

# ESTIMATES COMMITTEE

## Question Taken on Notice

Question Number: 9.5

Output Number: 3.1

Date: 18/06/2025

From: K McNamara

To: Hon Joshua Burgoyne

Portfolio: Lands, Planning and Environment

Agency: Lands, Planning and Environment

Subject: Threatened Species not covered or supported by Commonwealth

---

**QUESTION:** Could I please get a list of threatened species in the Territory that are not covered or supported by any Commonwealth funding in the Commonwealth recovery program?

**ANSWER:**

Table 1 lists the 230 taxa (species and subspecies) occurring in the Northern Territory (NT) which are listed as threatened under the *Territory Parks and Wildlife Conservation Act 1976* (TPWCA) or *Environment Protection and Biodiversity Conservation Act 1999* (EPBCA).

The Table shows which species:

- have a published Recovery Plan, active Recovery Team or published Conservation Advice as provided for by the EPBC Act (these provisions are described further at <https://www.dcceew.gov.au/environment/biodiversity/threatened>);
- are a priority species under the Commonwealth Threatened Species Action Plan 2022-2032 (<https://www.dcceew.gov.au/environment/biodiversity/threatened/publications/priority-species>); and
- have current or recent Commonwealth funding directed toward their conservation in the NT.

The latter category reflects information available to the Flora and Fauna Division, which may not be comprehensive. Commonwealth funding is provided to non-government organisations through programs such as the Saving Native Species Program and the National Landcare Program. The Commonwealth also funds the management of Uluru-Kata Tjuta and Kakadu National Parks which are important for many threatened species.

Management actions supported by the NT Government are also directed to many of the threatened species listed in Table 1. This includes protection of habitat in the NT Parks estate, and investment in the management of key threatening processes including fire, weeds and feral animals.

A large proportion of the work of the Flora and Fauna Division is directed toward the conservation of threatened species, including:

- understanding their distribution through targeted, local and regional scale surveys, and maintaining comprehensive spatial data for all NT threatened species;

- documenting and assessing their conservation status including formal listing under the TPWCA;
- applied research to understand the ecology of priority threatened species and the impact of threatening processes;
- working with landowners and managers to implement management that protects or recovers threatened species; and
- providing expert advice on the mitigation of potential impacts to threatened species in the context of land use planning, development assessment and environmental impact assessment.

**Table 1.** Threatened species occurring in the NT, as listed under the TPWCA or EPBCA. Threatened species include those listed as Vulnerable (VU), Endangered (EN), Critically Endangered (CE) or Extinct in the Wild in the NT (EXW(NT)). The Table indicates which species have a Recovery Plan, active Recovery Team or published Conservation Advice as provided for by the EPBCA. The Table also indicates whether the species is a priority species under the Commonwealth Threatened Species Action Plan (2022-2032) and whether there is current or recent Commonwealth funding directed toward conservation of this species in the NT.

<sup>1</sup>The provided taxonomy and species' conservation status are current. Therefore, there are some differences in conservation status, names and taxonomy to that published on our 2021 Classification of Wildlife, NT's gazetted threatened species list. The Department is currently undertaking a review of the Classification of Wildlife in 2025 that will incorporate changes to species' conservation status under TPWCA and EPBCA due to conservation listing assessment outcomes, and revisions to names and taxonomy.

<sup>2</sup>Conservation status codes: CR = Critically Endangered, EN = Endangered, VU = Vulnerable, EXW (NT) = Extinct in the wild in the Northern Territory, EX.

<sup>3</sup>Threatened species listed under the *Territory Parks and Wildlife Conservation Act 1976*

<sup>4</sup>Threatened species listed under the *Environment Protection and Biodiversity Conservation Act 1999*

<sup>5</sup>Recovery Plans and Conservation Advices guide recovery planning and identify actions required for conservation and recovery of threatened species. Note that the majority of these documents are not up to date and require formal review.

<sup>6</sup>Priority threatened species identified in the Threatened Species Action Plan 2022-2032 [Priority Species - DCCEEW](#)

<sup>7</sup>Threatened species currently receiving some form of Commonwealth Government funding. Additional threatened species may be receiving Commonwealth Funding that the Department are unaware of.
