

LEGISLATIVE ASSEMBLY OF THE NORTHERN TERRITORY

No. 102

WRITTEN QUESTION

K McNamara to the Treasurer, Hon Bill Yan MLA:

Questions for Territory Generation

These are questions that were prepared for Estimates, however, due to time limitation they were unable to be asked.

1. What is the current minimum generation capacity for the DKIS?
2. Is DKBESS1 fully operational?
3. The TGen Sci says the installation of DKBESS1 permits one of the gas turbines at channel island to be decommissioned, can you please confirm if this is the case?
4. If so, has the turbine been decommissioned and is it the same turbine being transformed into a synchronous condenser?
5. Can you please confirm the status of DKBESS 2 procurement and the size of the battery or batteries and proposed locations for them?
6. Can you please provide the details of further generation and storage projects planned and/or approved?
7. Has the TM2500 turbine purchased in 2021 been commissioned yet?
8. If not, why not?
9. The TGen Sci includes the forecast capital expenditure which includes the cost of the fleet transition plan. Is the forecast capital expenditure for further replacement turbines (it would appear so based on the statement above from 2021)?
10. Please provide details of the capital expenditure including how many turbines are intended to be replaced under this forecast?
11. What sort of turbines are the replacements?

12. When they will be replaced?
 13. What is the minimum generating capacity of the generators?
 14. Are there any contracts on foot for replacement turbines?
 15. If so, can you please provide details?
-

ANSWER

This will be responded to under Written Question 101.
