The workshop will capture the most recent information on habitats critical to marine turtles which will be listed on a Commonwealth register. The NT seeks to contribute by providing the most recent information on important nesting and foraging areas for turtles. The NT shares turtle populations with neighbouring jurisdictions necessitating consistent management. The meeting provides opportunity for DLRM to align with turtle research and management maximising planning and priority conservation action for northern Australia.	277.19	368.00	772.59	0.00	1,417.78
