work Program for a pilot period of 3 years which will conclude in January 1982. A report will be compiled for consideration by government reviewing the program. A decision on tabling the document will be made at that time.

Expiry Date on Packaged Milk

219 Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

1. Is he aware that packaged milk which did not bear the product's expiry date has recently been supplied to Alice Springs consumers?
2. Does Territory legislation require perishable goods to carry notice of expiry date?
3. If not, when will he introduce legislation requiring perishable products to carry notice of expiry date?

ANSWER

1. I was not aware that packaged milk which did not bear the product's expiry date has recently been supplied to Alice Springs consumers.
2. There is no Territory legislation requiring perishable goods to carry notice of expiry date.
3. A bill was introduced at the last sittings of the Legislative Assembly.

Guidelines for Grants-in-Aid

220 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

1. In response to queries in the 1978-79 Auditor-General's report concerning grants in the amounts of $150,000, $250,000 and $260,000, his department stated that 'a comprehensive set of guidelines for grant administration was being drawn up'. Has this been done?
2. Has his department introduced a system of monitoring the use of grants or subsidies through the submission of quarterly certificates of expenditure by the recipients of grants?
3. In relation to the grant of $250,000 to the Corporation of the Municipality of Alice Springs for the purpose of building a public library, why was a cheque for this sum held by the department and not dispatched to the grantee until 20 August 1979 although it was drawn on 29 June 1979?
4. What further reasons has he to justify the grants referred to in 1. being made in advance of need additional to the explanations which failed to satisfy the Auditor-General?
5. What progress has been made in developing and implementing an effective recovery system to meet the criticism of the Auditor-General in relation to incorrect claims associated with assistance to supporting parents and persons in need being lodged on the Commonwealth Department of Social Security?
6. Has the income maintenance form used by applicants for benefits assistance been re-designed as promised by his department to overcome the deficiency complained of by the Auditor-General?
7. What action has been taken by his department to improve the debt recovery system criticised by the Auditor-General and has that action produced beneficial results?
8. Why were matters relating to compliance with Treasurer's Directions in

the provision of subsidies to local government authorities raised by the Auditor-General in late 1979 not resolved by the time of an audit undertaken in May 1980?

9. How was control exercised over dollar-for-dollar subsidies given to local government authorities in view of the Auditor-General's statement that no formal procedures or administrative arrangements had been established to ensure grant and subsidy funds were expended in an appropriate manner, that projects were satisfactorily completed and that the purpose of the grant was achieved?

10. What progress has been made in establishing the Grants Commission which the government told the Auditor-General it would set up to disburse and control grant moneys?

11. Has the Interim Committee proposed by his department for establishment in 1980-81 to prescribe rules as to the disbursement and control of grant moneys been set up?

12. What were the details of those grants or subsidies, and the circumstances in which they were made available, which the Auditor-General said appeared to be outside the criteria for eligibility?

ANSWER

1. A comprehensive set of guidelines and procedures for Grants-in-Aid has been developed to assist all staff in the handling and assessment of grant applications. This document is currently being printed and will soon be distributed.

   Guidelines have also been developed for Personal Income Tax Sharing and Federal Roads Grant Moneys. Establishment of the Grants Committee will enable the system for grants disbursement to be confirmed.

2. The submission of quarterly statements of expenditure became effective from 1 July 1981, for all appropriate grants and subsidies.

3. To enable prompt payment of some claims, it is necessary from time to time to prepare cheques in expectation of documentation being received.

   It does not always follow that documentation when received contains all the information necessary to enable payment to immediately be made.

4. The delay in forwarding the cheque for $250,000 to the Alice Springs Town Council clearly demonstrates that the grant was not made in advance of the need.

5. No further claims are being lodged on the Commonwealth Department of Social Security for assistance to supporting parents and persons in need as the Department of Social Security assumed responsibility for the payment of Supporting Parents Benefit from 6 November 1980.

   Consequently the need for procedures relating to recovery action from the Department of Social Security no longer exists.

6. The income maintenance form has not been redesigned as yet as the main deficiency 'no provision for details of residence qualifications' pointed out in the Auditor-General's report, is no longer applicable since Supporting Parents Benefit is now the Department of Social Security's responsibility. The form itself is being re-designed at the present time in conjunction with revised procedures for financial assistance.

7. Recovery procedures were modified as a result of the Auditor-General's report and an officer was redeployed for a period of 4 months to finalise outstanding debts at that time.

While this achieved some results, it was not entirely successful.

The Auditor-General's Department has been kept informed of current developments.

8. Matters raised by the Audit Bureau were subject to on-going negotiations with the Local Government Association. As a result a formula to determine the amount of operational subsidies has been adopted. Local government inspectors have been appointed, however, the final form of acquittal for subsidies is yet to be agreed with the Local Government Association.

9. There is a Cabinet approved criteria against which requests for dollar-for-dollar subsidies are tested. All proposals are submitted to me for assessment and approval. Payments are made on claims certified jointly by the town clerk and the town engineer.

   The recently introduced quarterly statement of expenditure provided a further measure of control.

10. The Northern Territory Grants Committee will be structured as follows:

    independent chairman; 1 representative from the Department of Treasury; 1 representative from the Department of Community Development; and 2 representatives from a panel submitted by the Local Government Association.

11. In anticipation of the Northern Territory Grants Committee being established, it was resolved not to proceed with the formation of an interim committee.

12. Apart from the query regarding payment of $176,165 to the Darwin City Council, which has satisfactorily been responded to, the Auditor-General did not identify any grants or subsidies which may have appeared to be outside the criteria for eligibility.

Royalty Payments by Nabalco

221 Mr ISAACS to MINISTER for MINES and ENERGY

Given the Auditor-General's reference to the accounting arrangements and the interim royalty rate in regard to the Nabalco Agreement, can he inform me of the present position regarding royalty payments from Nabalco?

ANSWER

1. Discussions between the Northern Territory and the companies on 2 Gove royalties issues were re-opened in November 1980. These issues were:

   (a) royalty adjustments for 1973-78 in accordance with profitability criteria in the Special Mineral Lease; and

   (b) royalty increases to the maxima in Special Mineral Leases rejected by companies in June 1979.

2. Issue 1(a) was settled between the companies and Northern Territory in December 1980. This matter is now awaiting Commonwealth ratification which is necessary because certain decisions are required by Commonwealth because of its pre-self-government responsibilities.

3. In June 1981, the companies agreed to pay the maximum royalty rates in the Special Mineral Lease as from 1 January 1979. Back royalties of $2.8 million have been received. Gove royalties are now about $2.2 million per year instead of around $0.9 million per year.

Auditor-General's Report - Deficiencies in Education Department

226 Mr ISAACS to MINISTER for EDUCATION

What action has he taken to correct and prevent repetition of the following deficiencies referred to by the Auditor-General in his annual report:

(a) the list of potential suppliers of goods and services to the department was not kept up to date;

(b) certain contracts arranged had not been published in the Gazette as required by Treasurer's Regulations;

(c) records were not maintained at the Supply Section concerning the movement of contract documents and quotations; and

(d) some transactions had not been recorded in the Security Deposit Register at the Supply Section?

ANSWER

(a) The list of potential suppliers has been prepared, approved and is kept up to date.

(b) Gazette advertisements have been brought up to date and are now actioned promptly.

(c) Records of movements of contract documents are now maintained satisfactorily.

(d) The Security Deposit Register is updated.

Vandalism at Alice Springs High School

227 Mr BELL to MINISTER for EDUCATION

1. Is he concerned at reports of breaking, entering and vandalism at the Alice Springs High School?

2. What measures are being taken to improve security at the school?

3. Does a caretaker live at the school and, if not, why not?

4. Have regulations or guidelines been drawn up by him or his department regarding security measures at NT schools and, if so, will he table them? If the answer to 4 is 'no', why not?

5. Does Alice Springs High School receive more attention from vandals than other schools in the Territory?

ANSWER

1. They are not reports, they are fact and I deplore all forms of vandalism wherever it occurs.

2. Measures recently taken to improve security at Alice Springs High School include the installation of barrel bolts to all ground floor windows (it is programmed to do the same to 81 first floor windows during the next financial year), and the employment on a 6 month trial basis of Metropolitan Security Services to check the school at nights and at weekends.

3. Schools generally employ janitors rather than caretakers. While the position of janitor is advertised as a live-in job (caravan residence) it is not always possible to recruit a suitable person who is willing to live-in. The current occupant does not live-in.

4. No. Each principal has autonomy in making arrangements to ensure the security of the buildings for which he is responsible. In the past, there has been very little need for security. However, the Northern Territory Department of Education handbook, which is currently being

revised, will include a section on security arrangements.

5. Unfortunately, Alice Springs High School has in recent times received more attention from vandals than other schools in the Territory. It is hoped that the arrangements outlined in 2. above will rectify this unsatisfactory situation.

8CCC-FM Alice Springs

228 Mr BELL to MINISTER for EDUCATION

1. Is he able to say what body holds the C class community public broadcasting licence 8CCC-FM in Alice Springs?
2. What are (a) the names, and (b) the positions of the people who are members of this body?
3. Are these people (a) elected, or (b) appointed, and if they are appointed, (c) who appoints them, and (d) on what criteria?
4. What other boards or committees are involved with 8CCC-FM?
5. If other groups are involved what are (a) the names, and (b) the positions of the people involved?
6. Are these people (a) elected, or (b) appointed, and if they are appointed, (c) who appoints them, and (d) on what criteria?
7. How many public meetings have been held to discuss the development and management of 8CCC-FM?
8. Is 8CCC-FM a member of the Public Broadcasting Commission Association of Australia, and does it subscribe to that body's code of ethics?
9. If the answer is yes, is he aware that the code of ethics includes these points:
   (a) all broadcasters at a particular station should be encouraged to participate in management and policy-making; and
   (b) the management should see itself as assisting and not controlling the broadcasters?
10. Are these codes being observed at 8CCC-FM and, if not, why not?
11. How much has been spent on the establishment and running of 8CCC-FM?
12. How much has been contributed by the Alice Springs community?
13. If the answer to 12 is nil, would he see a contradiction between the organisation and operation of 8CCC-FM and other C class public broadcasting stations in Australia?

ANSWER

1. The C class community broadcasting licence for radio station 8CCC-FM in Alice Springs is held by the Community College of Central Australia FM Broadcasting Association Incorporated. The membership of this body is identical with membership of the Council of the Community College of Central Australia.
2. The names and positions of the people who are members of this body are:
   - Mr H. Weber, Chairman, Businessman, Electrical and Building Contractor, Alice Springs.
   - Mr G. Loveday, Deputy Chairman, Assistant General Manager, Northern Territory Electricity Commission, Alice Springs.
   - Mr G. Chard, Director, Technical and Further Education, Department of Education, Darwin.
   - Mrs L. Faehse, Architect, Alice Springs.
   - Mrs N. Giese, Chairman of Darwin Community College Council, Darwin.

- Mr E. Hampton, Senior Vocational Officer, Commonwealth Employment Service, Department of Employment and Youth Affairs, Alice Springs.
- Mr W. Kinsman, Businessman, Kinsman Automotive Engineering, Alice Springs.
- Mrs R. McEllister, Clerical Officer, Community College of Central Australia, Alice Springs.
- Mrs K. Rose, Teaching Assistant, Karguru Primary School, Tennant Creek.
- Mrs Y. Sathianathan, Project Officer, Northern Territory Electricity Commission, Alice Springs.
- Mr G. Sawtell, Businessman, Electrical Contractor, Alice Springs.
- Mr P. Smith, Manager, Powerhouse, Peko-Wallsend Operations Limited, Tennant Creek.
- Mr H. Tinsley, Acting Principal, Community College of Central Australia, Alice Springs.
- Mrs M. Trindle, Home Liaison Officer, Department of Education, Alice Springs.
- Mrs M. Vrazda, Senior Lecturer in Business Studies, Community College of Central Australia, Alice Springs.

3. Mr Hampton, Mr Kinsman, Mr Loveday, Mrs Rose, Mr Sathianathan, Mr Sawtell, Mr Smith, Mrs Trindle, Mr Weber were appointed by the Minister for Education from the community of interest of the college.

   Mrs Faehse was elected by the student body of the college.

   Mrs Vrazda and Mrs McEllister were elected by the staff of the college.

   Mrs Giese was appointed from the Council of the Darwin Community College by the Minister for Education.

   Mr Chard and Mr Tinsley are ex-officio members.

4. The CCCA FM Broadcasting Association Incorporated reports that a station board of management, a program advisory committee, and a technical advisory committee have been proposed for involvement with 8CCC-FM subject to the adoption of the constitution of the CCCA FM Broadcasting Association Incorporated and its lodgement with the Registrar of Companies.

5. See answer to 4.

6. See answer to 4.

7. - 12. The Community College of Central Australia FM Broadcasting Association Incorporated reports that 3 public meetings have been held to discuss the development and management of 8CCC-FM.

   8CCC-FM is a member of the Public Broadcasting Association and subscribes to that body's code of ethics.

   Broadcasters at station 8CCC-FM will be encouraged to participate in management and policy-making as soon as the station management structure is finalised by the association.

   $16,000 has been spent on the establishment of 8CCC-FM comprising $7,500 for initial equipment and $8,500 for refurbishing a demountable for studio; $27,137 has been spent on running 8CCC-FM comprising $10,5000 operational expenses, $5,900 equipment, and $10,737 for manager's salary.

   The Alice Springs community has contributed no money although there have been about 30 volunteers to operate the station.

13. An instrument to establish a trust account for the station's operations was issued by the Treasury on 4 June 1981 to enable the Community College of Central Australia FM Broadcasting Association In-

corporated to receive and expend funds in accordance with the usual practice of C class public broadcasting stations in Australia.

Brucellosis and Tuberculosis Eradication Campaign

229 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

1. Is there a formal agreement between the Northern Territory government and the Commonwealth government in respect of brucellosis and tuberculosis compensation funding?

2. In the light of problems highlighted by the Auditor-General in his 1980 report, are there now adequate procedures available that ensure effective operation of the compensation scheme?

ANSWER

1. There is no formal agreement between the Northern Territory and the Commonwealth in respect of brucellosis and tuberculosis compensation funding.

   There is broad agreement in the Memorandum of Understanding, Section 34, Special Purpose Revenue Grants.

2. Yes. Procedures have been tightened up considerably, sufficient to ensure the effective operation of the compensation scheme.

   For brucellosis compensation, the Commonwealth contribution is 75% of 'farm gate value' and the State/Territory contribution is 25%.

   For tuberculosis compensation, the Commonwealth contribution is 50%, the State/Territory 25% and the remaining 25% is regarded as producer contribution.

   The compensation values for 1980-81 are -

Category	Darwin/Gulf District	Victoria River District	Barkly Tablelands District	Alice Springs District
Cattle				
Calf	40	40	50	50
Weaner	60	60	80	80
Store steer	90	100	120	120
Fat steer	150	170	200	200
Store bullock	110	120	130	130
Fat bullock	180	200	300	300
Breeding cow	90	100	150	150
Fat cow	120	150	200	200
Bull, under 7 years	200	200	200	200
Bulls, mickey or aged	90	100	100	100

Buffaloes	All Districts
Calf	40
Weaner	100
Cow	140
Bull	180

   The compensation values for 1981-2 are presently being negotiated with industry.

Radiation Safety Training

235 Mr BELL to MINISTER for TRANSPORT and WORKS

1. Have any staff members of his department received training in using and holding radioactive sources?

2. Has his department appointed an officer trained in such radiation safety procedure to ensure the safe storage of berylium and caesium sources held by the department near Alice Springs?

ANSWER

1. Yes.

2. My department's Alice Springs office has a radiation safety officer who is trained in handling radioactive sources and is in close liaison with Department of Health officers responsible for radiation matters. All radioactive sources controlled by my department are handled in strict compliance with Australian Radiation Standards legislation.

Education Facilities for Seamen

236 Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

1. Does he intend to set up facilities for the training, education and examination of seamen to ensure they have every opportunity to gain basic qualifications or to upgrade existing qualifications?

2. If so, where are the facilities to be set up and by whom will they be staffed?

ANSWER

1. Yes.

2. The Darwin Community College has agreed in principle to conduct refresher courses and examinations for the various certificates of competency based on syllabuses and examination requirements set out in detail in section 2 of the Uniform Shipping Laws Code.

   In this regard the college will act as agent for the Director of Transport who has responsibility for day to day administration of the proposed Marine Act and Regulations. The director is to be supported by a principal marine surveyor and a shipping officer.

Australian Government Representative in Bali

237 Mr ISAACS to CHIEF MINISTER

What success has he had in his attempts to persuade the Australian government to station a representative in Bali on a permanent basis to service the large number of Australian tourists now visiting the island?

ANSWER

I have approached the Federal government pointing out the need for permanent Australian representation in Bali and other places. However, in the final analysis this is a decision for the Commonwealth Minister for Foreign Affairs, and he is the most appropriate person to whom you should address your question.

MacDonnell Ranges National Park

238 Mr BELL to CHIEF MINISTER

When will the MacDonnell Ranges National Park, as announced in the Centralian Advocate of 5 June 1980, be gazetted?

ANSWER

The 9th Territory Parks and Wildlife Commission Meeting in June 1979 endorsed a series of conservation principles and long-term planning objectives for a MacDonnell Ranges National Park.

Progress to date is as follows:

(a) The Central MacDonnells National Park has been approved and is being processed through the Department of Lands. This will eventually combine Simpsons Gap and the Alice Springs Telegraph Station National Parks into one major national park complex.

(b) Agreement has been reached with pastoral lessees for the creation of a further reserve in the East MacDonnells.

(c) Negotiations to acquire land for the creation of a West MacDonnells National Park are at a sensitive stage and have run into some difficulties.

It is anticipated that the park will be gazetted once the negotiations and the necessary arrangements have been completed.

Lake Phillipson Coal Desposit

242 Mr ISAACS to MINISTER for MINES and ENERGY

Is the Lake Phillipson coal deposit still under consideration for use as a fuel in the Northern Territory and, if not, why not?

ANSWER

As yet, no Australian coals have been eliminated for use as a fuel in the Territory.

However, the Lake Phillipson coals are disadvantaged by their low heating value and their distance overland from the proposed Darwin coal fired power station. This coal also contains significant sodium and potassium chlorides which may cause fouling in boilers.

A further problem is the considerable uncertainty of the coal mine at Lake Phillipson being in operation by 1987, when the first coal is required in Darwin. The earliest date for completion of the Alice Springs-Darwin rail link is advised as being 1988.

Incidentally, the proposed South Australian government feasibility study on Lake Phillipson development, to which the Northern Territory government was to contribute, has been postponed pending the results of an expanded exploration program by Utah Development Company.

Sites for Darwin Power Station

243 Mr ISAACS to MINISTER for MINES and ENERGY

1. What government authorities other than his department are involved in assessing the 4 possible sites for Darwin's coal-fired power station?

2. What other organisations are being consulted as to the siting of the station?

3. What methodology has been devised to ensure that all views are canvassed?

ANSWER

1. Site assessment studies involved 26 government departments, authorities and commissions.

List of organisations contacted during siting study

Departments

Aboriginal Affairs

Community Development: Library Services, Correctional Services Division, Community Services Division, Local Government Division, Community Government Division, and Youth, Sport and Recreation Branch
Chief Minister
Defence: Joint Services Local Planning Committees
Education

Darwin Electricity Supply

244 Mr ISAACS to MINISTER for MINES and ENERGY

1. Given that the first units of power to be generated by the new power station will not come on stream until 1986-7, what surplus capacity is available under the present system to cope with growing demand up to 1986-7?

2. What rate of growth in demand for power is assumed in his department's projections?

3. Has his department made provision for major energy intensive industries in its estimates for future power needs and, if so, what industries have been considered?

ANSWER

1. Capacity in excess of maximum demand will be as follows:

1	2	3	4	5	6
Year	Installed MW	Available MW	Firm MW	Max. Demand MW	Spare (4-5) MW
1982	181	142.5	119	92.2	26.8
1983	181	142.5	119	101.4	17.6
1984	181	142.5	119	111.6	7.4
1985	211	172.5	149	122.7	26.3
1986	211	172.5	149	135.0	14.0
1987	256	187.5	157.5	147.2	10.3

(Cabinet Decision 1585 - 5 March 1981 approved in principle the installation of aero derived gas turbines and the schedule shows two 15 MW units commissioned by 1985).

2. Rate of growth assumed is: 10% until 1987, 9% thereafter.

3. No provision has been made for major energy intensive industries. Timing and size of future coal-fired generating units is flexible and, in practice, lead times to establish energy intensive industries are greater than lead times for new generating plant.

Coal Supplies for Darwin Power Station

245 Mr ISAACS to MINISTER for MINES and ENERGY

1. What was the reaction of the Queensland Minister for Mines and Energy to his advice to him on our future requirements in terms of (a) type, (b) tonnage, and (c) price of coal?

2. Given the strong demand for coal, has he any assurance from the Queensland government that the Territory's future coal needs from that state will be secure?

3. Given that the characteristics of the coal selected for the power station will have a significant bearing on the engineering aspects of the plant, when does he expect a firm agreement to be struck between the Territory government and suppliers of the fuel?

ANSWER

1. It was not anticipated that the Queensland Minister for Mines and Energy would respond in terms of type, tonnage and price.

   The Queensland Minister for Mines and Energy has alerted his State Electricity Commissioner of intended discussions at officer level and the respective Electricity Commissions are already in contact.

2. Some 20 potential coal suppliers have been contacted throughout Queensland and New South Wales.

   It is unlikely that the Queensland government would be party to a coal supply contract. The question of assurance from the Queensland government does not arise.

3. Dependent upon economic assessment of options, a coal supply contract/s would be placed on date/s between mid-1982 and mid-1983.

Site Consultants for Darwin Power Station

246 Mr ISAACS to MINISTER for MINES and ENERGY

1. What private consultants have been retained to report to the Northern Territory government on the relative merits of the 4 proposed sites for Darwin's power station?
2. What is the estimated cost for the above consultants?
3. Were tenders called for the above contracts?
4. Does he intend to make available to the Assembly the findings from the consultants' investigations?

ANSWER

1. Merz & McLellan & Partners were commissioned to assess the relative merits of 4 possible sites for the coal-fired power station.
2. The estimated cost of this consultancy is $145,000.
3. Consultancy costs are fixed in accordance with ACEA (Association of Consulting Engineers Australia) terms and calling for tenders is inappropriate.

   Merz & McLellan & Partners have been involved in site assessment studies for a coal-fired power station since 1969. Some 13 coastal sites have been examined by M&M&P. For this reason, and in order to expedite this first major step towards a coal-fired power station, proposals from other consultants were not sought.
4. Whether or not the full report will be made available to the Assembly is a matter for consideration by Cabinet.

Bonaparte Gulf Natural Gas Reserves

247 Mr ISAACS to MINISTER for MINES and ENERGY

Has any tentative agreement been struck between the Territory and Western Australian governments in relation to the exploitation of the natural gas reserves both onshore and offshore in the Bonaparte Gulf region?

ANSWER

Existing data preclude any reliable estimate of the gas reserves in the Bonaparte Gulf Basin. The Petrel field, in Northern Territory waters, may contain between 2.8 and 150 billion cubic metres of recoverable gas, though this needs proving. Further wells are required to clearly define reserves, the first of which will be drilled this year. Similar uncertainty exists as to gas reserves in the Tern field in Western Australian waters.

Development will require reserves at the upper end of the indicated range to be commercially viable, and will probably need to be associated with LNG exports.

Exploration for hydrocarbons in the onshore region of the Bonaparte Gulf is at an even earlier stage.

In view of the gross uncertainties as to available gas reserves, it would be quite premature to strike a tentative agreement with the Western Australian government in relation to eventual exploitation.

Hospitality Course for Darwin Community College

248 Mr BELL to MINISTER for EDUCATION

1. Is Darwin Community College planning to conduct a hospitality course similar to that which is being run by the CCCA at Gillen House, Alice Springs?

2. If not, why not; and, if so, when will the course commence and what is the expected maximum student intake?

ANSWER

No, with present demands for training it is economical to centralise training at the Gillen House location. Any increase in demand would necessitate a review of the total situation which could make demands for training in Darwin as well as Alice Springs.

Short courses (e.g., food and wine service) have been and will be conducted in conjunction with the Community College of Central Australia and the Industries Training Commission.

NT Population Growth Projections

250 Mr ISAACS to MINISTER for LANDS and HOUSING

1. Has the land development and housing policy branch of the Department of Lands and Housing calculated population projections for the Northern Territory for the years 1985, 1990, 1995 and 2000?

2. If so, (a) how many different growth rates were applied, (b) what is the estimated rate of increase in housing stock to meet the demand for dwellings associated with these projections, (c) what proportion of the total dwelling stock will be required as rental stock to meet the housing demands associated with the population growth projections, (d) what vacancy rate has the department applied in its projected housing stock requirements, (e) what ratio of public housing to private housing is considered appropriate in relation to the growth projections, and (f) does the department have a regional breakdown of population growth projections and associated housing requirements for (i) Darwin, (ii) Palmerston, (iii) Nhulunbuy, (iv) Alice Springs, (v) Katherine, and (vi) Tennant Creek?

ANSWER

The Department of Lands does not calculate population projections for the Northern Territory.

The Department of Lands does have growth projections along with associated housing requirements, for Darwin (including Palmerston), Alice Springs, Katherine and Tennant Creek. This information is delineated in the following tables.

Table 1 indicates the growth rates that are being used by the Department of Lands for planning purposes. These rates and the associated projections of residential land needs are up-dated half-yearly for Darwin and Alice Springs, yearly for other centres. The implications of higher growth rates (+2 and +4) have also been investigated. Table 2 indicates the average rates of growth used for planning and the respective expected rate of increase in structured dwellings based on planned land turn-off for the period 1980-85. Tables 3A to 3D indicate the projected shifts in % in home owner-occupancy, NTHC, Commonwealth and private rentals of the structured dwelling stock over the period 1979-85. The land need projections assume an increasing vacancy ratio to reach 3.0% by 1985.

The Department of Lands examined housing needs in Nhulunbuy in August-September 1980. The ensuent housing need projections utilised a growth rate of 3.4% p.a. over the period 1979-86. These projections were provided to the NTHC. The NT Housing Commission is currently building 10 one-bedroom flats, 16 two-bedroom flats and 2 four-bedroom houses. The NTHC is planning to build on the order of 35 structured dwellings in Nhulunbuy in each of the next 3 years.

TABLE 1

RATES OF GROWTH IN % UTILIZED FOR PLANNING

Years	79 - 81	81 - 86	86 - 91	91 - 96	96 - 01
Centres					
Darwin	7	7	6	5	4
Alice Springs	6	5.5	4	3	2
Katherine	2.6	4.5	3	2	1.5
Tennant Creek	8.0	3.6	2	1.5	1.5

TABLE 2

1980-85 INCREASE IN STRUCTURED DWELLING STOCK TO MEET DEMAND FOR HOUSING

Centres	Average Rate of Growth	Expected Rate of Increase in Structured Dwellings
Darwin	7	9.8
Alice Springs	5.6	7.5
Katherine	4.2	8.7
Tennant Creek	4.6	10.3

Housing Statistics for NT

251 Mr ISAACS to MINISTER for LANDS and HOUSING

1. What was the proportion of caravan dwellings of the total dwelling stock in the Northern Territory in (a) 1977, (b) 1978, (c) 1979, and (d) 1980?

2. What proportion of the total dwelling stock was rental stock in (a) 1977, (b) 1978, (c) 1979, and (d) 1980?

3. What was the ratio of public to private housing in the Territory in (a) 1977, (b) 1978, (c) 1979, and (d) 1980?

ANSWER

The following answers are based on data derived from the Australian Bureau of Statistics Urban Population Count of 4 July 1979. These are the only relevant statistics available and they relate only to selected areas, viz. the Greater Darwin Area, the Darwin Statistical Division, Alice Springs, Katherine, Tennant Creek and Nhulunbuy. Accordingly, answers to parts 1(a), (b), (d), 2(a), (b), (d) and 3(a), (b), (d) cannot be given. The answers provided are based on totals for the Greater Darwin Area, Alice Springs, Katherine, Tennant Creek and Nhulunbuy, plus the differentials between figures for the Darwin Statistical Division and the Greater Darwin Area.

1.(c) As at 4 July 1979, the total number of dwellings (including houses, flats, demountables, caravans, etc, but excluding hotels, motels, hostels, etc) in the above-mentioned areas was 21,937. Caravans totalled 1,742 or 7.9% of the total.

2.(c) As at 4 July 1979, the number of rental dwelling (including houses, flats, demountables, caravans, etc, but excluding hotels, motels, hostels, etc) in the above-mentioned areas was 12,687 which represented about 57.8% of the total stock of such dwellings. The number of rental houses and flats, only, was 12,183, or about 64.2% of all houses and flats. The percentages are approximate as some dwellings were recorded in the count as being occupied other than on an owner-purchaser or rental basis, while the basis of occupancy of some other dwellings was not stated.

3.(c) As at 4 July 1979, the ratio of government to non-government dwellings (including houses, flats, demountables, caravans, etc, but excluding hotels, motels, hostels, etc) in the above-mentioned areas was approximately 1.43 to 1. The ratio for houses and flats, only, was approximately 1.54 to 1. The ratios are approximate for the reasons given above.

Survey Branch - Consultants

252 Mr ISAACS to MINISTER for LANDS and HOUSING

1. Which were the 6 consultant survey firms employed in the Survey Branch of the Department of Lands and Housing in the financial year 1979-80?

2. How much was paid to each firm for its services?

ANSWER

During 1979-80 the 6 survey consultants firms and the amounts paid for their services were as follows -

Name	Total Paid
1. James, James & Lea	$ 85,604
2. Gutteridge, Haskins & Davey	$ 96,753
3. Chrisp de Vries	$ 15,010
4. Qasco	$ 8,570
5. P.R. Coppin	$ 9,707
6. Brian Vaughan	$ 2,340
	$ 217,984

Leanyer and Karama Subdivisions

253 Mr ISAACS to MINISTER for LANDS and HOUSING

1. Did the department have available to it, at the beginning of the 1980 calendar year, cost estimates for public sector development of the Leanyer and Karama subdivisions?

2. If so, what was the estimated cost that the department was able to offer residential blocks to the public?

3. What were the estimated costs of private sector development of the subdivisions of (a) Leanyer and (b) Karama at the beginning of 1980?

ANSWER

1. The department did not have accurate cost estimates at the beginning of 1980 for public sector development of Leanyer or Karama.

   The 1979-80 Budget Paper No. 5 will show that the government intended to construct headworks only to Leanyer and so an estimate for internal development of that subdivision was not considered necessary.

   In June 1979 the official estimate for full development by the public sector of the then proposed 1085 lots in Karama was $16,200,000. This figure was not up-dated again as the decision was then taken to develop Karama by private enterprise.

2. Under the system of land sales inherited from the Commonwealth the cost of developed land was rarely recouped by market sales. Based on prevailing prices, in June 1979 the estimated revenue from sale of Karama lots was approximately $12,000,000. It should be noted however, that land prices rose at 2 subsequent government auctions after this time.

3. There is no formal reporting of private sector development costs, either as estimates or on completion of works.

Department of Lands and Housing - Consultants

254 Mr ISAACS to MINISTER for LANDS and HOUSING

What fees were paid to private consultants by the Department of Lands and Housing in the financial year 1979-80?

ANSWER

During 1979-80 fees paid to private consultants were -

Management Services Division	Nil
Survey & Mapping Division	$ 350,749
Planning & Land Development Division	$ 109,402
	$ 460,151

Management Services Division - Budget Item

255 Mr ISAACS to MINISTER for LANDS and HOUSING

Will he identify items upon which funds were expended under the 'Other Services Section' of the Management Services Division of the department in the financial year 1979-80?

ANSWER

Under the 'Other Services Section' of the Management Services Division of the department, in the financial year 1979-80 the sum of $101,300 was expended. This sum was a one-off reimbursement payment to the Northern Territory Housing Commission who had originally paid Australian National Railways for improvements on residential lots which have since been resumed by the Department of Lands.

Details of lots affected and amounts paid are as follows -

Part Lot	$
4882	22,600
4883	8,800
58	7,400
59	---
4981	15,800
4982	13,900
4985	15,500
4986	17,300
	$ 101,300

Housing in NT

256 Mr ISAACS to MINISTER for LANDS and HOUSING

1. What is the present stock of dwellings in the Northern Territory by urban centre?

2. What is the per annum increase in dwelling stock required to meet demand projections in each centre?

ANSWER

1. The latest available statistics of dwelling stocks in the Northern Territory, by urban centres, are presented in the following table:

Stocks of Dwellings (a): Selected Areas: Northern Territory

	1979 (b)				1981 (c) (d)			
	Houses	Flats	Other (e)	Total	Houses	Flats	Other (e)	Total
Greater Darwin Area	10,485	3,562	1,930	15,977	11,948	4,356	n.a.	n.a.
Darwin Statistical Division	11,420	3,580	2,433	17,433	n.a.	n.a.	n.a.	n.a.
Alice Springs	3,000	1,004	236	4,240	3,387	1,094	n.a.	n.a.
Katherine	608	148	217	973	646	192	n.a.	n.a.
Tennant Creek	509	139	150	798	605	192	n.a.	n.a.
Nhulunbuy	720	178	77	975	n.a.	n.a.	n.a.	n.a.

(a) Includes government and non-government dwellings but excludes hotels, motels, institutions, etc.
(b) As at 4 July.
(c) As at 30 June.
(d) Estimates only.
(e) Includes demountables, caravans, etc, n.a., not available.

Sources: Australian Bureau of Statistics, Darwin, for 1979; Department of Lands, Darwin, for 1981 estimates.

2. The Indicative Planning Council for the Housing Industry in its 1981 report estimated medium-term housing demand in the Territory, on average for the triennium 1981-2, in the range of 2,000 to 2,400 dwelling units.

However, the Council in suggesting the above-mentioned estimates of demand noted that its method of applying its household formation and demand model to the Territory may be deficient for several reasons, including:

- Difficulties in satisfactorily estimating functions for projecting household headship rates because of the small population base and the heavy involvement of the government in providing housing and housing finance, which can have a considerable effect on household formation.
- The backlog in demand for structured dwellings and the uncertain extent of the movement of households from non-structured and mobile dwellings to structured dwellings during the triennium.

Department of Lands and Housing - Staffing of Various Branches

257 Mr ISAACS to MINISTER for LANDS and HOUSING

What staff are based in Darwin in (a) Management Services Division, (b) Survey and Mapping Division, (c) Building Authority Branch, (d) Planning Branch, (e) Land Development and Housing Policy Branch, and (f) Land Administration Branch of his department?

ANSWER

Currently, the number of Department of Lands staff based in Darwin is -

(a) Management Services Division - 51; (b) Survey & Mapping Division - 121;
(c) Buildings Authority Branch - 22; (d) Planning Branch - 33;
(e) Land Development Branch - 25; (f) Land Administration Branch - 35.

Department of Lands and Housing - Termination of Employment

258 Mr ISAACS to MINISTER for LANDS and HOUSING

What were the reasons for termination of employment of 2 permanent employees within his department during 1979-80?

ANSWER

The 2 permanent employees of the Department of Lands were terminated following a continuous period of unexplained and unauthorised absence from duty.

Action was taken under section 51 of the Public Service Act and both employees were duly deemed to have resigned.

Department of Lands and Housing - Costs

259 Mr ISAACS to MINISTER for LANDS and HOUSING

During the financial year 1979-80 -

(a) what was the cost of (i) telephones and telexes, and (ii) travel in (A) Survey and Mapping Division, (B) Planning and Land Development Division, and (C) Management Services Division; and

(b) what were the major items of capital expenditure in (i) Survey and Mapping Division, and (ii) Management Services Division?

ANSWER

(A)(i) During 1979-80 there was no break-down of telephone charges to the 3 individual divisions. All accounts were paid from within the Management Services allocation. As the Department of Transport and Works pays all accounts associated with the NT government switchboard, the only accounts paid by this department are for official telephones and direct lines. The total amount expended during 1979-80 for telephones was $7,094.

As with telephones, all accounts for telexes were paid from within the Management Services Division allocation. The cost of this service during 1979-80 was $3,218.

(ii) The cost of travel for the department is dissected in the following manner, all recreation leave is paid for by the Management Services Division while all duty travel is paid for by the individual divisions. A break-down of costs is as follows -

Recreation Leave Travel	
Management Services Division	$ 126,612
Duty Travel	
Survey & Mapping Division	$ 9,266
Planning & Land Development Division	$ 24,763
Management Services Division	$ 8,607
	$ 42,636

(B) The major items of capital equipment ($1,000 and over) purchased during 1979-80 were -

(i) Survey & Mapping Division, Nil; and

(ii) Management Services Division, 1 vehicle $9,331.

Leanyer and Karama Subdivisions

260 Mr ISAACS to MINISTER for LANDS and HOUSING

1. What is the cost of headworks undertaken by the Northern Territory government in, (a) Leanyer, and (b) Karama subdivisions?

2. What is the projected total cost of development of, (a) Leanyer, and (b) Karama subdivisions?

956.829—34

ANSWER

1. (a) $437,000 - Leanyer; (b) $4,415,000 - Karama.

2. In June 1979 the government estimated that the cost of developing 1,085 lots in Karama would be $16,200,000. No estimate was formulated for full development of Leanyer as the government proposed to provide headworks only to that subdivision.

   There is no formal reporting of private sector development costs either as estimates or on completion of works and so the government cannot accurately predict or calculate the final total cost of development for either Karama or Leanyer.

Leanyer and Karama Subdivisions

261 Mr ISAACS to MINISTER for LANDS and HOUSING

In regard to the Leanyer and Karama subdivisions, (a) who are the 5 developers involved in the subdivisions, (b) how many of the anticipated 2,000 single residential stocks will be turned off by each developer, (c) what proportion of (i) Leanyer, and (ii) Karama will be allocated for medium density development, and (d) what proportion of the anticipated residential stocks have been or will be taken up by the Housing Commission?

ANSWER

(a) Developers	(b) Number of lots
1. Syd Hatch Pty Ltd (L1)	259
2. Hooker Rex Estates Pty Ltd (L2 L4)	706
3. Kern Land Pty Ltd (L3)	229
4. Henry & Walker Limited (K1 K4)	650
5. Interconstruction Enterprises Pty Ltd (K2 K3)	423

(c) (i) 12.3%
(ii) 11.7%

(d) 22.1%

Tangentyere Council - Application for Leases

263 Mr BELL to MINISTER for LANDS and HOUSING

When will the applications for the following Special Purposes Leases for transient and permanent residents in Alice Springs, lodged by the Tangentyere Council and other incorporated bodies before the minister's statement of 22 May, be approved:

(a) application for Eastside lease lodged by the Ilkalantja-Tuwatja Association;

(b) application for an area along Larapinta Drive lodged by the Ilwemp-Alkerte Association;

(c) application for an area north from the Indapa lease (south of the Gap) lodged by Tangentyere Council on behalf of the Joseph Mantjakura group;

(d) application for an area near Bazzo's farm north of Alice Springs lodged by Tangentyere Council for the use of transient Alyawarra people;

(e) application for land in valley north of Larapinta Drive lodged by Tangentyere Council for the use of transient Western Aranda people; and

(f) application for extensions to (i) Larapinta Valley lease, and (ii) Morris Soak lease?

ANSWER

The government has considered the issue of Special Purposes Leases, including the applications referred to, and has decided to reject them until adequate and rational use is made by Aboriginals of existing land grants.

To this end the Director, Southern Division, of the Department of Lands, will be contacting the Tangentyere Council to discuss the need for future applications for land in Alice Springs.

NZ Beef on Sale in Darwin

264 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

1. Has his attention been drawn to the fact that William Angliss and Co. in Darwin has prime NZ rump steak on sale at $3.95 per kilogram?
2. If so, is this dumping of foreign beef to continue with NT government approval?

ANSWER

1. I am aware that New Zealand beef and veal is imported into Australia in small quantities; and that this meat finds its way from the southern states into the Northern Territory from time to time.
2. The only time New Zealand meat is on sale in Australia is when the market rules of supply and demand make New Zealand meat cheaper than Australian.

Yulara Tourist Village

267 Ms D'ROZARIO to CHIEF MINISTER

What is the value of the government's investment to date in Yulara tourist development?

ANSWER

To date the Northern Territory government has committed $12.031m to the Yulara tourist development. Of this, the Department of Transport and Works has committed $7.144m and the Northern Territory Electricity Commission has committed $4.887m.

Department of Lands and Housing - Renting of Office Space

275 Mr LEO to MINISTER for LANDS and HOUSING

In regard to office and warehouse space rented by your department from private enterprise developers as at 31 May 1981 -

(a) what is the weekly cost;

(b) what are (i) the names, and (ii) business addresses of the developers involved;

(c) where are the rented premises located; and

(d) how long do the leases run for?

ANSWER

The Department of Transport and Works rents all Northern Territory government and warehouse accommodation.

The Department of Lands however occupied the following rented premises as at 31 May 1981:

1. Floors 8 and 9, as well as shops 10, 12, 13 and 14 of the Palmerston Building;

2. Moonta House;

3. the second floor of the NML Building; and

3. a depot at Winnellie.

Department of Primary Production and Tourist Commission - Renting of Office Space

276 Mr LEO to MINISTER for PRIMARY PRODUCTION and TOURISM

In regard to office and warehouse space rented by your department from private enterprise developers as at 31 May 1981 -

(a) what is the weekly cost;

(b) what are (i) the names, and (ii) business addresses of the developers involved;

(c) where are the rented premises located; and

(d) how long do the leases run for?

ANSWER

1. (a) $1,039.61 per week;

   (b) (i) Northern Territory Housing Commission;
   (ii) P.O. Box 884, Darwin;

   (c) Lot 3947, Harry Chan Drive, Darwin;

   (d) 1 November 1978 to 31 October 1983.

2. (a) $875 per week;

   (b) (i) Liveris Nominees;
   (ii) P.O. Box 736, Darwin;

   (c) Lot 1654, Corner Day and Harvey Streets, Darwin;

   (d) 1 May 1979 to 30 April 1982.

3. (a) $857.44 per week;

   (b) (i) Central Realty
   (ii) P.O. Box 2455, Alice Springs;

   (c) Lot 444, Stuart Highway, Alice Springs;

   (d) 1 September 1979 to 31 August 1984.

4. (a) $1,190.76 per week;

   (b) (i) Randazzo Holdings;
   (ii) P.O. Box 253, Darwin;

   (c) Radazzo Building, Katherine Terrace, Katherine;

   (d) 1 June 1980 to 31 May 1990.

Guidelines for Funding Cultural Activities

279 Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

(a) Does the NT government have a policy on the arts which guides it in the allocation of money for artistic and cultural activities?

(b) If so, will he outline that policy or table a copy of it in the Assembly?

ANSWER

Distribution of funds for arts and cultural activities is not subject to rigid guidelines.

Financial assistance is made available to community groups as a response by government to the expressed needs of the community and to assist organisations to plan and conduct activities which meet those needs.

To ensure that the initiative and the responsibility for programming remains within the community, government must maintain a flexible policy.

Unregistered Vehicles on Pastoral Leases

280 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

Are bullcatchers and other people who drive unregistered vehicles on pastoral properties permitted to drive on or to cross public roads in such vehicles?

ANSWER

No. It is an offence against the Motor Vehicles Act to drive an unregistered and or uninsured vehicle on public roads.

Brucellosis and Tuberculosis Eradication Techniques

281 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Will his department demonstrate tuberculosis and brucellosis eradication techniques on Crown land and Aboriginal land in the Top End to evaluate the cost and practicability of such techniques?

ANSWER

The north-western third of the Northern Territory, including the Top End, is 'provisionally free' of brucellosis. Residual infection occurs on only 2 properties in the Top End and is expected to be eradicated in the near future.

The campaign to eradicate tuberculosis is operating on private properties and on Aboriginal lands. Currently the program involves fencing, mustering and testing.

As proposed in a plan recently submitted for approval, a later phase of the program will include partial or total destocking. In that phase, Crown lands will also be included.

It is not proposed to fence, muster and test on Crown lands, except in Kakadu National Park. There, plans for the enclosure, mustering and testing of all buffaloes in the park are currently being finalised. A financial study of this buffalo operation has recently been concluded.

If a viewing of tuberculosis eradication technique on an Aboriginal reserve is required, this could be arranged, if adequate notice can be given.

'A Plan for Tuberculosis Eradication from a Property in the Katherine Area' has been published by my department as 'Technical Bulletin No. 37'.

Coffee Bush

282 Mr MacFARLANE to CHIEF MINISTER

1. Has his attention been drawn to a circular entitled "The Tree' circulated by Darwin environmentalist George Brown?
2. Does Leucaena leucacephala (coffee bush) convert carbon dioxide to carbohydrates as do other trees?
3. If so, why is it being destroyed in Darwin?
4. Is it proposed to establish a vast monoculture of coffee bush on the source of our 2 major rivers, the Daly and the Roper?
5. If so, (a) is the venture intended to satisfy an energy requirement of

a foreign country, and (b) what effect would it have on native plant and animal forms?

ANSWER

1. Yes.

2. Yes.

3. Leucaena leucocephala is considered as a pest on part of the Darwin foreshore because of its thick and prolific nature, and because it is gradually replacing other vegetation forms.

4. Unibeef Australia Pty Ltd has proposals to establish a large plantation of Leucaena leucocephala of the El Salvador variety on Mataranka Station. This station does cover the headwaters of both the Daly and Roper rivers.

   The El Salvador variety of Leucaena has different characteristics from the so-called coffee bush variety in that it grows in a tree form.

   Unibeef is conducting limited trials and the Conservation Commission has liaised with this company and has been monitoring the trials since their inception. Approval for large scale plantings will not be given until Unibeef has submitted an Environmental Impact Statement for examination by government.

5. (a) Not known but export of energy in any form is subject to Commonwealth government policy.

   (b) This will be a major subject of the Environmental Impact Statement to be prepared by the company. The Department of Primary Production has had trials of Leucaena on the Douglas Daly Experimental Station since 1972 and to date no deleterious effects have been observed.

Banning of Export of Barramundi

283 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Has he considered banning the export of barramundi from the Territory as a means of eliminating over-fishing of the species?

ANSWER

Yes.

Public Service Housing Commission Dwellings

285 Mr ISAACS to MINISTER for LANDS and HOUSING

In regard to NT Public Service Housing Commission dwellings, (a) how many were sold, (b) how many applications were received, and (c) what was the average sale price in (i) Darwin, (ii) Alice Springs, (iii) Katherine, (iv) Tennnant Creek, and (v) Pine Creek during the financial years (A) 1979-80, and (B) 1980-81?

ANSWER

(A) 1979 - 1980

(a) Number Sold

(i)	Darwin	104
(ii)	Alice Springs	14
(iii)	Katherine	1
(iv)	Tennant Creek	nil
(v)	Pine Creek	nil

(B) 1980 - 1981

(a) Number Sold

(i)	Darwin	364
(ii)	Alice Springs	39
(iii)	Katherine	5
(iv)	Tennant Creek	nil
(v)	Pine Creek	nil

(b) Number Applications Received		(b) Number Applications Received	
(i) Darwin	219	(i) Darwin	486
(ii) Alice Springs	27	(ii) Alice Springs	44
(iii) Katherine	8	(iii) Katherine	14
(iv) Tennant Creek	nil	(iv) Tennant Creek	nil
(v) Pine Creek	nil	(v) Pine Creek	nil
(c) Average Sale Price		(d) Average Sale Price	
(i) Darwin	$44,919	(i) Darwin	$53,591
(ii) Alice Springs	$39,370	(ii) Alice Springs	$45,236
(iii) Katherine	$30,600	(iii) Katherine	$40,900
(iv) Tennant Creek	--	(iv) Tennant Creek	--
(v) Pine Creek	--	(iv) Pine Creek	--

Public Housing in NT - Capital Expenditure

287 Mr ISAACS to MINISTER for LANDS and HOUSING

1. What was the capital expenditure on general public housing in the financial year 1979-80?

2. What was the estimate of capital expenditure on general public housing for the financial year 1980-81?

ANSWER

1. $17.973 million.

2. $18.842 million.

Housing Commission - Rental Rebate Assistance

290 Mr ISAACS to MINISTER for LANDS and HOUSING

How many Housing Commission tenants were in receipt of rental rebate assistance in the financial years (a) 1979-80, and (b) 1980-81 in (i) Darwin, (ii) Alice Springs, (iii) Katherine, and (iv) Tennant Creek?

ANSWER

	(a) 1979 - 1980	(b) 1980 - 1981
(i) Darwin	702	773
(ii) Alice Springs	212	197
(iii) Katherine	75	52
(iv) Tennant Creek	30	35
The above figures are as at 30 June. The total amount expended on rental rebates throughout the year is:	$ 920,027	$ 1,237,962

Public Housing in NT - Sales

291 Mr ISAACS to MINISTER for LANDS and HOUSING

1. How many general public houses were sold by the Housing Commission in the financial years (a) 1979-80, and (b) 1980-81 in (i) Darwin, (ii) Alice Springs, (iii) Katherine, (iv) Tennant Creek, (v) Pine Creek, (vi) Adelaide River, and (vii) Elliott?

2. What was the average sale price for dwellings sold in each centre during the same periods?

3. How many applications to purchase were received during the same periods?

ANSWER

	(a) 1979 - 1980		(b) 1980 - 1981	
1.	Number Sold		Number Sold	
(i)	Darwin	113	Darwin	105
(ii)	Alice Springs	71	Alice Springs	36
(iii)	Katherine	11	Katherine	5
(iv)	Tennant Creek	7	Tennant Creek	2
(v)	Pine Creek	nil	Pine Creek	nil
(vi)	Adelaide River	nil	Adelaide River	nil
(vii)	Elliott	nil	Elliott	nil
2.	Average Sale Price		Average Sale Price	
(i)	Darwin	$42,998	Darwin	$48,152
(ii)	Alice Springs	$33,190	Alice Springs	$40,799
(iii)	Katherine	$32,644	Katherine	$34,425
(iv)	Tennant Creek	$29,675	Tennant Creek	$35,300
(v)	Pine Creek	--	Pine Creek	--
(vi)	Adelaide River	--	Adelaide River	--
(vii)	Elliott	--	Elliott	--
3.	Number Applications		Number Applications	
(i)	Darwin	189	Darwin	93
(ii)	Alice Springs	89	Alice Springs	27
(iii)	Katherine	12	Katherine	6
(iv)	Tennant Creek	9	Tennant Creek	1
(v)	Pine Creek	nil	Pine Creek	nil
(vi)	Adelaide River	nil	Adelaide River	nil
(vii)	Elliott	1	Elliott	nil

Housing Commission Annual Report

292 Mr ISAACS to MINISTER for LANDS and HOUSING

When will the thirteenth Annual Report of the Northern Territory Housing Commission be tabled in accordance with the Financial Administration and Audit Act?

ANSWER

It will not be so tabled.

Contract Crop Production

303 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Does he intend to encourage growing of crops to overcome farmer inefficiency of which he has spoken so often?

ANSWER

The reference by the honourable member to farmer inefficiency is both gratuitous and superfluous and in any case it is not clear how a system of contracts would overcome the problems implied in the question.

However, I would say that it is correct that my department is presently examining ways and means of providing better security for Top End farmers during the development period of a cropping industry which we trust will be of real economic advantage to the Territory as a whole.

Export of Live Cattle to South-east Asia

304 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Has the government, through its instrumentalities such as TDC (finance),

ADMA (grain growing) and the Department of Primary Production (responsible for the cattle and buffalo industry), considered a development plan for the cattle and buffalo industries to supply available markets in South-east Asia with the young breeder buffalo and cattle they require, and which are presently being supplied by other, more distant states?

ANSWER

The Department of Primary Production in consultation with the Department of Lands and the Northern Territory Development Corporation is developing a program on behalf of the NT government for a controlled, domesticated, disease free, buffalo industry to service markets in Australia and overseas. It will be noted that buffalo are not available from other states as implied in the question.

Overtures were made to industry to provide locally bred Brahman cross Friesian dairy cattle for South-east Asia. Without guaranteed markets and prices the industry showed little interest.

Breeder cattle of the Brahman type are available in the NT but because of tuberculosis infection in most Top End herds it is less costly and time consuming for South-east Asian countries to purchase breeder cattle from TB-free herds in Queensland.

Discussions have been held between the Department of Primary Production and the Agricultural Development and Marketing Authority to run disease free cattle and or buffalo in conjunction with the crop projects on ADMA project farms. These cattle and or buffalo would be ideal for South-east Asian breeder markets.

Fisheries Enforcement Unit

305 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

(a) What was the cost of the department's fisheries enforcement operations in the financial years 1979-80 and 1980-81?

(b) What capital equipment is owned by the enforcement unit?

(c) What was the cost of leasing equipment used by the fisheries enforcement unit in the financial years 1979-80 and 1980-81?

(d) What action has been initiated by the department to overcome the inadequacies in patrolling the prawn fisheries at Groote Eylandt referred to in the department's annual report for the financial year 1979-80?

ANSWER

Fisheries enforcement is now a function of the Northern Territory Police.

(a) The cost of the department's fisheries enforcement operations in the financial year 1979-80 -

Capital items	$ 472,000
Administrative expenses	$ 175,000
Salaries	$ 282,000
TOTAL	$ 929,000

The cost of operations in the financial year 1980-81 -

Capital items	$ 41,327
Administrative expenses	$ 214,912
Salary - permanent staff	$ 287,659
Salary - boarding party	$ 35,757
Plus indirect costs	$ 28,838
TOTAL	$ 608,493

(b) Capital equipment held by the Marine and Fisheries Unit is as follows -

fishing patrol vessel 'Salloo', fishing patrol vessel 'Pobassoo', police patrol vessel 'Norlaw', 5 Toyota 4 x 4 utilities, and 1 Holden utility.

(c) Fisheries enforcement did not lease any equipment in the financial years 1979-80 and 1980-81.

(d) The 18.48 metre fisheries patrol vessel 'Salloo' was based at Nhulunbuy on 4 November 1980. It has carried out patrols of the western side of the Gulf of Carpentaria. This work has included extensive surveys of the trawler operations in the Groote Eylandt area.

Weed Control

306 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

What action is the government undertaking to combat the problems of weed infestation in the Territory?

ANSWER

The Department of Primary Production is undertaking control operations on Mimosa pigra, Parkinsonia, Noogoora burr, Water hyacinth, Salvinia, Caltrop and Khaki weed in the Darwin district; on Parkinsonia, Noogoora burr, Devil's claw and Parthenium in the Katherine district; on Noogoora burr, Bathurst burr, Patterson's curse, Saffron thistle and Onion weed in the Alice Springs district.

It is also conducting research projects on Mimosa pigra, Jatropha gossypifolia, Parkinsonia aculeata, and Hyptis suaveolens.

The department's extension activities cover weed advisory services to primary producers, home gardeners and other government authorities; presentation of show exhibits and preparation of information for publication.

Poultry Farms for Aboriginal Communities

308 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

(a) What government involvement was there in the establishment of a poultry farm on Bathurst Island?

(b) Are there plans to establish poultry farms at other Aboriginal community centres to meet local demands for eggs?

ANSWER

(a) The initiative for the establishment of the poultry farm on Bathurst Island came from the Nguiu Community on the island. The community's own funds were used for the project and construction of the layer shed was commenced in early 1979. During the construction phase, a good deal of advice was given to the community by Darwin's 2 large egg producers.

Officers of my department have maintained contact and provided technical advice to the community since the project began.

Currently, there are 800 laying hens in production and these provide sufficient eggs for the Tiwi people on Bathurst Island and at Snake Bay and Garden Point. The community intends to maintain this level of production and work towards further improving an already economically viable operation. To this end, my officers will continue to assist with technical advice.

The Nguiu Community has no intention to further expand or sell eggs elsewhere.

(b) The Daly River Community currently has plans to commence a poultry project with similar objectives to the one on Bathurst Island. That is, to provide economically fresh eggs as well as additional employment for the people.

My Department of Primary Production has already been contacted for advice on this project.

Mimosa and Hyptis - CSIRO Studies into Biological Control

311 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

(a) What is the NT government's proposed financial commitment to the CSIRO Division of Entomolgy investigation into biological control of Mimosa pigra and Hyptis suaveolens?

(b) What is the anticipated total cost of the investigation?

(c) What is the proposed distribution of funds between Australia and Brazil?

ANSWER

(a) $47,000, 1981-82 to 1982-83.

(b) $158,500.

(c) Australia $49,000 (30.9%), Brazil $109,500 (65.1%).

Australian Quarantine Service - Inspection of Vegetables

312 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

In the financial year 1979-80 -

(a) what were the sources of the 14 consignments of vegetables inspected by the Australian Quarantine Service prior to overseas export; and

(b) what were the sources of the 9 consignments of vegetables inspected by the Australian Quarantine Service before interstate export?

ANSWER

I should preface the answer to the question by pointing out that page 20 of the 1979-80 Annual Report of the Department of Primary Production under the heading 'Quarantine' is misleading.

The last sentence of this reads -

'Overseas export inspections were carried out on 14 consignments of vegetable (sic), and on 9 consignments for interstate export'.

(a) Only 4 of the 14 consignments of 'plant material' exported overseas referred to, involved commercial quantities of vegetables.

These were:

1. 55 cases of lettuce originating from R.G. Hersey of Katherine exported to Singapore;
2. 23 kg of beans, same source and destination;
3. 15 cases of celery originating from L. Sumich & Sons, Myalup Gardens, WA, to Singapore; and
4. 50 cases of tomatoes originating from Beccaria Bros, Dolandella, QLD, to Singapore.

The remaining 10 consignments comprised various plants and seeds from scientific organisations and the general public addressed to assorted

overseas destinations.

(b) No commercial quantities of vegetables were included in the 9 consignments of 'plant material' addressed interstate.

Tourist Commission Offices - Staff Establishment

315 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

What was the (A) approved staff establishment, and (B) the number of limited tenure employees as at 30 June 1981 in the following Tourist Commission offices -

(a) Head Offices - (i) Alice Springs, and (ii) Darwin?

(b) Bureau Offices - (i) Darwin, (ii) Alice Springs, (iii) Adelaide, (iv) Melbourne, (v) Sydney, (vi) Brisbane?

ANSWER

Approved Establishment		Limited Tenure Employees	
Head Office	19	Alice Springs	1
Darwin Regional Office	4	Adelaide	2
Darwin Bureau	5	Melbourne	1
Alice Springs	5	Sydney	2
Adelaide	6	Brisbane	1
Melbourne	6	Head Office	3
Sydney	5	Darwin Regional Office	1
Brisbane	3	Darwin	1
TOTAL	53	TOTAL	12

Tourist Commission Sales 1980-81

317 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

1. What was the value of Tourist Commission Bureau sales for the period July-December 1980 in (a) Darwin, (b) Alice Springs, (c) Adelaide, (d) Melbourne, (e) Sydney, and (f) Brisbane?

2. What was the value of Tourist Commission Bureau sales for the period January-June 1981 in (a) Darwin, (b) Alice Springs, (c) Adelaide, (d) Melbourne, (e) Sydney, and (f) Brisbane?

ANSWER

	Tourist Bureau Sales	
	July - December 1980	January - June 1981
Darwin	$ 375,788	$ 399,978
Alice Springs	$ 187,116	$ 176,800
Adelaide	$ 595,347	$ 791,810
Melbourne	$ 642,361	$ 589,578
Sydney	$ 360,346	$ 412,860
Brisbane	$ 159,175	$ 283,896
	$ 2,320,133	$ 2,654,922

Beef - Restricted Export Licences

330 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Has he considered the issue of restricted export licences as a means of exploiting South-east Asian markets for beef?

ANSWER

Yes.

PART II

THE QUESTION PAPER

An index to questions appears at the end of Part II.

Numerical references are to Question Paper page numbers.

An asterisk preceding an entry in the index indicates that an answer has not yet been received.

Zone Taxation Rebates

Mr B. COLLINS to CHIEF MINISTER

Is it the intention of the government to seek a new inquiry into the level of zone taxation rebates or, at the very least, to ask the federal government to reconsider its decision in the light of the serious criticisms made of the conduct of the inquiry by Mr Slater, one of its members?

ANSWER

The Leader of the Opposition was kind enough to write to me along these lines a couple of days ago. Unfortunately, he omitted from the letter that he sent me an enclosure to which he referred, namely a letter from Mr Slater to the Treasurer. I have responded to the Leader of the Opposition's letter asking him to let me have a copy of that letter. I would certainly be very interested to see the contents of Mr Slater's letter of criticism of the methodology of the inquiry.

The Northern Territory government believes that it and other parties, including the opposition in the Northern Territory, put very sound and well-reasoned submissions to the inquiry. One would have thought that this was a well-constituted inquiry. The members of the inquiry were people of distinction in their various fields and we believe that the arguments that the Territory government, the opposition and various other parties throughout northern Australia put forward to this inquiry were cogent and convincing. It was a matter of grave disappointment to us that the inquiry came out with what we regarded as very niggardly recommendations. In fact, had the federal government acceded to the recommendations of the inquiry, Darwin would have been taken out of zone A and the people of Darwin would have been significantly disadvantaged as a result. At present, my personal views are that to press for a reopening of the inquiry may not get us anywhere and may simply result in a great deal of hard work and hot air. I believe that the matter has progressed from an administrative procedure to the political field, and that it will be necessary for us to attempt, by political means, to exert pressure for increases in the allowances.

I say that, Mr Speaker, not having seen the letter that the honourable Leader of the Opposition has apparently received from Mr George Slater. I am sorry that Mr Slater did not see fit to send me a copy of the letter as well because I had discussions with him during the course of the inquiry and he knew of my feelings on the whole matter. I believe that Mr Slater was sympathetic to the aspirations of the Northern Territory. When I have that, I will make my decision. Certainly, we will not let the matter rest. We believe that it is necessary for people living in the Northern Territory to be more handsomely compensated for some of the disadvantages of living in isolation than they are at present.

Community Health Centres

Mr B. COLLINS to MINISTER for HEALTH

If I could set the record straight for the Chief Minister, Mr Slater did not send us that letter. It fell off a truck

Mr SPEAKER: Order! The honourable member will ask his question.

Mr B. COLLINS: Will he examine the more liberal attitude to charges imposed at community health centres in other states with a view to moderating charges at centres in the Northern Territory?

ANSWER

I can assure him that this government would be happy to compare its community health services and its charges in that area with those operating anywhere else in Australia. We would find that our services and charges are not unreason-

able given the environment in which we work. If the Leader of the Opposition could provide me with details of places with which the Northern Territory should compare itself, I would be happy to take the matter up and write to him later.

Prawn Trawling in Fog Bay

Mrs LAWRIE to MINISTER for PRIMARY PRODUCTION and TOURISM

Following his meeting with local prawn trawler skippers, has any agreement been reached on limiting the size of nets to be used in the Fog Bay area? If so, when will those limitations be implemented?

ANSWER

Representations were made to the government, through myself, by private prawn trawler operators. Some of the representations involved the closure of the Fog Bay area, which I have since authorised, the restriction of certain net sizes and the length of the rope involved with the nets. Those representations are still under consideration. I promised the operators at the time that some of their representations would be sent on to Canberra. I indicated that representations the Northern Territory government had made to Canberra over the years had been unsuccessful in respect of limiting the number of vessels involved in the northern prawn fishery, but we were not prepared to discontinue our representation on their behalf.

Nursing Staff Resignations in Alice Springs

Mr VALE to MINISTER for HEALTH

Is he aware of the high number of resignations of senior and highly-trained nursing staff in the Alice Springs Hospital and will he give an undertaking to investigate the reasons for these resignations and report back on them to this Assembly?

ANSWER

Mr Speaker, I am happy to forward the contents of his question to the secretary of the department. When I have received a suitable response, I will forward it to the honourable member.

Zone Allowance Negotiations

Mr D.W. COLLINS to CHIEF MINISTER

Is he in a position to report to the Assembly on results of zone allowance negotiations with the federal Treasurer for areas outside of Darwin?

ANSWER

I am able to report to the Assembly. The position is as I mentioned earlier in response to the question from the honourable Leader of the Opposition. Darwin is retained in zone A. As I recollect, Alice Springs remains in zone B. The other Territory towns remain in the zones in which they were before the inquiry was held. As a consequence of the inquiry, the only significant advantage to people living in those urban centres is that the allowance for dependants has been increased by some 50%, which of course is some help. However, people living some 200-250 km from urban centres have now been significantly advantaged. I think the level of population of the urban centre from which the distance was measured was in the order of 2000 people. Special allowances have now been made for those people so that the many citizens of the Territory who reside in remote areas will be significantly advantaged as a consequence of that decision.

Child Welfare Legislation

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

New child welfare legislation has been in preparation for a number of years in the Northern Territory. Is that legislation ready to be introduced this sittings?

ANSWER

The legislation is certainly not ready for introduction at this sittings. The job of preparing new welfare legislation for the Northern Territory has been a very comprehensive one. The work was started on a fairly intensive basis following the welfare report that was prepared in the Northern Territory some time ago. The department has engaged experts in various fields of welfare to assist it in the preparation of new legislation to ensure that the Territory can have efficient and modern legislation. I cannot put a specific time on it, Mr Speaker, but I would hope to have it prepared for introduction in the early part of next year.

Inquiry into Operations of Police Marine and Fisheries Enforcement Unit

Mr DOOLAN to CHIEF MINISTER

Is it a fact that there is a departmental inquiry into the operations of the Police Marine and Fisheries Enforcement Unit? If it is a fact, what are the terms of reference of the inquiry?

ANSWER

Mr Speaker, to my knowledge, there is not.

Motel at Tennant Creek

Mrs PADGHAM-PURICH to MINISTER for INDUSTRIAL DEVELOPMENT

There has been publicity surrounding the building of a motel at Tennant Creek which has caused some speculation. Can he inform me of the position regarding the building of this motel, having regard to the fact that the operation of the Territory Development Corporation comes within his portfolio?

ANSWER

Mr Speaker, the Territory Development Corporation has assisted a number of hotel and motel operators throughout the Territory. Details of individual loans are not normally provided as they are confidential business matters. I thank the honourable member for not bringing specific names into her question. The project at Tennant Creek has had some problems due to a contractor failing during the course of construction. Work was delayed for some time as a result of that, but has recommenced now. It should be completed by April 1982 and adequate steps are being taken to ensure that government funds provided for the project are secure. The Territory Development Corporation has adopted an attitude of trying to sort out the problems which occasionally occur when works that it is funding or partly funding fall into some difficulty. It will try very hard to have such projects continued and completed. We are trying, and I believe succeeding, to build an infrastructure of tourist accommodation throughout all centres of the Northern Territory. We have badly needed these for a long time and, despite the odd problem that comes along from time to time, as will happen with construction in some of the remoter areas, we will continue to adopt an attitude of seeking to solve the problem with a view to having the project completed rather than taking an easier way out, calling it quits and withdrawing funds and support.

Nursing Home at Palmerston

Mr HARRIS to MINISTR for HEALTH

It was recently announced that a nursing home would be established at Palmerston. Is he able to indicate what other areas were considered for the establishment of a nursing home?

ANSWER

The government intends to establish nursing homes in every major community throughout the Northern Territory. The proposal to establish a nursing home at Palmerston results from a proposition put by a Melbourne firm which already operates a home in Melbourne and which sought an opportunity to open a private nursing home in the Northern Territory. I might add that the Melbourne firm had sought and obtained from the Department of Social Security an option over the establishment of a 40-bed home in Darwin. That option gave the proponents a right to a federal government social security benefit payment towards the operation of a private nursing home. In fact, the proponents have 12 months in which to exercise their option. The proponents of the home approached the government seeking its cooperation and views on the establishment of the home and have received the full support of this government.

So far as the exact siting in Darwin is concerned, the proponents looked at using existing infrastructure at the annexe to the old Darwin Hospital. In their view, the cost of operating that infrastructure was so high that they would need $0.5m subsidy each year just to maintain the boiler room, airconditioning plant and other ancillary services, apart from any bed subsidy that would go towards the cost of operating the home. In their view, the cost of going into the Darwin annexe was outrageous and prohibitive. The proponents also looked at sites in the northern suburbs and found them to be too small for possible future expansion. The government suggested to the proponents that an area in the Palmerston town development would be made available if they were interested. They indicated an interest and have taken up a site. I believe that, at this stage, they are discussing the development proposal with their architects and the Palmerston Development Corporation and all the other people involved in moving to Palmerston. I believe there is also room in the planning and discussion stage that is taking place at the moment for other developments to take place, such as a private hospital at Palmerston if that should ever be seen as an economic and justified requirement for the area. If that answers the honourable member's question, I am happy. If he needs any other information, I would be happy to provide it to him.

Complaints about Kern Company

Mr B. COLLINS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Has he received a report from the Consumer Affairs Commission on its investigation into the complaints of Mr Kell and others about the standard of building carried out by the Kern company and will he provide members with a copy of the report?

ANSWER

Yes, I received a copy of the report at 9 am today. It has been most unfortunate that there were delays in getting this report to me. However, I am advised that the experts who went from the Department of Transport and Works to inspect the house and provide a detailed report on it on behalf of the Commissioner of Consumer Affairs found that they had a fairly sizeable task in front of them. Of course, one does not want to rush such reports. They should be put together with the best detail and knowledge available to us. The report has only just been received by my office and, until such time as I have an opportunity to read it myself and decide what course of action should be taken,

I believe it would be unwise for me to circulate a copy or table it in the Assembly. I may take both those courses of action but I believe it would be wise to consider the content of the report before deciding on a course of action.

Schooling for Pintupi People

Mr BELL to MINISTER for EDUCATION

I preface my question by drawing his attention to the Pintupi people resident in the Kintore Ranges since August of this year. When will he commence schooling for the children in that community?

ANSWER

Part of the question that the honourable member just asked contained one of my problems in this matter. He mentioned 50 people, as I heard it. Nonetheless, for the information of the Assembly there is an Aboriginal organisation which calls itself the Western Desert Outstation Council. It has moved from Papunya. They are Pintupi people. The Papunya area, of course, is not their land. The organisation moved from Papunya to the Kintore Ranges some 350 miles west of Papunya. Like anyone else, the Aboriginal people will be well aware that when a section of a community leaves an area where all government services are provided and moves some 350 miles into very difficult and arid country, obviously there will be some penalty, at least in the short term, relating to the provision of government services. Of course, education is not excluded from that. The problem is to work out who is there, what numbers, how many children and what the demand may be.

Mr Paul Parker is a person who may describe himself as a latter-day Moses. I name him because he has been associated with newspaper releases on the matter. Mr Parker claims that there are some 177 people at Kintore, of whom about 70 are children. Three officers of the Department of Education visited Kintore on 1 October. On that day, a significant number of the people had gone to Balgo Mission in Western Australia. They were able to identify 30 persons at Kintore, of whom 15 were children of school age. It would seem from that information that 130 people had gone to the mission in one truck on that particular day. In other words, there is a very serious question about the number of people who are there. The current position as far as the government is concerned is that we need to establish whether or not the community is a permanent one, whether or not it will be a permanent community in itself or whether or not Kintore is to be the hub of a series of outstations. All these questions have a very significant bearing on the ability of a government department of the size of the Department of Education in the Northern Territory to provide services to a community which has moved to such an extremely remote area.

Mr Speaker, the people there have a water supply drawn from hand pumps. There is no other facility out there. They have to face what will be a particularly difficult summer. Of course this will include the school vacation period. I think we could be very unwise to commit the taxpayer to pursuing this community into the desert, and I use that term quite deliberately, until such time as we find out whether or not it will be a stable community. If DAA recognises it as such and the Department of Community Development recognises it as such, then it commits not only the Commonwealth but also this government to significant expenditure indeed.

Mr Speaker, let us find out what the nature of the community is, see how stable it will become, and then make decisions based upon that information.

Housing Commission Houses in Nhulunbuy

Mr LEO to MINISTER for LANDS and HOUSING

Has the combined will of the Housing Commission and the Department of Law yet found any way of selling Housing Commission houses in Nhulunbuy?

ANSWER

Mr Speaker, my colleague the Minister for Community Development expects to be able to introduce legislation into the Assembly in the course of this sittings. At my last discussion with the joint venturers at Gove, they indicated to me that, once legislation was tabled in the Assembly and they had an indication of the government's attitude towards the legal solutions for their problems in providing land in that area for the purpose of Housing Commission use, particularly the provision of Housing Commission houses for sale, we could really get down to taws in negotiation with them. I would hope that, well before the passage of any such legislation in this Assembly, very firm solutions will be found to the problem.

Plenty Highway Signposts

Mr VALE to MINISTER for TRANSPORT and WORKS

Is he aware that the eastern end of the Plenty Highway near the Queensland border is sadly lacking in signposts? As a matter of urgency, will he have his department erect signposts on this lonely section of the highway to ensure the safety of motorists?

ANSWER

I am not aware of the situation there but I will have the matter investigated and take whatever action is necessary.

Ranger Mine Closure

Mr B. COLLINS to MINISTER for MINES and ENERGY

Mr Speaker, I will ask the question in 3 parts to avoid any supplementary questions. Why was the Ranger mine closed? Why did the breach of regulations exist for so long without being picked up by the Department of Mines and Energy inspectors? Why wasn't the matter reported by the company?

ANSWER

In reference to the second and third parts of his question, I will be able to give the Assembly more advice later in the day or early tomorrow morning. If the honourable Leader of the Opposition will bear with me until a written report is compiled on the matter, that would be helpful.

The mine was closed last night at the direction of the Secretary of the Department of Mines and Energy because he was concerned at the lack of activity that has taken place on the lease and at the lack of cooperation he was getting at such a late hour in answer to questions that needed to be answered. The only way for him to get the matter into proper perspective was to close the mine until the inquiry relating to the alleged incident was conducted, completed and acted upon. I will report to the Assembly again when further information is available.

Private Hospital for Darwin

Mr HARRIS to MINISTER for HEALTH

In view of the answer just given to my previous question on nursing homes, is the government still considering applications for the establishment for a private hospital at the site of the old Darwin Hospital?

ANSWER

I am happy to advise that the period for persons to register their interest and submit their tenders for the use of the Darwin annexe as a private hospital site is still open. I believe tenders close at the end of this month. We hope that an assessment of these applications will be completed during December and January. We will be in a better position in the New Year to know whether the

Darwin annexe does have any appeal to the private sector for use as a hospital and, if so, under what terms, conditions and costs.

Geothermal Energy in NT

Mrs O'NEIL to MINISTER for MINES and ENERGY

Has a decision been made on a mechanism for the investigation of possible sources of geothermal energy in the Northern Territory?

ANSWER

The geothermal technology to which the honourable member refers has been around for some time in other countries. It has recently been proposed by a Western Australian firm that we apply the technology in the Northern Territory with a view to establishing a geothermal resource which would be an asset to the Northern Territory. The difficulty so far has been the legal position of any person exploring for geothermal energy within the Northern Territory because geothermal technology requires that the area be rather large and definitely in excess of the 5000 square kilometres that we give out under an exploration licence. Further, there is a need that any company exploring for geothermal energy in a particular area does not have a right to any other mineral or element found in that area. The department has been working now for some 6 to 9 months on this problem. It is not just a problem for the Northern Territory because state governments are studying similar proposals. We hope to have legislation ready for March next year which will enable geothermal exploration to go ahead.

Essentially, it would follow the same premise of exploration that we have now for the oil and gas industry in that a special exploration licence for geothermal energy could be issued over a rather large area. The large areas are required because satellite and infra-red technology are important aspects of the exploration program. An exploration licence could be offered over a large area to a company that would have a work program of some millions of dollars to complete in a specified time. Having worked on that block it would have no right to any other element that might be on the block that it is given. Some people in the industry may see this as a conflict but it is no different to mining companies which have exploration licences which cover all the base metals and elements whilst oil and coal explorers have the rights over a similar block for what they are seeking. I hope that answers the honourable member's question. Hopefully, we will have the legislation early next year.

Conservation Commission Plan of Management for Recreational Use of Gunn Point

Mrs LAWRIE to CHIEF MINISTER

Will he table the report recently completed by the Conservation Commission on a management plan for the recreational use of the Gunn Point area?

ANSWER

Mr Speaker, no.

Detached Dwellings in Palmerston

Ms D'ROZARIO to MINISTER for LANDS and HOUSING

It was recently announced that the Palmerston Development Authority is considering the provision of 400-square-metre blocks for detached dwellings. Can he tell me what proportion of the lots allocated for detached dwellings would be of this size?

ANSWER

Mr Speaker, if I have anything to do with it, none. Of course, there have been none to date. The proposal was floated in the general context of a push

that the government has been conducting towards lower-cost housing. The Palmerston Development Authority suggested to the developers that they might examine the possibility of blocks of considerably smaller size than the 800 square metres normally recommended for Darwin. The developers were not of the view that that would be wise - 3 cheers and full marks for the developers. In certain areas, given broader spacing around smaller residential land holdings, it is possible to come down to about 600 to 650 square metres a block, provided they are not one after the other because that is hardly commensurate with a tropical environment. The answer is none. As usual, the NT News - I am certain it would be the NT News - got it all messed up again. No such blocks have been developed or contemplated to the best of my knowledge.

Motel near Alice Springs

Mrs PADGHAM-PURICH to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

There has been some publicity surrounding the building of a motel near Alice Springs. It has caused some speculation. What is the position regarding this motel having regard to the fact that the operation of the Northern Territory Development Corporation comes within his portfolio?

ANSWER

As I mentioned in answer to a question earlier this morning, occasionally, particularly in the more remote areas of the Northern Territory, people get into trouble with the construction of buildings, the retention on site of contractors and the provision of materials. The Northern Territory Development Corporation has been assisting some people to build a very worthwhile project outside Alice Springs. It is on a site where a motel is very much needed according to our tourist advisers. The project is in fact nearing completion. However, some difficulties have arisen in regard to the portion of the funds to be raised by the owners of the property as distinct from the portion of funds loaned by the Northern Territory Development Corporation. As a result, there are some creditors who remain unpaid at the present time. The building is not yet complete. The government is not involved. The problem of the outstanding creditors is one between the owners and the creditors themselves.

The Northern Territory Development Corporation is currently examining ways of arranging for completion of the building so that the original intention can be fulfilled. Solicitors have been engaged to represent the corporation's interest. I point out that the NTDC is the only mortgagee of the property and the government's funds in this matter are completely protected. However, it is a complex matter and we are currently tackling it with a view to having the project completed as a priority. Then it can serve its purpose and earn some money so that various people can be paid. The Territory will end up with another very valuable resource as part of its tourist infrastructure.

Water Storage Tank East of Sadadeen

Mr D.W. COLLINS to MINISTER for TRANSPORT and WORKS

Will he give an estimate of when the water storage tank being built east of Sadadeen will be commissioned?

ANSWER

The contract had been suspended for a short time because of design problems that became apparent at the time of excavation. However, the work will be completed in September 1982.

Conversion of Roller Skating Rink to a High School

Mr B. COLLINS to MINISTER for EDUCATION

Will he advise the Assembly of the government's position in regard to the proposed conversion of a disused roller skating rink into an independent high school at Humpty Doo?

ANSWER

I am surprised the honourable gentleman did not ask us what our attitude would be to converting that into a university. That is more his style.

Mr B. Collins: That's tomorrow.

Mr ROBERTSON: I am sure the honourable gentleman refers to a rather remarkable proposal that has been put forward by a committee in the Darwin rural area. This of course is a matter that I have spoken of at length in this Assembly. You will recall that, under no circumstances, could I accept the proposition put forward by the committee for a temporary high school for Humpty Doo. The fact is that it is totally unsound educationally. This proposal is reminiscent of Don Quixote. It is probably the most absurd proposition I have ever heard.

Mr Speaker, as I understand the matter, the committee had a public meeting some few weeks ago at Humpty Doo at which a constitution was put before the public. I understand that the committee did not even want the public to see the constitution much less delay it for a period of time for consideration. Mr Speaker, I would caution people in the rural area against being led along by what I can only describe as well-meaning but ill-informed zealots. If any proposal for such a private high school is of the same standard as the proposal for a temporary high school, then such a high school would have absolutely no propsect whatsoever of being registered under the Education Act. If it were not registered under the Education Act, it would have no prospect of government funding. Indeed, while it would not be the intention of government to see prosecutions, I would also remind parents that they would be in breach of the Education Act, by providing their children with an education which, in most circumstances, would be most likely to be unsatisfactory.

I can only repeat myself and caution people in the area against being misled by others who for some extraordinary reason are not now satisfied with the tremendous efforts that this government is making to provide secondary education in the rural area. The government is working towards the establishment of a full range of facilities in the Humpty Doo area for commencement in the 1983 school year. This has been placed ahead of all other priorities in education and to the disadvantage of some other communities which have been waiting much longer, for example Tennant Creek. I am talking about the high school there and the people who have waited so patiently. This government has gone out of its way to satisfy the secondary educational needs of the people of the rural area. Notwithstanding all of that, we have this absurd proposition for the establishment of a high school in a disused skating rink.

Salaries in the Northern Territory Public Service

Mr HARRIS to CHIEF MINISTER

Is the government aware that substantial salary movements are occurring in the Australian Public Service, other public services and the private sector? Are similar moves being sought in the Northern Territory Public Service and, if so, what is the likely impact on the Territory budget?

ANSWER

Mr Speaker, salary claims in the order of 20% have been lodged by most public service unions with the Public Service Commissioner. The increases so far negotiated in the Australian Public Service and elsewhere are somewhat less than this figure. On discernible trends to date and depending on the outcome of negotiations in the Territory which will occur in the near future, it appears likely that the cost to the Territory this financial year of salary increases to come out of the latest round of pay claims will be in the order of $7m.

Norforce

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

As his government has a policy of encouraging Northern Territorians to join Norforce and a policy of encouraging private employers to cooperate, would he inform the Assembly why members of the Northern Territory Fire Brigade are forbidden to join the force?

ANSWER

I have been informed by the Director of Fire Services that members of the fire brigade could be called out at any time to service the needs of the community and, because of that, they are not permitted to join Norforce.

Stamp Duty Exemption

Ms D'ROZARIO to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Is the stamp duty exemption for first-time house purchasers or house builders on rural residential allotments yet available?

ANSWER

I am not exactly sure what the honourable member for Sanderson is getting at. If she could give further clarification, I will have the matter followed up.

Ms D'Rozario: The stamp duty exemption is currently only available to persons who are building on allotments of less than 2.04 hectares.

Mr PERRON: I undertake to give a response to the honourable member during the course of the sittings.

Reconstruction of Smith Street Alice Springs

Mr VALE to MINISTER for TRANSPORT and WORKS

Have funds yet been allocated to the Alice Springs Town Council for the reconstruction of Smith Street and, if so, when were the funds allocated and what was the amount of the allocation?

ANSWER

The government has not specifically allocated any funds to the Alice Springs council for this project.

Inland Fishing Industry

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Does he have any plans for the development of an inland fishing industry?

ANSWER

The department has no specific plans for the development of aquaculture, but there are some proposals currently before us which we are studying with great interest. We are prepared to give whatever support we can by way of extension services and scientific advice.

Domestic Violence

Mr B. COLLINS to CHIEF MINISTER

Is the government considering taking any action to counter the problem of domestic violence in the Northern Territory community particularly in the pre-wet season by establishing domestic violence committees similar to those in the states with a view to taking some of the burden off the Police Force?

ANSWER

Naturally, the government is concerned at the incidence of domestic violence and presently the police bear the brunt of attempting to assist in this area. It has always been a matter of concern to the government that the Police Force is at the pointy end of the stick in dealing with community problems such as the apprehension of drunken people, disorderly people and people committing acts of violence. Obviously, a policeman's lot is not a terribly happy one and it is not helped by the innumerable criticisms that are levelled at it. To this end, the government is prepared to consider anything reasonable towards the amelioration of the situation not only of the police but also to assist people who are subject to domestic violence. Domestic violence is a difficult matter to deal with unless one of the parties complains. There are counselling services available in the community to assist in marriage guidance. I understand these services are used extensively.

I hope to introduce the Criminal Code this sittings. The Leader of the House has just mentioned to me that he and the Leader of the Opposition think that the session may not go beyond this week. I would hope that it will, Mr Speaker, even it we have to filibuster, because I want to introduce the Criminal Code during this sittings. I do not think it will be ready for introduction until next week because of its volume and the obvious difficulties of getting it and other legislation through the Government Printing Office. The provisions of the Criminal Code will improve the situation. There are provisions relating to offences between the sexes. I hope that, with these and with the facilities already available in the community, advances can be made.

As to the suggestion of establishing committees in the community on the problem of domestic violence, I have adverted to that myself. I think it is more properly the responsibility of my colleague, the Minister for Community Development. It may be that he has the matter under consideration or that it could be referred to him for consideration.

Fruit Entering Alice Springs

Mr VALE to MINISTER for PRIMARY PRODUCTION and TOURISM

In view of the second outbreak of Mediterranean fruit fly in Alice Springs does his department envisage a permanent check on fruit entering the Alice Springs area, similar to that which now applies in Adelaide?

ANSWER

The situation in South Australia is quite different to that in the Northern Territory. The cost in South Australia of an inspectorial workforce is approximately $1m per year. Our situation is that we have an outbreak that we hope to eliminate. I think that will cost in the vicinity of $50,000. We provide checks at the entry points, mainly at the railway station and the airport. Until such time as the fruit fly has been eradicated in Alice Springs, we will maintain those checks. I have a report from the senior scientist who advised me yesterday. The second round of bait spraying was completed on Saturday 21 November and a third round will commence Wednesday 25 November 1981. One fly was trapped on the final day of the first round of spraying but none has been detected now for 8 days. He is confident of containing the outbreak in due course.

NT Portion 1097

Mr BELL to MINISTER for LANDS and HOUSING

I remind him of a grant he made earlier this year to Messrs Conway and Lander of a Crown lease over Northern Territory Portion 1097. Did he, by letter or personally, advise the solicitors for the proprietors of Tempe Downs that consideration of adding NT Portion 1097 to their lease could not be given because it was subject to claim under the federal Land Rights Act?

ANSWER

The honourable gentleman is asking me to recall possible correspondence going back over a very lengthy period of time. I ask him to place the question on notice.

Nursing Sister at Garden Point

Mrs PADGHAM-PURICH to MINISTER for HEALTH

What are the details regarding the withdrawal of the position of nursing sister at Garden Point on Melville Island?

ANSWER

I would like to emphasise to members of the Assembly that there is no determined plan to withdraw sisters from communities where the communities wish the sisters to remain. For the benefit of honourable members, I would like to spend a moment outlining some of the changes of direction that are taking place in the Department of Health at the moment so far as the provision of medical services to Aboriginal communities is concerned.

All members would be aware that in about 1975, the Department of Health set up an Aboriginal Health Worker Training Program which has the ultimate objective of allowing Aborigines to become competent in the field of providing medical services in their communities and ultimately to take over those responsibilities themselves. The training program that we have now has been under way for 6 years and some of the Aboriginals in the program have reached a very high level of proficiency. I might add that some of the people officially admitted to the Aboriginal Health Worker Training Program in 1975 had already been working with departmental people for 7 or 8 years as helpers in the field for visiting rural sisters and doctors.

Mr Speaker, we have now reached a point where some communities are saying quite openly - and they put it to me at the Aboriginal Health Workers Conference in Alice Springs last year and again in Darwin this year - that they feel a time has come for the department to hand over responsibility in some of the communities. I fully support this proposal where the communities want it and the Aboriginal staff of the department have demonstrated the confidence to take over and do what needs to be done. There is no policy of abandonment or of force in this particular measure. It is really one of consultation and cooperation between the department and the communities that the department serves.

In one particular case, the community wrote back and said: 'Yes, we are not shy about taking over our clinic'. This is in East Arnhem Land. 'We are happy for you to withdraw the rural sisters. We won't be fussed if they go. However, we would like the doctor to call for half a day a week if that is still possible'. In another instance, a young man took over an Aboriginal Health Clinic where he has been working for 12 to 14 years and demonstrated an undoubted capacity to carry out his duties.

Not all communities share the feeling of confidence that some people in remote areas have. As the honourable member for Tiwi suggested in her question this morning, people at Garden Point are a little hesitant about making the move. The response I expect from those communities that are not keen to move in a hurry - and I know Dr Trimmings feels the same - would be that it is all right

and that they will do it when they are ready and not before. In the meantime, the opportunity is there for communities to take up the option if they so wish.

I think this highlights a great advance in the area of health care delivery in remote areas. The objective of the department and of the program has always been to prepare for the day when Aboriginals take over these clinics and functions and administer them themselves. Unfortunately, a situation can arise in some places where there is a structure which just does not enable it to happen because all the European sisters are needed there because of the Europeans in the community. Thus, a stage is never reached where the Aboriginals take over for themselves. Nevertheless, where communities are determined that they want to do this, they will find the department, and me particularly, cooperative.

Pensioner Air Fare Scheme

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

The Pensioner Air Fare Scheme which is proposed for introduction by his department on 1 July 1982 requires pensioners to pay the full air fare before they receive the 50% subsidy from the government. Will he amend the proposed scheme so that pensioners only need to raise half the fare before they receive the other half from the government under the scheme?

ANSWER

Officers of the Department of Community Development have been holding talks with the airlines over the last couple of weeks with a view to evolving a system whereby pensioners under the scheme that will take effect from 1 July next year will not have to pay the full cost of the air fare before claiming a rebate. The problem is a little complex as the department must be careful to comply with Treasury and audit regulations and there needs to be some form of protection to try to cover the situation of persons seeking to abuse the system. As members know, it is very easy to travel on air tickets that are issued for other people. It probably goes on from time to time. However, I appreciate the deficiency that could exist under an arrangement where a pensioner is required to buy and use a fare and then present a used ticket in order to obtain a government rebate. I am hopeful that the government and the airlines can work out a scheme whereby the 50% that is to be contributed by the government does not need to be paid first by a pensioner. I cannot say that we have found a solution.

Controlling Palm Leaf Beetle

Mr HARRIS to MINISTER for PRIMARY PRODUCTION and TOURISM

Some of the coconut palm trees around Darwin are looking very sick indeed. He has indicated that the department is looking at the possibility of introducing a parasite to control the palm leaf beetle. Has any progress been made towards finding an effective method of control?

ANSWER

The situation has not changed much since the member asked the question at the last sittings. The search for a natural predator of the palm leaf beetle will need luck to be successful. We will need further advice on this. To this end, an overseas authority will shortly visit Darwin.

Humpty Doo High School

Mr B. COLLINS to MINISTER for EDUCATION

In view of the news announcement this morning that the Humpty Doo High School is proceeding with the appointment of a principal shortly and that children will be enrolled for school year 1982, can he assure the Assembly that he will give this matter his closest personal attention to ensure that the educational needs of the children attending that school are adequately catered for?

ANSWER

Mr Speaker, regretfully, there is nothing I can do to ensure that the education of children who attend such a proposed private school is adequate. That is the very thing that worries me. It worries me very deeply. I am to have a meeting today with the convenor of the committee. It is at his request and I willingly acceded to that request. Probably it will take place in the precincts of the Assembly because of the workload of the Assembly. I hope to discuss that issue in particular with the gentleman during the course of the day and at least indicate to him what he is getting himself into. What I have just said is quite wrong. It is not what he is getting himself into; it is what he is getting those children into.

Northumberland Insurance Company

Mrs LAWRIE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

My question is about the Northumberland Insurance Company. Is he aware that persons affected by the collapse of the company who have contacted the Territory Insurance Office have apparently received an offer of 50% of their outstanding claims? Could he verify this and state what the latest position on the Northumberland debacle is?

ANSWER

I will read out some information that has been provided to me by the Treasury on this matter, which may in fact answer the honourable member's questions. In September 1980, Cabinet approved a scheme whereby 50% of awarded third-party damages of the defaulting Northumberland Insurance Company would be paid out of the Treasury's trust account and that the moneys would be recouped from money set aside for the repayment of past third-party motor insurance losses. The trust account has been established and all those road accident victims who responded to an advertising campaign conducted in October and November last year have had their cases considered by the Territory Insurance Office. Amounts of compensation have been determined and payments will be made as soon as successful claimants have returned a signed deed of release. By signing the release, recipients of payments promise to repay any money subsequently recovered from another source and undertake not to make any further claims on the Northern Territory government. A bill to amend the Motor Vehicles Act is being prepared. Amendments are designed to ensure that the money provided from the compensation fund established under that act - that is, the fund built up from the compulsory $10 levy per motor vehicle - will not be paid to the liquidator of Northumberland Insurance Company and can only be used to repay the Northern Territory appropriation to the trust account.

I think that that statement, whilst it perhaps requires a closer deliberation, provides some of the answers the honourable member for Nightcliff requires.

Police Cadets

Mr D.W. COLLINS to CHIEF MINISTER

Will there be an intake of police cadets in 1982?

ANSWER

The scheme of having police cadets in the Northern Territory which was introduced by the present Police Commissioner a couple of years ago has been very successful. I believe that the current intake of cadets is shortly to pass out. They will be a most valuable acquisition to the Northern Territory and to its Police Force. Most of them, if not all of them, are boys of local families. Indeed, the sons of a couple of policemen are in the ranks of the cadets. A couple of young men of Aboriginal extraction are amongst the cadets as well. I believe that it has been a very forward step on the part of the Police Force. It has worked well and I will fully support the commissioner in having another

intake of cadets for 1982. Not only will it provide additional employment, it will provide a very valuable and worthwhile career for many young men and women and it will add stability to the Northern Territory Police Force because most of them will have had their roots in the Northern Territory for many years.

Housing Commission Rent Review Formula

Mr LEO to MINISTER for LANDS and HOUSING

In view of the recent Northern Territory Housing Commission rental increase, could he make available to members of this Assembly the Northern Territory Housing Commisson rent review formula for both public service and general public rents, the annual rent review documentation including the source and effect of the resulting calculations - in other words, how this formula was arrived at - and a comparison between Northern Territory rents and appropriate southern rents to enable this Assembly to gain an appreciation of the true costs and values of Northern Territory rents?

Mr SPEAKER: I direct that the question be placed on notice.

Ranger Uranium Mine

Mr B. COLLINS to MINISTER for MINES and ENERGY

Does he have a report from his officers on the breach of environmental regulations at Ranger?

ANSWER

I have a report from officers in response to the questions asked by the Leader of the Oppposition yesterday.

The Secretary of the Department of Mines and Energy, accompanied by the Director of Mines and senior management staff of Ranger, visited the tailings pond site yesterday. The purpose was to inspect the tailings pond and to seek explanations about a reported breach of an authorisation which required liquid in the tailings pond to be 2 metres above the solids. The inspection confirmed that since 3 November 1981 solids had been permitted to protrude above the liquid to a height of about 10 centimetres over an area of 20 square metres. Until this morning, that situation still pertained.

The mines inspector did not report the matter to his superiors although he noted the circumstances in the Mine Record Book on 13 November 1981. From that time it became a matter of public record. The Department of Mines and Energy's environmental engineer also discussed the matter with ERA on 10 November. Similarly, ERA did not report the matter to the Supervising Scientist immediately because it considered that the matter was minor and it would be reported at the month's end.

The senior district mines inspector yesterday issued an instruction recorded in the Mine Record Book in terms that require the company to cease use of the tailings pond until ERA submits a report satisfactory to the Department of Mines and Energy detailing circumstances surrounding the breaches of authorisation concerning the tailings pond between 3 November and 24 November 1981. Further, ERA is to submit a plan satisfactory to the Department of Mines and Energy to resume the operation of the pond in accordance with its authorisation. A further instruction also requires the immediate covering of all solids in the pond by liquid. ERA is complying with these directives.

I deeply regret, Mr Speaker, that it has been necessary to shut down a most important part of the Territory industry, even temporarily. I have to emphasise, as I have in the past to all mining companies, that they must be sensitive to the requirements of the authorities under which they operate. The fact is that ERA must have operated in breach of a ministerial authorisation for a period before 3 November. After the Department of Mines and Energy

inspector discovered this, ERA was not persuaded to rectify the situation by local officers of the department. The matter finally reached the departmental head and the plant was closed. At no time did the company come to the department or the Supervising Scientist and offer to rectify the situation to bring itself into compliance.

The department has reported the circumstances of the present incident as far as they are known to the Supervising Scientist, the Co-ordinator General, the Department of Trade and Resources, the Northern Land Council, and the Territory supervisory authorities. The department's initial view is that at no time has the incident been a threat to health or the environment. This is because the area of solids exposed was very small and saturated with liquid. ERA quotes radon gas emission from the tailings pond at zero and minute levels during the relevant period. This view must be considered as preliminary pending the receipt of reports from ERA and detailed orders and investigation by the department. I will be in a position to advise you fully, Mr Speaker, when the department has completed a detailed investigation.

While the incident itself may have been of no significance in terms of health or environmental hazards, it is one that saddens me because the industry simply is not listening to the things I have been telling it over a considerable period of time. Recently, I have mentioned that there have been 2 incidents in the uranium province that did not stand the industry in very good stead. I commented that the industry's credibility had been damaged in the eyes of the Commonwealth and the Northern Land Council and others. I said: 'I think there is going to be a great need in the coming years for us as an industry to lift our game in this area'. I understand that many of the people present at the function I refer to were angered by what I said. Unfortunately, it seems that anger was not sufficient for some of them to improve their performance in the areas I discussed.

What I said on that occasion was a repeat of what I said a year earlier. Unfortunately, I have to say it again although I said virtually the same thing when I spoke last week at the official opening of Ranger Mine. In the presence of the entire board of directors of Energy Resources of Australia I said: 'We have a great challenge before us to run the mine in a manner above reproach and in a manner which will put to rest the fears of critics and show us to be responsible corporate citizens. In the light of this development, there was little alternative but for the secretary of my department to exercise his authority and close the mill. When ERA has satisfactorily answered the questions asked of it, it will be reopened'. I hope this government will not be forced to close it or any other mine ever again.

Responsibility for Todd River

Mr D.W. COLLINS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Has it been determined who has control over and responsibility for the Todd River?

ANSWER

Mr Speaker, I take it that the honourable member is referring to that portion which passes through the municipality of Alice Springs. This has been the subject of some speculation in the press. The municipality of Alice Springs passed a resolution saying that it would not accept any responsibility for the bed of the Todd River. I would like to point out to the Assembly and to the aldermen in Alice Springs, whom I have written to on this subject, that there is no way that they can possibly absolve themselves from responsibility for their normal local government functions. The bed of the Todd is quite clearly land within the municipality which is under their care and control. No resolution passed by the council can absolve it from that responsibility.

Government Housing Loan Scheme

Ms D'ROZARIO to MINISTER for LANDS and HOUSING

Is there a proposal currently under consideration to raise the maximum limit available to borrowers under the Government Housing Loan Scheme?

ANSWER

The answer to the question is no. Naturally, this is something we kept under constant review.

Brinkin Subdivision

Mrs PADGHAM-PURICH to MINISTER for EDUCATION

I noted in yesterday's edition of the NT News an advertisement drawing attention to the Kern development at Brinkin in which it was stated that there were no plans to build a school for the area and that existing schools were at capacity. Is this the situation?

ANSWER

The advertisement placed in the newspaper is quite incorrect. The misinformation which has been circulating in the northern suburbs in relation to the proposed Brinkin development by Kern, aided and abetted by the NT News, is completely inaccurate. If we take the existing schools at Nakara and Tiwi and consider the likely maximum primary student population in Brinkin, the Nakara school alone could accommodate whatever children are likely to be living in the Brinkin estate. Nakara has an optimum capacity of 660 students but present enrolments stand at 384. Tiwi is a slightly smaller school with a capacity of 510 and enrolments are 393. At peak, Brinkin would be likely to accommodate some 200 primary school students. Simple arithmetic would indicate that Nakara can accommodate the requirements of the Brinkin estate.

As for secondary students, it is not expected that a great number of such students would be housed in an estate such as Brinkin. Nonetheless, the present accommodation capacity of Dripstone High School is 900 though I would not really like to see it with a population of 900. Nonetheless, that is its designed capacity. There are presently 550 students in that institution. So there is no need for parents to worry on grounds of education.

The question covers what I believe to be gross misinformation, peddled, aided and abetted by the NT News. We ought to really get this whole thing into perspective. The planning instrument itself is probably the best vehicle to set the record straight. I will read from planning instrument D109: 'Under the provisions of the existing R3 zoning, sites A, B and C could be developed for the purposes of accommodating approximately 610 4-storey, 3-bedroom flats'. That is the present zoning. As we all know, and much to the chagrin of the Master Builders Association, flats require development proposals. Just because an area is zoned for flats, it does not mean that one can build dog boxes on it. A development application must be made to the Planning Authority.

I will again quote from the planning instrument: 'The intent of the proposed zoning is to restrict the development of these sites to 242 attached dwellings' - that is from a possible 610 - 'and flats by ensuring that a comprehensive development occurs in accordance with the terms outlined in the documents that are annexed to and form part of this draft planning instrument'. It is a draft planning instrument that we are talking about and it is to vary it from the existing blanket R3 right through that area to a very controlled and well-conceived concept. 'The development of the site as proposed will enable the creation of usable open spaces and fully-landscaped lawns and parks adjoining every home cluster. Such spaces will provide opportunity for the future residents, parents and children, to live and play individually or as a family within a short distance of their homes'. This part is important: 'The provision of 2-storey, attached dwellings in clusters on sites A and C and on

the Ellengowan Drive frontage of site B will ameliorate any detrimental effects likely to be caused to existing or proposed single residences in the locality'.

Mr Speaker, the idea is that, where people have a view from their existing homes, instead of risking the possibility of a 4-storey, little Mediterranea, if you like, along that road frontage, we will have low-profile, 2-storey buildings. If you stand on Ellengowan Drive, you cannot see the beach anyway. It is highly unlikely that you would even see an 8-storey tower.

I am not saying for a moment that I am for or against the proposal put forward by the Kern company as is its right under the Planning Act. The NT News portrayed this as a government initiative. That is utterly untrue. It is an application by the present owner of the land for a draft planning instrument to vary the zoning of the existing zones. It is not at all as portrayed to the public. Why on earth newspapers have to worry their readers unnecessarily with fabrications is quite beyond my understanding.

The matter goes back quite some time. It is said that the government should never have allowed the existing R3 in the first place. The matter was advertised in the NT News. I think some people must read it. That advertisement was in the NT News of 25 January 1980, 30 January 1980, 1 February 1980 and 6 February 1980. The closing date was 21 February 1980. Those 4 notices appeared in the newspapers and the Gazette - not that people read the Gazette. One assumes they read the NT News. As a result of those 4 separate notifications, 4 submissions were received. What else is the Planning Authority to do? In accordance with the act, it displays a proposition to create certain zonings over certain land and 4 comments, not actually objections, were lodged. It was over the Christmas period. It has been argued that it should not have been done at that time. I am not aware that February is more within the Christmas period than is October or November. It is equally detached from it.

In the same newspaper, the same type of criticism constantly comes out about how long it takes government to do things. When government proceeds in the normal course of events, it is rushing. I have written a letter to the editor which I really ought to read out in the adjournment debate because I have no doubt they will not have the intestinal fortitude to print it. I have indicated in that letter that, in the eyes of the NT News, no one can win.

Letter Concerning Tempe Downs

Mr BELL to MINISTER for LANDS and HOUSING

Will he undertake to table during these sittings a letter, reference PL629 (3)GL2072, of October last year giving details of his department's negotiations concerning Tempe Downs and, if so, when will he table it?

ANSWER

As I indicated before, the member completely misunderstands the operations of the ministry. I deal with thousands of letters in the course of one year. I certainly cannot remember that one. I will look into the matter and advise him later.

Reconstruction of Stuart Highway in Alice Springs

Mr VALE to MINISTER for TRANSPORT and WORKS

Can he advise when reconstruction of the Stuart Highway from Smith Street through and along Telegraph Terrace may commence?

ANSWER

The realignment from Smith Street on the Stuart Highway to Skinner Street on Telegraph Terrace is a proposal for the 1982-83 capital works program. Commencement of the project will depend upon funding at that particular time.

Amendments to the Tenancy Act

Ms D'ROZARIO to MINISTER for COMMUNITY DEVELOPMENT

It has recently been announced that amendments to the Tenancy Act will be prepared to afford a measure of protection to residents of caravan parks. Could he inform me of the progress of these amendments and when he expects to present them in this Assembly?

ANSWER

I do not have any information that I can pass on to the member at this time. There are certainly many amendments to the Tenancy Act to be introduced into the Assembly during these sittings. These particular amendments have been in the pipeline, as it were, for some considerable time and are causing some very severe difficulties in the community. I could not undertake to have them held up pending further examination on the question of caravan parks. I cannot tell her when legislation is likely to be introduced to bring caravan dwellers under the control of the Tenancy Act.

Coastal Surveillance Flights

Mr D.W. COLLINS to CHIEF MINISTER

Will he please request the Minister for Defence to vary the flight patterns of coastal surveillance flights?

ANSWER

Mr Speaker, I understand the member wishes to know whether I will ask the Minister for Transport to vary the flight patterns of surveillance flights. I do not know the flight patterns of surveillance flights. When one is out on the northern and western coastlines, they seem to come over 2, 3 and even 4 times a day. They seem to be quite frequent. I cannot say that I have set my watch by them so it may be that they are varied from time to time. I will look into the matter and, if these flights appear predictable, in the sense that one can set one's watch by them, then I will ask the Minister for Transport to ask that the patrol times be staggered.

Consumer Credit Legislation

Mrs O'NEIL to ATTORNEY-GENERAL

Now that both the Victorian and New South Wales governments have introduced consumer credit legislation, when does he expect to proceed with consumer credit legislation in the Northern Territory, as was discussed in the Assembly some years ago?

ANSWER

Mr Speaker, I am surprised to hear the member for Fannie Bay assert that New South Wales and Victoria have commenced consumer credit legislation. I understand that the legislation was introduced in Victoria, and to the best of my knowledge, recollection and belief, it has stagnated in the Victorian Parliament for probably a couple of years because the volume of the legislation involved is extraordinary. There are several bills and they are all enormously complex. It was agreed amongst Attorneys-General at the time that the Victorian government would introduce the legislation in the Victorian Parliament which would act more or less at the testing ground for the legislation and seek public comment and comment from the credit industry on it. As I understand it, this process - which is unbelievably complex - is still going on.

Mr Speaker, I would not like to say that I am infallible on this subject. Certainly, I will check it out and let the member know if the position is different. However, my understanding is that the legislation has still not worked its way through the Victorian Parliament. It could be that the New South Wales government has decided to introduce some sort of consumer credit legisla-

tion on an interim basis. I have not heard of that either but the New South Wales Attorney-General is a rather impetuous young gentleman and he tends to go off at a tangent from time to time. This could be one of those tangential trots of his. I will look into that, but I do not believe that we should be party to what could best be a patchwork piece of legislation in a terribly complex area.

Honourable members may not be aware, although I am sure that you are, Sir, that the purpose of the legislation is to replace hire purchase contracts, bills of sale and all other types of commercial credit of that nature. It is almost revolutionary legislation. I would not want to see the Northern Territory setting the lead in this field because we would find that we were in financial quarantine if we did.

Passengers in the Rear of Utilities

Mr HARRIS to MINISTER for TRANSPORT and WORKS

In view of the recent horror crash in which a utility carrying 21 people overturned, killing 2 of them, is the government considering placing restrictions on the number of people to be carried in the back of utilities and trucks in an effort to reduce the possibility of similar accidents occurring?

ANSWER

This is a very complex question. It involves many problems not only in the city area but in the rural area where most of the fatalities of that nature occur. The chairman of the Road Safety Committee that was in Darwin just recently spoke on this particular topic and alluded to the fact that the committee was trying to come up with recommendations as to how that particular problem could be solved. Mr Katter, the chairman of that committee, stated that a requirement to fit some kind of handrail or seat-belt in the back of vehicles could be imposed on owners who wished to carry people in the back. Until such time as somebody can come up with an equitable way of allowing people to transport people in the backs of vehicles, it will be difficult for us to come to a firm decision.

Whilst in the rural area we have this problem of accidents occurring and people being seriously injured as a result of being thrown from the back of trucks, at the same time there is a very strong lobby in the Darwin area - especially through the schools and community organisations involved in sporting activities - to allow parents to transport children to various sporting venues. That is one of the problems that we have. On occasion, I have discussed this problem with the Road Safety Council and asked it to address itself to determining how we could achieve a fair measure of safety whilst still allowing people to use the backs of motor vehicles to transport people. Until such time as we can come to a firm conclusion, I am unable to provide the member for Port Darwin with any further information.

Administration of Gunn Point Area

Mrs LAWRIE to MINISTER for COMMUNITY DEVELOPMENT

Could he indicate why that portion of the Gunn Point area formerly administered by the Forestry Unit is being changed in the Gazette to the administration of the prisons branch. Its forestry reserve will now be administered by the prisons branch and I ask him to indicate why.

ANSWER

The question should perhaps be directed to the Chief Minister. However, I am aware that it has been decided by the government that the Conservation Commission will no longer care for the forestry area at Gunn Point. It will be brought under the control of the prison out there. In fact, a great deal of the work in the forestry area at Gunn Point has, in the past, been done by

prisoners from Gunn Point Prison Farm anyway. We consider the prison farm to be a successful operation in the Northern Territory. It is a low-security prison and they have achieved a great deal out there. It is the cheapest possible way to keep prisoners. The concept of expanding it further into the forestry area is part of the government's initiative in this regard. It is really removing the responsibility for the forestry area from the Conservation Commission and giving it to Correctional Services.

Horticulture in Alice Springs

Mr D.W. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

Will he report on any progress towards establishing an horticultural area near Alice Springs?

ANSWER

The honourable member has been very interested over the last couple of years in establishing horticulture in a larger way in the Central Australian area. One of the recommendations of the Lapidge Report was to create a position of horticultural officer in Alice Springs. We have done this. That officer took up his appointment in the middle of the year. His work so far has been delineating areas within a 80 kilometre radius of Alice Springs. His report on what areas may require development will be before the government early next year.

Housing Loans Interest Rate

Ms D'ROZARIO to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Has he made representations to the federal government to contain the pres-pressure for increasing the interest rate for housing loans and, if so, what is the outcome of his representation?

ANSWER

The government continuously makes representation to the federal government on matters such as the interest rates in Australia, particularly those affecting home buyers. This is a matter that the Chief Minister has taken a particular interest in and has raised continuously in correspondence between himself and the Prime Minister. Indeed, my office also has had correspondence with the federal Treasurer on this matter. In answer to what effect they have had, one only has to look at the national scene and movement in interest rates. It has not been downwards unfortunately. The federal government has the Campbell Report which officers of the Northern Territory government are also studying with a view to taking a particular stance on various aspects of the report. There is no doubt that the reforms proposed by the Campbell Report are very far-reaching as far as financial administration systems in Australia are concerned. Of particular interest to politicians throughout the country is the effect the recommendations are likely to have on interest rates for home buyers. It is not a subject which can be canvassed during question time in the Assembly. I can assure the honourable member that the matter of trying to bring pressure from any quarter to reduce interest rates for home buyers is very much on our minds.

Northern Territory Development Corporation

Mr B. COLLINS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Will he consider the appointment of a Territory farmer to the board of the Northern Territory Development Commission?

ANSWER

When vacancies come up on boards such as the Territory Development Corporation, the government assesses applicants for the particular vacancy and decides at that time who should be appointed to the board. The honourable member's

point has been taken. The government will appoint to its boards persons it feels are best able to contribute to the boards.

Fire Control

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

Are amendments planned for legislation concerning fire control and prevention?

ANSWER

A total review of fire services legislation is in progress. That will cover all aspects of fire prevention. No amendments to existing legislation are planned because new legislation is being prepared.

Health Department Staff Workloads

Mr BELL to MINISTER for HEALTH

Will he undertake a review of workloads of his departmental staff as a result of a change in staff functions since the introduction of the new health care arrangements?

ANSWER

I can assure the member that there is a constant review of workloads of people within the department. As the member is aware, there are 3011 people in the Department of Health. Because of its size, it needs constant revision, updating and improvement.

Rumours about Reassignments of Departmental Heads

Mr HARRIS to CHIEF MINISTER

I understand that there are rumours circulating around the public service of reassignments of departmental heads. Is he able to inform me if there is any truth in such rumours?

ANSWER

I am surprised to hear of such rumours because, if members care to glance around the Australian scene, they will find that the administrative arrangements under this government - that is, the portfolios allocated to ministers, their length of service and stability in those portfolios and likewise the arrangement of departmental heads and heads of statutory authorities - are as stable as any. In fact they are without question the most stable in Australia. I can say that, certainly at the present time, there is no intention on my part to vary the arrangements regarding departmental heads and heads of statutory authorities whatsoever.

Public Access to Gunn Point

Mrs LAWRIE to MINISTER for COMMUNITY DEVELOPMENT

What access to the Gunn Point area will be allowed to the general public when the forestry reserve is handed over to the prisons by gazettal next week?

ANSWER

The public have never had free and open access to the area north of the prison farm in the past because the roads to the area are fenced. There is an arrangement whereby one must seek permission and obtain a key to go into this area. The road does in fact go through a forestry reserve which is an area where public access was controlled because of the possibility of fires and so on. It was also the access to the Gunn Point Prison Farm.

In looking at this area and making some changes, the government's attitude has been that the maximum possible public access to all recreational areas at

Gunn Point will be allowed. The boundaries of the prison farm will enable roads to be installed that can enable the public to have access to beaches and recreational areas in the vicinity. In some cases, the amendments to the boundaries will provide for roads to be put in where there are none at the present time. This is an important issue. The roads that are there at present are there for specific purposes, such as access to the prison farm, and they are not acceptable, permanent public access points.

We propose to draw up a plan to provide access to all the beaches concerned. There are some very nices beaches at Gunn Point. Also access will be provided to areas such as the Vernon Islands, the mouth of the Adelaide River etc. The public should have access to those places and our proposal is that it shall be under a much better arrangement than existed in the past.

Ward System for Alice Springs Town Council

Mr VALE to MINISTER for COMMUNITY DEVELOPMENT

Does he envisage the introduction of a ward system for the Alice Springs Town Council and, if so, when would he envisage such a system being introduced?

ANSWER

The government does not have any plans to initiate a ward system for local government elections in Alice Springs. Normally these matters would be raised with the government by the corporation itself and then the matter would be examined. As members will be aware, the ward system of election for local government operates in Darwin but the other municipalities elect their aldermen from a single electorate. There are some advantages and disadvantages with such a system. At present, the government has no intention of changing the system that operates in Alice Springs and has received no representations on this matter.

Treatment of Burns at Casuarina Hospital

Mr B. COLLINS to MINISTER for HEALTH

During the last sittings of the Assembly, in answer to a question on notice, he said that there were no special facilities for the treatment of burn cases at the Casuarina Hospital. Is it true that such a facility has in fact existed at the hospital for 18 months but that the plumbing that was required has only been connected to it in the last 48 hours?

ANSWER

I will be visiting Casuarina Hospital at lunchtime. I will provide the honourable member with an answer this afternoon.

Water Reticulation in Rural Area

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

Is he able to advise me yet of an overall plan for water reticulation for the rural area and in particular the McMinns Lagoon area?

ANSWER

While there is no current scheme to reticulate water in the McMinns Lagoon area, consideration is being given to the possible improvement of supply to rural consumers. There are numerous issues involved and much more investigation is required before such a policy is finalised. Those investigations are in hand including a ground pollution study which will take approximately 10 months to complete. I shall write to the honourable member with more details.

Sanderson Health Clinic

Ms D'ROZARIO to MINISTER for HEALTH

Is it proposed to relocate the Sanderson health clinic? If so, what are the reasons for the relocation and what will be the new location?

ANSWER

There is a definite plan to relocate the Sanderson health clinic in the vicinity of Casuarina shopping centre in Monterey House. Over the road, a new premises is being developed and the department will be taking up floor space for the provision of community health facilities. I believe that the department's 6 dialysis machines will also be operated from there. This will be a new service so far as the northern suburbs are concerned.

The reason for this is that the current Sanderson health centre is not in a suitable geographic position for the people of the northern suburbs. The

honourable member will recall that there was a proposal to build a health centre about 150 yards down the road at Dripstone. It is quite practical and feasible and will offer a better service to all the people of the northern suburbs if the Sanderson and the Dripstone facilities could be located in the one building which is about to be developed.

The most important consideration in the siting of the health centre was really the provision of public transport. An argument has always been put that Dripstone is a good spot to have it because it is central to the people. The map of the northern suburbs shows that Dripstone is on the southern end of the northern suburbs and services a very distinct area. However, the rest of the northern suburbs is devoid of cover and it was felt appropriate that, as the Casuarina shopping centre area was the focal point for the bus terminal and most people conduct their shopping and other activities there, it would also be an appropriate place to put the community health centre.

Mr Speaker, I have been in close contact with the department over this matter for a long period of time. If any member of the Assembly envisages a particular problem with the new proposal, I would be happy to hear from him and discuss the matter in detail. I can assure honourable members that the whole matter has been researched thoroughly and the proposal, in my view, will stand up to just about any scrutiny members may like to give it.

Petrol Sniffing at Papunya

Mr BELL to CHIEF MINISTER

Is he aware of any action taken by his department to attempt to alleviate the problem of petrol sniffing at Papunya?

ANSWER

Mr Speaker, I am reminded by the honourable Minister for Community Development that a ministerial statement has been made to the Assembly on this subject. In any event, I would suggest that the question would be better directed to my colleague, the Minister for Community Development, because one would imagine that the problem comes within his area of responsibility.

Mr BELL: Mr Speaker, may I redirect the question to the Minister for Community Development?

ANSWER

It is all a matter of communication. A statement was made on this subject fairly recently and is currently on the Notice Paper. The Department of Health and the Department of Community Development both have a very real interest in the problem of petrol sniffing. How to control, or preferably eliminate, petrol sniffing in Aboriginal communities is a very severe and very vexing problem. However, I do not have any specific answers for the honourable member for MacDonnell. He may perhaps write to my colleague and myself seeking a delineation of responsibilities between the Departments of Health and Community Development.

Northern Territory Public Service Superannuation Fund

Mr HARRIS to CHIEF MINISTER

Has a decision been made yet as to who will manage the Northern Territory Public Service superannuation fund and what the accumulated funds will be used for?

ANSWER

I have in my possession a copy of the Superannuation Bill which I propose to seek the leave of the Assembly to introduce without notice this morning to end speculation in relation to this matter. In fact, the Northern Territory Public Service superannuation scheme will virtually mirror the Commonwealth legislation in that area. The Northern Territory is simply moving to take over

another state-like function, which is the provision of superannuation for its public servants. This superannuation is currently carried by the Commonwealth's superannuation fund.

There will be a board of management of the superannuation fund in much the same way there is a board of management of the Commonwealth fund. I understand the 4-member board of management that Cabinet approved for the Northern Territory fund was to be comprised of the Public Service Commissioner, the Under-Treasurer, a person elected by contributors and a person appointed by the government with investment and financial expertise. However, that is a matter for discussion in this Assembly when the bill comes up for debate. I would not like to foreshadow that too much. This board would be responsible for placing the moneys of the fund in investments of a reputable nature. I imagine there would be some investment in the Northern Territory by the fund. No doubt, a great deal of its investment would be in the normal type of trustee securities. I dare say that the greater proportion of the fund would be invested around Australia.

Flooding at Railway Dam

Mrs O'NEIL to MINISTER for LANDS and HOUSING

What action is his department proposing to take to overcome the problem of recent flooding affecting the Railway Dam community in Darwin?

ANSWER

Mr Speaker, a detailed study of the problem is being carried out by the Department of Lands in conjunction with the Department of Transport and Works. It is one of those cases of omission in that there is no existing easement over the privately-owned property. Of course, it was the activities of the owner of that property which caused the problem. Obviously, the Department of Lands and Housing will have to look at the possibility of acquiring part of the land for an easement should that be necessary. We would certainly seek first to enter into negotiations with the owner of the land to encourage him to provide proper drainage for the area and overcome a problem which I believe he has probably created himself.

Carpentaria College Site

Mrs LAWRIE to MINISTER for LANDS and HOUSING

Can he indicate yet when a development plan for Carpentaria College site will go on public display?

ANSWER

If the honourable member would like to see me when the Assembly rises for lunch, I will have a yarn with her about it then. I have a copy of the plans in my office and will be quite happy to discuss it with her at that time.

Kookaburra Aircraft Memorial

Mr VALE to MINISTER for COMMUNITY DEVELOPMENT

Can he advise when the Kookaburra aircraft memorial in Alice Springs will be completed?

ANSWER

The tender for the Kookaburra diorama which is to be erected at the Araluen Foundation site in Alice Springs has been let and construction is about to commence. I have seen the plans of the building; it looks quite attractive. It will be completed by the end of January 1982.

Ranger Uranium Mine

Mr B. COLLINS to MINISTER for MINES and ENERGY

Last night the management of Ranger stated that it could comply with the standards for environmental protection if they were lowered. Is he considering such a lowering of the standards?

ANSWER

The short answer is no. I might add that, since the events of Monday, I have received no communication from the company whatsoever about its intentions?

Nhulunbuy Health Centre

Mr LEO to MINISTER for HEALTH

Will there be any further transfer of services from the Nhulunbuy Health Centre to the Gove District Hospital?

ANSWER

I cannot answer that question off the top of my head. If he would give me an hour's notice of such questions, I might be able to answer them at question time.

Sadadeen Primary School

Mr D.W. COLLINS to MINISTER for EDUCATION

Can he give an assurance that the Sadadeen Primary School will be ready for occupation in April 1982 as he indicated in the August sittings?

ANSWER

On my advice from the contracting company, the core of the primary school will certainly be available probably for the beginning of the school year, certainly in April at the latest. The stage 2 development will probably be available for occupation in about June.

Consumer Affairs Council

Ms D'ROZARIO to MINISTER for COMMUNITY DEVELOPMENT

What is the reason for appointing only 7 members to the incoming Consumer Affairs Council whereas the outgoing Consumer Affairs Council consisted of 10 members?

ANSWER

The Consumer Affairs Act provides discretion for a range of members to be appointed to the Consumer Affairs Council. I cannot think of the exact numbers. I think the minimum is 6 and the maximum is 12. All positions expired fairly recently and it was sought to restructure the council, as the government has done with a number of boards in the Northern Territory, to give additional people the opportunity to contribute to government input. All major centres - Nhulunbuy, Alice Springs, Katherine, Tennant Creek - are represented on the board and people from various backgrounds and interests are represented. I believe that such a board should have such representation in its advice to government. I think that the board of 7 can work very well.

Weeds in Inland Waterways

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

What is being done about the existing and potential weed problem in inland waterways which is affecting fish? Will steps be taken to eradicate water weeds?

ANSWER

I circulated a paper on weeds some months ago. It certainly is a vexing question that the department has to contend with. I do not believe there is enough money in Australia to deal adequately with the weed problem. There are far-flung rivers in the Northern Territory that have weeds by the thousand acres. I guess his question comes back to what is being done about the weeds in respect of fisheries. I am unaware of any controlled fisheries that have a weed problem. Certainly, we are aware of several infestations of weeds that are causing us some concern and we are attempting to deal with those problems.

Humpty Doo High School

Mrs PADGHAM-PURICH to MINISTER for EDUCATION

What stage of development has been reached in the building of the high school at Humpty Doo?

ANSWER

The Department of Transport and Works has let selected contracts in order to produce results quicker than would normally occur by the normal tendering process. That work is currently under way and it is anticipated that the first set of classrooms and specialist facilities for that high school will be available by the beginning of 1983. The scope of the project is such as to provide for a specialist block, 4 classrooms and the administration block in stage one. That should be finished by January or February of 1983.

Henbury Avenue Special School

Mr B. COLLINS to MINISTER for EDUCATION

Will the sad saga of the Henbury Avenue Special School be concluded satisfactorily by the beginning of the 1982 school year?

ANSWER

As I have previously indicated in the Assembly, I wish I could give assurances on what the Leader of the Opposition quite rightly describes as a 'sad saga'. The contractors indicated that it should be completed by November this year. Giving them another 3 months after that, one would hope that it would be ready by the beginning of the next school year.

Winton to Boulia Road

Mr VALE to MINISTER for TRANSPORT and WORKS

I ask this question on behalf of the member for Elsey. Can he advise if he has yet had a reply from the Queensland Minister responsible for main roads about the unsealed 88 km section of the Winton to Boulia Road? The sealing of this section would be of great benefit to the Northern Territory?

ANSWER

The short answer is no. I wrote to the honourable Russ Hinze, Minister for Main Roads in Queensland, in September. To date, I have not had a reply but we are pursuing the matter.

Out-of-turn Housing Allocations

Mr BELL to MINISTER for LANDS and HOUSING

What is the government's attitude to the establishment of an appeal system for those applicants who have been refused out-of-turn allocation by the Housing Commission and who still consider their situation warrants further action?

ANSWER

There are appellants in this country who go all the way through to the equivalent of our High Court and still believe that they are entitled to further hearings. One can understand that. It is not the intention of the government to introduce any such further appeal system. We believe that the system at present is equitable and we believe that it would be an unnecessary burden to go any further.

Sadadeen Primary School

Mr D.W. COLLINS to MINISTER for EDUCATION

What provision has been made to house students of Sadadeen Primary School until the school opens?

ANSWER

The member would be aware that the subdivisions which gave rise to the original fear that Ross Park Primary would be grossly overcrowded by this year and certainly next year do not appear to be coming to pass. Indeed, there are no new homes as yet in the Sadadeen stage 1 and 2 subdivision. There will be no overcrowding at all during this school year and it is doubtful that there will be significant overcrowding next year. It is not envisaged at this stage that there will be a problem. If there is a problem, it will be a temporary one, perhaps 3 or 4 months. In that case, it may be necessary to provide 1 additional mobile classroom. Certainly, we will not put in demountables because these tend to become permanent.

Future Management of Northern Territory Hostels

Mrs O'NEIL to MINISTER for LANDS and HOUSING

What arrangements have been made for the future management of those Northern Territory hostels currently managed by the Commonwealth Accommodation and Catering Service which the federal government has announced is to cease operation and for which the management contracts are due to run out shortly?

ANSWER

As members will be aware, the decision of the Commonwealth was taken quite unilaterally - as were all decisions pursuant to the Razor Gang recommendations announced by the Prime Minister which have caused governments around this country difficulties - and has caused this government considerable difficulty. There is a contingency plan and there is no point in going into it at this stage. The Chief Minister has been communicating with the Prime Minister to try to clarify the federal government's role. We believe this precipitous withdrawal is quite unfair to us and we certainly want some further lead time in order to handle this matter properly. If the answer from the federal government is in the negative, then I would be happy to advice the Assembly at a later stage of what we propose.

Future Use of Bagot Park Area

Mr HARRIS to MINISTER for COMMUNITY DEVELOPMENT

Has a decision been made on the future use of the Bagot Park Speedway area?

ANSWER

To my knowledge, no future use has been finally determined by the city council. The area is vested in the care and control of the Darwin city council. Whilst I am aware of 1 or 2 recreational and sporting groups which have approached the council with a view to taking over the Bagot Park area for their own uses after the speedway moves, I am not aware that the council has as yet made any decision on the matter. Certainly, I think it is one that the council should resolve fairly quickly so that the various groups can get on with planning.

Hospital at Jabiru

Mr B. COLLINS to MINISTER for HEALTH

Is it true, as many residents of Jabiru appear to think it is, that the hospital being constructed at Jabiru will not be opened as a hospital and people requiring hospitalisation from Jabiru will be sent to Casuarina?

ANSWER

Let there be no doubt in anybody's mind that the hospital at Jabiru cannot be all things to all people. There will certainly be people coming from Jabiru to Darwin for certain forms of treatment, just as people from Tennant Creek, Katherine, Gove and Groote Eylandt go to the larger centres for certain treatment. It is not true to say that the hospital will not open as a hospital. It will. The functions that will be carried out in the hospital are yet to be determined. I might add that there is still some dispute between the Commonwealth and ourselves over funding levels for the hospital. That is really an internal matter that has to be sorted out. As soon as these things are resolved, we will get on with the business of running the hospital.

New Cell Blocks at Berrimah Prison

Mrs PADGHAM-PURICH to MINISTER for COMMUNITY DEVELOPMENT

What is the current development stage of the new cell blocks at Berrimah Prison?

ANSWER

The accommodation at Berrimah Prison will be expanded quite significantly shortly. Accommodation for another 40 prisoners has been planned and I think I advised the Assembly earlier this year that arrangements had been made for this accommodation to be installed. It is hoped that by mid-December this year units will be completed to accommodate a further 40 prisoners, bringing the total Berrimah single-cell accommodation to 150. The government has also approved the creation of 9 additional positions of prison officer to cater for the increase in accommodation at Berrimah. Hopefully, for a period to time, this will give reasonably adequate accommodation for prisoners in Darwin. In the past, there have been times when the prisoner accommodation at Berrimah has been over the maximum that the facility was designed for. However, hopefully that situation will not arise very often in the future.

Channel Island Power-Station

Ms D'ROZARIO to MINISTER for MINES and ENERGY

What is the progress of site investigations in respect of the proposed Channel Island power-station?

ANSWER

There are people doing preliminary survey work on the Channel Island site at the moment. I cannot tell the honourable member the degree of work that has been done. If she is keen to know exactly what has been done, I can undertake to get a list of all the things that have been completed and provide them later in the sittings.

Public Access to Gunn Point

Mrs LAWRIE to CHIEF MINISTER

When a management plan for the recreational use of the Gunn Point area is finally prepared and accepted by the government, who will have the administration of access? Will it be the Conservation Commission or prison staff?

ANSWER

An acceptable management plan has not yet been prepared. A draft management plan has been prepared which was rather grandiose. I referred it back to the Conservation Commission with a few suggestions because I believe that it is a passive recreation area rather than an active one. In my view, there are no particular natural features at Gunn Point which would justify creating a national park in that area. I believe that the area should be open to and available for recreational purposes by the people of the city of Darwin and its environs. The people of Darwin unfortunately lack areas to which they may repair for recreation. When Gunn Point is developed to the extent of access roads to the beaches and to a creek - I think we might be proposing to put in a boat ramp - then I believe it will provide a most attractive feature in this part of the world.

I might say also that discussions are being held between the Conservation Commission and the Department of Lands and Housing in relation to other recreational activities. I believe that the Minister for Lands and Housing will be meeting a group of people in Alice Springs in the course of the next week or 2 to discuss further provisions that may be afforded in the regrettably rather tight situation that the Northern Territory finds itself in in relation to areas of general recreation.

Jervois and Mollie Hill

Mr VALE to MINISTER for HEALTH

Can he advise when medical facilities may be provided to the Jervois and Mollie Hill mining communities in central Australia?

ANSWER

The department has a role of providing services to people in remote areas. I am not aware of the exact level of service that will be provided to the communities at Jervois and Mollie Hill. I believe that there are about 130 people in these places and, at one particular site, there is already a nursing sister. The degree of service that we would provide and the level that the communities expect is something that really should be taken up by the company with the department. We do not have an automatic obligation to follow every community that pops up in the Northern Territory with fully fledged community health centres and hospitals. In this particular case, there would be some expectation that the company would do something to help itself. We would try to provide the level of service that is satisfactory to the communities.

Phosphate Deposits at Batchelor

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Considering the increased and still rising cost of superphosphate, will he further investigate the potential of known phosphate deposits in the Batchelor area so that Territory producers will be able to supplement imported fertilisers with a Territory product?

ANSWER

The question of fertiliser and phosphate at Batchelor has been under consideration for quite some considerable time. I recall that the department did tests on the product from that area about 2 years ago. The results were fairly inconclusive. I seem to recall that the product is unsuitable without considerable treatment. If the honourable member has any new information, we would be pleased to take the matter up again.

1978.821—20

Nhulunbuy Community Library

Mr LEO to MINISTER for EDUCATION

What is the Department of Education's assessment of the new community library in Nhulunbuy as an educational facility?

ANSWER

Yes.

Shopping Complex in Darwin

Mr HARRIS to MINISTER for LANDS and HOUSING

Is he aware of any proposal to site a shopping complex on the existing city council car-park next door to Woolworths?

ANSWER

I am unaware of any such proposal. I will certainly have the matter investigated and inform him later.

Ranger Uranium Mine

Mr B. COLLINS to MINISTER for MINES and ENERYG

Is it true that if the environmental regulations at Ranger were complied with by the company - that is, to have 2 metres of water over the top of the tailings - that body of water could not reasonably fit into the tailings dam as it is presently constructed?

ANSWER

I cannot answer that but I give him an undertaking that his question will be addressed in the report that is being prepared by the department.

Stott Terrace Connector Road

Mr D.W. COLLINS to MINISTER for LANDS and HOUSING

Is he aware that reconstruction of Undoolya Road will be very inconvenient and possibly quite dangerous without the detour that could be provided by the arterial connector road from Stott Terrace bridge? When can we expect some action on this connector road?

ANSWER

I understand that plans are well advanced for the design of the new connector road leading off the Stott Terrace bridge. I have spoken previously about the difficulties that we have had on this matter and there is no point elaborating on those. As a result of a new route having been found, extensive redesign is necessary and we would hope that this is done within the next couple of months. I certainly agree with the member that the reconstruction of Undoolya Road will cause inconvenience. I would not necessarily accept that it will cause a dangerous situation. Obviously, when reconstruction of that nature takes place, certain traffic control measures are taken such as greatly reducing the speed limit. I suppose it is also true to say that any reconstruction of an arterial road causes inconvenience. I think anyone who chooses to come via the Bagot Road-Stuart Highway intersection would agree. Nonetheless, a temporary inconvenience is often woth while for the benefit of the longer term traffic flow.

National Estate Grant for the Encouragement of Bark Painting

Mr BELL to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Has he taken any action in respect of a National Estate grant from the federal government for the encouragement of bark painting in the Top End?

ANSWER

I have no details with me on this matter and I suggest the member place the question on notice. We receive a number of specific purpose grants from the Commonwealth which we administer through our own arts and heritage authorities. The one the member specifically mentioned does not come to mind and I will have the matter followed up.

Feral Buffalo and Cattle in Kakadu National Park

Mrs PADGHAM-PURICH to CHIEF MINISTER

Because the Conservation Commission falls within the portfolio of the Chief Minister and because of his liaison capabilities with his federal counterpart who has the responsibility for the administration of Kakadu National Park, does he know the plans for disposal of feral buffalo and feral cattle in the park during this Wet?

ANSWER

The member for Tiwi makes a few assumptions in asking that question. She assumes that I have a capacity for liaison with my federal counterpart in this particular area of national parks. Actually, I have a very limited capacity for liaison with that gentleman because he comes to the Northern Territory and avoids me like the plague despite invitations to meet me on several occasions. In this Assembly, we should adopt the policy of answering questions relating to our particular responsibilities. Quite obviously, Kakadu National Park is not, at this stage, a direct responsibility of the Northern Territory government but it is certainly an area of responsibility that the Northern Territory seeks. I am sure, in due course, by arrangement with the Aboriginal people of the area and with the federal government, our aspirations will be met even though the road may be rocky and long. I have caused a telephone call to be made to the ANPWS and I am informed that not a great deal of culling goes on during the wet seaon. If the member for Tiwi would like to make a similar telephone call, she will be given full particulars.

Licensing of Insurance and Mortgage Brokers

Mrs O'NEIL to ATORNEY-GENERAL

There has been wide discussion in Australia recently on the desirability of licensing insurance and mortgage brokers. I think this follows a recommendation of the Law Reform Commission. Is consideration being given to such action in the Northern Territory?

ANSWER

I understand that the Treasurer is involved in the process of formulating legislation in relation to the registration of insurance brokers. It apparently falls within his area of responsibility and he may be able to give the honourable member for Fannie Bay more details on the matter than I can.

Mrs O'Neil: Mr Speaker, may I redirect the question to the honourable Treasurer and Minister for Industrial Development?

ANSWER

Mr Speaker, I think it is suffice to say that the government is examining the matter of the reasonableness of introducing legislation to license and control insurance brokers in the Northern Territory. The relevant government officers held talks with various arms of the insurance industry on the matter and I believe that a Cabinet submission may be ready for consideration in the near future.

Shopping Complex in Darwin

Mr HARRIS to CHIEF MINISTER

Is he aware of any proposal to site a shopping complex on the existing city council car-park, next to Woolworths in Cavenagh Street?

ANSWER

Mr Speaker, when I heard the member for Port Darwin address his question regarding a shopping complex to the Minister for Lands and Housing I mentioned to him that the Right Worshipful Lord Mayor of the Corporation of the City of Darwin telephoned me yesterday to say that he has a proposal in relation to a department store. From memory, it is to be erected on that car-park in Cavenagh Street next to Woolworths. He said that he would send me a copy of this proposal which he had received from certain people who apparently want to build the department store and run it. I thanked him and said I would look forward to receiving it. That was about the sum total of the conversation. I do not have any precise details at this stage, but there certainly is a project in the air which may result. That is all I can say. The Lord Mayor made it quite clear that there is no commitment on the part of the council to the project at this stage; it is merely a proposal that he has received in his capacity as Lord Mayor. I suppose he gets plenty every week, as I do, for turning water into gold and things like that, and seeking finance to that end. No doubt it will be considered by the council and, if there is any assistance that is needed by it from the Territory government then I am sure - if the proposal is a worthwhile one, and on the face of it one would think that Darwin could well use a department store having reached this stage of its growth and progress - then the Territory government would assist in whatever reasonable way it could.

Reef Fish and Mackerel Fishing

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

What investigations have been undertaken into reef fish and mackerel fishing and are Northern Territory waters suitable for the introduction of mackerel and the subsequent catch?

ANSWER

Mr Speaker, the government has spent quite a bit of money looking at the potential of reef fish and mackerel fishing to enable diversification away from the barramundi fishery. The results to date have been quite inconclusive. The fishery itself is obviously not strong enough. More work is required before I can advise the member further.

Stott Terrace to Undoolya Connector Road

Mr D.W. COLLINS to MINISTER for TRANSPORT and WORKS

Can he give an estimate of how long it will take to build the Stott Terrace to Undoolya connector road once the tender has been accepted?

ANSWER

I am unable to answer the member but will seek information and provide it to him at a later hour.

Liquor Advertising

Mr BELL to MINISTER for HEALTH

Has he undertaken any consultation with the alcohol industry with a view to controlling the nature of liquor advertising?

ANSWER

The short answer is no, not because I am not interested, but because the control of advertising for the alcohol industry, as with most other industries, is outside the prerogatives and responsibilities of the Northern Territory government. I can assure you, Mr Speaker, that the alcohol industry is in no doubt about my attitude towards the excessive consumption of alcohol in the Territory. However, the government cannot control the levels and methods of advertising.

Traffic Lights at McMillans Road-Stuart Highway Intersection

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

In view of the importance of the intersection of McMillans Road and the Stuart Highway, when will the traffic lights there be in operation again as they have not been operating for 3 days.

ANSWER

The member has just made me aware of the problem at that intersection. I will have the department remedy this situation as soon as possible.

Review of Staffing at Casuarina Hospital

Mr BELL to MINISTER for HEALTH

Following the review of staffing undertaken at the Casuarina Hospital, in which areas have there been found to be shortages?

ANSWER

I cannot answer the member off the top of my head. I can advise him the review was carried out in no less than 17 or 19 sections of the hospital. It affected everybody from the medical superintendent all the way down the scale. I will undertake to get an answer for the member and advise him later of the complete review.

Draft Planning Instrument for Brinkin Area

Mr VALE to MINISTER for LANDS and HOUSING

Would he consider extending to 90 days the display period for the draft planning instrument for the Brinkin area?

ANSWER

Mr Speaker, I have already issued instructions to the person holding my delegation under the Planning Act that the display period in this instance be extended to 90 days. By your leave, Sir, I might take the opportunity to make a couple of comments on the petition which has just been tabled as it is within this context. The government, of course, notes that particular petition, but I would like to point out that there has never been R1 zoning in that area; in fact, it was previously zoned 'future uses'.

National Park at Tempe Downs

Mr BELL to MINISTER for LANDS and HOUSING

Is it the intention of the government to declare a national park on Tempe Downs in the vicinity of Kings Canyon and, if so, what consideration is being given to the traditional associations of the Kultitja, Murrathurra, the Luritja and Pitjantjatjara in that area?

ANSWER

Mr Speaker, the question would probably be better addressed to the Chief Minister as minister responsible for national parks and for the Conservation Commission. It is the intention of the Northern Territory government to establish a significant national park in that area. Needless to say the Conservation Commission has a consistent policy in areas where Aboriginal people have an association to try to involve them to the maximum extent not only in the running but also the planning of such a national park. However, the question should be answered in a fuller sense by my colleague.

Driving Licences for 16-year-olds

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

Has the minister considered the subject of issuing driving licences to 16-year-olds in certain circumstances and, if so, can he outline his plans on the matter?

ANSWER

Mr Speaker, I have received several representations on this subject, including a couple from the honourable member herself, and can inform the Assembly that the problem is receiving consideration at the national level. The Australian Transport Advisory Council is considering the question of a minimum licensing age as part of a general review of licensing of drivers in Australia. The Commonwealth Office of Road Safety has reported possible advantages in making restricted licences available to 16-year-olds. The Commonwealth House of Representatives Standing Committee on Road Safety is also in the process of reporting on driver education, training, and licensing. I shall have the progress of these studies monitored and, should it appear that there is additional support for allowing 16-year-olds some form of licence, I will have the appropriate legislation prepared for consideration by this Assembly.

Assembly Sittings in 1982

Mr B. COLLINS to CHIEF MINISTER

Will the Chief Minister consider asking yourself, Sir, to increase the frequency of sittings in 1982?

ANSWER

Mr Speaker, I noted the comments of the Leader of the Opposition last week in relation to the frequency and duration of sittings of the Assembly. It was certainly as gladdening to my ear as it must have been saddening to some of the journalists in the box, who have been bleating about the need for more frequent and longer sittings, to hear the Leader of the Opposition state that this Assembly certainly sat for long enough to transact its business. As every honourable member knows, the Assembly can sit as long as it needs to transact its business. I thought the the suggestion of the Leader of the Opposition was a good one. I have asked for a paper to be prepared for discussion in Cabinet and the preparation of suggestions to you, Sir. As a preliminary thought on the matter, perhaps we could split the proposed November sittings next year into 2 sittings of 1 week each to meet the requirements of the member for Fannie Bay who complained last week that the budget sat around for too long to be debated. We could have a 1-week sittings in September or October and then have a 1-week sittings in November. This would suit not only the Deputy Leader of the Opposition but my colleague the Treasurer who is a bit like a mother hen until the budget has been passed. It would kill 2 birds with one stone.

International Year of the Disabled Person

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

Following completion of the International Year of the Disabled Person how will continued government support of the principles of that year be manifested in 1982?

ANSWER

I have a Cabinet submission on this subject. It addresses the various options which are open to government in the period following the International Year of the Disabled Person. My department has had a look at the various options open within the policy of government and I hope to make an announcement shortly.

Nomad Aircraft

Mr HARRIS to MINISTER for HEALTH

Recently, he announced that there would be a review of the use of Nomad aircraft in the Aerial Medical Service. Has the review been concluded and, if so, what is the outcome?

ANSWER

The review is complete and is being assessed by the department. I have not read the review myself but, as soon as the department's comments on it are complete, I will read the review and the comments so that we can look at the future of aircraft for the Aerial Medical Service.

Financial Assistance to Barramundi Fishermen

Mrs LAWRIE to MINISTER for PRIMARY PRODUCTION and TOURISM

Has he, through the Treasurer, made an application to the Commonwealth for special funds to assist Northern Territory barramundi fishermen to transfer out of that section of the fishing industry, bearing in mind that a barramundi boat cannot be used effectively for any other kind of fishing?

ANSWER

Like all the states, the Northern Territory was party to a submission to establish a rural adjustment scheme for fishermen. At a meeting held earlier this year in Melbourne, the Northern Territory still subscribed to the Commonwealth's wish that that scheme be implemented. Most of the states backed out

because the Commonwealth refused to put up the money. That is not to say that the Northern Territory government will not pursue it over the coming weeks.

Land for Agricultural Development and Marketing Scheme

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

Is it the intention of government to obtain more land for the ADMA scheme by compulsory acquisition?

ANSWER

The government is certainly desirous of obtaining more land for agricultural development. Agricultural development in the Northern Territory cannot proceed past its present point unless further land is obtained. The Northern Territory government is seriously considering the ways and means available to it to obtain the land necessary to implement stage 1 of the Agricultural Development and Marketing Scheme.

TB-infected Feral Animals

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION and TOURISM

Do tuberculosis-infected feral animals present a serious obstacle to the eradication of the disease in cattle?

ANSWER

Significant levels of tuberculosis in feral animals are confined to buffalo and pigs. TB in buffalo is a major problem. It can only be overcome by using the control measures effective in cattle. Those measures include intensive testing, the culling of reactors and the destocking of animals which cannot be mustered. TB in feral pigs appears to be less of a problem than it is in buffalo. Experiments are being carried out at the Berrimah research station where pigs that are heavily infected by TB are deliberately run with TB-free buffalo. The pigs do not appear to transmit TB to cattle. The trials are continuing and, if the situation is confirmed, we could then say that the infected feral pigs do not represent a disease hazard to buffalo and cattle which are free of tuberculosis.

Southern Treatment for Juvenile Psychiatric Cases

Ms D'ROZARIO to MINISTER for HEALTH

What arrangements are available for juveniles receiving psychiatric treatment to be transferred to southern cities for the purpose of long-term care and management in institutions which are specifically equipped to handle such cases?

ANSWER

The department has long-term arrangements with the South Australian government for the treatment of people who need psychiatric care. The decision to send people to South Australia is taken on medical grounds only. The cost to the Northern Territory is quite high but it is our responsibility and we meet it. As the honourable member is aware, with our small population, it is not possible to have a psychiatric unit that provides all services for all persons. For that reason, we will always have to send some people interstate, which is regrettable. Nevertheless, if the member has a particular case that she would like to raise confidentially with the department, I would be happy to have the matter taken up on her behalf.

International Year of the Tree

Mrs LAWRIE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

He is doubtless aware that, to many people's delight, next year is the International Year of the Tree. Would he indicate what special funding, if

any, is being made to any organisations to promulgate the International Year of the Tree?

ANSWER

The subject of trees, their preservation, conservation or eradication does not fall within my portfolio areas. The Treasury looks after funding right across the board, so I do not have the information in front of me. Perhaps she should redirect the question.

International Year of the Tree

Mrs LAWRIE to CHIEF MINISTER

I redirect my question to the Chief Minister.

ANSWER

I am delighted to hear from the member that next year is the International Year of the Tree. It is a subject that is very dear to my heart. I was disappointed when I heard some weeks ago on the ABC that next year was to be the International Year of the Mother-in-Law to improve the status throughout the world of mothers-in-law. This was reported in quite a serious manner. It seems to me that mothers-in-law are there and there is not a great deal that we can do. I think they will always be the butt of some jokes from sons-in-law and daughters-in-law. As I say, I am delighted that it is to be trees rather than mothers-in-law. I am quite sure that the Conservation Commission will gear itself up to mounting a massive program on educating people on the benefits and advantages of trees. As you know, Mr Speaker, in the Northern Territory, forestry is a purely conservation function and there is virtually no exploitation of trees except for round pole houses and fences. I would say that we are already planting more trees each year than we are destroying. That is as it should be and it is a shame that it cannot be said for other areas of the world. In some countries, unfortunately, all the trees have been felled and the countryside is bare. I hope that next year will be one in which many more people in the community will become aware of the importance of trees to the environment.

Alice Springs Rifle Range

Mr D.W. COLLINS to MINISTER for LANDS and HOUSING

Has a decision been made on the relocation of the Alice Springs rifle range?

ANSWER

No.

Ranger Uranium Mine

Mr B. COLLINS to MINISTER for MINES and ENERGY

In view of the fact that the Ranger Mines Environmental Impact Statement and the Fox Report both recommended that the coverage of tailings should be between 2 metres and 3.5 metres of water, why were those standards lowered?

ANSWER

Without referring to the 2 inquiries to which the honourable member just alluded, I would say that the requirement by the Supervising Scientist so far as the coverage of the tailings in the dam is concerned has always been that they be kept under water. The company's proposition in its application for its authorisation was to keep the tailings under 2 metres of water and that was agreed to. The company applied subsequently to have its authorisation varied and the Supervising Scientist, the NLC and the technical people in my department agreed to the variation. That is why it was allowed to have the variation.

Bagot Park Speedway Area

Mr SMITH to MINISTER for YOUTH SPORT and RECREATION

What steps will he take to ensure that the people of Millner are consulted about the future use of the Bagot Park Speedway area?

ANSWER

It is difficult to answer the question because it is a matter for the Corporation of the City of Darwin. I would ask that the honourable member request information from the city council regarding its future proposal for that area.

Red Milfoil in Alice Springs

Mr VALE to MINISTER for PRIMARY PRODUCTION and TOURISM

Could the minister advise what action has been taken to counter the outbreak of red milfoil which has been discovered in the water system of the Alice Springs Casino?

ANSWER

The Department of Primary Production and the Conservation Commission are working closely to contain the outbreak of red milfoil at the Alice Springs Casino. It is an indigenous water weed that is spread by birds throughout Australia. It has been found in the Finke and Hugh Rivers and the Barkly Tableland. Recommended treatment is with diquat at 2.5 mls per cubic metre of water. The water should not be used for irrigation for 10 days after treatment because diquat is toxic to fish. The casino has been advised to treat its reservoir, according to instructions, with diquat. For the 10-day holding period it should water its lawns directly from the bore.

Howard Springs Primary School

Mrs PADGHAM-PURICH to MINISTER for EDUCATION

What plans are there to control the expected overcrowding at Howard Springs Primary School next year?

ANSWER

It is true that there is a possibility that the number of students at Howard Springs Primary School will exceed the design capacity of that school pending the opening of the Humpty Doo Primary School in the second semester of 1982. I am informed that the principal is of the view that he can cope with expected student numbers. If it is subsequently found that he is unable to do so, a similar set of circumstances would arise to those which occurred at the Ross Park Primary School in Alice Springs. We would probably provide a mobile classroom as a short-term measure. Again, it would not be one of the so-called demountables or transportables which tend to become permanent, but something that is strictly of a temporary nature to overcome the peak period which may occur some time next year or perhaps even in the first semester of 1983.

East Point Reserve

Mrs O'NEIL to MINISTER for LANDS and HOUSING

What progress has been made towards the acceptance by the government of a management plan for the East Point Reserve and adjacent areas of land?

ANSWER

I have not been involved directly in any plan of management in respect of East Point since I left the portfolio of Minister of Community Development. It certainly is not a lands function. The Lands Department would become involved in it if it required a variation of zoning or a variation of boundaries. I know

of no further development since that time. The honourable member for Nightcliff has recently written to me on the proposal of the lakes project which adjoins the East Point Reserve. In that context, it would be true to say that the East Point Trustees would be of the view that they do not need the private development proposal in terms of their own development plan. Certainly, it would be true that the developers would need the cooperation of the East Point Trustees. It is not a matter directly related to my portfolio. I would assume that the present Minister for Community Development would be the right person to put the question to.

East Point Reserve

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

I redirect my question regarding management plans for East Point Reserve to the Minister for Community Development.

ANSWER

I do not recall all of the honourable member's original question. The East Point Reserves Board, under a statute of this Assembly, has responsibility for the management of East Point at the present time and has had for a number of years. The East Point Reserve Trustees have engaged consultants in the past and have completed a fairly extensive report on the future of East Point and there are other parties interested in this subject. The city council have always taken an interest in East Point and its future. As the honourable Minister for Lands indicated, there is also a private proposal for the area which bears to some degree on the periphery of East Point. The Department of Community Development is preparing a submission on the subject for me taking into account the views of all parties concerned so that we can make a decision on the future of East Point. There are a number of matters unresolved at present and the government has received applications from groups in the community, not just to use some of the existing facilities at East Point, but to take some form of tenure over some of them for their own purposes. These matters are quite serious, of course, and will need to be addressed when looking at the entire future of East Point. I hope that, during the course of the next 6 months to a year, we can completely resolve the matter.

Billing of Outpatients in Remote Townships

Mr LEO to MINISTER for HEALTH

Will he recommend a system of bulk-billing for outpatients at hospitals and medical centres in remote townships which have no medical insurance office?

ANSWER

Unfortunately, the issue of bulk-billing is not one that can be resolved by the Northern Territory alone. It relates to Commonwealth law and its control over medical benefits funds. I am more than happy to consider the issue of bulk-billing and outpatients. In fact, I am not at all pleased with the operation of the funds in the Northern Territory at the moment. Most of the funds have set up facilities in Darwin and Alice Springs but Gove, Tennant Creek and Katherine are not suitably serviced by the facilities of the funds. In some cases, the funds are happy to collect revenue for contributions locally but insist on the processing of claims being done in places thousands of miles away. I wrote to the funds on this particular issue and did not get any joy. I will take one further step to try to break the nexus; that is, to offer to any fund which is prepared to set up contribution and payout facilities in every town of the Northern Territory space in our hospitals to provide its facilities. People who go to Outpatients could then get their accounts and walk over to a teller and obtain refunds. The funds are pretty competitive amongst themselves and I think they will not warm to this but, if we can get one of them to break ranks, it will be to the advantage of all citizens of the Northern Territory.

National Park at Tempe Downs

Mr BELL to CHIEF MINISTER

Is it the intention of the government to declare a national park on Tempe Downs in the vicinity of Kings Canyon and, if so, what consideration is being given to the traditional associations of the Kultitja, the Murrathurra, the Luritja and the Pitjantjatjarra in that area?

ANSWER

The Conservation Commission has been negotiating now for more than 10 years, I believe, with owners of Tempe Downs Station to acquire, by purchase or otherwise, an area of land surrounding Kings Canyon. Having seen it, I believe it to be one of the outstanding natural features of the Northern Territory. As well, there is unique vegetation and other features in the area which deserve preservation. At present, there is absolutely no protection afforded, in any statutory sense, to the Kings Canyon area. I think that the Conservation Commission has been very forbearing in the length of time that it has taken on these negotiations with the various owners. In any event, the matter is now drawing to a head, and it has been indicated to the owners of Tempe Downs that, unless they are prepared to negotiate expeditiously a reasonable price for the sale of the area to the Conservation Commission, then acquisition action will have to be taken. As the Minister for Lands and Housing indicated in his answer earlier, which I thought was more than sufficient to cover the question asked by the member for MacDonnell, the Conservation Commission will be taking into account the interests of people traditionally connected with the area. I would think that the declaration of a national park is one of the best ways of protecting their interests. It would certainly seem to me to be, from their point of view, a situation superior to the present situation whereby it is part of a pastoral property.

Channel Island Power-station

Ms D'ROZARIO to MINISTER for MINES and ENERGY

Is it a fact that agencies acting on behalf of the Commonwealth government have suggested that, in view of Darwin's reduced rate of growth, the construction of the proposed Channel Island Power-station be deferred?

ANSWER

Not to me, Mr Speaker.

Aboriginal Development Commission Headquarters

Mr VALE to CHIEF MINISTER

I ask this question on behalf of the member for Elsey. Is the Chief Minister aware of the need at Numbulwar for houses and cyclone shelters? Will he bring this need to the attention of the chairman of the Aboriginal Development Commission which recently purchased a building for $4m for its headquarters?

ANSWER

Throughout the Northern Territory, additional facilities are needed in various communities. I was intrigued at the question from the honourable member for Sanderson who indicated that, according to her, the growth of Darwin had slowed and the new power-station is not to be constructed. I found that rather extraordinary in view of the fact that subdividers are beating my door down trying to get into Palmerston. It seems that, despite what papers say, the growth situation in Darwin is evidenced very strongly by the fact that people want to put their money where their mouth is and carve up more land out there to sell to the people whom the honourable member for Sanderson says do not exist. I take the point that the Aboriginal Development Commission has purchased a building for its headquarters. I imagine that would be well within the legitimate power

of the commission. Allocation of its funds is a matter for the commission to decide on and I would imagine that, as the commission has to account to the Aboriginal people in due course, it would have considered whether it would have a headquarters building as an investment or provide additional facilities to remote communities. No doubt, the people of Numbulwar and other communities will ask the commission the basis on which it makes decisions on priorities.

Export of Horticultural Crops

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

What produce is included in the government's scheme for the development of a small but highly profitable export of certain horticultural crops from the Northern Territory to South-east Asia?

ANSWER

The Agricultural Development and Marketing Authority is mainly concentrating its marketing efforts on mangoes and rock-melons at present. We sent some cartons there and the attitude towards the produce was interesting. In fact, it was demonstrated to us very clearly that the product currently being grown here is not exactly what the market wants. The market is looking for a smaller and sweeter rock-melon than we currently provide. The mangoes had a fairly mixed reception. I think the experience in testing the market the way we did will augur very well for the future of horticultural development in the Territory.

Juvenile Crime

Mr D.W. COLLINS to CHIEF MINISTER

Has he received any evidence connecting school truancy with juvenile crime, especially house-breaking?

ANSWER

I certainly have not received any firm evidence connecting school truancy with juvenile crime, especially house-breaking, but the member has asked an interesting question. I am told by the police that no precise figures are kept but, on their experience rather than any empirical basis, they estimate that the percentage of juvenile crime connected with school truancy could be in the order of 30%. Obviously, it would be in the interests of the community to minimise truancy.

Burn Cases at Casuarina Hospital

Mrs O'NEIL to MINISTER for HEALTH

Further to the question asked by the Leader of the Opposition regarding a special burns facility at Casuarina Hospital and the minister's subsequent visit to the hospital, can he now inform the Assembly whether or not Ward 2B is used to hold patients who are suffering from methycillin staph resistant infections? If this is in fact the case, does it mean that burns patients do not have access to the special burns facilities in that ward because of the danger of such infections to them?

ANSWER

In response to a question on notice asked by the Leader of the Opposition, I was advised that listed on the 1981-82 minor new works program is a special burns bath for installation in Ward 2B at Casuarina Hospital. Burns patients are nursed in protective isolation in single rooms in the surgical ward and are bathed in bed or, until recently, in a bath kept solely for burns patients. Work has been completed on the installation of the burns bath and it became operational about a fortnight ago. This piece of equipment has been at the hospital since October last year but had not been installed until recently because of unresolved medical considerations as to whether the equipment was

appropriate and where it should be located. I must stress, however, that, in the interim, burns patients have had exclusive use of alternative, satisfactory, bathing facilities. The matter of bathing for burns patients is, in medical terms, quite complex and I would be happy for members to be briefed by the doctors who are involved in the exercise so that they can get a better understanding. I leave that invitation open to them.

Board Controlling Satellite Communication

Mr HARRIS to CHIEF MINISTER

Has he had any indication whether or not it is possible for the Northern Territory to be represented on the board controlling Australian satellite communications?

ANSWER

Through the office of the Co-ordinator General, I have been monitoring the domestic satellite program and, where information can be obtained, we are getting it. In fact, only about a month ago, the Northern Territory government sent 2 officials to represent it at a conference in Canberra of proposed users of the domestic satellite. The Northern Territory officers put the Territory view that there must be adequate consideration for people in remote areas for educational programs and the like. It is the Northern Territory attitude that we do not want to see the domestic satellite monopolised by commercial interests. I think there is little danger of that but, unfortunately, the Minister for Communications announced the board that will control the operations of this domestic satellite some 2 or 3 weeks ago. To the best of my knowledge, the Northern Territory was not consulted beforehand - at least I do not think I was - and so far as I can recall I was not asked to nominate anyone to this board. I think it would be fruitless to take the matter of a nomination up at this stage because these people have been so recently appointed, but honourable members may rest assured that I will do my very best to get representation for the Northern Territory on this board as vacancies occur. I will be writing to the Minister for Communications in that regard. Mr Speaker, as you know because the lady in question resides in your electorate, the Northern Territory has been fortunate since the advent of self-government in gaining direct representation on the ABC in the person of Commissioner Val Michell, and it is the objective of the Northern Territory government to see that the Territory's interests, wherever possible, are represented on national boards of this nature. That policy will be maintained.

Enrolments at Aboriginal Teacher Training Centre

Mr B. COLLINS to MINISTER for EDUCATION

The number of applications for places in the Aboriginal Teacher Training Centre at Batchelor have dropped from 120 this year to 46 for the 1982 school year. Has this been caused by the non-replacement of Aboriginal trainee teachers in schools?

ANSWER

The honourable member asks me for information which I could not possibly have; he would have to ask the people who have not turned up. I would be happy to undertake an investigation of the matter and write to him in due course.

New Health Care Program for Aboriginals

Mr BELL to MINISTER for HEALTH

I refer to his press release of 7 October regarding his department's new Aboriginal health care program. What consultation with Aboriginal health workers and their communiities did his department undertake before announcing the new policy on the Aboriginalisation of health centres?

ANSWER

As I outlined to the Assembly last week, the policy ultimately to hand over health facilities in communities to Aboriginal health workers was established in 1975. The announcement that the honourable member refers to relates to the next step in that policy: to break the nexus and move out the European staff who have been present for some time. As I also mentioned the other day, the degree of consultation necessary to achieve this will be very great. It is not just a matter of abandonment on the part of the government to achieve its policy; it is really a matter of negotiating with the community concerned how, where and when to achieve the objective. As the honourable member is aware, there are some communities in the Northern Territory which do not wish to see their European sisters go away from their community. There are other areas where the community is happy for the transfer of power to be accomplished as early as possible.

The honourable member for Tiwi mentioned the other day the concern of her constituents at Garden Point. They raised the legal issues that relate to the removal of the European sister and the responsibilities placed on the Aboriginal health workers. All of these things have to be worked out between the department and the community. If the honourable member knows of any particular problems that confront us in this exercise, I would be more than happy to take the matter up with him. If he believes that adequate consultation and negotiation are not taking place, I would be keen to hear from him on that matter. The exercise is a transfer of power in an orderly manner and at the rate at which a local community wants it and is prepared to receive it.

Section 21 of Education Act

Mr D.W. COLLINS to MINISTER for EDUCATION

How many parents have been prosecuted this year under section 21 of the Education Act?

ANSWER

By the tone of the question, I assume it refers to that section which relates to prosecutions for non-attendance of children at schools. The answer is none.

Control of Fisheries

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

He made a statement last week that the Northern Territory was not able to control fisheries outside the 3-mile limit. The Fisheries Act, as amended in 1978, provides for this to happen. Mechanisms were provided for the Commonwealth and states to consult and agree on the management of a particular fishery irrespective of whether or not the fishery is within or beyond the 3-mile limit. Given that this is a fact, will he ensure that this agreement is sought so that a greater return from this Territory source can flow to the Territory?

ANSWER

I also stated at the time that a joint decision would have to be taken by the Territory, Queensland, Western Australia and the Commonwealth. The honourable member is losing sight of the fact that the Northern Territory has fought for fisheries over a number of years. In fact, we fought for fisheries west of the Wessels to be for Northern Territory fishermen only. We fought against the increase of the number of boats in the fishery. We fought against the subsidies allowed to shipbuilders to go on and on. If the honourable member thinks that we are walking away from looking after the rights of Territorians, I guess he is wrong. Again, the public could be misled by the NT News of yesterday. It is unfortunate that we have to keep slicing up the News for its misleading headlines. The headline is 'Fishing Not a Federal Matter Says Kerin'. Obviously, Mr Kerin's

positive commentary and contribution to debate is likely to have a non-positive effect on people who read the newspaper. I think that people should be aware of that.

NTDC Action on Loans Recovery

Mr B. COLLINS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

In June of this year, he said in reply to a question on notice that the Northern Territory Development Corporation was taking follow-up and review action on drought relief, flood relief, Primary Producers' Board and Darwin business relief loans that were in arrears. Could he advise the Assembly if action has been taken?

ANSWER

I do not have specific information before me. I suggest that either he place the question on notice or write me a letter.

Letter PL629(3)GL2072 Relating to NT Portion 1097

Mr BELL to MINISTER for LANDS and HOUSING

I preface my question by once more recalling the alacrity with which he read into Hansard the letter PL629 of about May this year in relation to NT portion 1097. Will he table a further letter PL629(3)GL2072 of October 1980 giving details of negotiations of his department in this matter?

ANSWER

The letter is dated 6 October. I have a copy here. I am not certain whether I have a spare copy. I certainly have no objection to either reading the letter into Hansard or tabling a copy of it. I would prefer not to take up the Assembly's time. The letter is dated 6 October 1980 and is addressed to Messrs Duncan and Gillman. I think the member indicated in a previous question that he thought it was addressed to solicitors Messrs Duncan and Gillman. The letter - and it is from myself - says:

> *I am writing in reference to discussions between yourselves, my predecessor, the honourable Mr Marshall Perron MLA, and Mr Ron Wright of my department about the possible release of vacant Crown Land to the south of your lease as an extension of the existing pastoral lease. As you are aware, the area is subject to an Aboriginal land claim which precludes any action for the time being to facilitate the release of this land. I do not believe I should give any commitment in relation to your application now because circumstances could well have changed if and when the land becomes available for release.*

Mr Speaker, at the time of writing that letter, I was wrongly under the impression that it was a continuation of an existing land claim. Upon discovery that the initial land claim had been withdrawn, I drew the conclusion, in accordance with government policy, that it was a second land claim. Thereupon the property did become available for release. At that time, I called for both files, made a decision as to which of the applicants in chronological order of application was most deserving of a grant of a Crown lease and acted accordingly.

Jabiru Police Station

Mrs PADGHAM-PURICH to CHIEF MINISTER

What is the Commonwealth financial commitment to the building of the Jabiru police station?

ANSWER

Under the funding arrangements for the provision of social amenities and infrastructure at Jabiru, the Commonwealth, in accordance with clause 67 of the Memorandum of Understanding, has accepted the commitment of $1.186m for the construction of a police station complex including a vehicle storage compound and a police officer's residence.

1978.821—21

Water Supply at Yarralin

Mr DOOLAN to MINISTER for COMMUNITY DEVELOPMENT

Has he received advice that the water supply at Yarralin community is reported to be faecal contaminated, that this has been known or suspected for more than a year and that the water pumps are continually breaking down because of their age and lack of maintenance? I might add that the resident female anthropologist was quite seriously ill last year and hospitalised in Katherine for some time because of drinking contaminated water.

ANSWER

I do not recall being advised of the specific case mentioned by the honourable member for Victoria River. There are quite a number of areas in the Northern Territory where the water supply is considered unsatisfactory. The water does not meet World Health Organisation minimum quality for human consumption. These matters are not easily overcome particularly as many Aboriginal groups are very reluctant to move from their present areas for reasons known to themselves. The government has had very extensive bore drilling programs throughout the Territory and some of these have been unsuccessful in finding water within the reasonable vicinity of a group of Aboriginal people. If they choose not to move and continue to drink water that is available, which is often surface water which may be quite badly contaminated, then finding a solution presents real problems. In conjunction with the Department of Transport and Works, my department is investigating such matters as solar distillers to try to obtain suitable low maintenance machinery that could be put into the field to produce water, at least for human consumption, even if in relatively small quantities. This is an ongoing program because we are concerned about the standard of water in quite a number of areas. I do not recall specifically the problem in relation to the group the honourable member mentioned.

National and International Airlines and the Northern Territory

Mr VALE to MINISTER for PRIMARY PRODUCTION and TOURISM

Can the minister advise what action has been taken by himself and hard working officers of the Tourist Commission to encourage more national and international airlines to visit the Northern Territory?

ANSWER

Mr Speaker, the question is quite unexpected. I think the facts virtually speak for themselves in terms of the number of visitors attracted by and coming to the Northern Territory and the establishment of new air routes by the airlines. The Perth to Townsville route had its inaugural flight last month. The Minister for Transport and Works and I were on that flight. That is a weekly service and is fully booked until after Christmas. The Chief Minister has written to Ansett about establishing a weekly service between Brisbane, Alice Springs and Perth. At this stage, we have had no response from the Ansett people. The international scenario looks promising. Royal Brunei has asked, through the federal Department of Transport, to be considered for the operation of a service into Darwin and representatives from MAS are coming next April to see what possibilities exist for them to establish a service to the Territory also.

Aboriginal Teacher Training Program

Mr B. COLLINS to MINISTER for EDUCATION

In compliance with a direction from the minister earlier this year that control of the program for Aboriginal teacher training at Batchelor should be given to the Darwin Community College, is it true that a proposal has been reached by the community college and the Department of Education that the course

should be split in half, the first 2 years being done in Batchelor and the last 2 years at the Darwin Community College?

ANSWER

At this stage, there is discussion between my department and the Darwin Community College as to the best method of implementing the decision I have taken. I would like to take the opportunity of clarifying what that decision was. Quite obviously, we would not want to see the Darwin Community College campus further split. Goodness knows, it has put up with that problem for long enough. As far as the teaching side is concerned, if we are going to encourage Aboriginal people to go into teacher training, then they must believe that the education they will get in order to become teachers is as near as is possible to that which is obtained by any other person who trains as a teacher. Therefore, I believe that the entire teaching program ought to be done by the Darwin Community College. The residential facilities, however, are at Batchelor. Certainly, we would not want to shift all of that, at enormous capital expenditure, back to the Casuarina campus. In addition to that, the Department of Education will undertake programs which are somewhat similar to those which were starting at Dhupuma; that is, short-course work. It means it is truly a TAFE institution on that section. Basically, the property would remain with the Department of Education but all teaching functions in teacher education, including the first 2 years, would be carried out by the people who are properly trained to teach teachers.

Fresh Water Prawn Farming

Mrs O'NEIL to MINISTER for PRIMARY PRODUCTION and TOURISM

Has consideration been given to the possibility of fresh water prawn farming in the Northern Territory as is taking place in some other tropical areas?

ANSWER

Consideration has been given to fresh water prawn farming. The information available is fairly scant as far as the Australian experience is concerned. I understand that this type of activity takes place overseas with some measure of success. In fact, the Director of Fisheries and I inspected a prawn hatchery at Port Broughton last year and we were quite excited about the possibilities for the Northern Territory. I do not think that the Territory is in a position to pursue this particular matter on the scale that it would like to because of manpower, finance and similar restrictions. I think the day will come when we will have to look at it very closely.

Humpty Doo High School

Mrs PADGHAM-PURICH to MINISTER for EDUCATION

Can he tell me if the building of the Humpty Doo High School has started yet?

ANSWER

At this stage, site works and compaction are still taking place and we expect that selective tenders will be called on 10 December.

Freight Run to Maningrida

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

Is he aware that a letter bearing 92 signatures from residents of Maningrida has been forwarded to his department protesting at the stopping of the freight run to Maningrida by Darwin General Aviation? If he is aware of this letter, what action is he taking to open up that route as the residents desire?

ANSWER

I have not received that letter from the Maningrida residents. When I do, I will take the appropriate action to make sure that they receive a service.

Petrol Sniffing in Aboriginal Communities

Mr VALE to MINISTER for COMMUNITY DEVELOPMENT

Can he advise what action is being taken by his department to come to grips with the widespread problem of petrol sniffing in Aboriginal communities?

ANSWER

The problem of petrol sniffing is certainly a very serious one in the Territory. It appears that it is not getting any better. Recent reports of serious instances of petrol sniffing at Papunya and Maningrida have come to our attention. The Department of Community Development, in conjunction with the Aboriginal Liaison Office of the Department of the Chief Minister, has sent people to Papunya to examine the matter there and to talk with the Aboriginal elders and the council on the matter. They will be reporting to me within a matter of days. Following that, it is proposed that a number of departmental officers will go to Maningrida to compile information for the government on the extent of the problem and possible answers particularly from the more senior Aboriginal people. Petrol sniffing has been going on for a considerable time in some communities. Whilst governments have anguished over the question, the finding of solutions is very difficult. We do not propose to leave the matter there. Hopefully I will have some more information and a plan of action to be undertaken by government in the near future.

Small Business Advisory Service

Ms D'ROZARIO to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Is there a proposal currently under consideration to establish permanent offices of the Small Business Advisory Service in all centres of the Northern Territory?

ANSWER

I am not sure that an office would be fully engaged if one was established in places like Katherine, Tennant Creek and Nhulunbuy. It must be borne in mind that the Small Business Advisory Service is exactly that. There is quite a division between the type of advice given and getting involved in a company in the way that an accountant might. The Small Business Advisory Service is very successful but to contemplate putting offices in all Territory centres would be somewhat of an overkill.

Rapid Creek Water Gardens

Mr SMITH to MINISTER for TRANSPORT and WORKS

Given that the Rapid Creek Water Gardens project already had 2 signs, 1 being a conventional Transport and Works sign and the other a pictorial representation of what the garden will look like, what was the purpose of erecting a third much larger sign identifying the project and what was the cost of the third sign?

ANSWER

I ask the member to place the question on notice.

'Boozers are Losers' T-shirts

Mr HARRIS to CHIEF MINISTER

Is it true that some 2000 T-shirts with the slogan 'Boozers are Losers' were printed in Adelaide?

ANSWER

The position is that 240 T-shirts for the 'Boozers are Losers' campaign were printed in Adelaide at a cost of $4 each. I am told that that had to be done because of shortage of time. The government had set a particular time limit for the launching of the campaign in the pre-Christmas period in the hope that it would have an effect on alcohol abuse during the month of December. As January is a time when many Territorians are absent on holidays, it was thought that the campaign should start in the pre-Christmas period. Thus, in a sense, the government must accept responsibility for that happening because we insisted on the particular time limit.

I am told, of the $130,000 that has been budgeted for this campaign, a total of approximately $100,000 will go to Territory businesses in one form or another. Invitations were issued to advertising agents to put forward proposals for the campaign and the proposal was selected. Unfortunately, no advertising agency is resident in the Northern Territory. In any event, the fact that one was established in the Northern Territory might not necessarily mean it had the capability even though the government would certainly want to support it and would hope that in due course the marketing industry will establish itself in the Territory. Clear directions have been given that, in the expenditure of funds in a campaign such as this, all possible resources that are available in the Territory must be used providing they are economical. I am told that the commercial was shot in Darwin and that local talent was used for the acting in the ads. The first round of TV, press and radio ads will put $12,414 in the pockets of the local media.

Certainly, it is the policy of the Territory government that, wherever possible, local business will be used and indeed there is the preference provision in relation to the awarding of contracts. The government has issued those directions and it will reiterate those directions. I am instructing the Co-ordinator General to take up with the heads of all departments and statutory authorities the question of using Territory businesses to the maximum extent. I must say that the Territory government, like every government, is charged with the efficient administration of taxpayers' funds. If a quote comes in from Darwin at $800 and 1 from Syndey for $500, it is obvious that the taxpayers' interests have to be protected. After all, we are all Australians. I would hope that Territory businesses can be competitive and can obtain business in a fair tender situation without having to rely too much on the preference system. If those businesses are operating efficiently, they will have no problems at all. I will be directing again that all government department and authorities ensure that so far as possible all work that goes out from them is made available for tender to Territory businesses.

Transfer of Services to Gove District Hospital

Mr LEO to MINISTER for HEALTH

Will there be further transfers of services from the Nhulunbuy Health Centre to the Gove District Hospital?

ANSWER

Mr Speaker, I undertook to obtain the information for the honourable member last week. I have not received it yet but, as soon as I receive it, I will pass it on.

Management Plans for Gunn Point Area

Mrs LAWRIE to CHIEF MINISTER

When a further management plan for the recreational use of the Gunn Point area is prepared and presented to the Chief Minister, will he undertake to put the plan on public display before final acceptance for input from people who wish to use the area?

ANSWER

Mr Speaker, I do not know what undertaking I am prepared to give in relation to this particular matter at present. I would not necessarily call such a proposal a draft management plan. As I explained to the Assembly in answer to a question from the honourable member for Nightcliff last week, I have my own ideas on that. It is for that reason that I referred back to the Conservation Commission its first proposal. These proposals are very interesting, but one notices sometimes that certain interests creep into them. In any event, when I receive a further proposal from the Conservation Commission, if it is acceptable to me and to Cabinet, then certainly I envisage that public input will be called for at that stage. I dare say that, in due course, copies of proposals for Gunn Point could be tabled in this Assembly if it is thought necessary. That will be a matter for decision at the time.

Occupational Licence on Undoolya Road

Mr D.W. COLLINS to MINISTER for LANDS and HOUSING

Has the honourable minister seen fit to grant an occupation licence to the Alice Springs group of Territory Tidy Towns for an area of land out on Undoolya Road for which it applied?

ANSWER

Mr Speaker, I was most interested in the proposal put forward by the Alice Springs electorate branch of the Territory Tidy Towns organisation. It has been broken up into electorates. Certainly, Mr Speaker, an occupation licence will be issued to that organisation. I think we can all be grateful for the effort that they are going to put into it. It is purely for the purpose of cleaning up an area which has been uncared for. They will probably provide parkland seating, perhaps barbecues, and that type of thing.

Nuclear-Safeguards Agreement between Australia and Japan

Mr B. COLLINS to MINISTER for MINES and ENERGY

Can he inform the Assembly whether a nuclear-safeguards agreement has yet been signed between Australia and Japan? If not, will this affect the marketing of uranium from Ranger to Japan?

ANSWER

I am not privy to the negotiations between Australia and Japan on this very sensitive issue. However, I believe they are very close to agreement and there is hope that the matter will be resolved in the next month or two. My understanding of the contracts between Ranger and Japan is that contracts that were signed prior to 1972 are not being held up as a result of the non-signing of the treaty but will be embraced in the treaty. I will get further information on that for the member.

Territory Awareness of Fishing Industry Potential

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Does he intend to take steps to make Territorians more aware of the fishing industry and its potential worth and will he stress this in comparison with the mining, pastoral and tourist industries?

ANSWER

The short answer is yes. I think the process that we have adopted of trying to communicate with people is working satisfactorily. When we have further information that needs discussion, that information will be made available to the public in the same way as other booklets that have been produced by the technical officers in Fisheries Division.

NT Road Maps

Mrs O'NEIL to MINISTER for PRIMARY PRODUCTION and TOURISM

Is he aware that road maps available to tourists and others in the Northern Territory are significantly out of date? What action is being taken to upgrade these maps?

ANSWER

I am not aware of any specific action taken to upgrade maps for the benefit of tourists and travellers in the Northern Territory. It is a matter that no doubt we will be advised about by the tourist promotion associations or the Tourist Advisory Council. I am quite happy to take the matter on board and see what improvements are needed.

Urban Lands Unit

Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

What is the role of the Urban Lands Unit and how many people comprise that particular unit?

ANSWER

I ask the member to place the question on notice. I do not have in my head all the details of the various government departments that the member may seek to refer to.

Departmental Inquiry into Police Marine and Fisheries Enforcement Unit

Mrs PADGHAM-PURICH to CHIEF MINISTER

Can he comment on the statement made by the member for Nightcliff yesterday to the effect that there is a departmental inquiry into the Police Marine and Fisheries Enforcement Unit?

ANSWER

I noticed what the member for Nightcliff said yesterday afternoon in that she abjured me to believe her when she said that there was in fact a departmental inquiry going on into the operations of the Marine and Fisheries Enforcement Unit of the Police Force. I certainly know that the member for Nightcliff has some very good sources for the information that she usually comes up with in this Assembly about the fisheries area. Her sources, I understand, are well known to the police. In any event, I spoke to the Police Commissioner about this because I do try to take as seriously as I can the remarks of the member for Nightcliff from time to time. I am assured by the Police Commissioner who, in my hearing, checked with the Deputy Commissioner, that there is no departmental inquiry of any nature going on into the operations of the Marine and Fisheries Enforcement Unit at present so the informant had better get his ear to the keyhole once again.

NOTICE GIVEN ON DATE SHOWN

From 18 November 1980

Government Assistance for Tradesmen to Visit Remote Areas

44 Mr MacFARLANE to MINISTER for LANDS and HOUSING

What assistance will the government provide to enable electrical, plumbing and building tradesmen and inspectors to visit remote centres such as Borroloola to assist home owners?

From 24 February 1981

Elsey and Hodgson Downs Pastoral Leases

126 Mr MacFARLANE to CHIEF MINISTER

1. What efforts are being made to have land excised from Elsey and Hodgson Downs pastoral leases for use as community areas for Aborigines?
2. Is the government's failure to obtain such excisions frustrating provision of essential services such as septic systems, power supplies, airstrips and housing?

Katherine Water Supply

133 Mr MacFARLANE to MINISTER for MINES and ENERGY

Will electricity to be reticulated to the new water supply at Donkey Camp near Katherine be extended to cater for consumers and future sub-divisions on the Gorge road, and to Katherine Gorge?

From 3 March 1981

East West Airlines

162 Mr LEO to MINISTER for TRANSPORT and WORKS

1. Did the government receive from East West around May 1980 details of that company's borrowing capacity, including (a) current East West borrowing capacity, (b) borrowing requirements for operations outside the Territory, (c) equity levels to support borrowing, and (d) capacity to support borrowing by the NT airline?
2. If so, why was this information not made available to the merchant banker, Hill Samuel?

East West Airlines

163 Mr LEO to MINISTER for TRANSPORT and WORKS

Did the 3-man committee established by the government to examine the Connair takeover offers first recommend acceptance of other offers before recommending East West?

Industries Training Commission

173 Mr B. COLLINS to MINISTER for EDUCATION

1. How many apprentices are with the Industries Training Commission?
2. What is the number in each trade and the breakdown of males and females for each category?

From 2 June 1981

Interest Rate on Loan to Northern Meat Exporters Pty Ltd

195 Mr MacFARLANE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

What rate of interest is being charged on the $1.4m special assistance loan granted to Northern Meat Exporters Pty Ltd?

From 9 June 1981

Aboriginal and Islander Medical Service

198 Mr B. COLLINS to MINISTER for HEALTH

1. What is the present staffing of the Aboriginal and Islander Medical Centre? Are there plans to increase the staffing levels and, if so, what positions?
2. What are the functions and duties of the Aboriginal and Islander Medical Service?
3. During the 6 months to 31 May 1981, (a) how many Aboriginals have been treated per week by AIMS, (b) what are the major categories of illness, and (c) where do the Aboriginals, in the main, come from?
4. How many Aboriginal liaison officers are attached to Casuarina Hospital; what hours do they work; and are there plans to increase the numbers?
5. Are any Aboriginal liaison officers to be employed at Darwin Hospital?

Student Assistance in NT

201 Mr B. COLLINS to MINISTER for EDUCATION

How many students in the Northern Territory are, (a) receiving assistance under the Tertiary Education Assistance Scheme, and (b) how many are in receipt of the full allowance?

Medical Practitioners Servicing Community Health Centres

205 Mr B. COLLINS to MINISTER for HEALTH

How many doctors have been servicing community health centres, and how many of these are private practitioners?

From 18 August 1981

Rape in Southern Region of NT

210 Mr BELL to CHIEF MINISTER

1. (a) How many rapes have been reported in the Southern Command region since 1 July 1980 to 10 June 1981, (b) how many have resulted in charges being laid, (c) what is the state of these charges, and (d) have any reports of rape been false?
2. What facilities and resources are available for the psychological counselling of women raped in (a) the Alice Springs region, and (b) the Tennant Creek region?
3. Has he received any representations from women's organisations regarding the level of rape counselling services in the Territory?

4. If so, (a) what organisations have made representations, (b) what has been the basis of these representations, and (c) what has been his response?

Alice Springs Women's Community Centre

223 Mr BELL to MINISTER for HEALTH

1. When will the Women's Community Centre in Alice Springs commence operations?
2. If the centre has not been opened by the end of June 1981 will the Department of Health continue to fund St Vincent de Paul and the Salvation Army to enable these agencies to provide services to destitute and homeless people until the new centre is open?
3. If not, why not?
4. If so, have these agencies been informed that their funding will be maintained until the new centre commences operations?

Darwin Hospital Pathology Laboratory

224 Mr B. COLLINS to MINISTER for HEALTH

1. Can he inform me as to the fate of the pathology laboratory at the Darwin Hospital?
2. Has he considered the future of the laboratory in the light of a lack of such scientific facilities in the Department of Primary Production?

Security for Belongings of Hospital Patients

225 Mrs O'NEIL to MINISTER for HEALTH

What arrangements are made to ensure the security of the belongings of hospital patients, for example psychiatric and geriatric patients, who are unable to care for themselves?

Beef Exports to South-East Asia

239 Mr MacFARLANE to TREASURER AND MINISTER for INDUSTRIAL DEVELOPMENT

Will he government commission a survey of markets for beef in South-East Asia and other areas?

Incidence of Tuberculosis in 1979-80

241 Mr MacFARLANE to MINISTER for HEALTH

1. What was the incidence of tuberculosis in 1979-80 in (a) Australia, and (b) the Northern Territory?
2. Is his department undertaking any program to eradicate tuberculosis in humans similar to the program being undertaken to eradicate tuberculosis and brucellosis in cattle?

Grants-in-Aid - Darwin Sporting Bodies

322 Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

How much money was provided through Grants-in-Aid to Darwin sporting bodies during 1980-81?

Grants-in-Aid - Alice Springs Sporting Bodies

323 Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

How much money was provided by the NT government through Grants-in-Aid to Alice Springs sporting bodies during 1980-81?

Grants-in-Aid - Tennant Creek Sporting Bodies

324 Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

How much money was provided through Grants-in-Aid to Tennant Creek sporting bodies during 1980-81?

Grants-in-Aid - Katherine Sporting Bodies

325 Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

How much money was provided through Grants-in-Aid to Katherine sporting bodies during 1980-81?

From 19 August 1981

St Vidgeon Station and Eva Valley Station

346 Mr MacFARLANE to MINISTER for LANDS and HOUSING

1. What is the future of St Vidgeon Station where Aboriginals are building stock yards, etc?
2. What is the future of Eva Valley Station?

From 25 August 1981

Health Centre at Katherine

353 Mr MacFARLANE to MINISTER for HEALTH

Why is a health centre to be built at Katherine within 1 mile of the existing community health centre?

From 24 November 1981

Special Purposes Lease Application for 15-mile Camp

357 Mr BELL to MINISTER for LANDS and HOUSING

(a) Is he aware that a group of Aboriginal people at the 15-mile camp in rural Darwin (Electorate of Tiwi) is seeking a Special Purposes Lease to this camping site?

(b) What discussions within his department and negotiations with the Aboriginal group have been held on the granting of such lease?

(c) Does he intend to grant a lease to the 15-mile camp or any alternative site known to be suitable to the group?

NT Pastoral Leases

364 Mr BELL to MINISTER for LANDS and HOUSING

Will he please table the following information:

(a) The names and sizes of pastoral leases in the Northern Territory,
(i) where the lease is held by Australian citizens as lessee-occupiers,

and (ii) where the lease is held by companies registered in the Northern Territory, (iii) where the majority of directors and shareholders live in the Northern Territory, (iv) where the lease is held by companies registered in the Northern Territory but where the majority of directors and shareholders live outside the Northern Territory, and (b) where the lease is held by companies registered outside the Northern Territory?

(b) The names of the companies registered in the Northern Territory and which hold pastoral leases in the Northern Territory?

(c) The names of the companies registered outside the Northern Territory and which hold pastoral leases in the Northern Territory?

(d) The location of registration of the interstate companies which hold pastoral leases in the Northern Territory?

(e) The names and addresses of individuals who live outside the Northern Territory and who hold pastoral leases in the Northern Territory?

Ministerial Statement on Health

376 Mr BELL to MINISTER for HEALTH

1. In a ministerial statement he stated that officers have visited Aboriginal communities. How many communities have been visited and by whom?

2. He stated that the number of authorized beds is to be reduced from 312 to 292. As this number includes a 12-bed surgical day ward, what else does it include?

3. He also stated that staff is to be reduced by 70. When does he intend that this reduction take place, what staff will be affected, and where?

Health Clinic at Lake Nash

377 Mr BELL to MINISTER for HEALTH

1. Is it true that his department sought the use of the former police station at Lake Nash as a health clinic, but that the former Director of Health decided that the station would be better used as a home and office for a stock inspector?

2. If so, what arrangements are being made to establish and staff a health clinic at Lake Nash?

Sexual Assault Cases

379 Mr BELL to MINISTER for HEALTH

How many sexual assault cases have been seen at the major Territory hospitals in (a) 1980-81, and (b) 1979-80?

Kailis Fishing Company - Trucking Route

468 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

1. Is it accurate to describe the proposed trucking route to be used by the Kailis fishing company between Roper River and Darwin as an 'all weather' route?

2. How much of the route is unsealed?

Interpreter Service for Aborigines

469 Mr B. COLLINS to CHIEF MINISTER

1. What action does the government intend taking in response to the working party's report on the need for Aboriginal interpreter services in the NT?
2. If such services are to be established, what will be (a) their nature, (b) their funding, and (c) anticipated commencement date?

Sexual Harassment

470 Mr B. COLLINS to CHIEF MINISTER

1. What action has been taken by departments and authorities to develop policies and procedures for resolving cases of sexual harassment at the workplace since the circulation of the guidelines on sexual harrassment to departmental heads and prescribed authorities by the Public Service Commissioner on 29 June 1981?
2. Have any complaints of sexual harassment been made and, if so, how many and what action followed?

Aboriginal Liaison Unit

471 Mr B. COLLINS to CHIEF MINISTER

1. What is the allocation for travel for the officers of the Aboriginal Liaison Unit for 1981-82?
2. How much was expended in 1980-81?

United Nations Convention on Elimination of Discrimination against Women

472 Mr B. COLLINS to CHIEF MINISTER

1. Has the NT agreed to accept the United Nations Convention on Elimination of Discrimination against Women in its present form?
2. If not, what sections of the convention does the NT wish to be changed?

Domestic Violence in NT

473 Mr B. COLLINS to CHIEF MINISTER

Does the government consider there is a need to take action on the problem of domestic violence in the NT community and, if so, what action does it consider is necessary?

Strategies for Employment of Aborigines

474 Mr B. COLLINS to CHIEF MINISTER

What are the strategies being undertaken for increasing employment of Aboriginals by the NT government?

Department of Community Development - Counselling

475 Mr B. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

1. How many officers are involved in counselling in the Department of Community Development?
2. What are the qualifications of the officers?

3. What is (a) the average baseload, and (b) the average number of clients seen per week by each counsellor?

4. What percentage of the clients are Aborigines?

Emergency Overnight Accommodation for Females

476 Mr B. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

1. Is the government aware of the need for emergency overnight accommodation for females in the NT?

2. Does the government intend to provide subsidies to willing organisations such as the Salvation Army and the St Vincent de Paul Society who have corresponded with the government on such a service and, if so, when?

Aboriginal Camping Area in Katherine

477 Mr MacFARLANE to MINISTER for COMMUNITY DEVELOPMENT

Is the government aware of and does it agree with the decision of the Katherine Corporation to allow Aborigines to set up a camping area in Katherine, despite the existence of Kalano Farm and the Corroboree Motel?

Free Health Care for Pensioners

478 Mr B. COLLINS to MINISTER for HEALTH

1. Has he considered extending free health care to all pensioners regardless of whether they qualify for a disadvantaged or PHB card, as occurs in New South Wales?

2. If not, why not?

Treatment of Trachoma in Aboriginal Communities

479 Mr B. COLLINS to MINISTER for HEALTH

Will he provide details of the evidence available on the effectiveness of tetracycline eyedrops in the treatment of trachoma in Aboriginal communities?

Occupational Health Hazards

480 Mr B. COLLINS to MINISTER for HEALTH

During 1980-81, (a) what occupational health hazards have been reported, (b) what areas have been identified as 'at risk', and (c) what expansion has there been in the occupational health capacity?

Health Insurance Claims

481 Mr B. COLLINS to MINISTER for HEALTH

1. What actions has been taken to ensure that health insurance claims will be processed more quickly?

2. Are claims still taking up to 8 weeks to be processed?

Waiting Time at Casuarina Hospital

482 Mr B. COLLINS to MINISTER for HEALTH

1. Is action to be taken to reduce the average waiting time of 70 minutes

for non-urgent cases and 30 minutes for urgent cases at the Casuarina Hospital casualty department?

2. If so, what action?

Direct Telephone Line from Katherine Hospital to Police Station

483 Mr MacFARLANE to MINISTER for HEALTH

Is there a direct telephone line from the Katherine hospital to the police station for emergency use?

Out-of-Turn Allocations by Housing Commission

484 Mr B. COLLINS to MINISTER for LANDS and HOUSING

Will the government establish an appeals system for those applicants who have been refused out-of-turn allocation by the Housing Commission and who still consider their situation warrants further consideration?

Mentally-retarded Children in NT Primary Schools

485 Mr B. COLLINS to MINISTER for EDUCATION

1. How many mentally retarded children are attending primary schools in the NT?

2. What specialist staff is provided for such children?

Australian United Fresh Fruit and Vegetable Association Convention

486 Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Following the government's public announcement of its encouragement for a Territory horticultural industry, were any Department of Primary Production officers present at the third national convention organised by the Australian United Fresh Fruit and Vegetable Association, understanding that the 4-day discussions involved growers, wholesalers, retailers, transporters and those working in packaging?

Fisheries Division Program

487 Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

What results are forthcoming from the new Fisheries Division program aimed at boosting the total Top End catch; that is, the program looking at Spanish mackerel, shark and demersal fish?

Government Cattle at Elizabeth River Dairy

488 Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Will he advise details of the records and milk samples of the dairy cattle belonging to the Department of Primary Production at Fitzgerald's Elizabeth River dairy?

Government Expenditure on Agriculture

489 Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Will he provide a breakdown of government expenditure into seasonal requirements and agricultural development initiatives for the 1974-75 season up to the projected figures for 1981-82?

Point Stuart Abattoir - Payment for Cattle

490 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Is he aware that the Cattlemens Union passed a resolution expressing concern at the slowness of payment by Point Stuart abattoir for cattle received for slaughter?

Contract Beef Production

491 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Is he aware of the decision of the Cattlemens Union to support in principle the contract growing of beef and cattle for specific markets?

Powell Creek Telegraph Station

492 Mr MacFARLANE to CHIEF MINISTER

1. Is the Powell Creek telegraph station being stripped of roofing iron, water tanks and paving stones, and being completely neglected by its present lessee?
2. If so, will the government take steps to preserve this historic complex immediately?

Prawning Licences

493 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

1. How many prawning licences were granted by the Department of Primary Production in 1979-80 and 1980-81?
2. How many prawning licences were in existence as at 30 June (a) 1978, (b) 1979, (c) 1980, and (d) 1981?

NTDC Loans

494 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

1. How many applications for Northern Territory Development Corporation loans were received from the agricultural and horticultural industries in (a) 1979-80, and (b) 1980-81?
2. How many applications were successful and for what activities were loans granted?
3. What was the average repayment period associated with loans granted?
4. Were any interest or repayment holidays granted on any loans to the rural sector?

Shell Island Powerhouse Site

495 Mr B. COLLINS to MINISTER for MINES and ENERGY

Regarding the siting of the powerhouse on Shell Island, is he aware of the mean height of the island and has he taken into consideration the surge level of the island?

From 25 November 1981

Complaints under the Fish and Fisheries Act

496 Mr B. COLLINS to ATTORNEY-GENERAL

1. How many complaints have been laid for illegal fishing under the Fish and Fisheries Act?
2. How many of those complaints have resulted in prosecutions?
3. How many convictions have been recorded?

Research on Industrial Crops

497 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

What research, if any, is presently being undertaken on the industrial crops cassava, sugar cane, kenof and leucaena?

From 1 December 1981

Housing Commission Rental Assistance to Pensioners

498 Mr B. COLLINS to MINISTER for LANDS and HOUSING

1. Is he aware that the federal government will not pay supplementary rental assistance of up to $8 maximum to pensioners who become tenants of the NT Housing Commission after January 1982 but will continue to pay it to eligible pensioners accommodated by the Housing Commission prior to January 1982?
2. If so, can he give an assurance that those pensioners not in receipt of supplementary assistance will pay no more in rent than those pensioners who continue to receive supplementary rental assistance after January 1982?

Detoxification Centres in NT

499 Mr B. COLLINS to MINISTER for HEALTH

1. Does the government support the establishment of detoxification centres, pick-up services and halfway houses for the Northern Territory?
2. What is the government's attitude to the introduction of a concessional differential on low alcohol beer?

Liquor Campaign

500 Mr B. COLLINS to MINISTER for HEALTH

1. How much is being spent on the 'Boozers are Losers' campaign?
2. For what reason was the contract awarded to a southern firm?
3. Has any contact been made with the liquor industry with a view to controlling the nature of liquor advertising?

Leucaena Trials at Mataranka

501 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

What progress has been made with Leucaena trials at Mataranka?

1978.821—22

Northern Territory Public Service

502 Mr B. COLLINS to CHIEF MINISTER

1. What is the average female earnings in the NTPS?

2. How many (a) male, and (b) female university graduates are employed in the NTPS?

Darwin Central Community Health Centre

503 Mr B. COLLINS to MINISTER for HEALTH

Is the government considering relocating the Darwin Central Community Health Centre and, if so, where is it to be located and for what reasons?

Chest X-rays - National Tuberculosis Act 1948

504 Mr B. COLLINS to MINISTER for HEALTH

Since the introduction of the 'user pays' medical and health charges on 1 September 1981, (a) what arrangements have been made by his department under the National Tuberculosis Act 1948 for the general public to have chest X-rays at no charge at general hospitals throughout the NT, and (b) if arrangements have been made will they be advertised in the media throughout the Northern Territory?

Attendance Figures at Outpatients

505 Mr B. COLLINS to MINISTER for HEALTH

1. From 1 September to 31 October 1981, how many people (a) who attended outpatients departments in NT hospitals, and (b) who were hospitalised, were (i) insured, (ii) uninsured, or (iii) held disadvantaged and PHB cards?

2. How do those figures compare with those for the same period during 1980?

3. What was the percentage of Aboriginals in each of those categories?

Non-urgent Outpatients Treatment

506 Mr B. COLLINS to MINISTER for HEALTH

How many people wanting non-urgent treatment at outpatients departments in NT hospitals have not been seen because they have not had the necessary fee since 1 September 1981?

Anti-depressant Medication

507 Mr B. COLLINS to MINISTER for HEALTH

1. Are patients in NT hospitals who are not suffering from a psychosis prescribed anti-depressant medication without their knowledge and consent? If so, under what conditions?

2. How many (a) inpatients, and (b) outpatients were prescribed anti-depressant medication during 1980-81?

Allocations to Community Health Centres

508 Mr B. COLLINS to MINISTER for HEALTH

1. How much is he allocating from the Commonwealth's general revenue fund

of $20.6 million to community health centres, hospitals and school dental services for each hospital and community health centre?

2. How much is the NT government allocating to these areas in 1981-82, for each community health centre, hospital and school dental service?

3. What was expended under these headings in 1980-81?

Drug Education Program in NT

509 Mr B. COLLINS to MINISTER for HEALTH

What are the drug education programs to be conducted in the Northern Territory during 1981-82?

Commonwealth Health Grants

510 Mr B. COLLINS to MINISTER for HEALTH

1. Has the Commonwealth provided $9 million for health planning and research in the form of grants to the states and the Northern Territory (on a $1 for $1 basis) and to institutions and persons?

2. If so, (a) how much has been allocated to the Northern Territory, and (b) for what purposes?

Guidelines for Grants-in-Aid

511 Mr B. COLLINS to MINISTER for HEALTH

What action has been taken to correct the following unsatisfactory controls relating to grants-in-aid commented upon by the Auditor-General in 1978-79 and found to be still unsatisfactory in 1980:

(a) inadequacies in the promulgated conditions for grants;

(b) the absence of reference to formal acceptance of the conditions and purpose of grants;

(c) the legal entity of grantees;

(d) the witholding of moneys for non-compliance with grant conditions;

(e) the lack of current formalized departmental procedures and guidelines covering functional responsibilities and criteria for the evaluation of grant applications and the monitoring of peformance of grantees; and

(f) the apparent absence of follow-up action by his department in certain instances where it is not evident that grantees had complied with the conditions of grants?

Collia Tin Mine

512 Mr B. COLLINS to MINISTER for MINES and ENERGY

As a number of people have lost their savings in the Collia tin mine affair,

(a) what detailed action has been taken by the Department of Mines to settle the matter;

(b) how much money has been lost by people involved;

(c) how much did Mr Ken Day receive for the tin he mined from Collia;

(d) why has he not explained in the Legislative Assembly what action the government has taken;

(e) did the Department of Law recommend that anybody be charged over the affair and, if so, why was not that recommended action proceeded with;

(f) was the government's lack of action coloured by the fact that Mr Day was once the head of the Progress Party, whose votes had helped the Country Liberal Party;

(g) what is now being done about the matter;

(f) are police trying to contact the previous leaseholder who disappeared and, if so, do they know in which state he is residing?

Public Housing in NT - Applications

513 Mr B. COLLINS to MINISTER for LANDS and HOUSING

1. How many applications for general public housing were received during (a) 1979-80, and (b) 1980-81, and how many applications were outstanding at (c) 1 July 1980, and (d) 1 July 1981 in (i) Darwin, (ii) Alice Springs, (iii) Tennant Creek, (iv) Katherine, (v) Nhulunbuy, and (vi) Pine Creek?

2. How many outstanding applications were there for general public housing (a) at 1 July 1980, and (b) at 25 June 1981?

3. How many applications for general public housing were received in the financial years (a) 1979-80, and (b) 1980-81?

4. How many applications for general public housing were cancelled in the financial years (a) 1979-80, and (b) 1980-81?

5. How many tenants were accommodated in the financial years (a) 1979-80, and (b) 1980-81?

Housing Commission Rental Rebates

514 Mr B. COLLINS to MINISTER for LANDS and HOUSING

1. What percentage of Housing Commission tenants are in receipt of rental rebate on public housing?

2. How many tenants receive the full rebate?

3. What proportion of tenants receiving rebates are pensioners or social security recipients?

4. How many public servants are in receipt of rental rebate?

5. Are any public servants at executive level in receipt of rental rebate?

Allocation of Public Housing

515 Mr B. COLLINS to MINISTER for LANDS and HOUSING

1. How many applications for out-of-turn allocation of public housing from 31 October 1980 to 1 September 1981 were (a) received, (b) accepted, and (c) rejected?

2. How many applicants whose applications were accepted or rejected were in receipt of (a) supporting parent benefit, (b) unemployment benefit, (c) other pensions, and (d) were one income families?

Expenditure on Aids to Disabled People

516 Mr B. COLLINS to MINISTER for HEALTH

Will he ascertain and advise how the funds were spent in 1980-81 which the Commonwealth provided for aids to disabled people who were not eligible under Commonwealth-state programs?

Internal Reviews of Health Department

517 Mr B. COLLINS to MINISTER for HEALTH

1. He stated during the June 1981 sittings that his department had reviews taking place on all aspects of medical services offered to the public, and referred to an internal review of community health services. What were the details and outcome of this review?

2. In regard to other internal reviews conducted during the past year, (a) in which areas were they conducted, (b) who have the committees comprised of, (c) how many times have they met, and (d) what has been the outcome of these reviews?

3. How many internal reviews are being conducted at the moment?

Petrol Sniffing in NT

518 Mr B. COLLINS to MINISTER for HEALTH

1. Will he provide details on the prevalence of petrol sniffing in the Northern Territory?

2. What action, if any, is being taken to reduce the incidence of petrol sniffing?

Applications to Health Department for Grants-in-Aid

519 Mr B. COLLINS to MINISTER for HEALTH

How many (a) applications for grants-in-aid were lodged for 1981-82, and (b) which organisations were unsuccessful?

Variations Between Bed Costs in NT Hospitals

520 Mr B. COLLINS to MINISTER for HEALTH

Why do the bed costs in NT hospitals vary between $78 and $254, and where does this variation occur?

Central Health Office

521 Mr B. COLLINS to MINISTER for HEALTH

What functions of the central office of the Department of Health could more appropriately be carried out by regional offices?

Rationalisation of Health Services

522 Mr B. COLLINS to MINISTER for HEALTH

In the light of the new health charges, he said he would reduce staffing at the Casuarina Hospital and close a ward in order to obtain possible savings, and he also spoke of reviewing community health centres. How will health services be rationalised to take account of these changes?

Staff Reductions at Casuarina Hospital

523 Mr B. COLLINS to MINISTER for HEALTH

1. Which staff organisations at the Casuarina Hospital have agreed to staff reductions affecting their memberships?
2. In which areas have staff reductions already been affected?
3. How many people have been affected to date?

Consultants' Fees for Hospital Services

524 Mr B. COLLINS to MINISTER for HEALTH

1. For what specific purposes have the allocations of $76,000 for consultants fees for hospital services and $38,000 in health services been made?
2. In 1980-81, (a) how many consultants were employed, (b) for what purposes, and (c) what payments were made to each consultant?

Health Department Debt Collectors

525 Mr B. COLLINS to MINISTER for HEALTH

1. How many debt collectors are to be employed as a consequence of the new health charges?
2. What is the 1981-82 budget allocation for their employment?

Health Charges

526 Mr B. COLLINS to MINISTER for HEALTH

He stated that emphasis would be placed on debtors who can afford to pay health charges rather than those who cannot. How does he expect this differentiation to be made?

Report on Nursing and Administration of Medicine

527 Mr B. COLLINS to MINISTER for HEALTH

When does he expect the report on manpower requirements for nursing and the administration of medicine to be completed?

NT Patients Transferred Interstate

528 Mr B. COLLINS to MINISTER for HEALTH

1. What are the details of the medical agreements under which NT patients can be trasnferred to each state?
2. How much was spent and on how many patients under each scheme during 1980-81?
3. How much as been allocated in this year's budget?

Separate Facilities at Casuarina Hospital

529 Mr B. COLLINS to MINISTER for HEALTH

1. Has he rejected his working party recommendations to erect separate facilities at Casuarina Hospital for psychiatric, handicapped and geriatric patients?
2. If so, why?

3. If not, has any money been allocated for their establishment in 1981-82, and when does he expect such facilities to be operational?

Nursing Home Care

530 Mr B. COLLINS to MINISTER for HEALTH

1. How many elderly patients does he anticipate are in need of nursing home care?

2. How many are Aborigines?

3. Are there any plans to establish separate facilities for the elderly Aborigines?

Outpatients Services

531 Mr B. COLLINS to MINISTER for HEALTH

Does he expect any increase in the use of outpatients departments as a consequence of the new health charges? If so, are there any plans to upgrade the services of outpatients and in what way?

Disadvantaged Cards

532 Mr B. COLLINS to MINISTER for HEALTH

How many people does he estimate could be classified as disadvantaged who have not yet received a disadvantaged card and what percentage of these are Aborigines?

Psychiatric Services

533 Mr B. COLLINS to MINISTER for HEALTH

1. What is the overall strategy of the government to improve psychiatric services?

2. What are seen as the main priorities?

Psychiatric Services

534 Mr B. COLLINS to MINISTER for HEALTH

1. For what reason is psychiatric services included in the general administrative expenditure for health services?

2. For what reason has the level of funding for psychiatric services been reduced from $510,000 to $475,000? Where will this cut be felt?

Health Funding

535 Mr B. COLLINS to MINISTER for HEALTH

1. When does he expect to re-examine the Territory's revenue raising capacity with the Commonwealth Minister for Health?

2. Is he compiling the necessary statistics previously not available, to strengthen our case for additional Commonwealth funding? If so, what do these statistics comprise?

Private Hospital in Darwin

536 Mr B. COLLINS to MINISTER for HEALTH

How many tenders have been received for establishing a private hospital in Darwin?

Transfer of Psychiatric Patients to South Australia

537 Mr B. COLLINS to MINISTER for HEALTH

1. How much was spent in 1980-81 on the transfer of psychiatric patients to South Australia?
2. How many were transferred?
3. What was the average length of stay per patient?
4. When does the NT government expect to provide suitable secure premises for chronic patients in the Northern Territory?

Doctor-Patient Ratios in NT

538 Mr B. COLLINS to MINISTER for HEALTH

1. What is the current ratio of doctors per patient at each hospital in the NT?
2. What are the duty rosters of doctors and nurses? How does this compare with last year?
3. Is the precentage that salaried doctors can earn on top of their income to be increased from 25%? If so, to what level?

School Dental Therapists

539 Mr B. COLLINS to MINISTER for HEALTH

1. How many rural areas are covered by school dental therapists in mobile teams?
2. How many areas are not covered?
3. When does he expect the service to extend to those presently not covered?

Occupational Health Service

540 Mr B. COLLINS to MINISTER for HEALTH

1. Of whom is the occupational health service comprised?
2. What are its main functions?
3. How does it carry these out?
4. What was its expenditure in 1980-81?
5. What is its allocation for 1981-82?

Staffing Levels in NT Hospitals

541 Mr B. COLLINS to MINISTER for HEALTH

Where does he expect staffing levels in Territory hospitals to be reduced and by how many and when?

Expenditure on Community Welfare

542 Mr B. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

1. Could he itemise how much was expended in 1980-81 and how much has been allocated in 1981-82 in the following areas of Community Welfare (a) substitute care for children, (b) youth services, (c) family services, (d) income maintenance, (e) subsidies and grants-in-aid to

community organisations engaged in welfare services, (f) community work, (g) policy and planning, (h) information, (i) ethnic affairs, (j) administration, and (k) handicapped persons?

2. Can an itemisation of allocation under each program be provided where possible with details of which organisations received grants-in-aid? How many unsuccessful applications were there? When was the closing date of applications for grants-in-aid and when were these oganisations notified of their funding?

3. What is being allocated in cash in 1981-82 and for which Aboriginal communities under the essential services program of Community Government? What are the proposed new projects?

4. Could he detail where the 400 Aborigines employed within their own communities on the construction of essential services are?

5. How much has been allocated in 1981-82 for the introduction and development of community government councils? Are any community government councils to be established and, if so, where?

6. Could he provide details of the budget allocation in 1981-82 for community services in the 4 divisions?

7. Who is receiving grants-in-aid in Arts and Cultural Affairs and Youth, Sport and Recreation, and how much?

8. When was the closing date for such applications and when were the successful organisations notified of their funding?

9. How many successful grants-in-aid applications were there in 1981-82 for these sections?

School-to-Work Transition Program

543 Mr B. COLLINS to MINISTER for EDUCATION

1. Has there been an evaluation of the school-to-work transition programs in the Northern Territory? If so, what was the nature of the evaluation and the results? If not, is an evaluation planned?

2. In 1980-81 how many students, at what level of education, were involved in the school-to-work program?

3. How many teachers, for how many hours per week and where, were involved?

4. Where did the students go for their work experience? In what numbers?

5. What increase and expansion of the program is planned for 1981-82 with the significantly increased funding allocation? How many students will it cater for? Which schools are to receive cash grants and how much?

Regulatory and Advisory Council Meetings

544 Mr B. COLLINS to MINISTER for EDUCATION

How many Regulatory and Advisory Council meetings for schools are expected in 1981-82? What is the average cost per meeting?

Yipirinya School in Alice Springs

545 Mr B. COLLINS to MINISTER for EDUCATION

What action, if any, has been taken by the Department of Education on the application for registration of the Yipirinya School in Alice Springs?

Aboriginal Teaching Assistants

546 Mr B. COLLINS to MINISTER for EDUCATION

How many Aboriginal teaching assistants are expected to be employed in 1981-82 and at which homeland centres?

Litter Campaign

547 Mr B. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

1. How much was spent on the anti-litter campaign?

2. Why was the contract for the campaign awarded to a southern firm?

Lapsed on resignation of Mr Isaacs

6, 147, 158, 159, 160, 161, 164, 165, 206, 222, 286, 289, 345, 385, 391, 392, 393, 394, 396, 397, 398, 404, 414, 415, 418, 421, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 457, 458, 459, 463, 464, 466.

Katherine Community Welfare Office

134 Mr MacFARLANE to MINISTER for COMMUNITY DEVELOPMENT

1. Why did Mr Peter Ryan or his department post a notice on the door of the regional office in Katherine on 8 January 1981 advising people in need of assistance to contact Les MacFarlane?
2. Is this action likely to be repeated?

ANSWER

1. On 8 January 1981, Mr Peter Ryan placed a notice on the office door referring people to Community Welfare staff in Darwin or to Mr MacFarlane's office. This unauthorised action occurred during a period of heavy workloads and the immediate pressure of 2 crisis cases.
2. The filling of an existing staff vacancy and the move to more suitable office accommodation within the next few weeks will ensure that this action does not occur again. Instructions have been issued to the effect that there should be no recurrence of this action.

Tenders for School Bus Runs

152 Mrs LAWRIE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Why was ETB 3/80 cancelled and recalled as ETB 14/80?

153 Mrs LAWRIE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

In regard to tenders TB 1026/79A and TB 1093/79, in what respect did the tenders received from O'Hara's Roadlines Pty Ltd not conform?

154 Mrs LAWRIE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

1. Is it a fact that the tenderer awarded tenders TB 1026/79A and TB 1093/79 had 8 buses to service 7 runs?
2. If so, how was the tenderer awarded these runs being 2 buses short of the required 10 buses for 8 runs?

155 Mrs LAWRIE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

1. Does tender TB 1026/79 (school bus runs) state that all buses offered in the tender must be in Darwin 14 days prior to the commencement of the tender?
2. If so, why was the tender awarded to a tenderer who did not meet this specific requirement?

ANSWER

Collectively the questions (Nos. 152-155) are designed to elicit information concerning the assessment of tenders for school bus runs by the General Tender Board. The Board is constituted by law as an independent body free from ministerial direction. If anyone should feel aggrieved by a decision of the General Tender Board there is provision under law for the matter to be referred to the Northern Territory ombudsman who can investigate the circumstances while preserving the confidentiality that is essential to the operation of the Tender Board. It would completely frustrate the intention of the legislation if the deliberations of a Tender Board and details of individual tenders were to be made public.

Female Field Worker with Aboriginal Sacred Sites Authority

175 Mr ISAACS to CHIEF MINISTER

Has the Aboriginal Sacred Sites Authority appointed a suitably qualified female field worker-anthropologist to work directly with Aboriginal women?

ANSWER

Yes.

Mining Royalties Paid to Aborigines

178 Mr MacFARLANE to CHIEF MINISTER

Will he ascertain and advise -

1. The amount paid to Aborigines in the NT from mining royalties in (a) 1978, (b) 1979 and (c) 1980?
2. What level are these mining royalties expected to reach in 1981?
3. What funds the Aboriginal Development Commission has to invest in the NT in 1980-81?
4. Are mining royalties paid to Aborigines considered as taxable income?

ANSWER

1. The amount paid into the Aboriginal Benefit Trust Account in the NT from mining royalties is:

   (a) 1979-79 - $1,135,820.00;
   (b) 1979-80 - $2,084,072.30; and
   (c) 1980-81 - estimate $4,097,953.81.

   N.B.: Each of these figures is a gross figure. A mining withholding tax of 6.4% is deductible from each.

2. In 1981-82 mining royalties are estimated to total $5,896,000.

   N.B.: The same mining withholding tax of 6.4% will be deducted.

3. In reply to this question the Aboriginal Development Commission has supplied the following response:

'The commission does not allocate funds on a state or regional basis. Funds are allocated to the various functions performed by the commission, in accordance with its view of the priority of each function.

'The commission's funding for the financial year 1980-81 is from the following sources:

Commonwealth appropriations to the General Fund	$ 13,838,000
Funds carried forward from previous commissions	$ 4,114,000
Income from investments (est.)	$ 500,000
Revenue from loan repayments (est.)	$ 3,000,000
	$ 21,452,000

'The commission allocated the funds from these sources as follows:

Land acquisitions	$ 2,358,000
Enterprise assistance	$ 5,287,000
Housing loans	$ 10,907,000
Administration	$ 2,900,000
	$ 21,452,000

'Moneys for housing loans have not been expended in the Northern

Territory this financial year (1980-81), as the commission's current policy is to lend only to applicants who are unable to borrow from other sources. Northern Territory applicants are directed to the Northern Territory Housing Commission which offers concessional finance on criteria similar to the commission's.

'In addition to the Commonwealth government appropriation to the General Fund, an appropriation of $10 million was appropriated to the Capital Fund.

'Moneys appropriated to the Capital Fund are solely for investment, and the income derived from those investments made available for the purpose of the General Fund.

'Moneys of the Capital Fund have not been invested in the Northern Territory.'.

4. No. Once mining withholding tax is paid, income from mining royalties is exempt from further taxation.

Mustering of Cattle in National Parks and Reserves

208 Mr BELL to CHIEF MINISTER

1. What is the current policy of the Conservation Commission regarding the mustering of cattle in national parks and reserves?

2. (a) Who pays the cost of the mustering, (b) how many musters have been conducted in Central Australia during the past 2 years, (c) how much did each muster cost, (d) what happened to the mustered cattle, and (e) what payments have been received by the Conservation Commission from pastoralists for mustering services?

ANSWER

1. Under section 113 of the Territory Parks and Wildlife Conservation Act, the director is empowered to authorise the destruction of feral animals on parks, reserves, protected areas or sanctuaries.

   Normally then, where a problem exists with stock, negotiations are conducted with adjoining landholders to discuss the feasibility of a worthwhile muster, and subsequent removal of the animals. In the case of stock, these are usually promptly removed. However, landholders are often not interested in the removal of feral animals such as brumbies or donkeys.

   If adjoining landholders are not interested, tenders may be called for the removal of the animals by live catching or by pet meat operators. The carcasses are used for commercial gain by the successful tenderer.

   Exhaustive efforts are made to effect commercial removal and utilisation of the animls concerned. Only if this cannot be achieved will Commission staff be deployed to destroy the animals.

   The Conservation Commission reserves the right in all cases to take necessary action for the removal of dangerous, problem or wounded animals.

2. (a) The landholder pays the cost, however, the Commission has, in the past 2 years, contributed to the cost of 3 musters.

   (b) Eleven.

   (c) Costs to the Commission were as follows:

Trephina Gorge	$ 1,376

Ormiston Gorge (clearing pound)	$ 625
Simpson's Gap (costs shared with Hamilton Downs and Bond Springs)	$ 500

Other musters - nil cost to the Commission.

(d) Mustered cattle were shared by participating landholders.

(e) Nil.

Yulara Tourist Village

209 Mr BELL to CHIEF MINISTER

1. In terms of concept and structural characteristics, what is the nature of each Yulara Village development proposal received to 10 June 1981 by the NT Development Corporation?
2. Have development guidelines as set down in a document entitled 'Development Requirements and Information for Developers' prepared by Goodchild Research Studies for prospective Yulara developers been changed in any way since their release earlier this year?
3. If so, (a) in what regard, and (b) what has been the reaction to this revision or alteration of guidelines in terms of investor and development interest?
4. Will development of Yulara Village be restricted in terms of vertical height?
5. Will development proposals for structures of more than 3 storeys be considered as viable by the NT Development Corporation?

ANSWER

1. The preliminary Yulara Village development proposals indicate that the building construction will be based upon brick, timber, steel and concrete and the proposals appear to comply with normal building codes in respect of these types of construction. One proposal suggested the use of local sand in the manufacture of a mud brick with the normal use of timber, steel and concrete.

   The proponents sought changes to the layout of the village, in line with modern tourist resorts in other parts of the world, to maximise the total energy concept, to minimise transport difficulties of employees living in the village, and to make the village more marketable on the world tourist circuit.

   Final development proposals for the village were submitted on 17 July 1981.

2. The developmental guidelines as set down in a document entitled 'Development Requirements and Information for Developers' prepared by Goodchild Research Studies have not been changed since their release.

   However, each developer has been advised that the 'Development Requirements and Information for Developers' are not strict conditions imposed on them - they are in fact guidelines. Provided any move from the guidelines is well documented and justified, such a proposal would be considered.

3. It is not necessary to answer this question.
4. Yes.
5. The question does not arise. None of the final proposals submitted on 17 July embody buildings higher than 3 storeys.

Napperby Station Sublease

215 Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

1. What discussions have been held between officers of the Department of Community Development and the Department of Transport and Works regarding the piping of water to a proposed sublease on Napperby Station?

2. How much will it cost for the equipment and installation of an adequate water supply at the Napperby sublease and who will meet the cost?

3. Will the school and other government-supplied facilities presently being used by the Laramba Community at Napperby be moved to the new sublease if and when negotiations are completed for the sublease?

4. What will be the cost of moving and re-establishing the facilities on the new site?

ANSWER

1. Officers of both the Department of Community Development and the Department of Transport and Works have considered several different methods of augmenting the existing water supply at Napperby to cater for the increasing Aboriginal population.

   In considering proposals for Napperby, it is pertinent to bear in mind that 35 bores, including 4 in January 1981, have been sunk on the property since 1971, at a cost of $70,000. All have been unsuccessful. The Spear Point system installed for the community in 1977 for $18,000 provides the current supply but cannot be developed further.

   Although several alternatives have been considered it is apparent that insufficient information exists as to the overall water resources potential in this area of scarce groundwater supplies.

   Before a decision can be taken on the best course of action, taking into account costs, quality of supply and ability to meet demand, the 2 departments involved have agreed that a total water resources investigation occur within the next 3 months.

2. Until the results of the proposed water resources survey are known, it is difficult to attempt to provide an estimate of costs to install an adequate water supply to the proposed Napperby sublease. A dam would have to be built or water piped 25 miles unless water in good quantities is found closer to the community and either proposition will cost in the order of $1 million. If the government can save any of this money to use on other projects for the Napperby community by locating water nearer than 25 miles away it is obviously in the interests of the people that it do so.

*3. The only government supplied facility at Napperby is the school and at this stage there is no plan for relocation. The location of the community within the proposed sublease will be dependent upon water supply, but will be at least 3 km from the school. It has been agreed with the community that conveyance allowance will be paid for children travelling between home and school with the possibility of a bus being provided in due course.

*4. The cost to relocate the school would be in the order of $80,000.

(* Answers to questions 3 and 4 provided by the Minister for Education).

Auditor-General's Report - Deficiencies in Department of Transport and Works

230 Mr ISAACS to MINISTER for TRANSPORT and WORKS

I refer to the deficiencies in his department noted by the Auditor-General following an audit undertaken in March 1980 and ask:

1. Have standardised procedures for management of repairs and maintenance works been established and are they now available?
2. Has the level of supervision by the department over period contracts been raised, and has the frequency of inspections by supervisors of period contracts been increased?
3. Is there now in existence a format for reporting to management in respect of contractors' performances?
4. In relation to capital works programs, have procedures for the administration of consultants' commissions been revised and, if so, do these revised procedures include a check list for the preparation of payments to consultants?
5. In relation to the collection of both water and sewerage rates, what action was taken as a result of the query by the Auditor-General in 1979 and again in 1980 about defective procedures relating to the preparation and rendition of accounts for services provided?
6. What success has been achieved in improving procedures in relation to the collection of outstanding water and sewerage rates?
7. In regard to water and sewerage rates, have the following issues been resolved -
   (a) the liability or otherwise of the Department of Lands for vacant Crown land;
   (b) union concern regarding the payment of basic charges for members in Commonwealth housing; and
   (c) the incorrect billing of government departments?
8. In the Property Branch of the department have the following issues been resolved -
   (a) problems relating to the formalising and registering of leases by the department; and
   (b) the lack of a property management procedure manual which could be made available to departments and authorities?
9. In the branch of stores and stores accounting, (a) has the new stores computer system been implemented and, if so, (b) is he satisfied that there now exist adequate internal controls and procedural documentation within the stores branch?

ANSWER

1. Standardised procedures for repairs and maintenance have been issued for use within the department.
2. The level of supervision of period contracts has been improved, including increasing the frequency of inspections by supervisors.
3. A contractor's performance report is in use.
4. The procedures for administering consultants' commissions have been reviewed, and in lieu of a check list, the form used for payment has been revised to include the necessary control requirements.
5. Most of the problems related to the poor state of records handed over from the Commonwealth in 1978. Procedures have been reviewed and

streamlined, records checked and verified, and significant improvements made in the total processing of water and sewerage billing.

6. The rate of recovery of outstanding accounts has been increased to a satisfactory level throughout the Northern Territory.

7. The 3 issues mentioned which were affecting the recovery of water and sewerage rates have been satisfactorily resolved.

8. Administrative arrangements have been improved to ensure that lease agreements are finalised without delay, and a property management procedure manual has been compiled.

9. The new stores computer system has been implemented and I am satisfied that adequate internal controls and procedural documentation exist within the Supply Branch.

Todd River Causeway

231 Mr BELL to MINISTER for TRANSPORT and WORKS

1. Has his attention been drawn to a recent press report regarding the construction of a causeway across the Todd River to service the new casino, and which stated that the causeway would cost $846,000?

2. How much is Federal Pacific Hotels, which stands to gain the most benefit from the causeway, contributing to the cost of this new river crossing?

3. Did he, or his department, ask Federal Pacific Hotels to meet the total cost of the causeway and, if not, why not?

ANSWER

1. My attention has been drawn to a press statement which did state that a causeway is being built in the proximity of the new Alice Springs casino and would cost $846,000. This is incorrect as the cost of the causeway was $334,000.

2. Federal Pacific Hotels has contributed $50,000.

3. No, because the causeway provides access to other than the casino. The honourable member, as a resident of Alice Springs, should be well aware of the proposed developments in the proximity of the casino - all of these will benefit from the construction of the causeway and associated roadworks.

Health Clinic at Lake Nash

232 Mr BELL to MINISTER for TRANSPORT and WORKS

1. Has an application been made by the Department of Health in Alice Springs for the use of the old police station at Lake Nash as a health clinic?

2. If so, what is the result of the application?

3. If not, what plans have been made for the use or disposal of the police station complex?

ANSWER

1. Yes.

2. Both the Departments of Health and Primary Production sought use of the surplus facility, and the relative needs of each were assessed on their merits. Health already has a presence in the area, whereas Primary Production had a requirement to establish a new facility in the area.

3. The police station has been allocated to the Department of Primary Production for use by a stock inspector-technical officer to accelerate the TB-brucellosis eradication program.

Bridge over Georgina River

233 Mr BELL to MINISTER for TRANSPORT and WORKS

1. Does the government still intend to build a bridge in Queensland over the Georgina River at Camooweal and, if not, why not?
2. If so, (a) when will the bridge be built, (b) how much will it cost, (c) who will do the work, and (d) will the Queensland government be making any contribution?

ANSWER

The project to construct a bridge over the Georgina River at Camooweal in Queensland is not currently listed on any of our construction programs.

Following the initial agreement in principle between the governments of the Northern Territory and Queensland, the Queensland government was requested to allocate the project a higher priority in order to expedite the construction. Queensland demurred and, as a result, the project was then reviewed by the Territory government in the light of other priorities within the Territory. There were projects inside the Northern Territory which had a greater call upon available funds and these were allocated first priority.

Whilst the project has no high priority, discussions are continuing between the 2 governments which are aimed at arriving at an eventual decision to build the bridge.

Sealing of Tanami Desert Road

234 Mr BELL to MINISTER for TRANSPORT and WORKS

1. When will work re-commence on sealing the Tanami Desert Road?
2. What distance will be sealed in (a) 1981, (b) 1982, and (c) 1983 calendar years?

ANSWER

It is not planned to commence any more major construction works on the road until 1983-84 when approximately 28 km will be sealed. However, in the intervening period, maintenance will continue and materials investigations will proceed to ensure the maximum utilization of available funds.

This road is in the arterial category and competes for funds alongside roads such as the Plenty, Arnhem, Tablelands and Buchanan Highways. The limited funds available have to be expended on a priority basis.

Sales Tax Rebate Scheme

240 Mr ISAACS to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

1. Will the government's sales tax rebate scheme result in cheaper consumer goods in the Territory?
2. Will Territory officers make regular assessments of the rebate scheme to assess the direct benefits to consumers and, if so, when will this information be made available to the public?

ANSWER

1. Yes. The payments are specifically directed at improving the competitive position of local wholesalers over southern sources. Thus where taxable products are obtained locally the cost to the retailer can be expected to be less. It is also expected that market forces will cause this reduction to flow through the retailer to the consumer.

2. (a) Yes.

   (b) Results of the ongoing assessments of government initiatives are reflected in changes to various schemes from time to time.

Lease Applications

249 Mr ISAACS to MINISTER for LANDS and HOUSING

1. How many applications were received during (a) 1978-79, (b) 1979-80, and (c) 1 July 1980-17 June 1981 for (i) horticultural leases, (ii) lease allocation to sporting groups, (iii) lease allocation to cultural groups, and (iv) applications for Aboriginal needs purposes for (A) 'sit-down' areas, and (B) excisions for pastoral leases?

2. In what regions were the above applications made?

3. Which of the above applications were (a) approved, (b) refused, (c) lapsed or withdrawn, and (d) remain unresolved?

ANSWER

1. The following applications in the requested categories were received -

	1978-79	1979-80	1980-81
(i) horticultural	10	10	16
(ii) sporting groups	17	9	11
(iii) cultural groups	11	13	8
(iv) Aboriginal - urban	17	6	5
(v) Aboriginal - rural	1	Nil	1

2. Note that the figures provided indicate less than one-tenth of the total pool of applications received by the department over the period and that they have been subject to interpretation to fit the set categories. For example, scout applications were included in the cultural category and amateur radio clubs and the like included in the sporting category.

3. No applications have been received under the guise of 'sit-down areas' and the request has been taken to mean applications lodged by Aboriginal groups in urban areas.

4. Applications have been received from both the Northern and Southern Regions.

5. The status of the applications is -

	(a) Approved	(b) Refused	(c) Lapsed or withdrawn	(d) Unresolved
(1) horticultural	11	10	10	5
(2) sporting groups	11	8	8	10
(3) cultural groups	13	6	8	5
(4) Aboriginal - urban	17	3	5	3
(5) Aboriginal - rural	1	Nil	1	Nil

A high proportion of the horticultural applications refused, lapsed or unresolved is due to existing Aboriginal land claims and final decisions can only be made as the land claims are determined.

Leanyer and Karama Subdivisions

262 Mr ISAACS to MINISTER for LANDS and HOUSING

What was the median price of a single residential lot in (a) Leanyer, and (b) Karama in (i) June 1980, (ii) September 1980, (iii) December 1980, (iv) March 1981, and (v) May 1981.

ANSWER

This information is readily available from real estate agents in Darwin.

Department of Transport and Works - Use of Private Organisation for Staff Recruitment

265 Mr BELL to MINISTER for TRANSPORT and WORKS

1. Why did his department recently use a private organisation, P.A. Australia, to advertise in the national press for various staff?
2. How much did this service cost?
3. Does the use of P.A. Australia to recruit staff indicate that advertisements inserted by the department are not attracting applicants of quality?
4. Will he recommend the services of P.A. Australia to his colleagues and other government departments and, if so, will this mean that departmental staff previously employed to write and place advertisements will be retrenched?

ANSWER

1. During the period March-June 1981, P.A. Australia was used on 2 occasions in Australia-wide searches for staff for the Department of Transport and Works.
   - Services Division: 7 positions, mainly professional/technical and P.A. used mainly because of earlier involvement in review of plant operations.
   - Administration Division: 4 senior positions in Manpower Branch. P.A. used to seek external applicants on an Australia-wide basis.
2. Approximately $23,000.
3. No. Firms such as P.A. are used when particular expertise or staff are not available within the department. Use of their Australia-wide interviewing facilities and ability to provide short lists of applicants leads to savings in both time and money for my department.
4. I will be providing no unsolicited advice to my colleagues or other government departments on their recruitment procedures. I endorse my department's use of all avenues of recruitment open to it to attract the desired calibre of applicants. No NTPS staff will be retrenched.

Yulara Tourist Village

266 Ms D'ROZARIO to CHIEF MINISTER

What guidelines have been laid down regarding the height of buildings at Yulara Tourist Village?

ANSWER

In the document 'Development Requirements and Information for Developers' prepared by Goodchild Research Studies, developers were informed that 80% of the buildings were to be single storey and that it was permissible for

20% to be 2 storeys. However, developers were informed that the conditions were in fact guidelines and not conditions strictly binding upon them.

It now appears that the majority of developers would like to be allowed to have a greater percentage of their development in 2 storey buildings. The actual percentage will depend on negotiations between the developers and the Northern Territory Development Corporation.

Chief Minister's Department - Renting of Office Space

268 Mr LEO to CHIEF MINISTER

In regard to office and warehouse space rented by his department from private enterprise developers as at 31 May 1981 -

(a) what is the weekly cost;

(b) what are (i) the names, and (ii) business addresses of the developers involved;

(c) where are the rented premises located; and

(d) how long do the leases run for?

ANSWER

The above question will be answered by the Minister for Transport and Works. Please refer to answer to question No. 277.

Attorney-General's Department - Renting of Office Space

269 Mr LEO to ATTORNEY-GENERAL

In regard to office and warehouse space rented by his department from private enterprise developers as at 31 May 1981 -

(a) what is the weekly cost;

(b) what are (i) the names, and (ii) business addresses of the developers involved;

(c) where are the rented premises located; and

(d) how long do the leases run for?

ANSWER

The above question will be answered by the Minister for Transport and Works. Please refer to answer to question No. 277.

Treasury and Department of Industrial Development - Renting of Office Space

270 Mr LEO to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

In regard to office and warehouse space rented by his department from private enterprise developers as at 30 May 1981 -

(a) what is the weekly cost;

(b) what are (i) the names, and (ii) business addresses of the developers involved;

(d) how long do the leases run for?

ANSWER

The above question will be answered by the Minister for Transport and Works. Please refer to answer to question No. 277.

Department of Education - Renting of Office Space

274 Mr LEO to MINISTER for EDUCATION

In regard to office and warehouse space rented by his department from private enterprise developers as at 31 May 1981 -

(a) what is the weekly cost;

(b) what are (i) the names, and (ii) business addresses of the developers involved;

(c) where are the rented premises located; and

(d) how long to the leases run for?

ANSWER

The above question will be answered by the Minister for Transport and Works. Please refer to answer to question No. 277.

Department of Transport and Works - Renting of Office Space

277 Mr LEO to MINISTER for TRANSPORT and WORKS

In regard to office and warehouse space rented by his department from private enterprise developers as at 31 May 1981 -

(a) what is the weekly cost;

(b) what are (i) the names, and (ii) business addresses of the developers involved;

(c) where are the rented premises located; and

(d) how long do the leases run for?

ANSWER (Also covers questions Nos 268-278)

As my department is responsible for arranging most leases on behalf of the government I am replying to questions Nos. 268-278 on behalf of my colleagues.

(a) $108,860.67.

(b), (c) and (d) see Table A.

Leases for honourable members' electorate offices are arranged by the Department of the Chief Minister. Details of current leases are set out on Table B. Weekly cost of the electorate offices is $1,843.15.

Youth, Sport and Recreation Area - Renting of Office Space

278 Mr LEO to MINISTER for YOUTH, SPORT and RECREATION

In regard to office and warehouse space rented by his department from private enterprise developers as at 31 May 1981 -

(a) what is the weekly cost;

(b) what are (i) the names, and (ii) business addresses of the developers involved;

(c) where are the rented premises located; and

(d) how long to the leases run for?

ANSWER

The above question will be answered by the Minister for Transport and Works. Please refer to answer to question No. 277.

Public Housing in NT - Waiting Time

284 Mr ISAACS to MINISTER for LANDS and HOUSING

1. What was the approximate waiting time, in months, for general public housing by centres in the financial years (a) 1979-80, and (b) 1980-81 in the dwelling categories of (i) 4-bedroom house, (ii) 3-bedroom house, (iii) 2-bedroom flat, and (iv) 1-bedroom flat?

2. What was the general public housing stock by centres at (a) 30 June 1980, and (b) 30 June 1981 for the dwelling categories of (i) 4-bedroom house, (ii) 3-bedroom house, (iii) 2-bedroom flat, and (iv) 1-bedroom flat?

ANSWER

The following tables, based on the records of the Northern Territory Housing Commission, provide the information requested:

1. Waiting Time for General Public Housing - By Centres - 1979-80 and 1980-81

	4-Bedroom House		3-Bedroom House		2-Bedroom Flat		1-Bedroom Flat	
	1979-80 months	1980-81 months	1979-80 months	1980-81 months	1979-80 months	1980-81 months	1979-80 months	1980-81 months

(d) Includes twenty-two 2-bedroom houses.
(e) Includes one 2-bedroom house
(f) Five 2-bedroom houses.
\- Nil or negligible.

Public Housing in NT - Statistics

288 Mr ISAACS to MINISTER for LANDS and HOUSING

1. How many families were accommodated in general public housing in the financial years (a) 1979-80, and (b) 1980-81 in (i) Darwin, (ii) Alice Springs, (iii) Tennant Creek, (iv) Katherine, (v) Nhulunbuy, and (vi) Pine Creek?

2. How many applications for housing were cancelled in the financial years (a) 1979-80, and (b) 1980-81?

ANSWER

The following tables, based on the records of the Northern Territory Housing Commission, provide the information requested. The answer to part 1 of the question is provided in the form of 'applicants accommodated' rather than 'families accommodated' as the information provided includes some single persons (pensioners).

1. Applicants Accommodated in General Public Housing: By Specified Centres

	1979-80	1980-81
Darwin	515	729
Alice Springs	237	272
Tennant Creek	81	97
Katherine	72	66
Nhulunbuy	15	10
Pine Creek	4	4

2. Cancelled Applications for General Public Housing: By Specified Centres

	1979-80	1980-81
Darwin	358	467
Alice Springs	142	173
Tennant Creek	17	67
Katherine	42	53
Nhulunbuy	16	24
Pine Creek	2	1

Housing Commission - Cost of Organisation Review

293 Mr ISAACS to MINISTER for LANDS and HOUSING

What was the cost of engaging management consultants, P.A. Consulting Services Pty Ltd, in February 1979 to review the organisation of the Housing Commission?

ANSWER

The cost of the consultancy, the purpose of which was to conduct a review of the NT Housing Commission's organisation, structure, staffing and systems, was $19,000.

Mines Services Branch - Expenditure on Roads 1979-80

294 Mr ISAACS to MINISTER for MINES and ENERGY

1. What amount was expended on road construction and maintenance by the Mines Services Branch of his department during 1979-80?
2. Where were the roads located and what length of road construction was involved?

ANSWER

The Dorisvale road was contributed to by the Department of Mines and Energy to the extent of $60,000 in 1978-79. This money is to be repaid by the company operating the Dorisvale Barites Mine, Barroid Australia Pty Ltd, in 10 annual instalments of $6,000.

Funding for further road maintenance and upgrading was to be provided by the Department of Transport and Works.

The question refers to actual expenditure on mines roads in 1979-80. The Department of Mines and Energy made its contribution to the Dorisvale road project in 1978-79 and has made no further payments. All 1979-80 expenditure was by the Department of Transport and Works. All accounting for the road project has also been done by that department.

Further questions on this subject should be referred to the Minister for Transport and Works.

Plenty River Mine

295 Mr ISAACS to MINISTER for MINES and ENERGY

1. Has the production of concentrates commenced at the Plenty River mine situated some 200 km north-east of Alice Springs?
2. If production has not commenced when is it likely to commence?

ANSWER

According to a 28 July 1981 telephone report from the department's Resid-

ent Inspector of Mines stationed in Alice Springs, concentrate production has not started at the Plenty River mine.

According to our Inspector of Mines, operating officials at the Plenty River mine anticipate concentrate production to commence about 2 to 3 months from now.

Harts Range Gem Survey

296 Mr ISAACS to MINISTER for MINES and ENERGY

1. What were the findings of the survey of gems and precious stones in the Harts Range area?

2. What other such surveys have been or are to be undertaken in the northern region of the Territory?

ANSWER

The Northern Territory Geological Survey made a thorough investigation of reported occurrences of various semi-precious stones of interest to fossickers and lapidarists. Most significant occurrences in the Harts Range have become well known by word of mouth in various gem and lapidary clubs. No new discoveries were made but several little known occurrences were better documented and a much wider range of minerals detailed for some localities.

Northern Territory Geological Survey Report 80/3, 'A Fossicker's Guide to the Mines and Mineral Localities of the Harts Range, NT' by C. Horsfall, D. Moore and R. Thompson was completed in March 1980. This report has not been published, but has been on open-file reference lists in the departmental offices in Darwin and Alice Springs. Copies of sections of this report and the various locality plans have been provided to tourists, fossickers and other interested people.

A draft report 'Some Areas to Fossick in Northern and Central Northern Territory' by J.W. Shields was completed in July 1981 and is currently being checked and edited.

It is intended to consolidate information from both these reports into a concise pamphlet which will be published and made available at a reasonable cost to tourists and fossickers.

The Mining Act 1980 makes provision for the declaration of fossicking areas and the establishment of conditions for the management of these areas. The Northern Territory Geological Survey is actively investigating potential areas. Temporary reserves have been placed on 4 localities pending the commencement of the new Act.

McArthur River Mining Development Feasibility Study

297 Mr ISAACS to MINISTER for MINES and ENERGY

1. What firm of consultants was employed to review the feasibility study submitted by Mimets Development Pty Ltd on the McArthur River mining development?

2. What was the cost of employing those consultants?

ANSWER

In the interests of the Territory's development, the government has pursued the earliest possible development of the McArthur River project. To this end it was necessary to employ consultants to review the 30-volume detailed technical and economic feasibility study submitted by Mimets Development Pty Ltd. The employment of consultants was given careful

consideration in order to obtain the best possible independent advice available. Because of their repute and metallurgical expertise, Wright Engineers Pty Ltd, a Canadian-based company, was selected. Wright Engineers utilised the services of a second consultant, selected from a short list supplied by the Department of Mines and Energy, to evaluate metal price trends over the next decade.

The expenditure involved was $100,000. This allowed Wright Engineers to provide a comprehensive, independent assessment of the McArthur River project feasibility report - it has been money well spent. The consultants verified that the project, using conventional metallurgical processes, would not be viable within the foreseeable future. However, they were able, from a thorough evaluation of the 20 years of research work that has already gone into the McArthur River metallurgical problem, to suggest new lines of attack. This may be the breakthrough needed to bring the deposit into production.

I am pleased to say that the company has agreed to commence new programs of research to evaluate the Wright Engineers proposals thoroughly. This additional research, including the necessary pilot plant phases, is expected to last 5 years. The McArthur deposit might ultimately generate annual revenue of $500 million and annual royalty payments under the proposed royalty bill of $20-30 million.

Metallurgical Research Centre Equipment

298 Mr ISAACS to MINISTER for MINES and ENERGY

1. What was the value of equipment installed at the Metallurgical Research Centre in the financial year 1979-80?

2. What was the total cost of equipping the centre to fully operational stage?

ANSWER

1. In the 1979-80 budget, provision was made to purchase equipment for use in the Metallurgical Pilot Plant and the associated laboratory facility.

   Eighteen items of equipment were purchased for a total value of $50,640, the price of the costliest item, an Eritz magnetic separator, being $14,079.

2. The total cost of equipping the Metallurgical Pilot Plant and the associated laboratory facility was $78,181.

   The plant was intially established with rehabilitated and modified second-hand equipment. This was followed by designing and fabricating plant items, as required, in the department's workshop. Steel used for fabrication came from old stock from Mt Wells battery.

   Second-hand equipment was salvaged from mines that had abandoned operations, at negligible cost. The actual costs incurred for transport and rehabilitation were absorbed in the operational cost provision.

   The value of the upgraded second-hand equipment is inestimable, as replacement cost of this equipment with new would entail a very high capital expenditure.

   This year mining operators have been able to fabricate treatment plants for mine site operations as a result of tests carried out on their ores. It is estimated that they have expended over $500,000 to date in fabricating plants from flowsheets recommended by the Metallurgical Research Centre.

If the present trend continues, more prospectors and miners who have viable operations will be providing their own treatment plants instead of being dependent on departmental treatment facilities. This will more than compensate for the terminated departmental service at Mt Wells.

Eighteen projects are being handled by the plant at present, some of them for consultant mining engineers and consultant geologists whose services are being utilised by Territory miners.

Department of Mines and Energy Construction Safety Branch

299 Mr ISAACS to MINISTER for MINES and ENERGY

What action is in hand to ensure that the construction safety branch of his department can perform its functions effectively, given that in the financial year 1979-80 inspections were carried out on 1,831 of the 3,059 applicable sites?

ANSWER

Since 1979-80, 2 new positions have been created for Inspectors of Construction Safety.

Due to the lead time recruiting and training inspectors, their effect will not be appreciably noticed until 1981-82. It is estimated that the construction safety inspections carried out will be in excess of 3,800 for 1981-82.

Many of the work sites to be inspected are houses under construction. At the end of 1980-81 there were 4,400 applicable sites with approximately 1,900 of a domestic type. When compared with other large construction projects, housing work is considered of low priority.

The frequency of inspections is determined on the basis of type of work, hazards to the worker, protection required by the public and location of the site with respect to the location of the inspector.

Efforts have been made to increase inspector efficiency and this has resulted in the number of inspections per month per inspector increasing from 38 in 1979-80 to 56 by the end of 1980-81

Department of Mines and Energy - Inspection of Machinery

300 Mr ISAACS to MINISTER for MINES and ENERGY

What provision has been made to ensure that his department is able to meet the increasing demand for inspections of machinery, given that the number of inspections carried out by the department in the financial year 1979-80 represented only two-thirds of the total number of machines registered?

ANSWER

This increased work load is recognised and attempts to overcome it have been made by -

(a) recruiting a mechanical engineer as head of the Machinery Inspection Branch to give organisational and technical support;

(b) employing a technical officer for reviewing machinery designs;

(c) providing a mobile communication system for use by the inspectors; and

(d) placing inspection information on computer, thus decreasing the paperwork for inspectors.

For the future, the Industrial Safety Division is currently investigating what changes should be made to the Inspection of Machinery Act. It must

be borne in mind that the existing Act is 40 years old and the concept of inspecting all machinery on an annual basis is probably outdated, taking into account modern technology and inspection techniques.

Submissions have been made for additional inspector positions in the current budget.

Due to promotions, transfers and resignations, the department has only recently reached full inspector strength. The training of these new inspectors does take time, however, and their effect will not be immediately noticeable.

Inspections are carried out on a priority basis, taking into account the type of machinery and the hazard it presents to the worker and the public.

Noble's Nob Mine

301 Mr ISAACS to MINISTER for MINES and ENERGY

What were the findings of investigations into the stability of the slopes of the Noble's Nob open cut mine at Tennant Creek?

ANSWER

In May 1980 the department's Geological Survey Division investigated the stability of slopes at the Noble's Nob open pit mine. This investigation did not reveal any sign of overall slope failure but did conclude that possible hydrological change could reduce stability. Accordingly the department has informed the mine management of the potential hazards. The mine management and the department are jointly examining various options to ensure the continuing safety of the mine. Meanwhile the department's resident Inspector of Mines maintains a continuing surveillance of the condition of the pit.

Coal and Lignite Resources

302 Mr ISAACS to MINISTER for MINES and ENERGY

1. At what stage are the detailed studies into lignite and coal resources being undertaken by his department?

2. Are any preliminary results available from the above investigations?

ANSWER

The Northern Territory Geological Survey has completed a full review of all coal and lignite occurrences in the Northern Territory. This involved an investigation of all reported 'coal' occurrences by a detailed search of historical records, field inspection and, where necessary, diamond drilling.

Eleven diamond drill holes, varying in depth between 40 and 200 metres, totalling 1,321 metres, were drilled in the Alice Springs area during March and April this year.

Five areas were selected for drilling on the basis of information from water bores and previous investigations - Santa Teresa Mission, the Burt Plain, the Hale River near Ambalindum, Tea Tree and Mt Wedge.

Previous drilling by my department had tested the Hugh River, Tempe Downs, Paddys Plain and Finke areas.

Carbonaceous material was encountered in 9 of the holes with the best intersections being 30 metres of carbonaceous clay and lignite between 35 and 65 metres in 81 ST 1 at Santa Teresa, 50 metres of carbonaceous silt and clay between 125 and 175 metres in 81 BP 1 on the Burt Plain, 6 metres of carbonaceous clay and lignite between 28 and 34 metres in 81 HR 2 on

the Hale River and 20 metres of carbonaceous sandstone between 120 and 140 metres in 81 NB 1 at Mt Wedge.

Samples of carbonaceous material from 6 of the holes are currently being analysed by the Australian Coal Industry Research Laboratories at North Ryde.

Analyses from the previous drilling indicated that the carbonaceous material is of very poor quality and unlikely to provide an economic energy source.

The following table provides a comparison of these results with other Australian coals.

A comprehensive final report will be issued when all analyses are available.

Figures from Joint Coal Board - Review Australian Black Coal - 1981 Edition

	Ash %	Sulphur %	Specific Energy MJ/Kg
NEW SOUTH WALES COAL			
Singleton	6.3	1.43	33.84
Newcastle	16.3	0.51	33.59
South Coast	9.2	0.51	34.91
QUEENSLAND COAL			
Ipswich	16.5	0.50	32.31
Bowen Basin	11.8	0.49	31.00
SOUTH AUSTRALIAN COAL			
Leigh Creek	23.6	0.61	30.00
WESTERN AUSTRALIAN COAL			
Collie	2.6	0.32	33.98
VICTORIAN COAL			
Yallourn	1.7	0.30	26.0
Morwell	3.2	0.40	26.5
NORTHERN TERRITORY COAL			
Hale River 2	65.4	0.60	21.04
Hale River 5	77.6	4.39	15.81

Palm Leaf Beetle

307 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

(a) What progress has been made in the eradication of the coconut leaf beetle?

(b) What cost has been incurred to date in the eradication program?

(c) What is the expected level of success and what is the anticipated total cost of the eradication program?

ANSWER

(a) It should be noted that the name 'Palm Leaf Beetle' (PLB) has been officially adopted for this insect in the Territory because, although coconuts are its usual host, the pest infrequently attacks other palm species, such as Royals, Carpentarias and Alexandras.

Attempts to eradicate PLB in the central Darwin area were discontinued in February 1981, following the discovery of a well established infestation at Nakara, 9 kilometres outside the then existing quarantine area. The latter was therefore revoked by notice in the Government Gazette,

S1 of 20 February 1981, as was the notifiable status Brontispa longissima gestro (the palm leaf beetle).

Since that time there has been an on going drive by my department and the Darwin City Council to inform the public on how to recognise and control the beetle and to warn against its accidental spread to new areas.

(b) The total cost of the eradication program was $53,700, excluding the salary component of staff in my department who carried out survey and supervisory work in the course of their normal duties.

(c) The program is no longer aimed at eradication but at a high level of control.

A comparatively high level of success can be expected in Darwin using biological control but this will need to be adequately tested in the laboratory and approved by the Commonwealth government.

Ornamental Nursery Industry Consultants

309 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

(a) Who was the private consultant engaged by the government to report on the potential of the ornamental nursery industry in the Northern Territory?

(b) Will this report be made available to the public and, if so, when?

(c) What was the cost of commissioning the study?

ANSWER

(a) The consultant engaged to report on the potential of the ornamental nursery industry in the Northern Territory was Mr J.H. Colwell.

(b) The report was made available to the NT Nurserymen's Association.

(c) The cost of commissioning the study was $5,000.

Seed Production in NT

310 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

What plans has the government implemented or does it intend to implement to assist Territory seed producers to overcome the financial, management and technical limitations they presently face?

ANSWER

The Northern Territory government is assisting seed producers in the following ways:

1. Finance is being made available for seed producers through the Northern Territory Development Corporation to assist the producer in his costs of planting or for upgrading his farm structure, for purchase of machinery, and so on.

2. The Northern Territory government operates a fertiliser freight subsidy scheme on amounts of fertiliser in excess of 2 tonnes. Seed producers are eligible to apply for this concession.

3. The Agricultural Development and Marketing Authority has a full-time marketing officer and his services are available to seed producers to assist them in marketing their produce. ADMA is setting up a grain storage facility at Katherine which will include a cool store for seed which will assist in the maintenance of seed quality.

4. The Department of Primary Production assists seed growers through extension advice, quality control on seed production, the seed testing and research programs directed towards seed production, seed quality and the storage of seeds. The Department of Primary Production is also able to give advice on the economics of seed production. Seeds legislation has been prepared to protect seed producers by ensuring the maintenance of high seed quality.

Australian Fishing Zone Observer Program

313 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

1. How many people have been trained under the Australian Fishing Zone Observer program?

2. How many vessels were chartered under the Australian Fishing Zone program in 1979-80 and in 1980-81?

3. What contribution to the Australian Fishing Zone Observer program is made by the NT government?

ANSWER

1. Ten persons have been employed on a limited tenure basis as observers and one further person is employed at this time as a Senior Technical Office Grade I in charge. Personnel employed under the observer program have been selected on their research or fishing industry background as well as their indicated ability to work under limited supervision.

2. Three vessels in 1979-80 and 2 in 1980-81 were chartered under the observer program as seagoing platforms.

3. The Northern Territory government employs a Senior Technical Officer Grade I and up to 4 observers on a limited tenure basis on behalf of the Commonwealth and all costs are reimbursed. The team works in close conjunction with other existing fisheries research, management and extension staff and is administered through the normal departmental administration.

Management Services Division - Staff Establishment

314 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

(a) What was the staff establishment in the Management Services Division of the Department of Primary Production as at 1 July 1981?

(b) What was the staff establishment as at 1 July 1981 in the (i) Finance Branch, (ii) Personnel Branch, (iii) outposted liaison units, (iv) Registry, and (v) Library?

ANSWER

MANAGEMENT SERVICES DIVISION

	Total establishment at 1 July 1981	Staff as at 1 July 1981
	52	51
Finance Branch	21	20
Personnel	10	9
Library	2	2
Registry	6	6
Other Areas	13	14

With regard to question (b) (iii), the department no longer has outposted liaison units.

There are, however, 22 staff including keyboard operators performing administrative functions situated as follows:

Fisheries	8
Berrimah Research Farm	3
Alice Springs	7
Katherine	2
Agriculture and Stock North Directorate	2

These 22 positions are not included in the establishment of the Management Services Division but are included in the establishment of the above branches.

Prawn Fishery

316 Mr ISAACS to MINISTER for PRIMARY PRODUCTION and TOURISM

Has the government investigated the state of the Territory prawn fishing industry in respect of -

(a) the impact on the local industry of foreign fishing vessels operating in Territory waters;

(b) the returns to the Territory from licences purchased by foreign operators relative to returns to those operators; and

(c) the production costs of the local operators compared with the production costs of foreign vessels?

ANSWER

(a) All foreign vessels operating in waters adjacent to the Northern Territory under bilateral licensing agreements with the Commonwealth are excluded from prawn trawl grounds fished by Australian vessels.

(b) (i) All foreign vessels approved to operate in waters adjacent to the Northern Territory are doing so in waters under Commonwealth jurisdiction.

(ii) Under Commonwealth legislation such vessels are required to have crew licences and vessel licences.

(iii) Dependent upon the nature of the fishing agreement negotiated, foreign vessels may be required to pay an access fee on the anticipated catch quota allocation.

(iv) Under existing negotiated foreign fishing agreements the Northern Territory receives no direct revenue from foreign vessel licensing or negotiated access fees.

(v) The Northern Territory does, however, receive an undetermined indirect benefit from the operation of foreign vessels in adjacent waters: by gaining access to previously unavailable information on the fish resources; through use of Northern Territory port facilities (i.e. inspections, victualling, crew shore leave, pilotage and mooring, &c.); and employment of staff on a reimbursement basis, including equipment costs.

(iv) Recognising that licences under Northern Territory legislation are not required under the foreign fishing agreements negotiated and operating to date, no comparison can be made with the benefits that are derived from Australian vessels holding Northern Territory fishing licences.

(c) No comparison can be made between the presently negotiated foreign fishing vessel operation as it relates to production costs as such

vessels are:

- foreign built, owned and operated;
- in some instances, are subsidised by the respective government;
- not required to land all catch;
- harvesting resources not currently exploited by Australians and in many cases would not be exploited by Australians for domestic consumption; and
- the product prepared aboard the foreign vessels is in accordance with foreign requirements and not in accordance with Australian export standards.

Funding of Roadworks Tennant Creek Area

318 Mr LEO to MINISTER for TRANSPORT and WORKS

How much money was provided by the NT government for roadworks in the Tennant Creek area during 1980-81?

ANSWER

Approximately $12.563m. This figure includes expenditure on capital works, repairs and maintenance, and Aboriginal community internal roads.

Funding of Roadworks Katherine Area

319 Mr LEO to MINISTER for TRANSPORT and WORKS

How much money was provided for roadworks in the Katherine area during 1980-81?

ANSWER

Approximately $8.283m. This figure includes expenditures on capital works, repairs and maintenance, and Aboriginal community internal roads.

Funding of Roadworks Alice Springs Area

320 Mr LEO to MINISTER for TRANSPORT and WORKS

How much money was provided by the NT government for roadworks in the Alice Springs area during 1980-81?

ANSWER

Approximately $10,652m. This figure includes expenditure on capital works, repairs and maintenance, and Aboriginal community internal roads.

Funding of Roadworks Darwin Area

321 Mr LEO to MINISTER for TRANSPORT and WORKS

How much money was provided by the NT government for roadworks in the Darwin area during 1980-81?

ANSWER

Approximately $14,440m. This figure includes expenditure on capital works, repairs and maintenance, and Aboriginal community internal roads.

Beef Prices - Discrepancy between Top End and Central Australia

326 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Can he explain why fat steers and breeders bring up to $60 per head more in Central Australia than they do in the Top End despite the fact that the United States is the target destination of all Territory beef?

ANSWER

The prices paid for cattle traded with Northern Territory abattoirs are determined by private negotiations between buyers and sellers. Therefore, price differentials between regions are due to either differences in the traded cattle that justify the price differentials or differences in the relative bargaining power of the buyers and sellers in the regions.

Differences exist between the carcass weights of cattle, especially steers, traded in Central Australia and those traded in the Top End. The average dressed carcass weights of steers and cows slaughtered at Alice Springs in 1980 were 14 and 16 kg heavier respectively than steers and cows slaughtered at Katherine. These differences in carcass weights, and the associated differences in bone-out yields, are not sufficiently large to account for the total price differential.

The condition of the hides is a further quality factor influencing the difference in cattle prices in the 2 regions. Hides from the northern, tick-affected area, are not as valuable as sound hides from the tick-free areas.

The relative competitive position of Centralian cattle producers is enhanced by their access to alternative markets via low-cost rail transport. To compete, Central Australian abattoirs must offer prices that are at least equal to Adelaide prices less the transportation costs. In comparison, the bargaining position of Top End beef producers is reduced due to the fact that road transport to alternative markets is comparatively costly. Furthermore, the condition of many Top End slaughter cattle increases the possibility of significant losses in long-transit hauls unless the cattle are adequately spelled en-route. This further increases the cost of transportation to alternative markets.

Finally, the Alice Springs abattoir throughput is less markedly seasonal than the throughput at Katherine. This reduces operating costs and provides scope for a competitive price edge.

Beef Sales - Woolworths and Coles

327 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Will he bring to the attention of Woolworths and Coles managements in Darwin the fact that beef of comparable quality to that imported by their organisations is available in the Territory?

ANSWER

Yes.

Workmen's Compensation Case - Mr F. Fenson

328 Mr MacFARLANE to MINISTER for EDUCATION

I refer to the case of Mr F. Fenson, stores supervisor in the Katherine Regional Office of his department, who injured his knee while travelling on duty on 24 March 1981, and ask: was his department responsible for the delay in dealing with Mr Fenson's application for compensation, or does the fault lie with the Commissioner for Employees Compensation in Canberra?

ANSWER

There does not appear to be any undue delay either in my department or the Commissioner's office in Canberra. Now that Mr Fenson has completed the consent forms, medical reports and x-rays necessary to pursue the claim further have been sought from his doctors. However, it would appear that Mr Fenson's claim is not a simple one and may take some time to resolve.

Katherine Terrace - Maintenance of Pavements

329 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

Is the government responsible for maintenance of pavements in Katherine Terrace and, if so, when will they be upgraded?

ANSWER

The footpaths in Katherine Terrace are the responsibility of my department. Funds are allocated this year for extensions on the southern side of the town centre.

There has been considerable damage to footpaths within the business area caused by private developers using heavy equipment. These sections will be reinstated and action will be taken to have the companies involved cover the remedial costs.

Government Accounts - One-stop Payment Office

331 Mr MacFARLANE to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

Will the government establish a one-stop shop for payment of government accounts for water, sewerage and motor vehicle registration, electricity accounts and Housing Commission rents in a ground floor, central position in Katherine, bearing in mind that the town is 8 km long and has no public transport?

ANSWER

Accounts for water and sewerage rates and motor vehicle registration fees are payable annually to the Department of Transport and Works, Giles Street Depot, situated approximately 1 km from the Katherine post office.

The Housing Commission office is situated on the first floor of the Commonwealth Trading Bank building next to the post office. Although the Electricity Commission has re-located its office to the power station site on the Victoria Highway, arrangements have been made for payment of electricity accounts at the ANZ Bank near the post office.

While the one-stop shop concept has a lot to commend it from the point of view of the public, it also gives rise to some inconvenience when members of the public wish to query accounts. It is not always possible for a cashier who is accepting payments on behalf of a number of departments and authorities to answer such queries satisfactorily.

Northmeat Farm Sorghum Production Figures

332 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Has his attention been drawn to an advertisement in the Katherine Informer of 22 December 1980 for the sale of Katherine Downs station which stated that the "Adjoining 'Northmeat Farm' produced 7 consecutive crops of sorghum averaging over 1 tonne/acre and carried 2,000 cattle on 2,800 ha"?

If so, is he able to confirm the production figures and carrying capacity of the 'Northmeat Farm' and, if not, will he institute proceedings against the advertiser for misleading prospective buyers?

ANSWER

I have seen the advertisement referred to by the honourable member and feel that the correctness or otherwise of this advertisement is not for me to confirm.

Production statistics on individual farms are confidential. For this reason, there are no published figures on individual property yields.

If the honourable member believes the advertisement to be false or misleading, he should refer it to the Commonwealth Trade Practices Commission, Brisbane office (for investigation under the Trade Practices Act) or the Northern Territory Commissioner of Consumer Affairs (for investigation under the False Advertising Act).

Government-funded Workshop in Katherine

333 Mr MacFARLANE to CHIEF MINISTER

Has his attention been drawn to an advertisement in the Katherine Advertiser of 6 August 1981 calling tenders for the right to operate a government-funded mechanical repair workshop in Katherine and, if so, will he ensure that similar private enterprise facilities in the town are not unfairly affected by such a workshop?

ANSWER

No, my attention has not been drawn to the advertisement.

Bushfires Regulations

334 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

1. Is he aware that bushfires damage native pastures in the Darwin and Gulf district every year?
2. If so, and on the assumption that some grass of whatever quality is better than no grass at all, will he ensure that Bushfires Regulations are strictly policed in the district to prevent stock and feed losses?

ANSWER

1. Yes.
2. I support this and will refer the matter to the appropriate minister.

Cattle and Buffalo Nutrition Research

335 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

What research is being undertaken into nutrition for cattle and buffaloes in the higher rainfall areas of the Territory?

ANSWER

The Department of Primary Production is engaged in a number of joint projects on Mt Bundey Station, some of which relate specifically to the nutrition of the cattle in the region.

In addition, the results of several years of research into cattle and buffalo nutrition on the Coastal Plains Research Station are being prepared for publication.

Furthermore there is close liaison between the department and CSIRO Division of Tropical Pastures with a view to developing optimum strategies for pasture utilization and improvement in higher rainfall areas carrying cattle or buffaloes.

Beef Industry Consultative Committee

336 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Does he intend to seek advice from the Beef Industry Consultative Committee on tuberculosis eradication and meat processing?

ANSWER

The Beef Industry Consultative Committee consists of persons drawn from

all sectors of the Northern Territory beef industry - pastoralists, meat processors (from both the domestic and export trade), livestock carriers, live animal exporters, the Department of Primary Production and the trade unions. The secretary to the committee is an agricultural economist.

When the BICC was established a year ago, I emphasized that mutual access between myself and the industry would remain unrestricted.

The consultative committee does provide a useful means of communication between the various sectors of the industry and with the government.

The BICC provides information and advice relating to tuberculosis eradication and meat processing.

Beef Prices - Effect of Contract Shed

337 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Will Norwest Beef Industries' change to a 'contract shed' at Katherine result in producers receiving higher prices for their cattle?

ANSWER

Higher prices for cattle are not automatically guaranteed by the change to a contract shed. Norwest Beef Industries apparently anticipate that changing to a contract shed will reduce their labour operating costs. However, prices received will continue to be the result of private negotiations between buyers and sellers and will, in part, reflect the strength of their respective bargaining positions. Prices will also depend on the strength of the market at the time.

Land Auctions in Katherine

338 Mr MacFARLANE to MINISTER for LANDS and HOUSING

When will auction sales be held in Katherine for industrial and residential land?

ANSWER

The next land sales for Katherine have been programmed for 10 November 1981.

It is proposed to offer 14 residential allotments for sale by application over the counter, and 9 industrial allotments for sale by auction on that date.

Racecourse Reserve Katherine

339 Mr MacFARLANE to MINISTER for LANDS and HOUSING

1. Is he aware that the Katherine Municipality requires the Racecourse Reserve to be re-dedicated?
2. If so, will he instruct his officers to act immediately to meet the municipality's requirements?

ANSWER

The application to re-dedicate the Katherine Racecourse Reserve is being considered by my department.

To date a satisfactory explanation of why the existing pound reserve over lot 622 Katherine cannot be used has not been offered. In fact the corporation has recently indicated that it wishes to improve access to the site.

The revocation and re-dedication of reserves is a lengthy administrative

procedure and I am reluctant to instruct my department to commence revocation actions where a need has not been demonstrated. If a need is demonstrated, the implications of having 2 pound reserves and no racecourse in Katherine will need to be considered.

My department will again approach the Town Clerk in Katherine to clarify the position and if necessary immediate action will be taken to re-dedicate the Katherine Racecourse Reserve.

Agricultural Lease Valuations Katherine

340 Mr MacFARLANE to MINISTER for LANDS and HOUSING

1. Is he aware that agricultural leases in the Katherine municipality have been revalued to what lessees consider exorbitant values?

2. As zoning and other regulations prevent subdivision of these leases, will differential rating be introduced for agricultural leases?

ANSWER

All land within municipal boundaries is valued by the Valuer-General for rating purposes. The values determined are based on actual sales of comparable properties and the values determined for rating, I understand, are on the conservative side. Owners have the opportunity to object to the valuation notices sent out by the Valuer-General.

The question of differential ratings is a local government matter and should be referred to the Minister for Community Development who, together with his colleagues of the Local Government Ministers' Conference, have been actively pursuing this matter.

Failures of NT Stations

341 Mr MacFARLANE to MINISTER for LANDS and HOUSING

1. Is he aware that productive stations such as Cresswell Downs, Walhallow, Eva Downs, Anthony Lagoon and Beetaloo are practically deserted?

2. If so, (a) is he alarmed at this fact, and (b) can he say whether it is caused by CSR's and other owners' inability to cope with local conditions or by other reasons?

ANSWER

1. The compliance situation of the pastoral leases mentioned at last inspection were:

   Cresswell Downs - passing visit in June 1981 showed serious lack of maintenance, management is from Walhallow, full inspection due September 1981.

   Walhallow - last inspection September 1978 showed lease in compliance.

   Eva Downs - last inspection July 1979 showed lease in compliance but managed from Walhallow.

   Anthony Lagoon - at last inspection, September 1979, showed serious lack of maintenance, referred to Land Board which recommended compliance by 1 July 1982. A destocking (disease control) program resulted in turnoff of 20,334 in 1980.

   Beetaloo - there is a long standing development and maintenance situation resulting in forfeiture action and proposed mortgagee sale culminating in an Aboriginal land claim.

2. (a) The situation in all cases is of some concern and is not helped by the current downturn in the beef economy.

(b) Apart from the depression in the beef economy, reasons are not known.

Legislation on the Rights of the Disabled

342 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

What action, if any, has been taken during the International Year of the Disabled Person regarding rights for the disabled in government legislation?

ANSWER

This matter has been reviewed by the Regional Committees on the Handicapped which advise the minister. This review has included examining legislation initiatives undertaken by New South Wales and South Australia.

The committees, which include disabled members, have recommended against legislating in the Northern Territory. Rather, the committees have suggested that the government promote programs such as improved access, employment, and rehabilitation which assist disabled people to participate more fully in community and work activities.

This strategy is supported by the government as best achieving the aims of IYDP and resources have been allocated towards this end.

The Northern Territory Building Regulations are in process of amendment to enable better facilities as a matter of course for disabled people.

Grants to Ethnic Schools

343 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

Which part-time ethnic schools providing instruction on a part-time basis in community language and related cultural material in the Northern Territory are in receipt of the newly available grants from the Schools Commission of up to $30 per student per annum?

ANSWER

There has been no announcement to date by the Commonwealth that any of the part-time ethnic schools in the Northern Territory have been approved to receive the $30 special grant. However, the Commonwealth Schools Commission has written to the ethnic groups outlining conditions for funding and enclosing application forms.

As it is anticipated that a large number of applications will be submitted following the advisory letter, there may be initial delay in approvals.

You will be aware that part-time schools operate in the Territory for Chinese, Greek, Italian and Arabic languages.

Aborigines - Imprisonment Rates

344 Mr ISAACS to CHIEF MINISTER

1. What is the Aboriginal male and female rate of imprisonment in the Northern Territory for the last 3 years?

2. How many of the offences were alcohol related?

ANSWER

1. It has not been the practice to identify the racial origins of prisoners in Northern Territory institutions for many years and thus I am unable to provide the Leader of the Opposition with the figures he requires.

   However, the National Aboriginal Council has recently approached correctional administrators throughout Australia stating they believed

Aboriginal to be over-represented in prison populations and failure to identify the Aboriginal component made it difficult to assess the size of the problem. The National Aboriginal Council therefore requested such statistics to be kept.

As a result of these representation, Correctional Services in the Northern Territory have commenced keeping these statistics and I am able to say that as at 31 July 1981, 146 Aboriginal males and 3 Aboriginal females were held of a total prison population of 263 inmates. That is, little over 55% of all prisoners were Aboriginals.

2. Because it is not possible to identify who were Aboriginal prisoners and who were not before July of this year, it is not possible to identify the offences for which they were imprisoned. The problem is compounded by the fact that the description of the offence for which a person is imprisoned does not indicate whether the person had been consuming alcohol at the time at which it was committed.

Rehabilitation of Rum Jungle

348 Mr B. COLLINS to MINISTER for MINES and ENERGY

Will he advise the present status of the program to carry out further rehabilitation of the Rum Jungle mine area?

ANSWER

The Commonwealth has accepted in principle that the Territory would take the responsibility for conducting the work required to rehabilitate Rum Jungle using Commonwealth funds.

Discussions have been held between Territory and Commonwealth officials for exchange of engineering information and documentation as a basis for the design of the rehabilitation works to be undertaken. These revealed a need for further site investigations before a detailed operational program can be finalised.

A program of site investigations was submitted to the Commonwealth and $200,000 will be made available in the first instance. On site work has been initiated and consultation with the Commonwealth is in progress to finalise the investigations necessary, leading to an engineering report in early 1982 which will form the basis of the detailed operational plan for rehabilitation called for by the Commonwealth.

Nabarlek - Spillage of Contaminated Material

349 Mr B. COLLINS to MINISTER for MINES and ENERGY

1. Will he provide a detailed report of the release into the environment of contaminated material from the uranium mine at Nabarlek?

2. What action will be taken against the company for failing to report this incident and denying that it had occurred?

ANSWER

1. A detailed report, compiled as a result of allegations that contaminated material had been released from the uranium mine at Nabarlek, has been submitted to the Legislative Assembly Sessional Committee on the Environment.

2. Queensland Mines failed to report that stormwater had run off a restricted area. The company has been reprimanded.

Jabiru By-laws

350 Mr B. COLLINS to CHIEF MINISTER

What is the status of the proposed by-laws for Jabiru?

ANSWER

The Jabiru Town Development Authority has had legal advice on the full range of by-laws required to enable it to effectively manage and control the town. Many of these by-laws have now been drafted and considered in draft form by the authority. It is hoped to have the authority make a series of by-laws at its September meeting, following which action will be taken to have the by-laws notified in the Gazette.

The by-laws included in the first stage will be -

- Refuse (Jabiru) By-laws
  - Garbage collection services
  - Removal of refuse
  - Storage of disused motor vehicles and machinery
  - Management of rubbish dump
- Plant By-laws
  - Approved plants
  - Noxious plants
  - Application for approval of unlisted plants
  - Notice requiring removal of grass, weeds, etc.
- Roads and Public Places (Jabiru) By-laws
  - Encroachment on roads
  - Road laws and gardens
  - Opening up public streets, planting trees, etc.
  - Prevention of damage to footpaths
  - Public works affecting public streets
  - Numbering of houses and buildings
  - Impounding of vehicles
  - General provisions regarding use of public streets
  - Management of footpaths and pedestrian malls
  - Public reserves
  - Lake Jabiru
  - Traffic control and car parks
- Private Swimming (Jabiru) Pool By-laws
  - Registration
  - Fencing
- Jabiru Swimming Pool Complex By-laws
  - Admission, season tickets, hours, etc.
  - Control of premises
  - Offences
  - Carnivals and hire
  - Coaching

In conjunction with the Department of Law, the authority is now working on the following additional by-laws -

- Rating
- The sewerage undertaking
- The power undertaking
- Sale of foodstuffs
- Control and impounding of animals
- Jabiru Town Hall
- Hawkers and stall-holders
- Signs, hoardings and bill posting

- Pounds
- The water undertaking
- Fencing
- Advertising
- Petrol pumps
- Liquor
- Toxic chemical disposal
- Firearms and traps
- Lighting of fires
- Environmental protection
- Litter
- Archaeological sites
- Camping
- Verandahs and awnings

The full list of required town by-laws has not yet been finally established.

It should be noted that the Director of the Australian National Parks and Wildlife Service has made a series of regulations under the National Parks and Wildlife Conservation Act. Many of these apply in the town, including -

- Offences relating to wildlife
- Landing of aircraft
- Use and possession of firearms, traps, nets, spear guns, etc.
- Taking of animals or plants into the park
- Transportation and supply of liquor
- Use of chemicals
- Scientific research
- Archaeological sites
- Entry permits in certain cases
- Control of animals and plants that are not wildlife
- Impounding of animals
- Approval of town plan by director

It is hoped to have the full list of town by-laws in operation within 3 months.

Feral Animals Report

351 Mr B. COLLINS to CHIEF MINISTER

What plans has the Conservation Commission to implement the recommendations of the Feral Animals Report in respect of the control of feral buffalo?

ANSWER

The government has established a Feral Animals Committee, as recommended in the inquiry. The committee has been active during the past year, and in relation to buffalo has:

1. Held a public symposium to discuss buffalo management issues with the interested parties.
2. Undertaken an extensive aerial survey of buffalo numbers and distribution. This 6 month field exercise has been completed but the written report has yet to be finalised and published.
3. Established a technical working group with extensive terms of reference to produce recommendations on policies and programs to foster economically viable and environmentally sound buffalo management. The working party is expected to produce its report by February 1982.

1978.821—25

Donkey Camp Project in Katherine

352 Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

1. Why has no environmental impact study been undertaken in regard to the proposal to pump water from the Katherine River in the Donkey Camp area?
2. At what level will pumping from the Katherine River cease so that the farmers' water supply for irrigation purposes is protected?

ANSWER

1. The need for an environmental impact study was considered in the early stages of this project and a notice of intent was referred to the Commonwealth Department of Science and Environment in accordance with the Commonwealth Environment Protection (Impact of Proposals) Act. After examining the proposal that department did not consider an environment impact study to be necessary.
2. At the last meeting of the Katherine River Advisory Committee it was agreed that the drawdown limit at Donkey Camp will be initially set at 0.5 metres, and the position reviewed at that stage. Once pumping ceases from the Donkey Camp source then bore water will form the basis of the town water supply.

Staffing Levels in NT Schools

354 Mr BELL to MINISTER for EDUCATION

1. What is the staff-student ratio for (a) town primary schools, (b) high schools, and (c) bush schools in the Northern Territory?
2. What is the current staff-student ratio at (a) Yuendumu, (b) Papunya, and (c) Warrabri schools, and (d) is the ratio based on (i) enrolments or (ii) attendance?
3. Has he and or his department been approached by parents of students at Yuendumu school over staffing levels at the school and, if so, what action has been taken?
4. Will he give an assurance that staffing of schools will at all times meet the real needs of the schools as perceived by the principals and school councils?

ANSWER

1. (a) Town primary schools -
   pre-school 35:1 based on ½ day programs for each child;
   primary 30:1.

   (b) Junior secondary 16:1; senior secondary 13:1.

   (c) Schools in predominantly Aboriginal communities -
   pre-schools 20:1 based on full-day programs for each child;
   primary 25:1; post-primary 16:1.

2. (a)

	Adjusted Attendance	Teachers Deployed	Current Staff-Student Ratio
YUENDUMU -	July		
Pre-school	19	1	19:1
Primary	143	8	16:1
Post-primary	45	3	15:1
(b) PAPUNYA -	August		
Pre-school	31	1.5	20:1
Primary	56	3.5	16:1

Post-primary	12	1	12:1
Outstations	38	4	9:1

(c) WARRABRI

Pre-school	30	1.5	20:1
Primary	130	6.5	20:1
Post-primary	57	4	14:1

(d) Staff-student ratio (formula entitlement) is based upon an adjusted attendance.

The following acceptable percentage attendances have been set to distinguish between types of schools in the Northern Territory.

Urban schools - 90%.
Schools in predominantly Aboriginal communities - 85%.

(i) Where the attendance is greater than the acceptable percentage the formula entitlement is based on enrolments.

(ii) Where the attendance is less than 90% in urban schools a 10% loading is added to the attendance figure to give the student numbers for determining formula entitlement.

(iii) When the attendance is less than 85% in predominantly Aboriginal communities a 15% loading is added to the attendance figure to give the student numbers for determining formula entitlement.

3. The manual arts teacher at Yuendumu resigned on 22 May 1981 and the principal/staff agreed not to seek a replacement due to a low attendance in the post-primary section.

When another resignation was tendered on 3 July 1981 the Regional Superintendent was not prepared to approve a replacement again due to an over-entitlement situation at the school.

The Yuendumu Council contacted the Regional Superintendent regarding staffing at the school and referred to efforts encouraging attendance with emphasis on post-primary aged children.

The department responded within the week and agreed to the replacement of both teachers considering special circumstances pertaining to the school. A manual arts teacher was recruited from interstate and commenced on 13 August 1981. An emergency relief teacher was employed to cover the second resignation and commenced during the week of 20 July 1981. Every effort has been made to identify a replacement. The department has made 5 offers of employment and the latest was expected to commence on 7 September 1981, unfortunately all have rejected employment. The Alice Springs Regional Office and Staffing Unit are continuing efforts to employ a suitable replacement.

The Yuendumu pre-school parent group wrote to the Regional Superintendent on Monday 7 September 1981, requesting an additional teacher for the pre-school. A visit will be made to the school on 14-15 September 1981 by the Regional Superintendent and Early Childhood Adviser to meet with the parent group.

4. Schools in the Northern Territory are staffed according to approved formulae based upon pupil/teacher ratios unless particular circumstances in individual schools require special consideration and justify additional teacher resources.

Each case is examined on its merits and dependent upon the availability of both establishment cover and funds, every effort is made to respond to needs.

Bores on Outstations

355 Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

(a) How many bores will be drilled on outstations in the electorates of Stuart and Barkly, (b) where will the bores be drilled, and (c) which bores on the outstations are to be equipped?

ANSWER

(a) It is proposed to drill 15 outstation bores in the electorates of Stuart and Barkly.

(b) The bores will be drilled at:

Stuart Electorate: Top Rockhole, Kunitjari, Petermann Range, Willowra, Harts Range, Woodgreen, Derry Downs, Anningie, Coniston, Putari, Muntawarra, Todd River Downs.

Barkly Electorate: Rockhampton Downs, Brunette Downs, Alexandria Downs.

(c) Outstation bores programmed to be equipped are:

Stuart Electorate: Ti-Tree (Nturiya), Utopia Outstations, Tarra Warra, Top Rockhole.

Barkly Electorate: Epenarra (2 bores).

Stoning of Vehicles in Alice Springs

356 Mr BELL to CHIEF MINISTER

(a) What are the results, if any, of police investigations into a stone-throwing incident during which cars were stoned while passing through the Gap, Alice Springs, on the night of 24 July 1981?

(b) Have police connected this incident with a previous incident during which rally cars were stoned while passing the MacDonnell Trucking Yards Aboriginal camp the previous weekend?

ANSWER

(a) Extensive inquiries into the incident have failed to locate or ascertain the identity of the offenders. A subsequent incident where one vehicle was stoned resulted in a number of part-Aboriginal youths, aged from 12-16 years, being prosecuted. They have denied involvement in the stone throwing incident on 24 July 1981. Inquiries are continuing and persons thought to be able to assist witn the investigation are still being sought. They are currently absent from Alice Springs on business. (Aboriginal).

(b) Police have not been able to make any connection between this incident and a previous incident during which rally cars were stoned while passing the MacDonnell Trucking Yards. In fact there would appear to be no connection whatsoever.

NTDC Assistance to Aboriginal Organisations

358 Mr BELL to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

How many Aboriginal organisations (i) have applied to the Northern Territory Development Corporation for assistance, (ii) have been given assistance, and (iii) in what form and amount?

ANSWER

The Northern Territory Development Corporation does not distinguish between races when processing loan applications. However at least 2 applications have been received from Aboriginal organisations.

Neither organisation received assistance, as both were referred to the Aboriginal Development Commission, which is able to offer loan conditions which cannot be matched by the NT Development Corporation.

There have been a number of discussions held with representatives from Aboriginal organisations regarding financial assistance available from the Development Corporation, but no applications have resulted.

Pre-apprenticeship Courses for Young Aborigines

359 Mr BELL to MINISTER for EDUCATION

(a) Have pre-apprenticeship courses for young Aborigines, as announced by him in March this year, commenced and, if not, why not?

(b) If not, when are courses at the Priest Street complex expected to commence?

(c) What is (i) the current or expected enrolment in the automotive courses planned to commence in July, and (ii) what forms of recruitment to this course has the department undertaken, especially in rural communities?

(d) When will courses in retail store training, carpentry, joinery and other courses be offered at the Priest Street Vocational Training Centre?

ANSWER

(a) The pre-apprenticeship courses for young Aborigines at Priest Street annexe of the Community College of Central Australia have not yet commenced. The reason for the delay has been lengthy negotiations with the Department of Employment and Youth Affairs for funding for equipment and staffing.

(b) The automotive course is now expected to commence in February 1982.

(c) (i) The Community College of Central Australia has been advised by the Senior Vocational Officer, Aboriginal Training from the Commonwealth Employment Service office in Alice Springs that there will be up to 20 students for the automotive course.

(ii) The recruitment of students for the course is carried out by the Senior Vocational Officer, Aboriginal Training from the Commonwealth Employment Service office in Alice Springs. The Community College of Central Australia is the agency responsible for conducting the course, not for the recruitment of the students. It is anticipated that the Senior Vocational Officer will consult with adult educators and principals in rural communities for recruitment of students in those communities.

(d) At this stage it is anticipated that a carpentry and joinery course will start in July 1982 but this will depend on funding being available and on the identification of students by the Department of Employment and Youth Affairs through its Commonwealth Employment Service office in Alice Springs.

Bores at Beetaloo Station

360 Mr BELL to MINISTER for TRANSPORT and WORKS

What plans, if any, does the government have to equip bores at Beetaloo Station to supply water in quantity to the school and community?

ANSWER

The equipping of a bore at Beetaloo Station to provide a water supply to

the school and community is currently being funded by the Department of Community Development and the Department of Education against the 1981-82 capital works program. The work involves the equipping of a new bore, provision of water reticulation to the school and community and the provision of elevated and ground level tanks.

The equipment has been ordered and is expected on site mid-October. The anticipated completion date for the whole of the works is the end of November 1981.

Public Service Aboriginal Interpreter Service

361 Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

(a) What response was obtained from a request published in the February 1981 edition of the Public Service newsletter 'Keeping in Touch' for information regarding Aboriginal languages spoken by public servants?

(b) When will an interpreter service be established to provide assistance to Aboriginal people using public services?

(c) In what centres will these services be provided?

ANSWER

(a) There were notices placed in 'Keeping in Touch' asking that public servants with bilingual skills in Aboriginal languages indicate their interest in using these skills to interpret. This notice first appeared in the January issue and again in May 1981. There were 8 respondents to this notice.

(b) The government has already established an interpreting service which uses bilingual NTPS employees who have volunteered to interpret. These people can be released from their normal work duties to provide interpreting assistance. An officer within the Department of Community Development receives requests for interpreting assistance and arranges for an interpreter to be available. There are over 100 volunteer interpreters within the NTPS covering most ethnic languages, but only a few Aboriginal languages. The government is presently considering in what ways language assistance can be extended to include more Aboriginal languages.

A NT government working party has provided a report on this matter, and a submission has been received from the Institute for Aboriginal Development in Alice Springs. These are now being considered.

(c) It is intended that all centres in the Territory have access to language assistance either through on-call interpreters or, if not available, by a 3 way telephone link-up to other centres.

Mt Gillen Child Health Unit

362 Mr BELL to MINISTER for HEALTH

(a) When will renovations and remodelling work on the Mt Gillen Child Health Unit in Alice Springs be completed?

(b) When did work commence?

(c) Did the original contractor fail to satisfactorily fulfil the terms of the tender to the point where he abandoned work and, if so, what safeguards exist in the NT government tendering policy to preclude similar contract breakdowns on other jobs?

(d) How will the unit's treatment and residential services - including accommodation for attendant mothers and family - be upgraded and ex-

panded as a result of the renovations?

(e) Do children with severe brain damage currently live and receive care at the unit and, if so, (i) how many, and (ii) what treatment and care does each child require?

(f) Is there an alternative residential facility for brain-damaged children in the Northern Territory and, if no, does his department plan to provide such a facility?

(g) Is bed space at the unit intended for the use of sick and malnourished children and babies and, if so, why are beds currently being occupied by brain-damaged children?

ANSWER

(a) The handover date was 20 November 1981.

(b) Work commenced in July 1980.

(c) No, the Department of Transport and Works cancelled the contract due to the poor performance by the contractor. As the Northern Territory government tendering policy on capital works is not within my portfolio, may I suggest to the honourable member he approach my colleague the Minister for Transport and Works for more information.

(d) The unit in its original condition was run down, the plumbing and electrical services unreliable and many of the buildings difficult to keep clean. The upgrading program is intended to rectify all of these matters and make accommodation for both families and patients more tenable.

(e) Yes, the number varies from 2 to 6. The treatment and care of each child varies depending on the extent of the handicap. In general these children require 24 hours a day nursing, most of them require spoon feeding, and many require frequent physiotherapy. They all need occupational therapy.

(f) The only alternative residential facility in Alice Springs at present is the Alice Springs Hospital. The Department of Health does not intend to provide an alternative facility but is actively involved in the provision of suitable community based facilities by such people as the Spastic Council and the Anglican Church at its St Mary's Village.

(g) The bed space at the Child Health Unit is intended for the rehabilitation of children and as such some brain-damaged children fulfil appropriate criteria. It is the severely handicapped children who are inappropriately placed at the Child Health Unit since neither the staff nor the physical facilities were intended to care for such patients.

Supply of Power by NTEC to Pastoral Properties

363 Mr BELL to MINISTER for MINES and ENERGY

(a) What is the policy regarding the supply of power by NTEC to pastoral properties?

(b) What arrangements have been made between the lessees of Newcastle Waters Station and NTEC for the establishment and supply of power to that lease?

(c) What was the cost of installing the power generation sets and the power reticulation?

(d) How much did the station lessees contribute to the cost?

(e) How many power consumers not directly concerned with the station's operations will use the NTEC power?

(f) What arrangements for power generation existed at Newcastle Waters before NTEC power was supplied?

(g) Can other pastoral lessees now assume that NTEC power will be supplied on request and to replace their own power supplies?

(h) What are the names of other pastoral leases where NTEC power is supplied primarily or exclusively to the lessee?

(i) How much will it cost to maintain the NTEC service at Newcastle Waters?

(j) How much income will be generated from the service?

ANSWER

(a) Pastoral properties may apply for connection to electricity supplies operated by the commission. Applications will be considered on their own merit in terms of the capital and operating costs of providing supply.

(b) Newcastle Waters Station made application for connection to the supply at Newcastle Waters and power is sold to the station at commercial rates.

(c) The capital cost of generating plant and the distribution system at Newcastle Waters was $100,000.

(d) Newcastle Waters Station paid $9,000 to cover the cost of line construction from the boundary of the station to the point of supply.

(e) There are 7 consumers at Newcastle Waters, including the school and the town water supply.

(f) Prior to the installation of reticulated power by NTEC, consumers generated their own power. Separate generating plants were operated by the school, Telecom and Newcastle Waters Station. The town water supply was powered by a diesel pump.

(g) There is no assumption that NTEC power will be supplied on request to pastoral lessees.

(h) No other pastoral leases are supplied by NTEC.

(i) Budget allocation for operating the Newcastle Waters Power Station and distribution system for 1981-82 is $48,400; this includes $24,800 for fuel.

(j) The estimate of revenue for 1981-82 is $9,000.

Principal and Deputy Principal Positions at Community College of Central Australia

365 Mr BELL to MINISTER for EDUCATION

(a) Will he table copies of the advertisements published for the positions of Principal and Deputy Principal at the Community College of Central Australia?

(b) When were the advertisements published and how many applications were received?

(c) Have any changes been made in the establishment of the college which will have the effect of eliminating or altering either or both of the above positions?

(d) If so, when were the changes made and why?

(e) What are the names of the persons presently holding the positions of Principal and Deputy Principal?

ANSWER

(a) The position of Principal of the Community College of Central Australia has been advertised twice this year. Both were national advertisements and copies are freely available from the Department of Education. The position of Deputy Principal was advertised once internally by the Commonwealth Teaching Service. A copy of this advertisement is similarly available.

(b) The first advertisement for the position of Principal appeared in the national press on 4 July and 8 applications were received. As there were not sufficient applicants with the necessary qualifications the position was re-advertised on 5 September with a closing date of 30 September. The advertisement for the position of Deputy Principal appeared in the Commonwealth of Australia Gazette No. G9 of 3 March 1981. Three applications were received.

(c) & (d) A report on the staffing needs of the Community College of Central Australia is currently being considered jointly by the Department of Education and the Public Service Commissioner. A submission seeking the re-classification of the Principal's position to bring it into line with Technical and Further Education institutions elsewhere instead of its present classification which is related to a College of Advanced Education structure is currently being considered. No other changes affecting these 2 positions have been finalised.

(e) The substantive Principal is Mr E.J. Pearse who is currently on secondment to special duties within the Department of Education. The acting Principal is Mr H. Tinsley. The Deputy Principal position is not filled substantively. Ms M. Crawford is currently acting in the position.

Roadside Verges on Carpentaria Highway

366 Mr BELL to MINISTER for TRANSPORT and WORKS

(a) How frequently are the roadside verges on the Carpentaria Highway mown and or graded?

(b) Is he aware that in July 1981 the roadside verges were so overgrown that they gave excellent cover to cattle, thus creating a serious hazard to motorists?

(c) Will he ensure that this highway and all other major roads in the Territory are regularly maintained to ensure conditions are safe for all travellers?

ANSWER

(a) The verges of the Carpentaria Highway are slashed on a yearly basis, usually just after the wet season when it is most required. This year it was slashed in April to a width of approximately 3 metres from each side of the seal. Maintenance grading is undertaken when it is required, usually once a year.

(b) Some regrowth is expected during the dry season but it is usually insufficient to warrant a further mowing patrol.

(c) I will ask my maintenance section to keep an eye on the regrowth and to provide additional mowing if required.

Submissions on Australian Schools Commission-funded Programs

367 Mr BELL to MINISTER for EDUCATION

(a) How many submissions on Australian Schools Commission-funded programs for severely handicapped children, as advertised in the Centralian Advocate of 15 July 1981, has his department received?

(b) What are the details of the submissions which will receive funding under the scheme?

ANSWER

(a) Five submissions were received.

(b) To date, no approvals from the federal minister have been received, although 3 projects have been recommended for funding.

Magistrates in Alice Springs

368 Mr ISAACS to ATTORNEY-GENERAL

Is it intended to have 2 magistrates in Alice Springs in the new year?

ANSWER

The question of allocation of duties of magistrates is one for the Chief Magistrate.

The Chief Magistrate advises that he intends to base 2 magistrates in Alice Springs as from the new year.

Non-Australians in NT Teaching Service

369 Mr BELL to MINISTER for EDUCATION

1. Are any members of the Northern Territory Teaching Service not Australian citizens?

2. If the answer is yes, how many aliens are employed and to which nations do they owe allegiance?

3. What is the Northern Territory government's policy regarding the employment of non-Australians in the teaching service and the public service?

ANSWER

1. Yes.

2. No aliens have been employed by the NTTS since its inception. The Commonwealth Teaching Service employed aliens, with ministerial approval. The schedule below details the number of aliens employed by the CTS who were compulsorily transferred to the NTTS, and the nations to which they owe allegiance.

Number	Country
23	USA
2	Philippines
2	Netherlands
2	France
2	Germany
1	Belgium
1	Canada
1	Pakistan
34	TOTAL

It should be noted that records have not been kept of the number of citizens of the UK or New Zealand employed by the service.

3. Section 14(3) of the Public Service Act states that the Public Service Commissioner shall take steps to ensure that there is no discrimination in the employment of any person on the grounds of, inter alia, that person's national or ethnic origin.

It is the policy of the NT government that the public service, and the teaching service, should be as efficient and effective as possible. Accordingly, if an alien with residency status is the most efficient applicant for a vacancy, employment will be offered to that alien.

Annual Report on the Operations of the Mental Health Act

370 Mrs O'NEIL to MINISTER for HEALTH

Section 31 of the Mental Health Act requires that an annual report on the operations of the Act be tabled in the Legislative Assembly. Is it intended to provide a separate report, or is the section on the Act included in the Annual Report of the Department of Health, 1980-81 (pp 70-71) intended to be the only report tabled?

ANSWER

It is not intended to provide a separate report covering the operation of the Mental Health Act. A section dealing with this subject is included in the Annual Report of the Northern Territory Department of Health for 1980-81 and will be the only report tabled.

This complies with the requirements of section 41 of the Mental Health Act, which provides:

'41. ANNUAL REPORT

(1) The Minister shall table an annual report in the Legislative Assembly on the operation of this Act.'.

Staff Reductions at Casuarina Hospital

371 Mrs O'NEIL to MINISTER for HEALTH

In his statement to the Assembly on 18 August 1981, he announced that staff numbers at Casuarina Hospital would be reduced by 70. In what categories of employees will these reductions take place?

ANSWER

The reduction of staff at Casuarina Hospital will affect 13 of the 15 staff categories at the hospital. There will be no retrenchment of present staff as the reduction can be achieved through natural wastage. Recruitment of staff for 1982 is still being carried out.

Industrial Relations Unit in Alice Springs

372 Mr BELL to CHIEF MINISTER

Does he intend to establish an office of the Industrial Relations Unit in Alice Springs now or in the future and, if not, why not?

ANSWER

It must be noted that the Northern Territory government has no constitutional authority in respect of industrial relations. The main functions the government can perform in relation to industrial relations are simply to monitor and to advise.

As regards the specific question asked, the decision whether or not to open an office of the Industrial Relations Unit in Alice Springs must rely on the number of queries and complaints received from that centre and surrounding regions.

In the 9 months to September 1981, only 6 complaints were received from Alice Springs and 1 from Tennant Creek. A number of general queries were received, all of which were answered satisfactorily by telephone or by correspondence.

The Industrial Relations Unit conducts inspectorial visits to all Territory regional centres approximately 4 times per year and the latest visit to Alice Springs occurred in July of this year. A number of general queries were received but only 1 actionable complaint, this caseload from visiting a total of 439 business premises.

There does not seem to be a case therefore for establishing an office of the unit in Alice Springs at this time. Frequent contact is maintained with trade union and employer representatives and, in addition, an information meeting was held with the member for MacDonnell at his request on 21 July during which the functions and responsibilities of the unit were explained.

The position will of course be kept under review.

Treatment of Burns Cases at Casuarina Hospital

373 Mr BELL to MINISTER for HEALTH

Is it a fact that special facilities for the treatment of burns cases at the Casuarina Hospital have never been used and that burns cases are treated in ordinary wards where the risk of infection is very high?

ANSWER

There are no special facilities for the treatment of burns cases at the Casuarina Hospital.

On the 1981-82 Minor New Works Program a special 'Burns Bath' will be installed in Casuarina Hospital Ward 2B. Burns patients are nursed in protective isolation in single rooms in this surgical ward. They are currently bathed in bed or using a bath kept solely for burns patients.

With the installation of the special bath, bathing will be improved for burns patients.

Debtors in NT Gaols

374 Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

1. How many debtors are currently imprisoned in NT gaols?
2. Is it expected that gaol accommodation in the Territory will be sufficient to cater for those people who are unable to pay their medical bills?

ANSWER

1. There are no debtors currently imprisoned in NT gaols.
2. An 1889 South Australian Act to abolish imprisonment for debt, except in certain circumstances, still applies in the Northern Territory.

Department of Health Staff Training

375 Mr BELL to MINISTER for HEALTH

Which categories of staff of the Department of Health will receive training in the 'new procedures to be adopted' as a consequence of the new health funding arrangements, and in which such procedures will department staff receive training?

ANSWER

Each region has conducted training session for medical, nursing and administrative staff with all cashiers/interviewing officers receiving additional finance training. A series of circulars was produced and sent to all staff members who are expected to make themselves familiar with the new charging procedures. The department has also produced and distributed a new charging manual to all hospitals and urban community health centres.

Road Accidents and Random Breath-Testing

378 Ms D'ROZARIO to CHIEF MINISTER

1. For each of the months of (a) July 1980, (b) August 1980, (c) September 1980, (d) October 1980, (e) November 1980, (f) December 1980, (g) January 1981, (h) February 1981, (j) March 1981, (k) April 1981, (m) May 1981, and (n) June 1981, (i) how many road accidents occurred in the Northern Territory, (ii) how many road accidents were alcohol-related, and (iii) what was the incidence of death or injury sustained in alcohol-related road accidents?

2. For the period July 1980 to June 1981, what were the classifications of road accidents according to (a) location, and (b) time of occurrence?

3. For each of the months of (a) July 1980, (b) August 1980, (c) September 1980, (d) October 1980, (e) November 1980, (f) December 1980, (g) January 1981, (h) February 1981, (j) March 1981, (k) April 1981, (m) May 1981, and (n) June 1981, (i) how many drivers were tested at random breath testing stations in the Northern Territory, (ii) how many drivers tested at random breath testing stations registered alcohol levels above the prescribed limit, (iii) how many prosecutions were initiated as a consequence of drivers tested at random breath testing stations registering alcohol levels above the prescribed limit, (iv) how many drivers were tested for blood alcohol content other than at random breath testing stations, (v) how many drivers tested under (iv) above registered alcohol levels above the prescribed limit, and (vi) how many prosecutions were initiated as a result of drivers registering alcohol levels above the prescribed limit, but not tested at random breath testing stations?

4. How many police officers currently serving in the force have undergone specific training to operate random breath testing stations and other breath testing apparatus?

5. With respect to the operation of random breath testing stations (a) have key times of day and key locations been identified, (b) what is the frequency of surveillance in key locations at key times of day, and (c) are random breath testing stations always manned at full strength at key times of day in key locations?

ANSWER

1.

4. All police officers who are required to operate random breath testing stations receive 'on the job' training; since the commencement of breathalyzer legislation in 1974 all recruits have been trained in the use of Alcotest preliminary breath test devices as have most members who were serving prior to that legislation's commencement; 75 police officers currently serving in the force have been specifically trained as breathalyzer operators; and 6 police officers currently serving in the force have been specifically trained as breathalyzer maintenance personnel.

5. (a) Yes.

(b) Normal maximum random breath testing frequency is -

Darwin	8 urban, 2 rural per fortnight;
Alice Springs	2 urban, 2 rural per fortnight;
Tennant Creek	1 urban, 1 rural per fortnight;
Katherine	1 urban, 1 rural per fortnight;
Nhulunbuy	1 urban, 1 rural per fortnight;
Jabiru	1 operation per month; and
Warrabri	1 operation per month.

(c) Yes.

Staff Levels at Alice Springs Psychiatric Unit

380 Mr BELL to MINISTER for HEALTH

What is the present staffing of Alice Springs psychiatric unit?

ANSWER

Staffing of the Alice Springs Psychiatric Unit is 1 specialist psychiatrist, 1 psychologist, 1 resident medical officer (shared with medical ward), 6 registered nurses, 1 nursing aide per 24 hour shift, 1 cleaner, 1 orderly - 8.00 am to 4 pm 7 days, 1 orderly - 4 pm to midnight, 7 days per week.

Care for Chronic Psychiatric Patients

381 Mr BELL to MINISTER for HEALTH

1. When does the agreement between South Australia and the Northern Territory to look after chronic psychiatric patients cease?
2. How many patients are expected to return and where will they go?

ANSWER

1. There is no time limit on the understanding between South Australia and the Northern Territory for the care of long term psychiatric patients.
2. Patients still requiring institutional care will not be returned to the Northern Territory until an appropriate institution is established. This is not likely to be a viable proposition in the near future.

Government Advertising for Health Fund Membership

382 Mr BELL to MINISTER for HEALTH

How much has been spent by the government on TV and press advertising to promote membership of a health fund?

ANSWER

The advertising campaign to promote membership of a health fund has cost approximately $16,200. Final cost will not be known until all invoices have been received. Advertisements were run in all newspapers and on radio and television.

Eligibility for Disadvantaged Card

383 Mr ISAACS to MINISTER for HEALTH

1. How many migrants are eligible for the disadvantaged card in the Northern Territory?
2. How many people in receipt of unemployment benefit and special benefit are eligible for the disadvantaged card in the Northern Territory?

ANSWER

The issue of disadvantaged cards is the responsibility of the Commonwealth Department of Social Security.

The Department of Health has no information on the matter.

NT Patients Funded through Commonwealth Schemes

384 Mr ISAACS to MINISTER for HEALTH

1. How many patients in the Northern Territory are funded through both the Commonwealth's Nursing Home and Domiciliary Care Services and

Benefits?

2. How many are extensive care patients?

ANSWER

Ninety patients in the Northern Territory are currently funded through the Commonwealth Nursing Home Act.

A total of 47 are extensive care patients.

Domiciliary Care Benefits are paid through the Commonwealth Department of Health, and not the Northern Territory government.

Sealing of Roper Road

386 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

When will the sealing of the Roper Road be completed to the 4-mile landing?

ANSWER

The road from the Stuart Highway to the crossing at Roper Bar is approximately 175 km long, of which 95 km have previously been sealed.

Upgrading of the remaining 81 km is to be undertaken in stages.

The next stage is presently programmed for commencement in the 1984-85 financial year.

Other stages will follow as finance and other priorities allow.

The access to the 4 Mile Landing from the Roper Highway was upgraded this year to a formed and gravelled standard at a cost of $30,000.

This section can now be economically maintained along with the gravelled sections of the highway.

Accidents on Dick Ward Drive

387 Mrs O'NEIL to ATTORNEY-GENERAL

Since the opening of Dick Ward Drive on 22 July 1980, how many accidents have been reported to the police (a) at the intersection of Dick Ward Drive and Ross Smith Avenue, (b) at the intersection of Ross Smith Avenue and Phillip Street, (c) at the intersection of Ross Smith Avenue and Fannie Bay Place, (d) at the intersection of Ross Smith Avenue and East Point Road?

ANSWER

During the period 22 July 1980 to 15 September 1981 -

(a) 5 accidents reported to the police;

(b) 2 accidents reported to the police;

(c) 4 accidents reported to the police; and

(d) 7 accidents reported to the police.

Katherine Dam Site

388 Mr ISAACS to CHIEF MINISTER

1. Will he please detail the nature and number of consultations undertaken with the Djauan people and the NT government concerning the proposed site of the Katherine Dam?

2. How many sacred sites are located in the proposed Katherine Dam site?

3. What action does he intend taking regarding the proposed dam site,

given the opposition of the Djauan people?

ANSWER

1. None to date.

2. As yet unknown.

3. The matters raised will all be addressed in the full feasibility study and subsequent environmental impact study, if the project investigation continues beyond the current strategy studies.

Emergency Assistance Allocation

389 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

In 1980-81 how much was spent out of the emergency assistance allocation on accommodation in terms of (a) financial assistance for purchase of tents, (b) bond money, and (c) general rental assistance?

ANSWER

It is not possible to provide a breakdown of emergency assistance expenditure into the 3 categories mentioned, but an amount of $58,871.82 was spent in 1980-81 on financial assistance for accommodation.

Department of Correctional Services Grants-in-Aid

390 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

Which organisations are receiving grants-in-aid from the Department of Correctional Services in 1981-82 and how much is being allocated? How many unsuccessful applications were there and what were these organisations?

ANSWER

There are 2 organisations receiving grants-in-aid from the Correctional Services Division.

- Rehabilitation Association of the Northern Territory.

- Prisoners Aid and Rehabilitation Association of Alice Springs Inc.

The Rehabilitation Association of the Northern Territory has been granted $5,000 for 1981-82.

A grant for the Prisoners Aid and Rehabilitation Association of Alice Springs Inc. for 1981-72 is currently being assessed.

There were no other applications for grants-in-aid for 1981-82.

Commonwealth Special Assistance for Aboriginal Health

395 Mr ISAACS to MINISTER for HEALTH

The Commonwealth provides special assistance for Aboriginal health through the Department of Aboriginal Affairs. The Commonwealth states, under these programs, funds are provided for (a) prevention and control of alcohol abuse, (b) development of Aboriginals' responsibility in the improvement of their own health, and (c) development through training of Aboriginals to become expert in all aspects of health care administration. Will he ascertain how much is being provided for these purposes in the Northern Territory and to whom?

ANSWER

The Department of Aboriginal Affairs was unable to provide details of funding under the headings as provided. The following amounts have been programmed for the 1981-82 financial year.

(a) Prevention and control of alcohol abuse (including rehabilitation):

	Recurrent	Capital	Total
Kalano Association, Katherine	$ 109,000	--	$ 109,000
F.O.R.W.A.A.R.D., Darwin	$ 103,000	--	$ 103,000
Central Australian Aboriginal Congress Medical & Health Services	$ 114,000	$ 5,000	$ 119,000

(b) Aboriginal health services including training of Aboriginals in health care administration:

	Recurrent	Capital	Total
Kalano Association, Katherine	$ 68,000	$ 200,000	$ 268,000
Aboriginal & Islander Medical Service, Darwin	$ 50,000	--	$ 50,000
Central Australian Aboriginal Congress & Health Service, Alice Springs	$ 559,000	$ 53,500	$ 612,500
Lyappa Congress Medical Service, Papunya	$ 367,000	--	$ 367,000
Urapuntja Health Service, Utopia	$ 250,000	$ 35,000	$ 285,000

Bilingual Programs in NT

399 Mr ISAACS to MINISTER for EDUCATION

1. How much is being allocated in 1981-82 for bilingual programs? What was expended in 1980-81?
2. How many schools now have operational bilingual programs?
3. How many schools have been accredited as working successfully by the department?
4. At what stage is the evaluation of bilingual programs by the Department of Education? What are the recommendations, if any, to date?

ANSWER

1. Allocation for 1981-82 (excluding salaries): $ 122,000.
   Expenditure for 1980-81 (excluding salaries): $ 95,936.

   Allocation and expenditure relates to the curriculum, literacy workers and production programs.
2. Fifteen schools have operational bilingual programs but 3 of those programs are experiencing problems associated with developing an orthography, low attendance and unavailability of suitable staff.
3. One school has been recommended for 2 years provisional accreditation.
4. The bilingual program in 4 schools is currently under evaluation, with reports expected to be ready for presentation to the accreditation panel in early 1982. The program in 5 other schools will be evaluated during 1982, aiming at accreditation procedures in early 1983. The remaining schools are at varying stages of implementation of a bilingual program and will not be ready for evaluation until 1983-87, as the effectiveness of the program can only realistically be evaluated at the end of the primary education process.

University Planning Authority Expenditure

400 Mr ISAACS to MINISTER for EDUCATION

What was expended in 1980-81 on travel and other expenditure related to

advisory meetings of the University Planning Authority? What is the anticipated expenditure in 1981-82?

ANSWER

	1980-81 Expenditure	1981-82 Estimated Expenditure
Official travel	$ 11,478	$ 20,000
Advisory meetings	$ 35,962	$ 74,000
	$ 47,440	$ 94,000

The increase in 1981-82 expenditure over 1980-81 expenditures represents a full year's expenditure on programs which commenced during 1980-81 and does not result from expansion of existing programs and or the introduction of new programs.

Core Curriculum and NT Certification Committees

401 Mr ISAACS to MINISTER for EDUCATION

What is the estimated cost of implementing core curriculum and NT certification and associated curriculum committees for 1981-82?

ANSWER

The cost of implementing core curriculum in 1981-82 is estimated to be $ 449,000.

A sizeable proportion of this amount is for short-term developmental costs and this amount should not be viewed simply as the annual cost of implementing core curriculum.

Since teaching and learning in the classroom is the main purpose of schooling and core and recommended curriculum accounts for approximately 80% of classroom time then the cost of implementing core curriculum should, after the initial development work is finalised, be no more that the cost of delivering any other comparable educational program. Therefore, the developmental costs are expected to progressively reduce to an ongoing maintenance level within 3 years.

Child Migrant Program

402 Mr ISAACS to MINISTER for EDUCATION

What expansion of the existing child migrant program is expected in 1981-82?

ANSWER

Adequate financial provision has been made in the budget to provide teachers at a ratio of 10:1 in the intensive program and 30:1 in the on-going program. Expansion will depend on the numbers of new arrivals which is impossible to predict. Provision has been made on the basis of upper limits according to all available information.

Four additional positions have been made available for the on-going program and 4 for the intensive program initially.

Airfares for Isolated Children

403 Mr ISAACS to MINISTER for EDUCATION

How many families received airfares for isolated children in 1980-81? How many are expected to be covered in 1981-82?

ANSWER

Two hundred and nineteen families received airfares for isolated children in 1980-81. The number of families receiving assistance is expected to increase to 230 in 1982.

NT School Enrolments

405 Mr ISAACS to MINISTER for EDUCATION

What has been the growth of student enrolments over 1980-81? At which schools? What is the projected student enrolment for 1981-82 and where?

ANSWER

There has been a 3.45% overall increase in student enrolments in the Northern Territory between July 1980 and July 1981, viz:

3.72% increase (940 students) in government schools;
1.86% increase (79 students) in non-government schools;
5.06% increase (977 students) in urban government schools; and
0.62% decrease (37 students) in Aboriginal government schools.

The projected student enrolments for July 1982 are:

26,590 (2% increase) in government schools;
4,460 (3% increase) in non-government schools;
20,580 (2% increase) in urban government schools; and
6,010 (1% increase) in Aboriginal government schools.

It is predicted that there will be an overall 1.6% increase (500 students) in student enrolments between July 1981 and July 1982.

Specific Purpose Payments under TAFE

406 Mr ISAACS to MINISTER for EDUCATION

Which institutions are to receive specific purpose payments of grants under TAFE in 1981-82? How much are the specific purpose payments to be and for what purpose?

ANSWER

The institutions involved, and the amounts, are as follows:

	1981 September-December quarters	1982 March-June quarters	Total
Darwin Community College	$33,500	$121,050	$154,550
Community College of Central Australia	$13,600	$ 10,920	$ 24,520
Katherine Rural Education Centre	---	$ 38,400	$ 38,400
Batchelor College	---	$ 24,760	$ 24,760
Department of Education Programs	$19,950	$ 45,500	$ 65,450
	$67,050	$240,630	$307,680

The purposes for which the grants are, or are likely to be, approved are:

	1981 September-December quarters	1982 March-June quarters	Total
Staff development	$16,800	$ 28,250	$ 45,050
Data collection and processing	$ 8,000	$ 15,000	$ 23,000

Particular purposes	$42,250	$97,380	$139,630
Equipment (new grant in 1982)	---	$100,000	$100,000
	$67,050	$240,630	$307,680

Specific Purpose Payments to Schools

407 Mr ISAACS to MINISTER for EDUCATION

Which schools received specific purpose payments in 1980-81 under disadvantaged country areas? How much was allocated? In 1981-82 what is the anticipated expenditure per school?

ANSWER

In 1980-81 grants of a total amount of $151,648 were approved under the Disadvantaged Country Areas Program as follows:

The Araluen Arts and Cultural Trust 'Arts in Isolated Schools and Communities' program	$ 32,000
Kargaru Primary School	$ 7,000
Bush Schools in the Disadvantaged Country Areas - colour video cassette recorder/playback systems	$ 58,778
Tennant Creek Area School	$ 6,000
Alice Springs School of the Air	$ 43,870
Katherine School of the Air	$ 4,000

The 1981-82 Commonwealth budget provides $181,000 for the program in the Northern Territory. Legislation concerning the 1982 grants is currently before the Federal Parliament awaiting approval. Grants are normally provided on a calendar year basis and at this particular time further grants have been approved for the remainder of 1981 as follows:

Alice Springs School of the Air	$ 12,750
Katherine School of the Air	$ 16,500
	$ 29,250

Specific Purpose Payments to School

408 Mr ISAACS to MINISTER for EDUCATION

In 1980-81 which schools received specific purpose payments of grants under the Disadvantaged Government Schools program and how much was each allocated? In 1981-82 what is the anticipated expenditure per school?

ANSWER

In 1980-81 grants of a total amount of $235,116 were approved under the Disadvantaged Government Schools program as follows:

(a) Alice Springs High School	$ 75,753
(b) Millner Primary School	$ 81,154*
(c) Nightcliff High School	$ 25,119*
(d) Rapid Creek Primary School	$ 53,090*

* Includes salary component extending over the whole of 1981 calendar year.

The 1981-82 Commonwealth budget provides $296,935 for the program in the Northern Territory. Legislation concerning the 1982 grants is currently before the Federal Parliament awaiting approval. Grants are normally provided for a calendar year and at this particular time further grants have been approved for the remainder of 1981 as follows:

(a) Batchelor Education Village	$ 9,500
(b) Berrimah Primary School	$ 10,000

(c) Rapid Creek Primary School	$ 27,500
(d) Tennant Creek Area School	$ 2,460
(e) Traeger Park Primary School	$ 15,273
(f) Warrego Primary School	$ 11,720
Total	$ 76,453

Secondary Student Assistance Scheme

409 Mr ISAACS to MINISTER for EDUCATION

How many students in years 8 to 10 are receiving assistance from the Secondary Student Assistance Scheme? How many are in receipt of the maximum rate?

ANSWER

Seventy students are currently receiving assistance from the Secondary Assistance Scheme. Twenty-nine are in receipt of the maximum allowance.

Dollar-for-dollar Subsidies

410 Mr ISAACS to MINISTER for EDUCATION

Which schools received funding from the dollar-for-dollar subsidies in 1980-81 and how much was allocated per school?

ANSWER

The following are the schools which received 'dollar-for-dollar' subsidies in 1980-81 and the amounts allocated. The 'dollar-for-dollar' scheme operates on the basis that any school which raises funds for a specifically stated purpose will receive a grant equal to the amount raised but not exceeding $5,000. Any amount to be granted in excess of $5,000 will require justification by the school concerned and will depend upon availability of funds and approval of the secretary of the department.

Scholarships and Reimbursements to Students

411 Mr ISAACS to MINISTER for EDUCATION

How many students received scholarships and reimbursements under approved Student Assistance Schemes in 1980-81? What are the estimated additional claims for 1981-82?

ANSWER

Scheme	No. of Claimants 1980-81	Estimated Additional Claims 1981-82
NT scholarships	8	10
NT tertiary grants	224	160
NT tertiary fares	194	210

Operational Expenses for Education Programs

412 Mr ISAACS to MINISTER for EDUCATION

What are the operational expenses for the following programs in 1981-82: (a) Aboriginal teacher education, (b) adult education, (c) student driver education, (d) Katherine Rural Education Centre, (e) technical and vocational education, (f) Community Services and Correctional Welfare? What was expended in these areas in 1980-81?

ANSWER

The following amounts represent operational expenditure in relation to the listed function 1980-81 and 1981-82:

	Expenditure 1980-81	Estimate 1981-82
Aboriginal teacher education	$ 150,963	$ 237,000
Adult education	83,256	102,000
Student driver education	7,999	18,000
Katherine Rural Education Centre	29,178	121,000
Technical and vocational education	17,476	22,000
Community Services and Correctional Welfare	7,995	15,000
	$ 296,867	$ 515,000

NB: Figures do not include salaries.

Child Migrant Education

413 Mr ISAACS to MINISTER for EDUCATION

Will he provide details on the new 'initiative' announced in the Budget that the government has undertaken in the area of child migrant education? How many children are to be involved? What is the ratio of students per teacher?

ANSWER

The government has accepted responsibility for the funding of the program.

Allocations from the Commonwealth under the Child Migrant Education Program, now called English as a Second Language Program and the Refugee Contingency Program now called New Arrivals Program, are regarded as subsidies of NT government expenditure.

Up to 300 non-English speaking children are expected to arrive in this financial year. In addition approximately 600 children currently in the program will continue to be catered for.

Pupil teacher ratios approved by Cabinet are:

10:1 in the intensive component; and
30:1 in the on-going component.

i.e.: The aim is to supply 1 teacher over establishment for each 30 children identified in schools as in need of specialised assistance.

Pre-apprenticeship Training Programs for Aboriginals

416 Mr ISAACS to MINISTER for EDUCATION

On what aspects of the establishment of pre-apprenticeship training programs for Aboriginals at the Community College of Central Australia will the $10,000 allocated be spent in 1981-82?

ANSWER

The $10,000 was included in the budget of the Community College of Central Australia to supplement funding provided by the Department of Employment and Youth Affairs to run the pre-employment course in automotive engineering for Aboriginal students. It will be used to purchase equipment supplementary to that provided through this Commonwealth funding.

Specific Purpose Payments for Multi-cultural Education Programs

417 Mr ISAACS to MINISTER for EDUCATION

In 1980-81 which schools received specific purpose payments for multi-cultural education programs? How much was allocated for each particular program and what was the nature of each program? What is the anticipated expenditure per school in 1981-82?

ANSWER

Allocation of moneys is administered by the Multicultural Education Co-ordinating Committee. Individual schools make applications for grants - therefore there is no expenditure per school as such.

$43,000 is available for distribution in the 1982 school year.

The following grants have been made to date:

NTMECC

GRANTS APPROVED

Date	Applications for Grant	Amount
17. 7.81	Darwin Primary School - Language materials	$ 2,000.00
	Moil Primary School - Language materials	$ 1,500.00
	Alawa Primary School - Language materials	$ 1,750.00
	Dripstone High School - Library materials	$ 2,000.00
	Holy Spirit School - Resource materials	$ 1,400.00
	Jingili Primary School - Language materials	$ 901.00
	St Mary's School - Resource materials	$ 1,000.00
	Oenpelli Literature Production Centre - Oral history recording	$ 1,500.00
	Casuarina High School - Library Materials	$ 800.00
	Secondary Intensive English Unit - History of ethnic groups	$ 1,000.00
	Nightcliff Primary School - Photographic prints	$ 200.00
	Bradshaw Primary School - Payment for film	$ 60.00
	Sub-Total (1)	$14,111.60
10. 2.81	Darwin High School - Language materials	$ 1,650.00
	St John's School - Language materials	$ 1,600.00
	Casuarina High School - Social and cultural resources	$ 1,270.00
	Nightcliff Primary School - Resource materials	$ 1,450.00
	Berry Springs Primary School - Language teaching and resource materials	$ 2,000.00
	Willowra School - Oral history and literature - Resource development	$ 2,000.00
	Papunya School - Oral history and literature - Resource development	$ 2,000.00
	Casuarina High School - Language materials	$ 1,430.00
	Sub-Total (2)	$13,400.00

16.10.80	St Therese's School - Natural science research	$ 850.00
17.10.80	St John's College - Language materials	$ 600.48
	Dripstone High School - Library grant	$ 1,000.00
	Casuarina High School - Resources to support interpreter/translator course	$ 5,008.00
	Yuendumu - Development of resource materials	$ 850.00
	Hodgson Downs - Resource materials	$ 600.00
	Katherine High School - Camping project re Aboriginal culture	$ 1,350.00
	Bradshaw Primary School - Language materials	$ 1,400.00
	Sub-Total (3)	$16,658.48

Sub-Total (1)	$ 14,111.00
Sub-Total (2)	$ 13,400.00
Sub-Total (3)	$ 16,658.48
	$ 44,169.48

Government Printing Office Apprenticeship Scheme

419 Mr ISAACS to MINISTER for TRANSPORT and WORKS

How many of the apprentices in the Government Printing Office apprenticeship scheme are female?

ANSWER

There are 9 apprentices currently employed at the Government Printing Office, all of which are male. However, during the recent Careers Week promotion, several female students expressed keen interest in possible job opportunities within the printing trade, in particular, the area of computerised typesetting.

Concessions to Pensioners

420 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

In view of his statement that only just over one-fifth of those pensioners eligible for concessions have used these, what action has he taken to justify the estimate that 3,000 pensioners will use those concessions in 1981-82?

ANSWER

The figure quoted in my Community Development budget papers was prepared some time ago and needs updating. As at 30 September 1981 approximately 3,300 people have utilised the concessions this year alone, and this number is gradually increasing.

No action was therefore required by me to justify the estimate that 3,000 pensioners would use the concessions in 1981-82.

Commonwealth Curriculum Centre

422 Mr ISAACS to MINISTER for EDUCATION

What provision is he making to ensure that the functions of the Commonwealth Curriculum Centre will be continued by the NT government in terms of curriculum development and teaching materials?

ANSWER

It is neither possible nor reasonable to expect the NT government to cover

adequately all the curriculum development and materials projects that were previously funded by the Curriculum Development Centre (CDC).

Projects which are continuing are:

1. Mathematics in Aboriginal Schools - the booklets in this series will now be produced in the NT and will be available for reproduction by state departments. Books 1 and 2 should be printed by January 1982.
2. Language Development Project - materials developed in this project will be printed by the NT Department of Education towards the end of 1982.
3. Learning Through the Historical Environment - this is funded by CDC until the end of 1982.
4. Oral English Tapes for Aboriginal Schools - this is funded by CDC until early 1982 and the NT Department of Education will produce and distribute those tapes developed by then.

Projects which cannot be continued because of cost are:

1. New Zealand Science Units - CDC was reprinting these in an adapted form for all Australian primary schools.
2. Leaps and Bounds - a project to assist the teaching of English in Aboriginal schools.
3. AMEP - the Australian Mathematics Education Project - a project aimed at improving mathematics education throughout Australia (still some possibility of continued CDC funding).

Commonwealth Schools Commission

423 Mr ISAACS to MINISTER for EDUCATION

How will the Northern Territory be affected by the reduction of the Commonwealth Schools Commission's direct involvement in program administration and information collection?

ANSWER

As the Schools Commission has not as yet made a clear statement of its policies in this regard, government is at present uncertain about the precise ramifications for the NT.

Aboriginal Camping Areas within Municipal Boundaries

424 Mr ISAACS to CHIEF MINISTER

1. Is it the intention of the government to make the regulation of camping areas within municipal boundaries the responsibility of the relevant municipal authority?
2. If so, will the government retain power to take positive action to better the conditions of Aborigines in those circumstances where an impasse is reached between the municipal authority and organisations representing Aboriginal interests?

ANSWER

I suggest this question be referred to the Minister for Community Development.

Collection of Data on Domestic Violence

425 Mr ISAACS to ATTORNEY-GENERAL

Has the government established any adequate system of data collection on domestic violence through the hospital, courts or police? If not, when does the government intend to do so? If so, could he provide details?

ANSWER

Statistics kept by police relate to offences known to have been committed, but do not record the background circumstances.

Any statistics gathered would be unlikely to reflect the true incidence of domestic violence due to the reluctance of some medical personnel and victims to identify and report such violence in a domestic environment.

A Child Protection Consultative Committee comprising the Departments of Health, Community Development, Education, Law and Police is being set up in an effort to achieve greater effectiveness in this area.

Public Service Interpreters

426 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

1. How many requests for interpreters are there per week?
2. Could he provide details of the number of requests each government department has made in the last 6 months? How do these figures compare with the previous 6 months period?
3. What has been the cost of contract interpreters, if any, for each department?
4. How often has each NTPS voluntary interpreter been used on average in the last 6 months?
5. Which are the language groups most in demand?
6. How often in the last 6 months have there been requests from the hospitals for interpreters?
7. How does the use of interpreters in Alice Springs compare with Darwin?

ANSWER

1. From 1 July 1980 to 30 June 1981 there were 122 interpreter requests and 124 translations, or almost 5 requests per week.
2. Almost all government departments and authorities have used the interpreter service. The main users during 1980-81 include:

Department/Authority	1.7.80 to 31.12.80	1.1.81 to 30.6.81
Law/Courts	9	6
Health	21	8
Education	-	16
Emergency Services	54	17
Police/Gaol	5	9
Information	1	5
Customs	3	6
Community Development	13	19
Tourist Bureau	1	4
Consumer Affairs	7	3
Ombudsman	8	7

   For the time period 1 July 1980 to 31 December 1980 there were 127 interpreter/translator requests and for 1 January 1981 to 30 June 1981 there were 119 users.
3. There is no cost for NTPS interpreters, however the user pays principle applies if an interpreter/translator is required from outside the public service.
4. On average each interpreter has been used 2-4 times during a 6 month period.

5. The language groups most frequently in demand are Greek, Chinese (Mandarin, Hakka, Hokkien, Cantonese), Yugoslav, Italian, Spanish, Portuguese, and German.

6. The hospitals have requested interpreting assistance on 5 occasions during the past 6 months.

7. Requests for interpreters in other centres including Alice Springs are handled on a telephone link-up or referred to the Resource and Settlement Centres located in each of the population centres in the Territory. The requests for interpreting/translating in Alice Springs are about 1/10th those of Darwin.

Pensioner Concessions to Interstate Pensioners

427 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

Has the government raised the matter of extending pensioner concessions to interstate pensioners visiting the Northern Territory? If so, what was the outcome?

ANSWER

Because of the short length of time most interstate pensioners would spend in the Northern Territory and the fact that the majority of concessions are of domestic type, the only concession that would apply would be bus travel.

The introduction of the Northern Territory Pension Concession Card was for the purpose of accurate identification of eligible persons and ease of entry for such persons to the full range of concessions available.

The administrative efficiency of this scheme would be prejudiced if other forms of identification are to be used for one of these benefits, namely the bus travel concession.

Ways of alleviating this problem are being considered. Implementation of the extension of the bus travel concession to interstate pensioners cannot take place until the problem of effective identification of eligible interstate pensioners has been overcome.

Department of Education Administrative Expenses

455 Mr ISAACS to MINISTER for EDUCATION

How was the allocation of $6,950,869 in administrative expenses of General Expenses in the Education Department expended in 1980-81?

ANSWER

Advertising	$	40,258
Communications	$	478,084
Consultants	$	34,489
General Services	$	61,001
General Equipment/Machines	$	129,790
Stores Stock	$	207,434
Legal Expenses		---
Library Services	$	185
Office Requisitions and Stationery	$	115,018
Printing and Publications	$	87,634
Regulatory and Advisory Services	$	47,930
Recruitment Costs	$	432,725
Relocation Expenses	$	196,200
Study	$	68,176
Freight	$	345,467
Transport	$	423,157

Travel and Subsistence	$	9,651
Workers Compensation	$	54,716
Payroll Tax	$	2,388,579
Incidentals and Other	$	90,609
Recreation Leave Fares	$	872,329
Furniture	$	620,650
National and International	$	6,708
Remote Local. Fares	$	32,713
Inservice	$	181,493
Medical Fares	$	3,850
Assess Fares	$	10,512
ACER Survey	$	4,506
RTM Emergency Advances	$	7,000
TOTAL	$	6,950,864

The difference of $5 is caused by rounding of figures.

Department of Education Administrative Expenses

456 Mr ISAACS to MINISTER for EDUCATION

1. How is the extra $290,216 for administrative expenses in Management Services of the Education Department to be spent in 1981-82?

2. How is the additional $367,150 for administrative expenses in educational facilities to be spent in 1981-82?

ANSWER

The information pertaining to both questions is a matter of public record associated with budget paper No. 4 1981-82. Please refer to pages 8 and 9 of the Department of Education Explanatory Notes.

Housing Commission Rental Rebates

460 Mr ISAACS to MINISTER for LANDS and HOUSING

What is the general formula used for deciding eligibility for a rental rebate?

ANSWER

To be eligible for rental rebate you must be the legal tenant, personally occupy the dwelling, be paying rent, and satisfy a means test.

This means test is calculated on gross family income which includes the tenant, the tenant's spouse, and any other person over 16 years of age who resides with the applicant.

Gross income does not include educational allowances paid in respect of school studies, family allowances, maternity allowances, domiciliary nursing care benefits or allowances from Legacy.

Public Trustee Functions

461 Mr MacFARLANE to ATTORNEY-GENERAL

In what way is the public being informed about facilities established for community benefit under (a) Public Trustee functions, and (b) standard will forms?

ANSWER

Copies of the pamphlet outlining the function of the Public Trustee are available at all Court offices within the Northern Territory. There is

to date no direct active advertising by means of newspapers, television or radio. However the Attorney-General has recently, at the request of the Public Trustee, indicated that modest advertising of the will-making service may be undertaken.

I am told by the Public Trustee that such advertising will consist of occasional advertisements in local press.

Generally people are aware of the service provided by the Public Trustee by word of mouth.

Tracker Dogs

462 Mr MacFARLANE to ATTORNEY-GENERAL

Would tracker dogs have been of assistance in the search for Warun on Howard Island?

ANSWER

In some circumstances tracker dogs can offer valuable assistance to searches for missing persons in bush areas. Ideally, the dogs should be at the scene within 2 hours to give them a chance to pick up a scent. In the Howard Island search the police were not able to arrive at the scene until 24 hours after Warrun was found to be missing. A number of Aboriginals in this period had been looking for the child in the search area and it was no longer sterile. Due to these circumstances the use of tracker dogs would have had limited value.

Grants for Handicapped Children

465 Mr ISAACS to MINISTER for EDUCATION

$44,000 is to be allocated as a specific purpose grant to integrate handicapped children into regular schools and to provide educational opportunities and support for severely handicapped children living at home or in institutions -

(a) to whom are the specific purpose grants to be allocated; and

(b) how many handicapped children in each of the categories mentioned will receive assistance and in what way is the support to be provided?

ANSWER

All Schools Commissions moneys including specific purpose grants are allocated on a calendar year basis which means that such moneys cut across 2 departmental budget periods which are based on a financial year.

The $44,000 quoted includes a known factor of $31,500 for 1981 while the balance represents a guestimate of expected expenditure on both programs for the first half of 1982. (Amounts for 1981 are subject to quarterly indexation, and the figures quoted are the last known allocations).

Programs for 1982 cannot be approved until such time as the Federal Parliament passes the Appropriation Bills.

Moneys allocated to date are:

(i) Integration of Handicapped Children Program

$10,500 - Construction of and equipment for a Visually Impaired Unit at Tiwi Primary School. (Catering for 6 children).

(ii) Severely Handicapped Program

$ 4,000 - Playground equipment for NT Spastic Centre. (Catering for 20 children).

$17,000 - Employment of 1 therapist and 2 aides on a part-time basis to assist run an educational program in hospital wards in Darwin for children living there on a long-term basis.

Camping Areas within Municipalities

467 Mr ISAACS to MINISTER for COMMUNITY DEVELOPMENT

1. Is it the intention of the government to make the regulation of camping areas within municipal boundaries the responsibility of the relevant municipal authority?

2. If so, will the government retain power to take positive action to better the conditions of Aborigines in those circumstances where an impasse is reached between the municipal authority and organisations representing Aboriginal interests?

ANSWER

1. The Northern Territory government has already decided that the responsibility for the regulation of camping areas within municipal boundaries rests with the relevant municipal authority.

2. The question asked is vague, the government as well as organisations like the Aboriginal Development Commission have the power to fund improvements on leases granted to Aboriginal organisations for camping purposes.

PART II

THE QUESTION PAPER

An index to questions appears at the end of Part II.

Numerical references are to Question Paper page numbers.

An asterisk preceding an entry in the index indicates that an answer has not yet been received.

NOTICE GIVEN ON DATE SHOWN

From 18 November 1980

Government Assistance for Tradesmen to Visit Remote Areas

44 Mr MacFARLANE to MINISTER for LANDS and HOUSING

What assistance will the government provide to enable electrical, plumbing and building tradesmen and inspectors to visit remote centres such as Borroloola to assist home owners?

From 24 February 1981

Katherine Electricity Supply

133 Mr MacFARLANE to MINISTER for MINES and ENERGY

Will electricity to be reticulated to the new water supply at Donkey Camp near Katherine be extended to cater for consumers and future subdivisions on the Gorge road, and to Katherine Gorge?

From 2 June 1981

Interest Rate on Loan to Northern Meat Exporters Pty Ltd

195 Mr MacFARLANE to TREASURER

What rate of interest is being charged on the $1.4m special assistance loan granted to Northern Meat Exporters Pty Ltd?

From 9 June 1981

Aboriginal and Islander Medical Service

198 Mr B. COLLINS to MINISTER for HEALTH

1. What is the present staffing of the Aboriginal and Islander Medical Centre? Are there plans to increase the staffing levels and, if so, what positions?
2. What are the functions and duties of the Aboriginal and Islander Medical Service?
3. During the 6 months to 31 May 1981, (a) how many Aboriginals have been treated per week by AIMS, (b) what are the major categories of illness, and (c) where do the Aboriginals, in the main, come from?
4. How many Aboriginal liaison officers are attached to Casuarina Hospital; what hours do they work; and are there plans to increase the numbers?
5. Are any Aboriginal liaison officers to be employed at Darwin Hospital?

Students Assistance

201 Mr B. COLLINS to MINISTER for EDUCATION

How many students in the Northern Territory are, (a) receiving assistance under the Tertiary Education Assistance Scheme, and (b) how many are in receipt of the full allowance?

From 18 August 1981

Rape in Southern Region

210 Mr BELL to CHIEF MINISTER

1. (a) How many rapes have been reported in the Southern Command region since 1 July 1980 to 10 June 1981, (b) how many have resulted in

charges being laid, (c) what is the state of these charges, and (d) have any reports of rape been false?

2. What facilities and resources are available for the psychological counselling of women raped in (a) the Alice Springs region, and (b) the Tennant Creek region?

3. Has he received any representations from women's organisations regarding the level of rape counselling services in the Territory?

4. If so, (a) what organisations have made representations, (b) what has been the basis of these representations, and (c) what has been his response?

Darwin Hospital Pathology Laboratory

224 Mr B. COLLINS to MINISTER for HEALTH

1. Can he inform me as to the fate of the pathology laboratory at the Darwin Hospital?

2. Has he considered the future of the laboratory in the light of a lack of such scientific facilities in the Department of Primary Production?

Security for Belongings of Hospital Patients

225 Mrs O'NEIL to MINISTER for HEALTH

What arrangements are made to ensure the security of the belongings of hospital patients, for example psychiatric and geriatric patients, who are unable to care for themselves?

Incidence of Tuberculosis in 1979-80

241 Mr MacFARLANE to MINISTER for HEALTH

1. What was the incidence of tuberculosis in 1979-80 in (a) Australia, and (b) the Northern Territory?

2. Is his department undertaking any program to eradicate tuberculosis in humans similar to the program being undertaken to eradicate tuberculosis and brucellosis in cattle?

From 19 August 1981

St Vidgeon Station and Eva Valley Station

346 Mr MacFARLANE to MINISTER for LANDS and HOUSING

1. What is the future of St Vidgeon Station where Aboriginals are building stock yards, etc.?

2. What is the future of Eva Valley Station?

From 24 November 1981

Sexual Assault Cases

379 Mr BELL to MINISTER for HEALTH

How many sexual assault cases have been seen at the major Territory hospitals in (a) 1980-81, and (b) 1979-80?

Interpreter Service for Aborigines

469 Mr B. COLLINS to CHIEF MINISTER

1. What action does the government intend taking in response to the working party's report on the need for Aboriginal interpreter services in the NT?

2. If such services are to be established, what will be (a) their nature, (b) their funding, and (c) anticipated commencement date?

Department of Community Development - Counselling

475 Mr B. COLLINS for MINISTER for COMMUNITY DEVELOPMENT

1. How many officers are involved in counselling in the Department of Community Development?
2. What are the qualifications of the officers?
3. What is (a) the average baseload, and (b) the average number of clients seen per week by each counsellor?
4. What percentage of the clients are Aboriginal?

Emergency Overnight Accommodation for Females

476 Mr B. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

1. Is the government aware of the need for emergency overnight accommodation for females in the NT?
2. Does the government intend to provide subsidies to willing organisations such as the Salvation Army and the St Vincent de Paul Society who have corresponded with the government on such a service and, if so, when?

Aboriginal Camping Area in Katherine

477 Mr MacFARLANE to MINISTER for COMMUNITY DEVELOPMENT

Is the government aware of and does it agree with the decision of the Katherine Corporation to allow Aborigines to set up a camping area in Katherine, despite the existence of Kalano Farm and the Corroboree Motel?

Prawning Licences

493 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

1. How many prawning licences were granted by the Department of Primary Production in 1979-80 and 1980-81?
2. How many prawning licences were in existence as at 30 June (a) 1978, (b) 1979, (c) 1980, and (d) 1981?

NTDC Loans

494 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

1. How many applications for Northern Territory Development Corporation loans were received from the agricultural and horticultural industries in (a) 1979-80, and (b) 1980-81?
2. How many applications were successful and for what activities were loans granted?
3. What was the average repayment period associated with loans granted?
4. Were any interest or repayment holidays granted on any loans to the rural sector?

From 1 December 1981

Detoxification Centres

499 Mr B. COLLINS to MINISTER for HEALTH

1. Does the government support the establishment of detoxification centres, pick-up services and halfway houses for the Northern Territory?

2. What is the government's attitude to the introduction of a concessional differential on low alcohol beer?

Liquor Campaign

500 Mr B. COLLINS to MINISTER for HEALTH

1. How much is being spent on the 'Boozers are Losers' campaign?
2. For what reason was the contract awarded to a southern firm?
3. Has any contact been made with the liquor industry with a view to controlling the nature of liquor advertising?

Darwin Central Community Health Centre

503 Mr B. COLLINS to MINISTER for HEALTH

Is the government considering relocating the Darwin Central Community Health Centre and, if so, where is it to be located and for what reasons?

Chest X-rays - National Tuberculosis Act 1948

504 Mr B. COLLINS to MINISTER for HEALTH

Since the introduction of the 'user pays' medical and health charges on 1 September 1981, (a) what arrangements have been made by his department under the National Tuberculosis Act 1948 for the general public to have chest x-rays at no charge at general hospitals throughout the NT, and (b) if arrangements have been made will they be advertised in the media throughout the Northern Territory?

Attendance Figures at Oupatients

505 Mr B. COLLINS to MINISTER for HEALTH

1. From 1 September to 31 October 1981, how many people (a) who attended outpatients departments in NT hospitals, and (b) who were hospitalised, were (i) insured, (ii) uninsured, or (iii) held disadvantaged and PHB cards?
2. How do those figures compare with those for the same period during 1980?
3. What was the percentage of Aboriginals in each of those categories?

Non-urgent Outpatients Treatment

506 Mr B. COLLINS to MINISTER for HEALTH

How many people wanting non-urgent treatment at outpatients departments in NT hospitals have not been seen because they have not had the necessary fee since 1 September 1981?

Anti-depressant Medication

507 Mr B. COLLINS to MINISTER for HEALTH

1. Are patients in NT hospitals who are not suffering from a psychosis prescribed anti-depressant medication without their knowledge and consent? If so, under what conditions?
2. How many (a) inpatients, and (b) outpatients were prescribed anti-depressant medication during 1980-81?

Allocations to Community Health Centres

508 Mr B. COLLINS to MINISTER for HEALTH

1. How much is he allocating from the Commonwealth's general revenue fund of $20.6 million to community health centres, hospitals and school dental services for each hospital and community health centre?
2. How much is the NT government allocating to these areas in 1981-82, for each community health centre, hospital and school dental service?
3. What was expended under these headings in 1980-81?

Drug Education Programs in NT

509 Mr B. COLLINS to MINISTER for HEALTH

What are the drug education programs to be conducted in the Northern Territory during 1981-82?

Commonwealth Health Grants

510 Mr B. COLLINS to MINISTER for HEALTH

1. Has the Commonwealth provided $9 million for health planning and research in the form of grants to the states and the Northern Territory (on a $1 for $1 basis) and to institutions and persons?
2. If so, (a) how much has been allocated to the Northern Territory, and (b) for what purposes?

Guidelines for Grants-in-Aid

511 Mr B. COLLINS to MINISTER for HEALTH

What action has been taken to correct the following unsatisfactory controls relating to grants-in-aid commented upon by the Auditor-General in 1978-79 and found to be still unsatisfactory in 1980:

(a) inadequacies in the promulgated conditions for grants;

(b) the absence of reference to formal acceptance of the conditions and purpose of grants;

(c) the legal entity of grantees;

(d) the withholding of moneys for non-compliance with grant conditions;

(e) the lack of current formalized departmental procedures and guidelines covering functional responsibilities and criteria for the evaluation of grant applications and the monitoring of performance of grantees; and

(f) the apparent absence of follow-up action by his department in certain instances where it is not evident that grantees had complied with the conditions of grants?

Collia Tin Mine

512 Mr B. COLLINS to MINISTER for MINES and ENERGY

As a number of people have lost their savings in the Collia tin mine affair,

(a) what detailed action has been taken by the Department of Mines to settle the matter;

(b) how much money has been lost by people involved;

(c) how much did Mr Ken Day receive for the tin he mined from Collia;

(d) why has he not explained in the Legislative Assembly what action the government has taken;

(e) did the Department of Law recommend that anybody be charged over the affair and, if so, why was not that recommended action proceeded with;

(f) was the government's lack of action coloured by the fact that Mr Day was once the head of the Progress Party, whose votes had helped the Country Liberal Party;

(g) what is now being done about the matter; and

(h) are police trying to contact the previous leaseholder who disappeared and, if so, do they know in which state he is residing?

Public Housing in NT - Applications

513 Mr B. COLLINS to MINISTER for LANDS and HOUSING

1. How many applications for general public housing were received during (a) 1979-80, and (b) 1980-81; and how many applications were outstanding at (c) 1 July 1980, and (d) 1 July 1981 in (i) Darwin, (ii) Alice Springs, (iii) Tennant Creek, (iv) Katherine, (v) Nhulunbuy, and (vi) Pine Creek?

2. How many outstanding applications were there for general public housing (a) at 1 July 1980, and (b) at 25 June 1981?

3. How many applications for general public housing were received in the financial years (a) 1979-80, and (b) 1980-81?

4. How many applications for general public housing were cancelled in the financial years (a) 1979-80, and (b) 1980-81?

5. How many tenants were accommodated in the financial years (a) 1979-80, and (b) 1980-81?

Expenditure on Aids to Disabled People

516 Mr B. COLLINS to MINISTER for HEALTH

Will he ascertain and advise how the funds were spent in 1980-81 which the Commonwealth provided for aids to disabled people who were not eligible under Commonwealth-state programs?

Internal Reviews of Health Department

517 Mr B. COLLINS to MINISTER for HEALTH

1. He stated during the June 1981 sittings that his department had reviews taking place on all aspects of medical services offered to the public, and referred to an internal review of community health services. What were the details and outcome of this review?

2. In regard to other internal reviews conducted during the past year, (a) in which areas were they conducted, (b) who have the committees comprised of, (c) how many times have they met, and (d) what has been the outcome of these reviews?

3. How many internal reviews are being conducted at the moment?

Applications to Health Department for Grants-in-Aid

519 Mr B. COLLINS to MINISTER for HEALTH

How many (a) applications for grants-in-aid were lodged for 1981-82, and (b) which organisations were unsuccessful?

Variations Between Bed Costs in NT Hospitals

520 Mr B. COLLINS to MINISTER for HEALTH

Why do the bed costs in NT hospitals vary between $78 and $254, and where does this variation occur?

Staff Reductions at Casuarina Hospital

523 Mr B. COLLINS to MINISTER for HEALTH

1. Which staff organisations at the Casuarina Hospital have agreed to staff reductions affecting their memberships?
2. In which areas have staff reduction already been effected?
3. How many people have been affected to date?

Report on Nursing and Administration of Medicine

527 Mr B. COLLINS to MINISTER for HEALTH

When does he expect the report on manpower requirements for nursing and the administration of medicine to be completed?

Separate Facilities at Casuarina Hospital

529 Mr B. COLLINS to MINISTER for HEALTH

1. Has he rejected his working party recommendations to erect separate facilities at Casuarina Hospital for psychiatric, handicapped and geriatric patients?
2. If so, why?
3. If not, has any money been allocated for their establishment in 1981-82, and when does he expect such facilities to be operational?

Nursing Home Care

530 Mr B. COLLINS to MINISTER for HEALTH

1. How many elderly patients does he anticipate are in need of nursing home care?
2. How many are Aborigines?
3. Are there any plans to establish separate facilities for the elderly Aborigines?

Disadvantaged Cards

532 Mr B. COLLINS to MINISTER for HEALTH

How many people does he estimate could be classified as disadvantaged who have not yet received a disadvantaged card and what percentage of these are Aborigines?

Psychiatric Services

533 Mr B. COLLINS to MINISTER for HEALTH

1. What is the overall strategy of the government to improve psychiatric services?
2. What are seen as the main priorities?

Psychiatric Services

534 Mr B. COLLINS to MINISTER for HEALTH

1. For what reason is psychiatric services included in the general administrative expenditure for health services?

2. For what reason has the level of funding for psychiatric services been reduced from $510,000 to $475,000? Where will this cut be felt?

Health Funding

535 Mr B. COLLINS to MINISTER for HEALTH

1. When does he expect to re-examine the Territory revenue raising capacity with the Commonwealth Minister for Health?

2. Is he compiling the necessary statistics, previously not available, to strengthen our case for additional Commonwealth funding? If so, what do these statistics comprise?

Transfer of Psychiatric Patients to South Australia

537 Mr B. COLLINS to MINISTER for HEALTH

1. How much was spent in 1980-81 on the transfer of psychiatric patients to South Australia?

2. How many were transferred?

3. What was the average length of stay per patient?

4. When does the NT government expect to provide suitable secure premises for chronic patients in the Northern Territory?

Doctor-Patient Ratios in NT

538 Mr B. COLLINS to MINISTER for HEALTH

1. What is the current ratio of doctors per patient at each hospital in the NT?

2. What are the duty rosters of doctors and nurses? How does this compare with last year?

3. Is the percentage that salaried doctors can earn on top of their income to be increased from 25%? If so, to what level?

Staffing Levels in NT Hospitals

541 Mr B. COLLINS to MINISTER for HEALTH

Where does he expect staffing levels in Territory hospitals to be reduced and by how many and when?

Yipirinya School in Alice Springs

545 Mr B. COLLINS to MINISTER for EDUCATION

What action, if any, has been taken by the Department of Education on the application for registration of the Yipirinya School in Alice Springs?

Aboriginal Teaching Assistants

546 Mr B. COLLINS to MINISTER for EDUCATION

How many Aboriginal teaching assistants are expected to be employed in 1981-82 and at which homeland centres?

Litter Campaign

547 Mr B. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

1. How much was spent on the anti-litter campaign?
2. Why was the contract for the campaign awarded to a southern firm?

From 9 March 1982

Hospital Treatment of Cases of Domestic Violence

549 Mrs O'NEIL to MINISTER for HEALTH

1. When a woman presents to a NT hospital with injuries or illness which she identifies as being caused by domestic violence, what procedures does the hospital follow?
2. What mechanism does the hospital have to ensure the victim is referred to other assistance she may require?
3. In the past 12 months, what number and percentage of (a) outpatients attendances, and (b) inpatient stays were related to domestic violence?

Child Protection Consultative Committee

550 Mr B. COLLINS to ATTORNEY-GENERAL

1. Has the Child Protection Consultative Committee yet been established?
2. If so, has it begun collecting statistics on the incidence of domestic violence?
3. Is any other agency collecting similar data relating to domestic violence affecting adults?

Douglas-Daly and Upper Adelaide River Experimental Stations

553 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION

What hectarage of Douglas-Daly Experimental Station and Upper Adelaide River Experimental Station have been transferred from the Department of Primary Production to the Agricultural Development and Marketing Authority?

'Fellow Territorians' Circular

564 Mr BELL to CHIEF MINISTER

What was the cost of a circular letter dated October 1981, addressed to 'Fellow Territorians' and signed by the Chief Minister?

Bilingual Education Programs

576 Mr BELL to MINISTER for EDUCATION

Will staff numbers in bilingual education programs in schools in the southern directorate be maintained next year?

Molyhill Mine in Central Australia

592 Mr BELL to MINISTER for MINES and ENERGY

1. Have officers from the inspection and safety section visited the Molyhill mine in central Australia recently?
2. If so, what were their comments and recommendations regarding dust suppression and the use of cyanide?
3. Were copies of the officers' report made available to Molyhill employees and, if not, why not?

Aboriginal Health Workers

593 Mr BELL to MINISTER for HEALTH

Does his department have a policy of employing Aboriginal health workers on mobile rural health teams and, if not, why not?

Rapid Creek Water Gardens Project

596 Mr SMITH to MINISTER for TRANSPORT and WORKS

Given that the Rapid Creek water gardens project already has 2 signs, 1 being a conventional Transport and Works sign and the other a pictorial representation of what the gardens will look like, what was (a) the purpose of erecting a third much larger sign identifying the project, and (b) what was the cost of the third sign?

Superannuation Salary Deductions for NT Public Servants

601 Mr SMITH to TREASURER

1. What amount has been deducted from the salaries of NT government employees for superannuation purposes since 1 July 1978?
2. What amount has been forwarded by the NT government to the Commonwealth Superannuation Fund Investment Trust Account since 1 July 1978?
3. How much of the total amount deducted from employees' salaries for superannuation in the NT since 1 July 1978, has (a) been kept in the NT, (b) to what purpose has it been put, and (c) what rates of interest have been earned on this money?

Brucellosis and Tuberculosis Eradication Campaign

607 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION

What action will his department take to provide grids on public roads to assist control of cattle during the TB and brucellosis eradication campaign?

Electricity Supply Around Katherine

609 Mr MacFARLANE to TREASURER

What progress is being made towards providing electricity to (a) Katherine Gorge, (b) the 15-mile Farm (KREC), and (c) the low-level area and rural development?

Geoffrey Peter Bellenger

611 Mr MacFARLANE to CHIEF MINISTER

1. Has his attention been drawn to the hardship suffered by Geoffrey Peter Bellenger, who was injured by a truck on a pedestrian crossing in Alice Springs on 23 May 1975 and who has not yet received any compensation for his injuries or costs?
2. Was the driver of the truck involved in the incident charged with any offence?
3. Is any of the almost 7 years delay between the injury and compensation attributable to any shortcoming or congestion in Northern Territory courts?

Liaison between Government Departments

618 Mr MacFARLANE to MINISTER for LANDS and HOUSING

Is there liaison between the Department of Lands, other departments and statutory bodies such as Telecom on the provision of services such as electricity, water, sewerage and telephones for new private or government subdivisions?

Katherine Town Boundaries

619 Mr MacFARLANE to MINISTER for COMMUNITY DEVELOPMENT

1. Has the Katherine Municipal Council applied to have the town boundaries extended?
2. If so, (a) has the application been made as a result of any government action, and (b) what benefits would be expected to flow from an extension of the town boundaries?

Fire Fighting Equipment in Elsey Electorate

621 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

1. What fire fighting equipment is available at (a) Mataranka, (b) Beswick, (c) Bamyili, (d) Numbulwar, and (e) Ngukurr?
2. Are residents in these centres recruited to form volunteer fire brigades?

ILO Conventions

622 Mr B. COLLINS to CHIEF MINISTER

1. Is he aware that the Minister for Industrial Relations informed the Leader of the Opposition in the House of Representatives on 18 November 1981 (H. of R. Hansard, p.3098) that on 26 May and 3 June 1977 the Northern Territory indicated by letter that in its view the Aboriginal population of the Territory does not constitute a dependent, indigenous population for the purposes of International Labour Organisation Convention No. 65, Penal Sanctions (Indigenous Workers) 1939?
2. Who wrote the letter and on what date and by what means did the Northern Territory government authorise it?
3. Is he aware that a former Commonwealth Minister for Employment and Industrial Relations informed the former Leader of the Opposition in the House of Representatives on 4 October 1977 (H. of R. Hansard, p.1607) that a review instituted by his department in April 1977 had revealed inconsistencies between provisions in the Northern Territory Apprentices Ordinance and the ILO convention?

Standards Set by ILO Conventions

623 Mr B. COLLINS to CHIEF MINISTER

1. In what respects do the laws and practices of the Northern Territory fall short of the standards set by those International Labour Organisation conventions which the ILO lists as basic human rights conventions but which Australia has not yet ratified, viz:
   (a) No. 135 - Workers' Representatives, 1971;
   (b) No. 141 - Rural Workers' Organisations, 1976;
   (c) No. 151 - Labour Relations (Public Service), 1978; and
   (d) No. 156 - Workers with Family Responsibilities, 1981?
2. What views has the NT government expressed to the Commonwealth government

on the provisions of each of these conventions?

3. On (a) what occasions, (b) in what circumstances, (c) at what level, and (d) with what results have consultations taken place between the NT and Commonwealth governments concerning each of these conventions?

ILO Convention on Civil and Political Rights

624 Mr B. COLLINS to ATTORNEY-GENERAL

1. In what respects do the laws and practices of the Northern Territory fall short of the standards set by the 1966 ILO Convention on Civil and Political Rights which Australia signed in December 1972 and ratified in August 1980?

2. What views has the Territory government expressed to the Commonwealth government on the provisions of this convention since it entered into force in March 1976?

3. On (a) what occasions, (b) in what circumstances, (c) at what level, and (d) with what results have discussions or consultations taken place between the Territory and Commonwealth governments concerning this convention?

Convention on Elimination of Discrimination Against Women

625 Mr B. COLLINS to ATTORNEY-GENERAL

1. In what respects do the laws and practices of the Northern Territory fall short of the standards set by the 1980 Convention on Elimination of all Forms of Discrimination against Women?

2. What views has the Northern Territory government expressed to the Commonwealth government on the provisions of the convention?

3. On (a) what occasions, (b) in what circumstances, (c) at what level, and (d) with what results have consultations taken place between the NT and Commonwealth governments concerning the ratification of the convention?

Juvenile Crime in NT

626 Mr SMITH to MINISTER for COMMUNITY DEVELOPMENT

1. Has there been an increase in the incidence of juvenile crime in the Northern Territory?

2. If so, (a) can he provide figures to demonstrate this increase, (b) what are the causes of this increase, (c) what action is to be taken to rectify the situation, and (d) what are the main offences being committed?

3. What is the average age of juvenile offenders?

4. (a) How many juvenile inmates are in NT institutions and how does this figure compare with that for the same period last year? (b) What is the average length of stay for a juvenile inmate?

Groote Eylandt Aboriginal Trust Account

627 Mr MacFARLANE to CHIEF MINISTER

1. Is it a fact that Aborigines on Groote Eylandt have a trust account of $4m yielding more than $400,000 per annum interest?

2. Are these Territorians subject to a means test for social service benefits?

Payments under the Criminal Injuries (Compensation) Act

629 Mrs O'NEIL to CHIEF MINISTER

In 1981, (a) how many payments, and (b) in what amounts, were made under the Criminal Injuries (Compensation) Act?

Department of Health Debt Collectors

630 Mrs O'NEIL to MINISTER for HEALTH

1. Has the Department of Health arranged contracts with debt collectors?
2. If so, which debt collecting firms have been contracted to serve each hospital or departmental administrative area?
3. In the case of each of the Territory's 5 hospitals, (a) what is the designation of the officer who makes the decision to use the debt collecting service to obtain payment of outstanding accounts, (b) in how many cases of failure to pay has the debt collection service been used to recover funds, and (c) how much money has been so recovered?

Hospital Payments by Instalments Scheme

631 Mrs O'NEIL to MINISTER for HEALTH

1. How many patients who have received treatment at a Territory hospital or community health centre have elected to pay through an instalments scheme?
2. Are departmental staff instructed to offer a payment by instalments scheme to patients who cannot settle their accounts in a lump sum?

Staffing in Territory Hospitals

632 Mrs O'NEIL to MINISTER for HEALTH

How many extra staff have been employed at (i) Darwin Hospital, (ii) Alice Springs Hospital, (iii) Katherine Hospital, (iv) Tennant Creek Hospital, and (v) Gove District Hospital to perform extra clerical and cashier duties associated with the new funding arrangements?

Psychiatric Inpatients

633 Mrs O'NEIL to MINISTER for HEALTH

1. What is the rate of readmission of psychiatric inpatients (a) voluntarily, and (b) involuntarily under the Mental Health Act?
2. What is the average length of stay in hospital for (a) voluntary, and (b) involuntary patients?
3. Are persons who are involuntarily detained required to pay hospital fees?
4. How many patients are currently involuntarily detained?

Public Servants

635 Mr MacFARLANE to CHIEF MINISTER

How many (a) Commonwealth, and (b) NT public servants were employed in the NT on 31 January 1982?

School Leavers Entering Apprenticeships

636 Mr MacFARLANE to MINISTER for EDUCATION

1. Is he aware of the problems that school leavers, particularly those

not living with their parents, face when entering apprenticeships?

2. If so, what does the NT government do or intend doing to enable such disadvantaged youths to enjoy equality with their peers?

Beef Tenderising Techniques

637 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION

Is he or his department promoting tenderising techniques such as tender stretch and electrical rectal stimulation to make Territory beef acceptable to Darwin housewives?

From 16 March 1982

Hospital Costs, Katherine

638 Mr MacFARLANE to MINISTER for HEALTH

1. During (a) 1979-80, and (b) 1980-81, (i) what did it cost to operate Katherine Hospital, and (ii) what was the bed occupancy rate?

2. What is the estimated cost of operating Katherine Hospital for 12 months with a bed occupancy rate of 85%?

Motor Vehicle Accidents

639 Mr MacFARLANE to CHIEF MINISTER

Does the NT Police Force keep separate figures on motor vehicle accidents involving (a) Territory residents, (b) tourists, (c) Aboriginal Territory residents, and (d) non-Aboriginal Territory residents?

Male Public Servants

640 Mr B. COLLINS to CHIEF MINISTER

As at 30 April 1981, what was (a) the average male earnings in the Northern Territory Public Service, and (b) what were the numbers and levels of the males?

Aboriginal Community Work Program

641 Mr B. COLLINS to CHIEF MINISTER

1. The Northern Territory government initiated the Aboriginal Community Work Program for a pilot period of 3 years, which was to conclude in January 1982. Has this occurred?

2. Has a report been compiled for consideration by the government agency reviewing the program?

3. If so, when is it anticipated that the government will table this report?

Pine Creek Hall

642 Mr B. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

1. How much money (a) has been allocated for the Pine Creek Hall, (b) how much was actually spent, and (c) what happened to any moneys left over during the financial years (i) 1974-75, (ii) 1975-76, (iii) 1976-77, (iv) 1977-78, (v) 1978-79, (vi) 1979-80, and (vii) 1980-81?

2. Has there ever been an audit of the Pine Creek Hall trust account? If so, where can a copy be procured?

3. If the answer to 2. is no, why has not there been an audit?

4. Who were the trustees of the hall as at 16 December 1981?

NTEC Employees - Remuneration and Benefits

643 Mrs LAWRIE to TREASURER

Which NTEC employees are (a) paid remuneration and or salaries other than at NTEC award rate, (b) what are the salaries paid in these cases, and (c) what other benefits do these people receive by way of, (i) exclusive use of high standard motor vehicles, (ii) credit cards, and (iii) expense accounts?

NTEC Employees - Award Negotiations

644 Mrs LAWRIE to TREASURER

1. Were negotiations for a new NTEC employees award conducted on 30 November 1981, 1 December 1981 and 2 December 1981 at the Travelodge and other places?
2. If so, (a) during the course of these negotiations was a food and drink bill for entertainment on the evening of 30 November 1981 signed in the name of an Assistant General Manager, who was not present, by another person, and (b) what was the amount of the bill?
3. What are (a) the details of all interstate trips made by the Assistant General Manager (Industrial) of NTEC during 1981, (b) the reasons that made each trip necessary, and (c) were any of the trips made for the purpose only of picking up consent judgments of an industrial tribunal?

Motor Vehicles - NTEC

645 Mrs LAWRIE to TREASURER

1. How many motor vehicles are (a) owned by NTEC, (b) what classes of vehicles are they, and (c) in what numbers?
2. To which designations of NTEC employees are these vehicles allocated and allowed to be driven to and from work?
3. Is it a fact that a lawyer retained by NTEC has an NTEC vehicle assigned to him for his personal use?

Grants-in-Aid, 1980-81

646 Mr SMITH to MINISTER for YOUTH, SPORT and RECREATION

1. In 1980-81, under the Grants-in-Aid scheme to voluntary community organisations working in the youth, sport and recreation field, how much money was given to these organisations for (a) administration, (b) equipment, (c) facilities, (d) salary subsidies, (e) special projects, (f) training-coaching, and (g) travel subsidies?
2. How much money under the Grants-in-Aid scheme was given to community service organisations in 1980-81?

Mung Beans, ADMA Markets

647 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION

1. Has ADMA yet established firm export markets for mung beans to be purchased by the authority this season?
2. If so, where are these markets?
3. What progress is being made with the ADMA market strategy generally?

Computers, Department of Education

648 Mr B. COLLINS to MINISTER for EDUCATION

1. Did the Department of Education hire Price Waterhouse to draw up a report on its use of computers at all levels?

2. If so, (a) when was the report given to the department, (b) is it available for scrutiny, and (c) is it true that the department has 14 different types of word processors?

Houses, Darwin City Council

649 Mr VALE to MINISTER for LANDS and HOUSING

Is he aware of (a) the number of houses owned by the Corporation of the City of Darwin, and (b) to what use these houses are put?

Koolpinyah Pastoral Lease

650 Mr DOOLAN to MINISTER for PRIMARY PRODUCTION

1. Does the government intend to accept part of Koolpinyah lease in exchange for granting Koolpinyah management an additional lease?

2. If so, what is (a) the location and area of land Koolpinyah is to relinquish to the government and, (b) the location and area of the new land to be released to Koolpinyah?

Koolpinyah Boundaries

651 Mrs LAWRIE to MINISTER for PRIMARY PRODUCTION

I refer to the proposed 'Rationalisation of boundaries for Koolpinyah' and ask: Is it a fact that both the Department of Primary Production and the Agricultural Development and Marketing Authority recommended against the proposed re-drawing of the boundaries and, if so, on what information did Cabinet agree on 22 December 1981 to accept in principle the proposed re-drawing of the boundaries?

Elsey and Hodgson Downs Pastoral Leases

126 Mr MacFARLANE to CHIEF MINISTER

1. What efforts are being made to have land excised from Elsey and Hodgson Downs pastoral leases for use as community areas for Aborigines?

2. Is the government's failure to obtain such excisions frustrating provision of essential services such as septic systems, power supplies, airstrips and housing?

ANSWER

1. The area sought by the Aboriginals of Elsey Station has been surveyed and negotiations for a surrender by the lessees are currently proceeding. Reactions by the lessees in respect of contentious issues have been such as to give optimism that a satisfactory resolution is possible in the foreseeable future.

   In respect of Hodgson Downs, negotiations for an excision have been underway since 1974. However, the lessees are understood to be no longer in favour of an excision but would be more inclined to consider a sub-leasing arrangement. There is also a problem in respect of locating a suitable water supply and the community may need to consider an alternative site. Negotiations are to be pursued.

2. In that the granting of excisions is at the option of the lessee it can hardly be regarded as a failure on the part of government that such excisions have not yet been achieved. Both the Department of Aboriginal Affairs, which continues to carry the primary responsibility for the development of Aboriginal communities on pastoral leases, and the NT government, which is responsible for providing essential services, are reluctant to provide capital improvements short of a firm excision or sub-leasing arrangement being achieved. However, in respect of both leases in question governments have anticipated resolution and have provided amenities by way of accommodation, schooling, shower, toilet and laundry facilities, and power generation.

East West Airlines

162 Mr LEO to MINISTER for TRANSPORT and WORKS

1. Did the government receive from East West around May 1980 details of that company's borrowing capacity, including (a) current East West borrowing capacity, (b) borrowing requirements for operations outside the Territory, (c) equity levels to support borrowing, and (d) capacity to support borrowing by the NT airline?

2. If so, why was this information not made available to the merchant banker, Hill Samuel?

ANSWER

East West submitted their first formal request for guarantees in May 1980. It did purport to detail the items in the question.

This information was made available to Hill Samuel.

East West Airlines

163 Mr LEO to MINISTER for TRANSPORT and WORKS

Did the 3-man committee established by the government to examine the Connair takeover offers first recommend acceptance of other offers before recommending East West?

ANSWER

The working party recommended that the NT government accept the offer of East West Airlines to operate the new regional airline, subject to East West's acceptance of the specific requirements set down by the government on the operation of the airline.

The working party made no deviation from that recommendation.

Industries Training Commission

173 Mr B. COLLINS to MINISTER for EDUCATION

1. How many apprentices are with the Industries Training Commission?
2. What is the number in each trade and the breakdown of males and females for each category?

ANSWER

1. The Industries Training Commission is responsible for the registration of the Northern Territory apprentices, it does not directly employ apprentices itself.

   At the end of the 1980-81 financial year, the first full year of operation of the commission, a record 1,007 apprentices were in training. This was a 13% increase over the same period in the previous year.

   As at 30 September 1981, this number had risen to 1,033 and it appears as though a further significant increase will occur during the 1981-82 financial year.

2. Total Apprentices in Training - at 30 September 1981:

Trade	Male	Female	Total
Metal trades	468	7	475
Electrical trades	202	1	203
Building trades	156	Nil	156
Printing trades	19	4	23
Vehicle trades	27	Nil	27
Food trades	51	8	59
Other trades	37	53	90
TOTAL	960	73	1,033

Medical Practitioners Servicing Community Health Centres

205 Mr B. COLLINS to MINISTER for HEALTH

How many doctors have been servicing community health centres, and how many of these are private practitioners?

ANSWER

Eleven doctors are servicing community health centres at present. Only one of these doctors is a private practitioner.

Alice Springs Women's Community Centre

223 Mr BELL to MINISTER for HEALTH

1. When will the Women's Community Centre in Alice Springs commence operations?
2. If the centre has not been opened by the end of June 1981 will the Department of Health continue to fund St Vincent de Paul and the Salvation Army to enable these agencies to provide services to destitute

and homeless people until the new centre is open?

3. If not, why not?

4. If so, have these agencies been informed that their funding will be maintained until the new centre commences operations?

ANSWER

1. The commencement date is uncertain at this time; however, a paper prepared by the Department of Lands should be placed before the Executive Council in the near future.

2. Yes.

3. Not applicable.

4. Yes.

Beef Exports to South-east Asia

239 Mr MacFARLANE to MINISTER for INDUSTRIAL DEVELOPMENT

Will the government commission a survey of markets for beef in South-east Asia and other areas?

ANSWER

The NT government has, through ministerial and government-supported trade missions, made a concerted effort over the past few years to promote the sale of livestock and meat to the Asian market.

Results have been:

1. Investment in cattle stations by South-east Asian interests to ensure for themselves a regular supply of livestock and meat, e.g. Sabah government's purchase of Camfield and Legune stations.

2. An overall increased demand in the Asian region for bovine animals, meat and offals from the Northern Territory. Bureau of Statistics figures compiled by the Commonwealth Department of Trade show an approx. 33% increase in sales in 1980-81 over 1979-80 from $6.6 million to $8.9 million.

3. A new outlet established for NT buffaloes is Indonesia and indications of interest from East and West Malaysia.

4. A strong interest in Indonesia for Territory-bred cattle for breeding purposes.

Grants-in-Aid - Darwin Sporting Bodies

322 Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

How much money was provided through Grants-in-Aid to Darwin sporting bodies during 1980-81?

ANSWER

A total of $742,305 was provided through Grants-in-Aid to Darwin sporting bodies during 1980 and 1981.

Grants-in-Aid - Alice Springs Sporting Bodies

323 Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

How much money was provided by the NT government through Grants-inAid to Alice Springs sporting bodies during 1980-81?

ANSWER

A total of $113,520 was provided through Grants-in-Aid to Alice Springs sporting bodies during 1980 and 1981.

Grants-in-Aid - Tennant Creek Sporting Bodies

324 Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

How much money was provided through Grants-in-Aid to Tennant Creek sporting bodies during 1980-81?

ANSWER

A total of $10,434 was given to Tennant Creek sporting bodies during 1980 and 1981.

Grants-in-Aid - Katherine Sporting Bodies

325 Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

How much money was provided through Grants-in-Aid to Katherine Sporting bodies during 1980-81?

ANSWER

A total of $17,229 was provided through Grants-in-Aid to Katherine sporting bodies during 1980 and 1981.

Health Centre at Katherine

353 Mr MacFARLANE to MINISTER for HEALTH

Why is a health centre to be built at Katherine within 1 mile of the existing community health centre?

ANSWER

The honourable member is referred to my letter of 15 October 1981, in which I advised that a service is to be provided by the Kalano Association (Katherine) Aboriginal Medical Services and will be funded by the Commonwealth.

Special Purposes Lease Application for 15-mile Camp

357 Mr BELL to MINISTER for LANDS and HOUSING

(a) Is he aware that a group of Aboriginal people at the 15-mile camp in rural Darwin (Electorate of Tiwi) is seeking a Special Purposes Lease to this camping site?

(b) What discussions within his department and negotiations with the Aboriginal group have been held on the granting of such lease?

(c) Does he intend to grant a lease to the 15-mile camp or any alternative site known to be suitable to the group?

ANSWER

(a) Yes.

(b) Officers of both the Department of Lands and the Department of Community Development have inspected the present camp and discussed site requirements with the Aboriginal Development Foundation and the Aboriginal group.

(c) Subject to normal site selection, rezoning, subdivision and survey processes, a lease in the Darwin rural area, or in Palmerston, will

be offered to the Aboriginal Development Foundation, the responsible umbrella organisation capable of holding title.

NT Pastoral Leases

364 Mr BELL to MINISTER for LANDS and HOUSING

Will he please table the following information:

(a) The names and sizes of pastoral leases in the Northern Territory (i) where the lease is held by Australian citizens as lessee-occupiers, and (ii) where the lease is held by companies registered in the Northern Territory, (iii) where the majority of directors and shareholders live in the Northern Territory, (iv) where the lease is held by companies registered in the Northern Territory but where the majority of directors and shareholders live outside the Northern Territory, and (v) where the lease is held by companies registered outside the Northern Territory?

(b) The names of the companies registered in the Northern Territory and which hold pastoral leases in the Northern Territory?

(c) The names of the companies registered outside the Northern Territory and which hold pastoral leases in the Northern Territory?

(d) The location of registration of the interstate companies which hold pastoral leases in the Northern Territory?

(e) The names and addresses of individuals who live outside the Northern Territory and who hold pastoral leases in the Northern Territory?

ANSWER

The information is available to the questioner and to members of the public for that matter by search at the Registrar-General's office and the Registrar of Companies' office.

Ministerial Statement on Health

376 Mr BELL to MINISTER for HEALTH

1. In a ministerial statement he stated that officers have visited Aboriginal communities. How many communities have been visited and by whom?

2. He stated that the number of authorized beds is to be reduced from 312 to 292. As this number includes a 12-bed surgical day ward, what else does it include?

3. He also stated that staff is to be reduced by 70. When does he intend that this reduction take place, what staff will be affected, and where?

ANSWER

1. In the East Arnhem region, 8 settlements and several outstations were visited. District medical officers briefed all councils with a follow up program conducted by the regional health educator at all rural communities.

   In the Alice Springs and Barkly regions, all major settlements and most minor communities were visited by various district medical officers. Smaller isolated communities were visited by rural health sisters. Lengthy discussions were held with organisations such as CAAC Medical Service and Urapunga Health Service.

   In the Darwin and Katherine regions, district medical officers discussed the new health charging system with councils during routine visits to rural communities. Nursing staff at major settlements were briefed

on the new system and will provide assistance to the community.

2. Ward 2A was closed resulting in a reduction of 32 beds. Twelve beds were transferred to other wards leaving a net reduction of 20 beds.

3. The reduction of staff at Casuarina Hospital will affect 13 of the 15 staff categories at the hospital. The reduction will be achieved through natural wastage.

Health Clinic at Lake Nash

377 Mr BELL to MINISTER for HEALTH

1. Is it true that his department sought the use of the former police station at Lake Nash as a health clinic, but that the former Director of Health decided that the station would be better used as a home and office for a stock inspector?

2. If so, what arrangements are being made to establish and staff a health clinic at Lake Nash?

ANSWER

1. The Department of Health requested the use of the former police station at Lake Nash for use as a clinic and staff residence. Other interested departments also applied for the use of the building. After evaluating all requests the building was finally allocated as being most suitable for the purposes of the Department of Primary Production.

2. A demountable clinic is available for transport to Lake Nash. Its installation has been delayed pending a decision by the community whether to remain or to move to a new location.

Kailis Fishing Company - Trucking Route

468 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

1. Is it accurate to describe the proposed trucking route to be used by the Kailis fishing company between Roper River and Darwin as an 'all weather' route?

2. How much of the route is unsealed?

ANSWER

This question should have been directed to the Minister for Transport and Works.

1. Yes.

2. 86 kilometres.

Sexual Harassment

470 Mr B. COLLINS to CHIEF MINISTER

1. What action has been taken by departments and authorities to develop policies and procedures for resolving cases of sexual harassment at the workplace since the circulation of the Guidelines on Sexual Harassment to departmental heads and prescribed authorities by the Public Service Commissioner on 29 June 1981?

2. Have any complaints of sexual harassment been made and, if so, how many and what action followed?

ANSWER

1. Fourteen departments and prescribed authorities have been surveyed to determine the action taken since the Guidelines on Sexual Harass-

ment were issued by the Public Service Commissioner on 29 June 1981.

Seven departments and prescribed authorities have issued policy statements signed by the Chief Executive Officer expressing management's concern that the workplace should be free of sexual harassment. Internal procedures for dealing with complaints of sexual harassment have been circulated to all employees of these departments.

Six departments and prescribed authorities have publicised the Public Service Commissioner's memorandum and will shortly be issuing internal procedures for resolving complaints of sexual harassment.

One department has not taken any action to date, but will now prepare internal guidelines to be released.

2. This office has been advised of 3 cases of sexual harassment in the last year. In all cases offending employees were strongly reprimanded by senior departmental management and advised that any recurrence of the misconduct would not be tolerated. To this end closer supervision in the work areas has also been exercised.

Aboriginal Liaison Unit

471 Mr B. COLLINS to CHIEF MINISTER

1. What is the allocation for travel for the officers of the Aboriginal Liaison Unit for 1981-82?

2. How much was expended in 1980-81?

ANSWER

1. Allocation for travel for the officers of the Aboriginal Liaison Unit for 1981-82 is $87,000.

2. Expenditure for 1980-81 was $56,754.

United Nations Convention on Elimination of Discrimination against Women

472 Mr B. COLLINS to CHIEF MINISTER

1. Has the NT agreed to accept the United Nations Convention on Elimination of Discrimination against Women in its present form?

2. If not, what section of the convention does the NT wish to be changed?

ANSWER

1. It is not for the Northern Territory to accept or reject the United Nations Convention on the Elimination of all forms of Discrimination against Women. The ratification or otherwise of the convention is a matter for the Commonwealth government to decide. It is the policy of that government to consult the states and the Northern Territory with respect to conventions dealing with 'state' matters.

   The Ministerial Meeting on Human Rights, of which Hon. P.A.E. Everingham is a member in his capacity as Attorney-General, is currently examining the requirements of the convention with a view to determining the basis of the Commonwealth's ratification on behalf of Australia. The convention will be further considered at the next ministerial meeting scheduled for February 1982.

2. The terms of the convention have been agreed by the General Assembly of the UN and are not open to amendment. At this stage, the convention is still under detailed consideration and it is too early to specify whether the Territory will be seeking any reservations in relation to to specific articles of the convention in Australia's instrument of ratification.

Domestic Violence in NT

473 Mr B. COLLINS to CHIEF MINISTER

Does the government consider there is a need to take action on the problem of domestic violence in the NT community and, if so, what action does it consider is necessary?

ANSWER

I answered this question without notice in the Legislative Assembly.

Strategies for Employment of Aborigines

474 Mr B. COLLINS to CHIEF MINISTER

What are the strategies being undertaken for increasing employment of Aboriginals by the NT government?

ANSWER

The NTPS is making use of the Australian government's national employment strategy for Aboriginals and giving on the job training for young Aboriginals. The task of coordinating these trainees and assisting them into permanent employment has recently been handed over to the Equal Employment Opportunity Unit of the Public Service Commissioner's Office by the Department of Employment and Youth Affairs. It is intended to extend the NESA scheme within the NTPS to apply to vacancies above base grade levels.

A residential pre-entry training program has been drafted by the Public Service Commissioner's office in conjunction with the principals of Kormilda and Yirara. It is proposed that the course involve trainees for a period of 8 weeks and is aimed at equipping them with the necessary academic and social skills for entry into the NTPS and into the urban working and social environment.

Free Health Care for Pensioners

478 Mr B. COLLINS to MINISTER for HEALTH

1. Has he considered extending free health care to all pensioners regardless of whether they qualify for a disadvantaged or PHB card, as occurs in New South Wales?

2. If not, why not?

ANSWER

1. This has been considered.

2. It is not intended to extend free health care to all pensioners regardless of whether they qualify for a disadvantaged or PHB card. Those who do not qualify for a disadvantaged or PHB card fall into the category of the user pays principle of the Commonwealth government. An investigation conducted in NSW showed that the vast majority of such pensioners have private health insurance.

Treatment of Trachoma in Aboriginal Communities

479 Mr B. COLLINS to MINISTER for HEALTH

Will he provide details of the evidence available on the effectiveness of tetracycline eyedrops in the treatment of trachoma in Aboriginal communities?

ANSWER

The effectiveness of tetracycline eyedrops in Aboriginal communities in the NT has been studied by Dr M.I. Mahmood of the NT Department of Health and by Dr D. Graham of the Department of Microbiology, University of Melbourne. Dr Graham's study has been completed and the other study is still in progress. Although the 2 studies differ in detail both tend to show that tetracycline eyedrops have no effect in reducing the numbers affected by trachoma but have a definite effect on reducing the severity. Since the rate of blindness from trachoma is related to the severity of the disease, tetracycline eyedrop treatment is felt to be a valuable mass treatment method. Other methods for reducing the overall prevalence of trachoma have been worked out and will require some preliminary research to implement. It is hoped to start this next year when consultations with Professor Barrie Jones of London University (the world's leading trachoma expert) are complete.

Occupational Health Hazards

480 Mr B. COLLINS to MINISTER for HEALTH

During 1980-81, (a) what occupational health hazards have been reported, (b) what areas have been identified as 'at risk', and (c) what expansion has there been in the occupational health capacity?

ANSWER

(a) Following the appointment of a qualified staff member early in 1981, 6 suspected health hazards were reported and investigated. There was 1 complaint of suspected air contamination, the remainder relating to occupational noise levels.

(b) Two occupational areas were identified as 'at risk' because of noise levels.

(c) The department's long standing role in the silicosis and dust diseases area and in radiation health was expanded early in 1981 by the appointment of a health surveyor specially qualified in noise matters and with a general background in industrial health problems.

Health Insurance Claims

481 Mr B. COLLINS to MINISTER for HEALTH

1. What action has been taken to ensure that health insurance claims will be processed more quickly?

2. Are claims still taking up to 8 weeks to be processed?

ANSWER

1. Health insurance funds have been visited, written to and senior personnel contacted on a number of occasions with the request that they process their claims more quickly.

2. Some claims are still taking up to 8 weeks to be processed.

Waiting Time at Casuarina Hospital

482 Mr B. COLLINS to MINISTER for HEALTH

1. Is action to be taken to reduce the average waiting time of 70 minutes for non-urgent cases and 30 minutes for urgent cases at the Casuarina Hospital casualty department?

2. If so, what action?

ANSWER

I am advised that these times compare very favourably indeed with the average waiting times in all other large Australian hospitals.

Direct Telephone Line from Katherine Hospital to Police Station

483 Mr MacFARLANE to MINISTER for HEALTH

Is there a direct telephone line from the Katherine Hospital to the police station for emergency use?

ANSWER

No.

Out-of-turn Allocations by Housing Commission

484 Mr B. COLLINS to MINISTER for LANDS and HOUSING

Will the government establish an appeals system for those applicants who have been refused out-of-turn allocation by the Housing Commission and who still consider their situation warrants further consideration?

ANSWER

On 8 January 1981 the NT Housing Commission introduced an appeal system for applicants who had been rejected for an out-of-turn allocation.

Mentally-Retarded Children in NT Primary Schools

485 Mr B. COLLINS to MINISTER for EDUCATION

1. How many mentally-retarded children are attending primary schools in the NT?

2. What specialist staff is provided for such children?

ANSWER

1. 251 children have been identified as 'mentally-retarded' in NT primary schools.

Note:

(i) 'mental-retardation' as a term has been applied only to those children who have achieved less than 70 points of IQ on an individual test of intelligence appropriate to the ethnic origin of the child;

(ii) 38 children have been regarded as moderately/severely mentally-retarded (i.e., IQ less than 55 points); and

213 children have been regarded as mildly mentally-retarded (i.e., IQ 55-70 points);

(iii) assuming a primary school population of 20,344, the expected* and actual incidence figures are as follows:

		Expected	Actually identified
Mod/Sev (below 55 IQ)	(.135%)	27	38
Mild (55-70 IQ)	(2.14%)	435	213

(iv) identification of mentally-retarded children in the NT is on a referral basis. Referral is made by either a principal or by a parent. The difference between the actual and expected incidence is explained partly by non-referral and partly by inappropriateness of testing instruments; and

(v) mental retardation is, of itself, not the sole criterion for special

placement in a special school or special class.

(*S.A. KIRK: Educating Exceptional Children - Houghton Mifflin 2nd Edition 1972, page 24).

2. There are 23 special teachers and 16.5 special aides actually teaching 207 mentally-retarded children in either a special school or special class setting. The remaining 44 identified mentally-retarded children are either in an isolated setting where it is not practical to supply a special teacher or are in a regular class setting at the request of the parent.

   The educational services delivered to these 44 children are met by:

   (i) the regular classroom teacher;

   (ii) the services of a resource teacher (where available); and

   (iii) the assistance of special education advisers and or guidance officers.

Australian United Fresh Fruit and Vegetable Association Convention

486 Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Following the government's public announcement of its encouragement for a Territory horticultural industry, were any Department of Primary Production officers present at the third national convention organised by the Australian United Fresh Fruit and Vegetable Association, understanding that the 4-day discussions involved growers, wholesalers, retailers, transporters and those working in packaging?

ANSWER

No. The department has previously supported the attendance of Territory growers. Representation from the Department of Primary Production will be considered for the fourth national convention in Sydney this year.

Fisheries Division Program

487 Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

What results are forthcoming from the new Fisheries Division program aimed at boosting the total Top End catch; that is, the program looking at Spanish mackerel, shark and demersal fish?

ANSWER

The results of the Fisheries Division programs aimed at boosting the total Top End catch are as follows:

(a) SPANISH MACKEREL - The Fisheries Division conducted a training program for potential mackerel fishermen to learn trolling methods from September to December 1980.

   A full report on the program has been published as Fisheries Report No. 4. This is available from the Department of Primary Production.

(b) SHARK - A shark fishing and mercury sampling program was conducted from September to December 1980, using a locally chartered fishing vessel.

   The results indicated that the resource of shark of the NT is substantial, and this result is borne out by catches taken by Taiwanese fishing vessels.

   Overall, the results indicate that a substantial potential shark fishery exists off the NT.

(c) DEMERSAL FISH - A consultant demersal fishery scientist has commenced duties and is currently undertaking a comprehensive evaluation of results obtained from Taiwanese fishing operations, the CSIRO research cruises and other information within the Fisheries Division.

Government Cattle at Elizabeth River Dairy

488 Mr DOOLAN to MINISTER for PRIMARY PRODUCTION and TOURISM

Will he advise details of the records and milk samples of the dairy cattle belonging to the Department of Primary Production at Fitzgerald's Elizabeth River dairy?

ANSWER

There are 14 Australian Friesian Sahiwal (AFS) cattle belonging to the Department of Primary Production at Fitzgerald's Elizabeth River dairy.

Recording

The milk production of all the department-owned cows, together with all other lactating cows at the dairy, is recorded. Breeding records are also kept.

Each month, the Fitzgeralds complete a standard form and forward it together with milk samples for each lactating cow to the Herd Improvement Laboratory at Wacol, Queensland.

Information provided on each cow on the form includes, (i) milk yield on the day of recording; (ii) date individual cows 'dried off'; (iii) date individual cows calved; (i) details of calves born during the month; and (v) date individual cows mated.

A computer generated table summarizing herd production is returned to the Fitzgeralds within 3 weeks. The Department of Primary Production and CSIRO Division of Animal Production, Wollongbar, obtain photocopies of the herd production sheet.

Information on each cow detailed on the herd production sheet includes (i) cow number, (ii) cow name, (iii) age of cow, (iv) date calved, (v) milk yield on day of recording (daily yield), (vi) percentage butterfat of each sample forwarded, (vii) progressive total of milk in litres, (viii) progressive average of percentage butterfat, (ix) progressive total of butterfat in kilograms, (x) number of days in milk, (xi) number of times tested, and (xii) breed.

In addition, the following is also provided on the herd production sheet -

(i) summary of production of 2 year old heifers as a group;
(ii) summary of production of remaining lactating cows as a group;
(iii) summary of production of total lactating herd; and
(iv) remarks such as mating details, pregnancy status and conception difficulties for each cow.

The sex, birth weight and mortality of all calves are also recorded.

Results

Five AFS cows have completed their first lactation. Their average milk production was 8.6 litres/day and average butterfat 4.6%. This compares favourably with the herd average in 1981 of 6.8 litres/day and 4.1% butterfat.

Only one cow (702) had a lactation length that is considered unacceptably short.

The following table details major production parameters of the AFS cattle on Fitzgerald's dairy:

Herd Recording Results for AFS (Australian Friesian Sahiwal) Dairy Cows

Cow No.	Date Calved	Calf Details	No. of Days Lactation	Total Milk	Butter Fat %
First Calf					
702	19.10.80	♀ 33 kg	E 164	1,088	4.9
707	18.10.80	♂	E 275	1,813	4.0
710	28.08.80	♀ (died)	E 381	3,422	4.9
716	3.10.80	♀ 25 kg	E 281	2,596	4.7
717	14.09.80	♀ 33 kg	E 341	3,277	4.9
817	13.10.81	♀ 31 kg	5	62	3.0
831	2.09.81	♀ 35 kg	46	517	4.3
839	27.07.81	aborted	83	813	3.9
846	5.08.81	♀ 28 kg	74	1,175	3.1
907	27.07.81	aborted	83	252	4.0
908	8.09.81	♀ 30 kg	40	555	4.1
950	13.10.81	♂	1	65	4.2
820	Just recently calved - no data as yet.				
830	Just recently calved - no data as yet.				
Second Calf					
330	27.08.81	♀ 30 kg	52	684	4.4
351	31.08.81	♂	48	703	4.8

E = Exit cow lactation complete
Birth weights only available for heifers

Government Expenditure on Agriculture

489 Mr DOOLAN to MINISTER for PRIMARY PRODUCTION

Will he provide a breakdown of government expenditure into seasonal requirements and agricultural development initiatives for the 1974-75 season up to the projected figures for 1981-82?

ANSWER

No, the figures are too expansive to provide.

Point Stuart Abattoir - Payment for Cattle

490 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Is he aware that the Cattlemens Union passed a resolution expressing concern at the slowness of payment by Point Stuart abattoir for cattle received for slaughter?

ANSWER

Yes.

Contract Beef Production

491 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

Is he aware of the decision of the Cattlemens Union to support in principle the contract growing of beef and cattle for specific markets?

ANSWER

Yes.

Powell Creek Telegraph Station

492 Mr MacFARLANE to CHIEF MINISTER

1. Is the Powell Creek telegraph station being stripped of roofing iron, water tanks and paving stones, and being completely neglected by its present lessee?
2. If so, will the government take steps to preserve this historic complex immediately?

ANSWER

The Powell Creek telegraph station is situated on private property. It is understood that the present property manager commenced in September and is not aware of the building being stripped. A departmental officer, as recently as 26 November, attempted to visit the site but was unable to obtain access through a locked gate. However, the manager has no objection to him visiting the site, and he will do so in the near future to document it and, if appropriate, encourage the owners to maintain it.

Darwin Powerhouse Site

495 Mr B. COLLINS to MINISTER for MINES and ENERGY

Regarding the siting of the powerhouse on Shell Island, is he aware of the mean height of the island and has he taken into consideration the surge level of the island?

ANSWER

1. It is presumed that Mr Collins means Channel Island, not Shell Island.
2. I am aware of the topography of Channel Island and the question of surge level was considered as part of the site selection investigations.
3. The Site Selection Report embodies a section headed 'Storm Surge, Site Levels and Bund Walls', and the references to Channel Island may be summarised:

   It is proposed to locate the power station on or above the 7.5 metre contour with respect to Australian Height Datum, or approximately 3.5 metres above maximum astronomical tide level. This height has been selected on the basis that the probability of surge level exceeding this height is 0.01 percent per annum. This is regarded as being adequately conservative for the construction of a power station.

Complaints under the Fish and Fisheries Act

496 Mr B. COLLINS to ATTORNEY-GENERAL

1. How many complaints have been laid for illegal fishing under the Fish and Fisheries Act?
2. How many of those complaints have resulted in prosecutions?
3. How many convictions have been recorded?

ANSWER

1. The Fish and Fisheries Act commenced in February 1980. According to statistics supplied to the police from the Department of Primary Production, 8 complaints were laid prior to fisheries enforcement being transferred to the police and all these matters were disposed of in the courts. Since police assumed responsibility for enforcement there have been 69 complaints laid for breaches of the Act. Therefore, the total number of complaints laid under the Fish and Fisheries Act is 77.
2. Of the 77 complaints laid under the Act, 71 have resulted in prosecution.
3. Of the total 77 complaints proceeded with in the courts, convictions have been recorded in regard to 55, with 16 matters still pending or adjourned.

Research on Industrial Crops

497 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION

What research, if any, is presently being undertaken on the industrial crops cassava, sugar cane, kenof and leucaena?

ANSWER

There is no current research on these crops for their industrial potential. Kenof and sugar cane have not been researched in the Northern Territory by the Department of Primary Production. Recent work has been conducted at Kununurra by CSIRO and the WA Department of Agriculture.

Only initial research has been conducted on some cassava lines, broadly to assess productive potential and resistance to termite attack. The department does maintain some leucaena variety observation plots, but the emphasis is on supplementary fodder potential rather than industrial usage. Some small pasture trials are being established with leucaena and pangola grass.

The department has also been involved in cooperative trials on leucaena varieties and other tree species with the Conservation Commission on Mataranka Station. These are simple observation trials to assess site preparation, propagation techniques and growth performance.

Housing Commission Rental Assistance to Pensioners

498 Mr B. COLLINS to MINISTER for LANDS and HOUSING

1. Is he aware that the Federal government will not pay supplementary rental assistance of up to $8 maximum to pensioners who become tenants of the NT Housing Commission after January 1982 but will continue to pay it to eligible pensioners accommodated by the Housing Commission prior to January 1982?
2. If so, can he give an assurance that those pensioners not in receipt of supplementary assistance will pay no more in rent than those pensioners who continue to receive supplementary rental assistance after January 1982?

ANSWER

1. Yes.
2. By using the current formula for calculation of rental rebate those pensioners not in receipt of supplementary rental assistance would in fact pay less rental than pensioners receiving the assistance. This situation will continue pending the development of a uniform, Australia-wide rental rebate policy. Under the current Commonwealth-State Hous-

ing Agreement, the states and the Territory are required to develop and apply a uniform rental rebate policy. In contributing to the development of such a policy, the Northern Territory government will be seeking to ensure that no Territory residents in receipt of rental rebate assistance will be worse off under the uniform policy than under the current policy.

Leucaena Trials at Mataranka

501 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION and TOURISM

What progress has been made with the leucaena trials at Mataranka?

ANSWER

Two research plots and a trial seed orchard were established in the 1980-81 season at Mataranka Station. Three other research areas were cleared and fenced for later trials.

The 2 research plots at Bull Hole and Venn airstrip were established as a cooperative exercise between the Forestry Unit of the Conservation Commission and the Department of Primary Production. A number of observations were made on survival and growth performance of leucaena varieties and other trial species during 1981.

The property owners, Unibeef Australia Pty Ltd, have advertised the sale of Mataranka and continued trials in the area will be a matter for discussion with the new owners.

Northern Territory Public Service

502 Mr B. COLLINS to CHIEF MINISTER

1. What is the average female earnings in the NTPS?
2. How many (a) male and (b) female university graduates are employed in the NTPS?

ANSWER

1. As at 30 April 1981 there were 5,161 female employees within the NT Public Service. The following table depicts the various levels at which females are employed and numbers within each designation level. The average salary of females within the service is $13,718.

Designation	No. of Females	Salary Top of Range	Total Amount
Aboriginal Health Worker Grade 2	32	11,037	353,184
Aboriginal Health Worker Grade 1	47	10,579	497,213
Administrative Class A9	36	23,720	853,920
Administrative Class A8	37	21,874	809,338

Housing Commission Rental Rebates

514 Mr B. COLLINS to MINISTER for LANDS and HOUSING

1. What percentage of Housing Commission tenants are in receipt of rental rebate on public housing?

2. How many tenants receive the full rebate?

3. What proportion of tenants receiving rebates are pensioners or social security recipients?

4. How many public servants are in receipt of rental rebate?

5. Are any public servants at executive level in receipt of rental rebate?

ANSWER

1. 28%.
2. All rebate tenants are on full rebates applicable to their income.
3. 98% of tenants receiving rebates are pensioners or social security recipients.
4. Four applications have been received and are being processed.
5. No.

Allocation of Public Housing

515 Mr B. COLLINS to MINISTER for LANDS and HOUSING

1. How many applications for out-of-turn allocation of public housing from 31 October 1980 to 1 September 1981 were (a) received, (b) accepted, and (c) rejected?
2. How many applicants whose applications were accepted or rejected were in receipt of (a) supporting parent benefit, (b) unemployment benefit, (c) other pensions, and (d) were one income families?

ANSWER

1. Inquiries 321; cases investigated 50; cases approved 31; cases rejected 19.
2. Cases approved - SPB 13; UEB 4; pensions 6; employed 8.
3. Cases rejected - SPB 4; UEB 2; pensions 2; employed 11.

   Figures are not kept on one income families.

Petrol Sniffing in NT

518 Mr B. COLLINS to MINISTER for HEALTH

1. Will he provide details on the prevalence of petrol sniffing in the Northern Territory?
2. What action, if any, is being taken to reduce the incidence of petrol sniffing?

ANSWER

1. No overall survey of petrol sniffing prevalence has been undertaken throughout the Northern Territory. Therefore no specific details are available.
2. Action being taken to reduce the incidence of petrol sniffing involves:

   (a) a research program by Dr Eastwell of the University of Queensland;
   (b) research by Mr Haywood-Ryan of Department of Community Development; and
   (c) use of a widely publicized film on the Pitjantjatjara.

   Petrol sniffing is an indication of social break-down and as such is more the direct concern of welfare agencies especially the Department of Community Development. My department is actively providing medical advice to affected communities and involved welfare workers.

Central Health Office

521 Mr B. COLLINS to MINISTER for HEALTH

What functions of the central office of the Department of Health could more appropriately be carried out by regional offices?

ANSWER

The functions of central office that could be carried out more appropriately by the regions are operational activities. Central office's prime role should be that of policy development and operational oversight.

Rationalisation of Health Services

522 Mr B. COLLINS to MINISTER for HEALTH

In the light of the new health charges, he said he would reduce staffing at the Casuarina Hospital and close a ward in order to obtain possible savings, and he also spoke of reviewing community health centres. How will health services be rationalised to take account of these changes?

ANSWER

The reduction in staffing at Casuarina Hospital and the closure of a ward were not made in the light of the new health charges.

The operation of all hospitals is kept under constant review by hospital staff with the aim of ensuring efficient functioning. The average occupancy at Casuarina Hospital was below that generally accepted in Australia as an efficient operation, and this was the reason for the closure of the ward. Staff reductions do lead to savings.

Consultants' Fees for Hospital Services

524 Mr B. COLLINS to MINISTER for HEALTH

1. For what specific purposes have the allocations of $76,000 for consultants' fees for hospital services and $38,000 in health services been made?

2. In 1980-81, (a) how many consultants were employed, (b) for what purposes, and (c) what payments were made to each consultant?

ANSWER

1. The 1981-82 allocations for consultants fees have been provided for the following purposes:

Hospitals:	Doctors - Sessional Fees	$ 38,000
	- Visiting Specialists	$ 17,000
	Computer Consultants	$ 21,000
		$ 76,000
Health Services:	Doctors - Sessional Fees	$ 7,000
	Dentists	$ 30,000
	Physiotherapists	$ 1,000
		$ 38,000

2. During 1980-81 various doctors, dentists, and physiotherapists provided sessional and visiting-specialist services.

   In addition, 2 firms of computer consultants were employed. One undertook a nursing utilisation study; while the other prepared a hospital admissions system.

3. Consultants' fees payments to doctors, dentists, and physiotherapists, for sessional and visiting-specialist services, amounted to $90,351 for the year.

   Payments to computer consultants during 1980-81 were as follows:

Community Systems Foundation	$ 17,052
IBM Australia Ltd	$ 3,234.

Health Department Debt Collectors

525 Mr B. COLLINS to MINISTER for HEALTH

1. How many debt collectors are to be employed as a consequence of the new health charges?
2. What is the 1981-82 budget allocation for their employment?

ANSWER

1. Following advertisements for expression of interest for collection of the department's outstanding debts, a debt collecting agency has been appointed. There are no plans to employ salaried debt collectors.
2. No provision for salaries has been made in the 1981-82 budget allocations. Payment to the debt collection agency will be based on a percentage of debts collected.

Health Charges

526 Mr B. COLLINS to MINISTER for HEALTH

He stated that emphasis would be placed on debtors who can afford to pay health charges rather than those who cannot. How does he expect this differentiation to be made?

ANSWER

Accounts will be raised for all patients who do not hold a current health care card issued by the Department of Social Security. Health care cards are automatically issued to unemployment and special beneficiaries and, on application subject to satisfactory evidence, to people on low incomes, pensioners, migrants and refugees.

NT Patients Transferred Interstate

528 Mr B. COLLINS to MINISTER for HEALTH

1. What are the details of the medical agreements under which NT patients can be transferred to each state?
2. How much was spent and on how many patients under each scheme during 1980-81?
3. How much has been allocated in this year's budget?

ANSWER

1. There are no medical agreements relating to transfer of patients interstate. There are 3 schemes operating in the Northern Territory under which patients may be transferred. These are, (a) IPTAAS, a Commonwealth scheme; (b) an informal arrangement with specialist hospitals in other states; and (c) an informal arrangement with South Australia for mental health patients.
2. The Commonwealth government meets costs incurred under IPTAAS. The Northern Territory assists by advancing money in some cases - this is recovered when refunds are paid to patients.

   Medical evacuations for interstate specialist attention cost $163,660.62 during 1980-81.

   The cost of transferring mental health patients and providing for their treatment and maintenance was $457,137.32 for 1980-81.
3. The budget allocation for 1981-82 for items in 2. above is $1,220,000.

Outpatients Services

531 Mr B. COLLINS to MINISTER for HEALTH

Does he expect any increase in the use of outpatients departments as a consequence of the new health charges? If so, are there any plans to upgrade the services of outpatients and in what way?

ANSWER

Figures to date have shown no overall increase in the usage of outpatients departments since the introduction of the new health charges. Consequently there are no current plans to upgrade the services which are considered adequate.

Private Hospital in Darwin

536 Mr B. COLLINS to MINISTER for HEALTH

How many tenders have been received for establishing a private hospital in Darwin?

ANSWER

One tender has been received for establishing a private hospital in Darwin.

School Dental Therapists

539 Mr B. COLLINS to MINISTER for HEALTH

1. How many rural areas are covered by school dental therapists in mobile teams?
2. How many areas are not covered?
3. When does he expect the service to extend to those presently not covered?

ANSWER

The Department of Health currently offers dental services to 85% of all rural school children and by the end of term this year it is expected that this figure will be 100%. The department uses an economical mix of both mobile dentists and dental therapists with increasing emphasis upon the training and use of Aboriginal health workers within their communities.

Occupational Health Service

540 Mr B. COLLINS to MINISTER for HEALTH

1. Of whom is the occupational health service comprised?
2. What are its main functions?
3. How does it carry these out?
4. What was its expenditure in 1980-81?
5. What is its allocation for 1981-82?

ANSWER

1. The occupational health services of the Department of Health are based on the Occupational Health Branch of the Environmental Health Division, supplemented by the activities of regional staff and use of regional facilities.

   Following recent re-organisation the Branch comprises:

   - Professional Level 4 (Physicist)

- Medical Officer Class 2 (Post-graduate qualifications in occupational health)
- A9 (Chief Health Surveyor)
- Senior Health Surveyor (Specially qualified in occupational health)
- A5
- A4
- A3
- Keyboard Operator

2. Functions of the service are:

- To meet statutory requirements of the Silicosis and Tuberculosis Act
- Radiation (Safety Control), and Radiographers Registration Acts
- Radiation safety matters under the Mines Safety Act and Regulations
- Advisory service on all aspects of occupational health
- Conduct inspections and investigate complaints
- Assist in relevant health education
- Maintain liaison with other government departments and with industry
- Develop regional occupational health activities.

3. The functions are carried out in 4 ways:

(i) Medical examinations, particularly chest x-rays as required by the legislation or in specific circumstances as requested.

(ii) Monitoring of results of surveillance programs, and field checking as required; e.g., as in uranium mining.

(iii) Field inspections of work places, and inspection and approval of specified equipment; e.g., irradiating apparatus.

(iv) Extensive liaison with other government agencies having related statutory responsibilities, with industry and with national bodies.

4. Expenditure by the branch in 1980-81 was $147,713. This costing does not include activities performed on a regional basis, such as chest x-rays or hearing screening.

5. The budget allocation for 1981-82 is the same as for 1980-81.

Expenditure on Community Welfare

542 Mr B. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

1. Could he itemise how much was expended in 1980-81 and how much has been allocated in 1981-82 in the following areas of Community Welfare (a) substitute care for children, (b) youth services, (c) family services, (d) income maintenance, (e) subsidies and grants-in-aid to community organisations engaged in welfare services, (f) community work, (g) policy and planning, (h) information, (j) ethnic affairs, (k) administration, and (m) handicapped persons?

   Can an itemisation of allocation under each program be provided where possible with details of which organisations received grants-in-aid? How many unsuccessful applications were there? When was the closing date of applications for grants-in-aid and when were these organisations notified of their funding?

2. What is being allocated in cash in 1981-82 and for which Aboriginal communities under the essential services program of Community Government? What are the proposed new projects?

3. Could he detail where the 400 Aborigines employed within their own communities on the construction of essential services are?

4. How much has been allocated in 1981-82 for the introduction and develop-

ment of community government councils? Are any community government councils to be established and, if so, where?

5. Could he provide details of the budget allocation in 1981-82 for community services in the 4 divisions?

6. Who is receiving grants-in-aid in Arts and Cultural Affairs and Youth, Sport and Recreation, and how much?

7. When was the closing date for such applications and when were the successful organisations notified of their funding?

8. How many successful grants-in-aid applications were there in 1981-82 for these sections?

ANSWER

1. The following tables detail the information requested.

AREAS OF EXPENDITURE

Substitute Care	Expenditure 80-81	Allocation 81-82
Salaries	$ 175,812.18	$ 155,000
Travel	$ 4,902.69	$ 5,000
Payroll tax	$ 6,744.07	$ 7,000
Communications	$ 5,291,06	$ 6,000
General services	$ 12,785.91	$ 13,000
Other administrative expenses	$ 21,037.21	$ 9,000
TOTAL	$ 226,573.12	$ 195,000

Youth Services	Expenditure 80-81	Allocation 81-82
Salaries	$ 575,445.70	$ 600,000
Travel	$ 13,738.99	$ 15,000
Payroll tax	$ 23,353.69	$ 27,000
Communications	$ 12,905.16	$ 15,000
General services	$ 44,245.45	$ 50,000
Other administrative expenses	$ 109,324.52	$ 91,000
TOTAL	$ 779,013.51	$ 798,000

Family Services	Expenditure 80-81	Allocation 81-82
Salaries	$ 226,219.66	$ 324,000
Travel	$ 17,126.73	$ 20,000
Payroll tax	$ 10,014.10	$ 15,000
Communications	$ 6,654.94	$ 10,000
General services	$ 15,327.10	$ 16,000
Other administrative expenses	$ 22,127.98	$ 10,000
TOTAL	$ 297,470.60	$ 395,000

Income Maintenance	Expenditure 80-81	Allocation 81-82
Salaries	$ 693,914.20	* $ 260,000
Travel	$ 48,973.55	$ 5,000
Payroll tax	$ 40,677.43	$ 12,000
Communications	$ 33,203,30	--
General services	$ 8,933.89	--
Other administrative expenses	$ 117,404.80	$ 47,000
TOTAL	$ 943,107.17	$ 324,000

Concessions to pensioners	$ 443,529.29	$ 580,000
Child maintenance	$ 170,232.73	$ 300,000
Financial assistance	$ 407,959.05	$ 332,000
Supporting parents benefits	$ 285,200.63	Nil
Indigent burials	$ 83,481.90	$ 75,000
TOTAL	$1,390,403.60	$1,287,000

* A high proportion of salaries allocations previously shown against the Income Maintenance Program has been transferred to other more relevant division programs in the 1981-82 budget.

Subsidies Unit	Expenditure 80-81	Allocation 81-82
Salaries	$ 41,550.80	$ 73,000
Travel	$ 8,594.94	$ 10,000
Payroll tax	$ 2,424.33	$ 3,000
Communications	$ 6,92	--
General services	$ 1,100.00	--
Other administrative expenses	$ 13,123.62	$ 11,000
TOTAL	$ 66,800.61	$ 97,000
Subsidies and Grants-in-Aid Payments	$1,151,609.65	$1,063,000

Aboriginal Community Work	Expenditure 80-81	Allocation 81-82
Salaries	$ 305,598.14	$ 526,000
Travel	$ 56,267.40	$ 60,000
Payroll tax	$ 14,969.36	$ 15,000
Communications	$ 1,679.59	$ 2,000
General services	$ 466.41	--
Other administrative expenses	$ 29,869.81	$ 8,000
TOTAL	$ 408,850.71	$ 611,000

* Community work for other than Aborigines is carried out as a component of many of the division programs and separate figures are not available.

Policy, Planning and *Information	Expenditure 80-81	Allocation 81-82
Salaries	$ 279,446,06	$ 258,000
Travel	$ 13,336.84	$ 20,000
Payroll tax	$ 12,089.39	$ 12,000
Communications	$ 4,747.47	$ 6,000
General services	$ 1,527.03	$ 2,000
Other administrative expenses	$ 55,291.35	$ 38,000
TOTAL	$ 366,438.14	$ 336,000

* Separate figures for this component are not available.

Ethnic Affairs	Expenditure 80-81	Allocation 81-82
Salaries	$ 63,747.89	$ 77,000
Travel	$ 3,859.56	$ 5,000

Grants-in-Aid 1980-81

Notification was sent out in October 1980. Closing date for applications was 14 December 1979 with the Community Service Division.

Grants-in-Aid 1981-82

Closing date for applications was 28 February 1981. Notification was made in November 1981.

2. The Aboriginal Essential Services Capital Works Program for which the Department of Community Development is responsible appears at pages 8 to 19 in Budget Paper No. 5, 1981-82. Works in progress were valued at $12,678,189 whilst new works programmed were valued at $14,420,000. (Total cash available to the program at this stage is $14,130,000). The individual projects are listed in the Budget Paper No. 5 and are too numerous to list in this answer).

   An amount of $5.43m cash has been provided for repairs and maintenance throughout the Northern Territory.

   The Commonwealth government has in its Aboriginal Public Health Improvement Program provided further cash of $1,865,000.

3. The actual number of Aboriginals employed on the construction of essential services at any particular point of time varies depending on a number of factors, including the number of contracts let, the type of work to be carried out, and the time of the year. The figure of 400, which was provided in answer to a similar question asked by Mr Isaacs in May 1981, was an assessment of the number of Aboriginals employed in carrying out such work at that time.

   At present, due largely to the onset of the wet season, and a consequent reduction of work, it is estimated that the number of Aboriginals employed on the construction of essential services is approximately 270. It is expected that the number will rise again with the arrival of the dry season.

   Communities where Aboriginals are currently working on such contracts are Amoonguna, Areyonga, Docker River, Santa Teresa, Willowra, Elliott, Angurugu, Belyuen, Nauiyu Ukume, Kulaluk, Galiwinku, Pularumpi, Kardu Numida, Milikapiti, Miligimbi, Maningrida, Minjilang, Nguiu, Gunbalanya, Peppiminarti, Ramingining, Umbakumba and Warruwi.

4. There is a sum of $169,000 allocated in 1981-82 financial year for the introduction of community government councils.

   There are 3 communities for which schemes have been prepared to exhibition stage. These communities are Angurugu, Milikapiti and

Pularumpi. Schemes are being prepared for other communities and will reach exhibition stage after consultations have been concluded.

5. It is assumed that this question should read, "Could the Minister provide details of the budget allocation in 1981-82 for Community Services Division in the 4 sub-divisions?", to which the answer is:

Salaries	$ 1,906,000
Administration	$ 958,000
Capital	$ 79,000
Other services	$ 3,498,000.

6. Due to the nature of the Community Services Grants-in-Aid scheme it is very difficult to provide a list of recipients of grants until the end of the financial year. At present 319 applications for grants-in-aid have been received from community organisations.

   Applications for grants-in-aid can request assistance in the areas of administration, salary subsidy, equipment, training-coaching, facilities, travel and special projects.

   Any incorporated, non-profit community organisation is eligible to apply.

7. Applications for 1981-82 closed on 17 April, but late applications are often received. If an urgent need is demonstrated the application is processed immediately. Otherwise, applications are assessed progressively. After the Minister gives his decision all organisations are notified as to the outcome of their application.

8. For 1981-82 there have been 319 applications for grants-in-aid received. Of the 319 applications received, the following is a breakdown of their status:

Approved	160
Not approved	50
Withdrawn	10
Deferred	20
Ineligible	5
Under assessment	74
	319

School-to-Work Transition Program

543 Mr B. COLLINS to MINISTER for EDUCATION

1. Has there been an evaluation of the school-to-work transition program in the Northern Territory? If so, what was the nature of the evaluation and the results? If not, is an evaluation planned?

2. In 1980-81 how many students, at what level of education, were involved in the school-to-work program?

3. How many teachers, for how many hours per week and where, were involved?

4. Where did the students go for their work experience? In what numbers?

5. What increase and expansion of the program is planned for 1981-82 with the significantly increased funding allocation? How many students will it cater for? Which schools are to receive cash grants and how much?

ANSWER

1. Evaluation of the school-to-work transition program is in hand pro-

gressively. For 1980-81 an evaluation study has been made covering work experience, link courses, career education programs, special year 11 transition classes and foundation for employment (post-school) courses.

The evaluation demonstrated positive benefits flowing from the transition program and results of that study will be widely distributed early in 1982.

2. Students involved in the school-to-work program were -

1980	Work experience	-	Years 10 and 11	-	840
	Career education	-	Years 9 and 10	-	500
	Link courses	-	Year 11	-	168
1981	Work experience	-	Years 10 and 11	-	830
	Career education	-	Years 9 and 10	-	543
	Link courses	-	Year 11	-	87

Regulatory and Advisory Council Meetings

544 Mr B. COLLINS to MINISTER for EDUCATION

How many Regulatory and Advisory Council meetings for schools are expected in 1981-82? What is the average cost per meeting?

ANSWER

It is assumed that the Regulatory and Advisory Council meetings referred to are: Post School Advisory Council, Education Advisory Council, Special Education Advisory Committee, and Northern Territory Aboriginal Education Consultative Group (FEPPI).

The 2 councils are constituted in accordance with the Education Act and meet on approximately 6 occasions per year.

The Special Education Advisory Committee meets 3 times per year and on other special occasions with prior approval.

All the above meetings are normally of 2 days duration.

FEPPI usually meets each quarter and these meetings are generally of 4 to 5 days duration.

The estimated cost for each proposed meeting held in Darwin in 1981-82 is: Post School Advisory Council $4,000; Education Advisory Council $3,000; FEPPI $3,600; and Special Education Advisory Committee $2,000.

Buffalo Domestication

548 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

1. How many buffaloes in the Northern Territory are domesticated?
2. How many have been domesticated since the buffalo symposium of February 1980?

ANSWER

1. It is estimated that at the present time there are about 3,000 domesticated buffaloes in the Northern Territory.
2. Most of the above-mentioned buffaloes have been domesticated since the symposium.

Library Service Book Purchases

551 Mr B. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

What was (a) the value of books purchased by the Northern Territory

Library Service since 1 February 1981, (b) from which suppliers or book-sellers were these purchases made, both Territory and interstate, (c) is the Library Service still purchasing books direct from publishers, and (d) what was the total expenditure by the Library Service on book purchases in the financial year 1980-81?

ANSWER

(a) Value of books purchased by Northern Territory Library Service during the period February 1981 to December 1981 inclusive was $355,393.

(b) (i) Northern Territory Suppliers

Bookworld	$ 25,865
Northbooks	$ 74,636
Educational and Technical Books	$ 20,898
Territory Book Depot	$ 9,735
Paul France	$ 4,395
Singing Tree	$ 11,089
Aboriginal Arts and Crafts	$ 256
Arunta Art Gallery	$ 76
Corey Books	$ 40
*Department of the Chief Minister	$ 41
*Government Information Centre	$ 24
Darwin Newsagency	$ 169
Tivoli Bookshop	$ 1,599
NT Nautical Supplies	$ 186
*Maningrida Literature Production Centre	$ 5
*Delta Productions	$ 250
*Summer Institute of Linguistics	$ 22
*Warlipiri Literature Production Centre	$ 246
*NT Field Naturalists Club	$ 8
*Darwin Community College	$ 160
TOTAL	$ 149,700

(ii) Interstate Suppliers

James Bennett	$ 51,170
Grahames	$ 59,230
Dunn & Mason	$ 48,067
Ayres & James	$ 2,983
Berkelouw	$ 1,659
Serendipity	$ 779
Burge Lopez & Craft	$ 1,348
Hearn	$ 230
Gaston Renard	$ 1,838
Mary Martin	$ 114
W.H. Thompson	$ 123
Continental Bookshop	$ 1,405
Southern Scene	$ 1,317
Bookshelf	$ 204
K. Ainsworth	$ 165
Kay Craddock	$ 21
*Department of National Development & Energy	$ 82
*Encyclopedia Britannica	$ 3,282
*Keith Cole Productions	$ 3
*LAA Special Libraries Victoria	$ 15
*Oceania	$ 141
*National Library	$ 44
*Shire of Port Hedland	$ 17
*Pacific Linguistics	$ 188

*Australian Library Promotion Council	$	25
*Unicef	$	24
*Dutch/Australia Publishing Co.	$	23
*Australian Government Publishing Service	$	85
*Remal	$	101
*WA Museum	$	44
*James Cook University	$	13
*State Library of South Australia	$	98
*Lutheran Publishing House	$	14
*CCH	$	134
*Library Board of WA	$	15
*Australian Institute of Aboriginal Studies	$	176
TOTAL	$	175,177

(iii) Overseas Suppliers

Combridge Jackson	$	30,516

(c) The Northern Territory Library Service still purchases books direct from publishers when this is financially advantageous. As will be seen from the suppliers listed in (b)(i) and (b)(ii) above, the publishers who are indicated by an asterisk are primarily government departments and authorities and publishers such as Encyclopedia Britannica who do not deal through the retail book trade. If Northern Territory Library Service were to purchase official (i.e., government) publications through the book trade it would cost more because no discounts are given to booksellers who would then have to charge an on-cost.

(d) The total expenditure by the Northern Territory Library Service on book purchases in the financial year 1980-81 was $406,990.

Queensland Mines Yellowcake

552 Mr B. COLLINS to MINISTER for MINES and ENERGY

1. Is he able to say whether or not Queensland Mines Limited has been paid for its yellowcake that has already been exported?

2. Can he advise the whereabouts of the first shipment of yellowcake that left Darwin in the vessel 'Mayflower'?

ANSWER

1. Under existing arrangements Queensland Mines Limited is due for payment for its uranium oxide product on dispatch from Australia. I understand that the arrangements have been observed in regard to all product exported to date.

2. Uranium oxide is transported through Singapore for treatment processing (conversion and enrichment) in Canada, the United States of America, the United Kingdom or Europe, depending on the capacity of each country to accept the product.

   After dispatch from the Northern Territory it may take up to 2 years for the processed product to reach its final destination in Japan.

   The international movement of uranium oxide is a matter for the Australian Safeguards Office. In the interest of international security, the whereabouts of particular shipments at any particular time is classified information, not available for public record or general release.

Buffalo Domestication

554 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

1. Is it the intention of the government to introduce legislation for the control of or encouragement of domestication of buffalo?

2. What progress has been made towards domestication of buffalo to this point?

ANSWER

1. The government has no intention, at this time, to regulate the buffalo industry, outside of already existing regulations.

2. I refer the honourable Leader of the Opposition to my answer to question No. 548.

Market for Donkey Meat

555 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

Has his department undertaken any investigation into potential markets for donkey meat and, if so, what are the results of such investigations?

ANSWER

The Department of Primary Production has undertaken investigation into potential markets for donkey meat.

The conclusions are that the prices available for donkey meat, the yields of donkey meat which may be obtained, and the costs of harvesting, processing and marketing the product, does not make donkey meat production an attractive possibility.

Bali Cattle Research Project

556 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

1. On what advice did the government make its decision to cancel the Bali cattle research project?

2. What are the details of this advice and source of information?

ANSWER

The decision was made based on information and advice supplied by the Department of Primary Production.

Moratorium on the Granting of Prawning Licences

557 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

When did the moratorium on the granting of prawning licences to operate between Cape York and Cape Ford end?

ANSWER

The moratorium on the granting of prawning licences for the Declared Management Zone (DMZ) of the Northern Prawn Fishery (NPF) which runs between Cape Ford and Cape York is still in effect.

ADMA Crop Purchase Scheme

558 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

Does the ADMA crop purchase scheme apply to crops totalling less than 5 tonnes?

ANSWER

The ADMA has not set a minimum quantity of grain to be received at either the Katherine depot or at Adelaide River. The Authority recognises the necessity of catering for growers with small quantities of grains as an incentive for them to expand production over time.

NTEC Transferees

559 Mr LEO to MINISTER for MINES and ENERGY

1. How many compulsory transferees from the NTPS to NTEC have applied for transfer or promotion back to NTPS?
2. How many employees have succeeded in transferring back from NTEC to NTPS?

ANSWER

1. No records are held of transfers requested and not successful. This information would be confidential to the applicant.
2. Of the 600 compulsory transferees to NTEC on 1 July 1978 the following transfers have taken place: (a) to the APS - 22; (b) to the NTPS - 34.

   This information is derived from recruitment records.

Northern Prawn Fishery

560 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

Given that the northern prawn fishery is heavily dependent upon Japan for the sale of its production and that the price for prawns sold to Japan has fallen considerably recently, what efforts have been made by the government to search out and secure new markets for Territory prawns?

ANSWER

The marketing of prawns taken in the northern prawn fishery has been almost entirely carried out by the various processing companies involved. Recent discussions with the processors have indicated that they prefer to continue developing their own market outlets.

Processing of NT Prawns

561 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

1. Is he aware that many prawns caught in Territory waters are shipped to Western Australia where they are processed and then returned to be sold in Darwin?
2. If so, what action has he taken to enable more prawns caught in Territory waters to be processed in the Territory for the local market?

ANSWER

1. Yes.
2. The information obtained from local retailers is that the local market is adequately supplied with processed prawns.

Buffalo Industry Conference

562 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

Since the Buffalo Industry Conference in February 1981, what action has the government taken to encourage a viable buffalo industry in the Top End?

ANSWER

Considerable progress has been made in the domestication of buffaloes, and a great deal of information is now available to assist private enterprise in the establishment of buffalo projects.

Additional support has been given through the introduction of compensation for buffaloes in which tuberculosis is detected at NT abattoirs under the National Tuberculosis Eradication Campaign.

Brucellosis and TB on Aboriginal Leases

563 Mr BELL to CHIEF MINISTER

Did he publicly declare Aboriginal-owned pastoral leases to be more prone to the incidence of brucellosis and tuberculosis?

ANSWER

If there has been such a public declaration the honourable Member will no doubt be able to find it.

Travel by Minister for Mines and Energy

565 Mr BELL to CHIEF MINISTER

I refer to the answer to question 111 and ask what is the nature of the 'official business' conducted by the Minister for Mines and Energy on the trip undertaken on 9 July 1979 at a cost of $748?

ANSWER

The nature of the 'official business' conducted by the Minister for Mines and Energy on the trip undertaken on 9 July 1979 was to meet with the President, Ali-Curung Council, Warrabri (Mr Gus Williams), to hold discussions with the Ali-Curung Council about the NT liquor legislation and to visit the Community Health Centre at Warrabri.

Land Rights Inquiry

566 Mr BELL to CHIEF MINISTER

Why did the NT government decline to make submission to the Commonwealth inquiry into the operation of the Land Rights (NT) Act?

ANSWER

The NT government did not present a formal submission to Mr Rowland but he had a number of discussions with Ministers and departmental officers. It should be noted that the Northern Land Council provided no formal submission, but no doubt its officers were also available for discussions. It was obvious that before there would be any changes there would have to be consultation between both governments and the land councils. The NT government considered it would be preferable to raise its problems at a government to government level, which it did.

Panorama Guth in Alice Springs

567 Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

Has any action been taken by the Museums and Art Galleries Board to acquire Panorama Guth in Alice Springs, or any of the material therein?

ANSWER

Discussion has occurred between Mr Guth and a member of the Museums and Art Galleries Board staff. As a consequence, the Aboriginal collections in Panorama Guth have been documented and photographed. Mr Guth has

indicated that he wishes to sell Panorama Guth as a total entity. The Museums and Art Galleries Board would only be interested in acquiring the Aboriginal material because it is secret or sacred. It does not regard the building and the panorama as being an appropriate acquisition to its display facilities and the permanent art collection of the Northern Territory.

Tender Approvals - Progress Associations

568 Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

1. Has the Ti Tree Progress Association, or any other progress association in the Northern Territory, been given the right to approve of tenders allocated by NT government departments?

2. If so, under what terms and conditions do such approvals operate?

ANSWER

No progress association in the Northern Territory has been given the authority to approve tenders allocated by NT government departments.

As the honourable Member for MacDonnell has specifically mentioned the Ti Tree Progress Association, I should perhaps clarify a point.

Funds were provided to the Ti Tree Progress Association for the provision of municipal services to the town.

The association successfully negotiated a contract with a separate body to have the town cleaned up. I believe there is a vast difference between the simple contractual action taken by the Ti Tree Progress Association and the implied meaning which specifically refers to tenders allocated by NT government departments.

Giles House

569 Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

1. Will Giles House continue to be used as a substitute care residential facility pending its reclassification as a juvenile corrective insti- institution?

2. If not, will the government provide an alternative facility for the purpose of substitute care of children awaiting placement?

3. If not, why not?

ANSWER

1. Giles House is an institution designed for the detention of juvenile offenders and is currently utilised for that purpose. A principle which has been recognised and widely accepted by child welfare authorities throughout the western world is that children committed to the care of welfare authorities for reasons other than offending should not be detained in the same institutions and under the same conditions as juvenile offenders. This principle holds no matter how good the programs may be within the institution concerned and, in the case of Giles House, the program is widely recognised to be of the highest quality.

2. In Alice Springs the Department of Community Development funds St Mary's Child and Family Welfare Services for the provision of substitute care services through its family homes. St Mary's has a long history of involvement in the provision of substitute care services and the government regards the partnership between St Mary's and the department as being a highly suitable arrangement for the provision of these

services. Currently 3 family homes are funded by the department and these are seen as offering quite adequate capacity for future needs.

3. Not applicable.

Tourism and Heritage Conference

570 Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

1. Was his department approached to support the Tourism and Heritage Conference scheduled for March 1982?

2. If so, will his department support it and, if not, why not?

ANSWER

1. Yes.

2. No. Basically the conference program appears to be oriented towards tourism, the natural environment and Aboriginal cultural issues.

   I understand the conference is being financially supported by the Department of the Chief Minister, Conservation Commission of the Northern Territory, and Northern Territory Tourist Commission, which is a good measure of Northern Territory government support for the conference.

   The Department of Aboriginal Affairs and Aboriginal Arts Board are also involved.

   In the circumstances, I do not consider it necessary or appropriate that the conference be supported by the Department of Community Development.

Mortality Specifics

571 Mr BELL to MINISTER for HEALTH

Does his department (a) compile age-specific mortality statistics, and (b) if so, will he release them publicly?

ANSWER

Compilation of age-specific mortality statistics is not a function of the Department of Health but is undertaken by the Australian Bureau of Statistics which receives information directly from the Registrar of Births, Deaths and Marriages.

The Australian Bureau of Statistics releases information on deaths for each of the states and territories in an annual publication titled 'Deaths Australia' (ABS catalogue no. 3302.0).

Outpatient Treatment at Alice Springs Hospital

572 Mr BELL to MINISTER for HEALTH

How many people seeking outpatient treatment at Alice Springs Hospital during the 12 months ending October 1981 had suffered injury through broken glass?

ANSWER

Statistics relating to injuries through broken glass are not kept in Alice Springs Hospital. Outpatient attendances are classified according to groups such as motor vehicle accidents, domestic violence, gynaecology, etc.

Community at Kintore Ranges

573 Mr BELL to MINISTER for HEALTH

What arrangements has his department made to service the community at the Kintore Ranges?

ANSWER

The community at Kintore Ranges receives health care through the Lyappa medical service from Papunya. This is at the request of the Kintore Range community. Although the department does not provide any direct health service, the Alice Springs Hospital provides support services to all central Australian residents regardless of which organisation supplies primary health care.

Caravans at Ti Tree School

574 Mr BELL to MINISTER for EDUCATION

1. How many caravans were supplied to the Ti Tree School for the Aboriginal Adult Education Program and at what cost?
2. Where are the caravans now and for what purpose are they being used?
3. When were the caravans moved?

ANSWER

1. Twenty caravans were located at Ti Tree for the purpose of establishing in the southern region a facility for providing the first year of an Aboriginal teacher training course, the cost involved being $75,000.

2. & 3. All of the caravans have now been relocated. This process started in February 1979 and was completed in October 1981 when the last 2 caravans were sold at auction.

Set our below are details of each caravan's relocation:

1. Tennant Creek Area School - teacher accommodation.
2. Kurrajong, outstation of Utopia - teacher accommodation.
3. Tennant Creek - Karguru - teacher accommodation.
4. Willowra - teacher accommodation.
5. Alice Springs - mobile reading centre.
6. Ida Standley - mobile pre-school.
7. Mt Ebenezer - teacher accommodation.
8. Braitling - janitor accommodation.
9. Amaroo, outstation of Utopia - teacher accommodation.
10. Yirara - teacher accommodation.

11. & 12. Sold by tender 21 October 1981.

13. - 17. Relocated to Darwin - janitor accommodation on school sites.

18. - 20. Transferred to Health Department, Alice Springs.

Apatula Community

575 Mr BELL to MINISTER for EDUCATION

When will a full-time adult educator be appointed to service the Apatula community?

ANSWER

There has been some difficulty in obtaining a suitably qualified adult educator for the Apatula community. The community has indicated it wants a middle-aged person with a family. The difficulty was further compounded by the lack of suitable accommodation - a difficulty which has only recently been overcome. Despite advertisements throughout the Territory no applicants are available for Apatula. A national advertisement is now being prepared for adult educators and, hopefully, a suitable person willing to work at Apatula can be identified early in the new year.

Pre-apprenticeship Courses for Young Aboriginals

577 Mr BELL to MINISTER for EDUCATION

I refer to his press release of 24 March 1981 in which he stated that pre-apprenticeship courses for young Aboriginals were expected to start in July this year and ask (a) why the courses have still not commenced, and (b) why the Priest Street complex remains vacant and apparently in need of renovation?

ANSWER

The reason for the delay in commencing the pre-apprenticeship courses for young Aboriginals at Priest Street which were expected to start in July this year was the difficulty in reaching agreement with the Commonwealth for funding the courses. This has now been resolved and quotations for renovation work were called on 2 December with a closing date of 16 December . Provided a satisfactory contract for this work is achieved and the contractor can commence immediately after the Christmas break, it is expected that the work will be completed by mid-February.

A pre-apprenticeship in automotives will then be able to commence.

Two lecturers have been selected and are expected to arrive in mid-January to commence preparation for the course.

Appropriate equipment has already been ordered by the college.

Housing Commission Dwellings - Tennant Creek

578 Mr BELL to MINISTER for LANDS and HOUSING

How many Housing Commission dwellings will be (a) built in Tennant Creek this year, and (b) how many of these dwellings will be allocated for the use of Aboriginal tenants?

ANSWER

Five houses and 44 units will be constructed this year. Sixteen bed-sitters will be converted to 1 bedroom units.

Aboriginal applicants on the Housing Commission waiting list will be allocated accommodation in their turn in the normal manner.

Purchase of Housing Commission Units and Townhouses

579 Mr BELL to MINISTER for LANDS and HOUSING

How many tenants have purchased or are in the process of purchasing units

and townhouses from the Housing Commission?

ANSWER

A total of 30 tenants are in the process of purchasing townhouse units from the Housing Commission.

Commonwealth Government Purchase of Lots in Sadadeen Subdivision

580 Mr BELL to MINISTER for LANDS and HOUSING

How many lots in the Sadadeen subdivision have been purchased by the Commonwealth government to provide rental housing stock for its public servants?

ANSWER

The Sadadeen subdivision is being sold privately. The Member should direct his inquiries accordingly.

Tenders for Lease of Esplanade Lodge, Melanka Lodge and Kuringai Lodge

581 Mr BELL to MINISTER for LANDS and HOUSING

1. Have tenders been received for a 5-year lease for Esplanade Lodge, Melanka Lodge and Kuringai Lodge?

2. How much space does the government intend to reserve in these places for emergency accommodation and for public servants?

ANSWER

1. The calling of tenders for the lease of the NT hostels has been postponed until March 1982. Because the existing management agreement with Commonwealth Accommodation and Catering Service Pty Ltd (CACS) expires on 9 January 1982, I have approved an interim arrangement whereby a local Darwin company will manage the hostels under an agreement similar to that with CACS for the period 10 January 1982 to 30 June 1982.

2. (i) Initially, 10 rooms in the Esplanade Lodge, 4 rooms in Melanka Lodge and 2 rooms in Kuringai Lodge will be reserved for the purpose of providing emergency accommodation at the hostels, under a plan currently being formulated through the Housing Commission and the Department of Community Development.

   (ii) Currently 28% of all hostel accommodation is occupied by public servants (both NT and Commonwealth) and at least this amount of accommodation will be reserved for their continuing use under both the interim arrangement to 30 June 1982 and the leasing arrangements after that date. It is intended that the situation be reviewed on a regular basis.

Recruitment of Departmental Staff by P.A. Australia

582 Mr BELL to MINISTER for TRANSPORT and WORKS

I refer to question 265 regarding the employment of a private organisation, P.A. Australia, to recruit staff at a cost of $23,000 and his reply that such companies were employed when particular expertise or staff were not available in the department and that the employment of private companies leads to savings in time and money, and ask -

1. Why have not appropriate staff with the required expertise been recruited by his department, with or without the help of outside companies?

2. How can the spending of $23,000 lead to savings?

ANSWER

1. As each vacancy arises, a decision is taken as to the best method of attracting the desired calibre of applicants and this may lead to the use of external organisations. During the period March-June 1981, P.A. Australia was used on 2 occasions in Australia-wide searches for staff for the Department of Transport and Works -

   (a) Services Division: 7 positions, mainly professional/technical and P.A. were used because of earlier involvement in review of plant operations.

   (b) Administration Division: 4 senior positions in Manpower Branch. P.A. were used to seek external applicants on an Australia-wide basis.

   Of the 11 positions involved, 5 were filled as a result of P.A. exercise and a further position is still under review.

2. The value in using external consultants lies in the department's ability to use their expert knowledge of selected labour markets, interstate interviewing facilities, and presenting the department with a short list of suitable applicants. Such activities enable departmental staff to concentrate on productive tasks within the department.

   The use of consultants is seen as an alternative to, not a replacement for, the utilisation of our own staff as the occasion demands.

Poker Machines in NT

583 Mrs O'NEIL to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

1. Has the government commissioned a public opinion survey regarding the possible introduction of poker machines into licensed clubs in the NT, and related matters?

2. If so, (a) which polling organisation conducted the survey, (b) what questions were asked, (c) what were the results, and (d) what was the criteria used to determine the size and composition of the sections of the community such as age, sex, occupation, town of residence and membership of clubs?

ANSWER

As has been explained to the Legislative Assembly on 9 June 1981, a public opinion survey into community attitudes towards racing and gaming in the Territory was conducted as part of research for a review of racing and gaming legislation. Information gathered as part of that research is considered confidential.

Brucellosis and Tuberculosis Eradication Campaign

584 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION

Why are compensation rates for the brucellosis and tuberculosis eradication campaign variable with regard to types of cattle but fixed with regard to quality?

ANSWER

The approved compensation values for cattle slaughtered as a result of Brucellosis and Tuberculosis Eradication Program are shown below.

Tuberculosis and Brucellosis Compensation Scheme

Compensation Values 1 July 1981 to 30 June 1982

Category of Stock	Darwin and Gulf District	Victoria River District	Barkly Tablelands District	Alice Springs
	$	$	$	$
Cattle				
Calf	35	35	45	45
Weaner	55	55	70	70
Store steer	90	100	110	110
Fat steer	140	155	180	180
Store bullock	110	120	120	120
Fat bullock	160	180	270	270
Breeding cow	85	90	130	130
Fat cow	110	135	180	180
Bulls under 7 years of age	180	180	180	180
Bulls mickey or aged	80	80	80	80

	All Districts
Buffalo	$
Calf	40
Weaner	100
Cow	110
Bull	140
Heifers	105

These values are based on the estimated farm-gate value of the types of cattle, and also on market prices. The values vary from district to district because the average weight of cattle marketed varies, and the realised values vary between the districts.

The compensation values have been agreed with the cattlemen's associations as fair and reasonable.

Water Supply to Beswick Station

585 Mr MacFARLANE to MINISTER for COMMUNITY DEVELOPMENT

What steps are being taken to provide a good water supply to Beswick Station?

ANSWER

Water Division of the Department of Transport and Works will undertake an investigation to locate an alternative water source at Beswick during the next dry season. A preliminary report will be submitted to the Water Needs Committee on these findings. Should the investigation prove successful, upgrading of the water supply will proceed as proposed on the Forward Works Program for 1983-84.

MacDonnell Range National Park

586 Mr BELL to CHIEF MINISTER

I refer to his reply to my question regarding the gazetting of a MacDonnell Range National Park and ask what if any difficulties have been encountered in the acquisition of land for the park and, if so, when and how will these be overcome?

ANSWER

Negotiations for the acquisition of suitable land in the West MacDonnells

for the creation of a national park have been protracted owing to the need to deal with several landholders, including company holdings where consent is required from all parties. Delays have also been occasioned by the need to muster stock from the rugged and difficult terrain being sought for national park purposes. The Conservation Commission is optimistic that these difficulties can be overcome.

Other acquisition proposals are proceeding satisfactorily in the Central and East MacDonnells.

Flagpoles for NT Schools

587 Mr BELL to CHIEF MINISTER

Has he ordered flagpoles to be erected at all schools in the Northern Territory?

ANSWER

Orders have been arranged through the Department of Transport and Works for flagpoles to be erected at all Northern Territory government buildings including schools. Orders have been placed with suppliers.

NTDC Assistance to Aboriginal Organisations

588 Mr BELL to TREASURER and MINISTER for INDUSTRIAL DEVELOPMENT

I refer to his reply to my question regarding the Northern Territory Development Corporation's response to application for assistance from Aboriginal organisations and ask -

Does the Northern Territory Development Corporation automatically refer applications from Aboriginal organisations to the Aboriginal Development Commission?

ANSWER

Any inquiry from an Aboriginal organisation is referred to the Aboriginal Development Commission as a matter of course.

The reason for this is that the Aboriginal Development Commission was specifically set up to provide finance and in some cases grants to Aboriginal organisations. The finance provided is normally on easier terms and interest rates than the finance that could be provided by the Northern Territory Development Corporation.

Caravan Parks Survey

589 Mr BELL to MINISTER for LANDS and HOUSING

I refer to a survey by Territory Research Associates entitled 'NT Caravan Parks' conducted in March and April 1981 and ask -

1. Will the government take action on recommendation No. 2 that 'backyard parks ... not conforming to the requirements of the Act ... be required to cease operations'?

2. If so, how is it intended to house the users of backyard parks who are 'unqualified' but 'probably of relatively high incidence' according to the report?

ANSWER

The government is aware of the problems associated with illegal and backyard caravan parks, and will not be idle where unlawful use of caravans as permanent homes is causing nuisance or offence to surrounding land owners.

At the same time the residential shortages in some Territory centres is acknowledged and the government has no intention of exacerbating the problem with wanton and unnecessary action which would deprive people of existing accommodation.

Studies undertaken by government departments and their agents are aimed at ultimate resolution of the housing needs in all centres and, through it, the elimination of unlawful use of caravans as residences.

Housing Commission Building Program for Tennant Creek

590 Mr BELL to MINISTER for LANDS and HOUSING

In the light of the Peko sackings, will the Housing Commission building program for Tennant Creek in the 1981-82 Budget be maintained?

ANSWER

The NTPS building program has been maintained.

The general public building program has been revised. Twenty-five 2-bedroom and 1 1-bedroom units will be constructed plus 6 1-bedroom units for pensioners.

Napperby Station

591 Mr BELL to MINISTER for LANDS and HOUSING

Has an application been lodged for a special purposes lease or sub-lease on Napperby Station and, if so, when will it be granted?

ANSWER

On 20 December 1977, the Department of Aboriginal Affairs confirmed advice from the Laramba Community that as the lessees of the Napperby Station have agreed to the continued occupation of the existing camp area, no formal request for an excision of land is required. To date, no further advices have been received.

Napperby Station

594 Mr BELL to MINISTER for HEALTH

Has a health clinic been erected at Napperby Station and, if not, why not?

ANSWER

The proposed health clinic at Napperby Station has not been erected because agreement cannot be reached on a suitable site.

Staff Numbers in Chest X-ray Area

595 Mr BELL to MINISTER for HEALTH

Has there been a reduction of departmental staff in the chest x-ray area and, if so, why?

ANSWER

Yes. Several employees in the administrative classification have been re-deployed to positions elsewhere in the Department of Health. This was possible because of the devolution of responsibility for tuberculosis control from central to regional administration and the consolidation of x-ray services at Darwin Hospital as part of the department's movement from the old Darwin Hospital site.

Oral History Program

597 Mrs O'NEIL to CHIEF MINISTER

I refer to question 185 regarding the Oral History Program, and ask -

1. How many persons have been interviewed by the Oral History Program?
2. Why are only 13 records of these interviews held at the Australian Archives?
3. What arrangements are made for the safe storage and custody of material not transferred to the archives?
4. Under what conditions is the material not in the archives made available to researchers?
5. If these conditions of access are different from those applying to material held at the archives, in what way are they different, and why?
6. What action will be taken to expedite transfer of material to the archives?

ANSWER

1. In excess of 260 persons have been interviewed for the Oral History Program.
2. Transcripts held at the Australian Archives are those in which the interviewer has placed some special restriction as to access and use. Where the only condition placed on the transcript relates to a suitable acknowledgement to the interviewer these transcripts are placed in the State Reference Library.
3. All tapes and transcripts are held in a locked filing cabinet in the Executive Officer's room. The Chairman and the Executive Officer have the only access to the keys.
4. No material is made available to researchers which is not in the archives or the State Reference Library except for members of the committee and historians who have won the Northern Territory government's history award and who are currently researching their projects.
5. Conditions of access are laid down by the interviewee. All material, whether in the archives, State Reference Library or in the History Unit's offices, is covered by the conditions laid down by the interviewee.
6. Before material is placed in the archives the transcription has to be checked by the interviewee and the History Unit. This is done as soon as practicable within existing resources.

NT Traffic Signs

598 Mr SMITH to MINISTER for TRANSPORT and WORKS

1. Where are Northern Territory traffic signs purchased from and, if purchased interstate, why?
2. How much did the government spend on traffic signs in (a) 1979-80, and (b) 1980-81?
3. Has the government investigated whether any Territory based firm can manufacture and supply traffic signs?

ANSWER

1. The NT government has been obtaining recent supplies of traffic signs from firms in Melbourne and Brisbane. The 3 firms involved were the only tenderers to the NT government for the supply of traffic signs.

Contracts were let on the basis of competitive tender. The contracts expired on 30 November 1981.

2. (a) $276,000; (b) $197,000.

3. Investigations were made into local manufacturing capacity prior to reallocation of contracts. Detailed discussions were held with representatives of 2 local firms. It is considered both firms have capacity to manufacture at least some of the local requirements.

   New tenders for the supply of traffic signs were advertised on 29 October 1981. Six local firms were invited to tender but declined. Tenders were received from 7 firms including 2 from the Northern Territory. Tenders are currently being evaluated.

Railway, Darwin Wharf - Berrimah

599 Mr SMITH to MINISTER for TRANSPORT and WORKS

1. Has a route for the standard gauge railway line linking the Darwin wharf and the proposed railway terminal at Berrimah been determined?

2. If so, what is the route?

ANSWER

While a preliminary examination has been made there has as yet been no final decision. I would be pleased to advise the honourable Member when the route has been determined.

Access Roads to New Darwin Airport Terminal

600 Mr SMITH to MINISTER for TRANSPORT and WORKS

1. Has the location of an access road or roads to the new Darwin airport terminal been determined?

2. If so, what is the location?

ANSWER

1. Yes. The location of the access road is in accordance with the Darwin airport traffic study conducted by the consultants, Maunsell, for the Department of Transport, Australia.

2. The access road route roughly follows the alignment of Rapid Creek and the aerodrome boundary ending at the new complex. It will connect with McMillans Road between Rapid Creek and Rapid Creek Road.

'Minimum Security' Prisoners at Gunn Point

602 Mrs LAWRIE to MINISTER for COMMUNITY DEVELOPMENT

1. Are male prisoners classified as 'minimum security' permitted to go fishing and swimming at Gunn Point at times?

2. If so, when and what similar provision will be made for female prisoners?

ANSWER

1. All prisoners at Gunn Point Prison Farm are classed as 'minimum security'.

   Fishing is permitted on some Saturday afternoons but only under the supervision of 2 prison officers and if there are no members of the public using the beach.

   For both safety and security reasons, these activities require super-

vision and this is dependent upon availability of staff.

2. There are no facilities for women prisoners at Gunn Point which at this stage of its development will remain a male prisoner institution.

Transfer of Prisoners

603 Mrs LAWRIE to MINISTER for COMMUNITY DEVELOPMENT

1. Are male prisoners at Berrimah gaol transferred to Gunn Point Prison Farm following department assessment?

2. If so, what similar provision will be made for female prisoners and when?

ANSWER

1. All prisoners in the Northern Territory are subject to a classification process as soon as possible after reception into prison. This is carried out by a classification committee that makes recommendations to the Director of Correctional Services. The committee is made up of senior prison officers, including some from the Gunn Point Prison Farm. Suitable Alice Springs prisoners are included in this process.

2. Female prisoners can only be placed at the Darwin or Alice Springs prisons since these are the only institutions with appropriate facilities. Gunn Point is not likely to receive facilities for female prisoners in the foreseeable future.

Grants-in-Aid, Nhulunbuy Sporting Bodies

605 Mr LEO to MINISTER for YOUTH, SPORT and RECREATION

What amount was provided through grants-in-aid to Nhulunbuy sporting bodies during 1980-81?

ANSWER

A total of $27,199 was provided through grants-in-aid to Nhulunbuy sporting bodies during 1980 and 1981.

Industries Training Commission

606 Mr MacFARLANE to MINISTER for EDUCATION

Does the Industries Training Commission examine employers' records to ensure apprentices are fairly treated?

ANSWER

The Industries Training Act 1979 sets out the conditions under which apprentices are to be employed and the NT Industries Training Commission is empowered to oversight the enforcement of these conditions, which include the on-the-job training of apprentices, their attendance at college and the standards they must acquire during their apprenticeship.

More specifically, section 72(1) of the Act provides that an apprenticeship supervisor employed by the commission may inspect employers' records in relation to the employment of an apprentice or to make inquiries of an apprentice to ascertain whether the provisions of the Act are being complied with. Any person who wilfully obstructs a commission officer in carrying out this role is guilty of an offence and is liable to a fine of $100. Further, section 73(1) of the Act requires the production to the commission of such books, papers or other documents, other than a tax return, kept in relation to the employment of an apprentice or person within the time specified in the notice. Once again a penalty of $100 can be served on a person contravening such a notice.

Apprenticeship supervisors of the commission regularly visit employers to ensure that both parties are meeting their obligations under the indenture and that appropriate training is being provided. In cases where there is some question as to the adequacy of training, then records may be examined where necessary.

In a number of limited cases the NT Industries Training Commission is also required to regulate the rates of pay and conditions for apprentices indentured to employers who are not respondent to an award, agreement or determination in the Northern Territory.

Aborigines on St Vidgeon and Eva Valley Stations

608 Mr MacFARLANE to MINISTER for LANDS and HOUSING

Are Aborigines camping on St Vidgeon and Eva Valley Stations trespassing or merely re-establishing traditional links with their country?

ANSWER

(i) The Aborigines who have camped at St Vidgeon Station homestead area did so without the permission of the mortgagees. The Northern Land Council was advised by the Secretary, Department of Lands, in July 1981 that the Aboriginal group was considered to be trespassing.

(ii) In the case of Eva Valley Station the Aborigines camped apparently with the agreement of the former lessee, Mr B.G.L. Killen, and their continued presence has not been objected to by the mortgagees.

Electricity Supply at Mataranka

610 Mr MacFARLANE to TREASURER

Is there sufficient electric power at Mataranka to meet recent developments? If not, does the government intend to introduce rationing of power?

ANSWER

The maximum demand at Mataranka is approaching 200 kilowatts and with the imminent connection of several major loads is likely to reach 300 kilowatts over the next few months.

As the existing 2 machines in the power station are only rated at 200 kilowatts each, arrangements are being made for parallel operation of the units prior to these major loads being connected. This will enable the power station to adequately supply these loads. Maintenance will be carried out during periods of low load.

Public Servant Pilots

612 Mr MacFARLANE to CHIEF MINISTER

1. Are veterinary officers, stock inpsectors and other public servants required to visit widely separated centres in the Territory and who possess pilot licences encouraged to fly themselves and so reduce travelling time between centres?

2. Are such officers encouraged or assisted to obtain pilot licences?

ANSWER

1. No specific encouragement is given to field staff who possess pilot licences to fly themselves to centres within the Territory.

2. As with motor vehicle licences, employees who wish to obtain a pilot licence are not specifically encouraged nor financially assisted.

Alleged Rape near Top Springs

613 Mr MacFARLANE to CHIEF MINISTER

What were the circumstances of the alleged rape, robbery and assault near Top Springs recently?

ANSWER

On 23 November 1981 at 6.20 am the Katherine police were notified by radio telephone from Top Springs concerning an alleged serious assault having taken place on the Buchanan Highway, 27 kilometres south of Top Springs.

Katherine Criminal Investigation Branch members attended at Top Springs and interviewed the complainant, a Willy Breider (European), and his de facto wife, Elsie Raymond (Aboriginal), and their 4 children.

The complainant and his family had been travelling between Top Springs and Camfield Station when their Toyota vehicle broke down between 10 pm-11 pm on 22 November 1981.

In the early hours of the morning, approximately 2 am, on 23 November 1981, another vehicle containing approximately 12 male Aboriginals stopped where the complainant's vehicle was broken down.

Several males came over to the complainant's vehicle.

One male assaulted the complainant and broke his nose.

While this assault was taking place other male persons were taking the complainant's property, which included a quantity of beer and food, from his vehicle.

This group then caused the family to flee from the area with the exception of one of the females, Pauline Murrimal, aged 13 years, who was forcibly detained and taken into the surrounding bush where she was allegedly raped.

Police investigations resulted in the following alleged offenders appearing before the Katherine Court of Summary Jurisdiction on 7 January 1982:

Happy Barcoo	Receiving stolen property. No appearance. Bail $100 estreated. Withdrawn
Robbie Peter	Receiving stolen property. Fined $100 I.D. 4 days
Luke Dodd	Receiving stolen property. Fined $75 I.D. 3 days
Gilbert Dodd	Rape. Committed for trial next sittings of Supreme Court in Darwin in March 1982
Richard Algy	Rape. Committed for trial next sittings of Supreme Court in Darwin in March 1982
Bruce Dodd	Rape. Committed for trial next sittings of Supreme Court in Darwin in March 1982
Alan Douglas	Attempted rape. Committed for trial next sittings of Supreme Court in Darwin in March 1982
Hal Peanut	Aid and abet commission of offence (Rape). Committed for trial next sittings of Supreme Court in Darwin in March 1982
Ross Dodd	Aid and abet commission of offence (Rape). Committed for trial next sittings of Supreme Court in Darwin in March 1982.

Katherine Police District

614 Mr MacFARLANE to CHIEF MINISTER

1. Is it a fact that the Katherine Police District is never up to establishment strength because of officers on leave or attending training courses and resignations?

2. Are 2-man police stations in the district seldom at establishment strength for the same reasons?

3. If so, will he ensure that the district is staffed at establishment level to enable police services to function at full efficiency?

ANSWER

1. Katherine Police Station is headquarters for No. 3 Division, Northern Command, and as such the establishment at this station includes a relieving component of 6 members who are required to relieve at 9 stations throughout the division.

   Gazetted establishment at Katherine is 1 Sergeant First Class, 6 Sergeants Third Class and 21 Constables, at total of 28 members. This station also has the services of a police aide.

   With 6 members required for relieving duties actual working establishment at Katherine Police Station is therefore 22 members, more than enough to provide efficient service for the population of Katherine. Average working strength at that station for the 12 months ending December 1981 was 20 members or 90% of actual working establishment. This was despite 5 resignations and the necessity for 10 members to attend 7 training courses for a total of 143 days during that period.

   Katherine Police Station is currently 1 Third Class Sergeant under strength. However, this position should be filled after the Third Class Sergeant Promotions Board sits in the first week of March this year.

2. Of 7 2-man stations in the division only 2 were under strength at any time during the 12 months ending December 1981: Mataranka for a period of 2 months and Kalkaringi for a period of 6 months. The former could quickly be assisted from either Maranboy or Katherine should the need arise and the latter in similar circumstances would be assisted by members from Lajamanu.

   Both stations are currently at full strength as are all other 2-man stations in that division.

   No problems have been experienced in providing efficient police services within the division.

   The following table shows actual and gazetted strength at Katherine and all 2-man police stations within No. 3 Division, Northern Command, for the 12 month period ending December 1981:

KATHERINE POLICE STATION AND 2-MAN POLICE STATIONS

No. 3 DIVISION, NORTHERN COMMAND

	1*		2		3		4		5		6		7		8

DEC	22	17	2	2	2	1	2	2	2	2	2	1	2	2	2	2

Average 20

1 - Katherine 3 - Kalkaringi 5 - Maranboy 7 - Ngukurr
2 - Borroloola 4 - Lajamanu 6 - Mataranka 8 - Timber Creek

G - Gazetted establishment. A - Actual establishment.

* Katherine - On 23 June 1981 and 4 January 1982 confirmed with OIC Katherine Police Station that their 'Actual Strength' includes all General Duties.

\+ Gazetted establishment + 6 relief.

3. Police services are functioning efficiently in the Katherine Police District and within the division and will continue to do so.

Interest on Commonwealth Funds to NT

615 Mr MacFARLANE to TREASURER

1. Is interest earned on Commonwealth funds received by the Territory during the time between receipt and expenditure?

2. If so, is such interest used to provide additional housing for low income families, assistance for the Electricity Commission and similar needs?

ANSWER

1. Interest is earned on cash balances held from day to day by Treasury, including any funds received from the Commonwealth. Funds held or invested are not distinguished according to source, since they are the temporary residue of a continuous stream of payments and receipts. Interest is therefore not imputed to particular sources or holdings except in a few instances such as the NT Housing Commission.

2. It follows that interest earnings are not hypothecated to particular types of expenditure but instead are placed in the general funding pool for allocation through the budget to expenditure needs including, as determined by the government from time to time, those identified in the question.

Sale of Government Houses

616 Mr MacFARLANE to MINISTER for LANDS and HOUSING

1. Are prices for government houses sold to occupants determined on the basis of replacement cost?
2. How many government houses in Katherine have been sold to their occupants?
3. How many new government houses have been built in Katherine to replace those sold and where have they been built?

ANSWER

1. Sale prices of houses sold under the NTPS Staff Sales Scheme are determined at whichever is the greater of (a) the Valuer-General's market valuation; or (b) the average of Valuer-General's market valuation and the Housing Commission's replacement cost.
2. Since 1 July 1978 to end of 1980-81 financial year, the commission had sold 7 houses to tenants in Katherine under the NTPS Staff Sales Scheme. A further 10 houses have been sold to date during the current financial year.
3. Since 1 July 1978, the Housing Commission has built 8 staff houses in Katherine. A further 10 NTPS houses are in current year's program for construction at Katherine East development.

The houses built and those to be built, are to meet demand for rental accommodation, rather than to specifically replace any dwellings that may have been sold.

Katherine Building Inspector

617 Mr MacFARLANE to MINISTER for LANDS and HOUSING

When will a building inspector be stationed permanently in Katherine to provide a uniform interpretation of building regulations for builders and prospective builders?

ANSWER

The stationing of a building inspector permanently in Katherine was last reviewed in November 1981 and it was not justified by the volume of work. There is an average of 46 building approvals per year.

One result of the review was an upgrading of service. Inspections have been increased from 1 to 2 a month.

The element in the uniform interpretation of building regulations contributed by building inspectors is the exactitude with which the regulations are applied in the field. Interpretation is the province of the Building Board and its plan examination section. Inspectors for the Katherine area are now being changed at 3-monthly rather than 1-monthly intervals and consistency in inspection standard for the longer period is ensured.

Television Service to Mataranka

620 Mr MacFARLANE to MINISTER for TRANSPORT and WORKS

Is he aware of any reasons why televison services have not been made available to residents of Mataranka?

ANSWER

Information obtained from Telecom reveals that the link fed system for a television service to Mataranka was scheduled for the financial year

1981-82. Work is proceeding on schedule and, unless unforeseen circumstances arise, Telecom expects that the necessary equipment will be installed by the middle of April 1982. The television service will commence when the work is completed.

Petrol Issues for Government Vehicles

628 Mr SMITH to MINISTER for TRANSPORT and WORKS

1. When did petrol issues for government vehicles at the 2½ mile depot cease?
2. What company has been given the contract for supplying (a) petrol, and (b) distillate for government vehicles and at what price per litre?
3. Were tenders called for this contract and, if so, (a) how many tenders were received, and (b) what was the price per litre of each tender for (i) petrol, and (ii) distillate?
4. When was the petrol storage and bowser facility at the 2½ mile depot installed?
5. How much did it cost?
6. Which company had the contract to supply fuel to the 2½ mile depot in (a) 1979-80, and (b) 1980-81?
7. At what price did the company supply (a) petrol, and (b) distillate to the depot in (i) 1979-80, and (ii) 1980-81?

ANSWER

1. 31 December 1981.
2. Since 1 July 1978 the NT government has by arrangement with the Australian government utilised the Australian government contract for the supply of fuel and lubricants. The contractor for this period has been Shell Australia Pty Ltd. The current contract rates for fuel supplied at Darwin (ex-resellers) are:

   super petrol - $0.3341 per litre; standard petrol - $0.3248 per litre; distillate - $0.3280 per litre.

   Contract rates are subject to change due to periodical increases approved by competent statutory authorities.
3. No tenders were called for the above reasons.
4. The petrol storage and bowser facility at the 2½ mile depot was installed in June 1980.
5. The installation cost was borne by BP Australia who owns the bowser and storage tanks. The department leases this facility from BP at a cost of $1,697.18 per annum.
6. Shell Australia Pty Ltd held the Australian government fuel and lubricants contract in 1979-80 and 1980-81 as mentioned in answer 2. above.
7. The contract price for bulk fuel was as follows:

	1979-80	1980-81
Super	$ 0.2375 - $ 0.2852	$ 0.2853 - $ 0.3243
Standard	$ 0.2265 - $ 0.2760	$ 0.2760 - $ 0.3150
Distillate	$ 0.2090 - $ 0.2802	$ 0.2802 - $ 0.3217.

   The prices shown are those in effect at the commencement and close of each financial year. A number of contract amendments are received during the course of each financial year related to price variations.

Territorians Covered by Health Insurance

634 Mrs O'NEIL to MINISTER for HEALTH

Of Territorians now exempt from payment of health care charges, (a) how many, and (b) what percentage, have obtained health insurance?

ANSWER

My department has no way of providing the answer to these questions. Exemptions under the 'disadvantaged' persons scheme are handled by the Commonwealth Department of Social Security. Health insurance is provided by privately operated health insurance funds and Medibank Private. No details of persons insured since 1 September 1981 are yet available. Details will be supplied to Commonwealth Department of Health in June 1983 by the health insurance funds.

Foreshore Protection Proposals

Mr HARRIS to MINISTER for LANDS and HOUSING

In the light of the minister's recent statement that the government was drawing up foreshore protection proposals for Darwin, can he advise when these proposals will be made public?

ANSWER

The government intends to adopt a scheme whereby there will be additional protections over and above those provided for in the Darwin Town Plan and in the Planning Act to ensure that people can feel much easier than they have been able to in the past about the possibility of development on what has been fairly loosely termed 'foreshores' around Darwin. The proposals are not yet finalised. I hope to be in a position next week to release them publicly. Prior to their formal adoption by government, we will have a period of public exhibition with a view to obtaining comments from the public. It is a matter in which I expect some interest will be taken. I am pleased to accept all representations not only from individuals in the community but from organisations suggesting ways in which we should go about it. I would hope that information will be available next week.

Federal Sales Tax Law

Mr B. COLLINS to CHIEF MINISTER

Did he ask both of our CLP federal representatives to vote against the proposed sales tax on essentials of life because of the inequitable burden it will place on Territorians and did he seek an explanation from the Prime Minister as to whether or not our federal representatives were threatened by the Fraser government with a cut in general funding to the Territory if they failed to vote in favour of the sales tax as was suggested in the press by Senator Kilgariff?

ANSWER

I have made representations to quite a considerable number of people on my views in relation to the sales tax legislation. I might say that they are my views as Chief Minister; they are not the views of the government of the Northern Territory. I believe that the federal government has reasons of its own for wishing to spread the burden of tax across the community and those reasons are obviously so that it can afford to give some relief by way of cuts in personal income tax.

Being rather cynical in relation to taxation, my own view is that I have never really noticed that taxation goes down. Some taxes are abolished. We have seen the case in Queensland of the abolition of succession duty. That is a very good selling point for the Queensland government. The Northern Territory has no succession duty so the Territory is in the same position as Queensland. I noticed that, at about the same time as Queensland abolished succession duty, it raised imposts in other areas such as on the renewal of life insurance policies. I have a couple of life insurance policies that I took out when I was a law clerk in Queensland. At the time of the abolition of succession duty in Queensland, I started getting billed $20 a year stamp duty on the renewal of each of these life insurance policies.

Mr Speaker, it is experiences like that that have made me rather cynical about reductions in taxation. Reductions in taxation just cannot occur; there has to be a public acceptance that there will be less demanded of government. If there is less demanded of government, the government structure itself can be reduced. It is arguable whether this is desirable because a reduction in the government structure will, of course, result in a lowering in the number of people employed by the public sector in Australia. The public sector employment

in this country is very considerable. All those things have to be taken into account. I am one of those people who believe that the public should be educated. It will be a lengthy process because, unfortunately, our people have become accustomed to saying that the government should do this or the government should do that or the government should undertake something else. I believe that we should embark consciously on an effort to persuade the people of Australia that they should expect and demand less of their governments. In those circumstances, real reductions in taxation will be possible but not before.

I must say that I think that it has been a failing of every Australian government since the 1930s that it has not been explained to people that the more that they ask for the more they will have to pay. Of course, the present government is desirous of reducing personal income tax which I think we all would like to see but, in order to reduce personal income tax without at the same time cutting back expenditure on government services, there has to be an alternative source of revenue. If there is a reduction in personal income tax, it may be accompanied by an additional sales tax impost which I am told will raise in the order of $300m around this country in the course of a full year. Certainly, I am implacably opposed to any addition to the categories of items that are subject to sales tax, particularly the necessities of life - building materials, clothing and so on - although I believe that a reduction in personal income tax may well follow. It may come this year; it may come next year. However, inexorably, personal income tax will creep back up again.

Apart from educating people to expect less and to ask less of their governments, the only real solution is a total restructuring of our tax system. No government has had the guts to put it like that or to embark on that exercise. There were reports such as the Asprey Report of some years ago. Whatever restructuring of the tax system may come about, one thing that we have to avoid in the future is the opening of possibilities for tax avoidance. I am not going to say tax evasion. Tax evasion must be dealt with by the law and dealt with harshly. There are quite legitimate circumstances under the present laws whereby tax avoidance can be engaged in. I suppose most of us would like to minimise whatever liability we have for income tax. However, it is this that moves me towards a position that I would never have entertained seriously: that of saying that I would accept a flat rate of tax. When I say 'a flat rate of tax', I think that is putting it too simply. I do not think that there can be an across-the-board rate of tax. I believe that we must devise a very simplistic tax system which will remove all chances for tax evasion and tax avoidance.

I have put my views to the Territory members, to the Prime Minister and to other members of the federal government. I hope that they will take my views into account. I believe that there are many other people who have put views forward to them. The matter of how the Territory members of the CLP vote in the federal parliament is a matter for them. Unlike the party of the Leader of the Opposition, my party does not as an organisation dictate to its members how they will vote in divisions of the federal parliament. I am not in a position to dictate to our federal representatives as to how they will vote. I put my views to them and they will make a decision which they consider to be in the best interests of the Northern Territory. There is no doubt a government that is hard pressed for revenue will probably not look sympathetically at people who put forward views that are easy to hold when one does not have to bear the responsibility of balancing the federal budget annually.

Jabiru Hospital

Mrs PADGHAM-PURICH to MINISTER for HEALTH

What is the position regarding the current building, equipping and chartering of the Jabiru Hospital?

ANSWER

The Commonwealth funded the Northern Territory government for the construction of a community health centre and hospital at Jabiru and that funding was made available some 2 years ago. The construction of that building is due to be completed in the middle of June and operating in July.

There has been some change of circumstances surrounding the hospital since the initial grant. During the initial stages, it was proposed that the Commonwealth would share the cost of operation of that hospital. I have been advised by the federal Minister for Health that the federal government no longer plans to meet any obligation for the operational costs of running the Jabiru hospital. In light of our present financial difficulties, that is just one more burden that we will have to wear and it is one that undoubtedly we will sort out.

There is another criterion that has been raised by the medical people within the Department of Health. They believe that the hospital at Jabiru should not be a full base hospital as was originally proposed. It is a half an hour from Darwin by air and it averages one admission to Darwin per week. Half of the admissions would have to come to Darwin anyway because they could not be dealt with in Jabiru because there would be insufficient facilities. What the medical people are arguing is that, irrespective of what we build there, most people will opt to avail themselves of the new Casuarina Hospital any way. That is a perfectly normal reaction.

In light of these considerations, I propose to visit Jabiru in the next 2 weeks with the member for Tiwi, in whose electorate this hospital stands, to consult with all the groups and, in particular, the companies and unions involved. I do not have any particular view that we should have a hospital if it is not needed or that we should not have one if people really want it. Once I can get the grassroots feeling of the people and the attitude of the community towards paying for the service, then I will be in a much better position to advise the member of the future of the hospital.

Parap Community Health Clinic

Mrs O'NEIL to MINISTER for HEALTH

Rumours have been circulating for some time that the Parap Community Health Clinic is to be closed. Can he advise whether that decision has been made and, if not, can he advise when a final decision will be made with respect to the Parap Community Health Clinic?

ANSWER

I am not aware of the rumours that she has heard and I cannot comment on those. But there are plans being considered by the community health section of the Northern Region section of the department. I will give the member a bit of detail surrounding that consideration.

As members are aware, the department is moving away from the Darwin annex totally. In fact, I think it has handed the keys over already to the Department of Transport and Works and we do not have a presence there at all. The future of the community health centre at the annex was something that had to be taken care of and the community health section has been reviewing the boundaries and functions of both the Darwin annex centre and the Parap Community Health Clinic. I have not received a final report on its recommendations but I can advise the House that the annex will be transferring to the MLC building this week and that the future of the Parap centre is still under consideration.

I would be more than happy to receive a representation either personally or in writing from the member for Fannie Bay in whose electorate this facility is stationed. If she has any firm views about the continuance of the Community Health Service in her electorate, I would be pleased to hear those too. Quite a few people have said to me that it would be terrible if the Parap clinic was shifted because there are so many people in the flats who rely on Parap.

My first thought was that, if the situation in the flats is as bad as people say it is, then perhaps we should have rooms in the flats. Again, I would like to discuss that with the honourable member who would have a much better feeling for it than I would.

Nightcliff Dental Clinic

Mrs LAWRIE to MINISTER FOR HEALTH.

There has been speculation in the press that the Nightcliff Dental Clinic will close. Is that a fact and, if so, by what criteria was this decision reached given that the clinic is used to capacity and charges fees for service?

ANSWER

The honourable member can rest assured that it is not a rumour. The Nightcliff Dental Clinic will be transferring to the new community health facility in the Casuarina Shopping Centre area. There will be a consolidation there of the department's dental services. As well as the Nightcliff unit, the Sanderson unit will also be transferred. They will be combined to operate at the new building in Casuarina. The school dental program, which is currently conducted from the Nightcliff clinic, will be transferred to the Ludmilla Primary School and St Pauls School. This consolidation should provide a better service for the whole of the northern suburbs region. If the honourable member needs any further information, I would be happy to supply it.

Commissioner of Police

Mr VALE to CHIEF MINISTER

In view of recent press reports that the Commissioner of Police, Mr McAulay, is about to take up a position interstate, could he advise the truth of those reports?

ANSWER

There have been press reports and speculation over several months that the Northern Territory Commissioner of Police was to be offered, according to one press report, the post of Commissioner of the South Australian Police or, according to other reports, the post of Commissioner of the Australian Federal Police. It is some credit to Mr McAulay that these rumours should circulate. Obviously, it shows that the Northern Territory is very fortunate in the person that it has as Commissioner of Police in that the press, who consider themselves to be intelligent, could print such rumours and give credence to the sound stature that our commissioner has in police circles. It is with some pleasure that I can advise honourable members that Mr McAulay has assured me that he is not entertaining offers received from other parts of Australia or overseas. At one stage, Mr McAulay was being solicited to head the United Nations Police Force. He has assured me that he will be here in the Northern Territory for the foreseeable future. From the point of view of the government, I can only say that I am very pleased to hear that and I hope that he can continue here until his retirement.

House in Brunei for Chief Minister

Mr B. COLLINS to CHIEF MINISTER

Has the Chief Minister been offered the gift of a house in Brunei by the Brunei government? If so, what does he intend to do with it? The question is asked without malice.

ANSWER

Mr Speaker, I have not heard this rumour myself but it may have circulated in the press whilst I was absent in Jakarta last weekend. I hasten to add that I have received no offer of a free house or a house to purchase from the Indonesian government. I had the pleasure of visiting Brunei with you, Sir, early in 1981. The north coast of Brunei is a very pleasant part of the world. It is an independent sultanate and is very wealthy. I think it has revenues of approximately $2,56b a year. It has a population of about 250,000 people. It is not much bigger than greater Darwin and it only manages to spend about $200m a year on its people. Obviously it has a lot of money to spare. I understand that the ruler of the sultanate uses some of this money in playing polo. I hoped our Minister for Primary Production would get some facility for playing polo so that he could converse with the Sultan over a chukka or two.

Mr Speaker, unfortunately, it is not true that the government of Brunei, or any other government, has offered me a house, free or otherwise, or any other structure. No one in the course of my career has yet offered to me even a used King George IV fiver. I have to disappoint the honourable Leader of the Opposition.

Ti Tree Inquest

Mr LEO to CHIEF MINISTER

Has the Chief Minister inquired into criticisms of police practice and procedure made by the coroner following the Ti Tree inquest and, if so, what conclusions has he drawn?

ANSWER

Mr Speaker, certainly that is a question to which I adverted when I got a chance to read the finding of the coroner, Mr Gerry Galvin SM, in relation to the unfortunate chapter of events which is known collectively as the 'Ti Tree inquest'. The situation is that the police have taken account of Mr Galvin's comments. The Police Commissioner personally reviewed Mr Galvin's findings. I believe that certain actions had already been taken which might well assist in the future to obviate any problems which do occur. From memory, the matter was raised in the press very early this year and the Police Commissioner wrote a letter to the Managing Editor of the Northern Territory News. I could answer this question by reading this letter. It is a couple of pages long but I think the matter is of some importance and is worth putting in the record:

Dear Sir,

The questions raised in your article following an examination of the publication of Mr Gerry Galvin's findings into what has become known as the 'Ti Tree inquest' fall broadly into 2 categories. The first relates to the general evidence available to Mr Galvin at the time and upon which he decided to commit Constable First Class Jack Clifford for trial on a charge of murder. Quote obviously, Mr Galvin discharged his duties to the best of his abilities and I infer no criticism of him whatsoever in what I subsequently say. But it must be emphasised that Jack Clifford subsequently stood trial and was

exonerated by a jury of his peers. Therefore, any further speculation as tohis guilt or innocence is untenable both on moral and legal grounds. I deplore any backdoor methods to retry Clifford at this time.

The other issues raised relate to the general efficiency of the police investigation. In this context I must draw attention to what Mr Galvin said at page 22 of his findings, and I quote inter alia:

> *I am satisfied that there could be no finding that the police investigation was biased, incompetent or proceeded on the basis of seeking to protect the police officers. It is clear that the investigation was difficult and that there had been a fracas. There had been some 10 witnesses some of whom were adversely affected by alcohol, some severely so. The investigation was done partly at night in a remote area and this added to the difficulty of the investigation.*

Nevertheless, the administration of this force has been aware for some time of deficiency of certain aspects of investigation management due to the type of difficulties alluded to by Mr Galvin. Consequently, a major crime plan has been developed and staff trained for the purpose of better co-ordination of the collection and collation of evidence in serious crimes. The plan has since been implemented and, should an investigation of this type occur in the future, it would be conducted in conformity with these new procedures.

Comments have also been made as to the inadequacy of certain aspects of the forensic investigation and its co-ordination. Coincidentally, the major crime plan adverts to this type of deficiency. Having said that, I am the first to concede that the forensic facilities in the Northern Territory are inadequate, not so much in quality but in sufficiency.

This same situation pertains not only in the Northern Territory but in the whole of Australia. It may be interesting to know that in the case of Victoria, which has arguably the best forensic facilities in Australia, comment was recently made that the prosecution of certain major crimes has been delayed for several years awaiting forensic reports.

The simple fact is that law enforcement agencies are in a dilemma because of the lack of forensic facilities. While one waits for extended periods for the results of complicated forensic tests to come to hand, the quality of other conventional evidence deteriorates due, in some cases, to the failing memory of witnesses. This is a point which Mr Galvin himself made. The problem is exacerbated by the fact that the delays in waiting for forensic evidence to become available may be unproductive because the reports are frequently inconclusive.

In the Ti Tree matter, it appears to me that the evidence would not have been more conclusive even had the forensic examination been more extensive. As something of an aside, I ought to mention that for several months now I have been having discussions with the Chief Minister and the Secretary of the Department of Health with a view to the establishment of a forensic laboratory in the Northern Territory.

Some of the other specific questions raised in your article are difficult to answer without creating press speculation in relation to the charges laid against Clifford. It would be grossly improper to do so, especially as Clifford's innocence has since been clearly established. Nevertheless, I have separated out those issues which can be looked at separately. For example, much has been said about the extent of inquiries into the amount of liquor consumed by certain people taken

into protective custody that night while the police appeared to have ignored clarification of certain discrepancies in relation to the amount of liquor consumed by the 2 officers concerned. I totally reject this criticism. On the one hand, the amount of liquor consumed by the persons apprehended was directly relevant to the lawfulness or otherwise of their apprehension. On the other hand, the consumption of liquor by 2 police officers was irrelevant once it was established that they were in no way affected by liquor.

The only justification for further inquiries in relation to the consumption of beer by the 2 police officers would be if there was any intention on the part of this administration to charge either or both officers with a breach of discipline. I am sure that any reasonably-minded person would agree that to consider minor disciplinary action against a man who subsequently stood trial on a charge of murder for which he was exonerated would be ludicrous. This is also true in relation to considering any other minor breaches of discipline, if any. In any event, the definition of when police officers stationed in remote areas are on or off duty has always been unclear and will remain so in the future.

There have also been suggestions made that the police officers were engaged in an improper patrol. Mr Galvin found that it was not a punitive patrol. In any event, police officers do not need reasons to patrol their districts. It is part of their duty and I would consider them derelict in the performance of these duties if they did not engage in regular peace-keeping patrols.

The question of non-issue of batons has also been raised. For some time now, the effectiveness of issued batons has been under review, especially when considered in contrast to the type of weapons which are frequently used against the police. When a conclusion is reached, the remedy will be provided.

There are 2 further questions which have been raised, the first of which I do not consider particularly relevant to this matter. In regard to police-Aboriginal relationships, I believe that these are generally good. However, there is no doubt the police do not enjoy good relationships with law breakers whether they are Aboriginals or otherwise. I foresee no change.

The question related to customary law is again totally irrelevant to this case but is extremely complex and is currently being studied by a number of learned groups in Australia. I have made appropriate submissions and I do not care to debate them at this stage.

The Commissioner refers to submissions he has made to the Kirby Commission, Mr Speaker.

In conclusion, I would like to say this about Constable Clifford: anyone who had the opportunity to study his demeanour during the traumatic inquest and subsequent trial would have conceded that he is a man of great courage and integrity. He is admired by his fellow members in general and me in particular. I would only hope that, in the light of everything that has happened, his fellow Australians would now adopt their traditional approach in these circumstances; that is, of giving a man a fair go.

I return to the question of forensic facilities and a forensic laboratory. The trend in criminology seems to be to wish to separate forensic facilities from the direct jurisdiction of the police force. I understand that forensic institutes are established for that purpose. My recollection is that

Victoria has such an institute although I am not certain of that. Most Australian police forces have forensic branches. To deal with the collection and collation of evidence at the crime scene, it seems it will be necessary for police forces to maintain at least some forensic skill and strength. When I say that, it really brings me to the nub of the question.

I was concerned that the Northern Territory did not have a sufficiently strong forensic section. I raised this with the Commissioner of Police, with the Solicitor-General and with the Secretary of the Department of Health because all 3 are to some extent involved. The Solicitor-General has to carry the responsibility for prosecutions and in the limited circumstances of the Northern Territory - limited financially and in terms of personnel - it may be that the appropriate place to locate a forensic branch would be in the Department of Health. This might keep it at arm's length from the police force, and avoid what some lawyers apparently believe is a relationship of chumminess growing up between the forensic people attached to the police force and the police with whom they operate on a regular basis. In fact it has transpired that some forensic specialists whose services we have been fortunate enough to acquire have been located within the jurisdiction of the Department of Health. Nevertheless, on a day-to-day basis, sufficient delegation has been given by the Secretary of the Health Department to the Police Commissioner to enable him to issue necessary operational orders so that things will happen quickly.

I want to review the operation of this section in the near future because one of its shining lights has resigned recently. I understand that the reason for resignation, while not necessarily apparent on the face of the resignation, are some degree of frustration with the system. As I see it, it will be many years before the Northern Territory can afford to have its own separate forensic institute. I attend the Police Ministers' Conferences which occur about twice a year. I usually manage to get along once a year or maybe once every 2 years. I am supporting what appears to be a very long-winded effort to establish a national forensic research institute. It may be that, in the short term, it will be necessary for the complete forensic resources of the Northern Territory to be located within the police force. I have few misgivings about this. I believe that our police force is a good one. It may not be everything that we would desire in terms of sophistication but it has one overwhelming virtue: it is a completely clean police force. I do not know of any circumstances in which it has been alleged that the police have attempted to fabricate evidence in prosecuting cases in the Northern Territory. In our circumstances, for the sake of attracting and retaining the right sort of people, we have to locate the forensic resources within the police force for the time being.

I have tried to outline to honourable members the problems with which we are faced at the moment. I do not pretend that my comments have been exhaustive. I wish to give people some idea of what is going on. If anyone is particularly interested, I would be pleased to receive written comments at any time on this subject. I hope that I have answered the honourable member's question.

Artificial Insemination Facilities

Mrs PADGHAM PURICH to MINISTER FOR PRIMARY PRODUCTION

What is the situation regarding artificial insemination facilities extended to primary industry by the Department of Primary Production?

ANSWER

It is about 10 years since artificial insemination was used experimentally on some of the larger stations. Under open-range conditions, the technicians were unable to establish the oestrus cycle of the female bovine. In those days,

2905.824—31

they abandoned the scheme in favour of closer settlement. I believe that new techniques are now available and a subsidy is being proposed for pastoralists for artificial insemination on the smaller landholdings. It involves the payment of some money: about 25% of the actual cost of the process.

Koolpinya Lease

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION

Is it a fact that the government intends to accept part of Koolpinya lease in exchange for granting the Koolpinya management an additional lease? Will he advise the location and the area of land that Koolpinya is to relinquish to the government and the location and area of the new land to be released to Koolpinya?

ANSWER

The matter is under discussion by the government. I do not think that the plans have been finalised. I would suggest that he place his question on notice.

Yipirinya School

Mr BELL to MINISTER for EDUCATION

Will he advise his decision to register or otherwise Yipirinya School in Alice Springs as an independent school under the Education Act?

ANSWER

I propose writing to the Yipirinya School Council this week. It would be less than courteous to that council if I advised my decision prior to communicating with it.

TAA - Special Gove Flight

Mr VALE to CHIEF MINISTER

I understand TAA has made approaches to the federal Department of Transport for permission to operate a DC9 flight into Gove on 2 April to enable schoolchildren to return home from boarding schools in central Queensland. Is he able to advise whether or not this has yet been granted?

ANSWER

The question of DC9 flights in particular in and out of Gove is a vexed one. I have been having correspondence with the federal Minister for Transport, Mr Ralph Hunt, on this matter for quite some considerable time. At present, there is a DC9 flight operated by TAA which overflies Gove on its way between Darwin and Cairns. I have asked the Minister for Transport if he would give permission for this flight to land at Gove on each occasion. Before Christmas, I met with the Minister for Transport in Canberra and with his departmental head. The minister indicated to me that matters of air safety - and he categorised this as such - are left to the professional head of his department. Thus, I received short change from the Minister for Transport although I did query why one Ansett and one TAA DC9 were allowed to land in Gove at present. The obvious answer is that it is safe because the 2-airline system operates.

It is quite clear that as many F28s as wish can land and take off in Gove on any day of the week. The minister and his departmental head were quite clear about that. They consider the F28 to be different to the DC9 in that the pilots have a better view out of the windows. I am told that the problem is that there is no control tower at Gove. I have asked the Minister for Transport formally that, if he maintains his objection to DC9s landing in Gove, he should start the construction and manning of a control tower in Gove.

I consider that his objections are ludicrous. If F28s can come and go at will, why shouldn't DC9s or even Jumbos if the airstrip could take them. I cannot see any distinction between one jet aircraft movement. For the minister to tell me that the degree of visibility out of a particular aircraft's cockpit is such that it renders it unsafe for it to land at Gove without a control tower is so much crass nonsense. If the visibility is not sufficient, the aircraft should not be in operation in Australia.

However, I do have some pleasure in announcing that the minister has agreed to allow this school special to land. I see that hopefully as the thin end of the wedge because, if it is safe for this extra plane to land on one occasion - full of school kids - why would it not be safe on another occasion?

Federal Plant Variety Rights Bill

Ms D'ROZARIO to MINISTER for PRIMARY PRODUCTION

Has he expressed to the federal government his support for that government's Plant Variety Rights Bill currently before parliament and, if so, when and in what form was his support expressed?

ANSWER

Mr Speaker, the Northern Territory government has supported the plant variety rights legislation over a considerable period of time. I think it has been before the Australian Agricultural Council on 3 occasions. I cannot remember saying very much about the scheme at the Agricultural Council meeting but the consensus arrangements of council indicated Northern Territory support.

The system of plant variety rights is a system whereby the breeder of a variety is believed to claim ownership of the material. This may or may not involve his charging a fee for others to use this superior plant material. Some 22 countries have some form of plant variety rights and the system is recognised worldwide. The Plant Variety Rights Bill was introduced in the House of Representatives in May 1981, and allowed to lie on the table of the House to include public debate.

At the recent Australian Agricultural Council meeting in Adelaide in February, it was agreed that the legislation should proceed in parliament in accordance with the present draft. The Commonwealth minister has advised, in keeping with the expressed interest of the states, that the Commonwealth has sole responsibility for the funding of the scheme once it becomes operational but that the issue of the plant variety rights is not at all a clearcut case for or against legislation. However, the Northern Territory government still believes that the plant variety rights is in the best interests of local and national agriculture and should be supported.

Emergency Services Heliport in Alice Springs

Mr D. W. COLLINS to MINISTER for LANDS and HOUSING

Has he considered the proposal to provide land for an emergency services heliport next door to St John's Ambulance, Telegraph Terrace, Alice Springs?

ANSWER

Mr Speaker, I have very little knowledge of this matter and am advised that the department has been unable to give full consideration to an application which has been received in this regard as there are considerable details required before a decision can be made.

However, it was pointed out that the Sacred Sites Authority's recent registration of 2 trees in the vicinity has complicated the matter anyway.

Regulations to the Education Act

Mr B. COLLINS to MINISTER for EDUCATION

When are the regulations to the Education Act going to be promulgated?

ANSWER

Mr Speaker, I am unable to give a decisive answer. It certainly did not happen in August as I indicated about last February. I will find out the information for the member. I might add that, in detailed examination of the proposed regulations, it was found that the act may well be deficient in respect to the registration of school councils, particularly if the government and school councils are to get together on financial control of school-based funding. It may well be that greater protection needs to be afforded to school councils by way of the principal legislation rather than by regulations. That is the reason for the delay. I shall take the matter up as soon as I can with my colleagues and come back to this place if that is necessary.

Caretakers for Housing Commission Flats

Mr HARRIS to MINISTER for LANDS and HOUSING

I have recently been approached, with regard to positioning caretakers in Carinya flats. Has reconsideration been given to placing caretakers in flats run by the Housing Commission and, if not, can this issue be raised again?

ANSWER

I undertake to have this matter examined again. I am aware that the commission has had caretakers in flats in the past and found the system did not work very well. I understand that there is considerable difficulty in getting the somewhat unique type of person suitable for handling the difficulties and, no doubt, continuous stream of complaints that may well be received by any caretaker. Everyone can only stand so much of such things. However, in conjunction with the Housing Commissions I am having a very close look at the situation in regard to one particular set of flats in Darwin. Perhaps this examination can be extended to other areas such as the flats mentioned by the honourable member for Port Darwin.

Possible Government Land Purchases on New Estates

Mr SMITH to MINISTER for LANDS and HOUSING

Has the government purchased or does it intend to purchase blocks of land at the North Lakes Country Club Estate and Brinkin and, if so, for what purpose?

ANSWER

I have no details with me as to whether or not the government proposes to purchase land at the North Lakes Country Club Estate.

Plenty Highway Reconstruction

Mr VALE to MINISTER for TRANSPORT and WORKS

When will construction commence on the Plenty Highway utilising the $700,000 recently announced by the minister? Will this construction include that allocation of funds already announced in the 1981-82 budget?

ANSWER

The continuation of sealing of the Plenty Highway is an ongoing project and $700,000 was allocated in the 1981-82 capital works program. Work is to commence shortly. I am seeking a further $700,000 from my colleagues for continuation of that program next year.

UN Convention on Discrimination against Women

Mrs LAWRIE to CHIEF MINISTER

What stage has been reached in the consultations being held between the Australian and Northern Territory governments regarding the ratification of the United Nations Convention on the Elimination of all Forms of Discrimination against Women and in what areas, if any, does the Northern Territory government have reservations about the convention?

ANSWER

It is very pleasing that the honourable member for Nightcliff has asked me this question. I intended to raise this matter in general business today in the course of debate on a certain bill. I would prefer to give a detailed answer to this if the honourable member will place the question on notice. However, I will attempt to answer it as best I can at the present time.

My recollection is that, at the standing committee meetings of the Attorneys-General where this matter is being dealt with, the Northern Territory has not expressed any reservations. I do not attend all of these meetings, Mr Speaker. There are 3 or 4 meetings of the standing committee every year, and usually I only manage to get to 1 or 2 a year. However, to the best of my knowledge, the department has not sought approval from me to express reservations and therefore I do not think that we have expressed any reservations to the particular provisions of the convention. We dealt with part of it at the standing committee meeting at Queenstown in New Zealand recently. I think that we are quite substantially through it. My recollection is that the method of dealing with it is to take the convention clause by clause. I think it has been ratified by the Commonwealth government although I cannot say that for certain. The convention really affects the laws of the states and the Territory more than those of the Commonwealth. The situation is that each particular clause has to be examined in the light of what effect it would have on any particular law of the states or a territory, and remedial action, if such is necessary in any particular case, has to be instigated.

To the best of my knowledge and recollection, the Northern Territory is certainly not throwing any hurdles in the way of the early resolution of this matter. I shall obtain further details for the honourable member if she will be good enough to place the question on notice.

Primary Industry Assistance to Sarawak

Mr VALE to MINISTER for PRIMARY PRODUCTION

Can he advise what assistance, if any, will be offered to the government of Sarawak in the field of primary industry?

ANSWER

The Northern Territory government has had a policy of assistance and closer cooperation with the South-east Asian nations over a considerable period. We have in the past extended professional services to Indonesia and Malaysia in the form of veterinarians working on foot and mouth eradication programs. We have developed a very close friendship with South-east Asia over the period since self-government.

In January this year, following our visit to Sarawak in October 1981, members of the Sarawak Economic Development Corporation visited Darwin and the Northern Territory. They were here to discuss their own development plans in respect of retail meat production in their state. They looked at cattle stations and were generally guided by officials of the Northern Territory government. As a result of their visit and a request for further technical assistance by the Chairman of the Sarawak Economic Development Corporation, the Northern Territory government has agreed to provide technical assistance in the form of one qualified official to stay in Sarawak for 6 months to assist the Sarawak government to produce plans for retail meat and processed meat introduction. We look forward to our continued relationship with this region and we see it as a great benefit to the Northern Territory.

Criminal Injuries Compensation Bill

Mr B. COLLINS to CHIEF MINISTER

The Chief Minister announced his intention in the August sittings that a new Criminal Injuries Compensation Bill would be introduced in the next or following sittings. When does he now anticipate introduction of this new legislation?

ANSWER

This sittings.

Liquor Legislation

Mrs LAWRIE to MINISTER FOR HEALTH

My question concerns the Liquor Amendment Bill and Summary Offences Amendment Bill presently before this Assembly. Has the Liquor Commission or any other government instrumentality to his knowledge prepared a map of Darwin showing the licensed outlets and the areas of Darwin which will be affected if the proposed bills come into effect? If so, would be made available to the Assembly that information prior to the committee stage of the bills?

ANSWER

I am of the view that there is a map. It has been some months since I have seen it. It was drawn up by the committee that reviewed the legislation in the first place. I will endeavour to obtain copies of the map and have them presented to the Assembly today. If the maps cannot be made available in time, I still propose to proceed with amendments this afternoon and then provide the maps as soon as possible to the member.

Nhulunbuy - Year 7 Students

Mr LEO to MINISTER for EDUCATION

Will Nhulunbuy remain the only town in the Northern Territory where Year 7 students are forced to go to high school?

ANSWER

Mr Speaker, I do not think the member is correct. That occurs in another centre that you ought to be fairly familiar with, Sir, and in Tennant Creek although now there is a primary school and high school as separate entities in the latter town. In those centres, it has been necessary to have Year 7 children attend high school although the government has adopted a policy that that will not generally be the case. I suppose that 30% of parents would disagree with that but the other 70% would oppose the idea of Year 7 students going into high school. In the case of Nhulunbuy High School, it is a matter for constant review.

Satellite Programs for Outback Communities

Mrs PADGHAM-PURICH to CHIEF MINISTER

What is the current position regarding satellite programs for outback communities bearing in mind Intelsat 4 and its waining working life, the coming into operation of Intelsat 4A in October, the Indonesian satellite Palapa and the wholely Australian-owned domestic satellite coming into operation in 1985?

ANSWER

The international satellites Intelsat 4 and Intelsat 4A are owned and operated by an international consortium. It is possible to pick up ABC television signals via Intelsat 4 using a specially designed earth station placed in the area of the satellite's footprint. When Intelsat 4A is launched, the position of the footprint will change and there may also be a change in signal strength which could affect television reception. It may also be possible to pick up television signals from the Indonesian satellite Palapa with suitable earth station equipment. The domestic satellite, Aussat, should provide a full range of communications services to all areas of Australia when it is launched in 1985.

Flagpole at Sanderson Clinic

Mrs O'NEIL to MINISTER for HEALTH

In these days of austerity, why was a flagpole erected outside the Sanderson Health Clinic last week at a cost exceeding $2000 when, in a few months time, the Sanderson clinic will be moving to new accommodation opposite Casuarina shopping centre?

ANSWER

The short answer would be poor communication. It has been no secret for some months now that the Sanderson centre would be vacated and the clinic moved to Casuarina. The establishment of flagpoles at government buildings throughout the Northern Territory is a matter between the Department of Transport and Works and the Department of the Chief Minister. If this expenditure has been incurred, it can only be put down to poor communication.

Liquor Legislation

Mrs LAWRIE to MINISTER for HEALTH

Has he considered an amendment which would allow the consumption of liquor in a public place within 2km of premises licensed when the licence was not operating? I hope I have made my question quite clear.

Mr Speaker, that was about as clear as mud. Can I offer an invitation to the honourable member to join with the Liquor Commission officers during the lunch break, or at some other convenient time, to go over the problem that she is raising? It might be more fruitful than passing it backwards and forwards here.

Trees Provided by Conservation Commission

Mr D. W. COLLINS to CHIEF MINISTER

How many trees has the Conservation Commission planted or given away since 1978?

ANSWER

The Territory Parks and Wildlife Commission commenced tree planting and the giving of trees for planting programs on 1 July 1978 or thereabouts. This program was subsequently taken over by the Conservation Commission which is continuing with it. Some 500,000 trees have been planted or given away from the Darwin nurseries of the Conservation Commission, and from its Alice Springs nurseries 200,000 trees have been planted or given away. Honourable members will probably be surprised at the numbers of those trees: 700,000 in total. There are some signs of improvement throughout the Territory as a result of the very fine work of the Conservation Commission and of the local councils in their various areas. I believe the program is a worthwhile one and the Conservation Commission will be continuing its tree planting efforts throughout the Territory.

We have a 3-stage program to upgrade the Botanical Gardens. The first stage of that program is already under way. There is a 3-year or 5-year plan in respect of Darwin. Funds were given to Alice Springs council and to the councils of Tennant Creek and Katherine this and last year to assist them in urban beautification proposals. I believe that, whilst an enormous amount of work has obviously been done, there is still considerably more work to be done. But those 700,000 trees is an indication of the extraordinary effort that is being put into this work by the Conservation Commission and the quite large sums being allocated annually by this government to these very worthwhile projects.

Mudginberri Station Buffalo Export Operation

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION

Did he agree to provide land for the manager of Mudginberri Station to assist that person in developing a buffalo export operation involving 1000 head of buffalo? Was part of the arrangement the sale of buffalo to Beatrice Hill Research Station for a fifth of their market value and did he fail to honour his commitment to provide the land causing this project to be abandoned?

ANSWER

No promises have been made to anybody to give him land to set up a buffalo farm. If an application has been made, it has probably been made through the proper channels and it will come before the government in due course.

NTEC Power at Newcastle Waters Station

Ms D'ROZARIO to TREASURER

Is it a fact that the Northern Territory Electricity Commission is to install an electricity generator set at Newcastle Waters Station and, if so, what is the justification for installing a public power supply to a community the size of that at Newcastle Waters Station?

ANSWER

I do not have details of this matter to hand. I will advise the member in due course.

RAAF Noise Level Demonstrations

Mr HARRIS to CHIEF MINISTER

During the recent Parliamentary Public Works Committee hearings on the RAAF Stage 1 works associated with the stationing of a Tactical Fighter Squadron at the RAAF Base in Darwin, the question of noise levels was raised and both the council and the Northern Territory government made submissions on the noise levels. At that time, the Defence Department witness stated that it could arrange for appropriate demonstrations to demonstrate those noise levels. Is the Chief Minister aware of those proposals and, if so, has a date been set for such a demonstration to be held?

ANSWER

I understand from the Commanding Officer at the RAAF base here in Darwin that tests will be held in the near future. In fact, the Parliamentary Public Works Committee suggested 2 tests should be conducted: for any untoward effects at night and for noise levels during the day. The RAAF has advised that a Mirage aircraft will be in Darwin the evening of 23 March 1982 for assessment of any unusual effects during the evening, and on the morning of Wednesday 24 March 1982 for the purpose of demonstrating the noise levels associated with the proposed engine test facility.

Contrary to the interjection by the member for Fannie Bay, I instructed the Director-General, who put the government's submission to the Parliamentary Works Committee, to raise the matter of the engine test facility and the associated noise there from. Of course, I have raised this myself with RAAF authorities. The demonstration will allow for the scientific measurement and recording of noise levels as well as for a subjective assessment by the public. It is understood that the RAAF will be making a public announcement on this matter so that the public is fully informed that the demonstrations are taking place.

I understand that the RAAF will be extending an invitation to all members of this House and Aldermen of the Darwin city council to attend the demonstrations on the Wednesday morning. Unfortunately, I will be precluded from attending these demonstrations myself by a prior commitment to attend a field day at the Douglas-Daly farms. I suppose other members will be caught in that clash of interests. No doubt, observers can be sent by those people who are interested and I understand that the Minister for Transport and Works will be on hand to represent the government.

NTDC Loans for Farm Machinery

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION

Farmers needing loans from the Northern Territory Development Corporation for farm machinery can obtain the necessary money only through a mortgage or a second mortgage on their farm. Could he explain why this mortgage procedure is necessary and why the NTDC refuses to grant loans on the normal basis of a bill of sale over machinery?

ANSWER

I am not aware of the procedures that the member outlined. I will look into the matter and let him know later today.

Closure of Causeways in Central Australia

Mr VALE to MINISTER for TRANSPORT and WORKS

Can he advise who has the legal authority to close causeways in Central Australia and on what basis can roads and causeways be closed, particularly during floods?

ANSWER

Power to temporarily close roads outside a municipality are vested in the Minister for Transport and Works. The circumstances and procedures by which roads may be temporarily closed are contained in section 11 of the Control of Roads Act. In Central Australia we give the area manager for Alice Springs the power of delegation to temporarily close a road in a municipal area to the local corporation under section 313 of the Local Government Act. Powers to permanently close a road are vested in the Executive Council. If a causeway forms part of a road, then the Control of Roads Act or Local Government Act equally applies.

Katherine Hospital

Mr HARRIS to MINISTER for HEALTH

I ask this question on behalf of the member for Elsey. What plans has he for Katherine Hospital to become a regional centre?

ANSWER

As far as is practicable, it would be the department's wish to see the delivery of health services to the people of Katherine come from Katherine as a regional base. Katherine is geographically ideally situated to provide several services that the department could offer. Let me say that the establishment of the Aboriginal Health Workers Training School in Katherine, as distinct from Darwin, would have a great deal of benefit for the people going to it, the department and the hospital. Having the school in a hospital of that size would also enable the students going to the school to have practical hospital experience in some of the things that they will be confronted with in the bush. That is something that is lacking in the Health Workers Training Program at the moment.

Members are already aware that the transfer of the leprosy unit to Katherine is imminent and that there will be some very substantial side benefits to that. To start with, the pathology laboratory will go from East Arm to Katherine and that will enable us to provide for the first time a very substantial pathology service at the Katherine Hospital. The leprosy pathological unit is quite a substantial one and will have a lot of spin-off benefits to the centre as a whole.

Also, the Department is very keen to see the microsurgery unit which is now operating out of the leprosarium at East Arm transferred to Katherine because there is a great deal of work that can be done in that area in the provision of inner ear and middle ear surgery that is not currently being undertaken. People working in the microsurgery unit would be well-qualified and equipped to be involved in this particular ear surgery. This is a new development.

Because Katherine is a hospital that is much cheaper to run, there are many patients from outlying areas who could be as well accommodated in Katherine as they could be in Darwin Hospital. The Darwin costs are about exactly double Katherine costs. If a mother in the bush has a baby that needs 3 or 4 weeks in hospital because it is run down, that sort of service could be provided at Katherine.

I see a great number of services coming to Katherine as a result of some of the department's new initiatives. The department is looking at what options it has to improve its service to the people and to provide a better service for the same amount of money.

Compulsory Destocking

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION

Has the minister received recommendations from his department that compulsory destocking should be carried out on certain properties in the Territory as part of the brucellosis and tuberculosis eradication campaign following recent legislation enacted in this Assembly? If so, has he declined to give ministerial authority for destocking to proceed?

ANSWER

The question of destocking was raised extensively during conferences with pastoral industry representatives during 1981. The very words alarm me quite considerably because of the cost involved, but that is not to say that the eradication program which has been proceeding for quite some years should not proceed. The question revolves around this destocking question. I am reluctant to use this as any formal policy. The day will come when some destocking will have to be undertaken. The word 'destocking' puts fear into the hearts of pastoralists. With so many feasibility problems in the running of these properties - inflation, high costs and costs that cannot be passed onto the consumer - it is obvious that station owners are very concerned about the future. Mr Speaker, I will be making a statement later this afternoon on the current status of the brucellosis and tuberculosis eradication program.

Vacant Land Behind Millner Primary School

Mr SMITH to MINISTER for EDUCATION

What does the Department of Education intend to do with the vacant piece of land under its control at the rear of Millner School?

ANSWER

Mr Speaker, the lot referred to is lot 8643. It is a piece of land that was set aside in 1979 for further educational purposes. The Department of Education is hard-pressed to provide educational services much less look after vacant Crown land. As a result, the land has become somewhat unkempt. Local people in the area have expressed concern about the hazard of snakes and so on. I notice that Millner Primary School students are here at the moment so no doubt they have some interest in the matter raised by the member for Millner.

At present, the land is zoned open space 1, public recreational use. It would be the government's intention that it remain so zoned. It is quite obvious that it is not required for educational purposes. I intend to write to the Department of Lands indicating that lot 8634 is no longer required by the Department of Education and should be returned to it for the purpose for which it is zoned.

Incidentally, there is a Millner Development Plan and I understand the recommendation to the Planning Authority is that the piece of land remain available to the public which, of course, includes students of Millner Primary School and residents generally, particularly in the northern suburbs. Upon its return to the pool of vacant Crown land, lot 8634 will remain for the purposes of the public. That means that its present untidy state will have to be addressed with the intention to maintain it properly as open space. One would hope in the very near future to see an improvement in the condition of that land.

Effect of Palmerston on Rural Area

Mrs PADGHAM-PURICH to MINISTER for LANDS and HOUSING

Could he assure me that the building and development of Palmerston will in no way be detrimental to the water supply and turning off of available subdivided land in the rural area?

ANSWER

Mr Speaker, I assume that the honourable member's question on water supply and availability of land are connected, because I cannot see any way in which the development of Palmerston would affect the ability of private landowners in the rural area to subdivide land. To the extent that subdividers may be required to supply water reticulation, it is true that there could be an effect if Palmerston was taking an undue share of resources in the area. I am advised that the Palmerston development water supply will be taken from the trunk delivery mains which supply water from the Darwin River Dam to Darwin. The information I have from the Department of Transport and Works is that this will not affect the amount of water which would be available for subdivisions in the Darwin rural area.

Bridge and Carriageway at Mouth of Rapid Creek

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

Is planning and survey presently under way regarding a possible bridge across the mouth of Rapid Creek and a carriageway to take people from Brinkin into the city and, if so, what level of carriageway is anticipated?

ANSWER

Mr Speaker, the proposal to bridge the Rapid Creek area was first put forward in the form of a cycle path or bridge. The estimated cost was in the order of about $600,000. At the time, I mentioned to the department that if $600,000 was to be spent on a cycle bridge perhaps a proposal should be examined to bridge the Rapid Creek estuary with a two-lane vehicle causeway - subject, of course, to environmental recommendation, Cabinet approval on financing, and a whole host of other things pertinent to such a development. It was really only an idea; it is not a firm proposal. Government is unaware of it. It was just an idea that I put forward to my department to have a look at. If there is any feasibility to it, then I will put a proposal to Cabinet and the people.

Alice Springs Meeting of Department of Health Executives

Mr BELL to MINISTER for HEALTH

What was the purpose of a meeting at the Alice Springs Casino on Saturday 6 March between the minister, the secretary of his department and some officers of his department from Elliott and Tennant Creek? How did they travel to the meeting and how was the meeting financed?

ANSWER

The meeting that was held on the weekend was1 of 3 held last weekend in Alice Springs. It was a meeting of departmental officers and myself. The assistant secretary, southern division, the rural medical officer from the Barkly region, the 2 nursing sisters from Elliott, the area matron for the Barkly region, Dr Fleming and myself had a meeting for over 3 hours on the way in which health care is to be delivered to people in the remote areas in that region. Let there be no doubt that consultation and management decisions coming from within the department are on the basis of the best possible service that can be provided and that consultation is going right through to the grassroots level. When I have a meeting of that nature

I prefer everybody to be there so there is no misunderstanding about who said what. Because of the concerns of the sisters in Elliott and the rural matron, who has difficulties at the moment providing staff to remote areas, it was absolutely essential that the meeting be held as soon as possible. Had it not been held last Saturday, it would not have been possible for a further 2 or 3 weeks. At my request, Dr Fleming arranged for the staff to be brought to Alice Springs which was the most convenient point for all people concerned. I add that 2 of the other meetings that were held in that town involved people from interstate and one person from overseas who came to Alice For that meeting on that day. While I would have preferred to have avoided the expense of meeting, the most important thing was to set the foundations and ensure everybody in the department was aware of what is to be done concerning the new programs for the delivery of health care in remote areas.

It is my intention to work right through the Northern Territory, to go to every place where we deliver health care, to talk to everybody involved and, where necessary, to take with me the rural managers and departmental officers concerned in providing support for those people in the rural areas. I have no false illusions that many people in the rural areas feel abandoned from time to time. That is something we will change. I am happy to work at it for the rest of my period in this job. I have no intention of restricting my travel to the remote areas just because there is a cost involved. My experience is that, by attempting to save an air fare or not to go for another reason, a few bob might be saved on the one hand but, on the other hand, hundreds of thousands of dollars may go down the drain. I like to see where the money is going.

Water Supply Under Essential Services Program

Ms D'ROZARIO to MINISTER for COMMUNITY DEVELOPMENT

What population level is required for the installation of a water supply under the essential services program? Has such a water supply been installed at Newcastle Waters Station and is it being maintained by the government under the essential services program?

ANSWER

I ask that the question be placed on notice.

Palm Leaf Beetle

Mr HARRIS to MINISTER for PRIMARY PRODUCTION

The palm leaf beetle continues on its path of destruction. Are we any closer to approving the introduction of a wasp to the Darwin area to control the palm leaf beetle?

ANSWER

I am informed that eradication of the palm leaf beetle by spraying insecticides has ceased largely because of the illegal planting of palms outside the quarantine area. Infestations were confirmed in the Nightcliff area for the first time in September. Approval has been received from the relevant authorities for the erection of warning signs. An application has been made to Commonwealth Quarantine to import the parasite Tetrastichus brontispae for laboratory testing. Further information on the host specificity of the parasite was requested and this has been sent to it. This means that the parasite works only on the palm leaf beetle and no other. The Director-General of the Queensland Department of Primary Industries has confirmed his organisation's preparedness to receive under quanrantine and

safety test the palm leaf beetle parasites. The parasites will be held in Queensland and bred up to a population level for eradication purposes. This is expected to take 12 months.

The task force at its last meeting on 23 February agreed to send Mr Ted Fenner to Western American Samoa to study the parasite in its natural habitat. A 10-day visit has been organised from 21 April 1982.

Funding for Teacher Aides on Aboriginal Outstations

Mr B. COLLINS to MINISTER for EDUCATION

Has any of the $100,000-plus that has been provided to the Department of Education by the Department of Aboriginal Affairs for the employment of teacher aides on Aboriginal outstations been utilised?

ANSWER

The figure is $125,000 and the answer is yes.

Supply of Services to Commercial Establishments

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

What consideration does he give to the supply of services such as roads and water to commercial establishments in the interests of Territory development?

ANSWER

Every reasonable consideration is given to the supply of water services to commercial establishments and any proposal dealing with water supplies would be treated on its own merits. With regard to the upgrading of roads, we have to be careful because, whilst commercial establishments are moving out to the rural area, the money supply for the construction of roads is not inexhaustible. We need to have our priorities in order and ensure that main traffic roads are given priority over isolated instances where industry in an area might be established.

NTDC Loans to Nurserymen

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION

Given that a nurseryman's assets are in living plants, why did the NTDC refuse the normal lending procedure of a crop lien for farmers wanting to borrow money?

ANSWER

I will find out and let the member know.

Opinion Survey on Poker Machines

Mrs O'NEIL to TREASURER

Why is the government not prepared to provide the Assembly with details of an opinion survey about poker machines in clubs since it has been prepared to release the same details about poker machines in casinos?

ANSWER

It seems to me that the opposition has not got the message. This matter was raised before. The government said that the study was a confidential document. It was wideranging on the subject of gaming throughout the Territory. The information is in-house information and will not be released.

We have said that many times. The opposition can save its breath and the House's time by not bothering to ask again.

Solar Power for Yulara Tourist Village

Mr VALE to MINISTER for MINES and ENERGY

Can he inform the House the current status of the solar power project proposed for the Yulara Tourist Village in Central Australia?

ANSWER

In fairness to the member, I should say that there is a great deal of behind-the-scenes work going on with this project at the moment. I think that it would be more appropriate if the question were put on notice.

Boat Ramp at Nhulunbuy

Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

Does the government intend to make good an undertaking to construct a boat ramp adjacent to the Nhulunbuy township?

ANSWER

If it is a commitment of the government, of course it would. I would need to check it out exactly. I would certainly be happy to advise him later in the sittings.

Relocation of Department of Mines and Energy in Tennant Creek

Ms D'ROZARIO to MINISTER for MINES and ENERGY

Has the Tennant Creek section of the Department of Mines and Energy been relocated from the government office block to privately-owned premises and, if so, what is the reason for the move and what is the cost of the new accommodation?

ANSWER

Mr Speaker, I have no knowledge of any move.

Proposed Entrance to new Airport Terminal

Mr SMITH to MINISTER for TRANSPORT and WORKS

In response to a question on notice, he stated that the proposed entrance to the new airport terminal would leave McMillans Road between Rapid Creek and Rapid Creek Road. What plans, if any, are there to upgrade McMillans Road and Rapid Creek Road as a result of this decision?

ANSWER

I ask the member to place the question on notice.

Dental Act

Mr HARRIS to MINISTER for HEALTH

Has the Dental Act been reviewed as yet and, if it has been reviewed, when are we likely to see legislation before this Assembly?

ANSWER

This is more commonly known as the 'Tooth Fairies Act'. I am happy to advise the House that the Dental Act is ready to come before the House. There

has been a last-minute hitch in consultation with the dental fraternity in the Northern Territory. I hope to introduce the bill in the next session.

Yulara Tourist Village

Mr BELL to CHIEF MINISTER

Will he give a report to the Assembly on the progress of negotiations for the development of Yulara Tourist Village?

ANSWER

I could give a brief report this morning on negotiations proceeding for the development of Yulara Tourist Village. I can certainly assure members that negotiations are well in hand and it is hoped that work will commence at the Yulara site within 2 months or so. That is subject to satisfactory documentation in relation to the funding arrangements and all the other legal niceties that must precede the embarkation of a project involving as it does the eventual commitment by the government to the expenditure of millions of dollars of taxpayers' money. I should make it clear that, when I say the 'expenditure of taxpayers' money', that is a contingent commitment because it is proposed at the outset that the total project be funded from private sources and the government will have what amounts to an option to purchase those facilities within the project that are in fact government facilities, such as police stations. For the first 5 or 10 years, the government will leave those facilities.

The government will be giving a guarantee of performance of the terms of the loan. In due course, I have no doubt that full details of these transactions, subject to the approval of the various lenders, will be made public knowledge. I do issue that caveat, Mr Speaker. I am quite prepared to disclose anything in relation to the Yulara project because I think that the Territory government and the Territory itself should be fairly pleased that it has been able to gain national interest in this project and to get it carried out on what amounts to a similar arrangement to the New South Wales government's funding of the Eraring Power-station. Whether the bankers and the various financial institutions who are involved wish wideranging publicity to be given to the various details, I do not know. I think it would probably be better if I gave a detailed statement to the Assembly at the next sittings because I believe that I will have many more facts to report on at that stage. At this stage, negotiations, to cut it short, are proceeding. There is every sign that they will be concluded shortly and every expectation that work will commence within 2 months or so.

Child Health Unit in Alice Springs

Mr D.W. COLLINS to MINISTER for HEALTH

Has the future of the Child Health Unit next door to the council chambers in Alice Springs been decided and are there any plans to establish a child health unit on the East Side.

ANSWER

I assume the honourable member is referring to the Child Health Unit on the council grounds in Alice Springs. About a year and a half ago, I received a representation from His Worship the Mayor saying that our health centre was on their patch and it looks pretty dreadful compared to the new corporation complex we have just built. He asked us to move out and push it over. I put it to him that, if he could provide free space for the health centre in the new corporation buildings, that might be a possibility. He

did not warm to that at all. He felt that there should be some sort of remuneration. I was not quite sure of the basis of his thinking. It seemed all right for us to accommodate him but it was not all right for him to accommodate us. I followed the matter up with the department. It turns out that the block on which the health centre stands is a special purpose lease held by the department. In fact, we are the owners of the building. We inherited the building and have been operating it for many years as a community health centre and a child clinic.

There are several aspects of the building that are being reviewed by the Department of Health in Alice Springs. It was built in 1956 and the complexion of Alice Springs has changed very considerably over the years. There is a review now as to whether the building is ideally situated for the services that we wish to provide. If it is not ideally situated, the department will look at alternative sites. One of the considerations has been to try to obtain rooms in some of the education facilities on the east side if that was acceptable to the Department of Education and the minister who is also from Alice Springs and has an understanding of the problem.

The review on the distribution of community health and infant health services in Alice Springs will probably continue for some months. Where possible, we will try to accommodate the council. If it is absolutely essential that we stay in the present premises, it would not be unreasonable that, in the next year, we should make an effort to make that building more attractive in order to fit in with the decor of the new council complex. If the member wishes, I would be happy to provide him with a departmental briefing on the issues.

Assistance to External Students

Mr DOOLAN to MINISTER for EDUCATION

Does the Education Department have any plans to assist external students with compulsory residential school costs at southern universities? For example, a University in New England requires Batchelors of Letters to attend 2 residential periods during each year?

ANSWER

The matter is somewhat complicated. I certainly undertake to examine the matter and advise the member later. The Commonwealth government has retained the responsibility of assistance to tertiary students. No state provides the type of help which the honourable member refers to. The Commonwealth in its subventions to the states does not make allowance for those sorts of matters. Since the introduction of the Territory Education Act, the Commonwealth has retained unto itself that responsibility and we are simply not funded to pick up these Commonwealth responsibilities.

Compensation for Assistance to Police in Rural Areas

Mrs PADGHAM-PURICH to CHIEF MINISTER

What consideration is given to country people receiving compensation for services in kind that they extend to the police in the performance of their duties?

ANSWER

Each particular case has to be considered on its merits. The consideration to be given to compensate for assistance that country people afford to police is something that has to be looked at each time assistance is extended.

I believe that police have a pretty good relationship with most country people. There is a degree of assistance rendered to police by country people in the performance of their duties. At the same time, country prople appreciate the services of the police, or at least you, Sir, have told me on several occasions that they do. I think this matter has never really produced any great difficulties. There have been 1 or 2 cases where people have attempted to get the police to meet the account for certain services in which they engaged themselves, believing them to be necessary for the proper enforcement of the law. There has been disputation over those matters but, by and large, I believe the relationship is a good one and the police do everything they can to extend every consideration.

Pensioners' Air Fare Scheme Provisions

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

Has the department been able to amend arrangements for the pensioners' air fare scheme to remove the need for pensioners to pay the full amount of the fare before receiving the government subsidy?

ANSWER

Mr Speaker, the matter is under consideration.

ADMA Marketing Strategy and Mung Beans

Mr. B. COLLINS to MINISTER for PRIMARY PRODUCTION

Has ADMA yet established firm export markets for mung beans and what progress is being made with ADMA marketing strategy generally?

ANSWER

Mr Speaker, I would relish the thought of the Chairman of ADMA answering the question because it would keep the Leader of the Opposition occupied for about 2 days. I have no specific answer to his question but, if he puts it on notice, I will endeavour to get a reply for him.

Control of Salvinia Molesta

Mr D.W. COLLINS to MINISTER for PRIMARY PRODUCTION

Is salvinia molesta a problem in Northern Territory waterways and, if so, are there any plans to attack it with the Brazilian weevil cyrtabagaus singularis hastache which was so successful in the control of salvinia in Lake Moondarra via Mt Isa?

ANSWER

I will have trouble pronouncing the name of this weevil. Salvinia is a problem in Northern Territory waterways. I refer the member for Alice Springs to a press release that was issued by the department on 1 March regarding the introduction of the weevil he has just mentioned. The release stated:

> *Salvinia is a free-floating water fern which was dispatched around the world as decoration for aquaria and ornamental fish ponds. According to the Department of Primary Production weeds agronomist, Mr John Gillette, salvinia's explosive growth and lack of natural predators make it a serious menace in Northern Territory waterways. The weed has been growing rapidly in the Nhulunbuy town lagoon since 1976. Chemical and mechanical control methods have not been successful. The Department of Primary Production has started a biological control program aimed at total eradication of the weed. Mr Gillette says that the answer to the*

problem may be the small weevil. The weevil has already been used with spectacular results on Lake Moondarra near Mt Isa. The weed on Lake Moondarra was wiped out in 1 year after the weevil was released. Over that year, weevils munched through an estimated 50,000 tonne of salvinia. Adult weevils and their larvae actually reduced the weed to a soft pulp which sinks and decomposes. Mr Gillette said that the DPP released 850 weevils plus a big supply of salvinia into the Nhulunbuy lagoon last November. The extra salvinia was put in to give weevils enough food to multiply and fill the lagoon during the wet season. The first monitoring survey will take place early in April. This will tell weeds agronomists if the new line of attack is meeting with the success anticipated by the Department of Primary Production.

Alice Springs Meetings of Department of Health Executives

Mr BELL to MINISTER for HEALTH

I refer once more to last weekend's meetings. Given that the meetings were held in Alice Springs Casino rather than the hospital, and given that so many officers had to fly so far to attend the meetings, and given that the southern region of his department has been fronted with a bill for entertainment for the meetings, were the meetings cost-effective?

ANSWER

Mr Speaker, the honourable member made certain statements there that I do not have access to. I understand that, if the officers went to Alice Springs, they would be accommodated by the department or paid a travel allowance. That is what happens normally. If there are any extraneous expenses on top of that, I will take the matter up with the secretary of the department who organised the transport and accommodation. The honourable member may not be aware of it but I do not worry about the organisation of travel arrangements within the department; it is left to the department. I can say that the meal and accommodation and expenses that I had in Alice Springs were within my own travelling entitlements. I did not have any frills on the side. If the member is suggesting that we provide petty cash for everybody to play a few tables, then I think that we had better have a look at that too. I think the member is getting a little carried away with the whole thing and I can assure him that, from time to time, there will be a need to bring officers of the department in the rural areas to the main centres. It is happening every day with meetings of this nature. On this particular occasion, I stayed at the casino. The venue for this meeting was set around the hospital swimming pool and that was cancelled 10 minutes before the meeting because of the impending rain. If it was held at the casino and caused him some embarrassment, I am sorry.

Golden Staph at Casuarina Hospital

Ms D'ROZARIO to MINISTER for HEALTH

What is being done to contain the spread of golden staph at Casuarina Hospital?

ANSWER

I would like that question placed on notice.

Relocation of Police Regional Centre

Mr LEO to CHIEF MINISTER

Could he supply the reasons why the Police Department moved its regional centre from Nhulunbuy to Jabiru?

ANSWER

I do not have details that would enable me to provide a good and sufficient answer to that question. I can say that, basically, I leave the organisation and administration of the police force to the Police Commissioner. I have spent a great deal of time in this Chamber being lectured by members opposite that that is the proper course for elected officials to adopt. Nevertheless, since elected officials bear the responsibility, I think they should have some say in what they are expected to bear the responsibility for. I can certainly see that there should be no political interference with public service appointments and I heartily endorse that tenet. As to the administration of departments, I think that politicians responsible for those departments should have a voice in the proposals.

However, such is my confidence in the Police Commissioner that I leave the ordering of the police force very largely to him. He did mention to me that he was proposing to move the headquarters of the police district in question from Nhulunbuy to Jabiru. The reasons that I recall him giving me were that the district extends even to the west of Darwin, and Nhulunbuy, unfortunately, is not accessible by road or by any other means other than by air. Quite an extensive police complex is being established at Jabiru. From the commissioner's point of view, it is more central to that district, more accessible to the people operating in that district and the facilities at Jabiru will be more modern and provide a better situation for the administration of the district.

I would not think that it would affect the police strength at Nhulunbuy to any significant degree. It would mean the transfer of the officer in charge of the district to Jabiru but the police strength at Nhulunbuy would remain the same. From the number of court proceedings that take place in Nhulunbuy, the town could be presently considered as being over-policed. However, there are no proposals that I know of to reduce the police strength there.

Rural Roads Conference

Mr VALE to MINISTER for TRANSPORT and WORKS

Can he advise the House when and where the next Rural Roads Conference will be held?

ANSWER

It will be held in Tennant Creek on 25 March.

Bilingual Program in Aboriginal Schools

Mr B. COLLINS to MINISTER for EDUCATION

The bilingual program in 4 Aboriginal schools was under evaluation last year and a report was expected to be ready for presentation to the accreditation panel in 1982. Has this occurred and have the 4 schools been accredited?

ANSWER

A program of accreditation has been going on for quite some time. The most successful bilingual program to date has been that at Yirrkala. It is worth pointing out that the panel came to the conclusion that, whilst there was a significant improvement in the performance of particularly that school, nonetheless the 2 primary objectives, literacy and numeracy, were not achieved to the level that the panel would like. However, I certainly saw fit to give interim accreditation to the program at Yirrkala for a 2-year period. At the end of that 2-year period, the matter will be further reviewed and hopefully lead to formal accreditation of the program. The other schools where the program is being conducted will also be under review during that period.

Licensing of Mortgage and Insurance Brokers

Mrs O'NEIL to TREASURER

Has the government made a decision regarding the licensing of insurance and mortgage brokers?

ANSWER

Mr Speaker, the government has not made a decision on the licensing of insurance brokers yet. We will have to have further discussions with members from the industry on it. However, to date no decision has been taken on whether or not to proceed with legislation on this matter.

Erection of Road Signs in Rural Area

Mrs PADGHAM-PURICH to MINISTER for TRANSPORT and WORKS

Can he give me details about the program for distribution of road signs in the rural area.

ANSWER

Mr Speaker, at the moment, the Department of Transport and Works is engaged in erecting a series of guide and regulatory signs in the rural area. I believe that the program is expected to be completed by the end of this month.

Circular Concerning Health Matters in Schools

Mr B. COLLINS to MINISTER for EDUCATION

He would recall that at last sittings objections were voiced in this Assembly about a certain circular issued by the Department of Education concerning health matters involving children being sent home without treatment. I understand the circular was withdrawn. Could he inform the Assembly what is happening now?

ANSWER

Mr Speaker, the circular was withdrawn. I cannot give him information on the exact position at present. I thank him for the question. It is something that I needed a reminder on and I will follow it up.

Assessment of Sales Tax Rebate Program

Ms D'ROZARIO to TREASURER

Has an assessment of the impact of the government's sales tax rebate program been undertaken and, if so, will he make copies of the assessment available to members of the Assembly?

ANSWER

Mr Speaker, I am not quite sure what the honourable member means by an assessment of the program. The government has not had any reaction from its initiatives to provide rebate for the sales tax on the freight component of products brought to the Northern Territory. The scheme is proceeding and we are making payments to the various bodies which comply with the necessary guidelines that have been laid down by Treasury. Applications are assessed and cheques are paid out. We have had assurances from wholesalers participatingin the scheme that the scheme has had an effect on the prices of goods that they supply to the retail sector. From our point of view, the scheme is working and it has not been reviewed in any way.

Private Hospital in Darwin

Mr HARRIS to MINISTER for HEALTH

In view of the fact that only one application has been received in response to tenders for the establishment of a private hospital at the old Darwin Hospital, what plans are under consideration for, firstly, the future use of the area that has been vacated by the old Darwin Hospital and, secondly, the establishment of a private hospital facility in another area?

ANSWER

The Department of Health has handed the keys and its former interest in the Darwin annex to the Department of Transport and Works. My colleague, the Minister for Transport and Works, will be charged with the responsibility of the future use of the property. In answer to the second part of the member's question, only one tender was received for a use of a part of the old Darwin annex. That tender is now before Cabinet but I am able to say that it has requested certain financial assistance from the government in terms of upgrading and maintaining the property. It is highly unlikely that any favourable decision in this regard will be forthcoming.

I am still firmly of the view that, if it is possible to establish a private hospital in the Darwin area, we should proceed to do that. I have now asked the department to consider what options are available to us to have a private hospital started from scratch. I might also advise the House that we had nearly a dozen or more expressions of interest in the old Darwin Hospital when it was first advertised. Some people took one look at it and said there is no way that it could ever be run viably as a hospital. The fact that we received one tender seeking a lot of help would add a certain amount of weight to that argument. Given that it does not have a future as a private hospital, I have now asked the department to examine other possible options for the establishment of a private hospital in the Northern Territory.

Brinkin Traffic

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

Will the Minister make available to the Assembly any maps and supporting documents prepared by his departmental officers regarding the options for the traffic flow from the new Brinkin subdivision?

ANSWER

When they are available, I will do so.

Consultation with Aboriginal Traditional Owners

Mr BELL to MINISTER for TRANSPORT and WORKS

What consultation, if any, took place with Aboriginal traditional owners and other citizens of Central Australia before officers of his department commenced blasting a section of the Sadadeen hills to enable the erection of a water tank?

ANSWER

I ask the member to place the question on notice.

Nhulunbuy Primary School

Mr LEO to MINISTER for EDUCATION

As the Nhulunbuy Primary School will fill to capacity during 1982, are there any plans to provide further accommodation for projected needs?

ANSWER

I would be pleased if the Nhulunbuy Primary School did reach capacity because it would indicate that the town is continuing to grow. I was unaware of that particular information. I will certainly check it out. If we can find the means, we will ensure that appropriate accommodation is available. I would certainly want to check the honourable member's figures notwithstanding that he does come from that region.

Ghan Service

Mr VALE to CHIEF MINISTER

In view of recent press reports that the demand for berths on the new Ghan service Adelaide to Alice Springs is far in excess of berths available, can he advise whether he has had any correspondence with Australian National Railways to provide additional services on that line?

ANSWER

That has always been the Northern Territory government's policy and, from time to time, we have made requests to Australian National Railways to increase the capacity, especially of passenger services, on the line from Adelaide to Alice Springs. I am pleased to be able to inform members that a second weekly Ghan service is to be introduced on a 3-month trial basis from 2 May this year. The new service will leave Adelaide on Sundays and return from Alice Springs to Adelaide on Mondays. The number of persons carried between January and July 1981 compared with the same months in 1978 showed an increase of 269% northbound and 225% southbound. In those figures lies an object lesson for the airlines. It is obvious that they have pushed the cost of air travel to the stage where the public is not prepared to contemplate it. Many members may have seen an item on last night's ABC TV

news where it was possible to compare our air fares with United States' fares. I think it is possible to travel from New York or the east coast of the United States to San Francisco or Los Angeles for under $100. An equivalent trip in Australia would cost at least in excess of $300. This is what is putting people back on to the railroads, and good luck to them.

Bynoe Harbour Road

Mr DOOLAN to MINISTER for TRANSPORT and WORKS

What type of development is envisaged that would justify the building of the Bynoe Harbour access road currently being constructed parallel to the old Mandorah Road? What parts of the Cox Peninsula will the road reach and where will it end? Could he give an estimate of the total cost of the planned work?

ANSWER

I ask the member to place his question on notice.

Motor-bike Club Activities at Thorak Reserve

Mrs PADGHAM-PURICH to MINISTER for LANDS and HOUSING

Is he aware that section 107 known as Thorak Reserve at the corner of Branch and Campbell Roads in Berrimah is being used by a motor-cycle club for its activities to the detriment of the nearby rate-paying residents? How long will he allow this section 107 at Berrimah, which has been considered as land for the use of the Department of Primary Production, to be used for an antagonistic use - motor bike club use?

ANSWER

Neither I nor the department have had complaints about the activities of motor-cyclists on the area of land the member refers to. Section 107 is Crown land under the control of the Department of Lands and at present there are no development proposals in respect to this land. I will have the department investigate the suggestion that motor-cycle activities there are annoying nearby residents and see if we can find some way to prevent those activities continuing.

Home Purchase by Australian Public Servants

Mr SMITH to MINISTER for LANDS and HOUSING

What stage has been reached in negotiations with the Commonwealth government to allow Australian Public Servants to purchase their homes?

ANSWER

It is the policy of this government that Australian Public Servants should be able to purchase their homes and decide to become true Territorians and settle here if they so wish. Our policy does not mean a great deal other than it is a cause that we take up with the Commonwealth minister and Commonwealth officials from time to time. Both our representatives in the federal House or at least one of the senators and certainly the member of the House of Representatives have been pushing the case to Commonwealth ministers. We believe that it is unfair that they are currently barred. To date we do not seem to have had very much success. The Commonwealth has been putting the view that it finds it very expensive to continue to build houses in the Northern Territory. Notwithstanding those arguments, we will continue to press for the right of those people to buy their homes in the Territory and to settle here. I do not know how long it will be. It could be a long fight.

Use of Public Facilities by Doctors in NT

Mr BELL to MINISTER for HEALTH

Are there private doctors using public facilities in Northern Territory centres and, if so, what contribution are they making to the cost of those facilities?

ANSWER

There would probably be 15 or 20 private practitioners in Darwin who have access to the Darwin Hospital. There is a part-time GP in Tennant Creek who is operating out of the Community Health Centre for half a day 3 times a week. There are a great number of people in the paramedical field that come into our hospitals on a sessional basis. Very shortly, we will have private specialists operating out of our hospitals in the Northern Territory on a sessional or a fee-for-service basis. There are a great many people in the Northern Territory in private practice who use the facilities of the department. This is a perfectly normal practice right throughout Australia. It is new to the Northern Territory at this stage but it has been going on in the states for about 50 years.

Remuneration for the use of these services depends on the circumstances. There are pretty formal guidelines for specialists and doctors who use facilities on fee-for-service or sessional basis. Most of these charges are laid down in agreements that exist between the department and each doctor. If a GP went to a place such as Groote Eylandt, I feel sure that we would be disposed to having a peppercorn rent just to have a GP operate out of the health centre that we have there. I think it would be futile to ask the person to build another premise when ours is underutilised. It would be an additional service that not only the department could offer but the individual could offer.

The short answer is yes. If he has special queries about persons using these departmental facilities, I would be happy to have him briefed. If the member has any suggestions on how private doctors could better utilise some of the resources we have and make better services available to the community as a whole, then I would be pleased to receive them.

The member would also be aware that, in Alice Springs, for instance, the congress doctors do not have access to the hospital and the wherewithall inside the hospital. I think that is not really totally productive. In the course of time, we should make all our facilities available to those doctors who need them to provide a service in the community, whether for private or government patients.

Licensing of Carpenters and Bricklayers

Mr LEO to CHIEF MINISTER

Will the government introduce legislation requiring the licensing of carpenters and bricklayers similar to that legislation which applies to electricians?

ANSWER

I am curious as to why I should have been asked the question. I was not aware that amongst my ministerial responsibilities were carpenters and bricklayers. I do not have any objection because they are a very worthy group of individuals and artisans. I only wish that there were more qualified carpenters and bricklayers in this country.

I do not believe the government has ever considered registration of carpenters and bricklayers. As my colleague, the Minister for Lands and Housing says, we might as well consider registering carpetlayers, tram

conductors etc. It would get to the stage of being very unnecessary bureaucracy. In my view, there is a strong case for the registering of plumbers and gas fitters. Gas fitters are dealing in a very volatile area where considerable harm can occur if a job is not done properly.

The government has certainly considered registration of home builders. It has been urged to do so by the Master Builders Association. Our concern is that the industry would like to shut out new entrants to the home building industry. For the sake of home builders, we obviously want to ensure as much competition as possible. There are more problems than meet the eye, even with the registration of home builders. I do not see much of a case for registration of carpenters and bricklayers. I urge on the member for Nhulunbuy that we must try to remain as free as possible of red tape. I see this involving at least another 30 forms and 4 or 5 bureaucrats.

Assistance to People Stranded at Rabbit Flat

Mr VALE to MINISTER for COMMUNITY DEVELOPMENT

A recent report indicated that a large number of people were stranded at Rabbit Flat northwest of Yuendumu over the last couple of days. Could he advise what assistance his department has offered to these people?

ANSWER

Mr Speaker, from memory about 77 people, including 4 children, found themselves stranded in the Rabbit Flat area. I understand that they had travelled from Balgo Mission to Yuendumu for business purposes and were returning when they found they could proceed no further. They got as far as Rabbit Flat and Mr Farrens who owns the store there promptly ran out of food himself. Yesterday, some several hundred kilograms of admittedly very plain - but we hope nutritious - food was flown by police aircraft to Rabbit Flat and Mr Farrens kindly agreed to assist with its distribution.

Mr Speaker, I think there are some people from the Yuendumu area in the public gallery and I suppose they would have a wry grin about these people from Balgo getting stuck on roads with which they would be very familiar. I say 'roads' because the people from Balgo would be very familiar with the country but perhaps not so familiar with Northern Territory roads.

I understand that a number of 4-wheel-drive vehicles have left Balgo Mission for Rabbit Flat in order to assist these people to return home. I believe also that a conventional vehicle has traversed that road in the last couple of days, so hopefully the crisis is over. In events like this, it does not matter where people come from; whether they are Territory people or from across the border. Quite clearly, if they are in trouble, it is a matter for this government to assist them and we have done everything we can in this case.

Review of Mental Health Act

Mrs O'NEIL to MINISTER for HEALTH

In 1981, submissions were invited relating to a review of the Mental Health Act. What action does the government intend taking as a result of that review?

ANSWER

Mr Speaker, I thank the member for the question. I was absolutely shattered by the number of submissions I received on the way the Mental Health Act is being administered and the activities involved. I think I have received 2 submissions from the general public. That means either it is working very well or it is working so badly that nobody is even going to worry about forwarding a submission.

There are some amendments I would like to make to the act as a result of the submissions received. Probably they will be introduced during the June sittings of the Assembly. All in all the act seems to be working fairly well, although some minor problems have arisen. However, I think that we can deal with those without a great deal of controversy.

Breaking and Entering at Millner School

Mr SMITH to MINISTER for EDUCATION

What plans does the Department of Education have to prevent further breaking and entering at the Millner School?

ANSWER

Mr Speaker, short of digging a moat around the primary school, one tends to wonder what the Department of Education can do to prevent breaking and entering. We run schools not concrete fortresses. In the face of behaviour of that sort, there is very little any Department of Education can do to prevent people who are determined to pursue it. It is very regrettable. Without completely altering the character of our schools - by putting mesh over windows and so on - we have very limited options in this regard. I certainly would not want to see alterations like that. We can only appeal to people on this. The damage is usually done by children and they should be made aware of the fact that they inconvenience their peers when they behave in this manner.

Disposition of Unserviceable Government Firearms

Mrs PADGHAM-PURICH to CHIEF MINISTER

How are unserviceable firearms held by government departments disposed of, who makes the decision and what procedure is usually followed?

ANSWER

Mr Speaker, I am not sure of the disposition of unserviceable firearms. The Registrar of Firearms has informed me that, as far as he is concerned, the position is as follows. It is for each particular department or statutory authority to determine if a firearm is unserviceable and take its own steps to dispose of it. The registrar has no firm policy which is applied to all departments in respect of this matter.

Final Proposal for the Brucellosis and Tuberculosis Eradication Program

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION

Could he advise the Assembly of the progress that is being made on the development of the final proposal for the Northern Territory's brucellosis and tuberculosis eradication program?

ANSWER

Mr Speaker, the Leader of the Opposition was not in the Assembly late yesterday afternoon when I presented a statement on the brucellosis and tuberculosis eradication policy. I refer him to that statement.

Eye Specialist for Alice Springs

Mr VALE to MINISTER for HEALTH

Can he advise when an eye specialist will be hired to replace the one in Alice Springs who was brought to Darwin.

ANSWER

I will refer that question to the Secretary of the Department and will advise the member as soon as I have information for him.

Financial Assistance to Fruit and Vegetable Growers

Mr DOOLAN to MINISTER for PRIMARY PRODUCTION

Could he advise if any financial assistance is available for farmers experimenting with fruit and vegetable growth; for example, members of the Rare Fruits Council.

ANSWER

I am not aware of a special policy for people in that category. There are other special benefits available to farmers generally and in cropping development particularly. I will take on board the question that he raises and see if some further expansion of existing schemes can be undertaken.

Demolition of Wells Building

Mrs LAWRIE to MINISTER for TRANSPORT and WORKS

When is it proposed to demolish Block 1, known as the Wells Building, which I believe is now uneconomic.

ANSWER

At the moment the department is deciding whether to call for tenders or to ask some private firms to put in a preferential quote. Once we have an estimate, I would be able to decide then when the Wells Building would be demolished.

Blood Tests for Drugs

Mr D. W. COLLINS to MINISTER for HEALTH

Are blood samples taken from drivers involved in motor vehicle accidents in the Northern Territory tested for drugs other than alcohol and, if not, will he undertake to investigate the feasibility of such testing and collection of statistical data.

ANSWER

My understanding is that it is required by law for drivers involved in motor vehicle accidents to have a blood sample taken. At the same time, I do not know whether other tests are taken.

If the member is referring to the possibility of testing for marijuana or some other drug in a person's body, I can only say that, at the time we dealt with the drug and the liquor legislation some years ago, there was no test available to detect whether people had been smoking pot or driving under the influence of a psychotropic substance. I will seek further information from the department and, if there are any advances in that area, I will advise the member accordingly.

White Paper on Education

Mr B. COLLINS to MINISTER for EDUCATION

Honourable members would recall the successful efforts of the minister last year to attract public comment on the Green Paper on Education. Could he advise me of the status of the White Paper?

ANSWER

I have given a lot of thought to the question of producing a White Paper in the usual parliamentary sense. It has occurred to me now that that may not necessarily be the best way of approaching it. I have discussed with officers of the department the possibility of putting out policy decisions,

arrived at as a result of the excellent discussion and feedback on the Green Paper, in the form of booklets. Rather than having one massive document that people have to hunt through to find their own particular interest and in the interests of providing information on policies which have arisen from the Green Paper, very precise booklets of policy would be more appropriate. If I take that decision, we will shortly see the first of those booklets produced.

Aboriginal Sacred Sites Protection Authority

Mr BELL to CHIEF MINISTER

Is he aware that the Aboriginal Sacred Sites Protection Authority does not have the funds to fence and signpost at least 4 sacred sites in Alice Springs which were registered at a meeting of the Authority on 11 February?

ANSWER

Mr Speaker, I might just point out to the member for MacDonnell that I am not the Minister for Aboriginal Affairs. I exercise a liaison role on Aboriginal matters. I am well aware of the funding position of the Aboriginal Sacred Sites Protection Authority. It has been given by the Northern Territory government the total amount of funds received by the Northern Territory government from the Commonwealth. The Territory protested at the level of those funds at the time and we have continued to protest. Only a couple of weeks ago, I wrote to the Minister for Aboriginal Affairs and the Prime Minister telling them that the authority would run out of funds by the end of April. To the best of my knowledge, I have not received a response but all previous responses from all levels of the Commonwealth government have been negative.

Natural Gas

Mr VALE to MINISTER for MINES and ENERGY

Recent reports have indicated natural gas finds both offshore in the Northern Territory and in Central Australia. Could he indicate whether it is intended to utilise those resources to provide cheaper energy for the Northern Territory?

ANSWER

The government has taken an initiative in purchasing from one operator in Central Australia sufficient gas reserves to operate the Alice Springs Powerhouse for the next 20 years. At this stage, there is no additional requirement for gas in the Alice Springs area. As explorers are finding gas, it is being tapped and left in the hope that eventually we will find a basin big enough to justify either sending gas to Darwin, to South Australia, New South Wales or some other market that needs it. Certainly, our own requirements for a long time to come are well in hand.

So far as the offshore gas is concerned, the indicators that the exploration companies have had are extremely exciting and could possibly have the potential to provide us with some power with gas. Whether it would be more economic than coal is an argument that could be debated at quite some length. We would be talking about a period of 7 to 10 years to get the gas inshore and an infrastructure cost that is so heavy at the moment that it would not be possible for us to pay off the infrastructure just for use in the Darwin powerhouse. Naturally, we would need to find another use for the gas such as a petrochemical works or export to Japan. I think that all of these things are possible but the most important thing that we have to do at the moment is to keep on punching holes in the ground. The results of that drilling are most important for the Northern Territory.

Electricity Charges for Caravan Dwellers

Ms D'ROZARIO to the TREASURER

What steps have been taken to give caravan dwellers whose sites are individually metered the benefit of domestic electricity tariffs?

ANSWER

I could be wrong but I understood that caravan dwellers whose sites were individually metered were given domestic electricity tariffs. In fact, the electricity commission has advised caravan park operators that that is the case providing the operators are prepared to bear the cost of such a metering system. I do not have the full information before me. If the member writes to me, I will spell out the existing policy quite clearly.

Use of Government Vehicles

Mr HARRIS to CHIEF MINISTER

From time to time the issue of the use of government vehicles for purposes other than government business is raised. What is the Northern Territory government's policy on the use of government vehicles?

ANSWER

I am told about the misuse of government vehicles from time to time. I have also talked about this on talkback radio and in letters to the editor of the various so-called newspapers that circulate in this Territory. The government does have a policy which is many pages in length because it has to cater for quite a number of situations. It boils down to this: if people are entrusted with a vehicle in consequence of their employment in the public service, then that vehicle is for their use in the execution of their duty. The majority are further entrusted with the home garaging of the vehicle.

To my mind, this is a sensible and rational idea which saves the government the problems of maintaining security over those vehicles. Those public servants can drive the vehicles to and from work which, I suppose, is a quid pro quo to them for garaging the vehicle at home and taking more care of it than if they drew a different car from a store each day. This encourages better maintenance of government vehicles. It is usually in relation to home garaging of government vehicles that complaints of misuse arise. I have received complaints of vehicles with NT government number plates being seen carrying loads of stones and gravel on Saturdays and Sundays. Quite often, when these complaints are investigated, it is found that the people are in fact on the job. As in any system, there must be some abuse but this is quite a good policy. I think we introduced it 2 or 3 years ago. It has been updated from time to time. It seems to me that it is the most rational policy that a government could adopt in all the circumstances.

Fog Bay

Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION

What negotiations have taken place between the federal and Territory governments in relation to an agreement on the operation of Fog Bay as a closed fishery?

ANSWER

The Chief Minister spoke to the Prime Minister about it and, prior to that, there were interdepartmental discussions.

Medical Practitioners at Jabiru

Mrs PADGHAM-PURICH to MINISTER for HEALTH

What is the position regarding permanent medical practitioners practising at Jabiru?

ANSWER

My understanding is that the department has a permanent officer at Jabiru. It is the intention that there will always be a permanent doctor there. Whether the doctor is an officer of the department or a private practitioner is something that I can discuss with the member for Tiwi and the constituents in her town of Jabiru some time within the next 2 weeks. I do not know of any proposals not to have a permanent doctor at Jabiru. I am aware that there are already private dentists operating there. If the member has any fears to the contrary, she may wish to raise them with me at another time.

Model Bylaws for Local Government Authorities

Mr SMITH to MINISTER for COMMUNITY DEVELOPMENT

What progress has been made in the preparation of model bylaws for local government authorities?

ANSWER

As members would be aware, the government had previously undertaken through the Local Government Association to provide local government with so-called model bylaws. When these model bylaws in a range of forms were presented to the Local Government Association, it was found that, because of the varying needs and sizes of the corporations throughout the Northern Territory, members of the Local Government Association could not agree among themselves as to what a reasonable and standard form was. Regrettably, we virtually had to completely abandon the model-bylaw system and, through the Local Government Association, we have again made the offer of the resources of the Department of Community Development's Local Government Division and the Department of Law to assist councils with their own bylaw making.

I understand this is now fairly well down the road and indeed a number of bylaws are about to come forward for approval by Executive Council. It is rather surprising that, what was indicated previously to us as being impossible - that is, individual councils making their own bylaws - is now according to the councils the only way of ever achieving bylaws. That is the current position. I am still hopeful that bylaws will be tabled in this Assembly pursuant to the normal procedures of the Subordinate Legislation and Tabled Papers Committee, certainly within the next 6 months.

Quite frankly, there has always been the capacity at law for local councils to make bylaws. I cannot understand why it has not been done. Hopefully now it will be.

Local Government at Nhulunbuy

Mr LEO to MINISTER for COMMUNITY DEVELOPMENT

Have there been further discussions between the joint partners, the federal government and the Territory government to confer full local government status on Nhulunbuy and, if so, at what stage are the negotiations?

ANSWER

I have raised this issue with the people of Nhulunbuy. The Chief Minister did so again during his speech opening the Nhulunbuy High School. I am not certain how far negotiations have gone. I certainly know there is significant

reluctance on behalf of the company to enter into any such agreement. I do know that there is a significant backing from the community for a much greater say in their own affairs than exists at the moment. The people of Jabiru feel much the same way. That is an interesting one. We have been working on that for months. I notice now that a piece of legislation on that will be presented by the opposition spokesman. He was given a thorough briefing on exactly that by my department about 3 weeks ago so I dare say he has stolen the idea.

Nonetheless, it is a difficult area. The mining company believes it has certain asset considerations in relation to the rating of its own property. It is a difficult one. We are anxious to conclude negotiations with Nabalco and with the people of Nhulunbuy. But without the cooperation of the mining company, it will be a very difficult task indeed.

Dangerous Goods Act

Mrs O'NEIL to MINISTER for HEALTH

The Dangerous Goods Act was assented to in January 1981. Can he explain to the Assembly why it has not yet come into operation?

ANSWER

I ask the member to put the question on notice. I cannot give her that answer off the top of my head.

Allegations of Employment of Underage Children at Marqua Station

Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

I refer him to an inquiry carried out by officers of his department into allegations of employment of underage children at Marqua Station. Will he table the results of that inquiry?

ANSWER

Mr Speaker, without knowing the content and nature of the report, if any, I cannot give that undertaking. If it is an internal document, I dare say I would decline to do so. If it is a document which contains information which it is in the public interest to have, then I would certainly do so.

Grain Receival Depot at Katherine

Mr VALE to MINISTER for PRIMARY PRODUCTION

Could he report on the progress of the grain receival depot at Katherine?

ANSWER

The Agricultural Development and Marketing Authority is in the process of concluding a major grain receival depot which will be operating in time for the 1982 harvest. The depot, costing $489,000, will have facilities for storage and receival of grains, either bunkers or vertical silos, and a cool store where seed can be held from season to season. In addition, seed cleaning and grading equipment are to be installed to assist in the marketing of pasture seeds and mung beans. The depot will be managed by the authority in a manner that will bring grain receivals and handling into line with standards established in the other states.

We are hopeful that grain production will continue to increase to a stage where quantities surplus to the domestic market must be exported overseas. It is therefore essential that internationally-recognised standards for grain exports be introduced at this early stage so that the Northern Territory product will ultimately be acceptable on world markets. 75% of the expenditure incurred in the construction of the depot at Katherine has gone to

Territory suppliers. Of the total $489,000 cost of construction, just over $250,000 has gone to Katherine contractors.

Petrol Sniffing at Maningrida

Mr SMITH to MINISTER for COMMUNITY DEVELOPMENT

When will he table a report prepared by his department on petrol sniffing at Maningrida?

ANSWER

The answer to that question is precisely the same as the other one. I do not know in detail what is in that document. I have certainly scanned it. I intend going back and reading it very thoroughly. The document could well contain the names or sufficient information to identify individuals and it may not be in the public interest to make it public.

Health Clinic at Napperby Station

Mr BELL to MINISTER for HEALTH

Is he aware of agreement being reached on a suitable site for the proposed health clinic at Napperby Station? If agreement has been reached, when will the clinic be erected?

ANSWER

I carry many answers around in my head but that is not one of them. I ask the member to put that question on notice.

Failure of Roads in Alice Springs

Mr SMITH to MINISTER for TRANSPORT and WORKS

Is there any evidence of pavement failure on the roads constructed in both the Araluen and Sadadeen subdivisions in Alice Springs? If so, what action does the government intend to take on this matter?

ANSWER

I am unaware of any pavement failure. However, I will obtain information and provide it to the member later.

Jabiru Hospital

Mr B. COLLINS to MINISTER for HEALTH

My question relates to this morning's ABC news. Did he hear this morning the ABC refer to the Jabiru hospital as being downgraded to the status of a health centre? That is at variance from what the minister said yesterday. Is the minister wrong or is the ABC wrong?

ANSWER

It is not like the ABC to be wrong; it generally gets everything right. On this occasion, I did not hear the ABC news. If it said that about the Jabiru health centre, I do not know what the basis of its information is because I advised the House 2 days ago that the future of the Jabiru hospital was a matter that the member for Tiwi and myself have to take up with the local people and mine management at the earliest possible time. I went through a range of reasons why that discussion was necessary, Mr Speaker. With all due respect to the ABC, if it broadcast that, it probably has wrong information.

2905.824—33

Golden Staph at Casuarina Hospital

ANSWER TO QUESTION:

Mr TUXWORTH (Health) (by leave): Mr Speaker the honourable member for Sanderson asked a question yesterday about golden staph and I undertook to get the information she required. I regret that it was not available for yesterday afternoon. I have a briefing paper here that I will read, Mr Speaker. I think most members will find the contents of it interesting. It has been broken into a series of questions and answers and is not very long.

METHICILLIN RESISTANT STAPHYLOCOCCUS AUREUS

What is it?

A bacterium which is resistant to all of the safe, commonly-used antibiotics. It can cause serious and even fatal infections in patients.

Whom does it affect most?

It affects vulnerable patients; for example, intensive care patients with multiple systems failure, low birth weight neonates, patients with depressed immune systems.

When was it first found in Darwin Hospital?

A patient transferred here from a Victorian hospital with an infected, discharging wound brought the organism to this hospital.

Is the organism under control at Darwin Hospital?

Darwin Hospital experience has shown that the organism can be controlled and at the same time normal patient services can be maintained.

What is the hospital doing about it?

Control of the spread of all infections, including MRSA, comes under the direct supervision of the Darwin Hospital Infection Control Committee. This Committee consists of the Medical Superintendent, various Medical Specialists and Nursing Staff, including a Registered Nurse whose full-time work involves all aspects of Infection Control practice.

The Infection Control Committee has a policy, which is reviewed as necessary, to control spread of MRSA.

The policy is aimed at:

1. *Detecting all MRSA organisms.*

2. *Isolating all patients with the MRSA organism from patients without the organism.*

3. *Special effort is put into keeping the infection out of wards/units where patients who are very vulnerable are nursed. We have succeeded in keeping the organism out of the Children's Ward, the Special Care Nursery, the Obstetric Unit and Ward 3A where we nurse patients who have had implant surgery.*

All outbreaks of MRSA have been contained by the tightening of our control policies. While the organism is still in the Hospital, it is considered under control. The Infection Control Committee is of the opinion that we will not be rid of this problem bacterium in the foreseeable future but it is one that we shall continue to work on.

Possible Loan for Hilton Hotel for Alice Springs

Ms D'ROZARIO to MINISTER for INDUSTRIAL DEVELOPMENT

Is it a fact that the Northern Territory Development Corporation is to advance a loan of $480,000 to a company called the Central Australian Development Corporation for the purpose of purchasing a site upon which to construct an international hotel at Alice Springs and that this hotel will eventually become part of the Hilton group of hotels? Is it further a fact that the loan is to be for a 10-year period and interest free?

ANSWER

Mr Speaker, the government does propose a plan of assistance to establish a Hilton hotel in Alice Springs. The details are not all available to the government at this time. I would ask the honourable member to place her question on notice.

Sale of Cattle by Department of Primary Production

Mrs PADGHAM-PURICH to MINISTER for PRIMARY PRODUCTION

In Northern Territory Government Gazette No G9 of 5 March 1982, a sale made by Department of Primary Production for 92 head of cattle which cost $6660 was shown under the heading 'Contracts Arranged'. Could the minister please give us details of this transaction and why it was necessary?

ANSWER

Mr Speaker, the purchase of these cattle from a station in Central Australia was undertaken to provide a sentinel herd for the blood-testing procedures undertaken regularly for blue tongue viruses. This is a monitoring program that we have undertaken for some years and will continue for some years to come. We purchased 40 heifers, 42 steers and 10 bulls, and paid an average price of $72 per head.

Possible Loan for Hilton Hotel for Alice Springs

Ms D'ROZARIO to MINISTER for INDUSTRIAL DEVELOPMENT

Is it a fact that the Northern Territory Development Corporation is to advance a loan of $1m in the first half of 1982 to a company called the Central Australian Development Corporation as assistance to construct an international hotel at Alice Springs which will eventually become part of the Hilton group of hotels? Is it further a fact that the loan is to be for a 10-year period, interest free for the first 5 years and thereafter to be repaid in the second 5-year period at 12%?

ANSWER

I ask the honourable member to place her question on notice.

Realignment of Stuart Highway in Alice Springs

Mr D.W. COLLINS to MINISTER for TRANSPORT and WORKS

What progress has been made regarding the planned realignment of the Stuart Highway through Alice Springs?

ANSWER

Following the release of land by the Australian National Railways, I am pleased to say that work on the realignment is now scheduled for the 1982-83 financial year. It will involve significant improvement to the highway between Telegraph Terrace and Smith Street. Discussions on the proposed route are taking place between government departments and the Alice Springs council.

My department perceives the design development as a matter of urgency. The development will eliminate hazardous Larapinta Drive, Telegraph Terrace, Railway Terrace and Wills Terrace intersections and provide for a new direct link between Larapinta Drive and Stott Terrace. The new intersection of Stott Terrace, Larapinta Drive and Stuart Highway will be controlled by traffic signals. I will be writing to the Mayor of Alice Springs advising him of these details.

Sealing of Virginia and Bees Creek Roads

Mr DOOLAN to MINISTER for TRANSPORT and WORKS

Can he give an indication when sealing of Virginia Road, which was promised to be finished in early 1981, will be completed, and when the government plans to seal Bees Creek Road?

ANSWER

Mr Speaker, I am unable to provide the member with that information. I will provide it to him later in the day.

Proposed Amendments to Poisons Act

Mr HARRIS to MINISTER for HEALTH

He would be aware that the Northern Territory is out of step with the rest of Australia as far as the Poisons Act is concerned. Has the Poisons Act been reviewed as yet and when will amendments be introduced into the Assembly to make our act consistent with other acts in Australia?

ANSWER

I am aware that we are not in concert with the rest of the nation so far as legislative control over poisons is concerned. I am happy to advise the member that a great deal of work has been done on this within the department over the last 9 months. I am not able to advise when the legislation is likely to be presented to this Assembly after it has been to Cabinet.

Possible Loan for Hilton Hotel for Alice Springs

Ms D'ROZARIO to MINISTER for INDUSTRIAL DEVELOPMENT

Is it a fact that the Territory Development Corporation is to advance a further loan of $1m in the 1982-83 financial year to a company called Central Australian Development Corporation as assistance to construct an international hotel at Alice Springs and that this hotel will eventually become part of the Hilton group of hotels? Is it further a fact that the loan is to be for a 10-year period commencing 1982-83, interest free for the first 5 years and at an undetermined rate of interest for the next 5 years?

ANSWER

I indicated to the honourable member that she should place those questions on notice so that I may give an exact reply rather than one that is not fully confirmed. I indicated that the government is looking at a proposal to support the establishment of a Hilton hotel group in Central Australia. If a package of assistance is required, obviously the government will take a decision on that at a later time.

Daylight Saving

Mrs LAWRIE to CHIEF MINISTER

There is a press report that representatives of state governments are to meet to decide on an orderly plan for daylight saving next year. Will the Northern Territory government be represented at any such talks and at what level?

ANSWER

Firstly, I avoid attending any meetings of whatever sort between states and Commonwealth that I possibly can. I can think of nothing more time or money-wasting than going all the way to Melbourne or Queenstown in New Zealand or even as far as Fiji. As far as I am concerned, I will not be there to talk about daylight saving. I will be back here doing a bit of work.

As I recall it, this Assembly debated the concept of daylight saving for the Northern Territory back in 1977 or 1978. We rejected it along non-party lines. I think it was a free vote that the Northern Territory would not participate in daylight saving. I cannot see any reason why this Assembly would want to change that decision at this stage. We are still situated in the same Territory with the same climatic conditions which causes the sun to rise at around 6.30 am and set later than it apparently does down south. Therefore, I do not really see that our participation in these talks will benefit the Northern Territory at all. I would think it would be fairly impractical for us, unless we want to become a territory of night owls, to participate in daylight saving. I think it is something that we have to leave to those poor misbegotten people who inhabit the frozen wastes of Tasmania and Victoria and the icy cold plains of New South Wales where the electricity turbines are the only things that do not work well. At least, that is the way the New South Wales government would have us believe it.

I would say in answer to the honourable member's question that we will keep our ear to the ground and see what sort of blather comes out of this particular ministerial meeting and how it might affect the Northern Territory. Certainly, it affects our commerce because, when they start earlier in Melbourne and Sydney, it means that it is harder for businessmen here. Nonetheless, I am sure that it will not do us that much damage should it be necessary to take any action. I am sure that we will hear the results.

Place Names Committee

Mrs PADGHAM-PURICH to MINISTER for LANDS and HOUSING

What consideration does the Place Names Committee give to requests from people to have roads named after particular people?

ANSWER

Mr Speaker, the Place Names Committee receives many requests from members of the public to have roads named after particular people. The committee first checks that the names will not duplicate or nearly duplicate an existing name in the area. If necessary, and where possible, the committee also seeks consent to the use of the name from a near relative. If there are no other conflicting suggestions for a particular road, and the name is suitable, in most cases the committee will recommend to the Administrator to adopt that name.

If the request is of a general nature, the name is placed in a bank of names and used at an appropriate time.

Possible Loan for Hilton Hotel for Alice Springs

Ms D'ROZARIO to MINISTER for INDUSTRIAL DEVELOPMENT

Is it a fact that the Northern Territory Development Corporation has offered to underwrite any capital losses which may be incurred by Central Australian Development Corporation in relation to its proposal to construct an international hotel at Alice Springs?

ANSWER

The government has not taken a decision of that nature. As I indicated just previously, the government is looking at a proposal of assistance to establish the Hilton in Central Australia. We see the establishment of new hotels in the Northern Territory as being very central to the question of tourism. We do have a policy of assistance, particularly in the field of tourism. We are not frightened to say that we would contemplate assistance of the magnitude that the member has discussed.

Rebate Scheme for Solar Equipment

Mr DOOLAN to TREASURER

As it was one of the CLP government's election pledges, does the government intend to continue the 10% rebate scheme to encourage people to install solar equipment which is due for renewal this year?

ANSWER

I am not sure that I heard all of the member's question. The Northern Territory government does have a rebate scheme relating to the installation of solar appliances. This scheme has been working and applications have been processed, not only in Darwin but in other areas in the Northern Territory. The government has no plans to discontinue the scheme.

Nhulunbuy Community Library

Mr LEO to MINISTER for EDUCATION

Given teacher response to a questionaire on the community library in Nhulunbuy, will he instigate an inquiry which will reflect the parent, teacher and public opinion into the value of the library as both an educational and community facility?

ANSWER

Yes, Mr Speaker. The Department of Education in conjunction with the Department of Community Development will be investigating not only the success or otherwise of the Nhulunbuy situation because the government has a broad policy of combining as far as possible community facilities with new schools, particularly high schools. We are looking to do that at Humpty Doo and certainly at the school complex/community centre in Palmerston. Mr Speaker, I think much has been learnt by the experience of Nhulunbuy. The information gained from that experiment will assist us in properly planning the further proposals that we have for community use of educational facilities. That is not to say that, at the same time, we will not be looking at the Nhulunbuy position in detail to see what is required to alleviate any difficulties it may be experiencing.

Aboriginal Housing on Pastoral Properties

Mr VALE to CHIEF MINISTER

I ask this question on behalf of the member for Elsey. Can he advise what responsibility the Aboriginal Development Commission has for the provision of housing for Aboriginals on pastoral properties?

ANSWER

As far as I am aware the Aboriginal Development Commission has been given responsibility by the federal government for distribution of housing funds emanating from the federal government to Aboriginal people throughout Australia. One of the objects in its statutory charter is in fact the provision of housing for Aboriginal people whether they be on pastoral properties or anywhere.

East Point Reserve

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

Has the government made a decision to rationalise the boundaries of East Point Reserve or regarding its future development? If not, when does he expect such a decision to be made?

ANSWER

The Department of Community Development would really only have a role in this in its relationship with the East Point Trustees, as it channels the funds to that organisation, and in discussions with the Darwin city council as to its aspirations. The actual boundaries will be a matter for the Minister for Lands and Housing.

East Point Reserve

Mrs O'NEIL to MINISTER for LANDS and HOUSING

I redirect the question to the Minister for Lands and Housing.

Has the government made a decision to rationalise the boundaries of East Point Reserve or regarding its future development? If not, when can we expect such a decision to be made?

ANSWER

Mr Speaker, the government is very much interested in the future of the East Point Reserve. As honourable members will note, the East Point Reserve Trustees have had on public display for some time now a proposed plan for East Point. The public comments will be collated and referred to the government by the trustees fairly soon. The government wishes to rationalise the boundaries of East Point. The matter has reached a stage now where the firm future of East Point can be determined. The original groups for which East Point was set aside under trustees have now been allocated sites elsewhere in the city. This has brought us to a situation whereby the boundaries can be rationalised and the future management and development of East Point can be determined. I suspect that, within probably a 3-month period, all these questions will be determined finally and announced by the government.

Jabiru Hospital

Mrs PADGHAM-PURICH to MINISTER for HEALTH

What is the position of the future Jabiru Hospital vis-a-vis the current health clinic?

ANSWER

I answered that last week. I refer the member to the Hansard of last week.

Lake Nash

Mr BELL to MINISTER for TRANSPORT and WORKS

What efforts is the Northern Territory government making to upgrade the present inadequate facilities at Lake Nash?

ANSWER

I would like to advise the member that the government has committed a contract of $15,000 this year to upgrade the toilet and ablution block. I am being continually pressured by the member for Stuart who is constantly on my back to upgrade facilities in that area. The works will include the provision

for 2 urinals, 3 stainless steel hand basins, 6 full-flushing systems, 1 double bowl laundry tub, 8 shower roses - 4 male and 4 female - 2 taps at each hand tub and 4 taps fitted on the walls of each corner of the ablution block. The work was expected to take about 8 weeks and should be completed later on this month.

Royal Flying Doctor Service Hangar at Alice Springs

Mr SMITH to MINISTER for HEALTH

Who was the successful tenderer for the Royal Flying Doctor Service hangar facility at the Alice Springs Airport? Was this decision consistent with the Tender Board's recommendation and what were the grounds on which this decision was based?

ANSWER

The transaction relating to the letting of the aero-medical hangar in Alice Springs is one that took place about 9 to 12 months ago. I would need to reflect back on the files to get the member the information he wants. I am happy to do that. Could I suggest to the member that, if he expects an answer to questions like that on the day, an hour's notice would go a long way in enabling a minister to provide the information.

Redco Proposal for Ludmilla Creek Area

Mrs LAWRIE to MINISTER for LANDS and HOUSING

Could he advise what status, at government level, the proposal by Redco for a development around Ludmilla Creek has?

ANSWER

Mr Speaker, the proposal referred to by the honourable member is one that is being promoted and developed privately by the company concerned. As I understand it, studies by the company have not yet reached the stage of submission to the Northern Territory Planning Authority which would be a requirement for rezoning of the area. Should it receive approval at that stage, I imagine there would be a subsequent stage of development approval, including environmental impact statements. To date, the government has neither undertaken to support or not to support this particular project. It is entirely in the hands of private proponents. At this stage, it is not considered to be appropriate for government necessarily to comment on it. It is a very complex proposal dealing with development and environmental matters.

Brucellosis and Tuberculosis Eradication Program

Mr VALE to MINISTER for PRIMARY PRODUCTION

I ask this question on behalf of both the honourable member for Elsey and myself. Is the minister aware that some larger cattle stations are going to discontinue their involvement in the brucellosis and tuberculosis eradication program because of the lack of economic markets at present?

ANSWER

Mr Speaker, I have not been advised formally by any station owners or landholders that they are not proposing to continue with the brucellosis and tuberculosis eradication program during 1982. I fear, however, that the season itself, although quite good, may not bring the prices that people need to maintain their mustering programs although it is a bit early to say. I will be very interested to see what the early prices of cattle will be.

In Vitro Fertilisation Research Assistance

Mr DOOLAN to MINISTER for HEALTH

Does the Northern Territory government, through the Department of Health, intend to provide any funds for further research into in vitro fertilisation as Northern Territory couples are affected by it?

ANSWER

Mr Speaker, that is another question that I am not able to answer at this moment. I ask the honourable member to place it on notice.

Legislation for Sale of Housing Commission Homes in Nhulunbuy

Mr LEO to MINISTER for LANDS and HOUSING

When will the government introduce legislation, as foreshadowed by the former Minister for Lands and Housing, which would enable Housing Commission tenants in Nhulunbuy to purchase the houses which they occupy?

ANSWER

If the member for Nhulunbuy cared to read Hansard or listen to second-reading speeches, he would be aware that the Tenancy Bill currently before the Assembly is designed to alleviate the problem which has faced the company at Gove in the past with a view to enabling land tenure matters to be settled in order that Housing Commission tenants may be given the opportunity to purchase their homes.

Mustering Subsidies for Aboriginal Properties

Mr VALE to MINISTER for PRIMARY PRODUCTION

Can he advise whether his department has applied for financial assistance for mustering subsidies for tuberculosis control on pastoral properties owned by Aboriginals?

ANSWER

Mr Speaker, I think my statement the other day indicated that the greatest area of concern for government was in the area of feral animal control and the large areas of land that are not under pastoral holdings. All pastoral holdings will be treated on an equal basis as far as this program is concerned. In respect of mustering subsidies, we looked very closely at what subsidies could be applied to mustering. They amounted to much more than could be obtained from either state or Commonwealth governments, and I do not believe that a mustering subsidy is a viable option in any respect.

Library Service for Jabiru

Mrs O'NEIL to MINISTER for COMMUNITY DEVELOPMENT

I understand that some preparations were made for the establishment of a public library service at Jabiru. Is it true that those plans have been deferred or shelved?

ANSWER

I do not have the information the honourable member seeks but certainly I will write to her with that information in due course.

NTEC Power at Newcastle Waters Station

ANSWER TO QUESTION:
Mr PERRON (Treasurer) (by leave): Mr Speaker, the honourable member for Sanderson asked if NTEC was proposing to install generator sets at Newcastle Waters Station, and the justification for such a decision if it had been taken.

NTEC does not intend to install generator sets at Newcastle Waters Station. However, the commission has installed 2 generators in the township of Newcastle Waters to supply domestic, commercial and streetlighting needs. These sets were commissioned on 10 April 1981. Newcastle Waters Station is one of the consumers being supplied from the NTEC installation. The installation of a reliable power supply for Newcastle Waters arose from a petition of the townspeople to the minister in October 1980. NTEC was able to provide 2 surplus sets previously used in Larrimah at a cost of approximately one third of the alternative of erecting a feeder line to Newcastle Waters from Elliott.

Amendment to Tenancy Act

Mr BELL to MINISTER for LANDS and HOUSING

I refer him to his previous answer to the question from the member for Nhulunbuy. Is he aware of the amendment to the Tenancy Act which was introduced into this Assembly in the last sittings, to say nothing about the matter of land tenure at Nhulunbuy?

ANSWER

I think the members opposite have oversimplified the form of legislation required to fix up the land tenure problems at Nhulunbuy. Nhulunbuy is in a complicated situation because the land is referred to in various pieces of legislation, including the Aboriginal Land Rights (Northern Territory) Act and various agreements between the Commonwealth government and the company out there relating to the land tenure, security for the mine and the town, and so on. The problems that are associated with the company giving the necessary securities and approvals to allow for other persons to take up subleases in the area would involve more than a simple act altering the land tenure in the area. They would also involve the law relating to tenancies. That is what is proposed in the bill.

Nightcliff Primary School

Mrs LAWRIE to MINISTER for EDUCATION

Is he aware that a decision has apparently been made not to proceed with stage 3 of Nightcliff Primary School meaning the school will have to continue using a demountable? Will he undertake to make a statement in the House later this sittings if at all possible?

ANSWER

I certainly could not undertake to make a statement later in these sittings because I imagine there is not a great deal of them left. Mr Speaker, there are many demountables in schools in the Northern Territory and I certainly would not like to place the government in a position of saying that we will remove all demountables in Nightcliff and not be able to say that in respect of all the other schools around the Northern Territory. Faced with that problem, I will investigate the matter.

Quite often demountables are put in because of a climb in the graph of children of the particular age who go to either a primary school or high school. It is quite often not wise to build permanent facilities just to take up a short-term population variation. In any event, I will investigate the matter and, if there is anything particular that the member ought to know, I will write to her in due course.

PART II

THE QUESTION PAPER

An index to questions appears at the end of Part II.

Numerical references are to Question Paper page numbers.

An asterisk preceding an entry in the index indicates that an answer has not yet been received.

NOTICE GIVEN ON DATE SHOWN

From 18 November 1980

Government Assistance for Tradesmen to Visit Remote Areas

44 Mr MacFARLANE to MINISTER for LANDS and HOUSING

What assistance will the government provide to enable electrical, plumbing and building tradesmen and inspectors to visit remote centres such as Borroloola to assist home owners?

From 24 February 1981

Katherine Electricity Supply

133 Mr MacFARLANE to MINISTER for MINES and ENERGY

Will electricity to be reticulated to the new water supply at Donkey Camp near Katherine be extended to cater for consumers and future sub-divisions on the Gorge road, and to Katherine Gorge?

From 2 June 1981

Interest Rate on Loan to Northern Meat Exporters Pty Ltd

195 Mr MacFARLANE to TREASURER

What rate of interest is being charged on the $1.4m special assistance loan granted to Northern Meat Exporters Pty Ltd?

From 9 June 1981

Aboriginal and Islander Medical Service

198 Mr B. COLLINS to MINISTER for HEALTH

1. What is the present staffing of the Aboriginal and Islander Medical Centre? Are there plans to increase the staffing levels and, if so, what positions?
2. What are the functions and duties of the Aboriginal and Islander Medical Service?
3. During the 6 months to 31 May 1981, (a) how many Aboriginals have been treated per week by AIMS, (b) what are the major categories of illness, and (c) where do the Aboriginals, in the main, come from?
4. How many Aboriginal liaison officers are attached to Casuarina Hospital; what hours do they work; and are there plans to increase the numbers?
5. Are any Aboriginal liaison officers to be employed at Darwin Hospital?

From 18 August 1981

Rape in Southern Region

210 Mr BELL to CHIEF MINISTER

1. (a) How many rapes have been reported in the Southern Command region since 1 July 1980 to 10 June 1981, (b) how many have resulted in charges being laid, (c) what is the state of these charges, and (d) have any reports of rape been false?
2. What facilities and resources are available for the psychological counselling of women raped in (a) the Alice Springs region, and (b) the Tennant Creek region?

3. Has he received any representations from women's organisations regarding the level of rape counselling services in the Territory?

4. If so, (a) what organisations have made representations, (b) what has been the basis of these representations, and (c) what has been his response?

Darwin Hospital Pathology Laboratory

224 Mr B. COLLINS to MINISTER for HEALTH

1. Can he inform me as to the fate of the pathology laboratory at the Darwin Hospital?

2. Has he considered the future of the laboratory in the light of a lack of such scientific facilities in the Department of Primary Production?

Security for Belongings of Hospital Patients

225 Mrs O'NEIL to MINISTER for HEALTH

What arrangements are made to ensure the security of the belongings of hospital patients, for example psychiatric and geriatric patients, who are unable to care for themselves?

Incidence of Tuberculosis in 1979-80

241 Mr MacFARLANE to MINISTER for HEALTH

1. What was the incidence of tuberculosis in 1979-80 in (a) Australia, and (b) the Northern Territory?

2. Is his department undertaking any program to eradicate tuberculosis in humans similar to the program being undertaken to eradicate tuberculosis and brucellosis in cattle?

From 24 November 1981

Sexual Assault Cases

379 Mr BELL to MINISTER for HEALTH

How many sexual assualt cases have been seen at the major Territory hospitals in (a) 1980-81, and (b) 1979-80?

Emergency Overnight Accommodation for Females

476 Mr B. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

1. Is the government aware of the need for emergency overnight accommodation for females in the NT?

2. Does the government intend to provide subsidies to willing organisations such as the Salvation Army and the St Vincent de Paul Society who have corresponded with the government on such a service and, if so, when?

Aboriginal Camping Area in Katherine

477 Mr MacFARLANE to MINISTER for COMMUNITY DEVELOPMENT

Is the government aware of and does it agree with the decision of the Katherine Corporation to allow Aborigines to set up a camping area in Katherine, despite the existence of Kalano Farm and the Corroboree Motel?

From 1 December 1981

Liquor Campaign

500 Mr B. COLLINS to MINISTER for HEALTH

1. How much is being spent on the 'Boozers are Losers' campaign?
2. For what reason was the contract awarded to a southern firm?
3. Has any contact been made with the liquor industry with a view to controlling the nature of liquor advertising?

Collia Tin Mine

512 Mr B. COLLINS to MINISTER for MINES and ENERGY

As a number of people have lost their savings in the Collia tin mine affair,

(a) what detailed action has been taken by the Department of Mines to settle the matter;

(b) how much money has been lost by people involved;

(c) how much did Mr Ken Day receive for the tin he mined from Collia;

(d) why has he not explained in the Legislative Assembly what action the government has taken;

(e) did the Department of Law recommend that anybody be charged over the affair and, if so, why was not that recommended action proceeded with;

(f) was the government's lack of action coloured by the fact that Mr Day was once the head of the Progress Party, whose votes had helped the Country Liberal Party;

(g) what is now being done about the matter; and

(h) are police trying to contact the previous leaseholder who disappeared and, if so, do they know in which state he is residing?

Public Housing in NT - Applications

513 Mr B. COLLINS to MINISTER for LANDS and HOUSING

1. How many applications for general public housing were received during (a) 1979-80, and (b) 1980-81, and how many applications were outstanding at (c) 1 July 1980, and (d) 1 July 1981 in (i) Darwin, (ii) Alice Springs, (iii) Tennant Creek, (iv) Katherine, (v) Nhulunbuy, and (vi) Pine Creek?
2. How many outstanding applications were there for general public housing (a) at 1 July 1980, and (b) at 25 June 1981?
3. How many applications for general public housing were received in the financial years (a) 1979-80, and (b) 1980-81?
4. How many applications for general public housing were cancelled in the financial years (a) 1979-80, and (b) 1980-81?
5. How many tenants were accommodated in the financial years (a) 1979-80, and (b) 1980-81?

Internal Reviews of Health Department

517 Mr B. COLLINS to MINISTER for HEALTH

1. He stated during the June 1981 sittings that his department had reviews taking place on all aspects of medical services offered to the public, and referred to an internal review of community health services. What were the details and outcome of this review?

2. In regard to other internal reviews conducted during the past year, (a) in which areas were they conducted, (b) who have the committees comprised of, (c) how many times have they met, and (d) what has been the outcome of these review?

3. How many internal reviews are being conducted at the moment?

Report on Nursing and Administration of Medicine

527 Mr B. COLLINS to MINISTER for HEALTH

When does he expect the report on manpower requirements for nursing and the administration of medicine to be completed?

Psychiatric Services

534 Mr B. COLLINS to MINISTER for HEALTH

1. For what reasons is psychiatric services included in the general administrative expenditure for health services?

2. For what reason has the level of funding for psychiatric services been reduced from $510,000 to $475,000? Where will this cut be felt?

Transfer of Psychiatric Patients to South Australia

537 Mr B. COLLINS to MINISTER for HEALTH

1. How much was spent in 1980-81 on the transfer of psychiatric patients to South Australia?

2. How many were transferred?

3. What was the average length of stay per patient?

4. When does the NT government expect to provide suitable secure premises for chronic patients in the Northern Territory?

Doctor-Patient Ratios in NT

538 Mr B. COLLINS to MINISTER for HEALTH

1. What is the current ratio of doctors per patient at each hospital in the NT?

2. What are the duty rosters of doctors and nurses? How does this compare with last year?

3. Is the percentage that salaried doctors can earn on top of their income to be increased from 25%? If so, to what level?

Yipirinya School in Alice Springs

545 Mr B. COLLINS to MINISTER for EDUCATION

What action, if any, has been taken by the Department of Education on the application for registration of the Yipirinya School in Alice Springs?

Litter Campaign

547 Mr B. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

1. How much was spent on the anti-litter campaign?

2. Why was the contract for the campaign awarded to a southern firm?

From 9 March 1982

'Fellow Territorians' Circular

564 Mr BELL to CHIEF MINISTER

What was the cost of a circular letter dated October 1981, addressed to 'Fellow Territorians' and signed by the Chief Minister?

Rapid Creek Water Gardens Project

596 Mr SMITH to MINISTER for TRANSPORT and WORKS

Given that the Rapid Creek water gardens project already had 2 signs, 1 being a conventional Transport and Works sign and the other a pictorial representation of what the gardens will look like, what was (a) the purpose of erecting a third much larger sign identifying the project, and (b) what was the cost of the third sign?

Geoffrey Peter Bellenger

611 Mr MacFARLANE to CHIEF MINISTER

1. Has his attention been drawn to the hardship suffered by Geoffrey Peter Bellenger, who was injured by a truck on a pedestrian crossing in Alice Springs on 23 May 1975 and who has not yet received any compensation for his injuries or costs?
2. Was the driver of the truck involved in the incident charged with any offence?
3. Is any of the almost 7 years delay between the injury and compensation attributable to any shortcoming or congestion in Northern Territory courts?

Liaison between Government Departments

618 Mr MacFARLANE to MINISTER for LANDS and HOUSING

Is there liaison between the Department of Lands, other departments and statutory bodies such as Telecom on the provision of services such as electricity, water, sewerage and telephones for new private or government subdivisions?

Katherine Town Boundaries

619 Mr MacFARLANE to MINISTER for COMMUNITY DEVELOPMENT

1. Has the Katherine Municipal Council applied to have the town boundaries extended?
2. If so, (a) has the application been made as a result of any government action, and (b) what benefits would be expected to flow from an extension of the town boundaries?

ILO Conventions

622 Mr B. COLLINS to CHIEF MINISTER

1. Is he aware that the Minister for Industrial Relations informed the Leader of the Opposition in the House of Representatives on 18 November 1981 (H. of R. Hansard, p. 3098) that on 26 May and 3 June 1977 the Northern Territory indicated by letter that in its view the Aboriginal population of the Territory does not constitute a dependent, indigenous population for the purposes of International Labour Organisation Convention No. 65, Penal Sanctions (Indigenous Workers) 1939?

2. Who wrote the letter and on what date and by what means did the Northern Territory government authorise it?

3. Is he aware that a former Commonwealth Minister for Employment and Industrial Relations informed the former Leader of the Opposition in the House of Representatives on 4 October 1977 (H. of R. Hansard, p. 1607) that a review instituted by his department in April 1977 had revealed inconsistencies between provisions in the Northern Territory Apprentices Ordinance and the ILO convention?

Standards Set by ILO Conventions

623 Mr B. COLLINS to CHIEF MINISTER

1. In what respects do the laws and practices of the Northern Territory fall short of the standards set by those International Labour Organisation conventions which the ILO lists as basic human rights conventions but which Australia has not yet ratified, viz.:

   (a) No. 135 - Workers' Representatives, 1971;
   (b) No. 141 - Rural Workers' Organisations, 1975;
   (c) No. 151 - Labour Relations (Public Service), 1978; and
   (d) No. 156 - Workers with Family Responsibilities, 1981?

2. What views has the NT government expressed to the Commonwealth government on the provisions of each of these conventions?

3. On (a) what occasions, (b) in what circumstances, (c) at what level, and (d) with what results have consultations taken place between the NT and Commonwealth governments concerning each of these conventions?

ILO Convention on Civil and Political Rights

624 Mr B. COLLINS to ATTORNEY-GENERAL

1. In what respects do the laws and practices of the Northern Territory fall short of the standards set by the 1966 ILO Convention on Civil and Political Rights which Australia signed in December 1972 and ratified in August 1980?

2. What views has the Territory government expressed to the Commonwealth government on the provisions of this convention since it entered into force in March 1976?

3. On (a) what occasions, (b) in what circumstances, (c) at what level, and (d) with what results have discussions or consultations taken place between the Territory and Commonwealth governments concerning this convention?

Convention on Elimination of Discrimination against Women

625 Mr B. COLLINS to ATTORNEY-GENERAL

1. In what respects do the laws and practices of the Northern Territory fall short of the standards set by the 1980 Convention on Elimination of All Forms of Discrimination against Women?

2. What views has the Northern Territory government expressed to the Commonwealth government on the provisions of the convention?

3. On (a) what occasions, (b) in what circumstances, (c) at what level, and (d) with what results have consultations taken place between the NT and Commonwealth governments concerning the ratification of the convention?

Juvenile Crime in NT

626 Mr SMITH to MINISTER for COMMUNITY DEVELOPMENT

1. Has there been an increase in the incidence of juvenile crime in the Northern Territory?
2. If so, (a) can he provide figures to demonstrate this increase, (b) what are the causes of this increase, (c) what action is to be taken to rectify the situation, and (d) what are the main offences being committed?
3. What is the average age of juvenile offender?
4. (a) How many juvenile inmates are in NT institutions and how does this figure compare with that for the same period last year? (b) What is the average length of stay for a juvenile inmate?

School Leavers Entering Apprenticeships

636 Mr MacFARLANE to MINISTER for EDUCATION

1. Is he aware of the problems that school leavers, particularly those not living with their parents, face when entering apprenticeships?
2. If so, what does the NT government do or intend doing to enable such disadvantaged youths to enjoy equality with their peers?

From 16 March 1982

Male Public Servants

640 Mr B. COLLINS to CHIEF MINISTER

As at 30 April 1981, what was (a) the average male earnings in the Northern Territory Public Service, and (b) what were the numbers and levels of the males?

Aboriginal Community Work Program

641 Mr B. COLLINS to CHIEF MINISTER

1. The Northern Territory government initiated the Aboriginal Community Work Program for a pilot period of 3 years, which was to conclude in January 1982. Has this occurred?
2. Has a report been compiled for consideration by the government agency reviewing the program?
3. If so, when is it anticipated that the government will table this report?

Motor Vehicles - NTEC

645 Mrs LAWRIE to TREASURER

1. How many motor vehicles are (a) owned by NTEC, (b) what classes of vehicles are they, and (c) in what numbers?
2. To which designations of NTEC employees are these vehicles allocated and allowed to be driven to and from work?
3. Is it a fact that a lawyer retained by NTEC has an NTEC vehicle assigned to him for his personal use?

Computers, Department of Education

648 Mr B. COLLINS to MINISTER for EDUCATION

1. Did the Department of Education hire Price Waterhouse to draw up a report on its use of computers at all levels?

2. If so, (a) when was the report given to the department, (b) is it available for scrutiny, and (c) is it true that the department has 14 different types of word processors?

Houses, Darwin City Council

649 Mr VALE to MINISTER for LANDS and HOUSING

Is he aware of (a) the number of houses owned by the Corporation of the City of Darwin, and (b) to what use these houses are put?

Koolpinyah Pastoral Lease

650 Mr DOOLAN to MINISTER for PRIMARY PRODUCTION

1. Does the government intend to accept part of Koolpinyah lease in exchange for granting Koolpinyah management an additional lease?

2. If so, what is (a) the location and area of land Koolpinyah is to relinquish to the government, and (b) the location and area of the new land to be released to Koolpinyah?

Koolpinyah Boundaries

651 Mrs LAWRIE to MINISTER for PRIMARY PRODUCTION

I refer to the proposed 'Rationalisation of Boundaries for Koolpinyah' and ask: is it a fact that both the Department of Primary Production and the Agricultural Development and Marketing Authority recommended against the proposed re-drawing of the boundaries and, if so, on what information did Cabinet agree on 22 December 1981 to accept in principle the proposed re-drawing of the boundaries?

From 25 May 1982

In vitro Fertilisation Research

653 Mr DOOLAN to MINISTER for HEALTH

Does the NT government, through the Department of Health, intend to provide funds for further research into *in vitro* fertilisation as Northern Territory couples are affected by it?

Grants-in-Aid, Nhulunbuy Sporting Bodies

654 Mr LEO to MINISTER for YOUTH, SPORTS and RECREATION

I refer to his answer to question No. 605 and ask what was the break-down of the $27,199 provided through grants-in-aid to Nhulunbuy sporting bodies during 1980-81?

Dangerous Goods Act Commencement

655 Mrs O'NEIL to MINISTER for HEALTH

Why has the Dangerous Goods Act, assented to in January 1981, not yet come into operation?

Tender, RFDS Hangar, Alice Springs

656 Mr SMITH to MINISTER for HEALTH

1. Who was the successful tenderer for the Royal Flying Doctor Service hangar facility at Alice Springs airport?
2. Was this decision consistent with the Tender Board's recommendation?
3. What were the grounds on which the decision was based?

Repairs and Maintenance, Rapid Creek Primary School

657 Mr SMITH to MINISTER for EDUCATION

What plans does the department have to (a) repair and cyclone proof the roof of the older part of the Rapid Creek Primary School, including the covered way area, (b) paint, (c) replace furniture, and (d) repair gutters in the older part of the school, and (e) bituminize the school carpark?

Excursion Funds, Millner and Rapid Creek Schools

658 Mr SMITH to MINISTER for EDUCATION

How much did (a) Millner, and (b) Rapid Creek schools receive in excursion funds from the department in (i) 1979-80, (ii) 1980-81, and (iii) 1981-82?

Land Purchases, Northlakes and Brinkin

659 Mr SMITH to MINISTER for LANDS and HOUSING

1. Has the government purchased, or does it itend to purchase, blocks of land at the Northlakes Country Club Estate and at Brinkin?
2. If so, for what purpose has the government made or intend to make these purchases?

Recreation Lake, Alice Springs

661 Mr BELL to CHIEF MINISTER

I draw his attention to the Aboriginal Sacred Sites Protection Authority report tabled in the Assembly on 11 March 1982 in which, in relation to Welatje Terre, the proposed site for the recreation lake, it was stated that it was hoped that alternative locations for the proposed development may be identified in the near future, and ask:

1. Is he able to advise of any such alternative sites?
2. What is the relative feasibility of each site in comparison with Welatje Terre?
3. If no alternative sites have been identified, will the government proceed with construction of a recreation lake at Welatje Terre and, if so, when will the work commence and when is the project expected to be completed?

National Parks, MacDonnell Ranges

663 Mr BELL to CHIEF MINISTER

I refer to question No. 586 regarding the gazetting of a MacDonnell Range National Park and ask:

What other acquisition proposals are proceeding satisfactorily in the Central and East MacDonnells', and for what purposes is the Conservation Commission seeking to acquire such land?

Flagpoles, NT Buildings

664 Mr BELL to CHIEF MINISTER

I refer to question No. 587 and ask:

What is the cost of the supply of flagpoles for erection at all Northern Territory buildings?

Sales of Housing Commission Units

665 Mr BELL to MINISTER for LANDS and HOUSING

1. How many people in (a) Alice Springs, (b) Darwin, (c) Tennant Creek, and (d) Katherine have purchased housing units of various types since the government announced its home purchase scheme in October 1981?
2. How many units of various types have been released for sale in (a) Alice Springs, (b) Darwin, (c) Tennant Creek, and (d) Katherine since the scheme was announced?
3. How many people in (a) Alice Springs, (b) Darwin, (c) Tennant Creek, and (d) Katherine have listed their names with the Tenancy Section of the Housing Commission expressing interest in purchasing units of various types?

Accommodation for Single-parent Families

666 Mr BELL to MINISTER for LANDS and HOUSING

Does the Housing Commission require evidence of custody of children from single-parent families who apply for rental accommodation?

Drilling and Exploration, Magellan Petroleum

667 Mr BELL to MINISTER for MINES and ENERGY

1. What are the details of the current drilling program being pursued by Magellan Petroleum in central Australia?
2. What is the (a) registration number of, and (b) nature of exploration on each E.L. held by the company?
3. What funding has been committed to the exploration program either (a) in general, or (b) for each E.L.?

Medical Evacuations

668 Mr BELL to MINISTER for HEALTH

1. How many medical evacuations for interstate specialist attention were recommended by (a) private GPs, and (b) government hospital doctors in the Territory from August 1980 to August 1981?
2. How many medical evacuations for interstate specialist attention were recommended by (a) private GPs, and (b) government hospital doctors from 1 September 1981 to 31 March 1982?

Education Staff, Banka Banka

670 Mr BELL to MINISTER for EDUCATION

1. How many staff positions does his department fund at Banka Banka?
2. Of these, (a) how many are members of the community, and (b) how many were recruited from outside the community?

School, Ayers Rock

671 Mr BELL to MINISTER for EDUCATION

1. How many school-age children are currently living at Ayers Rock?
2. When will his department provide a school for these children?

Community Adviser, Ayers Rock

672 Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

1. Will his department fund the position of community adviser at Ayers Rock?
2. If not, why not?

Relocation of Pintubi

673 Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

When does he expect the findings on the review of the relocation of the Pintubi at Kintore and elsewhere to be made known to the Kintore community and relevant government departments?

Petrol Sniffing Workshop

674 Mr BELL to MINISTER for COMMUNITY DEVELOPMENT

What action has resulted from an interdepartmental workshop on petrol sniffing held at Papunya on 24 February 1982?

Blasting, Sadadeen Hills

675 Mr BELL to MINISTER for TRANSPORT and WORKS

What consultation took place, if any, with Aboriginal traditional owners and other citizens before officers of his department commenced blasting a section of the Sadadeen hills to enable erection of a water tank?

Beef Trade with South-east Asia

676 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION

1. Does he realise that the attitude of NT meat processors towards our northern neighbours Malaysia, Indonesia, and the Philippines directly affects the BTB eradication campaign and the development of the beef industry in the NT?
2. If so, will he review the licences of abattoirs that do not accept the NT policy of seeking trade with South-east Asia?

Beef for South-east Asia

677 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION

In view of the crisis situation which exists in the NT beef industry, will he take urgent steps to contact Malaysia, Indonesia and the Philippines to determine if beef killed to Australian domestic standards is acceptable and if they require quotes and proposals to supply?

Award Wages, Katherine Meatworks

679 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION

1. Does the government realise that its efforts to develop the beef industry in the Top End are being hampered by the Katherine Meatworks

making over-award sweetheart agreements with AMIEU members?

2. Will the government ensure that this meatworks operates under the AMIEU award or on contract kill as do other meatworks in the Territory?

Shop Leases, Jabiru

681 Mr SMITH to CHIEF MINISTER

1. How many of the 7 speciality shops available for lease in Jabiru have been leased?
2. To whom have they been leased?
3. What is the period of each lease?
4. What are the terms and conditions of each lease?

Supermarket Lease, Jabiru

682 Mr SMITH to CHIEF MINISTER

1. Which company has been given the lease of the supermarket at Jabiru?
2. What is the period of the lease?
3. What are the terms and conditions of the lease?

Development Costs, Jabiru

683 Mr SMITH to CHIEF MINISTER

1. Has a formal cost sharing arrangement on the funding of the development of Jabiru between the JTDA and the mining companies been signed?
2. If yes, what are the details of this cost sharing agreement?

Operational Funding, Jabiru

684 Mr SMITH to CHIEF MINISTER

1. Has an agreement been reached between the JTDA and mining companies over the funding of the operational costs of the town?
2. If yes, what are the details of this agreement?

Rating System, Jabiru

685 Mr SMITH to CHIEF MINISTER

1. Was a rating system for Jabiru introduced on 1 July 1981 as indicated in page 22 of the JTDA Annual Report?
2. If yes, what are the details of this rating system?

Administration Staff, Jabiru

686 Mr SMITH to CHIEF MINISTER

How many people are (a) employed, and (b) at what levels, in the town administrator's office in Jabiru?

Aboriginal Education Allocations

687 Mr LEO to MINISTER for EDUCATION

1. What financial allocations were received from the Commonwealth government for Aboriginal education in 1980-81 and 1981-82?

2. Did Dhupuma College (a) ever receive a specific allocation of Commonwealth funding and, if so, (b) when, (c) how much, and (d) for what purpose?

Salt and Lime Supplies

688 Mr MacFARLANE to MINISTER for INDUSTRIAL DEVELOPMENT and TOURISM

What action is being taken to supply NT needs for salt and lime?

Encouragement of Horticulturists

690 Mr MacFARLANE to MINISTER for PRIMARY PRODUCTION

What practical encouragement is being given to horticulturists in the Katherine district to grow vegetables and fruit in competition with growers 2,000 miles away?

Cost of Transfer, Regional Office

691 Mrs O'NEIL to MINISTER for HEALTH

What were the removal and re-establishment costs involved in the transfer of the Northern Region office from the old Darwin hospital to Casuarina?

From 1 June 1982

Firearms, Security Guards

692 Mr B. COLLINS to CHIEF MINISTER

What, in general terms, are the regulations governing the use of firearms by private security guards, and what type of training and level of competence in the use of firearms by private security guards is required in the Northern Territory?

Life Sentences

693 Mr B. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

In relation to life sentences imposed in the Territory, (a) how many persons are presently serving life sentences, (b) what is the average length of the actual sentence served, (c) are there any administrative procedures for the review of life sentences, and (d), if so, what are they?

Golden Perch

694 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION

1. Has the Department of Primary Production thoroughly examined the possible impact of the introduction of golden perch into Top End streams?
2. If so, is he confident that there will not be any harmful effects of such an action?
3. Will he make available to the Assembly the report of his department on the possible impact of the introduction of these fish when it is complete?

From 3 June 1982

Sealing, Bees Creek Road

695 Mr DOOLAN to MINISTER for TRANSPORT and WORKS

A great number of residents of my electorate are forced to use Bees Creek road as an access road to the Stuart Highway, sometimes several times each day. Could he advise if and when the government intends to upgrade and seal this badly corrugated dirt road?

Boundaries, Koolpinyah Station

696 Mr DOOLAN to MINISTER for LANDS and HOUSING

On 9 March 1982 he advised the Assembly that the matter of redrawing the boundaries of Koolpinyah Station was under consideration. Is he yet in a position to provide further information on this matter?

Mt Wells Battery

697 Mr B. COLLINS to MINISTER for LANDS and HOUSING

1. Is the area of the Mt Wells Battery still part of the Ban Ban pastoral lease?
2. If so, is this the reason for the delay in full payment by Singellic Minerals to the government for the Mt Wells Battery and associated leases?
3. If so, when will this be resolved?

Student Assistance

201 Mr B. COLLINS to MINISTER for EDUCATION

How many students in the Northern Territory are, (a) receiving assistance under the Tertiary Education Assistance Scheme, and (b) how many are in receipt of the full allowance?

ANSWER

The Tertiary Education Assistance Scheme (TEAS) is a scheme administered by the Commonwealth Department of Education whose Darwin office supplied the following information:

(a) As at June 1980 - 100
As at June 1981 - 120 (preliminary figure only).

(b) As at June 1980 - 77
As at June 1981 - Not known.

St Vidgeon Station and Eva Valley Station

346 Mr MacFARLANE to MINISTER for LANDS and HOUSING

1. What is the future of St Vidgeon Station where Aboriginals are building stock yards, etc.?
2. What is the future of Eva Valley Station?

ANSWER

The future of St Vidgeon and Eva Valley Stations depends on the mortgagees involved exercising their rights.

Interpreter Service for Aborigines

469 Mr B. COLLINS to CHIEF MINISTER

1. What action does the government intend taking in response to the working party's report on the need for Aboriginal interpreter services in the NT?
2. If such services are to be established, what will be (a) their nature, (b) their funding, and (c) anticipated commencement date?

ANSWER

1. The working party recommended the establishment of an Aboriginal interpreting service through the combined resources of Aboriginal organisations and the Northern Territory and Commonwealth governments.

   Consultation on this matter has already taken place with the Institute for Aboriginal Development and the School of Australian Linguistics which are presently offering training programs for interpreters. Correspondence has been forwarded to the federal Minister for Aboriginal Affairs seeking his views on the report's recommendations, and the likelihood of Commonwealth funding being made available for this service. To date no response has been received from the minister.

2. If a service is established, it is proposed that Aboriginal organisations will train interpreters and operate a service. The interpreting service would be initially funded by the Commonwealth and Northern Territory governments as a pilot project with an anticipated commencement date during 1982-83.

   The interpreting service would be co-ordinated by the NT government, which at the commencement would also develop the service in the Top End

pending the availability of Aboriginal organisations to do so. It is intended that from the commencement the service in the centre would be developed by an Aboriginal organisation.

Department of Community Development - Counselling

475 Mr B. COLLINS to MINISTER for COMMUNITY DEVELOPMENT

1. How many officers are involved in counselling in the Department of Community Development?

2. What are the qualifications of the officers?

3. What is (a) the average caseload, and (b) the average number of clients seen per week by each counsellor?

4. What percentage of the clients are Aboriginal?

ANSWER

1. There are 14 officers involved in counselling in Correctional Services Division and 29 in Community Welfare Division.

2. The qualifications of these officers vary but include degrees in social work, degrees in behavioural and social sciences, other tertiary qualifications including Associate Diplomas in Welfare Work and some are qualified by experience and on-the-job training.

3.(a) The average caseload in Correctional Services Division is 40 per officer.

The workload of Community Welfare workers is varied and includes many single contacts as well as ongoing cases, so it is not realistic to talk in terms of caseloads.

(b) Average number of clients seen per week is 11 for Correctional Services officers and 18 for Community Welfare workers. These figures were obtained from a recent sample of case contact statistics kept by the department.

4. According to a survey of cases conducted by Correctional Services Division in November 1981, 51% were identified as Aboriginal.

An analysis of Community Welfare case contact statistics covering the period September 1980 to September 1981 showed that 40% of clients were Aboriginal.

Prawning Licences

493 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

1. How many prawning licences were granted by the Department of Primary Production in 1979-80 and 1980-81?

2. How many prawning licences were in existence as at 30 June (a) 1978, (b) 1979, (c) 1980, and (d) 1981?

ANSWER

Throughout Australia licences in the fishing industry are renewed on a calendar year basis. This is also the case for relicensing in the northern prawn fishery.

Vessels authorised to fish in the northern prawn fishery (strictly the Declared Management Zone) are required to hold a Commonwealth licence for proclaimed waters and a Queensland or Northern Territory licence when they enter the territorial waters administered by either of these governments. However, it has been agreed administratively that all vessels authorised

for the northern prawn fishery should hold the 3 licences.

The following table details the numbers of licences issued over the last 4 years:

Year	Commonwealth Licence	Northern Territory Licence
1978	286	173
1979	291	207
1980	292	256
1981	292	280

NTDC Loans

494 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION and TOURISM

1. How many applications for Northern Territory Development Corporation loans were received from the agricultural and horticultual industries in (a) 1979-80, and (b) 1980-81?
2. How many applications were successful and for what activities were loans granted?
3. What was the average repayment period associated with loans granted?
4. Were any interest or repayment holidays granted on any loans to the rural sector?

ANSWER

1. (a) Applications received in 1979-80 were 6.
   (b) Applications received in 1980-81 were 15.
2. Thirteen applications were successful for the following activities:
   - cropping development - purchase of seed and machinery;
   - turf farming;
   - banana plantation; and
   - debt reconstruction) rural adjustment scheme.
     farm irrgation)
3. The average repayment period associated with loans granted was for 8.5 years.
4. The maximum repayment holiday granted on loans to the rural sector was 12 months.

Detoxification Centres

499 Mr B. COLLINS to MINISTER for HEALTH

1. Does the government support the establishment of detoxification centres, pick-up services and halfway houses for the Northern Territory?
2. What is the government's attitude to the introduction of a concessional differential on low alcohol beer?

ANSWER

1. A range of facilities for people experiencing problems with alcohol and other drugs is currently provided by the Northern Territory government and by community organisations supported financially by the government.
2. The Northern Territory government supports the concept of a price differential for low alcohol beer. The difficulty arises, however, in that liquor licence fees, which are under the control of the Northern Territory government, account for only a small portion of

the retail price of beer. Even completely abolishing liquor licence fees on low alcohol beer would result in a reduction of no more than 3 or 4 cents per can. This differential would be insufficient to effect a change in beer consumption patterns.

The Commonwealth government collects excise duty of 52 cents on each litre of beer. We have asked the Commonwealth to consider adjusting excise to establish a price differential on low alcohol beer, as recommended by the Senate Standing Committee on Social Welfare, however, the Commonwealth government has consistently refused to do so.

Darwin Central Community Health Centre

503 Mr B. COLLINS to MINISTER for HEALTH

Is the government considering relocating the Darwin Central Community Health Centre and, if so, where is it to be located and for what reasons?

ANSWER

The Darwin Central Community Health Centre has been relocated to the ground floor, MLC Building, Smith Street.

Health facilities at the old Darwin hospital site have been relocated because of the disproportionate expense of maintaining the site and the MLC Building site is a more centrally located one.

Chest X-rays - *National Tuberculosis Act* 1948

504 Mr B. COLLINS to MINISTER for HEALTH

Since the introduction of the 'user pays' medical and health charges on 1 September 1981, (a) what arrangements have been made by his department under the *National Tuberculosis Act* 1948 for the general public to have chest X-rays at no charge at general hospitals throughout the NT, and (b) if arrangements have been made will they be advertised in the media throughout the Northern Territory?

ANSWER

No special arrangements exist under the *Natioanl Tuberculosis Act* 1948 between the Commonwealth and the Northern Territory. Prior to 1 September all patients seeking x-ray diagnosis at a hospital received this treatment free. As from 1 September persons suspected of suffering from tuberculosis have been treated the same as other patients. If they are 'disadvantaged' persons all treatment is free. Persons in receipt of a pension under the Tuberculosis Act receive free treatment.

It is the policy of the Northern Territory government to encourage all people in the Northern Territory to either seek a Department of Social Security health care card or, if not eligible, to seek coverage under health insurance. This policy has been extensively advertised in the media.

Attendance Figures at Outpatients

505 Mr B. COLLINS to MINISTER for HEALTH

1. From 1 September to 31 October 1981, how many people (a) who attended outpatients departments in NT hospitals, and (b) who were hospitalised, were (i) insured, (ii) uninsured, or (iii) held disadvantaged and PHB cards?

2. How do those figures compare with those for the same period during 1980?

3. What was the percentage of Aboriginals in each of those categories?

ANSWER

1. Between 1 September and 30 October, 29,109 people visited outpatients. Statistics on the number of insured and uninsured are not available. Those people exempted from charges under the Commonwealth disadvantaged classifications totalled 5,969.

2. Statistics of insured, uninsured and disadvantaged were not kept last year.

3. Aboriginals represent 9% of total outpatients. Within this group, exemptions (including those awaiting confirmation) are 91%. Aboriginals represent 44% of total inpatient bed days. Within this group, exemptions (including those awaiting confirmation) are 95%.

Non-urgent Outpatient Treatment

506 Mr B. COLLINS to MINISTER for HEALTH

How many people wanting non-urgent treatment at outpatients departments in NT hospitals have not been seen because they have not had the necessary fee since 1 September 1981?

ANSWER

No such figures are kept.

Anti-depressant Medication

507 Mr B. COLLINS to MINISTER for HEALTH

1. Are patients in NT hospitals who are not suffering from a psychosis prescribed anti-depressant medication without their knowledge and consent? If so, under what conditions?

2. How many (a) inpatients, and (b) outpatients were prescribed anti-depressant medication during 1980-81?

ANSWER

1. I am advised that all patients who receive anti-depressant or other medication are given explanation of their treatment so as to ensure informed consent to treatment.

2. There is no accurate way of assessing the number of inpatients and outpatients prescribed anti-depressant medication in 1980-81 without examining all individual medical records for these patients.

Allocations to Community Health Centres

508 Mr B. COLLINS to MINISTER for HEALTH

1. How much is he allocating from the Commonwealth's general revenue fund of $20.6 million to community health centres, hospitals and school dental services for each hospital, and community health centre?

2. How much is the NT government allocating to these areas in 1981-82, for each community health centre, hospital and school dental service?

3. What was expended under these headings in 1980-81?

ANSWER

1. The $20.6 million is treated as general revenue and is not specifically broken up between individual hospitals, health centres, etc. Commonwealth funding covers only a portion of the total expenditure by the NT government on these services.

2. Allocations for NT hospitals in 1981-82 are as follows:

	$ million
Casuarina	30.481
East Arm	1.078
Katherine	3.597
Tennant Creek	2.456
Alice Springs	14.253
Gove District	3.665
Jabiru	0.218
Total Allocation to Hospitals	55.748

Budgets are not allocated to individual health centres and school dental units as these are incorporated in the operation costs of the department's 3 regions and central office. The allocations for health services expenditure in 1981-82 are as follows:

	$ million
Darwin and Katherine Region	10.047
Alice Springs and Barkly Region	5.962
East Arnhem Region	2.856
Central Office	8.897
Total Health Services Allocation	27.762

3. Expenditure in 1980-81 on hospitals and health services was as follows:

	$ million
(a) Hospitals	
Casuarina	27.933
East Arm	0.977
Katherine	3.184
Tennant Creek	2.055
Alice Springs	12.222
Gove District	3.244
Total Hospitals Expenditure	49.615

	$ million
(b) Health Services	
Darwin and Katherine Region	9.135
Alice Springs and Barkly Region	5.501
East Arnhem Region	2.618
Central Office	7.873
Total Health Services Expenditure	25.127

Drug Education Program in NT

509 Mr B. COLLINS to MINISTER for HEALTH

What are the drug education programs to be conducted in the Northern Territory during 1981-82?

ANSWER

The following drug education programs will be conducted in the Northern Territory in 1981-82:

- Drugs as a Social Issue - To be presented to primary, secondary and community college students, as well as community groups.
- Everyday Drugs - This program is particularly aimed at women.
- Parents and Drugs - To be presented to parents and teachers.

- Risks, Dares and Challenges - This program is aimed particularly at primary school students in years 6 to 7, and parents.
- Healthy Lifestyle - A public information display emphasising proper exercise, diet control and leisure activities.
- How Much Is Too Much - An information program on alcohol aimed at community groups.

Commonwealth Health Grants

510 Mr B. COLLINS to MINISTER for HEALTH

1. Has the Commonwealth provided $9 million for health planning and research in the form of grants to the states and the Northern Territory (on a $1 for $1 basis) and to institutions and persons?
2. If so, (a) how much has been allocated to the Northern Territory, and (b) for what purposes?

ANSWER

The Commonwealth has provided for a total of $400,000 to be paid to the states and the Northern Territory for health planning and research during 1981-82.

The grants are available on a dollar for dollar basis to encourage the development of states and Territory health planning units.

For 1981-82 the Northern Territory has been allocated $10,000, and it is proposed to utilise these funds in the compilation of a computerised bank of Aboriginal health statistics.

Guidelines for Grants-in-Aid

511 Mr B. COLLINS to MINISTER for HEALTH

What action has been taken to correct the following unsatisfactory controls relating to grants-in-aid commented upon by the Auditor-General in 1978-79 and found to be still unsatisfactory in 1980:

(a) inadequacies in the promulgated conditions for grants;
(b) the absence of reference to formal acceptance of the conditions and purpose of grants;
(c) the legal entity of grantees;
(d) the withholding of moneys for non-compliance with grant conditions;
(e) the lack of current formalized departmental procedures and guidelines covering functional responsibilities and criteria for the evaluation of grant applications and the monitoring of performance of grantees; and
(f) the apparent absence of follow-up action by his department in certain instances where it is not evident that grantees had complied with the conditions of grants?

ANSWER

(a) Various inadequacies in the promulgation of the 'Conditions of Grants' booklet were adjusted in the first amendment to the conditions during October 1980.

(b) Recipients to formally accept conditions. Under section 6.5 of the conditions, recipients are required to formally accept the conditions outlined in the booklet. Forms are forwarded to the recipients who are required to sign and return the forms to regional offices.

(c) Legal entity of grantees. Under section 4.6 of the conditions, recipients are required to provide evidence of their registration

under the Northern Territory Associations Incorporation Act. At present the evidence required is a certificate of registration under the Act.

(d) Withholding of moneys. No funds are released until the organisation adheres to all the preliminary conditions, i.e., acceptance of conditions, receipt of registration certificate, details of insurance coverage and names of office bearers.

(e) Formal departmental procedures and guidelines to assess applications for grants-in-aid were issued on 15 December 1980.

(f) Generally no funds are released to grantees until the preliminary conditions are adhered to. Once payments are released the grantees are monitored on a regional and head office to ensure compliance with the conditions.

Expenditure on Aids to Disabled People

516 Mr B. COLLINS to MINISTER for HEALTH

Will he ascertain and advise how the funds were spent in 1980-81 which the Commonwealth provided for aids to disabled people who were not eligible under Commonwealth-state programs?

ANSWER

There was no expenditure under the program of aids for disabled people in the Northern Territory during 1980-81.

Funds were received from the Commonwealth on 19 June 1981, and have been carried forward to be spent during 1981-82.

Applications to Health Department for Grants-in-Aid

519 Mr B. COLLINS to MINISTER for HEALTH

How many (a) applications for grants-in-aid were lodged for 1981-82, and (b) which organisations were unsuccessful?

ANSWER

1. There were 66 applications for grants-in-aid for 1981-82
2. The Darwin Women's Centre and the Katherine Women's Shelter were unsuccessful.

Variations between Bed Cost in NT Hospitals

520 Mr B. COLLINS to MINISTER for HEALTH

Why do the bed costs in NT hospitals vary between $78 and $254, and where does this variation occur?

ANSWER

The variation in bed-day costs between the hospitals is a function of various factors including the degree of specialist treatment provided, age and design of the hospital, and the cost disabilities of different locations.

Staff Reductions at Darwin Hospital

523 Mr B. COLLINS to MINISTER for HEALTH

1. Which staff organisations at the Darwin Hospital have agreed to staff reductions affecting their memberships?

2. In which areas have staff reductions already been effected?

3. How many people have been affected to date?

ANSWER

1. All staff organisations at the Darwin Hospital have agreed to staff reductions affecting their membership.

2. All categories of staff have been reduced.

3. Apart from non re-engagement of limited tenure employees, reductions have been achieved by selective non-replacement of staff who voluntarily resigned. To date the staff establishment has been reduced by 65 positions.

Separate Facilities at Darwin Hospital

529 Mr B. COLLINS to MINISTER for HEALTH

1. Has he rejected his working party recommendations to erect separate facilities at Darwin Hospital for psychiatric, the handicapped and geriatric patients?

2. If so, why?

3. If not, has any money been allocated for their establishment in 1981-82, and when does he expect such facilities to be operational?

ANSWER

The government has approved in principle the erection of appropriate facilities for mentally handicapped and geriatric patients.

No funds have been provided for the establishment of new facilities in 1981-82.

It is essential that maximum utilisation of Darwin Hospital facilities be made before further capital expenditure is considered.

Nursing Home Care

530 Mr B. COLLINS to MINISTER for HEALTH

1. How many elderly patients does he anticipate are in need of nursing home care?

2. How many are Aborigines?

3. Are there any plans to establish separate facilities for the elderly Aborigines?

ANSWER

1. It is anticipated that there are 70 elderly people in need of nursing home beds in Darwin, 10-20 in Katherine and Tennant Creek and 80 in Alice Springs.

2. The actual number of Aborigines in need of nursing home care is not known. What appears to be consistent in most Aboriginal communities is that there is a reluctance to send aged relatives away to be cared for in town. There are however exceptions to this view as the relatives of aged persons from Papunya and Yuendumu prefer their elderly to be cared for at Hetti Perkins Nursing Home.

3. There are no plans to establish separate facilities for elderly Aborigines, i.e., separate nursing homes. Methods of care for elderly Aborigines should be culturally relevant, and if possible provision

made to maintain people in their own community.

Disadvantaged Cards

532 Mr B. COLLINS to MINISTER for HEALTH

How many people does he estimate could be classified as disadvantaged who have not yet received a disadvantaged card and what percentage of these are Aborigines?

ANSWER

The responsibility for determining disadvantaged status rests with the Commonwealth Department of Social Security.

There are no statistics available to me which would enable the estimate requested by the honourable Member to be made.

My department believes from observations made by staff in the field that a large number of Aborigines are not yet covered.

Psychiatric Services

533 Mr B. COLLINS to MINISTER for HEALTH

1. What is the overall strategy of the government to improve psychiatric services?

2. What are seen as the main priorities?

ANSWER

1. The strategy of the government is to provide the most efficient high quality care for psychiatric patients of the Northern Territory. To this end, psychiatric patients have been transferred from the Darwin annex to the main Darwin Hospital at Casuarina. As well, the arrangement with South Australia whereby some long term patients are accommodated in South Australian institutions is being formalised.

2. The main priorities are:

   (a) the improvement in the quality of psychiatric care;
   (b) the examination of the various options for improved facilities in the Northern Territory; and
   (c) negotiations with South Australia on the formal agreement.

Health Funding

535 Mr B. COLLINS to MINISTER for HEALTH

1. When does he expect to re-examine the Territory's revenue raising capacity with the Commonwealth Minister for Health?

2. Is he compiling the necessary statistics previously not available, to strengthen our case for additional Commonwealth funding? If so, what do these statistics comprise?

ANSWER

1. The Commonwealth has indicated that it is prepared to re-examine the revenue raising capacity of the States and the Northern Territory. To date 2 submissions have been made to the Commonwealth, the most recent using data to the end of January 1982. These submissions are currently under consideration by the Commonwealth.

2. Yes, all necessary statistics are being compiled as from 1 September 1981. The statistics will indicate the number of patients who are

disadvantaged and those who are chargeable. The categories are further broken down into Aboriginal and non-Aboriginal.

Staffing Levels in NT Hospitals

541 Mr B. COLLINS to MINISTER for HEALTH

Where does he expect staffing levels in Territory hospitals to be reduced and by how many and when?

ANSWER

Reductions have been achieved at all NT hospitals by natural attrition in all areas. The hospital staffing levels are kept under constant review and raised or lowered as appropriate.

Aboriginal Teaching Assistants

546 Mr B. COLLINS to MINISTER for EDUCATION

How many Aboriginal teaching assistants are expected to be employed in 1981-82 and at which homeland centres?

ANSWER

47 Aboriginal teaching assistants are presently employed in 38 outstations. Applications are being processed as they arrive and another 10 are expected to be employed by the end of semester 1.

Locations and present approvals are indicated below in regions with applications now being received and or processed noted in brackets alongside.

NOTES:

The figures are current for Friday 5 March, but fluctuate greatly as do nominated 'teachers' employed in the communities.

Positions are generally part-time, or shared between 2 persons, by agreement and have in the past been resourced from each central school's pool of assistant teachers. Some additional employment was arranged through the composite use of assistance to isolated children funds at locations where no assistant teacher was employed. Each one is indicated by an asterisk. Prior to 1982 DAA funded several positions through the local councils.

The increase in 1982 is through an arrangement with the Commonwealth Department of Aboriginal Affairs and is seen as a temporary measure to be negotiated further with the Commonwealth if we are to assume their responsibilities on a more permanent basis.

In addition approximately 15 teachers are fully occupied in outstation visiting programs. In addition the production of and local modification of school of the bush and tracks materials requires considerable involvement of teachers and literacy production resources in each central community.

Hospital Treatment of Cases of Domestic Violence

549 Mrs O'NEIL to MINISTER FOR HEALTH

1. When a woman presents to a NT hospital with injuries or illness which she identifies as being caused by domestic violence, what procedures does the hospital follow?

2. What mechanism does the hospital have to ensure the victim is referred to other assistance she may require?

3. In the past 12 months, what number and percentage of (a) outpatients attendances, and (b) inpatient stays were related to domestic violence?

ANSWER

1. When a woman presents to a Northern Territory hospital with injuries or illness and admits or volunteers that they are the result of domestic violence, she is encouraged to discuss her domestic situation with a social worker. If the woman agrees, the police are informed and attend the patient in the hospital.

2. Social workers who see victims of domestic violence make them aware of all avenues of support and assistance available to them. If legal, financial or accommodation assistance is required, arrangements are made.

3. No statistics are kept.

Child Protection Consultative Committee

550 Mr B. COLLINS to ATTORNEY-GENERAL

1. Has the Child Protection Consultative Committee yet been established?

2. If so, has it begun collecting statistics on the incidence of domestic violence?

3. Is any other agency collecting similar data relating to domestic violence affecting adults?

ANSWER

1. The Northern Territory Child Protection Education and Policy Committee was established in Darwin in October 1978. A branch of the committee was later established in Alice Springs in July last year.

   The committee is composed of representatives from the Departments of Health, Education, Law, Community Development and the Police Force, the agencies most involved in child protection issues. Its main role is the promotion of community awareness and education, the co-ordination of community support services, consultation regarding policy matters as well as research in the area of child abuse.

2. The committee's mandate is specifically in the area of child abuse which is only one form of domestic violence.

   The committee has not been in a position to engage in any extensive research into the incidence of child abuse. There is no full-time member of the committee and all the members are fully committed to their respective professions and such research would necessarily be time-consuming.

   Nevertheless, in 1980 the committee conducted a survey in all the primary schools in the Darwin area into the incidence of child abuse among primary school children. Unfortunately the response was not sufficient for the committee to make other than the general conclusion that child abuse does exist at a very real level and that there is a need for community education.

   The Community Welfare Division of the Department of Community Development keeps statistics on all cases of suspected child abuse reported to them. However, until mandatory reporting is introduced, the true incidence of child abuse is difficult to determine.

During 1981 there were 130 reports of suspected child abuse made to the Department of Community Development, of which 72 were substantiated.

3. The Northern Territory Police do not collect any data relating to domestic violence affecting adults.

Douglas-Daly and Upper Adelaide River Experimental Stations

553 Mr B. COLLINS to MINISTER for PRIMARY PRODUCTION

What hectarage of Douglas-Daly Experimental Station and Upper Adelaide River Experimental Station have been transferred from the Department of Primary Production to the Agricultural Development and Marketing Authority?

ANSWER

The Douglas-Daly Regional Farm was previously a sub-lease from Douglas Station, but was included in the land purchased from Douglas by ADMA to provide security of tenure to the department. Therefore, there was no transfer of DPP lands to the authority.

No area of land has been transferred from the Upper Adelaide River Experimental Station to the authority. However, the authority is currently occupying an area of land that was previously part of the UARES that is now incorporated within the Finniss River Aboriginal Land Claim.

A 'Memorandum of Understanding' exists between the department and the authority on the use of this area.

Bilingual Education Programs

576 Mr BELL to MINISTER for EDUCATION

Will staff numbers in bilingual education programs in schools in the southern directorate be maintained next year?

ANSWER

Staffing levels for all government functions and programs are subject to evaluations of performance and priorities and to budgetary considerations.

Molyhill Mine in Central Australia

592 Mr BELL to MINISTER for MINES and ENERGY

1. Have officers from the inspection and safety section visited the Molyhill mine in central Australia recently?

2. If so, what were their comments and recommendations regarding dust suppression and the use of cyanide?

3. Were copies of the officers' report made available to Molyhill employees and, if not, why not?

ANSWER

1. Yes. The dates and visits are as follows:

7 April 1981 - electrical inspector; 28 May 1981 - electrical inspector; 24 June 1981 - inspector of machinery, safety promotion officer, chief occupational hygienist; 30 June 1981 - electrical inspector; 3 July 1981 - district inspector of mines, Director Industrial Safety, machinery inspector; 12 August 1981 - electrical inspectors; 4 September 1981 - machinery inspector; 3 November 1981 - inspector of mines; 24 November 1981 - inspector of mines, electrical inspector, chief metallurgist; 16 December 1981 - inspector of mines, machinery inspector, lease draftsman; 27 January 1982 - electrical inspector.

2. The district inspector's report in the record book does not take up the question of dust or cyanide.

   A possible dust problem was recognised earlier in the year in one of the machines and this had been referred to the chief occupational hygienist for investigation which he undertook in June. He would evaluate whether there was a problem.

   He reported that:

   'On 24 June a visit was carried out by the Department's Senior Chemist, Safety Promotions Officer and Chief Occupational Hygienist, when a general lecture was given on occupational hygiene. The mine was working at the time and dust samples were taken. However, it was learned that night that the mine was to cease operations the next day and so the samples were never processed. No entry was made in the Mine Record Book as these officers were not inspectors and had no statutory right or obligation to make such entries. The matter was discussed with the District Inspector on return to Alice Springs.'.

   The district inspector of mines, after his July visit, brought the situation to the attention of Mr M. Uhlman, the manager, when he telephoned him on 28 and 29 July. An investigation was to be made into whether there was provision for dust suppression in the original design of the impactor. Information was sought from the New Zealand manufacturer, but in the meantime the plant was closed down.

   The manager called at the district office on 4 August and at that time indicated that he would be laying off 14 men about 24 August. This was later followed by a letter confirming the transfer of the plant to a care and maintenance basis from 1 October.

   Cyanide had been taken to the plant for investigation work to be conducted by the company's metallurgist. A little was used but extensive tests did not eventuate and the drums were stored in a locked enclosure. There was no need for comment as the storage was adequate, being kept in a locked cage in the open and provisions are made in the Mine Safety Control Act for the handling of cyanide.

   Employment at Molyhill from district inspector's records;

   30 June 1981 - 41; 31 July 1981 - 34; 31 August 1981 - 18;
   30 September 1981 - 17; 31 October 1981 - 7; 30 November 1981 - 5;
   31 December 1981 - 4.

   From the information gathered:

   Production from the pit stopped on 24 August. Cleaning up continued until 1 October. Care and maintenance continued until November. Drilling crews only were on site in November-December.

3. The district inspector's reports are written in the mine record book during each visit. Omissions in the record book relating to weekly reports by the mine manager were pointed out by the inspector on his visit on 20 July and recorded in the record book.

   It is the responsibility of the manager to make available mine record book entries to any person on the mine site and there is no indication that the manager withheld information of record book entries. However, as mentioned there was nothing in the content of any of the entries which referred to dust or cyanide.

Aboriginal Health Workers

593 Mr BELL to MINISTER for HEALTH

Does his department have a policy of employing Aboriginal health workers on mobile rural health teams and, if not, why not?

ANSWER

The Department of Health has a policy of using Aboriginal health workers wherever possible in rural areas. In situations where mobile health teams visit outstations from such communities as Yuendumu and Warrabri, Aboriginal health workers are an integral part of the teams.

However, where teams travel to locations where health workers are stationed a health worker may not be included in their entourage in order not to offend many of the tribal and clan differences.

Superannuation Salary Deductions for NT Public Servants

601 Mr SMITH to TREASURER

1. What amount has been deducted from the salaries of NT government employees for superannuation purposes since 1 July 1978?
2. What amount has been forwarded by the NT government to the Commonwealth Superannuation Fund Investment Trust Account since 1 July 1978?
3. How much of the total amount deducted from employees' salaries for superannuation in the NT since 1 July 1978, has (a) been kept in the NT, (b) to what purpose has it been put, and (c) what rates of interest has been earned on this money?

ANSWER

1. Since 1 July 1978, the total amount deducted from the salaries of NT government employees for superannuation purposes has been approximately $28 million.
2. All of the amounts deducted have been forwarded to the Commonwealth Superannuation Fund Investment Trust Account, as required under the Commonwealth Superannuation Act 1976.
3. (a) None of the amounts deducted have been kept in the NT.
